Experimental investigations into the wall interference and sidewall boundary layer effects in the National Research Council/Inst. for Aerospace Research High Reynolds Number 2-D Test Facility
p 2658 N94-28350
Computation of wind-tunnel side-wall interference using 3D Navier-Stokes code p 2658 N94-28351
Evaluation of the buoyancy drag on automobile models in low speed wind tunnels p 2658 N94-28352
AERODYNAMIC LOADS
Correlation of airloads on a two-bladed helicopter rotor
[NASA-TM-103982] p 2644 N94-26143
Analysis/test correlation using VAWT-SDS on a step-relaxation test for the rotating Sandia 34 m test bed
[DE94-002290] p 2857 N94-26700
Impact tests on fibre metal laminates under a tensile load
[PB94-126570] p 2710 N94-27201
Application of the influence function method using the interference distributed loads code to prediction of store aerodynamic load during separation from the CF-18 fighter aircraft p 2654 N94-28330
AERODYNAMIC NOISE
Silence amenity engineering: Past and present
p 3011 N94-27283
AERODYNAMIC STABILITY
Eagle RTS: A design of a regional transport
p 2671 N94-25709
Low-speed pressure distribution measurements over the aft-fuselage, fins, and stabilators of a 1/9th scale F/A-18 wind-tunnel model
[AD-A274870] p 2644 N94-26342
Effects, limits, and limitations of spanwise blowing
p 2659 N94-28027
AERODYNAMIC STALLING
Computational investigation of the compressible dynamic stall characteristics of the Sikorsky SSC-A09 airfoil
[AD-A274867] p 2644 N94-26191
Compressor stability p 2828 N94-28046
Potential flow modelling of airfoil stall
p 2654 N94-28332
Preliminary assessment of aerodynamic effects of wing repair patches p 2657 N94-28346
AERODYNAMICS
Preliminary design of nine high speed civil transports
p 2671 N94-25710
The identification of inflow fluid dynamics parameters that can be used to scale fatigue loading spectra of wind turbine structural components
[DE94-000231] p 2791 N94-26117
Proceedings of the Non-Linear Aero Prediction Requirements Workshop
[NASA-CP-10138] p 2670 N94-27439
NAS technical summaries. Numerical aerodynamic simulation program, March 1992 - February 1993
[NASA-RP-1321] p 3118 N94-27764
Control jets in interaction with hypersonic rarefied flow
p 2698 N94-28020
Transient model applications. 1: Compressor heat soak/clearance effects modeling p 2828 N94-28048
Examples of excrescence drag prediction for typical wing components of a subsonic transport aircraft at the cruise condition
[ESDU-93032] p 2649 N94-28144
Aeronautical engineering: A continuing bibliography with indexes (supplement 301)
[NASA-SP-7037(301)] p 2643 N94-28203
Abstracts of papers presented at the 4th CASI Aerodynamics Symposium
[ISBN-0-920203-01-9] p 2651 N94-28315
AEROELASTICITY
A comparative study of serial and parallel aeroelastic computations of wings
[NASA-TM-108805] p 2645 N94-26538
Methods in unsteady aerodynamics
[DLR-FB-93-21] p 2648 N94-27741
Understanding and development of a prediction method of transonic limit cycle oscillation characteristics of fighter aircraft
[NLR-TP-92210-U] p 2679 N94-27798
Multidisciplinary aeroelastic analysis of a generic hypersonic vehicle
[NASA-TM-4544] p 2691 N94-27868
Wing design for a civil tiltrotor transport aircraft: A preliminary study p 2671 N94-27917
A review of recent aeroelastic analysis methods for propulsion at NASA Lewis Research Center
[NASA-TP-3406] p 2846 N94-28227
AERONAUTICAL ENGINEERING
Aeronautical engineering: A continuing bibliography with indexes (supplement 301)
[NASA-SP-7037(301)] p 2643 N94-28203
AEROSOLS
The chemical detector paper as a potential alarm
[FFI-93/6007] p 2712 N94-25745
Analytic approximation to randomly oriented spheroid extinction
[DREV-4712-93] p 3038 N94-27598
AEROSPACE ENGINEERING
Technology development in space projects
[VTT-TIED-1438] p 2682 N94-26249
University of Toronto Institute for Aerospace Studies
[CTN-94-61013] p 3117 N94-26701
Proceedings of the Non-Linear Aero Prediction Requirements Workshop
[NASA-CP-10138] p 2670 N94-27439
NAS technical summaries. Numerical aerodynamic simulation program, March 1992 - February 1993
[NASA-RP-1321] p 3118 N94-27764
Laboratory of Space Technology
[PB94-133204] p 2689 N94-28358
AEROSPACE ENVIRONMENTS
Proceedings of the 8th Annual Summer Conference: NASA/USRA Advanced Design Program
[NASA-CR-195118] p 3075 N94-25665
Automation of closed environments in space for human comfort and safety p 2943 N94-25684
Long Duration Exposure Facility space optics handbook
[AD-A274831] p 3035 N94-26572
Physics of debris clouds from hypervelocity impacts
[NASA-CR-193932] p 2696 N94-26791
Development and application of contamination technology for MSFC managed space systems
[NASA-CR-193934] p 2697 N94-27421
Evaluation of high temperature superconductive thermal bridges for space-borne cryogenic infrared detectors
p 2815 N94-27921
Prometheus in space: Research Committee on Functional New Material
[JTN-94-80580] p 2761 N94-28002
AEROSPACE INDUSTRY
Technology development in space projects
[VTT-TIED-1438] p 2682 N94-26249
Future of aerospace
[PB94-120185] p 2669 N94-26906
Thermoplastic or thermosetting composites in aircrafts
[PB94-123809] p 2710 N94-27253
AEROSPACE MEDICINE
Plasma volume shifts and exercise thermoregulation with water immersion and six-degree head-down tilt
[NASA-TM-108781] p 2901 N94-26093
US Army aviation epidemiology data registry: Incidence and outcomes of aviator flying evaluation boards
[AD-A274711] p 2910 N94-26432
Aeromedical issues related to positive pressure breathing for +Gz protection
[AD-A274717] p 2910 N94-26435
Monograph of the Aviation Epidemiology Data Register for CY 1992
[AD-A274400] p 2911 N94-27130
Brain wave correlates of attentional states: Event related potentials and quantitative EEG analysis during performance of cognitive and perceptual tasks
p 2940 N94-27901
The Reports of Aeromedical Laboratory, volume 33, number 4
[JTN-94-80586] p 2933 N94-27942
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 386)
[NASA-SP-7011(386)] p 2933 N94-28208
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 387)
[NASA-SP-7011(387)] p 2933 N94-28213
Aerospace medicine and biology: A cumulative index to a continuing bibliography (supplement 384)
[NASA-SP-7011(384)] p 2934 N94-28219
Workshop on Countering Space Adaptation with Exercise: Current Issues
[NASA-CP-3252] p 2934 N94-28361
Does training-induced orthostatic hypotension result from reduced carotid baroreflex responsiveness?
p 2935 N94-28366
Cardiac output and cardiac contractility by impedance cardiography during exercise of runners
p 2935 N94-28367
Weightlessness and the human skeleton: A new perspective p 2935 N94-28368
Irreversibility of advanced osteoporosis: Limited role for pharmacologic intervention p 2935 N94-28369
Exercise and osteoporosis: Methodological and practical considerations p 2935 N94-28370

Visit to CERMA: Centre d'Etudes et de Recherches de Medecine Aerospatiale, Centre for Studies and Research in Aviation and Space Medicine, Bretigny sur Orge, France, November 16-18, 1992
[PB94-132990] p 2937 N94-28392

AEROSPACE SAFETY
Preliminary reentry safety assessment of the General Purpose Heat Source module for the Cassini mission: Aerospace Nuclear Safety Program
[DE94-001646] p 2699 N94-25926
Aerospace safety advisory panel
[NASA-TM-109692] p 3118 N94-27381
Risks and issues in fire safety on the Space Station
[NASA-TM-106430] p 2692 N94-27436
Summary of NASA Aerospace Flight Battery Systems Program activities p 2860 N94-28101

AEROSPACE SCIENCES
Technical and scientific research for aeronautics and astronautics
[ETN-94-95392] p 2641 N94-26212

AEROSPACE SYSTEMS
Development and application of contamination technology for MSFC managed space systems
[NASA-CR-193934] p 2697 N94-27421
Effects of expected-value information and display format on recognition of aircraft subsystem abnormalities
[NASA-TP-3395] p 2673 N94-27882
Lunar Transportation Facilities and Operations Study, option 1
[NASA-CR-195700] p 3109 N94-27982
Lunar Transportation Facilities and Operations Study, option 2
[NASA-CR-195701] p 3109 N94-27983
Summary of NASA Aerospace Flight Battery Systems Program activities p 2860 N94-28101

AEROSPACE TECHNOLOGY TRANSFER
The proliferation of aerospace weapons technology: Ballistic missiles and the case of Brazil
[ISBN-0-315-84082-X] p 2763 N94-26634
NASA: Major challenges for management. Testimony before the Legislation and National Security Subcommittee, Committee on Government Operations, House of Representatives
[GAO/T-NSIAD-94-18] p 3095 N94-28176

AEROSPACE VEHICLES
Development of methodologies for the estimation of thermal properties associated with aerospace vehicles
p 2846 N94-27920

AEROTHERMOCHEMISTRY
Ablation of solid-propellant rocket-motor nozzle materials
[ESA-TT-1289] p 2699 N94-25638

AFFERENT NERVOUS SYSTEMS
Contribution of muscle spindle afferent activity to transient pause in EMG during voluntary tonic contraction p 2928 N94-27522

AFRICA
Assessment of tropical forests using satellite data
[SILVA-CARELICA-21] p 2850 N94-27182
Mapping closed tropical forest cover in West Africa using NOAA/AVHRR-LAC data p 2850 N94-27184

AFTERBURNING
Engine starting and stopping p 2828 N94-28047

AGING (MATERIALS)
Effects of physical aging on long-term behavior of composites p 2712 N94-27897

AGING (METALLURGY)
Issues for conversion coating of aluminum alloys with hydrotalcite
[DE94-003804] p 2732 N94-25819

AGRICULTURE
Methane emissions from natural wetlands
[DE93-040796] p 2865 N94-25790

AIR CARGO
Integrators: A challenge for air cargo
p 2662 N94-28244

AIR CONDITIONING
Absorption technology for solar and waste heat utilization p 2854 N94-26053
A method for testing of HVAC automation equipment using the emulator and the application of the method
[VTT-TIED-1435] p 2822 N94-26306

AIR CONDUCTIVITY
The Lightcraft project: Flight technology for a hypersonic mass transit system p 2670 N94-25695

AIR COOLING
Cooling towers for combined cycles: New developments to meet environmental requirements
p 2832 N94-28088

AIR DATA SYSTEMS
Pressure distributions on a 0.02-scale Space Shuttle orbiter nose at Mach 21.5 in helium
[NASA-TM-4495] p 2646 N94-26592
Production of a computer based lesson teaching employees how to use an air data tester
[ISBN-0-315-84706-5] p 2969 N94-27316

First Canadair jet flies for Lufthansa city line
p 2662 N94-28243

AIR FLOW
Recent ASCOT experiments in multi-layered flows
[DE94-002360] p 2880 N94-26762
Numerical analysis of the photo-dissociation/radical oxidation of formaldehyde by ultraviolet light in a photolytic reactor
[AD-A274539] p 2868 N94-26843
Propagation of cold air masses in East Asia and its associated planetary-scale function
[AD-A274304] p 2895 N94-26850
An experimental study of plunging liquid jet induced air carryunder and dispersion
[AD-A274414] p 2794 N94-26979
Experimental verification of tomographic reconstruction of turbulent air flow structure using optical wavefront measurements
[AD-A274392] p 2795 N94-27129
An overview of the ASCOT program
[DE94-004356] p 2869 N94-27601

AIR JETS
Transitional flight characteristics of a geometrically simplified STOVL model p 2672 N94-28035
Analysis of cooling jets near the leading edge of turbine blades p 2676 N94-28037
Inclined air-jets used as vortex generators to suppress shock-induced separation p 2659 N94-28040

AIR MASSES
Propagation of cold air masses in East Asia and its associated planetary-scale function
[AD-A274304] p 2895 N94-26850

AIR NAVIGATION
Realtime mitigation of GPS SA errors using Loran-C
p 2642 N94-27291
A sky above Europe p 2661 N94-28234

AIR POLLUTION
Air pollution transport modeling
[AD-A273863] p 2865 N94-25609
Evaluation of a Canadian minitube air sampling system
[FOA-C-40307-4.6] p 2866 N94-25809
Study on neutron activation analysis
[DE93-632191] p 3017 N94-26116
Environmental benefits of different types of heat pumps, available and expected
[DE94-002440] p 2866 N94-26123
SIHTI 2: Energy and environmental technology
[DE94-702061] p 2867 N94-26241
An observational study of air pollution transport over a large urban complex
[REPT-6] p 2867 N94-26474
Compilation of air pollutant emission factors. Volume 1: Stationary point and area sources. Supplement F
[PB94-121431] p 2867 N94-26757
A robust upwind discretization method for advection, diffusion and source terms
[CWI-NM-R9308] p 2868 N94-26774
Numerical analysis of the photo-dissociation/radical oxidation of formaldehyde by ultraviolet light in a photolytic reactor
[AD-A274539] p 2868 N94-26843
Advances in passive-remote and extractive Fourier transform infrared spectroscopic systems
[DE94-001424] p 2868 N94-26952
An overview of the ASCOT program
[DE94-004356] p 2869 N94-27601
The single European market: Economical advance, ecological problem? p 2661 N94-28235
Indian activities on the core programme IGAP and proposals for network activities p 2874 N94-28284
Fibrous ceramic candle filter for particle removal in pressurized fluidized bed combustion
[PB94-133089] p 2876 N94-28383
Experimental studies of pressurised fluidised bed combustion at Helsinki University of Technology, 1991-1992
[PB94-133063] p 2876 N94-28394

AIR QUALITY
Advances in passive-remote and extractive Fourier transform infrared spectroscopic systems
[DE94-001424] p 2868 N94-26952

AIR SAMPLING
Evaluation of a Canadian minitube air sampling system
[FOA-C-40307-4.6] p 2866 N94-25809
Study on neutron activation analysis
[DE93-632191] p 3017 N94-26116

AIR TO AIR REFUELING
Manned mission to Mars with periodic refueling from electrically propelled tankers p 2689 N94-25670
Design of a refueling tanker delivering liquid hydrogen
p 2671 N94-25717

AIR TRAFFIC
Air traffic controller working memory: Considerations in air traffic control tactical operations
[AD-A273722] p 2664 N94-26197
Rotorcraft low altitude IFR benefit/cost analysis: Conclusions and recommendations
[AD-A274241] p 2665 N94-26826
Lufthansa Yearbook 1992
[DSK-9734-H-92] p 2660 N94-28230
The single European market and air traffic chances and risks p 2660 N94-28231
Deregulation of air traffic in America: A model to be initiated? p 2661 N94-28232
Air traffic of the European Community with European neighbors p 2661 N94-28233
The advantages of the location Germany must not be jeopardized in air traffic p 2661 N94-28236
Air traffic administration enroute to Europe
p 2661 N94-28238
Air traffic in recession p 2662 N94-28240
German-American relations in air traffic are to be criticized p 2662 N94-28241

AIR TRAFFIC CONTROL
Air traffic controller working memory: Considerations in air traffic control tactical operations
[AD-A273722] p 2664 N94-26197
Rotorcraft low altitude IFR benefit/cost analysis: Conclusions and recommendations
[AD-A274241] p 2665 N94-26826
An investigation of air transportation technology at the Massachusetts Institute of Technology, 1992-1993
p 2641 N94-27285
Air traffic management as principled negotiation between intelligent agents p 2643 N94-27297
Optical communications for transport aircraft
p 2643 N94-27298
Aircraft accident report: Runway departure following landing American Airlines flight 102, McDonnell Douglas DC-10-30, N139AA, Dallas/Fort Worth International Airport, Texas, April 14, 1993
[PB94-910402] p 2660 N94-27766
Refinement for fault-tolerance: An aircraft hand-off protocol
[NASA-CR-195697] p 2666 N94-27768
Special investigation report: Safety issues related to wake vortex encounters during visual approach to landing
[PB94-917002] p 2660 N94-27881
A sky above Europe p 2661 N94-28234

AIR TRAFFIC CONTROLLERS (PERSONNEL)
Airborne data link operational evaluation test plan
[AD-A274096] p 2664 N94-25788
Air traffic controller working memory: Considerations in air traffic control tactical operations
[AD-A273722] p 2664 N94-26197
Validation of the Federal Aviation Administration air traffic control specialist pre-training screen
[DOT/FAA/AM-94/4] p 2938 N94-26600

AIR TRANSPORTATION
A constitutive model for layered wire mesh and aramid cloth fabric
[DE94-003275] p 2708 N94-26796
FAA/NASA Joint University Program for Air Transportation Research, 1992-1993
[NASA-CP-3246] p 2641 N94-27284
An investigation of air transportation technology at the Massachusetts Institute of Technology, 1992-1993
p 2641 N94-27285
Investigation of air transportation technology at Ohio University, 1992-1993 p 2642 N94-27288
Investigation of air transportation technology at Princeton University, 1992-1993 p 2643 N94-27294
Methodology development of forecasting inter-regional air transport demand in China
[DLR-FB-93-24] p 2660 N94-27746
The 1993 Federal Aviation Administration plan for research, engineering and development
p 2643 N94-27960
Air traffic of the European Community with European neighbors p 2661 N94-28233
Lufthansa facing the single European market
p 2661 N94-28237
Integrators: A challenge for air cargo
p 2662 N94-28244
Powerful selling and sales strategy
p 2662 N94-28245
Lufthansa and Europe p 2663 N94-28247

AIR WATER INTERACTIONS
Development and testing of the Coupled Ocean/Atmosphere Mesoscale Prediction System (COAMPS)
[AD-A273925] p 2892 N94-25793
Conversion of the CLUSE model for applications over open ocean
[AD-A273750] p 2893 N94-26013
Interpreting the implied meridional oceanic energy transport in AMIP
[DE94-001538] p 2898 N94-26072

Meeting of the Eighth Session of the Scientific Advisory Committee of the World Climate Impact Assessment and Response Strategies Programme
[DE93-633954] p 2866 N94-26163

The numerical simulation of marine boundary layer clouds
[AD-A273669] p 2894 N94-26195

Differentiating the role of land surface variability and cloudiness variability on global energy transport within the atmosphere and oceans
[NASA-CR-195229] p 2847 N94-26222

Analysis and interpretation of the meteorology of the 1988 coastal transition zone experiment
[AD-A274710] p 2894 N94-26431

The NOGAPS ten year AMIP integration
[AD-A274332] p 2900 N94-26887

An experimental study of plunging liquid jet induced air carryunder and dispersion
[AD-A274414] p 2794 N94-26979

Acoustic bubble sizing, using active and passive techniques to compare ambient and entrained populations
[ISVR-TR-229] p 2807 N94-28172

Asia-Pacific Seminar on Global Change Research Cooperation
[JTN-94-80517] p 2871 N94-28268

Cooperative research projects on satellite remote sensing for the hydrological subjects
p 2853 N94-28270

An oceanographical observation in the Western Pacific and international cooperations p 2872 N94-28272

AIRBORNE EQUIPMENT

MODIS airborne simulator visible and near-infrared calibration, 1992 ASTEX field experiment. Calibration version: ASTEX King 1.0
[NASA-TM-104599] p 2897 N94-28179

AIRBORNE LASERS

The development of Cr, Tm, Ho:YAG lasers for airborne lidar
[AD-A274895] p 2816 N94-26178

AIRBORNE RADAR

A comparative evaluation of SAR and SLAR
[DE94-002922] p 2848 N94-26277

AIRBORNE/SPACEBORNE COMPUTERS

Technology drivers for flight telerobotic system software p 2684 N94-26289

Real-Time Embedded Processing for Space Applications
[ISBN-2-85428-335-X] p 2948 N94-26713

Computing in space: Issues and answers
p 2948 N94-26714

Development of a MIL-STD-1750 microprocessor system for space applications p 2949 N94-26715

On-board computer for control subsystem of satellite
p 2949 N94-26716

High performance flight computer developed for deep space applications p 2949 N94-26718

Qualified manufacturing and interoperability for space applications p 2949 N94-26719

Fault tolerant real-time processing system for space use p 2949 N94-26720

Design principles of onboard management of a Sun synchronous satellite p 2950 N94-26722

NASA's spacecraft data system p 2950 N94-26723

The Ariane 5 data management system
p 2950 N94-26724

PRONAOS flight software: A real-time application for a balloonborne scientific gondola p 2950 N94-26725

MATRA Marconi Space: The Silex on-board processor and on-board software p 2950 N94-26726

On-board software for the JET-X telescope on the Spectrum-X mission p 2951 N94-26727

Early real-time performance measurements on the Columbus processor system p 2952 N94-26736

Test of onboard real time applications (LICE (tm))
p 2952 N94-26737

Developing with Ada using HOOD design methodology
p 2953 N94-26741

Ada reusable software for satellite on-board data handling p 2953 N94-26743

Center for space microelectronics technology
[NASA-CR-195282] p 2786 N94-27574

AIRCRAFT ACCIDENT INVESTIGATION

Aircraft accident report: Runway departure following landing American Airlines flight 102, McDonnell Douglas DC-10-30, N139AA, Dallas/Fort Worth International Airport, Texas, April 14, 1993
[PB94-910402] p 2660 N94-27766

AIRCRAFT ACCIDENTS

Impact of improved materials and cabin water spray on commuter aircraft postcrash fire survivability
[AD-A274421] p 2660 N94-27081

Aircraft accident report: Runway departure following landing American Airlines flight 102, McDonnell Douglas DC-10-30, N139AA, Dallas/Fort Worth International Airport, Texas, April 14, 1993
[PB94-910402] p 2660 N94-27766

Special investigation report: Safety issues related to wake vortex encounters during visual approach to landing
[PB94-917002] p 2660 N94-27881

AIRCRAFT ANTENNAS

Developments in the application of the geometrical theory of diffraction and computer graphics to aircraft inter-antenna coupling analysis
[ISBN-0-315-84643-7] p 2776 N94-27308

AIRCRAFT APPROACH SPACING

An investigation of air transportation technology at the Massachusetts Institute of Technology, 1992-1993
p 2641 N94-27285

AIRCRAFT COMPARTMENTS

Assessing the effects of Tuned Vibration Absorbers (TVAs) on interior cabin noise levels: A correlation between analytical acoustic predictions and flight test measurements p 2652 N94-28318

AIRCRAFT CONFIGURATIONS

Preliminary design of nine high speed civil transports
p 2671 N94-25710

Design optimization of high-speed proprotor aircraft
[NASA-TM-103988] p 2667 N94-26151

Analysis and optimization of preliminary aircraft configurations in relationship to emerging agility metrics
[NASA-CR-195228] p 2668 N94-26235

A technique for integrating engine cycle and aircraft configuration optimization
[NASA-CR-191602] p 2668 N94-26606

Application of the MBTEC Euler code to the Challenger and the CF-18 complete aircraft configurations
p 2653 N94-28324

AIRCRAFT CONSTRUCTION MATERIALS

A revolutionary approach to composite construction and flight management systems for small, general aviation airplanes p 2671 N94-25714

X ray computed tomography for emerging aerospace materials and processes development
[AD-A273721] p 2705 N94-25779

NASA Lewis Research Center lean-, rich-burn materials test burner rig
[NASA-CR-194437] p 2680 N94-26141

Experimental study of the angled crack in GLARE 3
[PB94-126554] p 2669 N94-26954

Development of fibre-metal laminates, ARALL and GLARE, new fatigue resistant materials
[PB94-126471] p 2669 N94-26969

Thermoplastic or thermosetting composites in aircrafts
[PB94-123809] p 2710 N94-27253

Composite leading edge/spar member for an aircraft control surface
[CA-PATENT-1-325-765] p 2669 N94-27273

Fracture toughness and crack resistance of damage tolerant and high strength Al-Li alloys
[NLR-TP-91249-U] p 2743 N94-27795

Status and prospects for aluminium-lithium alloys in aircraft structures
[NLR-TP-92193-U] p 2743 N94-27797

Development of methodologies for the estimation of thermal properties associated with aerospace vehicles
p 2846 N94-27920

AIRCRAFT CONTROL

The application of a C(star) flight control law to large civil transport aircraft
[CRANFIELD-AERO-9303] p 2676 N94-25640

Report on a visit to the Arvin/Calspan Corporation, Buffalo, New York, USA, September 1992
[CRANFIELD-AERO-9305] p 2676 N94-25653

Design of a flight controller for an unmanned research vehicle with control surface failures using quantitative feedback theory
[AD-A274049] p 2677 N94-25833

Aircraft maneuvers for the evaluation of flying qualities and agility. Volume 3: Simulation data
[AD-A273814] p 2667 N94-25961

Analysis and optimization of preliminary aircraft configurations in relationship to emerging agility metrics
[NASA-CR-195228] p 2668 N94-26235

Research in robust control for hypersonic aircraft
[NASA-CR-195250] p 2678 N94-26821

Standardization of aircraft control and performance symbology on the USAF head-up display
[AD-A274283] p 2673 N94-26989

Reconfigurable aircraft stick control
[AD-D016043] p 2681 N94-27113

Design and flight test of the Propulsion Controlled Aircraft (PCA) flight control system on the NASA F-15 test aircraft
[NASA-CR-186028] p 2674 N94-27432

Aircraft accident report: Runway departure following landing American Airlines flight 102, McDonnell Douglas DC-10-30, N139AA, Dallas/Fort Worth International Airport, Texas, April 14, 1993
[PB94-910402] p 2660 N94-27766

Comparison of performance in simulator flight among subjects with different simulator experiences
p 2933 N94-27943

First experimental assessment of RCS plume-flow field interaction on Hermes leading edge thruster configuration p 2703 N94-28032

AIRCRAFT DESIGN

Proceedings of the 8th Annual Summer Conference: NASA/USRA Advanced Design Program
[NASA-CR-195118] p 3075 N94-25665

Design of the advanced regional aircraft, the DART-75
p 2671 N94-25708

Preliminary design of nine high speed civil transports
p 2671 N94-25710

Supercruiser Arrow HS-8 p 2671 N94-25711

Tesseract supersonic business transport
p 2671 N94-25713

A revolutionary approach to composite construction and flight management systems for small, general aviation airplanes p 2671 N94-25714

Design study to simulate the development of a commercial freight transportation system
p 2671 N94-25715

The design of four hypersonic reconnaissance aircraft
p 2671 N94-25716

Design of a refueling tanker delivering liquid hydrogen
p 2671 N94-25717

The design of a long-range megatransport aircraft
p 2671 N94-25718

Solar powered multipurpose remotely powered aircraft
p 2671 N94-25719

EGADS: A microcomputer program for estimating the aerodynamic performance of general aviation aircraft
[NASA-TM-104013] p 2667 N94-26091

Design optimization of high-speed proprotor aircraft
[NASA-TM-103988] p 2667 N94-26151

A technique for integrating engine cycle and aircraft configuration optimization
[NASA-CR-191602] p 2668 N94-26606

A multivariate anthropometric method for crew station design: Abridged
[AD-A274588] p 2941 N94-26984

Proceedings of the Non-Linear Aero Prediction Requirements Workshop
[NASA-CP-10138] p 2670 N94-27439

Techniques to improve maneuver stability characteristics of a nonlinear wide-body transport airplane in cruise flight
[NASA-TM-4521] p 2679 N94-27660

Wing design for a civil tiltrotor transport aircraft: A preliminary study p 2671 N94-27917

Abstracts of papers presented at the 4th CASI Aerodynamics Symposium
[ISBN-0-920203-01-9] p 2651 N94-28315

The deterministic power-spectral-density-method for nonlinear systems
[AD-B179687] p 3001 N94-28353

AIRCRAFT ENGINES

Evaluation of moderate angle of attack roll of a dual engine, thrust vectoring aircraft using quantitative feedback theory
[AD-A274118] p 2667 N94-25905

Aircraft turbine engine reliability and inspection investigations
[AD-A274860] p 2673 N94-26176

Effects of expected-value information and display format on recognition of aircraft subsystem abnormalities
[NASA-TP-3395] p 2673 N94-27882

Transient model applications. 1: Compressor heat soak/clearance effects modeling p 2828 N94-28048

Transient model applications. 3: Transient engine simulation and analysis of an ice ingestion test
p 2829 N94-28050

AIRCRAFT GUIDANCE

Ground station siting considerations for DGPS
p 2642 N94-27293

AIRCRAFT HAZARDS

The relationship of an integral wind shear hazard to aircraft performance limitations
[NASA-TM-109080] p 2677 N94-26593

AIRCRAFT INDUSTRY

Future of aerospace
[PB94-120185] p 2669 N94-26906

AIRCRAFT LANDING

The application of a C(star) flight control law to large civil transport aircraft
[CRANFIELD-AERO-9303] p 2676 N94-25640

Methods for experimentally determining commercial jet aircraft landing parameters from video image data
[AD-A274207] p 2669 N94-27105

Optimal control of helicopters following power failure
[NAL-TR-1190] p 2678 N94-27206
Ground station siting considerations for DGPS
p 2642 N94-27293
A study of jet effect and ground effect interference on a STOL fighter p 2671 N94-28034

AIRCRAFT MAINTENANCE
Aircraft turbine engine reliability and inspection investigations
[AD-A274860] p 2673 N94-26176
Effects of plastic media blasting on aircraft skin
[AD-A274817] p 2668 N94-26488
An investigation into the aerodynamic effects of wing patches
[ISBN-0-315-84121-4] p 2646 N94-26672
Know-how export: Lufthansa technology at Shannon
p 2663 N94-28248
Preliminary assessment of aerodynamic effects of wing repair patches p 2657 N94-28346

AIRCRAFT MANEUVERS
Aircraft maneuvers for the evaluation of flying qualities and agility. Volume 1: Maneuver development process and initial maneuver set
[AD-A273913] p 2666 N94-25590
Aircraft maneuvers for the evaluation of flying qualities and agility. Volume 3: Simulation data
[AD-A273814] p 2667 N94-25961
Automation of formation flight control
[AD-A274137] p 2678 N94-27132

AIRCRAFT MODELS
Evaluation of moderate angle of attack roll of a dual engine, thrust vectoring aircraft using quantitative feedback theory
[AD-A274118] p 2667 N94-25905
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 4: Laser velocimeter wake data, advance ratio of 0.037
[NASA-TM-109040-VOL-4] p 2645 N94-26483
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 1: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0081 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-1] p 2645 N94-26489
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 2: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 710 feet/second
[NASA-TM-109040-VOL-2] p 2645 N94-26492
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 3: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-3] p 2645 N94-26497
Experimental apparatus for optimization of flap position for a three-element airfoil model p 2682 N94-27912
Transient model applications. 1: Compressor heat soak/clearance effects modeling p 2828 N94-28048

AIRCRAFT NOISE
INM, Integrated Noise Model. Version 4.11: User's guide, supplement
[AD-A273885] p 3009 N94-25731
Assessing the effects of Tuned Vibration Absorbers (TVAs) on interior cabin noise levels: A correlation between analytical acoustic predictions and flight test measurements p 2652 N94-28318

AIRCRAFT PARTS
Methods in unsteady aerodynamics
[DLR-FB-93-21] p 2648 N94-27741

AIRCRAFT PERFORMANCE
EGADS: A microcomputer program for estimating the aerodynamic performance of general aviation aircraft
[NASA-TM-104013] p 2667 N94-26091
Analysis and optimization of preliminary aircraft configurations in relationship to emerging agility metrics
[NASA-CR-195228] p 2668 N94-26235
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 4: Laser velocimeter wake data, advance ratio of 0.037
[NASA-TM-109040-VOL-4] p 2645 N94-26483
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 1: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0081 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-1] p 2645 N94-26489
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 2: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 710 feet/second
[NASA-TM-109040-VOL-2] p 2645 N94-26492
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 3: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-3] p 2645 N94-26497
The relationship of an integral wind shear hazard to aircraft performance limitations
[NASA-TM-109080] p 2677 N94-26593
A technique for integrating engine cycle and aircraft configuration optimization
[NASA-CR-191602] p 2668 N94-26606
Experiments into the scaling parameters required for exhaust gas ingestion testing of vertical landing aircraft
p 2671 N94-28017
Transitional flight characteristics of a geometrically simplified STOVL model p 2672 N94-28035

AIRCRAFT PILOTS
A critical analysis of workload predictions generated by multiple resource theory during early crewstation design
[AD-A274804] p 2941 N94-26339
US Army aviation epidemiology data registry: Incidence and outcomes of aviator flying evaluation boards
[AD-A274711] p 2910 N94-26432
Female combat helicopter pilot selection criteria
[AD-A273935] p 2938 N94-26749
Comparison of performance in simulator flight among subjects with different simulator experiences
p 2933 N94-27943
Evaluation of near-infrared spectrophotometric method for individual tolerance to +Gz acceleration
p 2933 N94-27944

AIRCRAFT POWER SUPPLIES
Bipolar lead-acid batteries for electrical actuation applications p 2864 N94-28134

AIRCRAFT PRODUCTION
Future of aerospace
[PB94-120185] p 2669 N94-26906

AIRCRAFT RELIABILITY
Engine starting and stopping p 2828 N94-28047
A340 testing p 2662 N94-28242
After thirty years: Farewell of Europa jet
p 2663 N94-28249
A symbol of reliability: Ju 52 p 2663 N94-28250

AIRCRAFT SAFETY
Soft ground arresting system for airports
[DOT/FAA/CT-93/80] p 2680 N94-26202
Impact of improved materials and cabin water spray on commuter aircraft postcrash fire survivability
[AD-A274421] p 2660 N94-27081
Aircraft accident report: Runway departure following landing American Airlines flight 102, McDonnell Douglas DC-10-30, N139AA, Dallas/Fort Worth International Airport, Texas, April 14, 1993
[PB94-910402] p 2660 N94-27766
Special investigation report: Safety issues related to wake vortex encounters during visual approach to landing
[PB94-917002] p 2660 N94-27881
The 1993 Federal Aviation Administration plan for research, engineering and development
p 2643 N94-27960

AIRCRAFT STABILITY
Report on a visit to the Arvin/Calspan Corporation, Buffalo, New York, USA, September 1992
[CRANFIELD-AERO-9305] p 2676 N94-25653
Linear modeling of rotorcraft for stability analysis and preliminary design
[AD-A274869] p 2677 N94-26192

AIRCRAFT STRUCTURES
Formulae for the buckling of simply-supported corrugated panels of orthotropic material under shear load
[PB94-126547] p 2840 N94-26911
Design and test of postbuckled stiffened curved plates: A literature survey
[PB94-126521] p 2840 N94-26961
Smart structures, an overview
[AD-A274147] p 2987 N94-27093
Impact tests on fibre metal laminates under a tensile load
[PB94-126570] p 2710 N94-27201
Multidisciplinary aeroelastic analysis of a generic hypersonic vehicle
[NASA-TM-4544] p 2691 N94-27868
Development of methodologies for the estimation of thermal properties associated with aerospace vehicles
p 2846 N94-27920
Advanced metallic exhaust impinged structural concepts demonstration p 2832 N94-28209

AIRCRAFT TIRES
Aircraft wheel life assessment
[AD-A274378] p 2823 N94-26976

AIRCRAFT WAKES
Special investigation report: Safety issues related to wake vortex encounters during visual approach to landing
[PB94-917002] p 2660 N94-27881
Calculation of unsteady incompressible inviscid flow about wings and bodies using CANAERO-T panel model
p 2655 N94-28334
Drag prediction by wake integrals using 3-D multi-grid Euler method (MGAERO) p 2655 N94-28335

AIRFOIL OSCILLATIONS
Methods in unsteady aerodynamics
[DLR-FB-93-21] p 2648 N94-27741

AIRFOIL PROFILES
Calculation of viscous drag of two low angle of attack supercritical profiles
[FFA-TN-1984-22] p 2644 N94-26104
Comments regarding two upwind methods for solving two-dimensional external flows using unstructured grids
[NASA-TM-109078] p 2644 N94-26154
An investigation of the effects of the high maximum-thickness-to-chord ratio on the performance of nozzle guide vanes in a transonic planar cascade
[ISBN-0-315-84107-9] p 2793 N94-26671
The renewing of the test section of the NAL transonic wind tunnel. Part 1: Reconstruction of the 1st corner turning vanes and aerodynamic stress measurement
[NAL-TM-651] p 2681 N94-27247
Effect of surface finish on turbine airfoil cascade losses p 2652 N94-28320
Potential flow modelling of airfoil stall
p 2654 N94-28332
Viscous airfoil computations using adaptive structured grids p 2655 N94-28337
Solution of the Euler equations using unstructured grids p 2656 N94-28338
A study of blunt trailing edge airfoils using the Navier Stokes code: ARC2D p 2656 N94-28340
Thin-layer Navier-Stokes computations for multi-element airfoils p 2656 N94-28341

AIRFOILS
A finite wake theory for two-dimensional rotary wing unsteady aerodynamics
[AD-A274921] p 2645 N94-26535
Influence of the transonic doublet in the farfield of a lifting airfoil
[IAR-AN-78] p 2647 N94-26702
Control of leading-edge separation on an airfoil by localized excitation
[DLR-FB-93-16] p 2647 N94-27592
Investigation of aerodynamic design issues with regions of separated flow p 2658 N94-27902
Experimental apparatus for optimization of flap position for a three-element airfoil model p 2682 N94-27912
Program for calculation of maximum lift coefficient of plain aerofoils and wings at subsonic speeds
[ESDU-93015] p 2649 N94-28076
Wing lift increment at zero angle of attack due to deployment of single-slotted flaps at low speeds
[ESDU-93019] p 2649 N94-28140
Abstracts of papers presented at the 4th CASI Aerodynamics Symposium
[ISBN-0-920203-01-9] p 2651 N94-28315

AIRFRAMES
Damage tolerance assessment handbook. Volume 1: Introduction fracture mechanics fatigue crack propagation
[AD-A274777] p 2836 N94-26186
Damage tolerance assessment handbook. Volume 2: Aircraft damage tolerance evaluation
[AD-A274778] p 2837 N94-26357
A parametric sensitivity study for single-stage-to-orbit hypersonic vehicles using trajectory optimization
[NASA-CR-195703] p 2697 N94-27789
Know-how export: Lufthansa technology at Shannon
p 2663 N94-28248

AIRGLOW
Photochemical processes and the atmospheric airglow emissions of OH and Na in the mesospheric region
[INPE-5380-PUD/050] p 2882 N94-27334
Solar and airglow measurements aboard the two suborbital flights NASA 36.098 and 36.107
[NASA-CR-195279] p 2882 N94-27380

AIRLINE OPERATIONS
Lufthansa Yearbook 1992
[DSK-9734-H-92] p 2660 N94-28230
The single European market and air traffic chances and risks p 2660 N94-28231
Deregulation of air traffic in America: A model to be initiated? p 2661 N94-28232
The advantages of the location Germany must not be jeopardized in air traffic p 2661 N94-28236
Lufthansa facing the single European market
p 2661 N94-28237
Munich Airport: The new Lufthansa hub
p 2662 N94-28239

Air traffic in recession p 2662 N94-28240

German-American relations in air traffic are to be criticized p 2662 N94-28241

Integrators: A challenge for air cargo p 2662 N94-28244

Powerful selling and sales strategy p 2662 N94-28245

Lufthansa long range services: More simplicity p 2663 N94-28246

Lufthansa and Europe p 2663 N94-28247

Know-how export: Lufthansa technology at Shannon p 2663 N94-28248

After thirty years: Farewell of Europa jet p 2663 N94-28249

AIRPORTS

INM, Integrated Noise Model. Version 4.11: User's guide, supplement
[AD-A273885] p 3009 N94-25731

Machine intelligent gust front algorithm
[AD-A273695] p 2680 N94-26196

Conifer tree influence on Digital Terrain Elevation Data (DTED): A case study at Dulles International Airport
[AD-A274213] p 2849 N94-27069

The advantages of the location Germany must not be jeopardized in air traffic p 2661 N94-28236

Munich Airport: The new Lufthansa hub p 2662 N94-28239

ALASKA

Remote sensing of global snowpack energy and mass balance: In-situ measurements on the snow of interior and Arctic Alaska
[NASA-CR-195704] p 2851 N94-27787

ALCOHOLS

Reactivity of nitrate radical (NO3) toward organic compounds p 2704 N94-27387

Thermal conductivity of liquid aliphatic alcohols
[ESDU-93008] p 2720 N94-28058

ALDEHYDES

Reactivity of nitrate radical (NO3) toward organic compounds p 2704 N94-27387

ALERTNESS

Effects of methamphetamine on vigilance and tracking during extended wakefulness
[AD-A274896] p 2909 N94-26179

Brain wave correlates of attentional states: Event related potentials and quantitative EEG analysis during performance of cognitive and perceptual tasks p 2940 N94-27901

ALGAE

Mapping coastal habitats using an imaging spectrometer
[ISBN-0-315-84362-4] p 2848 N94-26664

Measuring variation in ecosystem sensitivity to stress
[AD-A274232] p 2868 N94-26817

ALGEBRA

Duality for multiparametric quantum GL(n) and for a Lorentz quantum group
[DE93-613048] p 3005 N94-25868

Some properties of generalized biregular functions with values in a Clifford algebra
[DE93-613024] p 2991 N94-25881

Matrix near rings and pseudo distributivity
[DE94-601505] p 2992 N94-26366

The massless representations of the conformal quantum algebra
[DE94-601555] p 3006 N94-26413

Gauging of Chern-Simons p-Barnes
[DE94-601553] p 2993 N94-26425

Finite dimensional representations of the quantum superalgebra U(sub q)(gl(3/2))
[DE93-634303] p 2993 N94-26440

Process algebra of concurrent constraint programming
[PB94-126695] p 2966 N94-26919

Spaces of algebraic cycles
[PB94-124369] p 2996 N94-26993

Modal logic, transition systems and processes
[CWI-CS-R9321] p 2970 N94-27549

Expressiveness results for process algebras
[CWI-CS-R9301] p 3000 N94-27577

A method for obtaining quantum doubles from the Yang-Baxter R-matrices
[DE94-606300] p 3001 N94-27846

Fields and potentials in general uniaxial bianisotropic media I. Axial sources
[PB94-132875] p 2778 N94-28379

ALGORITHMS

Characteristics and control response of the TOPAZ 2 reactor system real-time dynamic simulator
[DE94-003788] p 2699 N94-25600

System software and tools for high performance computing environments: A report on the findings of the Pasadena Workshop
[DE94-003918] p 2956 N94-25602

Calculation of a 3-D pose of a known object in a single perspective view
[VTT-PUBS-122] p 2957 N94-25642

Detection geometry and reconstruction error in magnetic source imaging
[DE94-004012] p 2809 N94-25662

An optimal constrained linear inverse method for magnetic source imaging
[DE94-004014] p 2957 N94-25663

A logarithmic barrier cutting plane method for convex programming
[REPT-93-43] p 2957 N94-25761

A note on central cutting plane methods for convex programming
[REPT-93-44] p 2958 N94-25762

A simplicial approach to integer programming, part 2
[REPT-93-47-PT-2] p 2958 N94-25764

Filtering, coding, and compression with Malvar wavelets
[AD-A274055] p 2780 N94-25770

Research on primal-dual interior point algorithms for mathematical programming
[DE94-003982] p 2959 N94-25821

Algorithms of the vertex coordinate reconstruction for straight tracks of short-lived particles
[DE93-616661] p 3015 N94-25919

Emerging technologies
[DE94-003022] p 3102 N94-26023

Fast parallel algorithms for short-range molecular dynamics
[DE93-018519] p 3016 N94-26033

An algorithm to find the intersection of two convex polygons
[AD-A274722] p 2961 N94-26148

Machine intelligent gust front algorithm
[AD-A273695] p 2680 N94-26196

The general pickup and delivery problem
[MEMO-COSOR-92-44] p 2992 N94-26226

One machine scheduling with delayed precedence constraints
[PB93-237626] p 3094 N94-26314

The Chaco user's guide
[DE94-003669] p 2962 N94-26370

On the reliability of a window least squares algorithm
[DE93-634666] p 2962 N94-26386

Adaptive path planning in changing environments
[DE94-003269] p 2985 N94-26462

A doubly logarithmic communication algorithm for the Completely Connected Optical Communication Parallel Computer
[DE93-019408] p 2980 N94-26473

MIMO recursive least squares control algorithm for the AN/FPN-44A Loran-C transmitter
[AD-A274820] p 2664 N94-26493

Delta f Algorithm
[DE94-003120] p 2963 N94-26521

Integrating automata with genetic algorithms in order to provide adaptive operators
[ISBN-0-315-84094-3] p 2964 N94-26663

Design and implementation of a multiprocessor for DSP and communications systems algorithm evaluation
[ISBN-0-315-84128-1] p 2980 N94-26674

A real-time executive implementing priority inheritance protocols p 2952 N94-26733

Scheduling approaches with Ada p 2952 N94-26734

Combatting inherent vulnerabilities of CFAR algorithms and a new robust CFAR design
[AD-A274918] p 2770 N94-26751

Computation of non-isentropic internal flows with variable density
[AD-A274848] p 2794 N94-26801

Nested Krylov methods based on GCR
[PB94-125317] p 2995 N94-26818

The Hough transform algorithm for sea ice lead analysis: An evaluation
[AD-A274535] p 2899 N94-26853

New mixed integer algorithm for classification and placement of measurements in process flow networks
[PB94-126752] p 2966 N94-26921

Prewhitening of colored noise fields for detection of threshold sources
[AD-A274346] p 3010 N94-26923

An algorithm for determination of bearing health through automated vibration monitoring
[AD-A274591] p 2823 N94-26986

What can we learn from genetic algorithms: A new perspective for search methods
[PB94-125234] p 2967 N94-26997

Grid-independent convergence based on preconditioning techniques
[PB94-125358] p 2997 N94-27000

Symbolic model checking for sequential circuit verification
[AD-A274375] p 2786 N94-27061

Parametric time-scale methods in signal analysis
[AD-A274212] p 2773 N94-27068

Implementation and performance of a domain decomposition algorithm in Sisal
[DE94-002012] p 2981 N94-27092

Parallel string matching algorithms
[AD-A274502] p 3100 N94-27164

A partitioning and redundancy model for wafer-scale integrated circuits p 2955 N94-27195

Fast methods for computation with algebraic numbers
[ISBN-0-315-57888-2] p 2998 N94-27269

Developments in the application of the geometrical theory of diffraction and computer graphics to aircraft inter-antenna coupling analysis
[ISBN-0-315-84643-7] p 2776 N94-27308

Motion analysis from a sequence of range images
[ISBN-0-315-84684-4] p 2969 N94-27311

Parallel algorithm for dominant points correspondences in robot binocular stereo vision p 2686 N94-27364

Saving comparisons in the Crochemore-Perrin string matching algorithm
[CWI-CS-R9322] p 2971 N94-27550

Efficient massively parallel simulation of dynamic channel assignment schemes for wireless cellular communications
[NASA-CR-191593] p 2971 N94-27558

Fast parallel permutation algorithms
[CWI-CS-R9303] p 2982 N94-27579

High performance computing in chemistry and massively parallel computers: A simple transition?
[DE94-004318] p 2982 N94-27600

A fast Fourier transform radix-2 complex butterfly with built-in self-test
[ISBN-0-315-84139-7] p 2982 N94-27649

The PRISM project: Infrastructure and algorithms for parallel eigensolvers
[DE94-005125] p 2973 N94-27717

Inverted pendulum control apparatus using transputers
[DE94-701224] p 2973 N94-27732

A strange application of Kolmogorov complexity
[CWI-CS-R9328] p 2973 N94-27737

Time-step enlargement and optimal smoothing in Runge-Kutta time-integration algorithms by implicit and explicit smoothing
[NLR-TP-92221-U] p 2798 N94-27799

Ice surface temperature retrieval from AVHRR, ATSR, and passive microwave satellite data: Algorithm development and application
[NASA-CR-195276] p 2851 N94-27849

An optimization program based on the method of feasible directions: Theory and users guide
[NASA-TM-4552] p 2845 N94-27865

Thunderstorm Hypothesis Reasoner
[NASA-CR-195714] p 2897 N94-27884

A parallel multigrid algorithm for solving the Navier-Stokes equations on a transputer system
[PREPRINT-699] p 2807 N94-28099

Image compression software for the SOHO LASCO and EIT experiments p 2945 N94-28253

Performance considerations for the application of the lossless browse and residual model p 2946 N94-28256

A comparison of spectral decorrelation techniques and performance evaluation metrics for a wavelet-based, multispectral data compression algorithm p 2946 N94-28258

A comparative study of SAR data compression schemes p 2946 N94-28259

Perceptual compression of magnitude-detected synthetic aperture radar imagery p 2946 N94-28260

Compression of multispectral Landsat imagery using the Embedded Zerotree Wavelet (EZW) algorithm p 2947 N94-28261

Techniques for accurately solving unsteady shock waves and contact discontinuities p 2656 N94-28342

Efficient rebalancing of tree-type main memory dictionaries
[PB94-133105] p 3100 N94-28396

ALIGNMENT

Alignment of the Amsterdam Pulse Stretcher (AmPS)
[MTG-93-02] p 2809 N94-25637

ALIPHATIC COMPOUNDS

Thermal conductivity of liquid aliphatic alcohols
[ESDU-93008] p 2720 N94-28058

Vapour pressures and critical points of liquids: Aliphatic and cyclic ketones
[ESDU-93009] p 2720 N94-28059

Orthobaric densities and molar volumes of liquids: Aliphatic and cyclic ketones
[ESDU-93010] p 2720 N94-28060

ALIPHATIC HYDROCARBONS

Measurement of viscosity, density, and gas solubility of refrigerant blends in selected synthetic lubricants
[DE94-003609] p 2713 N94-25934

Computational studies of energetic organic molecules
[AD-A274726] p 3019 N94-26172

Transition metal activation and functionalization of carbon-hydrogen bonds
[DE94-003650] p 2715 N94-26369

ALKALI METALS

Calculations of asymmetries in electron-alkali scattering
[DE94-601816] p 3023 N94-26945

Experimental studies of pressurised fluidised bed combustion at Helsinki University of Technology, 1991-1992
[PB94-133063] p 2876 N94-28394

ALKENES

Reactivity of nitrate radical (NO3) toward organic compounds p 2704 N94-27387

ALKYL COMPOUNDS

Phosphazene-containing amine as curing agent for phthalonitrile-base polymer
[AD-D016029] p 2755 N94-27147

ALKYNES

The coordination and atom transfer chemistry of titanium porphyrin complexes
[DE94-003091] p 2704 N94-26779

ALLOTROPY

Structure and phase transformations in uranium metal
[DE94-003892] p 2732 N94-26004

ALLOYING

Issues for conversion coating of aluminum alloys with hydrotalcite
[DE94-003804] p 2732 N94-25819

The influence of weld metal alloying additions to extend the heat input range for the submerged arc welding of high strength steels
[AD-A274284] p 2738 N94-26679

Formation of glassy Pd-Ni-P alloys by mechanical alloying and their structure and thermal stability
p 2746 N94-28168

Study on the production of flaky amorphous alloy powders by impact flattening of atomized liquid droplets on a rapidly rotating wheel p 2746 N94-28169

ALLOYS

Bulletin of National Research Institute for Metals in Fiscal Year 1993, no. 14
[REPT-14] p 2722 N94-25544

Generalized perturbation method expansions of the total energy of an alloy
[DE94-003865] p 3055 N94-26238

A new materials data compilation can help in actinide phase-diagram research
[DE94-000797] p 3058 N94-26514

The Science Reports of the Research Institutes, Tohoku University. Series A: Physics, Chemistry, and Metallurgy. Volume 38, No. 1: Amorphous Materials 14
[JTN-94-80610] p 2744 N94-28158

ALPINE METEOROLOGY

Numerical modelling of precipitation over complex terrain
[ISBN-0-315-84327-6] p 2894 N94-26628

ALTERNATING CURRENT

Electromagnetic properties of a toroidal solenoid
[DE93-613032] p 2766 N94-25866

Classical solutions of Yang-Mills-Chern-Simons theory in 2+1 dimensions: A quasi-linear superposition
[DE93-634335] p 3006 N94-26270

Channel model for AC electric arc
[PB94-124591] p 2786 N94-27327

ALTERNATIVES

Proceedings of the symposium on current concepts and approaches on animal test alternatives
[AD-A273926] p 2900 N94-25593

ALTIMETERS

Digital Altimeter Setting Indicator (DASI) Operational Test and Evaluation (OT/E) operational test procedures
[AD-A274100] p 2672 N94-26030

ALUMINIDES

The processing of powder metallurgically produced near gamma-titanium aluminide
[ISBN-0-315-84018-8] p 2738 N94-26633

An investigation of the effect of surface impurities on the adsorption kinetics of hydrogen chemisorbed onto iron
[NASA-CR-195213] p 2716 N94-26643

Microstructure and mechanical behaviour of L1(2) titanium trialuminides
[ISBN-0-315-84488-4] p 2740 N94-27306

Current status of research and development on nickel and iron aluminides
[DE94-004247] p 2741 N94-27616

ALUMINUM

Issues for conversion coating of aluminum alloys with hydrotalcite
[DE94-003804] p 2732 N94-25819

Plasma surface cleaning using microwave plasmas
[DE94-002754] p 2713 N94-26014

Deviatoric stresses and plastic strain rates in strong shock waves for six metals
[DE94-002964] p 2733 N94-26022

Aluminum-ion sputtering from Al surfaces with very-low-energy ions
[REPT-A-2668] p 2733 N94-26073

Effects of post-fabrication processing on the tensile properties of centrifugally cast SiC particulate reinforced aluminum composites
[AD-A274865] p 2707 N94-26190

Effects of plastic media blasting on aircraft skin
[AD-A274817] p 2668 N94-26488

A constitutive model for layered wire mesh and aramid cloth fabric
[DE94-003275] p 2708 N94-26796

The electrochemical behavior of the Al3Fe intermetallic compound and localized corrosion of impure 1100 Al
[DE94-002037] p 2739 N94-26912

Experimental results of 40-kA Nb3Al conductor
[DE94-701207] p 2788 N94-27821

High Quality Aluminium Castings Conference
[PB94-133592] p 2747 N94-28359

Joining of fibre reinforced metal matrix composite materials
[PB94-132453] p 2712 N94-28376

Weldability aspects in the design and fabrication of aluminium structures subjected to fatigue loads. Part 1: Effect of welding on the structural integrity of joint types designed for repairing aluminium ship sections
[PB94-132487] p 2833 N94-28378

ALUMINUM ALLOYS

Study on production of materials with one direction solidification texture p 2727 N94-25572

Study on solidification of non-homogeneous melting/solidification materials p 2728 N94-25573

Study on improvement in physical analysis method of metallic materials p 2728 N94-25577

Issues for conversion coating of aluminum alloys with hydrotalcite
[DE94-003804] p 2732 N94-25819

An investigation of cavitation in a mechanically alloyed 15 volume percent SiCp/IN9021 aluminum composite
[DE94-003371] p 2748 N94-25959

Formation of three types of quasi-crystals in Al-Pd-Mg system
[REPT-A-2667] p 3053 N94-26071

Toward insulating quasicrystalline alloy in Al-Pd-Re icosahedral phase
[REPT-A-2666] p 2736 N94-26477

Effects of plastic media blasting on aircraft skin
[AD-A274817] p 2668 N94-26488

Study of precipitation and recrystallization in Al alloy 2519 by backscattered electron imaging methods
[AD-A274919] p 2736 N94-26533

Deformation twinning: Influence of strain rate
[DE94-002693] p 2738 N94-26621

Experimental study of the angled crack in GLARE 3
[PB94-126554] p 2669 N94-26954

Hot deformation behaviour of Si(p)/Al composites and their matrices and an Al-Mg-Si alloy
[ISBN-0-315-84699-2] p 2711 N94-27314

Process modelling of aluminium alloys. Modelling of the quench sensitivity of alloy AA6082
[PB94-124567] p 2741 N94-27325

Current status of research and development on nickel and iron aluminides
[DE94-004247] p 2741 N94-27616

Use of photostress and strain gages to analyze behavior of weldments
[NASA-CR-195269] p 2843 N94-27765

An anodic dissolution-based mechanism for the rapid cracking, pre-exposure phenomenon demonstrated by Al-Li-Cu alloys
[DE94-004798] p 2742 N94-27788

NASA-UVA light aerospace alloy and structures technology program (LA2ST)
[NASA-CR-195275] p 2844 N94-27851

An experimental investigation of fatigue damage in aluminum 2024-T3 alloys p 2747 N94-27900

The transition from stress corrosion cracking to corrosion fatigue in AA-7075 and AA-8090
[ISBN-0-315-59526-4] p 2744 N94-27950

Low strain behaviour of a particulate reinforced aluminum alloy
[ISBN-0-315-84906-1] p 2744 N94-27961

NMR study of quasicrystal Al(70)Pd(20)T(M10) alloy (T(M):Cr, Mn, Fe, and Co) p 2745 N94-28162

Mechanical behavior of amorphous alloys at elevated temperatures p 2746 N94-28167

Formation and high mechanical strength of Al-based alloys containing a nanoscale icosahedral phase as a main constituent p 2746 N94-28171

High Quality Aluminium Castings Conference
[PB94-133592] p 2747 N94-28359

Weldability aspects in the design and fabrication of aluminium structures subjected to fatigue loads. Part 2: Weldability of aluminium alloys using advanced MIG and TIG techniques. Effect of the weld bead geometrical factors on the fatigue behavior of the welded joint
[PB94-132446] p 2833 N94-28375

Weldability aspects in the design and fabrication of aluminium structures subjected to fatigue loads. Part 1: Effect of welding on the structural integrity of joint types designed for repairing aluminium ship sections
[PB94-132487] p 2833 N94-28378

ALUMINUM ARSENIDES

Polar optical oscillation modes in GaAs-based double heterostructures: Long wavelength limit
[DE94-601874] p 3062 N94-26897

ALUMINUM COMPOUNDS

Study on measurement and evaluation methods for superconductive characteristics p 2725 N94-25560

Study on variation of damage generation mechanism by fatigue on TiAl compounds due to different slip systems p 2729 N94-25579

ALUMINUM GALLIUM ARSENIDES

Optoelectronic technology consortium
[AD-A274595] p 3036 N94-26857

Thermally stable oxygen and nitrogen implant isolation of C-doped Al(0.35)Ga(0.65)As
[DE94-004799] p 3069 N94-27790

Dry etching process development for submicron and nanometer semiconductor devices
[PB94-133196] p 2788 N94-28357

ALUMINUM NITRIDES

Electron microscopy of AlN-SiC interfaces and solid solutions
[DE94-002449] p 3059 N94-26765

Nitride semiconductors for ultraviolet detection
[AD-A274246] p 3060 N94-26840

Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device development
[AD-A274247] p 3061 N94-26841

Interface properties of wide bandgap semiconductor structures
[AD-A274356] p 3063 N94-27058

ALUMINUM OXIDES

Study on film generation phenomena by particle deposition p 2728 N94-25575

Fracture behavior of 20% Nb particulate reinforced alumina composite
[DE94-002830] p 2706 N94-26019

Examination of hardness, fracture toughness and microstructure in Al2O3-B4C binary ceramics
[PB94-124237] p 2755 N94-27158

Transparent polycrystalline body with high ultraviolet transmittance, process for making and applications thereof
[CA-PATENT-1325511] p 3066 N94-27276

Superconducting fibers made with yttrium and yttrium oxide interlayers and barium cuprate cover layers
[AD-D016073] p 3070 N94-28225

ALUMINUM-LITHIUM ALLOYS

Aluminum alloy 8090-T8771 thick plate material characterization
[AD-A274146] p 2987 N94-27077

Fracture toughness and crack resistance of damage tolerant and high strength Al-Li alloys
[NLR-TP-91249-U] p 2743 N94-27795

Status and prospects for aluminium-lithium alloys in aircraft structures
[NLR-TP-92193-U] p 2743 N94-27797

AMAZON REGION (SOUTH AMERICA)

Role of remote sensing in energy, water, and carbon cycle studies over the Amazon
[INPE-5486-PRE/1786] p 2852 N94-27957

AMBIENT TEMPERATURE

Effect of loading mode on the fracture toughness of a reduced activation ferritic/martensitic stainless steel
[DE94-004290] p 2732 N94-25987

Cryogenic size reduction of solid propellant
[AD-A274844] p 2759 N94-26800

Computation of static pressure downstream of a normal shock for hypersonic flight (ambient temperature known)
[ESDU-93020] p 2649 N94-28091

AMINES

Computational studies of energetic organic molecules
[AD-A274726] p 3018 N94-26172

Phosphazene-containing amine as curing agent for phthalonitrile-base polymer
[AD-D016029] p 2755 N94-27147

Mechanism for regulation of myocardial contractility by autonomic drugs: Pathophysiological relevance in congestive heart failure p 2931 N94-27536

AMINO RADICAL
The kinetics and dynamics of the coma of Halley's comet
[NASA-CR-194828] p 3105 N94-28184

AMMONIA
High-temperature and high-pressure flow calorimeter
p 2718 N94-27390

AMMONIUM COMPOUNDS
Computational analysis of some aspects of a synthetic route to ammonium dinitramide
[AD-A274648] p 2704 N94-26353

AMORPHOUS MATERIALS
Development of SO(x) and NO(x) solid electrolyte sensors p 2725 N94-25562
Study on computerized experiment of amorphous transformation process by solid phase reaction
p 2726 N94-25564
Characterization of physically vapor deposited AF2400 thin films
[DE94-004019] p 2749 N94-25985
How reliable is the HMSA integral equation for the pair structure of supercooled and amorphous mixtures?
[DE94-601543] p 3006 N94-26411
Magnetostriction and magnetostrictive materials
[VTT-TIED-1434] p 3058 N94-26545
Modelling and predicting properties of polymers in the amorphous glassy state
[ETN-94-95345] p 2752 N94-26645
Ion beam mixing of marker layers into amorphous aluminum oxide
[DE94-000901] p 2752 N94-26676
Fabrication technology
[DE94-003017] p 2763 N94-26778
List of papers published by the members of Institute for Materials Research, Tohoku University 1992
[JTN-94-80608] p 3118 N94-27355
Effect of temperature and recoil-energy spectra on irradiation-induced amorphization in Ca2La8(SiO4)6O2
[DE94-004371] p 3067 N94-27602
Fragmentation of Ge(1-x) Sn(x) Se2 glasses
[DE94-603009] p 2758 N94-27837
The Science Reports of the Research Institutes, Tohoku University. Series A: Physics, Chemistry, and Metallurgy. Volume 38, No. 1: Amorphous Materials 14
[JTN-94-80610] p 2744 N94-28158
Differential scanning calorimetric study of solid state amorphization and crystallization in Zr/Co and Zr/Ni multilayers p 2745 N94-28161
Formation and crystallization of hydrogen-induced amorphous Ti3InH(4.5) alloy p 2745 N94-28163
The electrocatalytic oxidation of ethylene and methane, and reduction of oxygen on gas-diffusion electrodes made of amorphous nickel-valve metal-platinum group metal alloys p 2722 N94-28165
CO2 methanation catalysts prepared from amorphous Ni-valve metal alloys containing platinum group elements
p 2745 N94-28166
Mechanical behavior of amorphous alloys at elevated temperatures p 2746 N94-28167
Formation of glassy Pd-Ni-P alloys by mechanical alloying and their structure and thermal stability
p 2746 N94-28168
Study on the production of flaky amorphous alloy powders by impact flattening of atomized liquid droplets on a rapidly rotating wheel p 2746 N94-28169
Production of an amorphous Fe(75)Si(10)B(15) sheet by a metallic mold casting method and its properties
p 2746 N94-28170

AMORPHOUS SEMICONDUCTORS
Recombination and metastability in amorphous silicon and silicon germanium alloys
[DE94-000237] p 2736 N94-26481

AMORPHOUS SILICON
The state of the art of thin-film photovoltaics
[DE94-000224] p 2855 N94-26115
The fracture behavior of a CVD crystalline Si3N4/amorphous Si3N4 composite
[DE94-002646] p 2750 N94-26124
Multichip module high speed testing
[AD-A274873] p 2782 N94-26343
Recombination and metastability in amorphous silicon and silicon germanium alloys
[DE94-000237] p 2736 N94-26481
Deposition of a-SiC:H using organosilanes in an argon/hydrogen plasma
[DE94-004428] p 2751 N94-26580
Continuous roll-to-roll a-Si photovoltaic manufacturing technology
[DE94-000260] p 2859 N94-27610

AMPLIFICATION
The effect of high frequency electric field on hypersound amplification in superlattice
[DE93-634326] p 3057 N94-26384
Phase conjugation and pulse compression of high energy lasers: From nanoseconds to microseconds
[DE94-001061] p 2818 N94-26699

AMPLIFIER DESIGN
Ultralinear wideband integrated circuit design
[ISBN-0-315-84130-3] p 2784 N94-26675
NASA satellite communications application research, phase 2 addendum. Efficient high power, solid state amplifier for EHF communications
[NASA-CR-195712] p 2777 N94-27946

AMPLIFIERS
Signal amplifier-shapers for multiwire detectors
[DE93-634171] p 2783 N94-26438

AMPLITUDE MODULATION
Parametric time-scale methods in signal analysis
[AD-A274212] p 2773 N94-27068

ANALOG CIRCUITS
Electrical coupling between the sino-atrial node and atrial muscle: Cell to cell interaction through an external circuit and its simulation by computer modeling
p 2907 N94-27509

ANALOG COMPUTERS
Set based analysis of arithmetic
[AD-A274112] p 3002 N94-25903

ANALOG SIMULATION
Parallel computational geometry on analog Hopfield networks
[ISBN-0-315-84093-5] p 2980 N94-26635
Electrical coupling between the sino-atrial node and atrial muscle: Cell to cell interaction through an external circuit and its simulation by computer modeling
p 2907 N94-27509

ANALOG TO DIGITAL CONVERTERS
Development of a 4-bit parallel analog-to-digital converter and a four-quadrant double-balanced mixer using heterojunction bipolar transistor technology
[AD-A274074] p 2947 N94-25648
Auxiliary controller for time-to-digital converter module readout
[DE93-634172] p 2948 N94-26266
The 12-channel flash-ADC FASTBUS module
[DE93-634229] p 2783 N94-26380
ADC test support program
[AD-A274819] p 2783 N94-26491
Users guide for GRIKURV: A code for drawing graphs
[PB94-123593] p 2968 N94-27154
Inverted pendulum control apparatus using transputers
[DE94-701224] p 2973 N94-27732

ANALYSIS (MATHEMATICS)
Computational analysis of some aspects of a synthetic route to ammonium dinitramide
[AD-A274648] p 2704 N94-26353

ANALYTIC FUNCTIONS
Some properties of generalized biregular functions with values in a Clifford algebra
[DE93-613024] p 2991 N94-25881

ANATOMY
Cross-sectional anatomy of day 30 suncus fetuses
p 2905 N94-27490
Skeletal development and ossification of the swine fetuses p 2905 N94-27491

ANDESITE
Effects of slot on rock surface for percussive rock excavation: Water jet assisted percussive rock excavation p 2871 N94-28155

ANESTHESIA
The effect of naloxone on sleeping time in adjuvant arthritic rats p 2906 N94-27498

ANGLE OF ATTACK
Evaluation of moderate angle of attack roll of a dual engine, thrust vectoring aircraft using quantitative feedback theory
[AD-A274118] p 2667 N94-25905
A numerical determination of bifurcation points for low Reynolds number conical flows
[AD-A273984] p 2791 N94-25991
Computational investigation of the compressible dynamic stall characteristics of the Sikorsky SSC-A09 airfoil
[AD-A274867] p 2644 N94-26191
Experimental and theoretical study of aerodynamic characteristics of some lifting bodies at angles of attack from -10 degrees to 53 degrees at Mach numbers from 2.30 to 4.62
[NASA-TM-4528] p 2646 N94-26693
Controlled oscillation of forebody vortices by nozzle jet blowing
[ISBN-0-315-84134-6] p 2678 N94-27648
Normal force of low aspect ratio cropped-delta wings at pre-stall angles of attack and subsonic speeds
[ESDU-93034] p 2648 N94-27955
Pneumatic management of blunted-forebody flow asymmetry for high-angle-of-attack directional control
p 2679 N94-28028
Measurements of steady and dynamic pressure on an F/A-18 wind tunnel model at high angles of attack
p 2653 N94-28323
Aerodynamic performance of novel ducted-tip wings
p 2654 N94-28331

ANGLES (GEOMETRY)
Discrete vacuum ultra violet reflective interference filter
[AD-D016059] p 2756 N94-27675

ANGULAR ACCELERATION
Evaluation of near-infrared spectrophotometric method for individual tolerance to +Gz acceleration
p 2933 N94-27944

ANGULAR CORRELATION
Window least squares method applied to statistical noise smoothing of positron annihilation data
[DE93-634665] p 3003 N94-26385
Fermi surface ridge at second and third Umklapp positron annihilations in Y Ba2Cu3O(7-delta)
[DE93-634760] p 3070 N94-27995

ANGULAR DISTRIBUTION
Modeling the DMSP and CRRES dosimeters using the path length distribution method
[RXR-93051] p 2698 N94-28200

ANGULAR MOMENTUM
Weak interactions in a bilocal chiral theory
[DE93-613097] p 3013 N94-25836
Excited Landau levels, orbital angular momentum and axial anomaly
[DE94-606407] p 3068 N94-27679

ANGULAR VELOCITY
Design of a high-precision double crystal tunable monochromator
[DE94-003004] p 2811 N94-26787

ANILINE
Mechanical properties of polyaniline prepared by polymerization in an organized monolayer
[AD-A274350] p 2753 N94-26925
LB-Deposited, side-chain substituted polyaniline, polypyrrole and the corresponding monomers, studied by STM
[AD-A274405] p 2754 N94-26977
Kinetics of 2-pentadecylaniline polymerizations in monolayers: Relationships between experimental data and a new theoretical model
[AD-A274419] p 2754 N94-27080
Stabilization of polyaniline solutions
[DE94-003958] p 2704 N94-27745

ANIMALS
Proceedings of the symposium on current concepts and approaches on animal test alternatives
[AD-A273926] p 2900 N94-25593
An automatic 14-day paste diet feeder for animals
[NASA-TM-108804] p 2901 N94-26086
Macrobenthic fauna in the dutch sector of the north sea in 1991
[PB94-126414] p 2868 N94-27200
An evaluation of criteria that may be used to identify species surviving a mass extinction
p 2889 N94-28304
Ozone control of biological activity during Earth's history, including the KT catastrophe p 2876 N94-28312

ANIONS
The use of on-line ion chromatography for high temperature and high pressure reaction studies
[DE94-002525] p 2713 N94-26075
Axial anomaly in e(+)e(-) yields gamma gamma and anyon superconductivity
[DE94-606406] p 3070 N94-27859

ANISOTROPIC MEDIA
DUSOL: Improved software for analysis of ultrasonic velocity data on anisotropic materials
[NPL-DMM(A)-104] p 2965 N94-26816
Elastic wave up/down decomposition in inhomogeneous and anisotropic media: An operator approach and its approximations
[PB94-126497] p 2881 N94-26880
Electromagnetic modeling of bi-isotropic media
[PB94-132909] p 2778 N94-28382
Plane wave propagation in an anisotropic chiral medium with isotropic permittivity and permeability
[PB94-133097] p 2778 N94-28384
Analytic solution for the dyadic Green's function of a nonreciprocal uniaxial bianisotropic medium
[PB94-133162] p 2779 N94-28388

ANISOTROPY
First principle calculation for magneto-crystalline anisotropy
[DE93-634653] p 3052 N94-26012
Design and test of postbuckled stiffened curved plates: A literature survey
[PB94-126521] p 2840 N94-26961
Technical report of ISSP. Ser. A, no. 2673: Two successive spin glass transitions in non-diluted Heisenberg-like spin glass Ni(0.42)Mn(0.58) TiO3
[JTN-94-80559] p 2756 N94-27241
Cosmic no-hair in Brans-Dicke theory
[DE94-603673] p 3074 N94-27636
Plane wave propagation in an anisotropic chiral medium with isotropic permittivity and permeability
[PB94-133097] p 2778 N94-28384

Analytic solution for the dyadic Green's function of a nonreciprocal uniaxial bianisotropic medium
[PB94-133162] p 2779 N94-28388

Image theory for DC problems involving a conducting half space bounded by the general anisotropic impedance surface
[PB94-132917] p 2779 N94-28390

Green dyadic and dipole fields for a medium with anisotropic chirality
[PB94-132933] p 2779 N94-28391

Dielectric polarizability of sphere with arbitrary anisotropy
[PB94-133113] p 2779 N94-28397

ANNEALING

Binding of copper and nickel to cavities in silicon formed by helium ion implantation
[DE94-003769] p 3050 N94-25814

Microscopic study of local structure and charge distribution in metallic La2CuO(4+delta)
[DE94-003801] p 3050 N94-25817

Modeling defect production in high energy collision cascades
[DE94-003810] p 3017 N94-26049

Ion implantation of diamond: Damage, doping, and lift-off
[DE94-001133] p 3054 N94-26137

Regrowth zones in laser annealed radiation damaged diamond
[DE94-600821] p 3056 N94-26364

Ferroelectric fluoride memory FET development
[AD-A274341] p 2785 N94-27057

First principles calculations for the cleaved and annealed Ge(111) surfaces
[DE93-617048] p 3066 N94-27347

ANNIHILATION REACTIONS

Window least squares method applied to statistical noise smoothing of positron annihilation data
[DE93-634665] p 3003 N94-26385

An analysis of monojet data in p(bar-p) collisions at square root of s equal to 1.8 TEV
[DE94-001822] p 3026 N94-27565

Cosmological constraints on very heavy stable neutrinos
[DE94-601669] p 3117 N94-28066

ANNUAL VARIATIONS

The impact of recent model improvements on GISS GCM predictions of climate change
[DE93-019458] p 2866 N94-26077

Monthly variation of physiological and psychological responses under unsteady thermal conditions
p 2918 N94-27475

Man's ability to adapt himself for the seasonal climatic changes: From viewpoint of anticipation and seasonable behavior p 2919 N94-27476

Remote sensing of global snowpack energy and mass balance: In-situ measurements on the snow of interior and Arctic Alaska
[NASA-CR-195704] p 2851 N94-27787

Probing the Martian atmosphere in the ultraviolet
p 3108 N94-27890

How well was total ozone abundance inferred with Mariner 9? p 3108 N94-27891

Counting Adelie penguins at colonies: Seasonal and annual changes p 2885 N94-27970

Observation of the upper atmosphere physics at Asuka Station by the 30th Japanese Antarctic Research Expedition in 1989 p 2885 N94-27972

ANODES

MSOFC development status
[DE94-003192] p 2858 N94-26792

Channel model for AC electric arc
[PB94-124591] p 2786 N94-27327

An anodic dissolution-based mechanism for the rapid cracking, pre-exposure phenomenon demonstrated by Al-Li-Cu alloys
[DE94-004798] p 2742 N94-27788

ANOMALIES

(2,0) superconformal anomaly
[DE93-613046] p 2991 N94-25867

ANTARCTIC REGIONS

Portable Habitat for Antarctic Scientific Research (PHASR) p 2943 N94-25681

A three-dimensional chemical transport model study of the 1991 Antarctic ozone hole using objectively analysed data
[ISBN-0-315-84250-4] p 2867 N94-26670

Ice surface temperature retrieval from AVHRR, ATSR, and passive microwave satellite data: Algorithm development and application
[NASA-CR-195276] p 2851 N94-27849

Antarctic Record, Vol. 38, No. 2
[REPT-107] p 2883 N94-27963

ANTENNA ARRAYS

Predicting antenna parameters from antenna physical dimensions
[AD-A273893] p 3012 N94-25655

Project PARAS: Phased array radio astronomy from space p 3081 N94-25703

The application of FD-TD method to antenna radiation patterns
[ISBN-0-315-83893-0] p 2769 N94-26618

A current evaluation of the digital beamforming testbed at Rome Laboratory
[AD-A274311] p 3032 N94-26881

Focal plane antenna array for millimeter waves
[AD-D016034] p 2774 N94-27202

Design and control of phased ICRF antenna arrays
[DE94-002796] p 3046 N94-27261

Beamforming/null-steering adaptive array
[CA-PATENT-1325260] p 2775 N94-27270

Fast wave current drive technology development at ORNL
[DE94-004243] p 3046 N94-27568

Fiber optic true time-delay array antenna feed system
[AD-D016063] p 2777 N94-27734

ANTENNA DESIGN

A study of two dimensional tapered periodic edge treatments to reduce wideband edge diffraction
[AD-A274054] p 2766 N94-25824

RF modeling and design of a folded waveguide launcher for the Alcator C-Mod tokamak
[DE94-003588] p 3041 N94-25933

Design and control of phased ICRF antenna arrays
[DE94-002796] p 3046 N94-27261

ANTENNA FEEDS

Fiber optic true time-delay array antenna feed system
[AD-D016063] p 2777 N94-27734

NASA satellite communications application research, phase 2 addendum. Efficient high power, solid state amplifier for EHF communications
[NASA-CR-195712] p 2777 N94-27946

ANTENNA RADIATION PATTERNS

Predicting antenna parameters from antenna physical dimensions
[AD-A273893] p 3012 N94-25655

The application of FD-TD method to antenna radiation patterns
[ISBN-0-315-83893-0] p 2769 N94-26618

Hybrid techniques for complex aerospace electromagnetics problems p 2779 N94-27894

ANTHROPOMETRY

Creation of prototype aircrew protection equipment based on face anthropometry
[AD-A273865] p 2940 N94-25611

Female combat helicopter pilot selection criteria
[AD-A273935] p 2938 N94-26749

A multivariate anthropometric method for crew station design: Abridged
[AD-A274588] p 2941 N94-26984

ANTICYCLONES

An observational study of the extratropical anticyclones in the South American continent
[INPE-5387-TDI/476] p 2896 N94-27356

ANTIDIURETICS

Treatment of orthostatic hypotension by nasal administration of vasopressin p 2930 N94-27533

ANTIFERROMAGNETISM

Microscopic study of local structure and charge distribution in metallic La2CuO(4+delta)
[DE94-003801] p 3050 N94-25817

Volume dependence of vanadium magnetism
[DE94-601838] p 3050 N94-25843

Structure of the modulated magnetic phase of Mn3Sn
[DE94-002788] p 2733 N94-26092

Holes in a two-dimensional quantum antiferromagnet
[DE93-634753] p 3057 N94-26388

Multi-channel Kondo necklace
[DE93-634754] p 3057 N94-26389

ANTIMONIDES

Study on synthesis and characteristics of intermetallic compound with strong electron correlation
p 2726 N94-25563

ANTIPARTICLES

Measuring the time dependence of B(sub s)(sup 0) meson - anti B(sub s)(sup 0) meson oscillations
[ISBN-0-315-84367-5] p 3021 N94-26665

ANTIPROTONS

An antiproton-proton partial-wave analysis
[DE94-002690] p 3021 N94-26620

Antiproton studies in penning traps
[AD-A274250] p 3024 N94-27011

Double excitation of He and H(-) by fast proton and anti-proton impact
[DE94-004581] p 3026 N94-27620

Proton electromagnetic form factor near the proton-antiproton threshold and quasinuclear bound state
[DE94-606458] p 3027 N94-27681

ANTIREFLECTION COATINGS

Characterization of physically vapor deposited AF2400 thin films
[DE94-004019] p 2749 N94-25985

Long Duration Exposure Facility space optics handbook
[AD-A274831] p 3035 N94-26572

APEXES

Fast vertex search (in plane)
[DE93-616655] p 2959 N94-25917

Algorithms of the vertex coordinate reconstruction for straight tracks of short-lived particles
[DE93-616661] p 3015 N94-25919

An algorithm to find the intersection of two convex polygons
[AD-A274722] p 2961 N94-26148

APPLICATION SPECIFIC INTEGRATED CIRCUITS

Hierarchical test development and design-for-testability for (a)synchronous semi-custom ASIC's
[ISBN-9-09-005928-8] p 2834 N94-26003

Low-cost photovoltaic inverters incorporating application-specific integrated circuits
[DE94-003270] p 2856 N94-26463

Center for space microelectronics technology
[NASA-CR-195282] p 2786 N94-27574

Spacecraft optical disk recorder memory buffer control
p 2815 N94-27907

APPLICATIONS PROGRAMS (COMPUTERS)

SHIVA: A unix-based, menu-driven, color image processing software package
[AD-A274071] p 2957 N94-25646

Systematic Propulsion Optimization Tools (SPOT)
p 2976 N94-25666

Parallel Assessment Window System (PAWS) enhancements
[AD-A274094] p 2979 N94-25786

Source code for the OO1 benchmark and the AFIT simulation benchmark
[AD-A274035] p 2958 N94-25799

EcarHeart2 version 1.0: Programmers documentation
[PB94-124633] p 2909 N94-25909

Coordinated scheduling for dynamic real-time systems
[NASA-CR-195231] p 3093 N94-26206

The MUSA design methodology
[CWI-CS-R9265] p 3097 N94-26220

The ergonomics of software porting: Automatically configuring software to the runtime environment or everything you wanted to know about your C compiler but didn't know who to ask
[CWI-CS-R9266] p 2961 N94-26221

Red's natural editor: A program designed to edit FORTRAN programs
[DE94-003271] p 2962 N94-26318

The Chaco user's guide
[DE94-003669] p 2962 N94-26370

Users manual for CATNIP: A Computer Analysis Tool for Normal Impact Penetration
[DE94-003671] p 2962 N94-26371

Programming in Fortran M
[DE94-002756] p 2963 N94-26407

Design principles of onboard management of a Sun synchronous satellite p 2950 N94-26722

Using the TSAR electromagnetic modeling system
[DE94-002617] p 2771 N94-26803

Optical characterization and guided wave loss measurements for end-capped 6F-polybenzoxazole
[AD-A274586] p 3036 N94-26982

Processing of wide-angle synthetic aperture radar signals for target detection
[AD-A274225] p 2773 N94-27073

An object-oriented database interface for Ada
[AD-A274391] p 2968 N94-27075

Ma42: A new frontal code for solving sparse unsymmetric systems
[PB94-124302] p 2998 N94-27115

Development of digital resampling and pulse compression computer software
[DREP-92-32] p 2969 N94-27318

Rocket engine numerical simulation
p 2688 N94-27375

High performance computing in chemistry and massively parallel computers: A simple transition?
[DE94-004318] p 2982 N94-27600

Thunderstorm Hypothesis Reasoner
[NASA-CR-195714] p 2897 N94-27884

Contact stress in disc cams with roller followers
[ESDU-93001] p 2829 N94-28055

Blending profiles of disc cams with radial translating roller followers. Part 2: To incorporate an intermediate precision point or a constant velocity component
[ESDU-93002-PT-2] p 2830 N94-28056

Flat rectangular orthotropic plates under uniformly distributed normal pressure. Elastic stresses and deflections for various forms of edge restraint
[ESDU-93011] p 2845 N94-28061

Condensation inside tubes: Computer program for pressure drop in straight tubes (horizontal and vertical with downflow)
[ESDU-93014] p 2806 N94-28064

Calculation methods for steadily loaded central circumferential groove hydrodynamic journal bearings (guide to use of computer program A9304)
[ESDU-93004] p 2830 N94-28073
Calculation methods for steadily loaded axial groove hydrodynamic journal bearings (guide to use of computer program A9305)
[ESDU-93005] p 2830 N94-28074
Calculation methods for steadily loaded axial groove hydrodynamic journal bearings. Low viscosity process fluid lubrication (guide to use of computer program A9306)
[ESDU-93006] p 2830 N94-28075
Program for calculation of maximum lift coefficient of plain aerofoils and wings at subsonic speeds
[ESDU-93015] p 2649 N94-28076
Ejectors and jet pumps: Computer program for design and performance for liquid flow
[ESDU-93022] p 2832 N94-28093
Parameter estimation of linear systems from frequency response measurements (computer program)
[ESDU-93016] p 2976 N94-28137
Three-dimensional elastic stress concentration factors: Plain or countersunk hole in a wide plate subjected to tension, bending, or pin loading
[ESDU-93030] p 2845 N94-28143
Application of the MBTEC Euler code to the Challenger and the CF-18 complete aircraft configurations
p 2653 N94-28324

APPROACH CONTROL
The effects of tailwinds and control cross coupling on rotorcraft handling qualities for steep, decelerating instrument approaches and missed approaches
[IAR-AN-77] p 2677 N94-26710
Investigation of air transportation technology at Ohio University, 1992-1993 p 2642 N94-27288
Flight testing of GPS and GPS-aided systems
[NLR-TP-92151-U] p 2666 N94-27831

APPROPRIATIONS
Selected data on Federal support to universities and colleges: FY 1991
[NSF-93-320] p 3101 N94-28201

APPROXIMATION
Back-reaction beyond the mean field approximation
[DE94-003936] p 3012 N94-25612
A comparison of three approximate mathematical models for the gravity gradient stabilized satellite
[AD-A273832] p 2694 N94-25615
Approximate solution of the fourth order initial value problem using deficient spline polynomials
[DE93-613023] p 2991 N94-25880
Set based analysis of arithmetic
[AD-A274112] p 3002 N94-25903
An approximate solution for the spinup dynamics of near axisymmetric axial gyrostats using the method of multiple scales
[AD-A273723] p 2698 N94-26223
Numerical solution of singularity-perturbed two-point boundary-value problems
[DE94-601542] p 2993 N94-26410
Radial base functions: L(sup p)-approximation orders with scattered centers
[AD-A274682] p 3003 N94-26445
On a spline-approximation method for solving ordinary differential equations
[DE93-634290] p 2994 N94-26471
Symmetric and asymmetric diophantine approximation by continued fractions
[PB94-126455] p 2998 N94-27030
Radial basis function approximation: From gridded centers to scattered centers
[AD-A274184] p 2998 N94-27103
Analytic approximation to randomly oriented spheroid extinction
[DREV-4712-93] p 3038 N94-27598

APTITUDE
A comparison of two hardware implementations of a crew selection system
[AD-A274913] p 2937 N94-26346
Validation of the Federal Aviation Administration air traffic control specialist pre-training screen
[DOT/FAA/AM-94/4] p 2938 N94-26600

AQUEOUS SOLUTIONS
Multivariate calibration applied to near-infrared spectroscopy for the quantitative analysis of dilute aqueous solutions
[DE94-003231] p 2716 N94-26794
High-temperature and high-pressure flow calorimeter
p 2718 N94-27390
Effect of different ions on the anodic behaviour of alloy 800 in chloride solutions at high temperature
[DE94-602982] p 2743 N94-27832
Computer simulation of aqueous Na-Cl electrolytes
[DE94-002622] p 3030 N94-28001

AQUIFERS
Mapping of seawater intrusion into the coastal aquifer of Israel (the seawater-freshwater interface) by TDEM (Time Domain Electromagnetic) method
[ITN-94-85238] p 2850 N94-27331

ARABIAN SEA
Tropical cyclone report, 1992
[AD-A274464] p 2896 N94-27025

ARAMID FIBER COMPOSITES
Development of fibre-metal laminates, ARALL and GLARE, new fatigue resistant materials
[PB94-126471] p 2669 N94-26969
Impact tests on fibre metal laminates under a tensile load
[PB94-126570] p 2710 N94-27201

ARC GENERATORS
A study of DC-DC converters with MCT's for arcjet power supplies
[NASA-CR-191204] p 2703 N94-27662

ARC HEATING
Fullerene fabrication using an arc furnace. Characterization of the product
[DE94-603006] p 3029 N94-27834

ARC MELTING
Channel model for AC electric arc
[PB94-124591] p 2786 N94-27327

ARC WELDING
Weldability of Direct-Quenched and Tempered (DQT) high strength steel HT80
[VTT-TIED-1406] p 2731 N94-25623
Weldability of Accelerated-Cooled (AcC) high strength TMCP steel HT50
[VTT-TIED-1410] p 2731 N94-25784
The study of single-pass GMA welds with different cover gas compositions on HSLA-100 steel
[AD-A274857] p 2822 N94-26174
The influence of weld metal alloying additions to extend the heat input range for the submerged arc welding of high strength steels
[AD-A274284] p 2738 N94-26679

ARCHITECTURE (COMPUTERS)
Design of a shared coherent cache for a multiple channel architecture
[AD-A274026] p 3034 N94-25758
Knowledge organization in intelligent tutoring systems for diagnostic problem solving in complex dynamic domains
[AD-A273986] p 2984 N94-25899
Real-time tracking with a 3D-flow processor array
[DE94-003981] p 2980 N94-25984
The High Performance Storage System
[DE94-004351] p 2948 N94-26578
Real-Time Embedded Processing for Space Applications
[ISBN-2-85428-335-X] p 2948 N94-26713
High performance flight computer developed for deep space applications p 2949 N94-26718
Fault tolerant real-time processing system for space use p 2949 N94-26720
A complete version of the Ada tasking coprocessor
p 2950 N94-26721
Design principles of onboard management of a Sun synchronous satellite p 2950 N94-26722
NASA's spacecraft data system p 2950 N94-26723
The Ariane 5 data management system
p 2950 N94-26724
PRONAOS flight software: A real-time application for a balloonborne scientific gondola p 2950 N94-26725
MATRA Marconi Space: The Silex on-board processor and on-board software p 2950 N94-26726
Virtual data
[DE94-002718] p 2986 N94-26807
A Multitransputer Parallel Processing System (MTPPS)
[DE94-604652] p 2981 N94-26903
An optoelectronic graphics display processor
[AD-A274401] p 3037 N94-26990
Design of a parallel discrete event simulation coprocessor
[AD-A274135] p 2982 N94-27123
Alternative architectures for domain-oriented application composition and generation systems
[AD-A274180] p 2968 N94-27128
Virtual memory management and virtual bus overloading on multiple channel architectures
[AD-A274127] p 2954 N94-27152
A partitioning and redundancy model for wafer-scale integrated circuits p 2955 N94-27195
Binary snapshots
[CWI-CS-R9319] p 2955 N94-27547
Communication on the Paragon
[DE94-003103] p 2983 N94-27713
Proceedings of Workshop on Distributed Computing and Network
[DE94-701165] p 2983 N94-27804

ARCTIC REGIONS
Seasonal snow of arctic Alaska R4D investigations
[DE93-040082] p 2892 N94-25939
Active layer dynamics and arctic hydrology and meteorology
[DE94-001724] p 2892 N94-25951
Sound, speed, reflectivity, absorption, and thermal diffusivity measurements in Arctic ice in 1990
[AD-A274326] p 2899 N94-26886
Leadex environmental phenomena and effects observed by DMSP, NOAA, and ERS-1 satellites
[AD-A274596] p 2868 N94-26888
Ice surface temperature retrieval from AVHRR, ATSR, and passive microwave satellite data: Algorithm development and application
[NASA-CR-195276] p 2851 N94-27849

ARGON
Hook spectroscopy as an atomic number density diagnostic applied to laser-ablated copper plasmas
[DE94-002645] p 3042 N94-26081
Physical characteristics of polymethylmethacrylate scintillator SOFG-120
[DE93-634184] p 2810 N94-26395
Ion beam mixing of marker layers into amorphous aluminum oxide
[DE94-000901] p 2752 N94-26676

ARGON ISOTOPES
Geological Dating by Ar-40 - Ar-39 method
[DE94-601975] p 2880 N94-26874

ARGON PLASMA
Two dimensional self-consistent fluid simulation of RF inductive sources
[DE94-003635] p 2767 N94-25937
Plasma surface cleaning using microwave plasmas
[DE94-002754] p 2713 N94-26014

ARIANE LAUNCH VEHICLE
The Ariane 5 data management system
p 2950 N94-26724
Charge efficiency of Ni/H2 cells during transfer orbit of Telstar 4 satellites p 2862 N94-28117

ARITHMETIC
Set based analysis of arithmetic
[AD-A274112] p 3002 N94-25903

ARITHMETIC AND LOGIC UNITS
Arithmetic performances of onboard computers
p 2952 N94-26738

ARMED FORCES
Satellite navigation system GPS: A review of principles and performance and developments in general
[PB94-124534] p 2665 N94-27210

ARMED FORCES (UNITED STATES)
Human dimensions research team, operation restore hope
[AD-A274340] p 2939 N94-27056

ARMOR
Dynamic response of S-2 glass reinforced plastic structural armor
[AD-A273868] p 2747 N94-25596

AROMATIC COMPOUNDS
Analytical method for estimation of the total amount of aromatic and poly aromatic compounds in diesel fuel
[PB94-123692] p 2759 N94-25907

ARRESTING GEAR
Soft ground arresting system for airports
[DOT/FAA/CT-93/80] p 2680 N94-26202

ARRHYTHMIA
On the mechanism of reentrant arrhythmias following DC defibrillation: Influence of fiber orientation to the effects of low-energy electric field stimulation on the effective refractory period of cardiac muscle
p 2904 N94-27468
Effects of perfusion of amiodarone on electrophysiological properties in single rabbit ventricular myocytes p 2906 N94-27503
Electrophysiological effects of MS-551, a new Class 3 antiarrhythmic agent, on isolated rabbit ventricular muscles p 2907 N94-27505
Comparative investigation of new Class 3 antiarrhythmic drugs, E-4031 and MS-551, on electrophysiological properties in isolated rabbit ventricular myocytes
p 2907 N94-27506
Effects of Class 1 antiarrhythmic drugs on the intraventricular conduction: Influence of fiber orientation
p 2907 N94-27507
Effects of Class 3 antiarrhythmic agents, E-4031 and MS-551 on ventricular repolarization in isolated rabbit hearts p 2907 N94-27508
Block of cardiac sodium channels by Ro 22-9194 (R), a new antiarrhythmic agent: Effects on the maximum upstroke velocity (Vmax) of single guinea pig ventricular myocytes p 2907 N94-27511
Electrophysiological effects of an antiarrhythmic drug, moricizine on isolated guinea pig ventricular muscles
p 2907 N94-27512

ARSENATES

Three-wave nonlinear interactions in KTiOPO4 (KTP) and KTP isomorphs
[AD-A274079] p 3052 N94-25993

ARTERIES

EcarHeart2 version 1.0: Programmers documentation
[PB94-124633] p 2909 N94-25909

ARTHRITIS

Excitation of cutaneous polymodal receptor induced by sympathetic stimulation in adjuvant-induced arthritis rats
p 2906 N94-27495

Selection of site injecting adjuvant in chronic inflammation model p 2906 N94-27496

Influence of mechanical stimulation on inflammatory edema p 2906 N94-27497

The effect of naloxone on sleeping time in adjuvant arthritic rats p 2906 N94-27498

ARTIFICIAL INTELLIGENCE

Discovery learning in autonomous agents using genetic algorithms
[AD-A274083] p 2677 N94-25998

Rational handling of multiple goals for mobile robots
[NASA-CR-195177] p 2985 N94-26006

Deductive computer programming
[AD-A274966] p 2962 N94-26303

Design of a computer expert system for adhesive selection using artificial intelligence techniques
[AD-A274715] p 2751 N94-26434

Blurred focal elements generalization of dempster's rule
[PB94-124278] p 2986 N94-26992

What can we learn from genetic algorithms: A new perspective for search methods
[PB94-125234] p 2967 N94-26997

Using discovery-based learning to prove the behavior of an autonomous agent
[AD-A274131] p 2987 N94-27121

Robotics handbook. Version 1: For the interested party and professional
[NASA-TM-109690] p 2824 N94-27238

Vision 21: Interdisciplinary Science and Engineering in the Era of Cyberspace
[NASA-CP-10129] p 2685 N94-27358

The coming technological singularity: How to survive in the post-human era p 2685 N94-27359

The universal robot p 2686 N94-27361

Pigs in cyberspace p 2689 N94-27376

On modeling and controlling intelligent systems
[DE94-002446] p 2988 N94-27706

Multi-sensor data fusion in a distributed environment: Architectural solutions
[NLR-TP-92243-U] p 2989 N94-27800

A hybrid formalism for representation and interpretation of image knowledge
[INPE-5485-PRE/1784] p 2989 N94-27833

Thunderstorm Hypothesis Reasoner
[NASA-CR-195714] p 2897 N94-27884

Artificial Intelligence Research Branch future plans
[NASA-TM-109733] p 2989 N94-28065

ARTIFICIAL SATELLITES

Design analysis of a combined optical/LADAR deep-space surveillance satellite
[AD-A274040] p 2694 N94-25832

Satellite attitude determination using linear combination of models
[AD-A274082] p 2694 N94-25996

Technology development in space projects
[VTT-TIED-1438] p 2682 N94-26249

Mounting of SSM's
[VTT-TIED-1442] p 2695 N94-26250

ARTILLERY

A preliminary method for atmospheric soundings in real time using satellite and ground-based remotely sensed data
[AD-A274381] p 2880 N94-26828

ASIA

A geological and geophysical information system for Eurasia
[AD-A274818] p 3096 N94-26490

A preliminary shear velocity model for Central Asia
[AD-A274972] p 2880 N94-26752

Propagation of cold air masses in East Asia and its associated planetary-scale function
[AD-A274304] p 2895 N94-26850

Global change: A research strategy for Australia 1992-1996 p 2874 N94-28282

ASPECT RATIO

Normal force of low aspect ratio cropped-delta wings at pre-stall angles of attack and subsonic speeds
[ESDU-93034] p 2648 N94-27955

Wing lift increment at zero angle of attack due to deployment of single-slotted flaps at low speeds
[ESDU-93019] p 2649 N94-28140

ASSAYING

Atomic processes in Inertial Electrostatic Confinement (IEC) devices
[DE94-005015] p 3047 N94-27715

ASSEMBLING

Automatic assembly planning and its role in agile manufacturing: A Sandia perspective
[DE94-002291] p 2821 N94-25970

STS-56, RSRM-031, 360L031 KSC processing configuration and data report
[NASA-CR-193922] p 2691 N94-26135

STS-51, RSRM-033, 360T033 KSC processing configuration and data report
[NASA-CR-193923] p 2691 N94-26153

ASSESSMENTS

Measurement of laboratory quality
[VTT-TIED-1427] p 2679 N94-25652

Practical problems in aggregating expert opinions
[DE94-002623] p 3094 N94-27707

ASTEROID MISSIONS

Comet nucleus and asteroid sample return missions
p 2689 N94-25692

Asteroid exploration and utilization
p 3080 N94-25697

ASTEROIDS

Comet nucleus and asteroid sample return missions
p 2689 N94-25692

Asteroid exploration and utilization
p 3080 N94-25697

A widely adaptable habitat construction system utilizing space resources p 2688 N94-27374

Consequences of impacts of small asteroids and comets with Earth p 2889 N94-28301

An extraterrestrial event at the tertiary-quaternary boundary p 2890 N94-28309

A general theory of impacts and mass extinctions, and the consequences of large-body impact on the Earth
p 2891 N94-28310

ASTIGMATISM

Theory and modeling of stimulated Raman scattering
[AD-A273755] p 3033 N94-25721

ASTRONAUT PERFORMANCE

Telescience testbedding for physiological experiments under hypobaric hypoxic conditions
p 2913 N94-27449

Telescience testbedding under hypobaric hypoxic conditions: Evaluation by operation ability and recognition ability p 2913 N94-27450

Telescience testbedding for physiological experiments under hypobaric hypoxic conditions: Development and evaluation in CNV measuring p 2913 N94-27451

ASTRONAUTICS

Technical and scientific research for aeronautics and astronautics
[ETN-94-95392] p 2641 N94-26212

ASTRONOMICAL CATALOGS

The continuum spectral characteristics of gamma ray bursts observed by BATSE p 3114 N94-26686

Sloan Digital Sky Survey
[DE94-004662] p 3103 N94-27750

In search of Nemesis p 2888 N94-28297

ASTRONOMICAL MODELS

Cosmic no-hair in Brans-Dicke theory
[DE94-603673] p 3074 N94-27636

ASTRONOMICAL PHOTOGRAPHY

Properties of the near-axis bispectrum applied to high-resolution astronomical imaging
[ISBN-0-315-85247-X] p 3103 N94-27302

Comparison of the lossy image data compressions for the MESUR Pathfinder and for the Huygens Titan Probe
p 2945 N94-28254

Performance considerations for the application of the lossless browse and residual model
p 2946 N94-28256

ASTRONOMICAL SPECTROSCOPY

Reanalysis of Mariner 9 UV Spectrometer Data for Ozone, Cloud, and Dust Abundances, and Their Interaction Over Climate Timescales
[NASA-CR-195244] p 3107 N94-27885

Visualization techniques to aid in the analysis of multispectral astrophysical data sets
[NASA-CR-195268] p 3105 N94-27932

ASTROPHYSICS

Dibaryon-induced instability of neutron stars
[DE93-634453] p 3103 N94-26046

Visualization techniques to aid in the analysis of multispectral astrophysical data sets
[NASA-CR-195268] p 3105 N94-27932

ASYMMETRY

Data on parity violation in the compound nucleus and its interpretation
[DE94-003965] p 3013 N94-25820

How reliable is the HMSA integral equation for the pair structure of supercooled and amorphous mixtures?
[DE94-601543] p 3006 N94-26411

Spin asymmetry in resonant electron-hydrogen elastic scattering
[DE94-601813] p 3023 N94-26943

Calculations of asymmetries in electron-alkali scattering
[DE94-601816] p 3023 N94-26945

Measurements of the B(sup 0)(bar B)(sup 0)CP asymmetry
[DE94-003379] p 3063 N94-27047

White noise theory of robust nonlinear filtering with correlated state and observation noises
[PB94-126661] p 3004 N94-27211

Why is the north polar cap on Mars different than the south polar cap? p 3107 N94-27889

Pneumatic management of blunted-forebody flow asymmetry for high-angle-of-attack directional control
p 2679 N94-28028

ASYMPTOTIC METHODS

On the phi(sub 0)-stability of perturbed nonlinear differential systems
[DE93-634304] p 2993 N94-26441

Recent developments in the simulation of steady and transient transverse jet interactions for missile, rotorcraft, and propulsive applications p 2804 N94-28030

ASYMPTOTIC PROPERTIES

Stability of large scale interconnected dynamical systems
[DE94-601536] p 2993 N94-26408

ASYMPTOTIC SERIES

Parameter estimation for ARMA models with infinite variance innovations
[AD-A274654] p 3003 N94-26355

Asymptotics for Kummer functions, Bose plasmas, and related special functions
[DE94-601853] p 3007 N94-26928

ATHLETES

Aerobic fitness and orthostatic tolerance: Evidence against an association p 2934 N94-28365

ATLANTIC OCEAN

Correlation between the gravity field and the bathymetry in the North Atlantic Ocean
[ETN-94-95036] p 2899 N94-26108

Mesoscale frontal evolution of the ERICA IOP-5A Cyclone
[AD-A274906] p 2893 N94-26183

ATMOSPHERIC ATTENUATION

Probing the Martian atmosphere in the ultraviolet
p 3108 N94-27890

How well was total ozone abundance inferred with Mariner 9? p 3108 N94-27891

High-Speed Research: Sonic Boom, Volume 1
[NASA-CP-10132] p 2649 N94-28188

Progress in modeling atmospheric propagation of sonic booms p 2650 N94-28189

ATMOSPHERIC BOUNDARY LAYER

Interactions between a tropical mixed boundary layer and cumulus convection in a radiative-convective model
[DE94-000848] p 2877 N94-25979

The numerical simulation of marine boundary layer clouds
[AD-A273669] p 2894 N94-26195

Radar detection of low-altitude targets in a maritime environment. Volume 2: Meteorological and radar data
[AD-A274658] p 2768 N94-26335

Surface roughness lengths
[AD-A274550] p 2895 N94-26846

Modeling of the coupled magnetospheric and neutral wind dynamos
[NASA-CR-195273] p 2883 N94-27852

The Martian atmospheric planetary boundary layer stability, fluxes, spectra, and similarity
[NASA-CR-195711] p 3108 N94-27935

ATMOSPHERIC CHEMISTRY

Simulation of the carbon cycle in the oceans
[DE94-000780] p 2898 N94-25791

Seasonal snow of arctic Alaska R4D investigations
[DE93-040082] p 2892 N94-25939

Isotopically labeled CO2 from stratosphere: A tracer of carbon biogeochemistry
[DE94-002777] p 2877 N94-26015

A conceptual framework for the evaluation of cost-effectiveness of projects to reduce GHG emissions and sequester carbon
[DE93-040448] p 2867 N94-26419

Numerical procedure for planetary wave solution
[DE94-004280] p 2879 N94-26576

A three-dimensional chemical transport model study of the 1991 Antarctic ozone hole using objectively analysed data
[ISBN-0-315-84250-4] p 2867 N94-26670

Probing the Martian atmosphere in the ultraviolet
p 3108 N94-27890

How well was total ozone abundance inferred with Mariner 9? p 3108 N94-27891

Studies for the loss of atomic and molecular species from Io
[NASA-CR-195702] p 3108 N94-27941

ATMOSPHERIC CIRCULATION
The numerical simulation of marine boundary layer clouds
[AD-A273669] p 2894 N94-26195
Investigation of mesoscale convective cloud clusters in South China
[AD-A274303] p 2895 N94-26678
Recent ASCOT experiments in multi-layered flows
[DE94-002360] p 2880 N94-26762
Surface roughness lengths
[AD-A274550] p 2895 N94-26846
Propagation of cold air masses in East Asia and its associated planetary-scale function
[AD-A274304] p 2895 N94-26850
The NOGAPS ten year AMIP integration
[AD-A274332] p 2900 N94-26887
An observational study of the extratropical anticyclones in the South American continent
[INPE-5387-TDI/476] p 2896 N94-27356
Global change research related to the Earth's energy and hydrologic cycle
[NASA-CR-195270] p 2869 N94-27430
Simulation of the Indian and East-Asian summer monsoon in the ECMWF model: Sensitivity to horizontal resolution
[DE94-004276] p 2897 N94-27571
The Martian atmospheric planetary boundary layer stability, fluxes, spectra, and similarity
[NASA-CR-195711] p 3108 N94-27935

ATMOSPHERIC COMPOSITION
Extraterrestrial surface propulsion systems
p 2833 N94-25691
Sensitivity of climate models: Comparison of simulated and observed patterns for past climates
[DE93-019934] p 2865 N94-25789
Methane emissions from natural wetlands
[DE93-040796] p 2865 N94-25790
Assessing the climatic effect of carbon dioxide and other trace gases using an interactive two-dimensional climate-chemistry model
[DE94-001741] p 2866 N94-25927
A conceptual framework for the evaluation of cost-effectiveness of projects to reduce GHG emissions and sequester carbon
[DE93-040448] p 2867 N94-26419
Reanalysis of Mariner 9 UV Spectrometer Data for Ozone, Cloud, and Dust Abundances, and Their Interaction Over Climate Timescales
[NASA-CR-195244] p 3107 N94-27885
Mars ozone: Mariner 9 revisited p 3107 N94-27888
In situ Mars ozone detector p 3108 N94-27892
Studies for the loss of atomic and molecular species from Io
[NASA-CR-195702] p 3108 N94-27941

ATMOSPHERIC CORRECTION
Properties of the near-axis bispectrum applied to high-resolution astronomical imaging
[ISBN-0-315-85247-X] p 3103 N94-27302
The validation of ATSR measurements with in situ sea temperatures
[DE94-003195] p 2852 N94-27875
Ionospheric calibration for single frequency altimeter measurements
[NASA-CR-195709] p 2883 N94-27883

ATMOSPHERIC DENSITY
Upper atmosphere neutral and plasma density modeling
[AD-A274768] p 2879 N94-26569
Trajectories of ballistic impact ejecta on a rotating Earth p 2887 N94-28295

ATMOSPHERIC DIFFUSION
Air pollution transport modeling
[AD-A273863] p 2865 N94-25609

ATMOSPHERIC EFFECTS
System design analysis of a lightweight laser satellite terminal
[AD-A274033] p 2690 N94-25769
An overview of the TNO contribution to VAST 92
[AD-A273751] p 2893 N94-26016
The validation of ATSR measurements with in situ sea temperatures
[DE94-003195] p 2852 N94-27875

ATMOSPHERIC ELECTRICITY
Modeling of the coupled magnetospheric and neutral wind dynamos
[NASA-CR-195273] p 2883 N94-27852

ATMOSPHERIC ENTRY
Preliminary reentry safety assessment of the General Purpose Heat Source module for the Cassini mission: Aerospace Nuclear Safety Program
[DE94-001646] p 2699 N94-25926

ATMOSPHERIC GENERAL CIRCULATION MODELS
Interpreting the implied meridional oceanic energy transport in AMIP
[DE94-001538] p 2898 N94-26072
The impact of recent model improvements on GISS GCM predictions of climate change
[DE93-019458] p 2866 N94-26077
A preliminary analysis of the US west climatology
[DE94-003028] p 2894 N94-26313
Simulation of the Indian and East-Asian summer monsoon in the ECMWF model: Sensitivity to horizontal resolution
[DE94-004276] p 2897 N94-27571

ATMOSPHERIC MODELS
Air pollution transport modeling
[AD-A273863] p 2865 N94-25609
Sensitivity of climate models: Comparison of simulated and observed patterns for past climates
[DE93-019934] p 2865 N94-25789
Development and testing of the Coupled Ocean/Atmosphere Mesoscale Prediction System (COAMPS)
[AD-A273925] p 2892 N94-25793
Assessing the climatic effect of carbon dioxide and other trace gases using an interactive two-dimensional climate-chemistry model
[DE94-001741] p 2866 N94-25927
The effect of elevation data representation on nocturnal drainage wind simulations
[DE94-003624] p 2892 N94-25936
Interactions between a tropical mixed boundary layer and cumulus convection in a radiative-convective model
[DE94-000848] p 2877 N94-25979
Interpreting the implied meridional oceanic energy transport in AMIP
[DE94-001538] p 2898 N94-26072
Testbed model and data assimilation for ARM
[DE94-000432] p 2893 N94-26082
Meeting of the Eighth Session of the Scientific Advisory Committee of the World Climate Impact Assessment and Response Strategies Programme
[DE93-633954] p 2866 N94-26163
A modeling study of the mesocyclone
[AD-A274889] p 2893 N94-26168
Modelling atmospheric turbulence effects on ground-based telescope systems
[DE94-004211] p 3102 N94-26528
Upper atmosphere neutral and plasma density modeling
[AD-A274768] p 2879 N94-26569
Numerical modelling of precipitation over complex terrain
[ISBN-0-315-84327-6] p 2894 N94-26628
A three-dimensional chemical transport model study of the 1991 Antarctic ozone hole using objectively analysed data
[ISBN-0-315-84250-4] p 2867 N94-26670
Investigation of mesoscale convective cloud clusters in South China
[AD-A274303] p 2895 N94-26678
The NOGAPS ten year AMIP integration
[AD-A274332] p 2900 N94-26887
Global barotropic response to a tropical forcing
[NASA-CR-195256] p 2896 N94-27408
An overview of the ASCOT program
[DE94-004356] p 2869 N94-27601
Ionospheric calibration for single frequency altimeter measurements
[NASA-CR-195709] p 2883 N94-27883
The Martian atmospheric planetary boundary layer stability, fluxes, spectra, and similarity
[NASA-CR-195711] p 3108 N94-27935
An enhanced global spectral model
[PL-TR-92-2011] p 2898 N94-28223

ATMOSPHERIC MOISTURE
Investigation of mesoscale convective cloud clusters in South China
[AD-A274303] p 2895 N94-26678
Cloud liquid water content measurement tests using dual-wavelength radar
[PB94-125960] p 2896 N94-26959

ATMOSPHERIC OPTICS
Performance comparison of shearing interferometer and Hartmann wave front sensors
[AD-A274031] p 3034 N94-25768

ATMOSPHERIC PHYSICS
Kiruna geophysical data. Data summary 93/4-6, April-June 1993
[PB94-123700] p 2881 N94-27039
Auroral Tomography Workshop Proceedings
[PB94-123718] p 2881 N94-27040
Kiruna geophysical data. Data summary 93/1-3, January-March, 1993
[PB94-123791] p 2881 N94-27043
Observation of the upper atmosphere physics at Asuka Station by the 30th Japanese Antarctic Research Expedition in 1989 p 2885 N94-27972

ATMOSPHERIC PRESSURE
Digital Altimeter Setting Indicator (DASI) Operational Test and Evaluation (OT/E) operational test procedures
[AD-A274100] p 2672 N94-26030
Symptoms of hypoxia at simulated altitude of 25,000 feet p 2933 N94-27945

ATMOSPHERIC RADIATION
Testbed model and data assimilation for ARM
[DE94-000432] p 2893 N94-26082
Dynamics explorer interdisciplinary scientist investigations
[NASA-CR-195226] p 2878 N94-26204
Differentiating the role of land surface variability and cloudiness variability on global energy transport within the atmosphere and oceans
[NASA-CR-195229] p 2847 N94-26222
JARE data reports. No. 186: Upper atmosphere physics data. Syowa and Asuka Stations, 1990
[JTN-94-80594] p 2881 N94-27299
The Sixteenth Symposium on Coordinated Observations of the Ionosphere and the Magnetosphere in the Polar Regions: Program and abstracts
[JTN-94-80601] p 2882 N94-27300
Martian atmospheric radiation budget
p 3107 N94-27887

ATMOSPHERIC REFRACTION
Over-the-horizon propagation measurements at six radar-frequency bands at the Atlantic Ocean Coast
[AD-A274151] p 2773 N94-27136
Theoretical and experimental analysis of the spatial and temporal behaviour of the intensity of an electro-magnetic wave reflected from a diffuse target after passing through a turbulent atmosphere
[ITN-94-85230] p 2774 N94-27234

ATMOSPHERIC SCATTERING
Performance statistics bulletin: High altitude meteor scatter propagation, August, September, October 1989
[AD-A274455] p 2773 N94-27085
Spectral and temporal correlations of multifrequency waves in the turbulent atmosphere
[ITN-94-85229] p 2774 N94-27233

ATMOSPHERIC SOUNDING
Coherent HF radar system for the study of natural and heater induced ionospheric irregularities
[AD-A273804] p 2876 N94-25752
An evaluation of the utility of ground-based high resolution interferometer (GB-HIS) soundings of the planetary boundary layer
[DE94-000960] p 3106 N94-25981
A preliminary method for atmospheric soundings in real time using satellite and ground-based remotely sensed data
[AD-A274381] p 2880 N94-26828
Zodiacal light data investigation. Interim results for the Earthlimb Clutter Experiment
[AD-A274461] p 3104 N94-27265
The Sixteenth Symposium on Coordinated Observations of the Ionosphere and the Magnetosphere in the Polar Regions: Program and abstracts
[JTN-94-80601] p 2882 N94-27300
Memories of National Institute of Polar Research. Series A-19. Upper atmosphere physics: ELF emission in high latitudes: Ray path calculation and ground-satellite observations
[JTN-94-80592] p 2882 N94-27342
Antarctic Record, Vol. 36, No. 2
[REPT-107] p 2883 N94-27963
Observation of the upper atmosphere physics at Asuka Station by the 30th Japanese Antarctic Research Expedition in 1989 p 2885 N94-27972
Role and activity of STA on Asian Pacific regional cooperation p 2853 N94-28269
Cooperative research projects on satellite remote sensing for the hydrological subjects
p 2853 N94-28270
Atmospheric science research in Malaysia: Perspectives on international cooperation p 2874 N94-28285

ATMOSPHERIC TEMPERATURE
A preliminary analysis of the US west climatology
[DE94-003028] p 2894 N94-26313
Surface roughness lengths
[AD-A274550] p 2895 N94-26846
How well was total ozone abundance inferred with Mariner 9? p 3108 N94-27891

ATMOSPHERIC TURBULENCE
Performance comparison of shearing interferometer and Hartmann wave front sensors
[AD-A274031] p 3034 N94-25768
Conversion of the CLUSE model for applications over open ocean
[AD-A273750] p 2893 N94-26013

Modelling atmospheric turbulence effects on ground-based telescope systems
[DE94-004211] p 3102 N94-26528
Theoretical and experimental analysis of the spatial and temporal behaviour of the intensity of an electro-magnetic wave reflected from a diffuse target after passing through a turbulent atmosphere
[ITN-94-85230] p 2774 N94-27234
The deterministic power-spectral-density method
[AD-B175894] p 2678 N94-27395
High-Speed Research: Sonic Boom, Volume 1
[NASA-CP-10132] p 2649 N94-28188
Progress in modeling atmospheric propagation of sonic booms p 2650 N94-28189
Implications for high speed research: The relationship between sonic boom signature distortion and atmospheric turbulence p 2650 N94-28190
Interaction of the sonic boom with atmospheric turbulence p 2650 N94-28191
The propagation of spark-produced N waves through turbulence p 2650 N94-28193

ATOMIC BEAMS
Heavy neutral beam probe for edge plasma analysis in tokamaks
[DE94-003391] p 3041 N94-25846
Study on laser atomic spectroscopy
[DE93-633328] p 2817 N94-26402
Measurement of metastable population distribution in gadolinium atomic beam by laser resonance photoionization method
[DE94-701194] p 3029 N94-27820

ATOMIC CLOCKS
Diode-laser-pumped, gas-cell atomic clocks
[AD-A274812] p 3008 N94-26484

ATOMIC CLUSTERS
Hadron jets and nucleon clusters in the relativistic nuclear collisions
[DE93-613434] p 3031 N94-25850

ATOMIC COLLISIONS
Convergent close-coupling calculation of electron-sodium scattering
[DE94-601815] p 3014 N94-25842
Spin asymmetry in resonant electron-hydrogen elastic scattering
[DE94-601813] p 3023 N94-26943
Calculation of total cross sections for electron and positron scattering on sodium and potassium
[DE94-601814] p 3023 N94-26944
Calculations of asymmetries in electron-alkali scattering
[DE94-601816] p 3023 N94-26945
International bulletin on atomic and molecular data for fusion. No. 42-45, Mar. 1991 - Dec. 1992
[DE94-601817] p 3045 N94-26946
International bulletin on atomic and molecular data for fusion. No. 46
[DE94-601818] p 3023 N94-26947
A study of the global properties of hadronic matter at large densities
[ISBN-0-315-57234-5] p 3025 N94-27260
Muon transfer rates in collisions of hydrogen isotope mesic atoms on bare nuclei: Multichannel adiabatic approach
[DE94-606752] p 3030 N94-27861
Correlations in inelastic collisions of relativistic nuclei with emulsion at (4.1 - 4.5) A GeV/c
[DE93-634526] p 3030 N94-27994

ATOMIC ENERGY LEVELS
Theoretical and experimental studies of elementary physics
[DE94-002310] p 3008 N94-25988
Excited Landau levels, orbital angular momentum and axial anomaly
[DE94-606407] p 3068 N94-27679

ATOMIC EXCITATIONS
Hook spectroscopy as an atomic number density diagnostic applied to laser-ablated copper plasmas
[DE94-002645] p 3042 N94-26081
Solution of the Heisenberg equation for the four-fermion contact interaction by the method of dynamical mappings
[DE94-606341] p 3075 N94-27858

ATOMIC FORCE MICROSCOPY
MBE grown 3 to 5 strain relaxed buffer layers and superlattices characterized by atomic force microscopy
[DE94-002931] p 3056 N94-26308
The growth and characterization of GaN as a photodetector
[AD-A274570] p 3063 N94-26965

ATOMIC PHYSICS
Frontiers of science and measurement: Report on a seminar jointly organized by the National Physical Laboratory and the Institute of Physics
[PB94-124310] p 3009 N94-27131
Atomic processes in Inertial Electrostatic Confinement (IEC) devices
[DE94-005015] p 3047 N94-27715

ATOMIC SPECTRA
Study on laser atomic spectroscopy
[DE93-633328] p 2817 N94-26402
Spectroscopy Division
[DE94-604074] p 2717 N94-26988

ATOMIC STRUCTURE
Study on characteristics and electronic structures of materials with strong electronic correlations by ferromagnetic fields p 2724 N94-25557
Study on synthesis and characteristics of intermetallic compound with strong electron correlation
p 2726 N94-25563
First principle calculation for magneto-crystalline anisotropy
[DE93-634653] p 3052 N94-26012
Hook spectroscopy as an atomic number density diagnostic applied to laser-ablated copper plasmas
[DE94-002645] p 3042 N94-26081
The origins of ordering in CuPt
[DE94-003864] p 2736 N94-26351
Strongly interacting fermion systems
[DE94-002674] p 3021 N94-26677
Modeling Group 4 elements with new transferable tight-binding models
[DE94-000770] p 3059 N94-26695
Rydberg states in multiply charged ions
[DE94-002335] p 3021 N94-26760
Electronic structure of a single oxygen vacancy in rutile TiO2
[DE94-602717] p 3062 N94-26901
International journal of quantum chemistry. Quantum Chemistry Symposium Number 27: Proceedings of the International Symposium on Atomic, Molecular, and Condensed Matter Theory and Computational Methods
[AD-A274352] p 3023 N94-26926
International bulletin on atomic and molecular data for fusion. No. 42-45, Mar. 1991 - Dec. 1992
[DE94-601817] p 3045 N94-26946
International bulletin on atomic and molecular data for fusion. No. 46
[DE94-601818] p 3023 N94-26947
The growth and characterization of GaN as a photodetector
[AD-A274570] p 3063 N94-26965
Technical report of ISSP. Ser. A, no. 2678: Magnetic properties of carbon nanotubes
[JTN-94-80564] p 3064 N94-27174
Technical report of ISSP. Ser. A, no. 2679: Novel electronic states of partially deuterated (DMe-DCNQI)2Cu
[JTN-94-80565] p 3064 N94-27175
Technical report of ISSP. Ser. A, no. 2681: Orbital and spin susceptibilities of the plane copper sites in YBa2Cu3O(x) system
[JTN-94-80567] p 3064 N94-27177
Technical report of ISSP. Ser. A, no. 2671: Quasi-localization of light waves in Fibonacci dielectric multilayers
[JTN-94-80557] p 3064 N94-27231
Technical report of ISSP. Ser. A, no. 2674: High-field cyclotron resonance and impurity transition in n- and p-3C-SiC at magnetic fields up to 175 T
[JTN-94-80560] p 3064 N94-27232
Technical report of ISSP. Ser. A, no. 2670: Electronic structure of light transition metal compounds studied by photoemission
[JTN-94-80556] p 3065 N94-27239
Technical report of ISSP. Ser. A, no. 2672: Magneto-optical effects of excitons in BiI3 crystals under pulsed high magnetic fields. 3: Excitons confined around a stacking disorder formed by a bending stress
[JTN-94-80558] p 3065 N94-27240
Technical report of ISSP. Ser. A, no. 2675: High-field cyclotron resonance and valence-band structure in semiconducting diamond
[JTN-94-80561] p 3065 N94-27245
Technical report of ISSP. Ser. A, no. 2676: Charge mass singularity in two-dimensional Hubbard model
[JTN-94-80562] p 3065 N94-27248
First principles calculations for the cleaved and annealed Ge(111) surfaces
[DE93-617048] p 3066 N94-27347
Proceedings of the workshop on (pi), K, (eta)-nucleon interactions
[DE94-701314] p 3027 N94-27733
Photoelectron spectroscopic studies of the electronic structure and bonding in TiC and TiN
[ATR-93(8361)-2] p 2746 N94-28185

ATOMIC THEORY
Atomic processes in Inertial Electrostatic Confinement (IEC) devices
[DE94-005015] p 3047 N94-27715

ATOMS
Modaling defect production in high energy collision cascades
[DE94-003810] p 3017 N94-26049
Refractive and dielectric properties of helium, argon and nitrogen gases
[PB94-123783] p 3008 N94-26851

ATROPHY
Endocrinological evaluations of muscle and bone atrophy in tail-suspended rats p 2903 N94-27444

ATTACK AIRCRAFT
Report of the defense science board task force on aircraft assessment
[AD-A274531] p 2669 N94-26835

ATTENTION
Pacing visual attention: Temporal structure effects
[AD-A273859] p 2937 N94-25965

ATTITUDE (INCLINATION)
Evaluation of the prototype dual-axis wall attitude measurement sensor
[NASA-TM-109056] p 2811 N94-26707

ATTITUDE CONTROL
Project WISH: The Emerald City p 2703 N94-25690
Inertial-space disturbance rejection for space-based manipulators p 2683 N94-26281
Berthing of Space Station Freedom using the shuttle remote manipulator system p 2684 N94-26284
Comparison of performance in simulator flight among subjects with different simulator experiences
p 2933 N94-27943

ATTITUDE GYROS
Test and evaluation of the Litton (Canada) Canadian strapdown gyroscope (CSG-2) Performance Evaluation Unit (PEU)
[DREO-1010] p 2813 N94-27597

ATTITUDE INDICATORS
Evaluation of the prototype dual-axis wall attitude measurement sensor
[NASA-TM-109056] p 2811 N94-26707

AUDITORY PERCEPTION
Signal- and listener-based factors in complex auditory pattern perception
[AD-A274148] p 2939 N94-27094

AUDITORY SIGNALS
Monaural and binaural processing of complex waveforms
[AD-A274209] p 3010 N94-27067
Signal- and listener-based factors in complex auditory pattern perception
[AD-A274148] p 2939 N94-27094

AUDITORY STIMULI
Difference in skin blood flow reduction depending on activating maneuver of skin sympathetic nerve activity
p 2929 N94-27525

AUGMENTATION
Status report of RMS active damping augmentation
p 2684 N94-26285

AURORAL ABSORPTION
Development of imaging riometers
p 2884 N94-27967
Quick-look system of auroral absorption images by imaging riometer p 2884 N94-27968

AURORAL ARCS
Quiet-time intensifications along the poleward auroral boundary near midnight
[ATR-93(7248)-2] p 2877 N94-26201
Proton aurora and substorm intensifications
[ATR-93(7248)-1] p 2887 N94-28218

AURORAL IRRADIATION
Energy parameters of the incident auroral electrons derived by the intensity ratio of auroral emissions
p 2779 N94-27964

AURORAL ZONES
Auroral Tomography Workshop Proceedings
[PB94-123718] p 2881 N94-27040

AURORAS
A numerical solution to the one and two dimensional line radiative transfer equation
[ISBN-0-315-84258-X] p 2994 N94-26640
Kiruna geophysical data. Data summary 93/4-6, April-June 1993
[PB94-123700] p 2881 N94-27039
Auroral Tomography Workshop Proceedings
[PB94-123718] p 2881 N94-27040
Kiruna geophysical data. Data summary 93/1-3, January-March, 1993
[PB94-123791] p 2881 N94-27043
JARE data reports. No. 186: Upper atmosphere physics data. Syowa and Asuka Stations, 1990
[JTN-94-80594] p 2881 N94-27299
The Sixteenth Symposium on Coordinated Observations of the Ionosphere and the Magnetosphere in the Polar Regions: Program and abstracts
[JTN-94-80601] p 2882 N94-27300

Analysis of EUV/FUV dayglow and auroral measurements
[NASA-CR-195237] p 2883 N94-27393

Energy parameters of the incident auroral electrons derived by the intensity ratio of auroral emissions
p 2779 N94-27964

Persistence of auroral electron flux events from DMSP/F9 electron measurements
[RXR-92012] p 2887 N94-28206

AUSTENITE

Microstructural development in low activation ferritic alloys irradiated to 200 dpa at 420 C
[DE94-004269] p 2731 N94-25803

AUSTENITIC STAINLESS STEELS

Corrosion resistance at welded zones of nuclear fuel reprocessing system p 2722 N94-25546

Study on phase transformation due to deformation in ferromagnetic fields at cryogenic condition
p 2724 N94-25556

Computer aided simulation of heat treatment
[VTT-PUBS-131] p 2731 N94-25643

Radiation hardening effects on localized deformation and stress corrosion cracking of stainless steels
[DE94-004308] p 2731 N94-25804

Grain boundary chromium concentration effects on the IGSCC and IASCC of austenitic stainless steels
[DE94-004268] p 2741 N94-27570

Cryogenic fracture behavior of 316LN in magnetic fields up to 14.6 T
[DE94-005215] p 2742 N94-27694

Mechanical properties and microstructure of thermomechanically processed, high manganese steel
[ARL-TR-146] p 2747 N94-28212

AUSTRALIA

Global change: A research strategy for Australia 1992-1996 p 2874 N94-28282

AUTOCLAVES

The use of on-line ion chromatography for high temperature and high pressure reaction studies
[DE94-002525] p 2713 N94-26075

AUTOCORRELATION

Analytical solution of Mori's equation with secant hyperbolic memory
[DE94-601541] p 3006 N94-26368

Conifer tree influence on Digital Terrain Elevation Data (DTED): A case study at Dulles International Airport
[AD-A274213] p 2849 N94-27069

Simulating high-frequency wind for long durations
[DE94-002739] p 2682 N94-27997

AUTOMATA THEORY

Integrating automata with genetic algorithms in order to provide adaptive operators
[ISBN-0-315-84094-3] p 2964 N94-26663

Recursive bundle event structures
[PB94-125275] p 3004 N94-26870

Deferred compilation: The automation of run-time code generation
[AD-A274124] p 2967 N94-27065

Forward and backward simulations. Part 1: Untimed systems
[CWI-CS-R9313-PT-1] p 2972 N94-27580

Forward and backward simulations. Part 2: Timing-based systems
[CWI-CS-R9314-PT-2] p 2972 N94-27581

On modeling and controlling intelligent systems
[DE94-002446] p 2988 N94-27706

AUTOMATIC CONTROL

Autonomous space processor for orbital debris advanced design project in support of solar system exploration p 2697 N94-25667

Design of dynamically reconfigurable real-time software using port-based objects
[NASA-CR-195178] p 2958 N94-25777

Graphical programming at Sandia National Laboratories
[DE94-003803] p 2958 N94-25818

Digital control and data acquisition for high-value GTA welding
[DE94-000885] p 2821 N94-25980

Recent developments in the Robotic All Terrain Lunar Exploration Rover (RATLER) program
[DE93-040342] p 2821 N94-26110

A method for testing of HVAC automation equipment using the emulator and the application of the method
[VTT-TIED-1435] p 2822 N94-26306

Designing and optimizing fuzzy-logic controllers
[ISBN-0-315-83505-2] p 2985 N94-26660

Combatting inherent vulnerabilities of CFAR algorithms and a new robust CFAR design
[AD-A274918] p 2770 N94-26751

Automated fabric inspection system
[AD-A274522] p 2835 N94-26833

Automated information management for designers: Functional requirements for computer based associates that support access and use of technical information in design
[AD-A274603] p 3099 N94-26891

Automation of formation flight control
[AD-A274137] p 2678 N94-27132

Automated in-situ inspection systems for underground storage tanks
[AD-A274644] p 2764 N94-27144

Open communication in manufacturing automation
[PB94-132479] p 2976 N94-28377

AUTOMATIC GAIN CONTROL

A feasibility study on bird classification with neural network
[AD-A273753] p 2659 N94-25780

AUTOMATIC PILOTS

Design of a flight controller for an unmanned research vehicle with control surface failures using quantitative feedback theory
[AD-A274049] p 2677 N94-25833

Discovery learning in autonomous agents using genetic algorithms
[AD-A274083] p 2677 N94-25998

AUTOMATION

Automatic assembly planning and its role in agile manufacturing: A Sandia perspective
[DE94-002291] p 2821 N94-25970

AUTOMOBILE ENGINES

Sequential multi-point injection of a natural gas engine. Topical report, November 1991 - April 1992
[PB94-126794] p 2824 N94-27224

Optimising BMW four-cylinder two-valve engines
[PB94-125101] p 2824 N94-27254

AUTOMOBILE FUELS

CRC customer versus rater octane number requirement program (1990)
[AD-A273997] p 2758 N94-25901

Analytical method for estimation of the total amount of aromatic and poly aromatic compounds in diesel fuel
[PB94-123692] p 2759 N94-25907

Natural gas applications for hybrid vehicles.
[PB94-117108] p 2759 N94-26753

AUTOMOBILES

Feasibility study on introduction of transportation-use petroleum substitution energy
[DE94-725205] p 2759 N94-26905

Evaluation of the buoyancy drag on automobile models in low speed wind tunnels p 2658 N94-28352

AUTONOMIC NERVOUS SYSTEM

Annals of the Research Inst. of Environmental Medicine, Nagoya Univ., volume 44
[REPT-44-VOL-44] p 2911 N94-27442

Postnatal changes in the autonomic modulation of L-type Ca(exp 2+) currents of rabbit ventricular cells
p 2931 N94-27535

Desensitization to acethylcholine in pacemaker cells of the sinoatrial node p 2908 N94-27537

Autonomic nervous system and cardiovascular control: Clinical implications of the 1/f fluctuations of heart rate
p 2932 N94-27540

AUTONOMY

Autonomous space processor for orbital debris advanced design project in support of solar system exploration p 2697 N94-25667

Autonomous support for microorganism research in space p 2903 N94-25672

Developing realistic cooperative behaviors for autonomous agents in air combat simulation
[AD-A274077] p 2937 N94-25774

Discovery learning in autonomous agents using genetic algorithms
[AD-A274083] p 2677 N94-25998

Autonomous rendezvous and docking for Space Station Freedom p 2684 N94-26286

Sensor-based navigation of a mobile robot using automatically constructed fuzzy rules
[DE94-001137] p 2986 N94-26948

Using discovery-based learning to prove the behavior of an autonomous agent
[AD-A274131] p 2987 N94-27121

AUTOREGRESSIVE PROCESSES

Three dimensional object recognition using a complex autoregressive model
[AD-A274388] p 2995 N94-26829

AUTOROTATION

Engine starting and stopping p 2828 N94-28047

AVALANCHES

Relativistic collision rate calculations for electron-air interactions
[DE94-004204] p 3020 N94-26527

AVIATION METEOROLOGY

A data fusion algorithm for multi-sensor microburst hazard assessment p 2641 N94-27287

AVIATION PSYCHOLOGY

Task demand, workload, and performance
[PB94-123627] p 2942 N94-27155

AVIONICS

A VHDL register transfer level model of the linear token passing multiplex data bus protocol for the high speed data bus
[AD-A273734] p 2980 N94-26009

Digital systems validation book plan. Volume 3: Handbook
[AD-A274099] p 2672 N94-26028

Research and test facilities
[NASA-TM-109685] p 2681 N94-26684

Real time avionics constraints: Silicon solutions
p 2949 N94-26717

The Ariane 5 data management system
p 2950 N94-26724

Ada multiple-programming for hard real time applications in space systems p 2951 N94-26730

Description of the Experimental Avionics Systems Integration Laboratory (EASILY)
[NASA-TM-109072] p 2681 N94-27425

AXIAL FLOW

The high Reynolds number flow through an axial-flow pump
[AD-A273844] p 2789 N94-25604

An investigation of the surge behavior of a high-speed ten-stage axial flow compressor
[AD-A274910] p 2674 N94-26345

Optimum for the gasdynamic system in a fast-axial-flow CO2 laser
[AD-A274305] p 2819 N94-26940

Circular cylinder in axial flow
[ISBN-0-315-59114-5] p 2798 N94-27873

AXIAL FLOW PUMPS

The high Reynolds number flow through an axial-flow pump
[AD-A273844] p 2789 N94-25604

AXIAL LOADS

The microstructural response of granular soil under uniaxial strain
[AD-A274808] p 2763 N94-26341

SAG compensated vibration isolation mount
[AD-D016040] p 2841 N94-27110

Series solution for a cylindrical composite shell subject to axisymmetric loadings
[ISBN-0-315-60559-6] p 2844 N94-27810

Calculation methods for steadily loaded axial groove hydrodynamic journal bearings (guide to use of computer program A9305)
[ESDU-93005] p 2830 N94-28074

AXIAL STRAIN

The microstructural response of granular soil under uniaxial strain
[AD-A274808] p 2763 N94-26341

AXISYMMETRIC BODIES

A numerical determination of bifurcation points for low Reynolds number conical flows
[AD-A273984] p 2791 N94-25991

AZO COMPOUNDS

Langmuir-Blodgett film of amylose-esters and chiral azo-dyes (structure and second order nonlinear optical behaviour)
[ETN-94-95390] p 2747 N94-25749

AZULENE

Analytical method for estimation of the total amount of aromatic and poly aromatic compounds in diesel fuel
[PB94-123692] p 2759 N94-25907

B

B-70 AIRCRAFT

Variability of measured sonic boom signatures
p 2651 N94-28197

BABOONS

Performance recovery in the baboon following (+)G sub z-induced loss of consciousness
[AD-A274411] p 2902 N94-26991

BACILLUS

Bakteriella toxiner-morgondagens hot (bacterial toxins-the threat of tomorrow)
[PB94-124229] p 2902 N94-27045

BACKGROUND NOISE

Prewhitening of colored noise fields for detection of threshold sources
[AD-A274346] p 3010 N94-26923

VHF-UHF noise surveys at Gulkana, Elmensdorf AFB, Galena AFB, Kotzebue and Cape Lisburne, Alaska and NRL, Pomonkey, Maryland
[PL-TR-93-2136] p 2777 N94-28211

BACKGROUND RADIATION

Secondary particle in background levels and effects on detectors at future hadron colliders
[DE94-003378] p 3011 N94-25598

A space fiber-optic x ray burst detector
[DE94-002722] p 2696 N94-26808

BACKSCATTERING
Elastic backscattering lidar for a MSTI satellite
[DE94-002701] p 2816 N94-26126
Diffusion of substitutional elements in Ti in its hcp phase
[DE93-633762] p 2733 N94-26160
Study of precipitation and recrystallization in Al alloy 2519 by backscattered electron imaging methods
[AD-A274919] p 2736 N94-26533
S-76 high intensity radiated fields, volume 2
[AD-A274572] p 2771 N94-26836
S-76 high intensity radiated fields, volume 3
[AD-A274416] p 2772 N94-26980

BACKWARD WAVES
HPm-tubes: Literature survey comprising 1992
[PB94-123643] p 2785 N94-27038

BACTERIA
Autonomous support for microorganism research in space p 2903 N94-25672
Bakteriella toxiner-morgondagens hot (bacterial toxins-the threat of tomorrow)
[PB94-124229] p 2902 N94-27045

BALANCING
Balancing of a planar bouncing object
[AD-A273805] p 2821 N94-25878
Efficient rebalancing of tree-type main memory dictionaries
[PB94-133105] p 3100 N94-28396

BALL BEARINGS
Space Shuttle main engine turbopump bearing assessment program
[NASA-TM-108447] p 2833 N94-28265

BALLISTIC MISSILES
Elastic backscattering lidar for a MSTI satellite
[DE94-002701] p 2816 N94-26126
The proliferation of aerospace weapons technology: Ballistic missiles and the case of Brazil
[ISBN-0-315-84082-X] p 2763 N94-26634
Enhanced tracking of airborne targets using forward looking infrared and laser return measurements
[AD-A274181] p 3037 N94-27102
Propellants and explosives in ballistic missiles
[UCRL-LR-113578] p 2760 N94-28222

BALLISTIC TRAJECTORIES
Trajectories of ballistic impact ejecta on a rotating Earth p 2887 N94-28295

BALLOON FLIGHT
PRONAOS flight software: A real-time application for a balloonborne scientific gondola p 2950 N94-26725
A measurement of the energy spectra of cosmic rays from 20 to 1000 GeV per AMU
[NASA-CR-195246] p 3115 N94-27167

BALLOON SOUNDING
In situ Mars ozone detector p 3108 N94-27892

BALLOON-BORNE INSTRUMENTS
In situ Mars ozone detector p 3108 N94-27892

BALLOONING MODES
Toroidal plasma beta-FLR limit in a toroidally linked mirror system
[DE94-003119] p 3041 N94-25792

BAND STRUCTURE OF SOLIDS
Technical report of ISSP. Ser. A, no. 2678: Magnetic properties of carbon nanotubes
[JTN-94-80564] p 3064 N94-27174
Technical report of ISSP. Ser. A, no. 2679: Novel electronic states of partially deuterated (DMe-DCNQI)2Cu
[JTN-94-80565] p 3064 N94-27175
Technical report of ISSP. Ser. A, no. 2674: High-field cyclotron resonance and impurity transition in n- and p-3C-SiC at magnetic fields up to 175 T
[JTN-94-80560] p 3064 N94-27232
Technical report of ISSP. Ser. A, no. 2670: Electronic structure of light transition metal compounds studied by photoemission
[JTN-94-80556] p 3065 N94-27239
Technical report of ISSP. Ser. A, no. 2675: High-field cyclotron resonance and valence-band structure in semiconducting diamond
[JTN-94-80561] p 3065 N94-27245
Technical report of ISSP. Ser. A, no. 2676: Charge mass singularity in two-dimensional Hubbard model
[JTN-94-80562] p 3065 N94-27248

BANDSTOP FILTERS
Evaluation of an Acoustic Charge Transport (ACT) device for adaptive interference suppression in spread spectrum communications systems
[AD-A274073] p 2765 N94-25647

BANDWIDTH
Encoding approaches for data link transmission of weather graphics
[AD-A274497] p 2772 N94-26963

BARIUM
High gas-efficiency hydrogen negative ion sources
[PB93-232163] p 3025 N94-27348
Superconducting fibers made with yttrium and yttrium oxide interlayers and barium cuprate cover layers
[AD-D016073] p 3070 N94-28225

BARIUM FLUORIDES
Ferroelectric fluoride memory FET development
[AD-A274341] p 2785 N94-27057

BARIUM OXIDES
Synthesis, rheology, and forming of Y-Ba-Cu-O ceramics
[DE94-005558] p 2757 N94-27695

BARKHAUSEN EFFECT
Power laws, flicker noise, and the barkhausen effect
[AD-A274702] p 3008 N94-26376

BARORECEPTORS
Muscle sympathetic nerve activity in humans
p 2932 N94-27538
Does training-induced orthostatic hypotension result from reduced carotid baroreflex responsiveness?
p 2935 N94-28366

BAROTROPIC FLOW
Global barotropic response to a tropical forcing
[NASA-CR-195256] p 2896 N94-27408

BARRIER LAYERS
Chemical vapor deposition and characterization of tungsten boron alloy films
[DE94-002648] p 2738 N94-26610

BARYONS
Dibaryon-induced instability of neutron stars
[DE93-634453] p 3103 N94-26046
The delta (1232) resonance transition form factor
[DE94-003442] p 3017 N94-26101
The meaning of EROS/MACHO
[DE94-003003] p 3104 N94-26311
Mesons and diquarks in a NJL-model at finite temperature and chemical potential
[DE93-634375] p 3020 N94-26505
Signatures for hybrids
[DE94-004244] p 3020 N94-26574
Strange Dibaryons
[DE94-003005] p 3022 N94-26769
Spectroscopy and strong decays of baryons
[ISBN-0-315-49073-X] p 3024 N94-27258
Topics in electroweak baryogenesis: The sphaleron and T-violation
[DE94-004886] p 3029 N94-27811

BASE PRESSURE
The effects of three-dimensional imposed 3-d disturbances on bluff-body near wake flows
[AD-A274845] p 2791 N94-26187

BATHS
Effects of bathing at 40 C on cardiovascular system in humans: Comparison with 34 C thermoneutral bathing
p 2918 N94-27473
Effects of 41 C bathing for 20 minutes on cardiovascular and thermoregulatory functions in humans
p 2918 N94-27474

BATHYMETERS
Correlation between the gravity field and the bathymetry in the North Atlantic Ocean
[ETN-94-95036] p 2899 N94-26108
Bathymetric data set extraction program. Users guide
[AD-A274761] p 2899 N94-26567
Compilation of corrections for postprocessing of laser bathymetry data
[PB94-123668] p 2900 N94-27156
Scanview: A grafical program for analysis of laserbathymetry data
[PB94-124443] p 2900 N94-27208

BATTERY CHARGERS
Method of optimizing the charging of a battery of storage cells, and apparatus for performing the method
[AD-D016066] p 2781 N94-26102

BAYES THEOREM
Introduction to bayesian nonparametric theory
[PB94-125002] p 3004 N94-26939
Development of a performance evaluation tool (MMSOFE) for detection of failures with Multiple Model Adaptive Estimation (MMAE)
[AD-A274218] p 2665 N94-27071

BEAM CURRENTS
Bundle Intensity and Beamgate Length recorder (BIBL)
[DIGEL-1993-7] p 3031 N94-25619

BEAM INJECTION
Heavy neutral beam probe for edge plasma analysis in tokamaks
[DE94-003391] p 3041 N94-25846
New conditioning procedure derived from operating experience with the Common Long-Pulse Ion Source
[DE94-002891] p 3045 N94-26865
Kinoform/lens system for injecting a high power laser beam into an optical fiber
[DE94-003226] p 2819 N94-27262
High gas-efficiency hydrogen negative ion sources
[PB93-232163] p 3025 N94-27348
Shine through measurements with hydrogen beam in JT-60
[DE94-701113] p 3047 N94-27699
Fast H-alpha line broadening during the 100 ns REB injection into a plasma
[IPPCZ-322] p 3048 N94-27836

BEAM INTERACTIONS
Space Experiments with Particle Accelerators (SEPAC)
[NASA-CR-193935] p 2761 N94-27664

BEAM SPLITTERS
High definition Raman microscopic imaging
[DE94-003158] p 2716 N94-26781
High repetition rate, mode locked, figure eight laser with extracavity feedback
[AD-D016053] p 2820 N94-27670

BEAM WAVEGUIDES
On a theory of two-beam mechanisms of charged particle acceleration in electrodynamic structures
[DE94-003482] p 3032 N94-26330
Design and evaluation of an electromagnetic beam waveguide for measuring electrical properties of materials
[NASA-TP-3418] p 2769 N94-26611

BEAMFORMING
Analyzing adaptive beamformer performance in a stable multipath environment
[AD-A274029] p 2766 N94-25766
Meteor Burst Communications (MBC) throughput improvement tests
[AD-A273941] p 2767 N94-25990
A current evaluation of the digital beamforming testbed at Rome Laboratory
[AD-A274311] p 3032 N94-26881
Beamforming/null-steering adaptive array
[CA-PATENT-1325260] p 2775 N94-27270
Neutron-neutron scattering: Possibility of in-beam experiment
[DE94-606459] p 3027 N94-27682

BEAMS (RADIATION)
Characterization of acoustic effects on flame structures by beam deflection technique
[DE94-003240] p 2714 N94-26122
A current evaluation of the digital beamforming testbed at Rome Laboratory
[AD-A274311] p 3032 N94-26881

BEAMS (SUPPORTS)
Dynamics of a flexible extendible beam
[ISBN-0-315-84278-4] p 2838 N94-26639
Response of structures to impact loads using elastic and plastic analysis
[ISBN-0-315-84647-X] p 2842 N94-27309
On the Lagrangian and updated Lagrangian nonlinear finite element formulations
[ISBN-0-315-61111-1] p 3001 N94-27948

BEARINGS
An algorithm for determination of bearing health through automated vibration monitoring
[AD-A274591] p 2823 N94-26986

BEAUFORT SEA (NORTH AMERICA)
An evaluation of an airborne remote sensing system used to determine ice thickness and geometry of a first year sea ice ridge located in the Beaufort Sea
[ISBN-0-315-84383-7] p 2849 N94-26667
Leadex environmental phenomena and effects observed by DMSP, NOAA, and ERS-1 satellites
[AD-A274596] p 2868 N94-26888

BED REST
Intermittent gravity: How much, how often, how long?
[NASA-TM-108800] p 2944 N94-26098

BEHAVIOR
The central executive component of working memory
[AD-A274295] p 2938 N94-26683

BELL AIRCRAFT
Experimental investigation of advanced hub and pylon fairing configurations to reduce helicopter drag
[NASA-TM-4540] p 2668 N94-26604

BEND TESTS
Structure and properties of intermetallic composites synthesized in situ using solid state displacement reactions
[DE94-004312] p 2705 N94-25805
Stress analysis of a secondary-bending specimen
[AD-A274842] p 2838 N94-26501

BENDING
Use of photostress and strain gages to analyze behavior of weldments
[NASA-CR-195269] p 2843 N94-27765

BENDING MOMENTS
Design of cold-formed HSS channels for bending and eccentric compression: Bending in the plane of symmetry
[VTT-TIED-1403] p 2762 N94-25622

Refined triangular plate and shell elements
[PB94-126356] p 2839 N94-26875

BENDING THEORY
Creation of prototype aircrew protection equipment based on face anthropometry
[AD-A273865] p 2940 N94-25611

BENZENE
Transition metal activation and functionalization of carbon-hydrogen bonds
[DE94-003650] p 2715 N94-26369

BERYLLIUM
Space-R thermionic space nuclear power system: Design and technology demonstration
[DE94-001890] p 2699 N94-25929
An investigation of the effect of surface impurities on the adsorption kinetics of hydrogen chemisorbed onto iron
[NASA-CR-195213] p 2716 N94-26643
Study of the process (pi)(sup -)A(yields)(pi)(sup -)(eta)'(eta)A at the moment 36 GeV/c
[DE93-634530] p 3024 N94-27250
Experiment of neutron multiplication in beryllium
[DE94-604605] p 2742 N94-27730

BESSEL FUNCTIONS
How to build analogues of the Bessel-Clifford expansions for the sum of the repulsive Coulomb potential and central potential decreasing more rapidly than the centrifugal one?
[DE93-634308] p 3007 N94-26472

BETATRONS
Laboratory plasma studies
[AD-A274655] p 3043 N94-26356

BETHE-SALPETER EQUATION
Weak interactions in a bilocal chiral theory
[DE93-613097] p 3013 N94-25836
String hypothesis and characters of coset CFTs
[DE93-634337] p 3007 N94-26552
Solution of the Heisenberg equation for the four-fermion contact interaction by the method of dynamical mappings
[DE94-606341] p 3075 N94-27858

BIBLIOGRAPHIES
International energy: Research organizations, 1988-1992
[DE93-017267] p 3098 N94-26398
Volcanology and volcanic activity with a primary focus on potential hazard impacts for the Hawaii geothermal project
[DE94-001614] p 2879 N94-26515
Bibliography of technical reports, 1992
[AD-A274849] p 3098 N94-26561
International bulletin on atomic and molecular data for fusion. No. 42-45, Mar. 1991 - Dec. 1992
[DE94-601817] p 3045 N94-26946
International bulletin on atomic and molecular data for fusion. No. 46
[DE94-601818] p 3023 N94-26947
Bibliographic Retrieval System (BARS) Sandia Shock Compression (SSC) database Shock Physics Index (SPHINX) database, volume 3
[DE94-001705] p 3099 N94-27022
Microbiology research at some research institutes in the former Soviet Union: A survey of scientific publications
[PB94-123320] p 2902 N94-27171
List of papers published by the members of Institute for Materials Research, Tohoku University 1992
[JTN-94-80608] p 3118 N94-27355
Center for space microelectronics technology
[NASA-CR-195282] p 2786 N94-27574
NASA SBIR abstracts of 1992, phase 1 projects
[NASA-TM-109694] p 3094 N94-27772
Aeronautical engineering: A continuing bibliography with indexes (supplement 301)
[NASA-SP-7037(301)] p 2643 N94-28203
Aerospace medicine and biology: A cumulative index to a continuing bibliography (supplement 384)
[NASA-SP-7011(384)] p 2934 N94-28219

BICRYSTALS
Influence of point defects on grain boundary diffusion in oxides
[DE94-003164] p 3060 N94-26782

BIG BANG COSMOLOGY
Cosmological phase transitions
[DE94-003001] p 3104 N94-26786

BINARY ALLOYS
Reference electrodes for solid polymer electrolytes
[DE94-004583] p 2780 N94-25806
Dissolution of secondary phases during extrusion
[PB94-124583] p 2732 N94-25908
Stress corrosion cracking and dealloying of copper-gold alloy in iodine vapor
[DE93-633790] p 2734 N94-26264
Eutectic transformation L in equilibrium to Zr6Fe23 + Fe(tau) in the Fe-Zr system
[DE93-633766] p 2735 N94-26295
A tri-junction diffusion couple analysis of the Nb-Cr-Ti system at 950 C
[DE94-002637] p 2737 N94-26607
Differential scanning calorimetric study of solid state amorphization and crystallization in Zr/Co and Zr/Ni multilayers p 2745 N94-28161

BINARY DATA
The morphological processing of binary images
[AD-A274310] p 2996 N94-26972
Kinoform/lens system for injecting a high power laser beam into an optical fiber
[DE94-003226] p 2819 N94-27262
Binary snapshots
[CWI-CS-R9319] p 2955 N94-27547

BINARY FLUIDS
Solubility, viscosity, and density of refrigerant/lubricant mixtures
[DE94-004237] p 2721 N94-28069

BINARY INTEGRATION
New binary integration strategies and corresponding R90 calculations
[AD-A274786] p 2769 N94-26359

BINARY MIXTURES
Automated system for gas detectors providing with binary mixtures
[DE93-634192] p 2715 N94-26406

BINARY STARS
Ultraviolet observations of astronomical sources
[NASA-CR-195232] p 3102 N94-26234
TEV emission from close binaries
[DE93-634330] p 3104 N94-26268

BINARY SYSTEMS (MATERIALS)
Bimaterial interfaces and their role in the mechanical performance of the in-situ composites
[AD-A274688] p 2707 N94-26447

BINAURAL HEARING
Binaural room simulation
[AD-A273823] p 3009 N94-25737

BINDERS (MATERIALS)
Polyurethane self-priming topcoats
[AD-D016041] p 2755 N94-27111
Thermoplastic elastomers having alternate crystalline structure for us as high energy binders
[AD-D016035] p 2755 N94-27203

BINOCULAR VISION
Parallel algorithm for dominant points correspondences in robot binocular stereo vision p 2686 N94-27364

BIOACOUSTICS
Comparison of methods of predicting community response to impulsive and nonimpulsive noise
p 2651 N94-28196

BIOASTRONAUTICS
Plasma volume shifts and exercise thermoregulation with water immersion and six-degree head-down tilt
[NASA-TM-108781] p 2901 N94-26093
Spacelab life sciences 2 post mission report
[NASA-CR-195544] p 2942 N94-27410
Aerospace medicine and biology: A cumulative index to a continuing bibliography (supplement 384)
[NASA-SP-7011(384)] p 2934 N94-28219
Does training-induced orthostatic hypotension result from reduced carotid baroreflex responsiveness?
p 2935 N94-28366
Cardiac output and cardiac contractility by impedance cardiography during exercise of runners
p 2935 N94-28367
Weightlessness and the human skeleton: A new perspective p 2935 N94-28368

BIOCHEMISTRY
The 27th Annual Meeting of the Israel Society for Microscopy and the 12th Annual Meeting of the Israel Society for Histochemistry and Cytochemistry
[DE93-632416] p 2716 N94-26519

BIOCONVERSION
Report of National Institute for Resources and Environment. No. 5: Study on direct liquefaction of woody biomass
[JTN-94-80551] p 2859 N94-27204
Collaboration of chemical oxidation and biological treatment for removal of refractory organic substances
p 2870 N94-28149
Treatment of refractory organic substances with combined use of chemical oxidation and biological treatment. Part 2: Biodegradability of ozonation products of chlorophenol p 2870 N94-28151

BIODEGRADABILITY
High impact strength poly(lactide) tough biodegradable materials
[ETN-94-95389] p 2747 N94-25748

BIODEGRADATION
High impact strength poly(lactide) tough biodegradable materials
[ETN-94-95389] p 2747 N94-25748

BIODYNAMICS
A biologically-inspired autonomous robot
[AD-A273909] p 2821 N94-25782
Comparison of methods of predicting community response to impulsive and nonimpulsive noise
p 2651 N94-28196
Workshop on Countering Space Adaptation with Exercise: Current Issues
[NASA-CP-3252] p 2934 N94-28361
Muscular activity and its relationship to biomechanics and human performance p 2934 N94-28362
The use of biomechanics in the study of movement in microgravity p 2936 N94-28373

BIOELECTRIC POTENTIAL
Effects of high-intensity electric field stimulation on the electromechanical performance of cardiac muscle: Influence of fiber orientation p 2904 N94-27467
On the mechanism of reentrant arrhythmias following DC defibrillation: Influence of fiber orientation to the effects of low-energy electric field stimulation on the effective refractory period of cardiac muscle
p 2904 N94-27468

BIOELECTRICITY
Positive chronotropic effect of mechanical stretch on the sinoatrial node: Roles of neurotransmitters and stretch activated channels p 2904 N94-27469
Effects of perfusion of amiodarone on electrophysiological properties in single rabbit ventricular myocytes p 2906 N94-27503
Fast and slow onsets of Na channel blocking actions due to lidocaine and disopyramide using concentration-clamp method p 2907 N94-27504
Electrophysiological effects of MS-551, a new Class 3 antiarrhythmic agent, on isolated rabbit ventricular muscles p 2907 N94-27505
Comparative investigation of new Class 3 antiarrhythmic drugs, E-4031 and MS-551, on electrophysiological properties in isolated rabbit ventricular myocytes
p 2907 N94-27506
Effects of Class 1 antiarrhythmic drugs on the intraventricular conduction: Influence of fiber orientation
p 2907 N94-27507
Effects of Class 3 antiarrhythmic agents, E-4031 and MS-551 on ventricular repolarization in isolated rabbit hearts p 2907 N94-27508
Electrical coupling between the sino-atrial node and atrial muscle: Cell to cell interaction through an external circuit and its simulation by computer modeling
p 2907 N94-27509
A study on tissue excitation of cardiac muscle under electrical field stimulation p 2907 N94-27510
Block of cardiac sodium channels by Ro 22-9194 (R), a new antiarrhythmic agent: Effects on the maximum upstroke velocity (Vmax) of single guinea pig ventricular myocytes p 2907 N94-27511
Electrophysiological effects of an antiarrhythmic drug, moricizine on isolated guinea pig ventricular muscles
p 2907 N94-27512
Correlation between electrical activity and the size of single sinoatrial node cells p 2907 N94-27513
The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experimental study in rabbit single sinoatrial node cells
p 2908 N94-27514
The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experiments using small sinoatrial node tissue preparations isolated from rabbit hearts p 2908 N94-27515
The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Postganglionic vagal stimulation in isolated rabbit hearts
p 2908 N94-27516
Desensitization to acethylcholine in pacemaker cells of the sinoatrial node p 2908 N94-27537

BIOINSTRUMENTATION
Monitoring activity with a wrist-worn actigraph: Effects of amplifier passband and threshold variations
[AD-A274705] p 2909 N94-26377
A comparison of sleep scored from electroencephalography to sleep scored by wrist actigraphy
[AD-A273739] p 2910 N94-26748
The measurements of muscle blood flow by laser Doppler flowmetry with needle type probe
p 2908 N94-27530

BIOLOGICAL EFFECTS
Initial ultraviolet-B intensity data at Lawrence Livermore National Laboratory
[DE94-004279] p 2869 N94-27267
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 386)
[NASA-SP-7011(386)] p 2933 N94-28208
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 387)
[NASA-SP-7011(387)] p 2933 N94-28213
Aerospace medicine and biology: A cumulative index to a continuing bibliography (supplement 384)
[NASA-SP-7011(384)] p 2934 N94-28219

Irreversibility of advanced osteoporosis: Limited role for pharmacologic intervention p 2935 N94-28369

BIOLOGICAL MODELS (MATHEMATICS)

Temporal stochasticity leads to nondeterministic chaos in a model for blood cell production [DE94-003943] p 2933 N94-27744

BIOMAGNETISM

Detection geometry and reconstruction error in magnetic source imaging [DE94-004012] p 2809 N94-25662

BIOMASS

Implications of policies and prevent climate change for future food security [DE93-018872] p 2866 N94-25948

Coupling of pelagic and benthic communities over a seamount in the Eastern North Pacific [AD-A274750] p 2899 N94-26149

Feasibility study on introduction of the bio-fuel power generation in tropical regions [DE94-725203] p 2858 N94-26838

Woody biomass density in the Tendelti area of the central Sudan p 2850 N94-27185

Report of National Institute for Resources and Environment. No. 5: Study on direct liquefaction of woody biomass [JTN-94-80551] p 2859 N94-27204

Role of remote sensing in energy, water, and carbon cycle studies over the Amazon [INPE-5486-PRE/1786] p 2852 N94-27957

Note on the structure of moss colonies composed of two species on King George Island, the South Shetland Islands p 2885 N94-27971

Changes in phytoplankton population in the Chao Phraya estuary, Thailand, during the eutrophication mechanisms studies p 2875 N94-28287

BIOMASS ENERGY PRODUCTION

Coupling of pelagic and benthic communities over a seamount in the Eastern North Pacific [AD-A274750] p 2899 N94-26149

Feasibility study on introduction of the bio-fuel power generation in tropical regions [DE94-725203] p 2858 N94-26838

Present situation of the development of petroleum substitution energy (France) [DE94-725201] p 2760 N94-26914

Report of National Institute for Resources and Environment. No. 5: Study on direct liquefaction of woody biomass [JTN-94-80551] p 2859 N94-27204

BIOMEDICAL DATA

Biomedical polyurethane networks [ETN-94-95391] p 2750 N94-26211

BIOPHYSICS

Neutrons in biology [DE94-701085] p 2903 N94-27862

BIOSPHERE

Spiral Survey Expedition: A proposal to organize for the Survey, exploration and eventual colonization of the Milky Way Galaxy p 2686 N94-27366

Proposed law of nature linking impacts, plume volcanism, and Milankovitch cycles to terrestrial vertebrate mass extinctions via greenhouse-embryo death coupling p 2876 N94-28307

BIPOLAR TRANSISTORS

Development of a 4-bit parallel analog-to-digital converter and a four-quadrant double-balanced mixer using heterojunction bipolar transistor technology [AD-A274074] p 2947 N94-25648

A physics-based heterojunction bipolar transistor model for integrated circuit simulation [AD-A274081] p 2781 N94-25995

Silicon device performance measurements to support temperature range enhancement [NASA-CR-195265] p 2844 N94-27824

BIPOLARITY

Bipolar lead-acid batteries for electrical actuation applications p 2864 N94-28134

Bipolar Ag-Zn battery p 2864 N94-28135

BIRD-AIRCRAFT COLLISIONS

A feasibility study on bird classification with neural network [AD-A273753] p 2659 N94-25780

BIRDS

A feasibility study on bird classification with neural network [AD-A273753] p 2659 N94-25780

Antarctic Record, Vol. 36, No. 2 [REPT-107] p 2883 N94-27963

Counting Adelie penguins at colonies: Seasonal and annual changes p 2885 N94-27970

BIREFRINGENCE

Three-wave nonlinear interactions in KTiOPO4 (KTP) and KTP isomorphs [AD-A274079] p 3052 N94-25993

BISMUTH ALLOYS

Research into the microstructure and mechanical behavior of eutectic Bi-Sn and In-Sn [DE94-004558] p 2741 N94-27619

BISMUTH COMPOUNDS

The potential for large critical currents in the high T(sub c) oxides p 2854 N94-26058

Energy Dispersive X ray Diffraction (EDXD) apparatus for liquids at high temperature p 2721 N94-28159

BISMUTH OXIDES

Technical report of ISSP. Ser. A, no. 2672: Magneto-optical effects of excitons in BiI3 crystals under pulsed high magnetic fields. 3: Excitons confined around a stacking disorder formed by a bending stress [JTN-94-80558] p 3065 N94-27240

BIT ERROR RATE

On the performance of trellis coded 8PSK with Reed Solomon codes [ISBN-0-315-84289-X] p 2770 N94-26626

Annex report FEL-92-A163: Description of the Link and BER Test Analysis System (LIBERTAS) for the frequency band V (14.5 - 15.3 GHz) [FEL-92-A442] p 2770 N94-26650

Coded communications with nonideal interleaving [ITN-94-85235] p 2774 N94-27242

BLACKOUT (PHYSIOLOGY)

Performance recovery in the baboon following (+)G sub z-induced loss of consciousness [AD-A274411] p 2902 N94-26991

BLADE TIPS

Behaviour of separation bubbles in sharp-edged gaps of finite dimensions [ISBN-0-315-84113-3] p 2793 N94-26637

BLADE-VORTEX INTERACTION

Correlation of airloads on a two-bladed helicopter rotor [NASA-TM-103982] p 2644 N94-26143

BLANKETS (FUSION REACTORS)

A robust helium-cooled shield/blanket design for ITER [DE94-003402] p 3043 N94-26323

BLAST LOADS

Shock wave interaction with L-shaped structures [AD-A273774] p 2790 N94-25858

Safety standards for aircraft shelter [FFI-92/4003] p 2680 N94-26305

BLOCK COPOLYMERS

Thermoplastic elastomers having alternate crystalline structure for us as high energy binders [AD-D016035] p 2755 N94-27203

BLOOD

Endocrinological evaluations of muscle and bone atrophy in tail-suspended rats p 2903 N94-27444

BLOOD CELLS

Temporal stochasticity leads to nondeterministic chaos in a model for blood cell production [DE94-003943] p 2933 N94-27744

BLOOD CIRCULATION

Analysis on one minute wave in body fluid volume and muscle pumping referred to body parts generating the one minute wave during human active standing p 2929 N94-27528

Evaluation of near-infrared spectrophotometric method for individual tolerance to +Gz acceleration p 2933 N94-27944

BLOOD FLOW

EcarHeart2 version 1.0: Programmers documentation [PB94-124633] p 2909 N94-25909

Pulse waveform and transcranial Doppler analysis during lower body negative pressure [AD-A274516] p 2911 N94-27088

Effect of prostaglandin E1 on the relationship between skin sympathetic nerve activity and reduction in skin blood flow p 2929 N94-27524

Difference in skin blood flow reduction depending on activating maneuver of skin sympathetic nerve activity p 2929 N94-27525

The measurements of muscle blood flow by laser Doppler flowmetry with needle type probe p 2908 N94-27530

Enhancement of skin sympathetic nerve activity in amyotrophic lateral sclerosis p 2930 N94-27532

Evaluation of near-infrared spectrophotometric method for individual tolerance to +Gz acceleration p 2933 N94-27944

Proposed law of nature linking impacts, plume volcanism, and Milankovitch cycles to terrestrial vertebrate mass extinctions via greenhouse-embryo death coupling p 2876 N94-28307

BLOOD GROUPS

Protective action of platelet-activating factor antagonist, TCV-309, against ischemia reperfusion injury in isolated rabbit hearts p 2904 N94-27465

BLOOD PRESSURE

Passive and active behavior of the cardiovascular system under increased gravitational loads in a chronically instrumental conscious baboon model [AD-A274344] p 2910 N94-26973

Aerobic fitness and orthostatic tolerance: Evidence against an association p 2934 N94-28365

BLOOD VOLUME

Plasma volume shifts and exercise thermoregulation with water immersion and six-degree head-down tilt [NASA-TM-108781] p 2901 N94-26093

Passive and active behavior of the cardiovascular system under increased gravitational loads in a chronically instrumental conscious baboon model [AD-A274344] p 2910 N94-26973

BLOWDOWN WIND TUNNELS

Experimental investigation of the flow quality in the GLT20 subsonic-transonic boundary layer wind tunnel [PB94-126539] p 2681 N94-26815

Aerodynamic heating in hypersonic flows p 2658 N94-27919

BLOWING

Controlled oscillation of forebody vortices by nozzle jet blowing [ISBN-0-315-84134-6] p 2678 N94-27648

Theoretical and experimental investigation of a delta wing with turbulent leading-edge jets p 2659 N94-28029

BLUFF BODIES

Flow past a circular cylinder with a permeable wake splitter plate [AD-A273765] p 2790 N94-25872

The effects of three-dimensional imposed 3-d disturbances on bluff-body near wake flows [AD-A274845] p 2791 N94-26187

Nominally 2-dimensional flow about a normal flat plate [AD-A274472] p 2794 N94-27026

Research on bluff body vortex wakes [AD-A273780] p 2796 N94-27319

BLUNT LEADING EDGES

The effect of axial velocity ratio, turbulence intensity, incidence, and leading edge geometry on the midspan performance of a turbine cascade p 2652 N94-28321

BLUNT TRAILING EDGES

A study of blunt trailing edge airfoils using the Navier Stokes code: ARC2D p 2656 N94-28340

BODIES OF REVOLUTION

New variational techniques for acoustic radiation and scattering from elastic shell structures [AD-A274599] p 3010 N94-26889

BODY CENTERED CUBIC LATTICES

Volume dependence of vanadium magnetism [DE94-601838] p 3050 N94-25843

Formation and crystallization of hydrogen-induced amorphous Ti3InH(4.5) alloy p 2745 N94-28163

BODY FLUIDS

Multivariate calibration applied to near-infrared spectroscopy for the quantitative analysis of dilute aqueous solutions [DE94-003231] p 2716 N94-26794

Changes in fluid and electrolyte metabolism during water immersion at high or thermoneutral temperature p 2912 N94-27445

Analysis on one minute wave in body fluid volume and muscle pumping referred to body parts generating the one minute wave during human active standing p 2929 N94-27528

BODY SWAY TEST

Frequency analysis of body sway induced by optokinetic stimulation p 2914 N94-27455

BODY TEMPERATURE

Rewarming methodologies in the field [AD-A274744] p 2909 N94-26173

Effects of 40 C hot water immersion for an hour on thermoregulatory functions in humans: Comparison with 34 C thermoneutral immersion p 2915 N94-27459

BODY VOLUME (BIOLOGY)

Selection of site injecting adjuvant in chronic inflammation model p 2906 N94-27496

BODY-WING CONFIGURATIONS

Euler and Navier-Stokes wing/fuselage computations of the De Havilland Dash 8 aircraft p 2654 N94-28329

BOEING 727 AIRCRAFT

After thirty years: Farewell of Europa jet p 2663 N94-28249

BOEING 757 AIRCRAFT

Special investigation report: Safety issues related to wake vortex encounters during visual approach to landing [PB94-917002] p 2660 N94-27881

BOILERS

Control of a hydrogen/oxygen steam generator [DLR-FB-93-02] p 2826 N94-27589

Steam plant for combined cycles: Heat recovery steam generators, design principles, and construction details p 2831 N94-28083

BOLTS

Mechanically fastened composite laminates subjected to combined bearing-bypass and shear loading
p 2712 N94-27914

BOLTZMANN TRANSPORT EQUATION

Refractive and dielectric properties of helium, argon and nitrogen gases
[PB94-123783] p 3008 N94-26851

BONDED JOINTS

Investigation of the bond strength of a discrete skin-stiffener interface
[NLR-TP-92183-U] p 2670 N94-27796

BONDING

Attachment techniques for high temperature strain
[AD-A274766] p 2811 N94-26568

Sealant research for solid oxide fuel cells
[DE94-000015] p 2857 N94-26584

Molecular surface electrostatic potentials in the analysis of non-hydrogen-bonding noncovalent interactions
[AD-A274612] p 3022 N94-26894

Intelligent material systems and structures. Part 6: Measurements of adhesion between optical fibres and composite materials
[PB94-123577] p 2756 N94-27215

BONE DEMINERALIZATION

Endocrinological evaluations of muscle and bone atrophy in tail-suspended rats p 2903 N94-27444

Workshop on Countering Space Adaptation with Exercise: Current Issues
[NASA-CP-3252] p 2934 N94-28361

Weightlessness and the human skeleton: A new perspective p 2935 N94-28368

Irreversibility of advanced osteoporosis: Limited role for pharmacologic intervention p 2935 N94-28369

BONE MINERAL CONTENT

Endocrinological evaluations of muscle and bone atrophy in tail-suspended rats p 2903 N94-27444

Irreversibility of advanced osteoporosis: Limited role for pharmacologic intervention p 2935 N94-28369

BONES

Skeletal development and ossification of the swine fetuses p 2905 N94-27491

Weightlessness and the human skeleton: A new perspective p 2935 N94-28368

Irreversibility of advanced osteoporosis: Limited role for pharmacologic intervention p 2935 N94-28369

Exercise and osteoporosis: Methodological and practical considerations p 2935 N94-28370

BOOLEAN ALGEBRA

Communication complexity of t-intersection problems in generalized Boolean algebras
[PB94-126646] p 2996 N94-26917

BOREHOLES

Wave propagation in the shallow regions of the earth's crust and the borehole vicinity
[ITN-94-85237] p 2882 N94-27330

BORN APPROXIMATION

Holes in a two-dimensional quantum antiferromagnet
[DE93-634753] p 3057 N94-26388

BORON

An atom probe investigation of the influence of trace impurities on the mechanical behavior of NiAl
[DE94-002797] p 2734 N94-26272

BORON ALLOYS

Chemical vapor deposition and characterization of tungsten boron alloy films
[DE94-002648] p 2738 N94-26610

Production of an amorphous Fe(75)Si(10)B(15) sheet by a metallic mold casting method and its properties
p 2746 N94-28170

BORON CARBIDES

Deformation twinning: Influence of strain rate
[DE94-002693] p 2738 N94-26621

Examination of hardness, fracture toughness and microstructure in Al2O3-B4C binary ceramics
[PB94-124237] p 2755 N94-27158

BORON NITRIDES

R and D for creation, measurement, application of ultra-high vacuum p 2723 N94-25549

High performance fibers
[AD-A274693] p 2707 N94-26450

The deposition of boron nitride and carbon films on silica glass fibers
[DE94-004684] p 2751 N94-26564

BOROSILICATE GLASS

Porous vycor glass tube joined to borosilicate glass
p 2718 N94-27392

BOSON FIELDS

Differential regularization of a non-relativistic anyon model
[DE94-601558] p 3019 N94-26416

BOSONS

CP violating form factors for three gauge boson vertex in the two Higgs doublet and left-right symmetric models
[DE94-601704] p 3014 N94-25841

CP violation in Higgs decays
[DE94-601607] p 3014 N94-25888

Quantizable configurations of the relativistic string
[DE93-634346] p 3072 N94-26036

JLC-1
[DE93-520380] p 3031 N94-26113

Differential regularization of a non-relativistic anyon model
[DE94-601558] p 3019 N94-26416

Progress in SSC Higgs physics: Report of the Higgs working group
[DE94-003224] p 3022 N94-26793

Flavor changing neutral currents in SU(3) x U(1) models
[DE94-602576] p 3022 N94-26899

Finding the missing pieces of the standard model
[ISBN-0-315-57174-8] p 3024 N94-27259

An analysis of monojet data in p(bar-p) collisions at square root of s equal to 1.8 TEV
[DE94-001822] p 3026 N94-27565

A measurement of the W mass using electrons at CDF
[DE94-004656] p 3028 N94-27748

BOUNDARIES

Hydrographic and Acoustic Doppler Current Profiler (ADCP) data from the ONR eastern boundary current accelerated research initiative, 9-16 June 1992
[AD-A274115] p 2898 N94-26076

BOUNDARY CONDITIONS

Extension of On-Surface Radiation Condition (OSRC) theory to full-vector electromagnetic wave scattering by three-dimensional conducting, dielectric, and coated targets
[AD-A274023] p 2766 N94-25757

Sensitivity of climate models: Comparison of simulated and observed patterns for past climates
[DE93-019934] p 2865 N94-25789

On the oscillation of a class of hyperbolic equations of neutral type
[DE93-616815] p 2990 N94-25829

Oscillatory behaviour of solutions of coupled hyperbolic differential equations of neutral type
[DE93-616816] p 2990 N94-25830

The Dirac equation in Kerr spacetime, spheroidal coordinates and the M.I.T. bag model of hadrons
[DE94-601566] p 3006 N94-25886

Prediction of undsteady flows in turbomachinery using the linearized Euler equations on deforming grids
[NASA-CR-195285] p 2675 N94-27654

Uncertainties in the characterization of the thermal environment of a solid rocket propellant fire
[DE94-002023] p 2760 N94-27719

Modeling of the coupled magnetospheric and neutral wind dynamos
[NASA-CR-195273] p 2883 N94-27852

A numerical investigation of a subsonic jet in a crossflow p 2803 N94-28023

Calculation of single and multiple jets in cross-flow with and without impingement using Reynolds-stress-transport closure p 2803 N94-28024

Predictions of momentum and scalar fields in a jet in cross-flow using first and second order turbulence closures p 2803 N94-28025

Navier-Stokes analysis of a swirling jet in crossflow
p 2806 N94-28038

On the zeros of solutions of forced parabolic differential equations of neutral type
[DE93-613019] p 3001 N94-28228

BOUNDARY LAYER EQUATIONS

A study on structure of benthic boundary layer in coastal waters
[REPT-4] p 2898 N94-25635

BOUNDARY LAYER FLOW

A study on structure of benthic boundary layer in coastal waters
[REPT-4] p 2898 N94-25635

Performance of renormalization group algebraic turbulence model on boundary layer transition simulation
[NASA-CR-194466] p 2644 N94-26131

An investigation into the aerodynamic effects of wing patches
[ISBN-0-315-84121-4] p 2646 N94-26672

Experimental investigation of the flow quality in the GLT20 subsonic-transonic boundary layer wind tunnel
[PB94-126539] p 2681 N94-26815

Turbulent boundary layer inner-outer interactions
[AD-A274357] p 2794 N94-27059

Numerical simulation of receptivity and transition in a boundary layer on a flat plate with a suction hole
[NASA-CR-195708] p 2798 N94-27782

Circular cylinder in axial flow
[ISBN-0-315-59114-5] p 2798 N94-27873

An experimental study of siphonal jets in a turbulent boundary layer crossflow p 2802 N94-28015

Analysis of cooling jets near the leading edge of turbine blades p 2676 N94-28037

Unified approach for direct and inverse boundary layer prediction using cubic spline collocation
p 2653 N94-28326

Euler and Navier-Stokes wing/fuselage computations of the De Havilland Dash 8 aircraft p 2654 N94-28329

Viscous airfoil computations using adaptive structured grids p 2655 N94-28337

Attached and separated trailing edge flow measurements with a triple-split hot-film probe
p 2656 N94-28339

A study of blunt trailing edge airfoils using the Navier Stokes code: ARC2D p 2656 N94-28340

Thin-layer Navier-Stokes computations for multi-element airfoils p 2656 N94-28341

Ice accretion on aircraft wings p 2657 N94-28345

Preliminary assessment of aerodynamic effects of wing repair patches p 2657 N94-28346

Experimental investigations into the wall interference and sidewall boundary layer effects in the National Research Council/Inst. for Aerospace Research High Reynolds Number 2-D Test Facility
p 2658 N94-28350

BOUNDARY LAYER SEPARATION

Flow past a circular cylinder with a permeable wake splitter plate
[AD-A273765] p 2790 N94-25872

A numerical investigation of a subsonic jet in a crossflow p 2803 N94-28023

Theoretical and experimental investigation of a delta wing with turbulent leading-edge jets
p 2659 N94-28029

Inclined air-jets used as vortex generators to suppress shock-induced separation p 2659 N94-28040

Experimental study on the shock wave interaction with a hypersonic boundary layer near a convex corner
p 2654 N94-28328

BOUNDARY LAYER STABILITY

Localized and distributed boundary-layer receptivity to convected unsteady wake in free stream
[NASA-CR-4578] p 2808 N94-28180

Transition for three-dimensional, compressible boundary layers p 2653 N94-28327

BOUNDARY LAYER TRANSITION

Performance of renormalization group algebraic turbulence model on boundary layer transition simulation
[NASA-CR-194466] p 2644 N94-26131

Numerical simulation of receptivity and transition in a boundary layer on a flat plate with a suction hole
[NASA-CR-195708] p 2798 N94-27782

Prediction of leading-edge transition and relaminarization phenomena on a subsonic multi-element high-lift system p 2659 N94-27929

Localized and distributed boundary-layer receptivity to convected unsteady wake in free stream
[NASA-CR-4578] p 2808 N94-28180

Infrared imaging for transition detection in a transonic blowdown wind tunnel p 2653 N94-28325

Transition for three-dimensional, compressible boundary layers p 2653 N94-28327

BOUNDARY LAYERS

The numerical simulation of marine boundary layer clouds
[AD-A273669] p 2894 N94-26195

Numerical simulation of receptivity and transition in a boundary layer on a flat plate with a suction hole
[NASA-CR-195708] p 2798 N94-27782

Unsteady wake structures in transverse jets
p 2800 N94-28006

Localized and distributed boundary-layer receptivity to convected unsteady wake in free stream
[NASA-CR-4578] p 2808 N94-28180

BOUNDARY VALUE PROBLEMS

Back-reaction beyond the mean field approximation
[DE94-003936] p 3012 N94-25612

Abstraction in, specification and proof of software for a 1D heat-transfer problem
[REPT-93-45] p 2790 N94-25763

Approximate solution of the fourth order initial value problem using deficient spline polynomials
[DE93-613023] p 2991 N94-25880

Longitudinal diffusion of a proton bunch under external noise
[DE93-634022] p 3032 N94-26165

Preconditioning in parallel Runge-Kutta methods for stiff initial value problems
[CWI-NM-R9310] p 2991 N94-26217

Numerical solution of singularity-perturbed two-point boundary-value problems
[DE94-601542] p 2993 N94-26410

On a spline-approximation method for solving ordinary differential equations
[DE93-634290] p 2994 N94-26471

Computation of numerical solution of parabolic PDEs by monotone iterative methods
[ISBN-0-315-84553-8] p 2999 N94-27404

Time-step enlargement and optimal smoothing in Runge-Kutta time-integration algorithms by implicit and explicit smoothing
[NLR-TP-92221-U] p 2798 N94-27799

BOUSSINESQ APPROXIMATION
Reduced Braginskii equations
[DE94-003510] p 3047 N94-27723

BRACKETS
Helmet head tracking mounting device
[AD-D016048] p 2942 N94-27114

BRAIDED COMPOSITES
Fatigue resistance of unnotched and post impact(+/-30 deg/0 deg) 3-D braided composites
[NASA-CR-191590] p 2711 N94-27433

BRAIN
The AFIT multielectrode array for neural recording and simulation: Design, testing, and encapsulation
[AD-A274086] p 2909 N94-25943
Distribution of GABA immunoreactive neurons in the brain of rolling mouse Nagoya and gamma-irradiated mouse p 2904 N94-27471

BRAIN DAMAGE
The central executive component of working memory
[AD-A274295] p 2938 N94-26683

BRANCHING (MATHEMATICS)
A numerical determination of bifurcation points for low Reynolds number conical flows
[AD-A273984] p 2791 N94-25991
Continuation and multi-grid for bifurcation problems
[AD-A274965] p 2992 N94-26302
Bisexual branching diffusions
[AD-A274698] p 3008 N94-26374
Bifurcation sequences at 1:4 resonance: An inventory
[PB94-125408] p 2997 N94-27028

BRANCHING (PHYSICS)
Measurement of tau lepton branching fractions
[DE94-003423] p 3018 N94-26325

BRAYTON CYCLE
Small low mass advanced PBR's for bi-modal operation
[DE94-003201] p 2699 N94-25798
Limitations of power conversion systems under transient loads and impact on the pulsed tokamak power reactor
[DE94-003404] p 3043 N94-26324

BRAZIL
Digital filter design for sensor simulation: Application to the Brazilian remote sensing satellite
[INPE-5523-RPQ/665] p 2849 N94-26827
A synoptic study on periods of deficiency over Rio Grande do Sul/Brazil
[INPE-5456-TDI/498] p 2896 N94-27422
Role of remote sensing in energy, water, and carbon cycle studies over the Amazon
[INPE-5486-PRE/1786] p 2852 N94-27957

BRAZING
High temperature grain growth and oxidation of Fe-29Ni-17Co (Kovar (tm)) alloy leads
[DE94-004691] p 3069 N94-27753

BREADBOARD MODELS
Planetary Instrument Definition and Development Program (PIDDP). Instrument for future planetary flight missions: A visible-infrared imaging spectrometer for planetary missions
[NASA-CR-195254] p 3106 N94-27409

BREATHING APPARATUS
Rewarming methodologies in the field
[AD-A274744] p 2909 N94-26173

BREEDING (REPRODUCTION)
Development of inbred strains from Japanese wild rats (Rattus norvegicus) p 2906 N94-27492

BREMSSTRAHLUNG
A study of LPM suppression of bremsstrahlung at 25 GeV
[DE94-003457] p 3018 N94-26133
Proceedings of the Second EGS4 User's Meeting in Japan
[DE93-520383] p 3032 N94-26543
Acceleration of electrons and ions by strong lower-hybrid turbulence in solar flares
[NASA-TM-109723] p 3111 N94-27953

BRIDGES (STRUCTURES)
Vibrations in engineering structures: A review of model and full-scale test of a cable-stayed bridge and a traffic sign gantry
[NLR-TP-92321-U] p 2843 N94-27553

BRIGHTNESS
Endogeneous and exogenous control of visual selection: A review of the literature
[AD-A273761] p 2908 N94-25871

BRIGHTNESS TEMPERATURE
Remote sensing of global snowpack energy and mass balance: In-situ measurements on the snow of interior and Arctic Alaska
[NASA-CR-195704] p 2851 N94-27787

BRILLOUIN ZONES
String hypothesis and characters of coset CFTs
[DE93-634337] p 3007 N94-26552

BRITTLE MATERIALS
SP/MSP tests for the evaluation of FGM
[NAL-SP-17] p 2710 N94-27279
SP/MSP tests for the evaluation of FGM
p 2710 N94-27280
Research on the development of fracture characteristics evaluation system for ceramics and metal composite materials p 2710 N94-27281

BRITTLENESS
Numerical simulations of interfacial debonding in ductile-phase reinforced intermetallic matrix composites
[DE94-003639] p 2706 N94-25938
Current status of research and development on nickel and iron aluminides
[DE94-004247] p 2741 N94-27616

BROADBAND
A study of two dimensional tapered periodic edge treatments to reduce wideband edge diffraction
[AD-A274054] p 2766 N94-25824
Catalog of absolutely calibrated, range normalized, wideband, electric field waveforms from triggered lightning flashes in Florida
[AD-A273793] p 2892 N94-25873
Broad band tunable dye laser development
[DE93-632978] p 2816 N94-26157
Electrical analysis of wideband and distributed windows using time-dependent field codes
[DE94-002987] p 2768 N94-26310
Diagnostics and microelectronics
[DE94-003016] p 2784 N94-26777
Multiple model adaptive control of a large flexible space structure with purposeful dither for enhanced identifiability
[AD-A274132] p 2987 N94-27122
Multivariate spectral analysis to extract materials from multispectral data
[AD-A274142] p 2709 N94-27135

BROKEN SYMMETRY
Data on parity violation in the compound nucleus and its interpretation
[DE94-003965] p 3013 N94-25820
Coherent state approach for the (Phi)(sup 6)-lattice model and phase transitions
[DE93-613053] p 3050 N94-25825
Cosmoparticle physics of family symmetry breaking
[DE94-601623] p 3013 N94-25837
Out of equilibrium phase transitions and a toy model for disoriented chiral condensates
[DE94-601642] p 3013 N94-25839
Aspects of nonrenormalizable terms in a superstring standard-like models
[DE93-614530] p 3071 N94-25911
Z(sub N)(sup n-1) broken model
[DE93-634357] p 3072 N94-26039
Lepton masses in an SU(3)(sub L) x U(1)(sub N) gauge model
[DE93-634366] p 3016 N94-26040
Differential regularization of a non-relativistic anyon model
[DE94-601558] p 3019 N94-26416
C-periodicity and the physical mass in the 3-state Potts model
[DE94-601551] p 3019 N94-26423
Statistical mechanical properties of Z(N)(sup n-1) broken model
[DE93-634344] p 2993 N94-26457
Cosmological phase transitions
[DE94-003001] p 3104 N94-26786
Progress in SSC Higgs physics: Report of the Higgs working group
[DE94-003224] p 3022 N94-26793
Measurements of the B(sup 0)(bar B)(sup 0)CP asymmetry
[DE94-003379] p 3063 N94-27047
Second-order phase transition in (g(phi)4)2 theory
[DE94-603677] p 3067 N94-27638
Excited Landau levels, orbital angular momentum and axial anomaly
[DE94-606407] p 3068 N94-27679
Topics in electroweak baryogenesis: The sphaleron and T-violation
[DE94-004886] p 3029 N94-27811
Research on elementary particle physics, part 2
[DE94-004956] p 3029 N94-27815

BROMINE
Vibrational energy transfer within the B 3Pi (O(+) sub u) state of 79BR2 upon collision with N2, O2, NO, and SF6
[AD-A273905] p 3011 N94-25589
High resolution fourier transform absorption spectrum of 79Br2 B3 Pi(Ou+) X1 sigma g+
[AD-A273864] p 2956 N94-25610

BROWNIAN MOVEMENTS
Bisexual branching diffusions
[AD-A274698] p 3008 N94-26374
Single-server queues with spatially distributed arrivals
[PB94-126638] p 2986 N94-26916
A superprocess with a disappearing self-interaction
[AD-A274647] p 3009 N94-27108

BRYOPHYTES
Antarctic Record, Vol. 36, No. 2
[REPT-107] p 2883 N94-27963
Note on the structure of moss colonies composed of two species on King George Island, the South Shetland Islands p 2885 N94-27971

BSCCO SUPERCONDUCTORS
The effect of processing on the microstructure of Ag-sheathed Bi-2223 wires
[DE94-004627] p 3055 N94-26243
Liquid and solid solubility of Ag in Bi2Sr2CaCu2O8
[DE94-002829] p 2735 N94-26273
Processing and properties of Ag-clad Bi-2223 tapes
[DE94-004603] p 2783 N94-26589
Powder synthesis, fabrication, and transport properties of long-length Ag clad Bi-2223 conductors
[DE94-002376] p 2740 N94-26957

BUBBLES
Hydrodynamics, acoustics and scaling of traveling bubble cavitation
[AD-A273846] p 2789 N94-25605
Interfacial area and interfacial transfer in two-phase flow
[DE93-041226] p 2792 N94-26468
Behaviour of separation bubbles in sharp-edged gaps of finite dimensions
[ISBN-0-315-84113-3] p 2793 N94-26637
Numerical studies on the dynamics of bubble, turbulent, free shear flows: Effect of the inter-phase coupling on the global flow evolution
[AD-A274521] p 2794 N94-26832
Acoustic bubble sizing, using active and passive techniques to compare ambient and entrained populations
[ISVR-TR-229] p 2807 N94-28172

BUCKLING
Formulae for the buckling of simply-supported corrugated panels of orthotropic material under shear load
[PB94-126547] p 2840 N94-26911
Design and test of postbuckled stiffened curved plates: A literature survey
[PB94-126521] p 2840 N94-26961

BUFFER STORAGE
Spacecraft optical disk recorder memory buffer control
p 2815 N94-27907

BUFFETING
Lift-curve slope for structural response calculations
[ESDU-93013] p 2648 N94-28063
Examples of flight path optimisation using a multivariate gradient-search method
[ESDU-93021] p 2670 N94-28092

BUILDINGS
Shock wave interaction with L-shaped structures
[AD-A273774] p 2790 N94-25858

BULK MODULUS
Se EXAFS study of the elevated wurtzite to rock salt structural phase transition in CdSe nanocrystals
[DE94-003247] p 3054 N94-26125
Mechanical properties of polyaniline prepared by polymerization in an organized monolayer
[AD-A274350] p 2753 N94-26925

BUMPERS
Physics of debris clouds from hypervelocity impacts
[NASA-CR-193932] p 2696 N94-26791

BUNCHING
Regrouping of the beam in the IHEP PS for the UNK p-p programs
[DE93-634021] p 3032 N94-26164
Longitudinal diffusion of a proton bunch under external noise
[DE93-634022] p 3032 N94-26165

BURGER EQUATION
Recent advances in the spectral element method
p 2657 N94-28348

BURNERS
Characterization of acoustic effects on flame structures by beam deflection technique
[DE94-003240] p 2714 N94-26122

BURNING RATE
An apparatus for measurement of ignition and burning characteristics of metallic particles
[AD-A274815] p 2716 N94-26487
Uncertainties in the characterization of the thermal environment of a solid rocket propellant fire
[DE94-002023] p 2760 N94-27719

BURST TESTS
Upset welding process for 21-6-9 spherical vessels
[DE93-018194] p 2832 N94-28229

BUS CONDUCTORS
A VHDL register transfer level model of the linear token passing multiplex data bus protocol for the high speed data bus
[AD-A273734] p 2980 N94-26009
BYPASS RATIO
The design of a counter rotating ultra-high-bypass fan simulator for windtunnel investigation
[DLR-FB-93-20] p 2675 N94-27739
BYPASSES
Nickel-hydrogen cell reversal characteristics
p 2862 N94-28114

C

C (PROGRAMMING LANGUAGE)
The ergonomics of software porting: Automatically configuring software to the runtime environment or everything you wanted to know about your C compiler but didn't know who to ask
[CWI-CS-R9266] p 2961 N94-26221
Vcalc: A 3-space vector calculator
[AD-A274520] p 2965 N94-26831
C++ (PROGRAMMING LANGUAGE)
Run-time recognition of task parallelism within the P++ parallel array class library
[DE94-002707] p 2980 N94-26120
Object-oriented software construction at ALS
[DE94-003418] p 2967 N94-27049
CABLES
Unscreened low tension cables scrape abrasion testing
[PB94-123767] p 2823 N94-26849
CADMIUM
Screen test for cadmium and nickel plates
p 2860 N94-28106
CADMIUM SELENIDES
Se EXAFS study of the elevated wurtzite to rock salt structural phase transition in CdSe nanocrystals
[DE94-003247] p 3054 N94-26125
CADMIUM TELLURIDES
The state of the art of thin-film photovoltaics
[DE94-000224] p 2855 N94-26115
Indium donor complexes with cation vacancies in CdTe and ZnSe
[DE94-002731] p 3063 N94-26958
CAFFEINE
Thermoregulatory effects of caffeine ingestion during rest and exercise in men
[NASA-TM-108783] p 2901 N94-26210
CALCITE
The biostratigraphy and paleogeography of Maastrichtian inoceramids p 2889 N94-28303
CALCIUM METABOLISM
Weightlessness and the human skeleton: A new perspective p 2935 N94-28368
CALCIUM OXIDES
Proceedings of the Fourth Euroseminar on Microscopy Applied to Building Materials
[PB94-119807] p 2839 N94-26754
CALCULATORS
Vcalc: A 3-space vector calculator
[AD-A274520] p 2965 N94-26831
CALCULI
Quantum subgroups and quantum co-set spaces and differential calculi on them
[DE94-602520] p 3073 N94-26876
CALCULUS
Semantics, orderings and recursion in the weakest precondition calculus
[CWI-CS-R9267] p 2995 N94-26776
Fractional calculus, gegenbauer transformations and integral equations
[PB93-237683] p 2999 N94-27349
CALIBRATING
Evaluation of a concentration probe for application in a supersonic flow field
[AD-A273915] p 2643 N94-25592
Catalog of absolutely calibrated, range normalized, wideband, electric field waveforms from triggered lightning flashes in Florida
[AD-A273793] p 2892 N94-25873
Digital Altimeter Setting Indicator (DASI) Operational Test and Evaluation (OT/E) operational test procedures
[AD-A274100] p 2672 N94-26030
Numerical treatment of experimental data in calibration procedures
[DE93-634289] p 3097 N94-26382
Separation and reconstruction of electron neutrino interaction in the IHEP-JINR neutrino detector and BARS detector
[DE93-634182] p 3019 N94-26393
Study on the compensated lead hadron calorimeter characteristics by means of hadron and electron beams
[DE93-634176] p 2810 N94-26439
Multivariate calibration applied to near-infrared spectroscopy for the quantitative analysis of dilute aqueous solutions
[DE94-003231] p 2716 N94-26794
Characterization and calibration of the Agema 880+ imaging radiometer
[AD-A274417] p 3036 N94-26981
Calibrating/testing meters in hot water test bench VM7
[PB94-124294] p 2812 N94-27160
Acousto-optical post-processor time-integrating correlator calibration updates
[DSIS-94-00053] p 2813 N94-27317
Calibration of SAR systems
[DLR-FB-93-18] p 2777 N94-27738
Performance of a 14-MeV neutron generator as an in situ calibration source for TFTR
[DE94-004993] p 3048 N94-27825
Ionospheric calibration for single frequency altimeter measurements
[NASA-CR-195709] p 2883 N94-27883
Locating tie-points on a grid p 2978 N94-27906
Nimbus-7 Earth radiation budget calibration history. Part 2: The Earth flux channels
[NASA-RP-1335-PT-2] p 2814 N94-27981
Landscape dynamics of northeastern forests
[NASA-CR-195272] p 2852 N94-28070
MODIS airborne simulator visible and near-infrared calibration, 1992 ASTEX field experiment. Calibration version: ASTEX King 1.0
[NASA-TM-104599] p 2897 N94-28179
MODIS airborne simulator visible and near-infrared calibration, 1991 FIRE-Cirrus field experiment. Calibration version: FIRE King 1.1
[NASA-TM-104600] p 2897 N94-28182
CALMODULIN
Neutron and x ray scattering studies of the interactions between Ca(2+)-binding proteins and their regulatory targets: Comparisons of troponin C and calmodulin
[DE94-002706] p 2901 N94-26623
CALORIC STIMULI
The mechanism of caloric nystagmus under microgravity. 1: Changes of endolymphatic pressure in the semicircular canal of pigeon by caloric stimulation
p 2914 N94-27457
Cardiovascular function during thermoneutral head-out water immersion in the elderly p 2915 N94-27458
Effects of 40 C hot water immersion for an hour on thermoregulatory functions in humans: Comparison with 34 C thermoneutral immersion p 2915 N94-27459
Effects of bathing at 40 C on cardiovascular system in humans: Comparison with 34 C thermoneutral bathing
p 2918 N94-27473
Effects of 41 C bathing for 20 minutes on cardiovascular and thermoregulatory functions in humans
p 2918 N94-27474
Monthly variation of physiological and psychological responses under unsteady thermal conditions
p 2918 N94-27475
Man's ability to adapt himself for the seasonal climatic changes: From viewpoint of anticipation and seasonable behavior p 2919 N94-27476
Changes in pain sensation induced by repetitive application of noxious heat pulses to the human skin
p 2924 N94-27501
Hyperalgesia to cold in patients with Subacute Myelo-Optico-Neuropathy (SMON) p 2928 N94-27521
CALORIMETERS
An electromagnetic calorimeter with wavelength shifting fiber readout
[DE93-616664] p 2809 N94-25735
Theoretical and experimental studies of elementary physics
[DE94-002310] p 3008 N94-25988
Harvard University High Energy Physics
[DE94-002406] p 3032 N94-26119
Calorimeter with WLS fibers and parallel to beam scintillators
[DE93-634188] p 2810 N94-26378
Unsegmented electromagnetic calorimeter prototype. Energy and coordinate resolution
[DE93-634185] p 2810 N94-26396
Hadron gas ionization calorimeters
[DE93-634186] p 2810 N94-26397
Thermal conductivity of PAX 2A explosive by DSC
[AD-A274721] p 2759 N94-26437
Study on the compensated lead hadron calorimeter characteristics by means of hadron and electron beams
[DE93-634176] p 2810 N94-26439
SP industry calorimeter for rate of heat release measurements up to 10MW
[PB94-124211] p 2811 N94-27044
Cosmic x ray physics
[NASA-CR-195225] p 3115 N94-27236
Bulletin of the Institute for Chemical Reaction Science, Tohoku University, volume 2
[JTN-94-80602] p 2717 N94-27385
High-temperature and high-pressure flow calorimeter
p 2718 N94-27390
Gamma Large Area Silicon Telescope (GLAST): Applying silicon strip detector technology to the detection of gamma rays in space
[DE94-003451] p 3116 N94-27740
First observation of neutral current proton electron scattering at the square root of s = 300 GeV
[DE94-701107] p 3030 N94-27877
CAMERAS
An apparatus for measurement of ignition and burning characteristics of metallic particles
[AD-A274815] p 2716 N94-26487
Application of Space Shuttle Project Hercules imagery in the investigation of ship cloud tracks
[AD-A274923] p 2692 N94-26529
Methods for experimentally determining commercial jet aircraft landing parameters from video image data
[AD-A274207] p 2669 N94-27105
CCD-Camera images of BEST-TWO and processing results
[AD-A274140] p 2811 N94-27134
CMT-Si
[PB94-123619] p 2812 N94-27216
High resolution studies of sunspots and flux tubes
[NASA-CR-195216] p 3111 N94-27321
An algorithm for stereo correspondence problems on the analogy of human vision
[NAL-TR-1185] p 2940 N94-27584
Flexible range finding applied to 3D surface synthesis: A pseudo-trinocular approach
[ISBN-0-315-84616-X] p 2813 N94-27651
CAMOUFLAGE
Development and evaluation of a near infrared reflecting and low visibility paint scheme for RAAF P-3C Orion aircraft
[AD-A274881] p 2669 N94-26864
Thermoplastic or thermosetting composites in aircrafts
[PB94-123809] p 2710 N94-27253
CAMS
Contact stress in disc cams with roller followers
[ESDU-93001] p 2829 N94-28055
Blending profiles of disc cams with radial translating roller followers. Part 2: To incorporate an intermediate precision point or a constant velocity component
[ESDU-93002-PT-2] p 2830 N94-28056
CANADAIR AIRCRAFT
First Canadair jet flies for Lufthansa city line
p 2662 N94-28243
CANARD CONFIGURATIONS
Design of the advanced regional aircraft, the DART-75
p 2671 N94-25708
Eagle RTS: A design of a regional transport
p 2671 N94-25709
CANCELLATION
Space science: Causes and impacts of cutbacks to NASA's outer solar system exploration missions. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives
[GAO/NSIAD-94-24] p 3106 N94-27418
CANCELLATION CIRCUITS
Equalization and cancellation of nonlinear intersymbol interference in a dispersive satellite communication channel
[ISBN-0-315-85147-3] p 2775 N94-27274
CANCER
The intracellular second messenger system in c-fos gene induction by ACTH p 2904 N94-27477
CANONICAL FORMS
Lyapunov exponents for some quasi-periodic cocycles
[PB94-124377] p 2997 N94-26994
CAPACITANCE
Double layer capacitance of carbon foam electrodes
[DE94-002651] p 2780 N94-25975
CAPILLARY FLOW
Continuation and multi-grid for bifurcation problems
[AD-A274965] p 2992 N94-26302
Thermocapillary flow with evaporation and condensation and its effect on liquid retention in low-G fluid acquisition devices
[NASA-TP-3463] p 2797 N94-27639
CARBIDES
A review of carbide fuel corrosion for nuclear thermal propulsion applications
[DE94-003938] p 2699 N94-25613
Microstructural development in low activation ferritic alloys irradiated to 200 dpa at 420 C
[DE94-004269] p 2731 N94-25803
Examination of hardness, fracture toughness and microstructure in Al2O3-B4C binary ceramics
[PB94-124237] p 2755 N94-27158

CARBON
Simulation of the carbon cycle in the oceans [DE94-000780] p 2898 N94-25791
Advances in preparing and characterizing low density pan-carbon microcellular foam [DE94-002278] p 2748 N94-25932
Hadron gas ionization calorimeters [DE93-634186] p 2810 N94-26397
The deposition of boron nitride and carbon films on silica glass fibers [DE94-004684] p 2751 N94-26564
Mechanistic studies of opto-electronic materials and syntheses using multiple laser and surface diagnostics [AD-A274528] p 3036 N94-26834
Technical report of ISSP. Ser. A, no. 2678: Magnetic properties of carbon nanotubes [JTN-94-80564] p 3064 N94-27174
Technical report of ISSP. Ser. A, no. 2675: High-field cyclotron resonance and valence-band structure in semiconducting diamond [JTN-94-80561] p 3065 N94-27245

CARBON COMPOUNDS
Voltammetric studies of poly(carbon disulfide) [DE94-001385] p 2717 N94-26951

CARBON CYCLE
Simulation of the carbon cycle in the oceans [DE94-000780] p 2898 N94-25791
Role of remote sensing in energy, water, and carbon cycle studies over the Amazon [INPE-5486-PRE/1786] p 2852 N94-27957

CARBON DIOXIDE
Assessing the climatic effect of carbon dioxide and other trace gases using an interactive two-dimensional climate-chemistry model [DE94-001741] p 2866 N94-25927
Implications of policies and prevent climate change for future food security [DE93-018872] p 2866 N94-25948
Isotopically labeled CO2 from stratosphere: A tracer of carbon biogeochemistry [DE94-002777] p 2877 N94-26015
Grassland/atmosphere response to changing climate: Coupling regional and local scales [DE94-003111] p 2866 N94-26026
Grain boundary degradation of YBCO superconductors sintered in CO2-containing atmospheres [DE94-003206] p 3053 N94-26029
A conceptual framework for the evaluation of cost-effectiveness of projects to reduce GHG emissions and sequester carbon [DE93-040448] p 2867 N94-26419
Space Station evolution study oxygen loop closure [NASA-CR-193936] p 2941 N94-26788
Effect of carbon dioxide enrichment on radish production using Nutrient Film Technique (NFT) [NASA-TM-107198] p 2902 N94-27411
Cooling the Martian atmosphere: The spectral overlap of the C02 15 micrometers band and dust p 3107 N94-27886
Martian atmospheric radiation budget p 3107 N94-27887
Why is the north polar cap on Mars different than the south polar cap? p 3107 N94-27889

CARBON DIOXIDE CONCENTRATION
Extraterrestrial surface propulsion systems p 2833 N94-25691
Sensitivity of climate models: Comparison of simulated and observed patterns for past climates [DE93-019934] p 2865 N94-25789
Effect of carbon dioxide enrichment on radish production using Nutrient Film Technique (NFT) [NASA-TM-107198] p 2902 N94-27411

CARBON DIOXIDE LASERS
Development of an industrial CO2 laser for mask marking [DE93-632901] p 2816 N94-26184
An apparatus for measurement of ignition and burning characteristics of metallic particles [AD-A274815] p 2716 N94-26487
Beam-quality measurements for materials processing lasers and the proposed ISO standard [DE94-002738] p 2819 N94-26811
Optimum for the gasdynamic system in a fast-axial-flow CO2 laser [AD-A274305] p 2819 N94-26940

CARBON DIOXIDE REMOVAL
Automation of closed environments in space for human comfort and safety p 2943 N94-25684

CARBON MONOXIDE
A conceptual framework for the evaluation of cost-effectiveness of projects to reduce GHG emissions and sequester carbon [DE93-040448] p 2867 N94-26419
Advances in passive-remote and extractive Fourier transform infrared spectroscopic systems [DE94-001424] p 2868 N94-26952

CARBON STEELS
Isothermal corrosion testing of steels in molten nitrate salts [DE94-004695] p 2742 N94-27755

CARBON-CARBON COMPOSITES
Ablation of solid-propellant rocket-motor nozzle materials [ESA-TT-1289] p 2699 N94-25638

CARBONATES
Issues for conversion coating of aluminum alloys with hydrotalcite [DE94-003804] p 2732 N94-25819
Research and development of alternative components at Argonne National Laboratory for Molten Carbonate Fuel Cells [DE94-000014] p 2857 N94-26583

CARBONIZATION
Double layer capacitance of carbon foam electrodes [DE94-002651] p 2780 N94-25975

CARBOXYLIC ACIDS
Thermal conductivity of liquid carboxylic acids [ESDU-93017] p 2721 N94-28138

CARBURIZING
Effect of nitrocarburizing on shape of titanium alloy parts [DE94-004040] p 2732 N94-25822

CARDIAC OUTPUT
Passive and active behavior of the cardiovascular system under increased gravitational loads in a chronically instrumental conscious baboon model [AD-A274344] p 2910 N94-26973
Cardiac output and cardiac contractility by impedance cardiography during exercise of runners p 2935 N94-28367

CARDIOLOGY
The role of beta-adrenoceptor stimulation in the progression of chronic heart failure p 2932 N94-27541

CARDIOVASCULAR SYSTEM
EcarHeart2 version 1.0: Programmers documentation [PB94-124633] p 2909 N94-25909
Aeromedical issues related to positive pressure breathing for +Gz protection [AD-A274717] p 2910 N94-26435
Passive and active behavior of the cardiovascular system under increased gravitational loads in a chronically instrumental conscious baboon model [AD-A274344] p 2910 N94-26973
Cardiovascular function during thermoneutral head-out water immersion in the elderly p 2915 N94-27458
Effects of bathing at 40 C on cardiovascular system in humans: Comparison with 34 C thermoneutral bathing p 2918 N94-27473
Effects of 41 C bathing for 20 minutes on cardiovascular and thermoregulatory functions in humans p 2918 N94-27474
Workshop on Countering Space Adaptation with Exercise: Current Issues [NASA-CP-3252] p 2934 N94-28361
Exercise detraining: Applicability to microgravity p 2934 N94-28364

CARNOT CYCLE
Introduction to combined cycles p 2789 N94-28078

CARRIER LIFETIME
Low threshold all-optical crossbar switch on GaAs-GaAlAs channel waveguide arrays [AD-A274971] p 2783 N94-26536

CARRIER MOBILITY
The potential for large critical currents in the high T(sub c) oxides p 2854 N94-26058

CASCADE FLOW
Effects of crenulations on three dimensional losses in a linear compressor cascade [AD-A273778] p 2790 N94-25862
Effect of surface finish on turbine airfoil cascade losses p 2652 N94-28320
The effect of axial velocity ratio, turbulence intensity, incidence, and leading edge geometry on the midspan performance of a turbine cascade p 2652 N94-28321
Solution-adaptive simulation of transonic cascade flows p 2657 N94-28344

CASCADE WIND TUNNELS
An investigation of the effects of the high maximum-thickness-to-chord ratio on the performance of nozzle guide vanes in a transonic planar cascade [ISBN-0-315-84107-9] p 2793 N94-26671

CASSINI MISSION
Preliminary reentry safety assessment of the General Purpose Heat Source module for the Cassini mission: Aerospace Nuclear Safety Program [DE94-001646] p 2699 N94-25926
Space science: Causes and impacts of cutbacks to NASA's outer solar system exploration missions. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives [GAO/NSIAD-94-24] p 3106 N94-27418

CASTING
Study on production of materials with one direction solidification texture p 2727 N94-25572
Effect of nitrocarburizing on shape of titanium alloy parts [DE94-004040] p 2732 N94-25822
Technique to predict the curing behaviour of unsaturated polyester materials [PB94-124856] p 2748 N94-25892
Modelling the inhibition cure behaviour of unsaturated polyester moulding materials [PB94-124864] p 2748 N94-25893
Stress relaxation in dough moulding compounds [PB94-124872] p 2748 N94-25894
Solidification modeling of a spiral casting to determine material fluidity [DE94-002212] p 2739 N94-26935
A widely adaptable habitat construction system utilizing space resources p 2688 N94-27374
Production of an amorphous Fe(75)Si(10)B(15) sheet by a metallic mold casting method and its properties p 2746 N94-28170
High Quality Aluminium Castings Conference [PB94-133592] p 2747 N94-28359

CASTINGS
Squeeze casting: A literature review [PB94-124575] p 2741 N94-27326
High Quality Aluminium Castings Conference [PB94-133592] p 2747 N94-28359

CATALYSIS
Design of gasifiers to optimize fuel cell systems [DE94-000010] p 2856 N94-26581

CATALYSTS
Polymer-bound rhodium hydroformylation catalysts [ETN-94-95388] p 2712 N94-25747
Controlled synthesis of polyenes by catalytic methods [DE94-004168] p 2749 N94-25973
Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparison and verification of methods [DE94-003664] p 2749 N94-26007
Exploratory Technology Research Program for Electrochemical Energy Storage [DE94-003479] p 2781 N94-26047
A mimic model of Pt-Rh catalyst prepared by electrochemical deposition of Rh on Pt (100) surface [REPT-A-2664] p 2715 N94-26476
Sol-gel derived silica/siloxane composite materials: The effect of loading level and catalyst activity on silica domain formation [DE94-002734] p 2712 N94-27710
CO2 methanation catalysts prepared from amorphous Ni-valve metal alloys containing platinum group elements p 2745 N94-28166

CATALYTIC ACTIVITY
Polymer-bound rhodium hydroformylation catalysts [ETN-94-95388] p 2712 N94-25747
A mimic model of Pt-Rh catalyst prepared by electrochemical deposition of Rh on Pt (100) surface [REPT-A-2664] p 2715 N94-26476

CATHODES
Oxygen reduction at a YSZ interface with cathode materials La(1-x)(Ca or Sr)(x)MnO3(1-x)CaMnO3 [DE94-002954] p 3054 N94-26147
MSOFC development status [DE94-003192] p 2858 N94-26792
Channel model for AC electric arc [PB94-124591] p 2786 N94-27327

CATHODIC COATINGS
Oxygen reduction at a YSZ interface with cathode materials La(1-x)(Ca or Sr)(x)MnO3(1-x)CaMnO3 [DE94-002954] p 3054 N94-26147
Processing of LaCrO3 for solid oxide fuel cell applications [DE94-002981] p 2857 N94-26747

CATIONS
Morphological analysis of ionomers [DE94-003660] p 2749 N94-26005
The use of on-line ion chromatography for high temperature and high pressure reaction studies [DE94-002525] p 2713 N94-26075
Alternative materials for solid oxide fuel cells: Processing and interactions of materials [DE94-000016] p 2855 N94-26114
Structure of ionic fluids in equilibrium with a microporous ionic matrix [DE94-600563] p 2715 N94-26391

Indium donor complexes with cation vacancies in CdTe and ZnSe
[DE94-002731] p 3063 N94-26958

CAUCHY PROBLEM

Riemann solvers for solving the incompressible Navier-Stokes equations using the artificial compressibility method
[CRANFIELD-AERO-9208] p 2790 N94-25778

Estimators for the Cauchy distribution
[DE94-004990] p 3005 N94-27816

CAUSES

The end-Permian mass extinction: A complex, multicausal extinction p 2888 N94-28299

Mass extinctions: Persistent problems and new directions p 2889 N94-28302

CAVITATION FLOW

Hydrodynamics, acoustics and scaling of traveling bubble cavitation
[AD-A273846] p 2789 N94-25605

An investigation of cavitation in a mechanically alloyed 15 volume percent SiCp/IN9021 aluminum composite
[DE94-003371] p 2748 N94-25959

CAVITIES

Study on high temperature damage control and life improvement p 2729 N94-25580

Binding of copper and nickel to cavities in silicon formed by helium ion implantation
[DE94-003769] p 3050 N94-25814

Hydrogen uptake into silicon from an ECR plasma
[DE94-003771] p 3050 N94-25815

The structural, chemical, and electrical properties of He-implantation-induced nanocavities in silicon
[DE94-002681] p 3052 N94-25971

Microwave coupling into a slotted cavity
[PB94-123742] p 2772 N94-27041

Technical report of ISSP. Ser. A, no. 2688: Suppression of higher-order modes in an RF cavity by resistive material
[JTN-94-80574] p 2787 N94-27606

CAVITY RESONATORS

Regrouping of the beam in the IHEP PS for the UNK p-p programs
[DE93-634021] p 3032 N94-26164

Practical design of resonant cavity for a RF free electron laser
[AD-A274306] p 2819 N94-26941

Optical pattern recognition system utilizing resonator array
[AD-D016071] p 3040 N94-28224

CELL CATHODES

Oxygen reduction at a YSZ interface with cathode materials La(1-x)(Ca or Sr)(x)MnO3(1-x)CaMnO3
[DE94-002954] p 3054 N94-26147

CELL MEMBRANES (BIOLOGY)

Effect of sera from patients treated with long-term hemodialysis on mRNA's for collagenase, stromelysin, and tissue inhibitor of metalloprotease in cultured human synovial cells p 2920 N94-27481

CELLS

Effects of capsaicin on freshly dissociated rat dorsal root ganglion cells p 2906 N94-27499

CELLS (BIOLOGY)

Detecting actin fibers in cell images using minimal spanning trees
[AD-A273914] p 2984 N94-25591

Effects of ML-9, a myosin light-chain kinase inhibitor, on preimplantation development of the mouse
p 2905 N94-27486

Compaction-like blastomere aggregation caused by 1-oleoyl-2-acetylglycerol in mouse embryos: An electron microscopic observation p 2905 N94-27487

Inductive differentiation of nerve cells in mouse embryonic ectoderm at early primitive streak stage by retinoic acid p 2905 N94-27488

Influence of mechanical stimulation on inflammatory edema p 2906 N94-27497

The effect of naloxone on sleeping time in adjuvant arthritic rats p 2906 N94-27498

Effects of capsaicin on freshly dissociated rat dorsal root ganglion cells p 2906 N94-27499

Size distribution of retrogradely labeled dorsal root ganglion cells: Test of normality p 2906 N94-27500

Interaction between endogenous opioid and Cholecystokinin (CCK) in modulating respiratory responses induced by thin-fiber muscular afferents
p 2906 N94-27502

Effects of perfusion of amiodarone on electrophysiological properties in single rabbit ventricular myocytes p 2906 N94-27503

Fast and slow onsets of Na channel blocking actions due to lidocaine and disopyramide using concentration-clamp method p 2907 N94-27504

Electrophysiological effects of MS-551, a new Class 3 antiarrhythmic agent, on isolated rabbit ventricular muscles p 2907 N94-27505

Comparative investigation of new Class 3 antiarrhythmic drugs, E-4031 and MS-551, on electrophysiological properties in isolated rabbit ventricular myocytes
p 2907 N94-27506

Electrical coupling between the sino-atrial node and atrial muscle: Cell to cell interaction through an external circuit and its simulation by computer modeling
p 2907 N94-27509

Correlation between electrical activity and the size of single sinoatrial node cells p 2907 N94-27513

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experimental study in rabbit single sinoatrial node cells
p 2908 N94-27514

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experiments using small sinoatrial node tissue preparations isolated from rabbit hearts p 2908 N94-27515

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Postganglionic vagal stimulation in isolated rabbit hearts
p 2908 N94-27516

Mechanism for regulation of myocardial contractility by autonomic drugs: Pathophysiological relevance in congestive heart failure p 2931 N94-27536

Desensitization to acethylcholine in pacemaker cells of the sinoatrial node p 2908 N94-27537

CEMENTS

Attachment techniques for high temperature strain
[AD-A274766] p 2811 N94-26568

Sealant research for solid oxide fuel cells
[DE94-000015] p 2857 N94-26584

Proceedings of the Fourth Euroseminar on Microscopy Applied to Building Materials
[PB94-119807] p 2839 N94-26754

CENSUS

Counting Adelie penguins at colonies: Seasonal and annual changes p 2885 N94-27970

CENTAUR LAUNCH VEHICLE

Lunar Transportation Facilities and Operations Study, option 1
[NASA-CR-195700] p 3109 N94-27982

CENTER OF GRAVITY

Test Operations Procedure (TOP) 2-2-800 wheeled vehicle center of gravity
[AD-A273937] p 2821 N94-25794

CENTER OF MASS

Secondary particle in background levels and effects on detectors at future hadron colliders
[DE94-003378] p 3011 N94-25598

Enhanced tracking of airborne targets using forward looking infrared and laser return measurements
[AD-A274181] p 3037 N94-27102

CENTRAL AMERICA

Properties of the Central American cold surge
[NASA-CR-194849] p 2893 N94-26138

CENTRAL NERVOUS SYSTEM STIMULANTS

Effects of methamphetamine on vigilance and tracking during extended wakefulness
[AD-A274896] p 2909 N94-26179

CENTRAL PROCESSING UNITS

On-board computer for control subsystem of satellite
p 2949 N94-26716

CENTRIFUGAL CASTING

Effects of post-fabrication processing on the tensile properties of centrifugally cast SiC particulate reinforced aluminum composites
[AD-A274865] p 2707 N94-26190

CENTRIFUGAL PUMPS

Experimental contribution to the study of secondary flows in centrifugal turbopump stator components
[ECL-92-35] p 2789 N94-25654

Bulk-Flow Analysis, part A
[NASA-CR-193911-PT-A] p 2796 N94-27377

CENTRIFUGES

An automatic 14-day paste diet feeder for animals
[NASA-TM-108804] p 2901 N94-26086

CENTRIFUGING

An automatic 14-day paste diet feeder for animals
[NASA-TM-108804] p 2901 N94-26086

CENTRIFUGING STRESS

Passive and active behavior of the cardiovascular system under increased gravitational loads in a chronically instrumental conscious baboon model
[AD-A274344] p 2910 N94-26973

CERAMIC BONDING

Ceramic technology project
[DE94-003782] p 2750 N94-26332

CERAMIC COATINGS

Study on substance diffusion in thin films with controlled structures p 2727 N94-25570

Micropyrolysis of polymer thin films for ceramics
[ECL-92-62] p 2750 N94-26088

CERAMIC FIBERS

Fibrous emissive burners selective and broad band
[PB94-128329] p 2859 N94-27225

Development of hypersonic engine seals: Flow effects of preload and engine pressures
[NASA-TM-106333] p 2826 N94-27599

CERAMIC MATRIX COMPOSITES

NASA Lewis Research Center lean-, rich-burn materials test burner rig
[NASA-CR-194437] p 2680 N94-26141

Ceramic technology project
[DE94-003782] p 2750 N94-26332

Investigation of forced and isothermal chemical vapor infiltrated SiC/SiC ceramic matrix composites
[DE94-004544] p 2708 N94-26557

Attachment techniques for high temperature strain
[AD-A274766] p 2811 N94-26568

Structure and properties of composites synthesized in situ using solid state displacement reactions
[DE94-004589] p 2737 N94-26585

Engineering limitations of ceramic composites for high performance and high temperature applications
[DE94-001676] p 2754 N94-27021

Examination of hardness, fracture toughness and microstructure in Al2O3-B4C binary ceramics
[PB94-124237] p 2755 N94-27158

SP/MSP tests for the evaluation of FGM
[NAL-SP-17] p 2710 N94-27279

SP/MSP tests for the evaluation of FGM
p 2710 N94-27280

Research on the development of fracture characteristics evaluation system for ceramics and metal composite materials p 2710 N94-27281

Testing procedure for toughness characterisation of ceramic matrix composites
[REPT-932-430-101] p 2711 N94-27586

CERAMICS

Study on film generation phenomena by particle deposition p 2728 N94-25575

Crystallization and microstructural control of ferroelectric thin-films and glass-ceramics
[AD-A273767] p 2748 N94-25854

Collaborative research on ion implantation of ceramics
[DE93-019177] p 2749 N94-26080

Ceramic technology project
[DE94-003782] p 2750 N94-26332

Bimaterial interfaces and their role in the mechanical performance of the in-situ composites
[AD-A274688] p 2707 N94-26447

Attachment techniques for high temperature strain
[AD-A274766] p 2811 N94-26568

Research and development of alternative components at Argonne National Laboratory for Molten Carbonate Fuel Cells
[DE94-000014] p 2857 N94-26583

Structure and properties of composites synthesized in situ using solid state displacement reactions
[DE94-004589] p 2737 N94-26585

Mechanical properties of nanophase materials
[DE94-004625] p 2751 N94-26594

CEN-VAMAS round robin on grain size measurement for advanced technical ceramics
[VAMAS-TR-12] p 2752 N94-26654

High definition Raman microscopic imaging
[DE94-003158] p 2716 N94-26781

Interface phenomena in metal-ceramic composites
[AD-A274167] p 2709 N94-27125

Examination of hardness, fracture toughness and microstructure in Al2O3-B4C binary ceramics
[PB94-124237] p 2755 N94-27158

List of papers published by the members of Institute for Materials Research, Tohoku University 1992
[JTN-94-80608] p 3118 N94-27355

Resonant holographic measurements of laser ablation plume expansion in vacuum and argon gas backgrounds
[DE94-001407] p 2813 N94-27615

Synthesis, rheology, and forming of Y-Ba-Cu-O ceramics
[DE94-005558] p 2757 N94-27695

Characterization of ZnS-GaP naon-composites
[DE94-004888] p 2712 N94-27813

Gas fired advanced turbine system
[DE94-003193] p 2827 N94-27874

Fibrous ceramic candle filter for particle removal in pressurized fluidized bed combustion
[PB94-133089] p 2876 N94-28383

Experimental studies of pressurised fluidised bed combustion at Helsinki University of Technology, 1991-1992
[PB94-133063] p 2876 N94-28394

CEREBELLUM

Effects of gamma ray radiation on the developing mouse cerebellum: Apoptotic cell death and induction of tissue transglutaminase p 2904 N94-27472

CEREBRAL CORTEX

Interacting cortical filters for object recognition
[PB94-125374] p 2938 N94-26873

Orientation competition in cortical filters
[PB94-125366] p 2939 N94-27001

Cortical mechanisms of attention, discrimination, and motor response to somesthetic stimuli
[AD-A274163] p 2940 N94-27141
Disturbed neuronal migration in the cerebral cortex of mice by low-dose gamma radiation
p 2904 N94-27470
Distribution of GABA immunoreactive neurons in the brain of rolling mouse Nagoya and gamma-irradiated mouse p 2904 N94-27471
Effects of gamma ray radiation on the developing mouse cerebellum: Apoptotic cell death and induction of tissue transglutaminase p 2904 N94-27472
Abnormal development of serotonin nerve fibers in the cerebral cortex of young rats with methylazoxymethanol induced microcephaly p 2905 N94-27485

CEREBRUM
Development of Purkinje cells in vitro
p 2905 N94-27483
Developmental expression of protein kinase C type 1 isozyme in suncus and rat cerebella
p 2905 N94-27484
Interhemispheric phase relationship of alpha waves and cerebral dominance p 2927 N94-27518
Analysis of the Electrically Evoked Response (EER) of the cat p 2908 N94-27519

CERENKOV RADIATION
The Cherenkov hadronic like-jets
[DE93-634525] p 3016 N94-26010
HPm-tubes: Literature survey comprising 1992
[PB94-123643] p 2785 N94-27038

CERIUM COMPOUNDS
Study on synthesis and characteristics of intermetallic compound with strong electron correlation
p 2726 N94-25563
Heavy-electron behavior in large coordination compounds CeZn11 and UZn12
[REPT-A-2663] p 3049 N94-25614

CERMETS
Development of GaAs charge-coupled devices
[ISBN-0-315-84116-8] p 3059 N94-26703
MSOFC development status
[DE94-003192] p 2858 N94-26792
Interface phenomena in metal-ceramic composites
[AD-A274167] p 2709 N94-27125

CERTIFICATION
Digital systems validation book plan. Volume 3: Handbook
[AD-A274099] p 2672 N94-26028
Qualified manufacturing and interoperability for space applications p 2949 N94-26719

CESIUM
Adsorption and desorption studies of cesium on sapphire surfaces
[DE94-003798] p 3070 N94-28067

CESIUM IODIDES
Meson spectroscopy and particle astrophysics
[DE94-001799] p 3115 N94-27003

CESSNA AIRCRAFT
A revolutionary approach to composite construction and flight management systems for small, general aviation airplanes p 2671 N94-25714
Piloted simulation study of an ILS approach of a twin-pusher business/commuter turboprop aircraft configuration
[NASA-TM-4516] p 2646 N94-26602

CHAINS
LB-Deposited, side-chain substituted polyaniline, polypyrrole and the corresponding monomers, studied by STM
[AD-A274405] p 2754 N94-26977

CHALCOGENIDES
Evanescent field infrared spectroscopy using chalcogenide glass fiber
[ITN-94-85233] p 3038 N94-27178

CHANGE DETECTION
Morphodynamics of inter-tidal areas: The Wadden Sea
[NLR-TP-92356-U] p 2851 N94-27555
Global concern on research cooperation for environment p 2872 N94-28275
Progress in the study of global change in China
p 2873 N94-28276
Research and observation programmes on global changes in Indonesia p 2873 N94-28277
Philippine thrust on environmental research relating to global change p 2873 N94-28279
Land use change in Thailand and its impact on environmental change: Joint Thai-Japanese research project (1993-1995) p 2875 N94-28288
Study on environment monitoring over whole China using NDVI from AVHRR data and future project
p 2875 N94-28289
Utilization of remote sensing data for global climate change research in Malaysia p 2875 N94-28290
Utilization of remote sensing data for global change research p 2875 N94-28292
Contribution of satellite observation to global change research p 2876 N94-28293

CHANNEL CAPACITY
Coded communications with nonideal interleaving
[ITN-94-85235] p 2774 N94-27242

CHANNEL FLOW
Unsteady wake structures in transverse jets
p 2800 N94-28006

CHANNELS (DATA TRANSMISSION)
A VHDL register transfer level model of the linear token passing multiplex data bus protocol for the high speed data bus
[AD-A273734] p 2980 N94-26009
Virtual memory management and virtual bus overloading on multiple channel architectures
[AD-A274127] p 2954 N94-27152
Coded communications with nonideal interleaving
[ITN-94-85235] p 2774 N94-27242

CHAOS
Nonlinear ocean waves
[AD-A274651] p 2899 N94-26354
Chaotic dynamics of the solar cycle
[AD-A274315] p 3110 N94-26883
The onset of chaos in a periodically forced nonlinear oscillator
[ISBN-0-315-84564-3] p 2842 N94-27272

CHARACTERIZATION
Failure mechanisms of high temperature semiconductor lasers
[AD-A273833] p 2815 N94-25616
Component characterization and development 2
[AD-A274002] p 2765 N94-25660
Pulse transformer characterization
[PML-1992-73] p 2784 N94-26646
Testing procedure for toughness characterisation of ceramic matrix composites
[REPT-932-430-101] p 2711 N94-27586
Characterization of semi-insulating gallium arsenide
[AD-A273781] p 3068 N94-27704
Bench-scale synthesis of nanoscale materials
[DE94-004787] p 2742 N94-27786

CHARGE CARRIERS
Technical report of ISSP. Ser. A, no. 2680: Determination of intervalley scattering time in germanium by subpicosecond time-resolved Raman spectroscopy
[JTN-94-80566] p 3064 N94-27176

CHARGE COUPLED DEVICES
Design analysis of a combined optical/LADAR deep-space surveillance satellite
[AD-A274040] p 2694 N94-25832
Developments in crystallographic phase analysis in the SEM: Backscattered electron Kikuchi patterns
[DE93-040755] p 3057 N94-26420
Development of GaAs charge-coupled devices
[ISBN-0-315-84116-8] p 3059 N94-26703
CCD-Camera images of BEST-TWO and processing results
[AD-A274140] p 2811 N94-27134
CMT-Si
[PB94-123619] p 2812 N94-27216
High resolution studies of sunspots and flux tubes
[NASA-CR-195216] p 3111 N94-27321
Multiple exposure CCD detector for high-speed laser pump, x ray probe Laue scattering
[DE94-004618] p 2820 N94-27781

CHARGE DISTRIBUTION
Microscopic study of local structure and charge distribution in metallic La2CuO(4+delta)
[DE94-003801] p 3050 N94-25817
First principle calculation for magneto-crystalline anisotropy
[DE93-634653] p 3052 N94-26012
Limit theorems for functionals of Markov processes and renormalizable stable fields
[AD-A274645] p 3004 N94-27106

CHARGE EFFICIENCY
Charge efficiency of Ni/H2 cells during transfer orbit of Telstar 4 satellites p 2862 N94-28117
TOPEX/Poseidon battery performance during the first year of operation p 2862 N94-28119

CHARGE EXCHANGE
Atomic processes in Inertial Electrostatic Confinement (IEC) devices
[DE94-005015] p 3047 N94-27715
Muon transfer rates in collisions of hydrogen isotope mesic atoms on bare nuclei: Multichannel adiabatic approach
[DE94-606752] p 3030 N94-27861

CHARGE TRANSFER
Two dimensional self-consistent fluid simulation of RF inductive sources
[DE94-003635] p 2767 N94-25937
Recombination and metastability in amorphous silicon and silicon germanium alloys
[DE94-000237] p 2736 N94-26481
A semiclassical reactive flux method for the calculation of condensed phase activated rate constants
[AD-A274850] p 3020 N94-26562

CHARGED PARTICLES
Secondary particle in background levels and effects on detectors at future hadron colliders
[DE94-003378] p 3011 N94-25598
CP violating form factors for three gauge boson vertex in the two Higgs doublet and left-right symmetric models
[DE94-601704] p 3014 N94-25841
Problems of application of charged particles channeling effects in crystals in high-energy physics
[DE93-634023] p 3032 N94-26405
About stochastization of motion of charged particles in geomagnetic field and in the field of a wave packet
[DE93-634309] p 2879 N94-26502
Delta f Algorithm
[DE94-003120] p 2963 N94-26521
Limit theorems for functionals of Markov processes and renormalizable stable fields
[AD-A274645] p 3004 N94-27106
The radiation design handbook
[ESA-PSS-01-609-ISSUE-1] p 2696 N94-27397
Helium transport and exhaust studies of H-mode discharges in the D3-D tokamak
[DE94-004744] p 3048 N94-27785
Correlations in inelastic collisions of relativistic nuclei with emulsion at (4.1 - 4.5) A GeV/c
[DE93-634526] p 3030 N94-27994

CHARM (PARTICLE PHYSICS)
Heavy quark production and spectroscopy
[DE94-003619] p 3015 N94-25935
Photon and hadron production of heavy flavors
[DE94-004655] p 3018 N94-26245
Charmonium physics at a tau-charm factory
[PB94-124344] p 3024 N94-27199
Observation of excited charmed mesons
[ISBN-0-315-57014-8] p 3026 N94-27400

CHARRING
Materials characterization on efforts for ablative materials
[NASA-CR-193929] p 2756 N94-27230

CHARTS
Parsing schemata: A framework for parallel and sequential parsing
[PB94-125267] p 2981 N94-26998

CHASSIS
The Enabler: A concept for a lunar work vehicle
p 2833 N94-25675
The Robotic All-Terrain Lunar Exploration Rover (RATLER): Increased mobility through simplicity
p 2685 N94-26291

CHEBYSHEV APPROXIMATION
Rendering of three-dimensional data sets derived from finite-difference and spectral methods
[AD-A273724] p 3096 N94-25997
Chebyshev-Markov rational functions over several intervals
[PB94-125333] p 2998 N94-27116

CHEMICAL ANALYSIS
The Latin American conference on the applications of the Moessbaer effect
[DE93-615942] p 3051 N94-25912
Regrowth zones in laser annealed radiation damaged diamond
[DE94-600821] p 3056 N94-26364
Radiochemistry Division annual progress report : 1991
[DE94-600652] p 2715 N94-26392
New FORTRAN computer programs to acquire and process isotopic mass spectrometric data: Operator's manual
[DE94-003174] p 2965 N94-26784
Liquid crystalline side-chain polysiloxanes with 4-amino-4'-stilbene-carboxylic ester mesogens
[AD-A274510] p 2754 N94-27036
Zeeman laser interferometry for detection and chemical analysis
[DE94-003963] p 2719 N94-27728

CHEMICAL ATTACK
Study on performance evaluation of pressure vessel steel in corrosion environments with sulfide
p 2730 N94-25582
The chemical detector paper as a potential alarm
[FFI-93/6007] p 2712 N94-25745
A materials compatibility study in FM-1, a liquid component of a paste extrudable explosive
[DE94-001166] p 2759 N94-26198
A preliminary method for atmospheric soundings in real time using satellite and ground-based remotely sensed data
[AD-A274381] p 2880 N94-26828

CHEMICAL BONDS
X ray computed tomography for emerging aerospace materials and processes development
[AD-A273721] p 2705 N94-25779

Three methods to measure RH bond energies
[DE94-003795] p 3013 N94-25816
Lighter alkali hydride and deuteride 1: Electronic properties of pure solids
[DE93-616188] p 3051 N94-25914
Computational analysis of some aspects of a synthetic route to ammonium dinitramide
[AD-A274648] p 2704 N94-26353
Transition metal activation and functionalization of carbon-hydrogen bonds
[DE94-003650] p 2715 N94-26369
Molecular surface electrostatic potentials in the analysis of non-hydrogen-bonding noncovalent interactions
[AD-A274612] p 3022 N94-26894
Photoelectron spectroscopic studies of the electronic structure and bonding in TiC and TiN
[ATR-93(8361)-2] p 2746 N94-28185

CHEMICAL CLEANING
Stability of reference masses 2: The effect of environment and cleaning methods on the surfaces of stainless steel and allied materials
[NPL-DMM(A)-95] p 2738 N94-26653

CHEMICAL COMPOSITION
Study on substance diffusion in thin films with controlled structures p 2727 N94-25570
Analytical method for estimation of the total amount of aromatic and poly aromatic compounds in diesel fuel
[PB94-123692] p 2759 N94-25907
Formation of three types of quasi-crystals in Al-Pd-Mg system
[REPT-A-2667] p 3053 N94-26071
Polar and chemical domain structures of lead scandium tantalate (PST)
[DE94-600760] p 3056 N94-26363

CHEMICAL EFFECTS
Effects of plastic media blasting on aircraft skin
[AD-A274817] p 2668 N94-26488

CHEMICAL EXPLOSIONS
Structural analysis of a frangible nut used on the NASA Space Shuttle
[DE94-003672] p 2821 N94-25811
Numerical simulation of the reignition of detonation by reflected shocks
[AD-A274755] p 2795 N94-27252
Propellants and explosives in ballistic missiles
[UCRL-LR-113578] p 2760 N94-28222

CHEMICAL INDICATORS
The chemical detector paper as a potential alarm
[FFI-93/6007] p 2712 N94-25745

CHEMICAL PROPERTIES
Study on substance diffusion in thin films with controlled structures p 2727 N94-25570
The structural, chemical, and electrical properties of He-implantation-induced nanocavities in silicon
[DE94-002681] p 3052 N94-25971
Liquid monopropellants
[AD-D016074] p 2760 N94-28226

CHEMICAL REACTION CONTROL
Combustion synthesis method p 2721 N94-25561

CHEMICAL REACTIONS
Atomic-scale chemistry of metal surfaces
[REPT-A-2657] p 3012 N94-25636
Selfsimilar solutions of a nonlinear transport equation
[REPT-93-42] p 2865 N94-25760
Structure and properties of intermetallic composites synthesized in situ using solid state displacement reactions
[DE94-004312] p 2705 N94-25805
Three methods to measure RH bond energies
[DE94-003795] p 3013 N94-25816
Alternative materials for solid oxide fuel cells: Processing and interactions of materials
[DE94-000016] p 2855 N94-26114
X ray absorption studies of Ti/polymer and Cr/polymer interfaces
[DE94-003008] p 2753 N94-26770
The coordination and atom transfer chemistry of titanium porphyrin complexes
[DE94-003091] p 2704 N94-26779
Molecular surface electrostatic potentials in the analysis of non-hydrogen-bonding noncovalent interactions
[AD-A274612] p 3022 N94-26894
Approximate Riemann solvers: Improvement of the HLLEM scheme and its generalization for chemically reacting flows
[NAL-TR-1189] p 2795 N94-27205
Basic research on natural gas combustion phenomena
[PB94-129046] p 2717 N94-27256
Reactivity of nitrate radical (NO3) toward organic compounds p 2704 N94-27387
Emissions of nitrogen oxides (NO(x) and N2O) in pressurized fluidized bed combustion
[PB94-133071] p 2876 N94-28395

CHEMICAL REACTORS
Physical modelling and adaptive predictive control of diffusion/LPCVD reactors
[PB94-126398] p 2763 N94-26819
Experimental studies of pressurised fluidised bed combustion at Helsinki University of Technology, 1991-1992
[PB94-133063] p 2876 N94-28394

CHEMICAL TESTS
Analytical method for estimation of the total amount of aromatic and poly aromatic compounds in diesel fuel
[PB94-123692] p 2759 N94-25907

CHEMICAL VAPOR INFILTRATION
Investigation of forced and isothermal chemical vapor infiltrated SiC/SiC ceramic matrix composites
[DE94-004544] p 2708 N94-26557

CHEMISORPTION
Hydrogen uptake into silicon from an ECR plasma
[DE94-003771] p 3050 N94-25815
An investigation of the effect of surface impurities on the adsorption kinetics of hydrogen chemisorbed onto iron
[NASA-CR-195213] p 2716 N94-26643

CHEMORECEPTORS
Muscle sympathetic nerve activity in humans
p 2932 N94-27538

CHINA
Investigation of mesoscale convective cloud clusters in South China
[AD-A274303] p 2895 N94-26678

CHIPS (ELECTRONICS)
Multichip module high speed testing
[AD-A274873] p 2782 N94-26343
High performance flight computer developed for deep space applications p 2949 N94-26718
Use of HOOD coupled to real time monitors
p 2953 N94-26742
A fully integrated 16 channel digitally trimmed pulse shaping amplifier
[DE94-004555] p 2787 N94-27618
NASA satellite communications application research, phase 2 addendum. Efficient high power, solid state amplifier for EHF communications
[NASA-CR-195712] p 2777 N94-27946
Microprocessor chip incorporating optical signal coupling transceiver
[AD-D016077] p 2788 N94-28186

CHIPS (MEMORY DEVICES)
The 12-channel flash-ADC FASTBUS module
[DE93-634229] p 2783 N94-26380

CHIRAL DYNAMICS
Out of equilibrium phase transitions and a toy model for disoriented chiral condensates
[DE94-601642] p 3013 N94-25839
Experimental study of the near threshold pi(sup +)p yields (pi(sup +))(pi(sup +))(n) cross section and chiral symmetry
[DE94-601671] p 3014 N94-25840
Anomaly candidates and invariants of D 4, N 1 supergravity theories
[NIKHEF-H/93-12] p 3072 N94-26541
Nuclear Theory Group, University of Washington recent and planned research
[DE94-002729] p 3022 N94-26809
Surface modes and chiral symmetry (Wilson fermions in a box)
[DE94-004946] p 3029 N94-27814
Axial anomaly in e(+)e(-) yields gamma gamma and anyon superconductivity
[DE94-606406] p 3070 N94-27859
Polarizability matrix of layered chiral sphere
[PB94-132834] p 2778 N94-28355

CHLORIDES
Effects of plastic media blasting on aircraft skin
[AD-A274817] p 2668 N94-26488
High rate lithium/thionyl chloride bipolar battery development p 2864 N94-28133

CHLORINE
Structure of ionic fluids in equilibrium with a microporous ionic matrix
[DE94-600563] p 2715 N94-26391
Measuring variation in ecosystem sensitivity to stress
[AD-A274232] p 2868 N94-26817

CHLOROCARBONS
Effects of p-chlorophenol on sulfate reduction in marine sediments p 2870 N94-28150

CHLOROFLUOROCARBONS
Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparison and verification of methods
[DE94-003664] p 2749 N94-26007
Thermophysical properties of refrigerant R-134a (1,1,1,2-tetrafluoroethane)
[ESDU-93001] p 2720 N94-27959

CHOLERA
Bakteriella toxiner-morgondagens hot (bacterial toxins-the threat of tomorrow)
[PB94-124229] p 2902 N94-27045

CHROMATOGRAPHY
The use of on-line ion chromatography for high temperature and high pressure reaction studies
[DE94-002525] p 2713 N94-26075

CHROMIUM
The development of Cr, Tm, Ho:YAG lasers for airborne lidar
[AD-A274895] p 2816 N94-26178
X ray absorption studies of Ti/polymer and Cr/polymer interfaces
[DE94-003008] p 2753 N94-26770
Grain boundary chromium concentration effects on the IGSCC and IASCC of austenitic stainless steels
[DE94-004268] p 2741 N94-27570

CHROMIUM ALLOYS
The role of grain boundary chemistry and structure in the environmentally-assisted intergranular cracking of nickel-base alloys
[DE94-003159] p 2732 N94-25954
Influence of helium generation rate and temperature history on mechanical properties of model Fe-Cr-Ni alloys irradiated in FFTF at relatively low displacement rates
[DE94-004264] p 2737 N94-26575
A tri-junction diffusion couple analysis of the Nb-Cr-Ti system at 950 C
[DE94-002637] p 2737 N94-26607
Experimental measurement of local displacement and chemical pair correlations in crystalline solid solutions
[DE94-001124] p 3065 N94-27251
Thermogravimetric study of oxidation of a PdCr alloy used for high-temperature sensors
[NASA-TM-106473] p 2741 N94-27426
Effect of different ions on the anodic behaviour of alloy 800 in chloride solutions at high temperature
[DE94-602982] p 2743 N94-27832
NMR study of quasicrystal Al(70)Pd(20)T(M10) alloy (T(M):Cr, Mn, Fe, and Co) p 2745 N94-28162
Formation and high mechanical strength of Al-based alloys containing a nanoscale icosahedral phase as a main constituent p 2746 N94-28171

CHROMIUM STEELS
Microstructural development in low activation ferritic alloys irradiated to 200 dpa at 420 C
[DE94-004269] p 2731 N94-25803

CHROMOSOMES
Electron microscopic analysis of meiotic chromosome pairing in male house musk shrew, Suncus murinus
p 2906 N94-27493

CHROMOSPHERE
Ultraviolet observations of astronomical sources
[NASA-CR-195232] p 3102 N94-26234
Photospheric origins of chromospheric and coronal activity
[NASA-CR-195215] p 3110 N94-26590

CHRONIC CONDITIONS
Selection of site injecting adjuvant in chronic inflammation model p 2906 N94-27496
The effect of naloxone on sleeping time in adjuvant arthritic rats p 2906 N94-27498

CHRONOLOGY
Geological Dating by Ar-40 - Ar-39 method
[DE94-601975] p 2880 N94-26874

CIRCADIAN RHYTHMS
Workload transition: Implications for individual and team performance
[AD-A274538] p 2941 N94-26964

CIRCLES (GEOMETRY)
Towards a theory of growing surfaces: Mapping two-dimensional Laplacian growth onto Hamiltonian dynamics and statistics
[DE94-002636] p 2991 N94-26079
Single-server queues with spatially distributed arrivals
[PB94-126638] p 2986 N94-26916

CIRCUIT DIAGRAMS
Signal amplifier-shapers for multiwire detectors
[DE93-634171] p 2783 N94-26438

CIRCUIT RELIABILITY
Symbolic model checking for sequential circuit verification
[AD-A274375] p 2786 N94-27061
Coherence and satisfiability of waveform timing specifications
[ISBN-0-315-57769-X] p 3009 N94-27268

CIRCUITS
Signal amplifier-shapers for multiwire detectors
[DE93-634171] p 2783 N94-26438
ADC test support program
[AD-A274819] p 2783 N94-26491

CIRCULAR CYLINDERS
Flow past a circular cylinder with a permeable wake splitter plate
[AD-A273765] p 2790 N94-25872

CIRCULAR ORBITS
A comparison of three approximate mathematical models for the gravity gradient stabilized satellite [AD-A273832] p 2694 N94-25615
Hill equations for satellite orbit determination [ETN-94-95374] p 2690 N94-25787

CIRCULATORY SYSTEM
Annals of the Research Inst. of Environmental Medicine, Nagoya Univ., volume 44 [REPT-44-VOL-44] p 2911 N94-27442
Effect of L-dopa on hemodynamic functions in humans p 2929 N94-27526

CITIES
Project WISH: The Emerald City p 2703 N94-25690
An observational study of air pollution transport over a large urban complex [REPT-6] p 2867 N94-26474

CIVIL AVIATION
Preliminary design of nine high speed civil transports p 2671 N94-25710
The evolution of the high-speed civil transport [NASA-TM-109089] p 3117 N94-26155
Effects of historical and predictive information on ability of transport pilot to predict an alert [NASA-TM-4547] p 2673 N94-27864
The single European market and air traffic chances and risks p 2660 N94-28231
Deregulation of air traffic in America: A model to be initiated? p 2661 N94-28232
Lufthansa facing the single European market p 2661 N94-28237
Air traffic administration enroute to Europe p 2661 N94-28238
Air traffic in recession p 2662 N94-28240
German-American relations in air traffic are to be criticized p 2662 N94-28241
Lufthansa and Europe p 2663 N94-28247
Know-how export: Lufthansa technology at Shannon p 2663 N94-28248
After thirty years: Farewell of Europa jet p 2663 N94-28249

CLADDING
Corrosion resistance at welded zones of nuclear fuel reprocessing system p 2722 N94-25546

CLASSES
Schema integration in object-oriented databases [CWI-CS-R9320] p 2970 N94-27548

CLASSICAL MECHANICS
On the wave and corpuscular properties of microparticles [DE93-634450] p 3020 N94-26509

CLASSIFICATIONS
A feasibility study on bird classification with neural network [AD-A273753] p 2659 N94-25780
On the classification scheme for resonant states of muonic molecules [DE93-613645] p 3014 N94-25853
A diagnostic classification model for document processing skills [AD-A273790] p 3096 N94-25925
Design considerations when using external hypertext engines from applications [DE94-002213] p 3098 N94-26598
Classification of linear differential operators with an invariant subspace in monomials [PB94-126620] p 2996 N94-26915
New mixed integer algorithm for classification and placement of measurements in process flow networks [PB94-126752] p 2966 N94-26921
Multivariate spectral analysis to extract materials from multispectral data [AD-A274142] p 2709 N94-27135

CLASSIFIERS
Discovery learning in autonomous agents using genetic algorithms [AD-A274083] p 2677 N94-25998
Three dimensional object recognition using a complex autoregressive model [AD-A274388] p 2995 N94-26829
Multivariate spectral analysis to extract materials from multispectral data [AD-A274142] p 2709 N94-27135

CLATHRATES
Crystallographyic analyses of clathrate hydrates included in Vostok ice cores p 2885 N94-27969

CLEAN FUELS
Combined Cycles for Power Plants [VKI-LS-1993-08] p 2830 N94-28077
Clean coal technology p 2832 N94-28089

CLEANING
Plasma surface cleaning using microwave plasmas [DE94-002754] p 2713 N94-26014

CLEARANCES
Transient model applications. 1: Compressor heat soak/clearance effects modeling p 2828 N94-28048

CLEAVAGE
First principles calculations for the cleaved and annealed Ge(111) surfaces [DE93-617048] p 3066 N94-27347

CLIMATE
Sensitivity of climate models: Comparison of simulated and observed patterns for past climates [DE93-019934] p 2865 N94-25789
The effect of elevation data representation on nocturnal drainage wind simulations [DE94-003624] p 2892 N94-25936
Environmental benefits of different types of heat pumps, available and expected [DE94-002440] p 2866 N94-26123
Meeting of the Eighth Session of the Scientific Advisory Committee of the World Climate Impact Assessment and Response Strategies Programme [DE93-633954] p 2866 N94-26163
Overall analysis of meteorological information in the Daeduk nuclear complex [DE93-632594] p 2894 N94-26469
Extraterrestrial accretion and glacial cycles p 2890 N94-28308

CLIMATE CHANGE
Assessing the climatic effect of carbon dioxide and other trace gases using an interactive two-dimensional climate-chemistry model [DE94-001741] p 2866 N94-25927
Implications of policies and prevent climate change for future food security [DE93-018872] p 2866 N94-25948
Grassland/atmosphere response to changing climate: Coupling regional and local scales [DE94-003111] p 2866 N94-26026
The impact of recent model improvements on GISS GCM predictions of climate change [DE93-019458] p 2866 N94-26077
Meeting of the Eighth Session of the Scientific Advisory Committee of the World Climate Impact Assessment and Response Strategies Programme [DE93-633954] p 2866 N94-26163
A preliminary analysis of the US west climatology [DE94-003028] p 2894 N94-26313
Global change research related to the Earth's energy and hydrologic cycle [NASA-CR-195270] p 2869 N94-27430
Asia-Pacific Seminar on Global Change Research Cooperation [JTN-94-80517] p 2871 N94-28268
Role and activity of STA on Asian Pacific regional cooperation p 2853 N94-28269
Research activities on the meteorology over the Asia-Pacific region p 2853 N94-28271
Progress in the study of global change in China p 2873 N94-28276
Research and observation programmes on global changes in Indonesia p 2873 N94-28277
Country report on global change research for the Republic of Korea p 2873 N94-28278
Philippine thrust on environmental research relating to global change p 2873 N94-28279
Global change: A research strategy for Australia 1992-1996 p 2874 N94-28282
A progress report on global change studies in China p 2874 N94-28283
HDGEC activity in Asia Pacific region p 2874 N94-28286
Utilization of remote sensing data for global climate change research in Malaysia p 2875 N94-28290
The end-Permian mass extinction: A complex, multicausal extinction p 2888 N94-28299

CLIMATOLOGY
The impact of recent model improvements on GISS GCM predictions of climate change [DE93-019458] p 2866 N94-26077
Testbed model and data assimilation for ARM [DE94-000432] p 2893 N94-26082
Properties of the Central American cold surge [NASA-CR-194849] p 2893 N94-26138
A preliminary analysis of the US west climatology [DE94-003028] p 2894 N94-26313
Extraterrestrial accretion and glacial cycles p 2890 N94-28308

CLIMBING FLIGHT
Examples of flight path optimisation using a multivariate gradient-search method [ESDU-93021] p 2670 N94-28092
Example of statistical techniques applied to analysis of effects of small changes [ESDU-93023] p 2670 N94-28094

CLINICAL MEDICINE
Biomedical polyurethane networks [ETN-94-95391] p 2750 N94-26211
Monograph of the aviation epidemiology data register for calendar year 1988 [AD-A274589] p 2911 N94-26985
Development of inbred strains from Japanese wild rats (Rattus norvegicus) p 2906 N94-27492

CLOCKS
Formal methods for dependable real-time systems p 2953 N94-26740
Improved modeling of GPS selective availability p 2642 N94-27290

CLOSED CYCLES
Project WISH: The Emerald City p 2703 N94-25690
Small low mass advanced PBR's for bi-modal operation [DE94-003201] p 2699 N94-25798

CLOSED ECOLOGICAL SYSTEMS
Automation of closed environments in space for human comfort and safety p 2943 N94-25684
Effect of carbon dioxide enrichment on radish production using Nutrient Film Technique (NFT) [NASA-TM-107198] p 2902 N94-27411
Development of a sparging technique for volatile emissions from potato (Solanum tuberosum) [NASA-TM-109199] p 2903 N94-27412

CLOSTRIDIUM BOTULINUM
Bakteriella toxiner-morgondagens hot (bacterial toxins-the threat of tomorrow) [PB94-124229] p 2902 N94-27045

CLOUD COVER
Differentiating the role of land surface variability and cloudiness variability on global energy transport within the atmosphere and oceans [NASA-CR-195229] p 2847 N94-26222
Science support for the Earth radiation budget experiment [NASA-CR-191600] p 2894 N94-26506
Short-range cloud amount forecasting with model output statistics [AD-A274769] p 2895 N94-26798
Initial ultraviolet-B intensity data at Lawrence Livermore National Laboratory [DE94-004279] p 2869 N94-27267

CLOUD PHYSICS
ARM Fourier transform spectrometer data analysis tools [DE94-000865] p 2895 N94-26697
Cloud liquid water content measurement tests using dual-wavelength radar [PB94-125960] p 2896 N94-26959

CLOUD SEEDING
Examination of micro- and macro-physical structures and processes in hailstorms with respect to their modification [DLR-FB-93-25] p 2897 N94-27751

CLOUDS
Reanalysis of Mariner 9 UV Spectrometer Data for Ozone, Cloud, and Dust Abundances, and Their Interaction Over Climate Timescales [NASA-CR-195244] p 3107 N94-27885

CLOUDS (METEOROLOGY)
Studies for the loss of atomic and molecular species from Io [NASA-CR-195702] p 3108 N94-27941

CLUSTER ANALYSIS
Fuzzy robust statistics for application to the fuzzy c-means clustering algorithm [AD-A274719] p 3003 N94-26436
An integrated approach to seismic event location: 1. Evaluating how method of location affects the volume of groups of hypocenters [PL-TR-92-2323] p 2887 N94-28214

CLUTTER
Processing of wide-angle synthetic aperture radar signals for target detection [AD-A274225] p 2773 N94-27073

CMOS
Advanced qualification techniques [DE94-003709] p 2780 N94-25812
Demonstration of monolithic co-fabrication of Y1Ba2Cu3O7-Sigma and CMOS devices on the same sapphire substrate [AD-A274757] p 3059 N94-26566
On-board computer for control subsystem of satellite p 2949 N94-26716
Processing, fabrication, and demonstration of HTS integrated microwave circuits, appendix A [AD-A274600] p 2785 N94-26890
A fully integrated 16 channel digitally trimmed pulse shaping amplifier [DE94-004555] p 2787 N94-27618

COAL
Advances in passive-remote and extractive Fourier transform infrared spectroscopic systems [DE94-001424] p 2868 N94-26952
Combined Cycles for Power Plants [VKI-LS-1993-08] p 2830 N94-28077

COAL GASIFICATION
Radiation applications of physical chemistry p 2854 N94-26054

Design of gasifiers to optimize fuel cell systems
[DE94-000010] p 2856 N94-26581
Researches of the Electrotechnical Laboratory. No. 53: Spectral emission from combustion gas containing scattering media
[JTN-94-80603] p 2717 N94-27246
Integrated coal gasification combined cycle
p 2832 N94-28090

COAL UTILIZATION
Clean coal technology p 2832 N94-28089

COANDA EFFECT
Theoretical and experimental investigation of a delta wing with turbulent leading-edge jets
p 2659 N94-28029

COASTAL CURRENTS
Topics in longshore currents
[AD-A274788] p 2899 N94-26361
Analysis and interpretation of the meteorology of the 1988 coastal transition zone experiment
[AD-A274710] p 2894 N94-26431

COASTAL ECOLOGY
Mapping coastal habitats using an imaging spectrometer
[ISBN-0-315-84362-4] p 2848 N94-26664

COASTAL WATER
A study on structure of benthic boundary layer in coastal waters
[REPT-4] p 2898 N94-25635
A comparative evaluation of SAR and SLAR
[DE94-002922] p 2848 N94-26277
Journal of NIRE, volume 2, number 4
[JTN-94-80554] p 2869 N94-28147
Effects of p-chlorophenol on sulfate reduction in marine sediments p 2870 N94-28150

COASTS
Hydrographic and Acoustic Doppler Current Profiler (ADCP) data from the ONR eastern boundary current accelerated research initiative, 9-16 June 1992
[AD-A274115] p 2898 N94-26076
A comparative evaluation of SAR and SLAR
[DE94-002922] p 2848 N94-26277
Coastal Zone Management Act and related legislation, revision 3
[DE94-004180] p 2869 N94-27691

COATING
The formation of conducting gold films by thermal decomposition and direct patterning using electron beam lithography of the gold cluster Au55P(C6H5)312C16
[AD-A273720] p 2749 N94-26074
Bimaterial interfaces and their role in the mechanical performance of the in-situ composites
[AD-A274688] p 2707 N94-26447
Equivalent performance in different helical resonator plasma polymerization coater platforms
[DE94-001517] p 2753 N94-26933
Dual cure low-VOC coating process
[DE94-000365] p 2756 N94-27611

COATINGS
Experiment and research on materials irradiated by plasma radiation
[DE94-605011] p 2758 N94-27845

COBALT
Structural study of Cu/Co multilayer by anomalous small-angle x ray scattering p 2744 N94-28160

COBALT ALLOYS
Study of the hyperfine magnetic field at Ta-181 site in the Heusler Co2ScSn, Co2ScGa, and Co2HfSn alloys
[DE94-603989] p 3067 N94-27623
Differential scanning calorimetric study of solid state amorphization and crystallization in Zr/Co and Zr/Ni multilayers p 2745 N94-28161
NMR study of quasicrystal Al(70)Pd(20)T(M10) alloy (T(M):Cr, Mn, Fe, and Co) p 2745 N94-28162

COBALT ISOTOPES
Balloon-borne measurements of the SN1987A hard x ray continuum p 3115 N94-26689

COCKPIT SIMULATORS
Weapon system sensor integration for a DIS-compatible virtual cockpit
[AD-A274088] p 2672 N94-26021

COCKPITS
Weapon system integration for the AFIT virtual cockpit
[AD-A274058] p 2667 N94-25772
A multivariate anthropometric method for crew station design: Abridged
[AD-A274588] p 2941 N94-26984
Standardization of aircraft control and performance symbology on the USAF head-up display
[AD-A274283] p 2673 N94-26989
A graphical workstation based part-task flight simulator for preliminary rapid evaluation of advanced displays
p 2641 N94-27286
First Canadair jet flies for Lufthansa city line
p 2662 N94-28243

COCKROACHES
A biologically-inspired autonomous robot
[AD-A273909] p 2821 N94-25782

CODE DIVISION MULTIPLE ACCESS
Code division multiple access local area network communications employing fiber optic signal processing techniques
[AD-A274897] p 3096 N94-26180

CODERS
Speech coding at low to medium bit rates
[ISBN-0-315-84012-9] p 2770 N94-26630
Deferred compilation: The automation of run-time code generation
[AD-A274124] p 2967 N94-27065
The Communication Link and Error ANalysis (CLEAN) simulator
[NASA-CR-195243] p 2968 N94-27168

CODING
Filtering, coding, and compression with Malvar wavelets
[AD-A274055] p 2780 N94-25770
The use of ASN.1 and XDR for data representation in real-time distributed systems
[AD-A273769] p 2959 N94-25855
Probabilistic methods for image generation and encoding
[AD-A274294] p 2964 N94-26682
The CODE-TOP (COncurrent system DEvelopment using Transformations Of Predicate-transition nets) method: Examples of using it for system architecture specification, software specification, and code generation p 2953 N94-26744
Trapezoid-oriented compression of run length coded map data
[PB94-123312] p 2849 N94-26848
Encoding approaches for data link transmission of weather graphics
[AD-A274497] p 2772 N94-26963
Genetic algorithms applied to a mission routing problem
[AD-A274130] p 2968 N94-27120
SPECTRUM analysis of multispectral imagery in conjunction with wavelet/KLT data compression
[DE94-003961] p 2851 N94-27727
Compression of multispectral Landsat imagery using the Embedded Zerotree Wavelet (EZW) algorithm
p 2947 N94-28261

COEFFICIENT OF FRICTION
Crystal chemistry and self-lubricating properties of monochalcogenides gallium selenide and tin selenide
[DE93-041177] p 2751 N94-26422

COEFFICIENTS
Filtering, coding, and compression with Malvar wavelets
[AD-A274055] p 2780 N94-25770
On a spline-approximation method for solving ordinary differential equations
[DE93-634290] p 2994 N94-26471

COGNITION
Induced pictorial representations
[AD-A274251] p 2939 N94-27012

COGNITIVE PSYCHOLOGY
Extending the rule space model to a semantically-rich domain: Diagnostic assessment in architecture
[AD-A273789] p 2948 N94-25864
A diagnostic classification model for document processing skills
[AD-A273790] p 3096 N94-25925
Air traffic controller working memory: Considerations in air traffic control tactical operations
[AD-A273722] p 2664 N94-26197
Long term learning: Integration of knowledge acquisition and knowledge compilation
[AD-A274775] p 3098 N94-26570
The central executive component of working memory
[AD-A274295] p 2938 N94-26683

COHERENT LIGHT
The proceedings of the KEK FEL Simulation Code Workshop
[DE93-520378] p 2816 N94-26112

COHERENT RADAR
Coherent HF radar system for the study of natural and heater induced ionospheric irregularities
[AD-A273804] p 2876 N94-25752

COHERENT RADIATION
Computer simulations of radiation generation from relativistic electron beams
[AD-A274139] p 3024 N94-27133
Sum frequency generation using an optical parametric oscillator
[DE94-001827] p 3040 N94-28000

COINCIDENCE CIRCUITS
Use of parallel counters for triggering
[DE93-616656] p 2979 N94-25918

COLD CATHODES
Micro-electron deflector
[AD-D016055] p 2787 N94-27672

COLD FLOW TESTS
Orbit transfer rocket engine technology program enhanced heat transfer combustor technology
[NASA-CR-189236] p 2700 N94-26156

COLD FRONTS
Properties of the Central American cold surge
[NASA-CR-194849] p 2893 N94-26138
Propagation of cold air masses in East Asia and its associated planetary-scale function
[AD-A274304] p 2895 N94-26850

COLD NEUTRONS
Surface physics with cold and thermal neutron reflectometry
[DE94-001447] p 2733 N94-26070

COLD PLASMAS
Critical survey of plasma processing
[AD-A274233] p 3044 N94-26820
Proceedings of the 16th Symposium on Plasma Physics and Technology
[DE94-604181] p 3047 N94-27698

COLD SURFACES
C-periodicity and the physical mass in the 3-state Potts model
[DE94-601551] p 3019 N94-26423

COLD TRAPS
Antiproton studies in penning traps
[AD-A274250] p 3024 N94-27011

COLD WEATHER
Environmental benefits of different types of heat pumps, available and expected
[DE94-002440] p 2866 N94-26123

COLD WORKING
Titanium 1992: Science and Technology, volume 1
[AD-A274798-VOL-1] p 2739 N94-26799
Effect of precipitate structure on hot deformation of Al-Mg-Mn alloys
[DE94-004596] p 2741 N94-27622

COLLIMATION
Regrouping of the beam in the IHEP PS for the UNK p-p programs
[DE93-634021] p 3032 N94-26164
Longitudinal diffusion of a proton bunch under external noise
[DE93-634022] p 3032 N94-26165

COLLIMATORS
Development of a holographic illumination system for a time-integrating correlator
[DSIS-94-00111] p 2814 N94-27763

COLLISION AVOIDANCE
A feasibility study on bird classification with neural network
[AD-A273753] p 2659 N94-25780
A global approach to kinematic path planning to robots with holonomic and nonholonomic constraints
p 2683 N94-26279
Application of the CIRSSE cooperating robot path planner to the NASA Langley truss assembly problem
p 2683 N94-26280

COLLISION RATES
Relativistic collision rate calculations for electron-air interactions
[DE94-004204] p 3020 N94-26527

COLLISIONS
Balancing of a planar bouncing object
[AD-A273805] p 2821 N94-25878
Deciphering the quark-gluon structure of the photon in electron(gamma) collisions
[DE93-634386] p 3017 N94-26043
The crash of P/Shoemaker-Levy 9 into Jupiter and its implications for comet bombardment on Earth
p 2891 N94-28313

COLLOCATION
Geoid determination: With help of the alternative scattering method
[ETN-94-95375] p 2847 N94-25746
Rendering of three-dimensional data sets derived from finite-difference and spectral methods
[AD-A273724] p 3096 N94-25997
On a spline-approximation method for solving ordinary differential equations
[DE93-634290] p 2994 N94-26471

COLLOIDS
Ion implantation in silicate glasses
[DE94-003785] p 2757 N94-27726

COLONIES
The Fermi paradox: An approach based on percolation theory p 2687 N94-27370
Counting Adelie penguins at colonies: Seasonal and annual changes p 2885 N94-27970
Note on the structure of moss colonies composed of two species on King George Island, the South Shetland Islands p 2885 N94-27971

COLOR
SHIVA: A unix-based, menu-driven, color image processing software package
[AD-A274071] p 2957 N94-25646
Color image segmentation
[AD-A274027] p 2984 N94-25759
Endogeneous and exogenous control of visual selection: A review of the literature
[AD-A273761] p 2908 N94-25871
IRMA: A program for three-dimensional color display of data
[AD-A273811] p 2959 N94-25879
Combining shape and color information for 3D object recognition
[AD-A274123] p 2967 N94-27064
COLOR VISION
Endogeneous and exogenous control of visual selection: A review of the literature
[AD-A273761] p 2908 N94-25871
Colour object recognition
[ISBN-0-315-83684-9] p 2994 N94-26614
COLUMNS (PROCESS ENGINEERING)
Analytical method for estimation of the total amount of aromatic and poly aromatic compounds in diesel fuel
[PB94-123692] p 2759 N94-25907
COMBAT
Developing realistic cooperative behaviors for autonomous agents in air combat simulation
[AD-A274077] p 2937 N94-25774
COMBINATIONS (MATHEMATICS)
Blurred focal elements generalization of dempster's rule
[PB94-124278] p 2986 N94-26992
COMBINED CYCLE POWER GENERATION
Combined Cycles for Power Plants
[VKI-LS-1993-08] p 2830 N94-28077
Introduction to combined cycles p 2789 N94-28078
Thermodynamics of combined cycle plant
p 2831 N94-28079
Development of the gas turbine. Part 1: Design philosophy and performance p 2831 N94-28080
Steam plant for combined cycles: Heat recovery steam generators, design principles, and construction details
p 2831 N94-28083
Simulation: A tool for steam plant dynamic analysis
p 2831 N94-28084
Steam plant: Steam turbines for combined cycles
p 2831 N94-28085
Controls, monitoring and performance measurements
p 2831 N94-28086
Cooling towers for combined cycles: Design philosophy, performance testing, and operating problems
p 2832 N94-28087
Cooling towers for combined cycles: New developments to meet environmental requirements
p 2832 N94-28088
Clean coal technology p 2832 N94-28089
Integrated coal gasification combined cycle
p 2832 N94-28090
COMBUSTIBLE FLOW
Gordon Research Conference on the Physics and Chemistry of Laser Diagnostics in Combustion
[AD-A274609] p 2716 N94-26893
COMBUSTION
Combustion synthesis method p 2721 N94-25561
On the thermal ignition with variable pre-exponential factor
[DE93-616009] p 2713 N94-25913
Gordon Research Conference on the Physics and Chemistry of Laser Diagnostics in Combustion
[AD-A274609] p 2716 N94-26893
Annual conference on fire research, 1993: Book of abstracts
[PB94-121324] p 2717 N94-26907
Pressure-gain combustion
[DE94-002975] p 2719 N94-27712
COMBUSTION CHAMBERS
Development and implementation of a scramjet cycle analysis code with a finite-rate-chemistry combustion model for use on a personal computer
[AD-A273834] p 2673 N94-25617
Orbit transfer rocket engine technology program enhanced heat transfer combustor technology
[NASA-CR-189236] p 2700 N94-26156
Gaseous hydrogen/oxygen injector performance characterization
[NASA-CR-194464] p 2701 N94-26208
Computation of non-isentropic internal flows with variable density
[AD-A274848] p 2794 N94-26801
Pressure-gain combustion
[DE94-002975] p 2719 N94-27712
Broad specification fuels combustion technology program, phase 2
[NASA-CR-191066] p 2719 N94-27854
A numerical study of mixing and combustion in hypervelocity flows through a scramjet combustor model
p 2808 N94-27911
COMBUSTION CHEMISTRY
Theoretical determination of chemical rate constants using novel time-dependent methods
[NASA-CR-195221] p 2714 N94-26205
Laser probes of natural gas ignition chemistry
[PB94-128345] p 2717 N94-27226
COMBUSTION PHYSICS
Development and implementation of a scramjet cycle analysis code with a finite-rate-chemistry combustion model for use on a personal computer
[AD-A273834] p 2673 N94-25617
Microgravity ignition experiment p 2761 N94-25707
Characterization of acoustic effects on flame structures by beam deflection technique
[DE94-003240] p 2714 N94-26122
An apparatus for measurement of ignition and burning characteristics of metallic particles
[AD-A274815] p 2716 N94-26487
Gordon Research Conference on the Physics and Chemistry of Laser Diagnostics in Combustion
[AD-A274609] p 2716 N94-26893
Basic research on natural gas combustion phenomena
[PB94-129046] p 2717 N94-27256
The addition of molecular oxygen to hydroperoxy-propyl radicals
[DE94-003662] p 2760 N94-27725
COMBUSTION PRODUCTS
Combustion synthesis method p 2721 N94-25561
SP industry calorimeter for rate of heat release measurements up to 10MW
[PB94-124211] p 2811 N94-27044
Researches of the Electrotechnical Laboratory. No. 53: Spectral emission from combustion gas containing scattering media
[JTN-94-80603] p 2717 N94-27246
Gas turbine combustion and emission control
p 2831 N94-28082
Fibrous ceramic candle filter for particle removal in pressurized fluidized bed combustion
[PB94-133089] p 2876 N94-28383
Experimental studies of pressurised fluidised bed combustion at Helsinki University of Technology, 1991-1992
[PB94-133063] p 2876 N94-28394
Emissions of nitrogen oxides (NO(x) and N2O) in pressurized fluidized bed combustion
[PB94-133071] p 2876 N94-28395
COMBUSTION STABILITY
Technical Report of National Research Institute of Fisheries Engineering: Fishing Boat and Instrument, No. 12
[JTN-94-80595] p 2764 N94-27976
Computer aided data recording and analyzing system for the engine test p 2764 N94-27979
Engine starting and stopping p 2828 N94-28047
COMBUSTION TEMPERATURE
Extraterrestrial surface propulsion systems
p 2833 N94-25691
COMET NUCLEI
Comet nucleus and asteroid sample return missions
p 2689 N94-25692
COMET RENDEZVOUS ASTEROID FLYBY MISSION
Space science: Causes and impacts of cutbacks to NASA's outer solar system exploration missions. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives
[GAO/NSIAD-94-24] p 3106 N94-27418
COMETARY ATMOSPHERES
The kinetics and dynamics of the coma of Halley's comet
[NASA-CR-194828] p 3105 N94-28184
COMETS
Studies of extra-solar Oort Clouds and the Kuiper Disk
[NASA-CR-195242] p 3103 N94-26789
Cratering rates from lunar xenospherules
[DE94-003481] p 3106 N94-27007
Consequences of impacts of small asteroids and comets with Earth p 2889 N94-28301
Modulating terrestrial impacts from Oort cloud comets by the adiabatically changing galactic tides
p 2890 N94-28305
A general theory of impacts and mass extinctions, and the consequences of large-body impact on the Earth
p 2891 N94-28310
The crash of P/Shoemaker-Levy 9 into Jupiter and its implications for comet bombardment on Earth
p 2891 N94-28313
COMFORT
Lufthansa long range services: More simplicity
p 2663 N94-28246
COMMAND AND CONTROL
Component characterization and development 2
[AD-A274002] p 2765 N94-25660
Space Station technology testbed: 2010 deep space transport p 2687 N94-27368
Telecommand decoder specification
[ESA-PSS-04-151-ISSUE-1] p 2693 N94-27583
COMMAND LANGUAGES
Editing tree structures
[CWI-CS-R9264] p 2961 N94-26219
COMMAND MODULES
Assured crew return vehicle post landing configuration design and test p 2697 N94-25671
COMMERCE
Fabrication technology
[DE94-003017] p 2763 N94-26778
COMMERCIAL AIRCRAFT
Eagle RTS: A design of a regional transport
p 2671 N94-25709
A cost model for USAF acquisition of commercial aircraft for service in the special air mission fleet
[AD-A274012] p 3093 N94-25796
Methods for experimentally determining commercial jet aircraft landing parameters from video image data
[AD-A274207] p 2669 N94-27105
Effects of historical and predictive information on ability of transport pilot to predict an alert
[NASA-TM-4547] p 2673 N94-27864
Lufthansa Yearbook 1992
[DSK-9734-H-92] p 2660 N94-28230
Lufthansa long range services: More simplicity
p 2663 N94-28246
A symbol of reliability: Ju 52 p 2663 N94-28250
COMMUNICATION NETWORKS
Development of satellite telecommunications during the period 1990 - 2005
[CRANFIELD-AERO-9301] p 2765 N94-25639
Modeling and simulation of a fiber distributed data interface local area network
[AD-A274838] p 3098 N94-26500
Example of the EXPANSE signalling protocol
[PB94-125283] p 2771 N94-26872
The Communication Link and Error ANalysis (CLEAN) simulator
[NASA-CR-195243] p 2968 N94-27168
MILCOM 92 and standardization for HF-communication. A study tour to the USA in October 1992
[PB94-124427] p 2774 N94-27219
Vision 21: Interdisciplinary Science and Engineering in the Era of Cyberspace
[NASA-CP-10129] p 2685 N94-27358
Efficient massively parallel simulation of dynamic channel assignment schemes for wireless cellular communications
[NASA-CR-191593] p 2971 N94-27558
COMMUNICATION SATELLITES
Low Earth orbit communications satellite
p 2698 N94-25701
Automating satellite range scheduling
[AD-A273829] p 2694 N94-25738
Charge efficiency of Ni/H2 cells during transfer orbit of Telstar 4 satellites p 2862 N94-28117
COMMUNICATION THEORY
Communication complexity of t-intersection problems in generalized Boolean algebras
[PB94-126646] p 2996 N94-26917
COMMUTATION
Quantum group and Manin plane related to a colored braid group representation
[DE94-601509] p 3072 N94-26461
COMMUTER AIRCRAFT
Design of the advanced regional aircraft, the DART-75
p 2671 N94-25708
Impact of improved materials and cabin water spray on commuter aircraft postcrash fire survivability
[AD-A274421] p 2660 N94-27081
COMPARISON
Saving comparisons in the Crochemore-Perrin string matching algorithm
[CWI-CS-R9322] p 2971 N94-27550
COMPATIBILITY
A materials compatibility study in FM-1, a liquid component of a paste extrudable explosive
[DE94-001166] p 2759 N94-26198
Compatibility of refrigerants and lubricants with engineering plastics
[DE94-004959] p 2756 N94-27692
COMPENSATORS
Design of a subsonic envelope flight control system for the Vista F-16 using quantitative feedback theory
[AD-A274057] p 2676 N94-25771
COMPETITION
Space Habitat, assembly and repair facility
p 2691 N94-25696

COMPILERS

The ergonomics of software porting: Automatically configuring software to the runtime environment or everything you wanted to know about your C compiler but didn't know who to ask
[CWI-CS-R9266] p 2961 N94-26221

Programming in Fortran M
[DE94-002756] p 2963 N94-26407

Usefulness of compile-time restructuring of LGDF programs in throughput-critical applications
[AD-A274915] p 2963 N94-26530

Fast incremental compiler transformations for multiple instruction retry
[NASA-CR-195209] p 2964 N94-26680

Deferred compilation: The automation of run-time code generation
[AD-A274124] p 2967 N94-27065

Implementation and performance of a domain decomposition algorithm in Sisal
[DE94-002012] p 2981 N94-27092

ARM: Abstract Rewriting Machine
[CWI-CS-R9330] p 2974 N94-27794

COMPLEX COMPOUNDS

Fundamental study on new synthetic technology by phthalocyanine complexes p 2721 N94-25569

Heavy-electron behavior in large coordination compounds CeZn11 and UZn12
[REPT-A-2663] p 3049 N94-25614

Transition metal activation and functionalization of carbon-hydrogen bonds
[DE94-003650] p 2715 N94-26369

Transition metals in highly correlated discotic phases: Designing metallomesogens with selected intermolecular organizations
[AD-A274695] p 2736 N94-26452

Preparation, characterization, and thermal behaviour study of lanthanides (3) and yttrium (3) 4-methoxy benzylidene pyruvate in solid state
[DE94-604079] p 3068 N94-27697

COMPLEX NUMBERS

Q - difference intertwining operators for a Lorentz quantum algebra
[DE94-602559] p 2997 N94-27023

COMPLEX SYSTEMS

On modeling and controlling intelligent systems
[DE94-002446] p 2988 N94-27706

Practical problems in aggregating expert opinions
[DE94-002623] p 3094 N94-27707

Visit to CERMA: Centre d'Etudes et de Recherches de Medecine Aerospatiale, Centre for Studies and Research in Aviation and Space Medicine, Bretigny sur Orge, France, November 16-18, 1992
[PB94-132990] p 2937 N94-28392

COMPLEX VARIABLES

A possible way of connecting the Grassmann variables and the number of generation
[DE94-601624] p 2990 N94-25838

COMPLEXITY

A strange application of Kolmogorov complexity
[CWI-CS-R9328] p 2973 N94-27737

COMPONENT RELIABILITY

Aircraft turbine engine reliability and inspection investigations
[AD-A274860] p 2673 N94-26176

Investigation of ACC/CCI tunnel diodes
[AD-A274549] p 2785 N94-26845

COMPOSITE MATERIALS

Computer modelling of cyclic deformation of high-temperature materials
[AD-A273852] p 2704 N94-25608

A revolutionary approach to composite construction and flight management systems for small, general aviation airplanes p 2671 N94-25714

Solar powered multipurpose remotely powered aircraft
p 2671 N94-25719

Composite raw materials for the building industry
[VTT-TIED-1433] p 2708 N94-26544

Computational mechanics
[DE94-003015] p 2965 N94-26775

DUSOL: Improved software for analysis of ultrasonic velocity data on anisotropic materials
[NPL-DMM(A)-104] p 2965 N94-26816

Method for improving electromagnetic shielding performance of composite materials by electropulsing
[AD-D016050] p 2709 N94-27076

Method for improving electromagnetic shielding performance of composite materials by electroplating
[AD-D016038] p 2709 N94-27091

High temperature tension test equipment of heat resistant composite materials
[NAL-TM-652] p 2710 N94-27255

List of papers published by the members of Institute for Materials Research, Tohoku University 1992
[JTN-94-80608] p 3118 N94-27355

Series solution for a cylindrical composite shell subject to axisymmetric loadings
[ISBN-0-315-60559-6] p 2844 N94-27810

Mechanically fastened composite laminates subjected to combined bearing-bypass and shear loading
p 2712 N94-27914

Analytic solution for the dyadic Green's function of a nonreciprocal uniaxial bianisotropic medium
[PB94-133162] p 2779 N94-28388

COMPOSITE STRUCTURES

Design and life-time of polymer matrix composite structures: Summary
[VTT-TIED-1415] p 2707 N94-26260

The structural behaviour of the steel or composite concrete and steel frames and the connections of frame members during the fire: A literature review
[VTT-TIED-1437] p 2837 N94-26307

Formulae for the buckling of simply-supported corrugated panels of orthotropic material under shear load
[PB94-126547] p 2840 N94-26911

Proceedings of Damping 1993, volume 2
[AD-A274227] p 2840 N94-26953

Wing design for a civil tiltrotor transport aircraft: A preliminary study p 2671 N94-27917

COMPOSITE WRAPPING

Composite leading edge/spar member for an aircraft control surface
[CA-PATENT-1-325-765] p 2669 N94-27273

COMPRESSIBILITY

Design and test of postbuckled stiffened curved plates: A literature survey
[PB94-126521] p 2840 N94-26961

COMPRESSIBILITY EFFECTS

Compressibility effects on rotor forces in the leakage path between a shrouded pump impeller and its housing
p 2796 N94-27379

COMPRESSIBLE BOUNDARY LAYER

Unified approach for direct and inverse boundary layer prediction using cubic spline collocation
p 2653 N94-28326

Transition for three-dimensional, compressible boundary layers p 2653 N94-28327

Euler and Navier-Stokes wing/fuselage computations of the De Havilland Dash 8 aircraft p 2654 N94-28329

COMPRESSIBLE FLOW

Computational investigation of the compressible dynamic stall characteristics of the Sikorsky SSC-A09 airfoil
[AD-A274867] p 2644 N94-26191

On prediction of equilibrium states in homogeneous compressible turbulence
[NASA-CR-4570] p 2792 N94-26467

New constitutive equation for the volume viscosity in fluids
[NASA-TM-109104] p 2798 N94-27867

Unsteady three dimensional Euler solutions on moving grids p 2657 N94-28347

COMPRESSIBLE FLUIDS

Compressibility effects on rotor forces in the leakage path between a shrouded pump impeller and its housing
p 2796 N94-27379

COMPRESSION LOADS

Design of cold-formed HSS channels for bending and eccentric compression: Bending in the plane of symmetry
[VTT-TIED-1403] p 2762 N94-25622

Investigation of compressive behavior for metal matrix composites with a circular hole
[AD-A273835] p 2705 N94-25739

Investigation of tension-compression fatigue behavior of a cross-ply metal matrix composite at room and elevated temperatures
[AD-A273731] p 2706 N94-25999

An experimental study on the effects of compressive stress on the fatigue crack growth of low-alloy steel
[DE94-004447] p 2737 N94-26582

Behaviour modification of space trusses
[ISBN-0-315-84701-8] p 2842 N94-27315

Contact stress in disc cams with roller followers
[ESDU-93001] p 2829 N94-28055

COMPRESSION TESTS

Influence of embedded optical fibers on compressive strength of advanced composites
[AD-A273775] p 2705 N94-25859

The effects of embedded internal delaminations on composite laminate compression strength; an experimental review
[NASA-TM-108440] p 2707 N94-26127

A constitutive model for layered wire mesh and aramid cloth fabric
[DE94-003275] p 2708 N94-26796

Computer simulation and experiments on the quasi-static mechanics and transport properties of granular materials
[AD-A274192] p 2823 N94-27104

Fatigue resistance of unnotched and post impact(+/-30 deg/0 deg) 3-D braided composites
[NASA-CR-191590] p 2711 N94-27433

COMPRESSION WAVES

Review of tokamak experiments on direct electron heating and current drive with fast waves
[DE94-004185] p 3041 N94-25801

COMPRESSIVE STRENGTH

Investigation of compressive behavior for metal matrix composites with a circular hole
[AD-A273835] p 2705 N94-25739

Influence of embedded optical fibers on compressive strength of advanced composites
[AD-A273775] p 2705 N94-25859

The effects of embedded internal delaminations on composite laminate compression strength; an experimental review
[NASA-TM-108440] p 2707 N94-26127

Fatigue resistance under tension-compression of laminates IM6/5245C and AS4/3501-6
[IAR-CR-25] p 2708 N94-26711

Aluminum alloy 8090-T8771 thick plate material characterization
[AD-A274146] p 2987 N94-27077

COMPRESSOR BLADES

Effects of crenulations on three dimensional losses in a linear compressor cascade
[AD-A273778] p 2790 N94-25862

COMPRESSORS

Dynamic response of a compressor research facility
[AD-A273836] p 2679 N94-25740

Compressor stability p 2828 N94-28046

Transient model applications. 1: Compressor heat soak/clearance effects modeling p 2828 N94-28048

Transient model applications. 2: Compressor stall modeling methods p 2829 N94-28049

A review of recent aeroelastic analysis methods for propulsion at NASA Lewis Research Center
[NASA-TP-3406] p 2846 N94-28227

COMPTON EFFECT

Electroweak and other interactions in medium-energy nuclear physics
[DE94-004161] p 3027 N94-27689

COMPUTATION

Adaptive path planning in changing environments
[DE94-003269] p 2985 N94-26462

Fast methods for computation with algebraic numbers
[ISBN-0-315-57888-2] p 2998 N94-27269

The calculation for energy balance of heating plasmas by Alfven waves
[DE94-604994] p 3049 N94-27855

Computation of static pressure downstream of a normal shock for hypersonic flight (ambient temperature known)
[ESDU-93020] p 2649 N94-28091

Examples of excrescence drag prediction for typical wing components of a subsonic transport aircraft at the cruise condition
[ESDU-93032] p 2649 N94-28144

Hessenberg matrices in Krylov subspaces and the computation of the spectrum
[PB94-133170] p 3001 N94-28389

COMPUTATIONAL CHEMISTRY

High performance computing in chemistry and massively parallel computers: A simple transition?
[DE94-004318] p 2982 N94-27600

COMPUTATIONAL FLUID DYNAMICS

Experimental contribution to the study of secondary flows in centrifugal turbopump stator components
[ECL-92-35] p 2789 N94-25654

Riemann solvers for solving the incompressible Navier-Stokes equations using the artificial compressibility method
[CRANFIELD-AERO-9208] p 2790 N94-25778

Shock wave interaction with L-shaped structures
[AD-A273774] p 2790 N94-25858

A numerical study of high-speed missile configurations using a block-structured parallel algorithm
[AD-A273776] p 2979 N94-25860

Rendering of three-dimensional data sets derived from finite-difference and spectral methods
[AD-A273724] p 3096 N94-25997

Calculation of viscous drag of two low angle of attack supercritical profiles
[FFA-TN-1984-22] p 2644 N94-26104

Performance of renormalization group algebraic turbulence model on boundary layer transition simulation
[NASA-CR-194466] p 2644 N94-26131

Comments regarding two upwind methods for solving two-dimensional external flows using unstructured grids
[NASA-TM-109078] p 2644 N94-26154

Computational investigation of the compressible dynamic stall characteristics of the Sikorsky SSC-A09 airfoil
[AD-A274867] p 2644 N94-26191

Feature isolation and quantification of evolving datasets
[NASA-CR-195230] p 2961 N94-26207

A positive finite-difference advection scheme applied on locally refined grids
[CWI-NM-R9309] p 2867 N94-26216

Modelling of ionisation reactions and of the resulting electric fields in one-dimensional hypersonic shock waves with the direct simulation Monte Carlo method
[IC-AERO-92-01] p 2644 N94-26248

Potential capabilities of Reynolds stress turbulence model in the COMMIX-RSM code
[DE94-003716] p 2792 N94-26331

On prediction of equilibrium states in homogeneous compressible turbulence
[NASA-CR-4570] p 2792 N94-26467

A numerical study of quantized vortices in HeII
[ISBN-9-03-860232-4] p 2792 N94-26479

A comparative study of serial and parallel aeroelastic computations of wings
[NASA-TM-108805] p 2645 N94-26538

Computational prediction of isolated performance of an axisymmetric nozzle at Mach number 0.90
[NASA-TM-4506] p 2646 N94-26547

Program to develop a performance and heat load prediction system for multistage turbines
[NASA-CR-195223] p 2674 N94-26588

Computational strategies for three-dimensional flow simulations on distributed computer systems
[NASA-CR-195249] p 2793 N94-26595

Pump CFD code validation tests
[NASA-CR-193939] p 2822 N94-26597

Influence of the transonic doublet in the farfield of a lifting airfoil
[IAR-AN-78] p 2647 N94-26702

Computation of non-isentropic internal flows with variable density
[AD-A274848] p 2794 N94-26801

New variational techniques for acoustic radiation and scattering from elastic shell structures
[AD-A274599] p 3010 N94-26889

A parallel computational fluid dynamics unstructured grid generator
[AD-A274129] p 2795 N94-27119

A second-order shock-adaptive Godunov scheme based on the generalized Lagrangian formulation
[ISBN-0-315-84549-X] p 2795 N94-27307

Bulk-Flow Analysis, part A
[NASA-CR-193911-PT-A] p 2796 N94-27377

Parallel implicit unstructured grid Euler solvers
[NASA-CR-191594] p 2999 N94-27434

Agglomeration multigrid for the three-dimensional Euler equations
[NASA-CR-191595] p 2999 N94-27557

A study on heat transfer in a scramjet leading edge model
[NAL-TR-1187T] p 2675 N94-27608

Thermocapillary flow with evaporation and condensation and its effect on liquid retention in low-G fluid acquisition devices
[NASA-TP-3463] p 2797 N94-27639

NAS technical summaries. Numerical aerodynamic simulation program, March 1992 - February 1993
[NASA-RP-1321] p 3118 N94-27764

Coupled 2-dimensional cascade theory for noise an d unsteady aerodynamics of blade row interaction in turbofans. Volume 2: Documentation for computer code CUP2D
[NASA-CR-4506-VOL-2] p 2675 N94-27778

Numerical simulation of receptivity and transition in a boundary layer on a flat plate with a suction hole
[NASA-CR-195708] p 2798 N94-27782

Time-step enlargement and optimal smoothing in Runge-Kutta time-integration algorithms by implicit and explicit smoothing
[NLR-TP-92221-U] p 2798 N94-27799

A comprehensive comparison of turbulence models in the far wake p 2808 N94-27899

Computational and Experimental Assessment of Jets in Cross Flow
[AGARD-CP-534] p 2799 N94-28003

Fifty years of jet in cross flow research
p 2799 N94-28004

Numerical investigation of thrust vectoring by injection of secondary air into nozzle flows p 2801 N94-28013

Transitional flight characteristics of a geometrically simplified STOVL model p 2672 N94-28035

Analysis of cooling jets near the leading edge of turbine blades p 2676 N94-28037

Abstracts of papers presented at the 4th CASI Aerodynamics Symposium
[ISBN-0-920203-01-9] p 2651 N94-28315

Application of the MBTEC Euler code to the Challenger and the CF-18 complete aircraft configurations
p 2653 N94-28324

Unified approach for direct and inverse boundary layer prediction using cubic spline collocation
p 2653 N94-28326

Transition for three-dimensional, compressible boundary layers p 2653 N94-28327

Euler and Navier-Stokes wing/fuselage computations of the De Havilland Dash 8 aircraft p 2654 N94-28329

Application of the influence function method using the interference distributed loads code to prediction of store aerodynamic load during separation from the CF-18 fighter aircraft p 2654 N94-28330

COMPUTATIONAL GEOMETRY

Center for computation and visualization of geometric structures
[DE94-001882] p 2991 N94-25928

Parallel computational geometry on analog Hopfield networks
[ISBN-0-315-84093-5] p 2980 N94-26635

Bifurcation sequences at 1:4 resonance: An inventory
[PB94-125408] p 2997 N94-27028

Lisp interface to geometric modelling operations
[PB94-133121] p 3001 N94-28398

COMPUTATIONAL GRIDS

Comments regarding two upwind methods for solving two-dimensional external flows using unstructured grids
[NASA-TM-109078] p 2644 N94-26154

A positive finite-difference advection scheme applied on locally refined grids
[CWI-NM-R9309] p 2867 N94-26216

VLUGR2: A vectorized local uniform grid refinement code for PDE's in 2D
[CWI-NM-R9306] p 2965 N94-26772

Local uniform grid refinement and systems of coupled partial differential equations
[CWI-NM-R9307] p 2995 N94-26773

Using the TSAR electromagnetic modeling system
[DE94-002617] p 2771 N94-26803

Grid-independent convergence based on preconditioning techniques
[PB94-125358] p 2997 N94-27000

Combining shape and color information for 3D object recognition
[AD-A274123] p 2967 N94-27064

A parallel computational fluid dynamics unstructured grid generator
[AD-A274129] p 2795 N94-27119

Genetic algorithms applied to a mission routing problem
[AD-A274130] p 2968 N94-27120

Numerical Analysis Methods of Surface Cracks
[VTT-PUBS-119] p 2841 N94-27186

Development of an automated fracture assessment system for nuclear structures (appendix 1/1)
p 2841 N94-27187

Quality assurance for fracture mechanical finite element analyses (appendix 3/1) p 2841 N94-27189

High-lift system analysis method using unstructured meshes
[NLR-TP-92351-U] p 2647 N94-27554

Agglomeration multigrid for the three-dimensional Euler equations
[NASA-CR-191595] p 2999 N94-27557

Prediction of undsteady flows in turbomachinery using the linearized Euler equations on deforming grids
[NASA-CR-195285] p 2675 N94-27654

Locating tie-points on a grid p 2978 N94-27906

Computation of transonic viscous flow past the NTF 65-degree Delta Wing p 2659 N94-27930

An enhanced global spectral model
[PL-TR-92-2011] p 2898 N94-28223

Viscous airfoil computations using adaptive structured grids p 2655 N94-28337

Solution of the Euler equations using unstructured grids p 2656 N94-28338

Thin-layer Navier-Stokes computations for multi-element airfoils p 2656 N94-28341

Techniques for accurately solving unsteady shock waves and contact discontinuities p 2656 N94-28342

Recent advances in the spectral element method
p 2657 N94-28348

Multigrid solutions of the 2D Euler/Navier-Stokes equations on unstructured meshes
p 2658 N94-28349

COMPUTER AIDED DESIGN

Creation of prototype aircrew protection equipment based on face anthropometry
[AD-A273865] p 2940 N94-25611

Development of a 4-bit parallel analog-to-digital converter and a four-quadrant double-balanced mixer using heterojunction bipolar transistor technology
[AD-A274074] p 2947 N94-25648

Systematic Propulsion Optimization Tools (SPOT)
p 2976 N94-25666

IGES 4.0 to LCAD translator for CSG models
[AD-A274013] p 2957 N94-25753

Object-oriented design and implementation of a parallel Ada simulation system
[AD-A274119] p 2979 N94-25906

Center for computation and visualization of geometric structures
[DE94-001882] p 2991 N94-25928

The MUSA design methodology
[CWI-CS-R9265] p 3097 N94-26220

Hypermedia support for engineering design systems: Application to fatigue analysis
[VTT-TIED-1432] p 2837 N94-26255

Cad of GeO2-SiO2 double-layer core dispersion-shifted single-mode fibre
[DE93-634325] p 3035 N94-26383

Computer code for interactive rotorcraft preliminary design using a harmonic balance method for rotor trim
[AD-A274924] p 2668 N94-26531

Partitioning structural VHDL circuits for parallel execution on hypercubes
[AD-A274390] p 2785 N94-26830

Rapid prototyping of application specific signal processors (RASSP)
[AD-A274324] p 2772 N94-26884

Rocket engine numerical simulation
p 2688 N94-27375

Interactive shape metamorphosis
[NASA-CR-191597] p 2970 N94-27417

Validation tests of TOPSIM 4
[ESA-STM-249] p 2972 N94-27582

Thermal/Structural Tailoring of Engine Blades (T/STAEBL): User's manual
[NASA-CR-194461] p 2843 N94-27776

Engine simulation systems p 2829 N94-28054

A new approach to turboprop forward nacelle design
p 2655 N94-28336

COMPUTER AIDED MANUFACTURING

Automatic assembly planning and its role in agile manufacturing: A Sandia perspective
[DE94-002291] p 2821 N94-25970

The National Center for Advanced Information Components Manufacturing: Program update
[DE94-002647] p 2960 N94-26118

Distributed Nd:YAG laser welding and process control in inert glove boxes
[DE94-002629] p 2818 N94-26605

Open communication in manufacturing automation
[PB94-132479] p 2976 N94-28377

COMPUTER AIDED TOMOGRAPHY

Numerical simulation of tomographic reconstruction for the study of turbulence using optical wavefront sensor measurements
[AD-A273851] p 2789 N94-25587

X ray computed tomography for emerging aerospace materials and processes development
[AD-A273721] p 2705 N94-25779

Materials characterization on efforts for ablative materials
[NASA-CR-193929] p 2756 N94-27230

COMPUTER ANIMATION

An interactive, physically-based simulation system
[ISBN-0-315-83884-1] p 2963 N94-26616

COMPUTER ASSISTED INSTRUCTION

Knowledge organization in intelligent tutoring systems for diagnostic problem solving in complex dynamic domains
[AD-A273986] p 2984 N94-25899

Integration of interactive interfaces with intelligent tutoring systems: An implementation
[AD-A273869] p 2985 N94-25966

Production of a computer based lesson teaching employees how to use an air data tester
[ISBN-0-315-84708-5] p 2969 N94-27316

COMPUTER COMPONENTS

MATRA Marconi Space: The Silex on-board processor and on-board software p 2950 N94-26726

COMPUTER DESIGN

Design of a computer expert system for adhesive selection using artificial intelligence techniques
[AD-A274715] p 2751 N94-26434

High performance flight computer developed for deep space applications p 2949 N94-26718

Fault tolerant real-time processing system for space use p 2949 N94-26720

Design principles of onboard management of a Sun synchronous satellite p 2950 N94-26722

MATRA Marconi Space: The Silex on-board processor and on-board software p 2950 N94-26726

A Multitransputer Parallel Processing System (MTPPS)
[DE94-604652] p 2981 N94-26903

COMPUTER GRAPHICS

Module interconnection frameworks for a real-time spreadsheet
[AD-A273853] p 2956 N94-25588

IGES 4.0 to LCAD translator for CSG models
[AD-A274013] p 2957 N94-25753

ObjectSim: A reusable object oriented DIS visual simulation
[AD-A274030] p 2958 N94-25767
Graphical programming at Sandia National Laboratories
[DE94-003803] p 2958 N94-25818
A virtual environment for satellite modeling and orbital analysis in a distributed interactive simulation
[AD-A274114] p 2694 N94-25904
Center for computation and visualization of geometric structures
[DE94-001882] p 2991 N94-25928
Weapon system sensor integration for a DIS-compatible virtual cockpit
[AD-A274088] p 2672 N94-26021
NPSNET-4: A real-time, 3D distributed interactive virtual world
[AD-A274942] p 2961 N94-26298
Optimization of Vector Product Format (VPF) data for map background display in army tactical systems
[AD-A274687] p 2848 N94-26446
Benefits estimation for simulation systems used for aircrew training in a multiship environment
[AD-A274313] p 2938 N94-26882
Encoding approaches for data link transmission of weather graphics
[AD-A274497] p 2772 N94-26963
Interactive control of a parallel simulation from a remote graphics workstation
[AD-A274217] p 2981 N94-27070
Users guide for GRIKURV: A code for drawing graphs
[PB94-123593] p 2968 N94-27154
Data analysis and data fusion for intelligence analysis and decision support. Research plan 1993-2000
[PB94-123569] p 3005 N94-27173
Developments in the application of the geometrical theory of diffraction and computer graphics to aircraft inter-antenna coupling analysis
[ISBN-0-315-84643-7] p 2776 N94-27308
Interactive shape metamorphosis
[NASA-CR-191597] p 2970 N94-27417
Thirteen ways to say nothing with scientific visualization
[NASA-CR-195280] p 2970 N94-27542
Development of Calcomp compatible interface library 'piflib' on X Window System
[DE94-701190] p 2973 N94-27702
ACES spectral display software: User manual
[SKL-1600-99-002] p 2973 N94-27762
ActorStudio: An interactive user interface editor
[PB94-132859] p 2976 N94-28356

COMPUTER INFORMATION SECURITY
Vulnerability assessment using a fuzzy logic based method
[AD-A274075] p 2957 N94-25649
Development and analysis of secure embedded software
[VTT-TIED-1430] p 2961 N94-26254
An efficient off-line electronic cash system based on the representation problem
[CWI-CS-R9323] p 2776 N94-27551

COMPUTER NETWORKS
Standardizing exchange formats
[DE93-616798] p 3095 N94-25751
Full-text information services at the desktop
[DE94-003728] p 3096 N94-25813
Predicting nonlinear time series
[AD-A274051] p 2990 N94-25834
A VHDL register transfer level model of the linear token passing multiplex data bus protocol for the high speed data bus
[AD-A273734] p 2980 N94-26009
Design and specification of the Xpress transfer high-speed protocol
[AD-A274941] p 3097 N94-26297
Federal Information Exchange (FEDIX) user's guide: Fall 1993, Version 5.0/Release 1.0
[DE94-003826] p 3097 N94-26350
Usefulness of compile-time restructuring of LGDF programs in throughput-critical applications
[AD-A274915] p 2963 N94-26530
The High Performance Storage System
[DE94-004351] p 2948 N94-26578
Vision 21: Interdisciplinary Science and Engineering in the Era of Cyberspace
[NASA-CP-10129] p 2685 N94-27358
Proceedings of Workshop on Distributed Computing and Network
[DE94-701165] p 2983 N94-27804
Planning for the future of the DREnet: The way ahead
[NRNS-002-00-001-01] p 2983 N94-28042

COMPUTER PROGRAM INTEGRITY
Development and analysis of secure embedded software
[VTT-TIED-1430] p 2961 N94-26254
Software assurance standard
[NASA-TM-109705] p 2975 N94-27992

COMPUTER PROGRAMMING
Automating satellite range scheduling
[AD-A273829] p 2694 N94-25738
Graphical programming at Sandia National Laboratories
[DE94-003803] p 2958 N94-25818
The television as robot servant
[AD-A273985] p 2984 N94-25898
Set based analysis of arithmetic
[AD-A274112] p 3002 N94-25903
Developing a sophisticated user interface to support domain-oriented application composition and generation systems
[AD-A274080] p 2960 N94-25994
Software redesign for usability: A case study
[DE94-003704] p 2960 N94-26048
Deductive computer programming
[AD-A274966] p 2962 N94-26303
Adaptive path planning in changing environments
[DE94-003269] p 2985 N94-26462
Scheduling tasks with unpredictable timing parameters in hard real-time systems p 2951 N94-26728
Vcalc: A 3-space vector calculator
[AD-A274520] p 2965 N94-26831
Development of a performance evaluation tool (MMSOFE) for detection of failures with Multiple Model Adaptive Estimation (MMAE)
[AD-A274218] p 2665 N94-27071
Ma42: A new frontal code for solving sparse unsymmetric systems
[PB94-124302] p 2998 N94-27115
A method for populating the knowledge base of AFIT's domain-oriented application composition system
[AD-A274128] p 3099 N94-27118
Sculpting in cyberspace: Parallel processing the development of new software p 2686 N94-27365
Expressiveness results for process algebras
[CWI-CS-R9301] p 3000 N94-27577
A theory for simulator tools
[CWI-CS-R9302] p 2972 N94-27578
ARM: Abstract Rewriting Machine
[CWI-CS-R9330] p 2974 N94-27794
Software assurance standard
[NASA-TM-109705] p 2975 N94-27992

COMPUTER PROGRAMS
Study on knowledge extraction and systematization for material design p 2727 N94-25568
Predicting antenna parameters from antenna physical dimensions
[AD-A273893] p 3012 N94-25655
INM, Integrated Noise Model. Version 4.11: User's guide, supplement
[AD-A273885] p 3009 N94-25731
Graphical programming at Sandia National Laboratories
[DE94-003803] p 2958 N94-25818
A data processing system at the hybrid spectrometer
[DE93-616801] p 3013 N94-25828
IRMA: A program for three-dimensional color display of data
[AD-A273811] p 2959 N94-25879
The television as robot servant
[AD-A273985] p 2984 N94-25898
Set based analysis of arithmetic
[AD-A274112] p 3002 N94-25903
A research program on radiative transfer model development in support of the ARM program
[DE94-001146] p 2767 N94-25950
Technical description of the Vulcano software library
[FFI-93/7024] p 2767 N94-26105
The proceedings of the KEK FEL Simulation Code Workshop
[DE93-520378] p 2816 N94-26112
Analysis and optimization of preliminary aircraft configurations in relationship to emerging agility metrics
[NASA-CR-195228] p 2668 N94-26235
Red's natural editor: A program designed to edit FORTRAN programs
[DE94-003271] p 2962 N94-26318
PDEF: A standard file format for data interchange
[AD-A274694] p 3098 N94-26451
Computer code for interactive rotorcraft preliminary design using a harmonic balance method for rotor trim
[AD-A274924] p 2668 N94-26531
User's guide for the frequency domain algorithms in the LIFE2 fatigue analysis code
[DE94-004678] p 2838 N94-26563
New FORTRAN computer programs to acquire and process isotopic mass spectrometric data: Operator's manual
[DE94-003174] p 2965 N94-26784
A preliminary method for atmospheric soundings in real time using satellite and ground-based remotely sensed data
[AD-A274381] p 2880 N94-26828
Vcalc: A 3-space vector calculator
[AD-A274520] p 2965 N94-26831
Computer program for numerical evaluation of the performance of an overmoded TM01 circular to TE10 rectangular waveguide mode converter
[AD-A274548] p 2771 N94-26844
The NOGAPS ten year AMIP integration
[AD-A274332] p 2900 N94-26887
Alternative architectures for domain-oriented application composition and generation systems
[AD-A274180] p 2968 N94-27128
Users guide for GRIKURV: A code for drawing graphs
[PB94-123593] p 2968 N94-27154
Basic research on natural gas combustion phenomena
[PB94-129046] p 2717 N94-27256
Emerging computer technologies and the news media of the future p 2688 N94-27372
Computer code for controller partitioning with IFPC application: A user's manual
[NASA-CR-195291] p 2678 N94-27414
Design and implementation of a DBMS performance assessment tool
[CWI-CS-R9270] p 2972 N94-27576
PATRAN 2.5/EAL interface guide
[NASA-TM-109053] p 2972 N94-27655
Parallel computing for probabilistic response analysis of high temperature composites
[NASA-CR-194467] p 2843 N94-27656
Study of the kinematic and dynamic characteristics of a wormgear transmission for helicopter applications
[NASA-CR-195287] p 2826 N94-27657
Hardware and software reliability estimation using simulations
[NASA-CR-187588] p 2973 N94-27663
Refinement for fault-tolerance: An aircraft hand-off protocol
[NASA-CR-195697] p 2666 N94-27768
An optimization program based on the method of feasible directions: Theory and users guide
[NASA-TM-4552] p 2845 N94-27865
Proton irradiation on materials p 3030 N94-27898
Space transportation vehicle design evaluation using saturated designs p 2693 N94-27928
Visualization techniques to aid in the analysis of multispectral astrophysical data sets
[NASA-CR-195268] p 3105 N94-27932
Software assurance standard
[NASA-TM-109705] p 2975 N94-27992
Gas Turbine Engine Transient Behaviour
[VKI-LS-1993-06] p 2828 N94-28043
Transient engine simulation p 2829 N94-28052
Engine simulation systems p 2829 N94-28054
Thermal modeling of NiH2 batteries
p 2862 N94-28113
Parameter estimation of linear systems from frequency response measurements (computer program)
[ESDU-93016] p 2976 N94-28137

COMPUTER STORAGE DEVICES
High-speed, high-density, coherent time-domain optical memory
[AD-A274249] p 3037 N94-27010
Ferroelectric fluoride memory FET development
[AD-A274341] p 2785 N94-27057
Interactive control of a parallel simulation from a remote graphics workstation
[AD-A274217] p 2981 N94-27070

COMPUTER SYSTEMS DESIGN
System software and tools for high performance computing environments: A report on the findings of the Pasadena Workshop
[DE94-003918] p 2956 N94-25602
The High Performance Storage System
[DE94-004351] p 2948 N94-26578
Fast incremental compiler transformations for multiple instruction retry
[NASA-CR-195209] p 2964 N94-26680
Computing in space: Issues and answers
p 2948 N94-26714
Development of a MIL-STD-1750 microprocessor system for space applications p 2949 N94-26715
On-board computer for control subsystem of satellite
p 2949 N94-26716
Design principles of onboard management of a Sun synchronous satellite p 2950 N94-26722
PRONAOS flight software: A real-time application for a balloonborne scientific gondola p 2950 N94-26725
Formal methods for dependable real-time systems
p 2953 N94-26740
Developing with Ada using HOOD design methodology
p 2953 N94-26741
Ada reusable software for satellite on-board data handling p 2953 N94-26743

Virtual data
[DE94-002718] p 2986 N94-26807
Trace-based compositional proof theory for fault tolerant distributed systems
[PB94-126737] p 2966 N94-26971
Proceedings of the Third Workshop Computersystems: Research Forum on Design, Realization and Use of Computersystems
[ISBN-90-6144-995-2] p 2954 N94-27191
VENI, video, VICI: The merging of computer and video technologies p 2686 N94-27362
Emerging computer technologies and the news media of the future p 2688 N94-27372
Schema integration in object-oriented databases
[CWI-CS-R9320] p 2970 N94-27548
Proceedings of Workshop on Distributed Computing and Network
[DE94-701165] p 2983 N94-27804
Comparison of Object-Oriented Analysis and Design Methods: A Collection of Papers
[MEMO-INF-92-69] p 2975 N94-27936
A formal approach to the comparison of object-oriented analysis and design methodologies
p 2975 N94-27937
Object-oriented development methods
p 2975 N94-27938

COMPUTER SYSTEMS PERFORMANCE
Performance measurement of three commercial object-oriented database management systems
[AD-A274028] p 3096 N94-25765
Source code for the OO1 benchmark and the AFIT simulation benchmark
[AD-A274035] p 2958 N94-25799
Achieving high performance on the Intel Paragon
[DE94-003108] p 2979 N94-25953
Fast incremental compiler transformations for multiple instruction retry
[NASA-CR-195209] p 2964 N94-26680
Real-Time Embedded Processing for Space Applications
[ISBN-2-85428-335-X] p 2948 N94-26713
Tool for performance analysis and off-line prediction of timing behaviour p 2952 N94-26732
Early real-time performance measurements on the Columbus processor system p 2952 N94-26736
Arithmetic performances of onboard computers
p 2952 N94-26738
Verification and validation of the on-board software real time requirements p 2953 N94-26739
Modeling systems by probabilistic process algebra: An event structures approach
[PB94-125259] p 3004 N94-26867
Shared virtual memory and generalized speedup
[NASA-CR-191592] p 2969 N94-27416
Design and implementation of a DBMS performance assessment tool
[CWI-CS-R9270] p 2972 N94-27576

COMPUTER SYSTEMS PROGRAMS
System software and tools for high performance computing environments: A report on the findings of the Pasadena Workshop
[DE94-003918] p 2956 N94-25602
Developing a sophisticated user interface to support domain-oriented application composition and generation systems
[AD-A274080] p 2960 N94-25994
Developing a graphical user interface to support a real-time digital signal processing system
[AD-A274032] p 2960 N94-26018
Fault tolerant real-time processing system for space use p 2949 N94-26720
NASA's spacecraft data system p 2950 N94-26723
The Ariane 5 data management system
p 2950 N94-26724
PRONAOS flight software: A real-time application for a balloonborne scientific gondola p 2950 N94-26725
MATRA Marconi Space: The Silex on-board processor and on-board software p 2950 N94-26726
On-board software for the JET-X telescope on the Spectrum-X mission p 2951 N94-26727
Early real-time performance measurements on the Columbus processor system p 2952 N94-26736
Test of onboard real time applications (LICE (tm))
p 2952 N94-26737
Arithmetic performances of onboard computers
p 2952 N94-26738
Verification and validation of the on-board software real time requirements p 2953 N94-26739
Garbage collection in a multiprocessor Smalltalk system
[ISBN-0-315-51159-1] p 2982 N94-27332

COMPUTER TECHNIQUES
Extending the rule space model to a semantically-rich domain: Diagnostic assessment in architecture
[AD-A273789] p 2948 N94-25864
The television as robot servant
[AD-A273985] p 2984 N94-25898
Knowledge organization in intelligent tutoring systems for diagnostic problem solving in complex dynamic domains
[AD-A273986] p 2984 N94-25899
EcarHeart2 version 1.0: Programmers documentation
[PB94-124633] p 2909 N94-25909
Focusing properties of a three-element quadrupole lens system and its stigmatic focusing behaviour
[DE93-616534] p 2766 N94-25915
Analysis and computer tools for separation processes involving nonideal mixtures
[DE94-004162] p 2960 N94-25986
A comparison of two hardware implementations of a crew selection system
[AD-A274913] p 2937 N94-26346
Performance assessment in sustained operations using a computer-based synthetic work task
[AD-A274707] p 2937 N94-26430
Optimization of Vector Product Format (VPF) data for map background display in army tactical systems
[AD-A274687] p 2848 N94-26446
Computer visualizations in engineering applications
[DE94-003589] p 2822 N94-26465
Modeling Group 4 elements with new transferable tight-binding models
[DE94-000770] p 3059 N94-26695
An algorithm for determination of bearing health through automated vibration monitoring
[AD-A274591] p 2823 N94-26986
Automatic mapping of task and data parallel programs for efficient execution on multicomputers
[AD-A274125] p 2982 N94-27117
A method for populating the knowledge base of AFIT's domain-oriented application composition system
[AD-A274128] p 3099 N94-27118
The coming technological singularity: How to survive in the post-human era p 2685 N94-27359
Emerging computer technologies and the news media of the future p 2688 N94-27372
NAS technical summaries. Numerical aerodynamic simulation program, March 1992 - February 1993
[NASA-RP-1321] p 3118 N94-27764
Hybrid techniques for complex aerospace electromagnetics problems p 2779 N94-27894
Review and analysis of dense linear system solver package for distributed memory machines
p 2978 N94-27916
ActorStudio: An interactive user interface editor
[PB94-132859] p 2976 N94-28356

COMPUTER VISION
The determination of surface roughness from reflected step edges
[AD-A273987] p 2984 N94-25900
Feature isolation and quantification of evolving datasets
[NASA-CR-195230] p 2961 N94-26207
Colour object recognition
[ISBN-0-315-83684-9] p 2994 N94-26614
Extracting complete 3-dimensional boundary representation from multiple range images
[ISBN-0-315-83776-4] p 2963 N94-26615
Capture and location of blobs in digital images
[ISBN-0-315-84382-9] p 3036 N94-26666
Building 3-D models from unregistered range images
[AD-A274126] p 2986 N94-27032
Top down influences on bottom-up processing
[AD-A274220] p 2939 N94-27072
Operator theoretic methods in the control of distributed and nonlinear systems
[AD-A274160] p 2988 N94-27139
Motion analysis from a sequence of range images
[ISBN-0-315-84684-4] p 2969 N94-27311
Robust estimation for range image segmentation and fitting
[ISBN-0-315-84686-0] p 2998 N94-27312
Parallel algorithm for dominant points correspondences in robot binocular stereo vision p 2686 N94-27364
An algorithm for stereo correspondence problems on the analogy of human vision
[NAL-TR-1185] p 2940 N94-27584
An investigation of methods for determining depth from focus
[ISBN-0-315-64015-4] p 2988 N94-27645
A theory of multi-scale, curvature and torsion based shape representation for planar and space curves
[ISBN-0-315-63894-X] p 2974 N94-27805
Visual surface perception: Surface reconstruction from shading and stereo
[ISBN-0-315-60974-5] p 2975 N94-27872

COMPUTERIZED SIMULATION
Study on computerized experiment of amorphous transformation process by solid phase reaction
p 2726 N94-25564
The application of simulated annealing to stochastic systems
[AD-A273850] p 3001 N94-25607
Computer modelling of cyclic deformation of high-temperature materials
[AD-A273852] p 2704 N94-25608
Computer aided simulation of heat treatment
[VTT-PUBS-131] p 2731 N94-25643
Automation of closed environments in space for human comfort and safety p 2943 N94-25684
Performance measurement of three commercial object-oriented database management systems
[AD-A274028] p 3096 N94-25765
ObjectSim: A reusable object oriented DIS visual simulation
[AD-A274030] p 2958 N94-25767
Weapon system integration for the AFIT virtual cockpit
[AD-A274058] p 2667 N94-25772
Graphical programming at Sandia National Laboratories
[DE94-003803] p 2958 N94-25818
NNN-Ising model simulation of nanodomain textures in relaxor-type lead scandium tantalate
[DE94-601884] p 2748 N94-25844
Unravelling the structure of matter on high-performance computers
[DE94-601620] p 3015 N94-25891
Knowledge organization in intelligent tutoring systems for diagnostic problem solving in complex dynamic domains
[AD-A273986] p 2984 N94-25899
A virtual environment for satellite modeling and orbital analysis in a distributed interactive simulation
[AD-A274114] p 2694 N94-25904
Object-oriented design and implementation of a parallel Ada simulation system
[AD-A274119] p 2979 N94-25906
Object interaction in a parallel object-oriented discrete-event simulation
[AD-A274084] p 2959 N94-25942
Morphological analysis of ionomers
[DE94-003660] p 2749 N94-26005
Technical description of the Vulcano software library
[FFI-93/7024] p 2767 N94-26105
The proceedings of the KEK FEL Simulation Code Workshop
[DE93-520378] p 2816 N94-26112
Feature isolation and quantification of evolving datasets
[NASA-CR-195230] p 2961 N94-26207
NPSNET-4: A real-time, 3D distributed interactive virtual world
[AD-A274942] p 2961 N94-26298
Safety standards for aircraft shelter
[FFI-92/4003] p 2680 N94-26305
How reliable is the HMSA integral equation for the pair structure of supercooled and amorphous mixtures?
[DE94-601543] p 3006 N94-26411
Computer visualizations in engineering applications
[DE94-003589] p 2822 N94-26465
Overall analysis of meteorological information in the Daeduk nuclear complex
[DE93-632594] p 2894 N94-26469
Simulation approaches for calculations in directed graphical models
[AD-A274825] p 3003 N94-26494
Modeling and simulation of a fiber distributed data interface local area network
[AD-A274838] p 3098 N94-26500
A concurrent, multigroup, discrete ordinates model of neutron transport
[DE94-004334] p 3020 N94-26577
An interactive, physically-based simulation system
[ISBN-0-315-83884-1] p 2963 N94-26616
Pre-orbital criticality safety for the NEPSTP mission
[DE94-002600] p 3005 N94-26802
Using the TSAR electromagnetic modeling system
[DE94-002617] p 2771 N94-26803
Partitioning structural VHDL circuits for parallel execution on hypercubes
[AD-A274390] p 2785 N94-26830
Annual conference on fire research, 1993: Book of abstracts
[PB94-121324] p 2717 N94-26907
Interactive control of a parallel simulation from a remote graphics workstation
[AD-A274217] p 2981 N94-27070
Development of a performance evaluation tool (MMSOFE) for detection of failures with Multiple Model Adaptive Estimation (MMAE)
[AD-A274218] p 2665 N94-27071
Ultrastructure processing of macromolecular materials
[AD-A274460] p 2754 N94-27086
Computer simulation and experiments on the quasi-static mechanics and transport properties of granular materials
[AD-A274192] p 2823 N94-27104

Using discovery-based learning to prove the behavior of an autonomous agent
[AD-A274131] p 2987 N94-27121
Computer simulations of radiation generation from relativistic electron beams
[AD-A274139] p 3024 N94-27133
The Communication Link and Error ANalysis (CLEAN) simulator
[NASA-CR-195243] p 2968 N94-27168
Computer model for generation of infrared images
[PB94-123551] p 3005 N94-27172
Parallel discrete event simulation
p 2955 N94-27194
Numerical simulation of the reignition of detonation by reflected shocks
[AD-A274755] p 2795 N94-27252
Basic research on natural gas combustion phenomena
[PB94-129046] p 2717 N94-27256
Interdisciplinary technology p 2686 N94-27363
Sculpting in cyberspace: Parallel processing the development of new software p 2686 N94-27365
Rocket engine numerical simulation
p 2688 N94-27375
A theory for simulator tools
[CWI-CS-R9302] p 2972 N94-27578
Unified distributed simulation
[ISBN-0-315-59019-X] p 2983 N94-27685
Temporal stochasticity leads to nondeterministic chaos in a model for blood cell production
[DE94-003943] p 2933 N94-27744
NAS technical summaries. Numerical aerodynamic simulation program, March 1992 - February 1993
[NASA-RP-1321] p 3118 N94-27764
Comparison of dynamic analysis of a Schilling hydraulic manipulator with experimental results
[DE94-004597] p 2827 N94-27780
An optimization program based on the method of feasible directions: Theory and users guide
[NASA-TM-4552] p 2845 N94-27865
Martian atmospheric radiation budget
p 3107 N94-27887
Computer simulation of aqueous Na-Cl electrolytes
[DE94-002622] p 3030 N94-28001
Navier-Stokes simulation of two and three dimensional jets in crossflow, effects of grid, and boundary conditions p 2804 N94-28026
Recent developments in the simulation of steady and transient transverse jet interactions for missile, rotorcraft, and propulsive applications p 2804 N94-28030
Gas Turbine Engine Transient Behaviour
[VKI-LS-1993-06] p 2828 N94-28043
Engine simulation technology p 2829 N94-28051
Transient engine simulation p 2829 N94-28052
Nonlinear solvers p 2829 N94-28053
Engine simulation systems p 2829 N94-28054
Simulation: A tool for steam plant dynamic analysis
p 2831 N94-28084
Journal of NIRE, volume 2, number 4
[JTN-94-80554] p 2869 N94-28147
Numerical simulation of turbulent free jet by TFKE model p 2871 N94-28157
Advanced End-to-end Simulation for On-board Processing (AESOP) p 2945 N94-28255

CONCENTRATION (COMPOSITION)
Evaluation of a concentration probe for application in a supersonic flow field
[AD-A273915] p 2643 N94-25592
Grain boundary chromium concentration effects on the IGSCC and IASCC of austenitic stainless steels
[DE94-004268] p 2741 N94-27570

CONCENTRATORS
Structural evaluation of concepts for a solar energy concentrator for Space Station advanced development program
[NASA-TP-3375] p 2695 N94-26609
The PLVCR 500 and HCPC, tests and results
[DLR-MITT-93-04] p 2858 N94-26813
Reflectometer employing an integrating sphere and lens-mirror concentrator
[AD-D016061] p 3039 N94-27676
Development of a 2f optical performance measurement system
[DE94-003489] p 3039 N94-27721

CONCRETE STRUCTURES
Emerging technologies
[DE94-003022] p 3102 N94-26023
The structural behaviour of the steel or composite concrete and steel frames and the connections of frame members during the fire: A literature review
[VTT-TIED-1437] p 2837 N94-26307

CONCRETES
Tests of highly loaded skids on a concrete runway
[NASA-TP-3435] p 2669 N94-26608
Proceedings of the Fourth Euroseminar on Microscopy Applied to Building Materials
[PB94-119807] p 2839 N94-26754

Computational mechanics
[DE94-003015] p 2965 N94-26775
A widely adaptable habitat construction system utilizing space resources p 2688 N94-27374

CONCURRENT PROCESSING
The CODE-TOP (COncurrent system DEvelopment using Transformations Of Predicate-transition nets) method: Examples of using it for system architecture specification, software specification, and code generation p 2953 N94-26744
Parallel matrix transpose algorithms on distributed memory concurrent computers
[DE94-002424] p 2964 N94-26764
Modeling systems by probabilistic process algebra: An event structures approach
[PB94-125259] p 3004 N94-26867
Process algebra of concurrent constraint programming
[PB94-126695] p 2966 N94-26919
Binary snapshots
[CWI-CS-R9319] p 2955 N94-27547
An object model for multimedia programming
[CWI-CS-R9327] p 2971 N94-27552
Forward and backward simulations. Part 1: Untimed systems
[CWI-CS-R9313-PT-1] p 2972 N94-27580
Forward and backward simulations. Part 2: Timing-based systems
[CWI-CS-R9314-PT-2] p 2972 N94-27581
Concurrent shadow paging: Snapshots, read-only transactions, and on-the-fly multi-level incremental dumping
[PB94-133139] p 3100 N94-28385

CONDENSATES
Decay of non-equilibrium polariton condensate in semiconductors
[DE94-604016] p 3068 N94-27678

CONDENSED MATTER PHYSICS
International journal of quantum chemistry. Quantum Chemistry Symposium Number 27: Proceedings of the International Symposium on Atomic, Molecular, and Condensed Matter Theory and Computational Methods
[AD-A274352] p 3023 N94-26926

CONDENSERS (LIQUEFIERS)
Gravity dependence or pressure drop and heat transfer in straight two-phase heat transport system condenser ducts
[NLR-TP-92167-U] p 2798 N94-27853
Cooling towers for combined cycles: New developments to meet environmental requirements
p 2832 N94-28088

CONDENSING
Condensation inside tubes: Computer program for pressure drop in straight tubes (horizontal and vertical with downflow)
[ESDU-93014] p 2806 N94-28064

CONDITIONING (LEARNING)
Cortical mechanisms of attention, discrimination, and motor response to somesthetic stimuli
[AD-A274163] p 2940 N94-27141

CONDUCTING POLYMERS
LB-Deposited, side-chain substituted polyaniline, polypyrrole and the corresponding monomers, studied by STM
[AD-A274405] p 2754 N94-26977
Langmuir-Blodgett and STM investigations of conducting polymer thin films
[AD-A274512] p 2755 N94-27087
Corrosion resistant coatings from conducting polymers
[DE94-003959] p 2757 N94-27747

CONDUCTION BANDS
Technical report of ISSP. Ser. A, no. 2678: Magnetic properties of carbon nanotubes
[JTN-94-80564] p 3064 N94-27174
Technical report of ISSP. Ser. A, no. 2674: High-field cyclotron resonance and impurity transition in n- and p-3C-SiC at magnetic fields up to 175 T
[JTN-94-80560] p 3064 N94-27232
Technical report of ISSP. Ser. A, no. 2675: High-field cyclotron resonance and valence-band structure in semiconducting diamond
[JTN-94-80561] p 3065 N94-27245
Technical report of ISSP. Ser. A, no. 2676: Charge mass singularity in two-dimensional Hubbard model
[JTN-94-80562] p 3065 N94-27248

CONDUCTION ELECTRONS
Multi-channel Kondo necklace
[DE93-634754] p 3057 N94-26389

CONDUCTIVE HEAT TRANSFER
Aspects of the circuit board thermal design
[VTT-PUBS-132] p 2779 N94-25644
High-performance parallel analysis of coupled problems for aircraft propulsion
[NASA-CR-195292] p 2845 N94-28181

CONDUCTORS
The effect of Ti conduit on the critical current in (Nb, Ti)3Sn cable-in-conduit conductors
[DE94-701204] p 2788 N94-27817
Electrostatic image solution for the conducting prolate spheroid
[PB94-133154] p 2778 N94-28387

CONFERENCES
Proceedings of the symposium on current concepts and approaches on animal test alternatives
[AD-A273926] p 2900 N94-25593
Proceedings of the 8th Annual Summer Conference: NASA/USRA Advanced Design Program
[NASA-CR-195118] p 3075 N94-25665
The Latin American conference on the applications of the Moessbaer effect
[DE93-615942] p 3051 N94-25912
The First Energy Conference: Israel and the Former USSR
[ISBN-965-229-098-X] p 2853 N94-26050
Collaborative research on ion implantation of ceramics
[DE93-019177] p 2749 N94-26080
The proceedings of the KEK FEL Simulation Code Workshop
[DE93-520378] p 2816 N94-26112
Problems of application of charged particles channeling effects in crystals in high-energy physics
[DE93-634023] p 3032 N94-26405
Eleventh Symposium on Energy Engineering Sciences: Proceedings
[DE93-019930] p 2763 N94-26429
The 27th Annual Meeting of the Israel Society for Microscopy and the 12th Annual Meeting of the Israel Society for Histochemistry and Cytochemistry
[DE93-632416] p 2716 N94-26519
Proceedings of the Second EGS4 User's Meeting in Japan
[DE93-520383] p 3032 N94-26543
Real-Time Embedded Processing for Space Applications
[ISBN-2-85428-335-X] p 2948 N94-26713
Proceedings of the Fourth Euroseminar on Microscopy Applied to Building Materials
[PB94-119807] p 2839 N94-26754
Gordon Research Conference on the Physics and Chemistry of Laser Diagnostics in Combustion
[AD-A274609] p 2716 N94-26893
Annual conference on fire research, 1993: Book of abstracts
[PB94-121324] p 2717 N94-26907
Proceedings of Damping 1993, volume 1
[AD-A274226] p 2840 N94-26922
International journal of quantum chemistry. Quantum Chemistry Symposium Number 27: Proceedings of the International Symposium on Atomic, Molecular, and Condensed Matter Theory and Computational Methods
[AD-A274352] p 3023 N94-26926
Proceedings of Damping 1993, volume 2
[AD-A274227] p 2840 N94-26953
Spectroscopy Division
[DE94-604074] p 2717 N94-26988
Proceedings of Damping 1993, volume 3
[AD-A274228] p 2840 N94-27008
Auroral Tomography Workshop Proceedings
[PB94-123718] p 2881 N94-27040
Proceedings of the High Energy Density Matter (HEDM) Contractor's Conference
[AD-A274452] p 3033 N94-27083
Proceedings of the Third Workshop Computersystems: Research Forum on Design, Realization and Use of Computersystems
[ISBN-90-6144-995-2] p 2954 N94-27191
The Sixteenth Symposium on Coordinated Observations of the Ionosphere and the Magnetosphere in the Polar Regions: Program and abstracts
[JTN-94-80601] p 2882 N94-27300
Vision 21: Interdisciplinary Science and Engineering in the Era of Cyberspace
[NASA-CP-10129] p 2685 N94-27358
Fusion reactor systems studies
[DE94-003162] p 3046 N94-27686
Proceedings of the 16th Symposium on Plasma Physics and Technology
[DE94-604181] p 3047 N94-27698
Proceedings of the workshop on (pi), K, (eta)-nucleon interactions
[DE94-701314] p 3027 N94-27733
Proceedings of Workshop on Distributed Computing and Network
[DE94-701165] p 2983 N94-27804
Hydrogen physics
[DE94-701317] p 2719 N94-27822
Neutrons in biology
[DE94-701085] p 2903 N94-27862
The 1993 NASA Aerospace Battery Workshop
[NASA-CP-3254] p 2860 N94-28100

The 1994 Space and Earth Science Data Compression Workshop
[NASA-CP-3255] p 2945 N94-28251
Asia-Pacific Seminar on Global Change Research Cooperation
[JTN-94-80517] p 2871 N94-28268
Abstracts of papers presented at the 4th CASI Aerodynamics Symposium
[ISBN-0-920203-01-9] p 2651 N94-28315
High Quality Aluminium Castings Conference
[PB94-133592] p 2747 N94-28359
Workshop on Countering Space Adaptation with Exercise: Current Issues
[NASA-CP-3252] p 2934 N94-28361

CONFIDENCE LIMITS
An optimal constrained linear inverse method for magnetic source imaging
[DE94-004014] p 2957 N94-25663
Example of statistical techniques applied to analysis of effects of small changes
[ESDU-93023] p 2670 N94-28094

CONFIGURATION MANAGEMENT
A proposed software engineering environment for systems life cycle management
[ISBN-0-315-60634-7] p 2974 N94-27869

CONFINEMENT
Potential of commercial tokamak reactors with improved physics
[DE94-002794] p 3044 N94-26860
Development of stimulus-seeking scale for expecting individual differences against confinement stress
p 2915 N94-27460
Atomic processes in Inertial Electrostatic Confinement (IEC) devices
[DE94-005015] p 3047 N94-27715
Numerical experiment on finite element method for matching data
[DE94-701208] p 3000 N94-27731

CONFORMAL MAPPING
(2,0) superconformal anomaly
[DE93-613046] p 2991 N94-25867
Towards a theory of growing surfaces: Mapping two-dimensional Laplacian growth onto Hamiltonian dynamics and statistics
[DE94-002636] p 2991 N94-26079
The massless representations of the conformal quantum algebra
[DE94-601555] p 3006 N94-26413
Gauging of Chern-Simons p-Barnes
[DE94-601553] p 2993 N94-26425

CONGENITAL ANOMALIES
Effects of ML-9, a myosin light-chain kinase inhibitor, on preimplantation development of the mouse
p 2905 N94-27486
Anorectal malformations induced by intraperitoneal injection of all-trans retinoic acid in suncus
p 2905 N94-27489

CONGRESSIONAL REPORTS
Report of the defense science board task force on aircraft assessment
[AD-A274531] p 2669 N94-26835
Access to space study
[NASA-TM-109693] p 2685 N94-27151
Defense force management: Challenges facing DOD as it continues to downsize its civilian work force. Report to the Chairman, Subcommittee on Federal Services, Post Office, and Civil Service, Committee on Governmental Affairs, US Senate
[GAO/NSIAD-93-123] p 3095 N94-28177

CONGRUENCES
Congruence theorem for structured operational semantics with predicates and negative premises
[PB94-126729] p 2966 N94-26970

CONICAL BODIES
A numerical determination of bifurcation points for low Reynolds number conical flows
[AD-A273984] p 2791 N94-25991

CONICAL FLOW
A numerical determination of bifurcation points for low Reynolds number conical flows
[AD-A273984] p 2791 N94-25991
Streamwise vorticity in a turbine rotor with conical endwalls
[DLR-FB-93-13] p 2826 N94-27591

CONIFERS
Conifer tree influence on Digital Terrain Elevation Data (DTED): A case study at Dulles International Airport
[AD-A274213] p 2849 N94-27069

CONJUGATE GRADIENT METHOD
Grid-independent convergence based on preconditioning techniques
[PB94-125356] p 2997 N94-27000

CONJUGATES
Characterization of self-conjugate minimal surfaces in R(sup 3)
[DE94-601538] p 2993 N94-26409
Topological conditions for the existence of invariant measures for unimodal maps
[PB94-123296] p 2849 N94-26866
Some remarks on the symmetry of self-conjugate minimal surfaces in R3
[DE94-603670] p 3007 N94-27633

CONNECTICUT
Landscape dynamics of northeastern forests
[NASA-CR-195272] p 2852 N94-28070

CONNECTORS
Alternative materials for solid oxide fuel cells: Processing and interactions of materials
[DE94-000016] p 2855 N94-26114
Characteristics and development report for the T1576 power supply and the MC3935 battery
[DE94-003675] p 2783 N94-26372

CONSECUTIVE EVENTS
Parallel discrete event simulation
p 2955 N94-27194

CONSERVATION
Back-reaction beyond the mean field approximation
[DE94-003936] p 3012 N94-25612
Automation of formation flight control
[AD-A274137] p 2678 N94-27132

CONSERVATION LAWS
On the first integrals of geodesics
[DE93-612974] p 3007 N94-25603
Arbitrary-order high resolution schemes for model hyperbolic conservation laws
[CRANFIELD-AERO-9209] p 3005 N94-25823
Reduced Braginskii equations
[DE94-003510] p 3047 N94-27723

CONSTANTS
A semiclassical reactive flux method for the calculation of condensed phase activated rate constants
[AD-A274850] p 3020 N94-26562

CONSTITUTIVE EQUATIONS
New constitutive equation for the volume viscosity in fluids
[NASA-TM-109104] p 2798 N94-27867

CONSTRAINTS
A global approach to kinematic path planning to robots with holonomic and nonholonomic constraints
p 2683 N94-26279
Real time avionics constraints: Silicon solutions
p 2949 N94-26717
Process algebra of concurrent constraint programming
[PB94-126695] p 2966 N94-26919

CONSTRUCTION
Design and development of the second generation Mars Habitat p 2943 N94-25693
Orbit transfer rocket engine technology program
[NASA-CR-189229] p 2702 N94-26542
A widely adaptable habitat construction system utilizing space resources p 2688 N94-27374
Construction of temperature compensated constant voltage (VT) curves for super Ni-Cd (tm) cells
p 2863 N94-28126

CONSTRUCTION INDUSTRY
Composite raw materials for the building industry
[VTT-TIED-1433] p 2708 N94-26544

CONTACT LOADS
The railway track response function
[REPT-93-40] p 2837 N94-26214
A non-linear mathematical model or finite, periodic rail corrugations
[REPT-93-49] p 2996 N94-26967
Contact stress in disc cams with roller followers
[ESDU-93001] p 2829 N94-28055

CONTAINMENT
HDR reactor containment fire modeling with BRI2
[VTT-PUBS-113] p 3031 N94-25621

CONTAMINANTS
Selfsimilar solutions of a nonlinear transport equation
[REPT-93-42] p 2865 N94-25760
Compilation of air pollutant emission factors. Volume 1: Stationary point and area sources. Supplement F
[PB94-121431] p 2867 N94-26757
An overview of the ASCOT program
[DE94-004356] p 2869 N94-27601
Trace organic chemical detection using an ultraviolet excitation molecular beam fluorometer
[DE94-002649] p 2704 N94-27708

CONTAMINATION
Development and application of contamination technology for MSFC managed space systems
[NASA-CR-193934] p 2697 N94-27421
The PROTEL contamination code
[RXR-93071] p 3040 N94-28202

CONTEXT
Researches of the Electrotechnical Laboratory. No. 955: Speech recognition by description of acoustic characteristic variations
[JTN-94-80604] p 2775 N94-27249

CONTEXT FREE LANGUAGES
Parsing schemata: A framework for parallel and sequential parsing
[PB94-125267] p 2981 N94-26998

CONTINENTAL SHELVES
Hydrographic and Acoustic Doppler Current Profiler (ADCP) data from the ONR eastern boundary current accelerated research initiative, 9-16 June 1992
[AD-A274115] p 2898 N94-26076

CONTINGENCY
Development of the Air Force contingency contracting course framework
[AD-A273921] p 3093 N94-25895

CONTINUITY EQUATION
Computation of non-isentropic internal flows with variable density
[AD-A274848] p 2794 N94-26801
Compressibility effects on rotor forces in the leakage path between a shrouded pump impeller and its housing
p 2796 N94-27379
Reduced Braginskii equations
[DE94-003510] p 3047 N94-27723

CONTINUOUS NOISE
Prewhitening of colored noise fields for detection of threshold sources
[AD-A274346] p 3010 N94-26923

CONTINUOUS RADIATION
Electrical analysis of wideband and distributed windows using time-dependent field codes
[DE94-002987] p 2768 N94-26310
S-76 high intensity radiated fields, volume 2
[AD-A274572] p 2771 N94-26836
S-76 high intensity radiated fields, volume 1
[AD-A274571] p 2771 N94-26854
S-76 high intensity radiated fields, volume 3
[AD-A274416] p 2772 N94-26980

CONTINUOUS SPECTRA
Continuum spectral characteristics of bursts measured with BATSE large area detectors p 3114 N94-26687
A study of gamma ray burst continuum properties presnting evidence for two spectral states in bursts
p 3114 N94-26688
Balloon-borne measurements of the SN1987A hard x ray continuum p 3115 N94-26689

CONTINUOUS WAVE LASERS
Development of surgical CW Nd:YAG laser with optical fiber delivery system
[DE93-632902] p 2817 N94-26185
Beam-quality measurements for materials processing lasers and the proposed ISO standard
[DE94-002738] p 2819 N94-26811

CONTINUUM FLOW
Direct simulation Monte-Carlo of near continuum hypersonic flow with chemical reactions
[DLR-FB-93-01] p 2797 N94-27588

CONTINUUMS
Weak bump quasars
[NASA-CR-195267] p 3103 N94-27933

CONTOURS
IRMA: A program for three-dimensional color display of data
[AD-A273811] p 2959 N94-25879
Optical surface contouring for non-destructive inspection of turbomachinery
[NASA-CR-195245] p 2835 N94-26691

CONTRACT MANAGEMENT
Analysis of cost and schedule growth on sole source and competitive Air Force contracts
[AD-A273920] p 3094 N94-26814
Small business innovation research program solicitation
[NASA-TM-109695] p 3094 N94-27661

CONTRACT NEGOTIATION
Intertemporal bargaining and dynamic consistency
[PB94-133147] p 3095 N94-28386

CONTRACTION
Eccentric exercise testing and training
p 2934 N94-28363
The value of electrical stimulation as an exercise training modality p 2936 N94-28372

CONTROL BOARDS
RF-station control crate
[DIGEL-1992-9] p 2779 N94-25618
Control panel dimensions for gloved operation study 2: Toggle switches minimum spacing required between toggle
[AD-A274518] p 2942 N94-27089

CONTROL EQUIPMENT
Variable speed controller p 2943 N94-25678
Designing and optimizing fuzzy-logic controllers
[ISBN-0-315-83505-2] p 2985 N94-26660
Numerical analysis of the photo-dissociation/radical oxidation of formaldehyde by ultraviolet light in a photolytic reactor
[AD-A274539] p 2868 N94-26843

Fluid dynamic linear accelerometer
[AD-D016042] p 2678 N94-27112
Pulse control method and its characteristics
[DE94-701187] p 2989 N94-27809
Open communication in manufacturing automation
[PB94-132479] p 2976 N94-28377

CONTROL SIMULATION
A method for testing of HVAC automation equipment using the emulator and the application of the method
[VTT-TIED-1435] p 2822 N94-26306

CONTROL STABILITY
The 1991-1992 walking robot design
p 2833 N94-25686
Identification and H(infinity)/(mu)-synthesis control of the Sandia truss
[DE94-002735] p 2839 N94-26810
Impulsive control and stabilization
[ISBN-0-315-84563-5] p 2988 N94-27271
Modelling and stability of a shape memory alloy position control system
[ISBN-0-315-84467-1] p 2740 N94-27304
Tools for quantitative stability robustness analysis
[ISBN-0-315-59950-2] p 2988 N94-27641
Techniques to improve maneuver stability characteristics of a nonlinear wide-body transport airplane in cruise flight
[NASA-TM-4521] p 2679 N94-27660

CONTROL STICKS
Reconfigurable aircraft stick control
[AD-D016043] p 2681 N94-27113

CONTROL SURFACES
Design of a flight controller for an unmanned research vehicle with control surface failures using quantitative feedback theory
[AD-A274049] p 2677 N94-25833
Composite leading edge/spar member for an aircraft control surface
[CA-PATENT-1-325-765] p 2669 N94-27273
Control jets in interaction with hypersonic rarefied flow
p 2698 N94-28020

CONTROL SYSTEMS DESIGN
RF-station control crate
[DIGEL-1992-9] p 2779 N94-25618
Safety analysis in conceptual design of process control
[VTT-PUBS-117] p 2762 N94-25641
Report on a visit to the Arvin/Calspan Corporation, Buffalo, New York, USA, September 1992
[CRANFIELD-AERO-9305] p 2676 N94-25653
The Enabler: A concept for a lunar work vehicle
p 2833 N94-25675
Automation of closed environments in space for human comfort and safety p 2943 N94-25684
Project WISH: The Emerald City p 2703 N94-25690
Optimal control design advantages utilizing two-degree-of-freedom controllers
[AD-A273839] p 2984 N94-25743
Design of a subsonic envelope flight control system for the Vista F-16 using quantitative feedback theory
[AD-A274057] p 2676 N94-25771
Neural networks for dynamic flight control
[AD-A274089] p 2676 N94-25785
Design of a flight controller for an unmanned research vehicle with control surface failures using quantitative feedback theory
[AD-A274049] p 2677 N94-25833
Evaluation of moderate angle of attack roll of a dual engine, thrust vectoring aircraft using quantitative feedback theory
[AD-A274118] p 2667 N94-25905
Direct model reference adaptive control of robotic arms p 2683 N94-26282
A multitasking behavioral control system for the Robotic All-Terrain Lunar Exploration Rover (RATLER)
p 2685 N94-26292
Designing and optimizing fuzzy-logic controllers
[ISBN-0-315-83505-2] p 2985 N94-26660
Identification and H(infinity)/(mu)-synthesis control of the Sandia truss
[DE94-002735] p 2839 N94-26810
Physical modelling and adaptive predictive control of diffusion/LPCVD reactors
[PB94-126398] p 2763 N94-26819
Grey-box modelling and identification topics
[PB94-126380] p 2986 N94-27029
Control oriented system identification
[AD-A274162] p 2987 N94-27124
Finite time differential equations and their application to control systems
[ISBN-0-315-85158-9] p 2988 N94-27277
Dynamics and robust control for uncertain flexible space systems
[INPE-5510-TAE/020] p 2696 N94-27357
Control of a hydrogen/oxygen steam generator
[DLR-FB-93-02] p 2826 N94-27589
Control system for tracking nonlinear systems
[AD-D016057] p 2787 N94-27673
Inverted pendulum control apparatus using transputers
[DE94-701224] p 2973 N94-27732
Pulse control method and its characteristics
[DE94-701187] p 2989 N94-27809
On identified predictive control p 2990 N94-27896
Neural control of magnetic suspension systems
p 2682 N94-27905
System identification of the Large-Angle Magnetic Suspension Test Facility (LAMSTF)
p 2682 N94-27908
Topics in the design, analysis and implementation of feedback control systems
[ISBN-0-315-84934-7] p 2989 N94-27975
Development of the gas turbine. Part 1: Design philosophy and performance p 2831 N94-28080
Controls, monitoring and performance measurements
p 2831 N94-28086

CONTROL THEORY
The application of a C(star) flight control law to large civil transport aircraft
[CRANFIELD-AERO-9303] p 2676 N94-25640
Design of a subsonic envelope flight control system for the Vista F-16 using quantitative feedback theory
[AD-A274057] p 2676 N94-25771
Status report of RMS active damping augmentation
p 2684 N94-26285
Identification and H(infinity)/(mu)-synthesis control of the Sandia truss
[DE94-002735] p 2839 N94-26810
Necessary and sufficient conditions for the existence of the stabilizing solution of the Riccati equation in a Hilbert space: A Popov function approach
[PB94-125341] p 2997 N94-26999
Grey-box modelling and identification topics
[PB94-126380] p 2986 N94-27029
Operator theoretic methods in the control of distributed and nonlinear systems
[AD-A274160] p 2988 N94-27139
Optimal control of helicopters following power failure
[NAL-TR-1190] p 2678 N94-27206
Finite time differential equations and their application to control systems
[ISBN-0-315-85158-9] p 2988 N94-27277
Designing robust control laws using genetic algorithms
p 2643 N94-27295
Air traffic management as principled negotiation between intelligent agents p 2643 N94-27297
Solving the linear quadratic optimal control problem for infinite-dimensional systems
[ISBN-0-315-84562-7] p 2999 N94-27405
Tools for quantitative stability robustness analysis
[ISBN-0-315-59950-2] p 2988 N94-27641
Comparison of dynamic analysis of a Schilling hydraulic manipulator with experimental results
[DE94-004597] p 2827 N94-27780
On identified predictive control p 2990 N94-27896

CONTROLLABILITY
The effects of tailwinds and control cross coupling on rotorcraft handling qualities for steep, decelerating instrument approaches and missed approaches
[IAR-AN-77] p 2677 N94-26710
Impulsive control and stabilization
[ISBN-0-315-84563-5] p 2988 N94-27271

CONTROLLED ATMOSPHERES
Automation of closed environments in space for human comfort and safety p 2943 N94-25684
The determination of surface roughness from reflected step edges
[AD-A273987] p 2984 N94-25900

CONTROLLED FUSION
Development of fusion technology
[DE93-633444] p 3042 N94-26159
Maryland controlled fusion research program
[DE94-003533] p 3044 N94-26523
Research in pulsed power plasma physics
[AD-A274323] p 3045 N94-27074

CONTROLLERS
Autonomous space processor for orbital debris advanced design project in support of solar system exploration p 2697 N94-25667
Variable speed controller p 2943 N94-25678
The 1991-1992 walking robot design
p 2833 N94-25686
Optimal control design advantages utilizing two-degree-of-freedom controllers
[AD-A273839] p 2984 N94-25743
Modal control of a satellite in an unstable periodic orbit about the Earth-Sun interior Lagrange point
[AD-A273707] p 2694 N94-25776
Adaptive optimization and control using neural networks
[DE94-003941] p 2985 N94-25983
Auxiliary controller for time-to-digital converter module readout
[DE93-634172] p 2948 N94-26266
Inertial-space disturbance rejection for space-based manipulators p 2683 N94-26281
Characteristics and development report for the T1576 power supply and the MC3935 battery
[DE94-003675] p 2783 N94-26372
Physical modelling and adaptive predictive control of diffusion/LPCVD reactors
[PB94-126398] p 2763 N94-26819
Research in robust control for hypersonic aircraft
[NASA-CR-195250] p 2678 N94-26821
Control oriented system identification
[AD-A274162] p 2987 N94-27124
Automation of formation flight control
[AD-A274137] p 2678 N94-27132
Operator theoretic methods in the control of distributed and nonlinear systems
[AD-A274160] p 2988 N94-27139
Computer code for controller partitioning with IFPC application: A user's manual
[NASA-CR-195291] p 2678 N94-27414
Neural control of magnetic suspension systems
p 2682 N94-27905
System identification of the Large-Angle Magnetic Suspension Test Facility (LAMSTF)
p 2682 N94-27908
Optical pattern recognition system utilizing resonator array
[AD-D016071] p 3040 N94-28224

CONVECTION
Numerical solution of singularity-perturbed two-point boundary-value problems
[DE94-601542] p 2993 N94-26410

CONVECTION CLOUDS
Investigation of mesoscale convective cloud clusters in South China
[AD-A274303] p 2895 N94-26678

CONVECTION CURRENTS
The numerical simulation of marine boundary layer clouds
[AD-A273669] p 2894 N94-26195
Investigation of mesoscale convective cloud clusters in South China
[AD-A274303] p 2895 N94-26678

CONVECTION-DIFFUSION EQUATION
Rendering of three-dimensional data sets derived from finite-difference and spectral methods
[AD-A273724] p 3096 N94-25997
On the robustness of a multiple semi-coarsened grid method
[REPT-93-51] p 2992 N94-26252
Time-step enlargement and optimal smoothing in Runge-Kutta time-integration algorithms by implicit and explicit smoothing
[NLR-TP-92221-U] p 2798 N94-27799

CONVECTIVE FLOW
Interactions between a tropical mixed boundary layer and cumulus convection in a radiative-convective model
[DE94-000848] p 2877 N94-25979
New constitutive equation for the volume viscosity in fluids
[NASA-TM-109104] p 2798 N94-27867

CONVECTIVE HEAT TRANSFER
Global barotropic response to a tropical forcing
[NASA-CR-195256] p 2896 N94-27408
Forced convection heat transfer in straight tubes. Part 2: Laminar and transitional flow
[ESDU-93018-PT-2] p 2807 N94-28139

CONVERGENCE
A logarithmic barrier cutting plane method for convex programming
[REPT-93-43] p 2957 N94-25761
Approximate solution of the fourth order initial value problem using deficient spline polynomials
[DE93-613023] p 2991 N94-25880
Isotonic estimation and rates of convergence in Wicksell's problem
[REPT-93-39] p 3002 N94-26213
Congruence theorem for structured operational semantics with predicates and negative premises
[PB94-126729] p 2966 N94-26970
Grid-independent convergence based on preconditioning techniques
[PB94-125358] p 2997 N94-27000
Hessenberg matrices in Krylov subspaces and the computation of the spectrum
[PB94-133170] p 3001 N94-28389

CONVERGENT NOZZLES
Transient flow features of a supersonic jet in a low speed cross flow p 2800 N94-28005

CONVERGENT-DIVERGENT NOZZLES
Transient flow features of a supersonic jet in a low speed cross flow p 2800 N94-28005

CONVEXITY

A note on central cutting plane methods for convex programming [REPT-93-44] p 2958 N94-25762

Conditionally exponential convex functions on locally compact groups [DE93-613025] p 2990 N94-25865

An algorithm to find the intersection of two convex polygons [AD-A274722] p 2961 N94-26148

Unifying investigation of interior-point methods for convex programming [PB94-126463] p 2967 N94-27031

CONVOLUTION INTEGRALS

A real-time convolution algorithm and architecture with applications in SAR processing [AD-A273817] p 2959 N94-25963

COOLANTS

Analysis of cooling jets near the leading edge of turbine blades p 2676 N94-28037

COOLING SYSTEMS

A robust helium-cooled shield/blanket design for ITER [DE94-003402] p 3043 N94-26323

Bulletin of the Institute for Chemical Reaction Science, Tohoku University, volume 2 [JTN-94-80602] p 2717 N94-27385

Variable temperature cold stage for microscope observation p 2718 N94-27389

Cooling towers for combined cycles: Design philosophy, performance testing, and operating problems p 2832 N94-28087

Cooling towers for combined cycles: New developments to meet environmental requirements p 2832 N94-28088

COORDINATE TRANSFORMATIONS

Propagation of experimental uncertainties from the tunnel to the body coordinate system in 3-D LDV flow field studies [NASA-CR-191607] p 2680 N94-26603

COORDINATES

On experimental studies of yield surfaces of metals: A more general approach [IFTR-42/1993] p 2739 N94-26824

Users guide for GRIKURV: A code for drawing graphs [PB94-123593] p 2968 N94-27154

COORDINATION

Heavy-electron behavior in large coordination compounds CeZn11 and UZn12 [REPT-A-2663] p 3049 N94-25614

COPOLYMERIZATION

Polymer-bound rhodium hydroformylation catalysts [ETN-94-95388] p 2712 N94-25747

High impact strength poly(lactide) tough biodegradable materials [ETN-94-95389] p 2747 N94-25748

Accordion-like polymers for nonlinear applications [AD-D016031] p 2755 N94-27148

COPOLYMERS

High impact strength poly(lactide) tough biodegradable materials [ETN-94-95389] p 2747 N94-25748

Controlled synthesis of polyenes by catalytic methods [DE94-004168] p 2749 N94-25973

New monomers for high performance polymers p 2758 N94-27904

COPPER

Binding of copper and nickel to cavities in silicon formed by helium ion implantation [DE94-003769] p 3050 N94-25814

Issues for conversion coating of aluminum alloys with hydrotalcite [DE94-003804] p 2732 N94-25819

Deviatoric stresses and plastic strain rates in strong shock waves for six metals [DE94-002964] p 2733 N94-26022

Hook spectroscopy as an atomic number density diagnostic applied to laser-ablated copper plasmas [DE94-002645] p 3042 N94-26081

Microstructures of Si surface layers implanted with Cu [DE94-004690] p 3058 N94-26565

Vapor deposition of copper on stainless steel 304L [DE94-001945] p 2740 N94-27006

Technical report of ISSP. Ser. A, no. 2681: Orbital and spin susceptibilities of the plane copper sites in YBa2Cu3O(x) system [JTN-94-80567] p 3064 N94-27177

The deformation of copper-tungsten composites [ISBN-0-315-84939-8] p 2712 N94-27688

Secondary electron emission from copper surface due to neodymium and gadolinium ion bombardment [DE94-701115] p 3027 N94-27718

Structural study of Cu/Co multilayer by anomalous small-angle x ray scattering p 2744 N94-28160

COPPER ALLOYS

Study on ferromagnetic field magnet using strong and highly conductive material p 2725 N94-25559

Study on production of materials with one direction solidification texture p 2727 N94-25572

Stress corrosion cracking and dealloying of copper-gold alloy in iodine vapor [DE93-633790] p 2734 N94-26264

The origins of ordering in CuPt [DE94-003864] p 2736 N94-26351

An anodic dissolution-based mechanism for the rapid cracking, pre-exposure phenomenon demonstrated by Al-Li-Cu alloys [DE94-004798] p 2742 N94-27788

NASA-UVA light aerospace alloy and structures technology program (LA2ST) [NASA-CR-195275] p 2844 N94-27851

COPPER CHLORIDES

Structure of ionic fluids in equilibrium with a microporous ionic matrix [DE94-600563] p 2715 N94-26391

COPPER COMPOUNDS

Successive structural phase transitions in stoichiometric La2NiO4 observed by x ray diffraction [REPT-A-2665] p 3051 N94-25921

Technical report of ISSP. Ser. A, no. 2679: Novel electronic states of partially deuterated (DMe-DCNQI)2Cu [JTN-94-80565] p 3064 N94-27175

Technical report of ISSP. Ser. A, no. 2669: Relations between oxygen deficiency and structures in the La-Sr-Cu-O system. 3: Oxygen contents and structure of (La, Sr)8Cu8O(16+delta) phase [JTN-94-80555] p 3066 N94-27353

COPPER OXIDES

Atomic-scale chemistry of metal surfaces [REPT-A-2657] p 3012 N94-25636

Preparation and characterization of high temperature superconductor film surfaces [AD-A274293] p 3059 N94-26681

Synthesis, rheology, and forming of Y-Ba-Cu-O ceramics [DE94-005558] p 2757 N94-27695

The optical properties of high-T(c) superconductors grown by pulsed laser deposition [ISBN-0-315-84917-7] p 3039 N94-27962

Anisotropy in the electrical, magnetic and optical properties of Pb2Sr2RCu3O8 [ISBN-0-315-84930-4] p 3070 N94-27974

Fermi surface ridge at second and third Umklapp positron annihilations in Y Ba2Cu3O(7-delta) [DE93-634760] p 3070 N94-27995

COPPER SELENIDES

The state of the art of thin-film photovoltaics [DE94-000224] p 2855 N94-26115

Research on high-efficiency, large-area, CuInSe2 based thin-film modules [DE94-000259] p 3067 N94-27609

CORE SAMPLING

Comet nucleus and asteroid sample return missions p 2689 N94-25692

Crystallographyic analyses of clathrate hydrates included in Vostok ice cores p 2885 N94-27969

CORES

Methane emissions from natural wetlands [DE93-040796] p 2865 N94-25790

CORN

Root gravitropism in maize and Arabidopsis [NASA-CR-195710] p 2903 N94-27940

CORNER FLOW

Control jets in interaction with hypersonic rarefied flow p 2698 N94-28020

CORNERS

Zr-rich corner of the Zr-Sn-O diagram [DE93-633764] p 2734 N94-26161

CORONAS

Studies for Io's extended atmosphere and neutral clouds and their impact on the local satellite atmosphere and on the planetary magnetosphere [NASA-CR-195255] p 3106 N94-27406

CORRELATION

Study on characteristics and electronic structures of materials with strong electronic correlations by ferromagnetic fields p 2724 N94-25557

Advanced qualification techniques [DE94-003709] p 2780 N94-25812

Correlation between the gravity field and the bathymetry in the North Atlantic Ocean [ETN-94-95036] p 2899 N94-26108

Detection of transient vector-fields in additive noise [FFI-93/7028] p 2768 N94-26232

Solid estimation feature based correlation method for measuring control points required for correcting satellite images [VTT-JULK-772] p 2848 N94-26253

Correlation of experimental data and three-dimensional finite element modeling of a spinning quadrupole [DE93-041173] p 3008 N94-26421

C-periodicity and the physical mass in the 3-state Potts model [DE94-601551] p 3019 N94-26423

Experimental measurement of local displacement and chemical pair correlations in crystalline solid solutions [DE94-001124] p 3065 N94-27251

Correlated mean field Ansatz for the Kondo necklace [DE94-603671] p 3067 N94-27634

Practical problems in aggregating expert opinions [DE94-002623] p 3094 N94-27707

Correlations in inelastic collisions of relativistic nuclei with emulsion at (4.1 - 4.5) A GeV/c [DE93-634526] p 3030 N94-27994

Computer simulation of aqueous Na-Cl electrolytes [DE94-002622] p 3030 N94-28001

CORRELATION COEFFICIENTS

Spectral and temporal correlations of multifrequency waves in the turbulent atmosphere [ITN-94-85229] p 2774 N94-27233

CORRELATORS

Acousto-optical post-processor time-integrating correlator calibration updates [DSIS-94-00053] p 2813 N94-27317

Development of a holographic illumination system for a time-integrating correlator [DSIS-94-00111] p 2814 N94-27763

CORROSION

Interactions between corrosion fatigue and stress corrosion crack on steel for light water reactors p 2722 N94-25547

A materials compatibility study in FM-1, a liquid component of a paste extrudable explosive [DE94-001166] p 2759 N94-26198

Guidelines for controlling stress corrosion cracking and corrosion fatigue of stainless steels: A literature review [VTT-TIED-1420] p 2837 N94-26262

Hydrothermal growth and characterization of oxides in zirconium alloys [DE94-602981] p 2743 N94-27829

Fiber optic sensors for corrosion detection p 3040 N94-27923

The corrosion behavior of sputter-deposited magnesium-valve metal alloys p 2745 N94-28164

CORROSION PREVENTION

Issues for conversion coating of aluminum alloys with hydrotalcite [DE94-003804] p 2732 N94-25819

Effect of nitrocarburizing on shape of titanium alloy parts [DE94-004040] p 2732 N94-25822

Guidelines for controlling stress corrosion cracking and corrosion fatigue of stainless steels: A literature review [VTT-TIED-1420] p 2837 N94-26262

Polyurethane self-priming topcoats [AD-D016041] p 2755 N94-27111

Development and application of contamination technology for MSFC managed space systems [NASA-CR-193934] p 2697 N94-27421

Hydrothermal growth and characterization of oxides in zirconium alloys [DE94-602981] p 2743 N94-27829

Effect of different ions on the anodic behaviour of alloy 800 in chloride solutions at high temperature [DE94-602982] p 2743 N94-27832

CORROSION RESISTANCE

Corrosion resistance at welded zones of nuclear fuel reprocessing system p 2722 N94-25546

Issues for conversion coating of aluminum alloys with hydrotalcite [DE94-003804] p 2732 N94-25819

A materials compatibility study in FM-1, a liquid component of a paste extrudable explosive [DE94-001166] p 2759 N94-26198

Method for improving electromagnetic shielding performance of composite materials by electropulsing [AD-D016050] p 2709 N94-27076

Polyurethane self-priming topcoats [AD-D016041] p 2755 N94-27111

Corrosion resistant coatings from conducting polymers [DE94-003959] p 2757 N94-27747

Electrochemical properties of passive films on 440C stainless steel [ISBN-0-315-64248-3] p 2757 N94-27801

The Science Reports of the Research Institutes, Tohoku University. Series A: Physics, Chemistry, and Metallurgy. Volume 38, No. 1: Amorphous Materials 14 [JTN-94-80610] p 2744 N94-28158

The corrosion behavior of sputter-deposited magnesium-valve metal alloys p 2745 N94-28164

CORROSION TESTS

Study on performance evaluation of pressure vessel steel in corrosion environments with sulfide p 2730 N94-25582

A materials compatibility study in FM-1, a liquid component of a paste extrudable explosive [DE94-001166] p 2759 N94-26198

Isothermal corrosion testing of steels in molten nitrate salts
[DE94-004695] p 2742 N94-27755

CORRUGATED PLATES
Formulae for the buckling of simply-supported corrugated panels of orthotropic material under shear load
[PB94-126547] p 2840 N94-26911

CORRUGATING
A non-linear mathematical model or finite, periodic rail corrugations
[REPT-93-49] p 2996 N94-26967

COSMIC BACKGROUND EXPLORER SATELLITE
Zodiacal light data investigation. Interim results for the Earthlimb Clutter Experiment
[AD-A274461] p 3104 N94-27265

COSMIC RAY SHOWERS
Contributions to the 23rd ICRC from emulsion chamber experiments at Mt. Chacaltaya and Pamirs
[ICRR-REPT-295-93-7] p 3112 N94-25624
A study of very high energy hadron interactions through observation of cosmic-ray families of visible energy greater than 500 TeV, 1 p 3112 N94-25625
A study of very high energy hadron interactions through observation of cosmic-ray families of visible energy greater than 500 TeV, 2 p 3112 N94-25626
A study of very high energy hadron interactions through observation of cosmic-ray families with visible energy not less than 500 TeV, 3 p 3112 N94-25627
Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 1 p 3112 N94-25628
Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 2 p 3113 N94-25629
Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 3 p 3113 N94-25630
Penetrating nature of very collimated high-energy shower-clusters of hadrons and gamma rays
p 3113 N94-25631
Energy concentration in high energy hadron-gamma families p 3113 N94-25632
Violation of Feynman scaling law in the forward region
p 3113 N94-25633
Simultaneous observation of families and air showers at Mt. Chacaltaya p 3114 N94-25634
Direct evidence of the interplanetary magnetic field effect on the cosmic-ray shadow by the sun
[ICRR-296-93-8] p 3116 N94-27607
Study of invisible nucleon decay, N approaches nu nu nu bar, and a forbidden nuclear transition in the Kamiokande detector
[ICRR-299-93-11] p 3028 N94-27759

COSMIC RAYS
A measurement of the energy spectra of cosmic rays from 20 to 1000 GeV per AMU
[NASA-CR-195246] p 3115 N94-27167
Simulations of terrestrial in-situ cosmogenic-nuclide production
[DE94-004999] p 3117 N94-27826
Cosmological constraints on very heavy stable neutrinos
[DE94-601669] p 3117 N94-28066

COSMIC X RAYS
Cosmic x ray physics
[NASA-CR-195225] p 3115 N94-27236
Cosmic x ray physics
[NASA-CR-195218] p 3115 N94-27419
Cosmic x ray physics
[NASA-CR-195219] p 3115 N94-27420

COSMOLOGY
Cosmoparticle physics of family symmetry breaking
[DE94-601623] p 3013 N94-25837
A cosmological field theory
[ISBN-0-315-84271-7] p 3104 N94-26638
Cosmic no-hair in Brans-Dicke theory
[DE94-603673] p 3074 N94-27636
Cosmological constraints on very heavy stable neutrinos
[DE94-601669] p 3117 N94-28066

COST ANALYSIS
A cost model for USAF acquisition of commercial aircraft for service in the special air mission fleet
[AD-A274012] p 3093 N94-25796
Rotorcraft low altitude IFR benefit/cost analysis: Conclusions and recommendations
[AD-A274241] p 2665 N94-26826
Automation life-cycle cost model
[NASA-CR-195695] p 3095 N94-27866

COST EFFECTIVENESS
MINOTAUR (Maryland's innovative orbital technologically advanced University rocket)
p 2703 N94-25685
A conceptual framework for the evaluation of cost-effectiveness of projects to reduce GHG emissions and sequester carbon
[DE93-040448] p 2867 N94-26419

COST ESTIMATES
MINOTAUR (Maryland's innovative orbital technologically advanced University rocket)
p 2703 N94-25685
A cost model for USAF acquisition of commercial aircraft for service in the special air mission fleet
[AD-A274012] p 3093 N94-25796
Environmental benefits of different types of heat pumps, available and expected
[DE94-002440] p 2866 N94-26123

COST REDUCTION
Overview of the Photovoltaic Manufacturing Technology (PVMaT) project
[DE93-018234] p 2856 N94-26426
Material optimization and manufacturing development of reduced cost powder metal titanium alloy components for gas turbine engine application, phase 2
[AD-A274410] p 2709 N94-26978
Polyhedral characterization of the economic lot-sizing problem with start-up costs
[MEMO-COSOR-92-46] p 2969 N94-27396
Development of advanced high temperature in-cylinder components and tribological systems for low heat rejection diesel engines, phase 1
[NASA-CR-187158] p 2827 N94-27984

COSTS
Project Columbiad: Reestablishment of human presence on the Moon p 2689 N94-25687
Analysis of cost and schedule growth on sole source and competitive Air Force contracts
[AD-A273920] p 3094 N94-26814
Space projects: Astrophysics facility program contains cost and technical risks. Report to Congressional Requesters
[GAO/NSIAD-94-80] p 2696 N94-27382
Computer code for controller partitioning with IFPC application: A user's manual
[NASA-CR-195291] p 2678 N94-27414
Deregulation of air traffic in America: A model to be initiated? p 2661 N94-28232
German-American relations in air traffic are to be criticized p 2662 N94-28241

COULOMB POTENTIAL
How to build analogues of the Bessel-Clifford expansions for the sum of the repulsive Coulomb potential and central potential decreasing more rapidly than the centrifugal one?
[DE93-634308] p 3007 N94-26472

COUNTERMEASURES
High resolution fourier transform absorption spectrum of 79Br2 B3 Pi(Ou+) X1 sigma g+
[AD-A273864] p 2956 N94-25610
Computer model for generation of infrared images
[PB94-123551] p 3005 N94-27172

COUPLED MODES
A study of multiple guide optical couplers
[ISBN-0-315-84633-X] p 3038 N94-27441
Weak coupling in statistical energy analysis ion Research, Univ. of Southampton, Southampton SO9 5NH, England)
[ISVR-TR-228] p 2832 N94-28174

COUPLERS
Microwave coupling into a slotted cavity
[PB94-123742] p 2772 N94-27041

COUPLING
CP violating form factors for three gauge boson vertex in the two Higgs doublet and left-right symmetric models
[DE94-601704] p 3014 N94-25841
All-coupling polaron ground state energy in D-dimension
[DE94-603666] p 3027 N94-27629

COUPLING CIRCUITS
Microwave coupling into a slotted cavity
[PB94-123742] p 2772 N94-27041

COVARIANCE
Numerical treatment of experimental data in calibration procedures
[DE93-634289] p 3097 N94-26382
Practical problems in aggregating expert opinions
[DE94-002623] p 3094 N94-27707

CRAB NEBULA
Channel to energy calibration results for the BATSE large area detectors p 3115 N94-26690

CRACK ARREST
Evaluation of crack arrest fracture toughness of parent plate, weld metal and heat affected zone of BIS 812 EMA ship plate steel
[AD-A274871] p 2839 N94-26859

CRACK CLOSURE
Crack closure, a literature study
[PB94-123361] p 2842 N94-27197
Modification of a model for fatigue life predictions based on level-crossing
[PB94-123395] p 2842 N94-27198

CRACK GEOMETRY
An experimental study on the effects of compressive stress on the fatigue crack growth of low-alloy steel
[DE94-004447] p 2737 N94-26582
Numerical Analysis Methods of Surface Cracks
[VTT-PUBS-119] p 2841 N94-27186
Applications of the weight function method (appendix 4/1) p 2842 N94-27190

CRACK INITIATION
Computation of stress intensity factors by the mode enrichment technique with applications to geometrically nonlinear problems
[PB94-126513] p 2840 N94-26910
Implementation of thermal residual stresses in the analysis of fiber bridged matrix crack growth in titanium matrix composites
[NASA-TM-109082] p 2711 N94-27658

CRACK PROPAGATION
Bulletin of National Research Institute for Metals in Fiscal Year 1993, no. 14
[REPT-14] p 2722 N94-25544
Interactions between corrosion fatigue and stress corrosion crack on steel for light water reactors
p 2722 N94-25547
Fundamental study on monitoring technology on local surface damages p 2724 N94-25555
Study on high temperature damage control and life improvement p 2729 N94-25580
Study on evaluation of crack generation and crack growth behaviors under static loading at high temperature and under combined loading p 2730 N94-25583
Study on fatigue crack propagation characteristics around welded joint interface in complexed conditions
p 2730 N94-25584
Numerical simulations of interfacial debonding in ductile-phase reinforced intermetallic matrix composites
[DE94-003639] p 2706 N94-25938
Fracture behavior of 20% Nb particulate reinforced alumina composite
[DE94-002830] p 2706 N94-26019
Growth of small fatigue cracks in Incoloy-908
[DE94-003406] p 2836 N94-26129
Grain by grain study of the mechanisms of crack propagation during iodine SCC of Zry-4
[DE93-633765] p 2734 N94-26162
Damage tolerance assessment handbook. Volume 1: Introduction fracture mechanics fatigue crack propagation
[AD-A274777] p 2836 N94-26186
Results from a fracture mechanical serial investigation of breechrings on the M109A3GN howitzer
[FFI-93/8002] p 2837 N94-26233
Damage tolerance assessment handbook. Volume 2: Aircraft damage tolerance evaluation
[AD-A274778] p 2837 N94-26357
Effects of plastic media blasting on aircraft skin
[AD-A274817] p 2668 N94-26488
Early stages in the development of stress corrosion cracks
[DE94-003867] p 2838 N94-26524
An experimental study on the effects of compressive stress on the fatigue crack growth of low-alloy steel
[DE94-004447] p 2737 N94-26582
Fatigue resistance under tension-compression of laminates IM6/5245C and AS4/3501-6
[IAR-CR-25] p 2708 N94-26711
Evaluation of crack arrest fracture toughness of parent plate, weld metal and heat affected zone of BIS 812 EMA ship plate steel
[AD-A274871] p 2839 N94-26859
Computation of stress intensity factors by the mode enrichment technique with applications to geometrically nonlinear problems
[PB94-126513] p 2840 N94-26910
Experimental study of the angled crack in GLARE 3
[PB94-126554] p 2669 N94-26954
Development of fibre-metal laminates, ARALL and GLARE, new fatigue resistant materials
[PB94-126471] p 2669 N94-26969
Engineering limitations of ceramic composites for high performance and high temperature applications
[DE94-001676] p 2754 N94-27021
Aluminum alloy 8090-T8771 thick plate material characterization
[AD-A274146] p 2987 N94-27077
Examination of hardness, fracture toughness and microstructure in Al2O3-B4C binary ceramics
[PB94-124237] p 2755 N94-27156
Development of an automated fracture assessment system for nuclear structures (appendix 1/1)
p 2841 N94-27187
Method for calculating stress intensity factors for surface cracks (appendix 2/1) p 2841 N94-27188

Applications of the weight function method (appendix 4/1) p 2842 N94-27190
Crack closure, a literature study
[PB94-123361] p 2842 N94-27197
Grain boundary chromium concentration effects on the IGSCC and IASCC of austenitic stainless steels
[DE94-004268] p 2741 N94-27570
Testing procedure for toughness characterisation of ceramic matrix composites
[REPT-932-430-101] p 2711 N94-27586
Implementation of thermal residual stresses in the analysis of fiber bridged matrix crack growth in titanium matrix composites
[NASA-TM-109082] p 2711 N94-27658
Fracture toughness and crack resistance of damage tolerant and high strength Al-Li alloys
[NLR-TP-91249-U] p 2743 N94-27795
Status and prospects for aluminium-lithium alloys in aircraft structures
[NLR-TP-92193-U] p 2743 N94-27797
The transition from stress corrosion cracking to corrosion fatigue in AA-7075 and AA-8090
[ISBN-0-315-59526-4] p 2744 N94-27950
Fatigue propagation behaviour of short cracks (1-2 mm) in steels
[ESDU-93033] p 2845 N94-28145

CRACK TIPS
Determination of fracture stress and effective crack tip radius from toughness (KIc) and yield strength (Y)
[AD-A274014] p 2836 N94-25754
Mechanism of mechanical fatigue of silica glass
[DE94-003165] p 2753 N94-26783
Computation of stress intensity factors by the mode enrichment technique with applications to geometrically nonlinear problems
[PB94-126513] p 2840 N94-26910

CRACKING (FRACTURING)
The role of grain boundary chemistry and structure in the environmentally-assisted intergranular cracking of nickel-base alloys
[DE94-003159] p 2732 N94-25954
Micropyrolysis of polymer thin films for ceramics
[ECL-92-62] p 2750 N94-26088
Proceedings of the Fourth Euroseminar on Microscopy Applied to Building Materials
[PB94-119807] p 2839 N94-26754
Development of fibre-metal laminates, ARALL and GLARE, new fatigue resistant materials
[PB94-126471] p 2669 N94-26969
Crack closure, a literature study
[PB94-123361] p 2842 N94-27197
Fracture toughness and crack resistance of damage tolerant and high strength Al-Li alloys
[NLR-TP-91249-U] p 2743 N94-27795

CRACKS
Effect of loading mode on the fracture toughness of a reduced activation ferritic/martensitic stainless steel
[DE94-004290] p 2732 N94-25987
Development of non-destructive testing technology for the crack of steam generator tubes
[DE93-632953] p 2835 N94-26399
Development of detection technique for fatigue crack due to thermal stratification phenomena in RCS piping
[DE93-632968] p 2838 N94-26400
Reconstruction of multiple cracks from experimental electrostatic boundary measurements
[NASA-CR-191584] p 2994 N94-26601
Mechanism of mechanical fatigue of silica glass
[DE94-003165] p 2753 N94-26783
Experimental study of the angled crack in GLARE 3
[PB94-126554] p 2669 N94-26954
Crack closure, a literature study
[PB94-123361] p 2842 N94-27197
An anodic dissolution-based mechanism for the rapid cracking, pre-exposure phenomenon demonstrated by Al-Li-Cu alloys
[DE94-004798] p 2742 N94-27788
Mechanically fastened composite laminates subjected to combined bearing-bypass and shear loading
p 2712 N94-27914

CRASHWORTHINESS
The development of a horizontal impact sled facility and subsequent crashworthiness experiments
[NIAR-93-15] p 2680 N94-26200

CRATERING
Cratering rates from lunar xenospherules
[DE94-003481] p 3106 N94-27007
Modulating terrestrial impacts from Oort cloud comets by the adiabatically changing galactic tides
p 2890 N94-28305

CREEP PROPERTIES
Bulletin of National Research Institute for Metals in Fiscal Year 1993, no. 14
[REPT-14] p 2722 N94-25544
Preparation of creep data sheet: Material strength data sheet p 2723 N94-25548
Study on high temperature damage control and life improvement p 2729 N94-25580
Study on elucidation of damage generation process by electron beam lithography p 2729 N94-25581
Study on evaluation of crack generation and crack growth behaviors under static loading at high temperature and under combined loading p 2730 N94-25583
Characterization of fatigue damage in a metal matrix composite (SCS-6/Ti-15-3) at elevated temperature
[AD-A273797] p 2706 N94-25876
Research into the microstructure and mechanical behavior of eutectic Bi-Sn and In-Sn
[DE94-004558] p 2741 N94-27619
Creep rupture properties of a nickel-base heat-resistant alloy Hastelloy XR under varying temperature/stress condition
[DE94-701175] p 2743 N94-27807
Effects of physical aging on long-term behavior of composites p 2712 N94-27897
A laboratory test on construction of ice domes and their load-carrying capacity p 2884 N94-27966

CREEP RUPTURE STRENGTH
Preparation of creep data sheet: Material strength data sheet p 2723 N94-25548

CREEP STRENGTH
Preparation of creep data sheet: Material strength data sheet p 2723 N94-25548
Interface phenomena in metal-ceramic composites
[AD-A274167] p 2709 N94-27125
Creep rupture properties of a nickel-base heat-resistant alloy Hastelloy XR under varying temperature/stress condition
[DE94-701175] p 2743 N94-27807

CREEP TESTS
Space-R thermionic space nuclear power system design and technology demonstration
[DE94-002017] p 2700 N94-25930
The role of grain boundary chemistry and structure in the environmentally-assisted intergranular cracking of nickel-base alloys
[DE94-003159] p 2732 N94-25954
Compatibility of refrigerants and lubricants with engineering plastics
[DE94-004959] p 2756 N94-27692

CRETACEOUS-TERTIARY BOUNDARY
New Developments Regarding the KT Event and Other Catastrophes in Earth History
[NASA-CR-195169] p 2887 N94-28294
The biostratigraphy and paleogeography of Maastrichtian inoceramids p 2889 N94-28303
An evaluation of criteria that may be used to identify species surviving a mass extinction
p 2889 N94-28304
Were all extinction events caused by impacts?
p 2891 N94-28311
Ozone control of biological activity during Earth's history, including the KT catastrophe p 2876 N94-28312

CREW PROCEDURES (INFLIGHT)
An analysis of the loads applied to a heavy Space Station rack during translation and rotation tasks
[NASA-TM-104790] p 2697 N94-28183

CREW WORKSTATIONS
A critical analysis of workload predictions generated by multiple resource theory during early crewstation design
[AD-A274804] p 2941 N94-26339

CREWS
Workload transition: Implications for individual and team performance
[AD-A274538] p 2941 N94-26964

CRITICAL FREQUENCIES
Classical solutions of Yang-Mills-Chern-Simons theory in 2+1 dimensions: A quasi-linear superposition
[DE93-634335] p 3006 N94-26270

CRITICAL LOADING
Grain by grain study of the mechanisms of crack propagation during iodine SCC of Zry-4
[DE93-633765] p 2734 N94-26162

CRITICAL POINT
Dimensional crossover from non-renormalizability to renormalizability
[DE93-613052] p 3006 N94-26193
Vapour pressures and critical points of liquids: Aliphatic and cyclic ketones
[ESDU-93009] p 2720 N94-28059
Orthobaric densities and molar volumes of liquids: Fused ring compounds
[ESDU-93029] p 2721 N94-28097
Thermal conductivity of liquid carboxylic acids
[ESDU-93017] p 2721 N94-28138
Vapour pressures and critical points of liquids: Fused ring compounds
[ESDU-93028] p 2721 N94-28142

CRITICAL PRESSURE
Orthobaric densities and molar volumes of liquids: Fused ring compounds
[ESDU-93029] p 2721 N94-28097

CRITICAL TEMPERATURE
Multi-channel Kondo necklace
[DE93-634754] p 3057 N94-26389
Process modelling of aluminium alloys. Modelling of the quench sensitivity of alloy AA6082
[PB94-124567] p 2741 N94-27325
Effect of temperature and recoil-energy spectra on irradiation-induced amorphization in Ca2La8(SiO4)6O2
[DE94-004371] p 3067 N94-27602
Orthobaric densities and molar volumes of liquids: Fused ring compounds
[ESDU-93029] p 2721 N94-28097
Thermal conductivity of liquid carboxylic acids
[ESDU-93017] p 2721 N94-28138

CRITICAL VELOCITY
Numerical investigation of thrust vectoring by injection of secondary air into nozzle flows p 2801 N94-28013
A new method for torsional critical speed calculation of practical industrial rotors
[IMR-T&M-TR-001] p 2828 N94-28041

CROP GROWTH
Effect of carbon dioxide enrichment on radish production using Nutrient Film Technique (NFT)
[NASA-TM-107198] p 2902 N94-27411
Development of a sparging technique for volatile emissions from potato (Solanum tuberosum)
[NASA-TM-109199] p 2903 N94-27412

CROSS CORRELATION
Monaural and binaural processing of complex waveforms
[AD-A274209] p 3010 N94-27067

CROSS FLOW
Computational and Experimental Assessment of Jets in Cross Flow
[AGARD-CP-534] p 2799 N94-28003
Fifty years of jet in cross flow research
p 2799 N94-28004
Transient flow features of a supersonic jet in a low speed cross flow p 2800 N94-28005
Separated flow generated by a vectored jet in a crossflow p 2800 N94-28007
Scalar mixing in the subsonic jet in crossflow
p 2800 N94-28008
The interaction region associated with twin jets and a normal crossflow p 2800 N94-28009
Experimental data for CFD validation of impinging jets in crossflow with application to ASTOVL flow problems
p 2801 N94-28010
Topological structure of a jet in a cross flow
p 2801 N94-28014
An experimental study of siphonal jets in a turbulent boundary layer crossflow p 2802 N94-28015
Experiments on the ground vortex formed by an impinging jet in cross flow p 2802 N94-28016
Comparison of the interactions of two and three dimensional transverse jets with a hypersonic free stream p 2659 N94-28021
Experiments on interaction force of jets in hypervelocity cross-flow in a shock tunnel p 2659 N94-28022
A numerical investigation of a subsonic jet in a crossflow p 2803 N94-28023
Calculation of single and multiple jets in cross-flow with and without impingement using Reynolds-stress-transport closure p 2803 N94-28024
Predictions of momentum and scalar fields in a jet in cross-flow using first and second order turbulence closures p 2803 N94-28025
Navier-Stokes simulation of two and three dimensional jets in crossflow, effects of grid, and boundary conditions p 2804 N94-28026
Effects, limits, and limitations of spanwise blowing
p 2659 N94-28027
Theoretical and experimental investigation of a delta wing with turbulent leading-edge jets
p 2659 N94-28029
Recent developments in the simulation of steady and transient transverse jet interactions for missile, rotorcraft, and propulsive applications p 2804 N94-28030
Effects of free-stream turbulence on a jet in a cross flow p 2805 N94-28036
Navier-Stokes analysis of a swirling jet in crossflow
p 2806 N94-28038

CROSSED FIELDS
The three-dimensional hydrogen atom in crossed magnetic and electric fields
[DE94-606301] p 3029 N94-27847

CRRES (SATELLITE)
CRRES high energy proton flux map
[AD-A274803] p 2878 N94-26338
Modeling the DMSP and CRRES dosimeters using the path length distribution method
[RXR-93051] p 2698 N94-28200
The PROTEL contamination code
[RXR-93071] p 3040 N94-28202

CRUCIBLES
Basic research on levitation fusing/solidification technology p 2723 N94-25552
Study on reactions between molten metal and oxide by magnetic flotation dissolution method p 2725 N94-25558
CRUDE OIL
Feasibility study on introduction of transportation-use petroleum substitution energy [DE94-725205] p 2759 N94-26905
CRUSHING
Effects of slot on rock surface for percussive rock excavation: Water jet assisted percussive rock excavation p 2871 N94-28155
CRUSTAL FRACTURES
Crustal deformation measurements in the vicinity of Vandenberg Air Force Base [AD-A274166] p 2881 N94-27143
CRYOGENIC COOLING
A compact 150 GHz SIS receiver cooled by 4 K GM refrigerator [REPT-36] p 2776 N94-27340
CRYOGENIC EQUIPMENT
Experimental analysis of heat transfer characteristics and pressure drop through screen regenerative heat exchangers [AD-A273902] p 2790 N94-25657
CRYOGENIC TEMPERATURE
Study on phase transformation due to deformation in ferromagnetic fields at cryogenic condition p 2724 N94-25556
Study on characteristics and electronic structures of materials with strong electronic correlations by ferromagnetic fields p 2724 N94-25557
Influence of grain structure and solute composition on the work hardening behavior of aluminium at cryogenic temperatures [DE94-003415] p 2733 N94-26087
Cryogenic size reduction of solid propellant [AD-A274844] p 2759 N94-26800
Cryogenic fracture behavior of 316LN in magnetic fields up to 14.6 T [DE94-005215] p 2742 N94-27694
CRYOGENIC WIND TUNNELS
The cryogenic tunnel Cologne at DLR [DLR-MITT-93-10] p 2681 N94-27587
CRYOGENICS
Titanium 1992: Science and Technology, volume 1 [AD-A274798-VOL-1] p 2739 N94-26799
Cryogenic size reduction of solid propellant [AD-A274844] p 2759 N94-26800
Cryogenic insulation studies [NASA-CR-195266] p 2756 N94-27429
Evaluation of high temperature superconductive thermal bridges for space-borne cryogenic infrared detectors p 2815 N94-27921
CRYOSTATS
The TPX Cryostat Conceptual Design [DE94-002857] p 3045 N94-26863
CRYPTOGRAPHY
Single term off-line coins [CWI-CS-R9318] p 2776 N94-27546
An efficient off-line electronic cash system based on the representation problem [CWI-CS-R9323] p 2776 N94-27551
A modular approach to evaluation cryptographic protocols using Petri nets [ISBN-0-315-85354-9] p 2972 N94-27595
CRYSTAL DEFECTS
Failure mechanisms of high temperature semiconductor lasers [AD-A273833] p 2815 N94-25616
Hydrogen uptake into silicon from an ECR plasma [DE94-003771] p 3050 N94-25815
NNN-Ising model simulation of nanodomain textures in relaxor-type lead scandium tantalate [DE94-601884] p 2748 N94-25844
Radiation-Induced Structural Changes, 2 [DE93-520314] p 3054 N94-26109
Effect of temperature and recoil-energy spectra on irradiation-induced amorphization in Ca2La8(SiO4)6O2 [DE94-004371] p 3067 N94-27602
Influence of lattice damage on retention and transport of deuterium in beta silicon carbide [DE94-005206] p 3068 N94-27693
CRYSTAL FIELD THEORY
First principle calculation for magneto-crystalline anisotropy [DE93-634653] p 3052 N94-26012
CRYSTAL GROWTH
Study on utilization of super clean, high vacuum space p 2682 N94-25586
Buckyball microwave plasmas: Fragmentation and diamond-film growth [DE94-003209] p 3053 N94-26031
Analysis of the effect on growth kinetics of gamma prima phase in Inconel 713C alloys [DE93-633763] p 2735 N94-26294
Suppression of thermal grain growth in nickel by prior electron irradiation [DE94-004602] p 2737 N94-26587
Nonlinear dynamics and pattern selection at the crystal-melt interface [DE94-003112] p 3060 N94-26780
Development of K(1-x)Na(x)TiOPO4 crystals for nonlinear applications [AD-A274336] p 3063 N94-27055
Modelling of the MEA float zone using accelerometer data [NASA-CR-193933] p 2761 N94-27220
Advanced technology development multi-color holography [NASA-CR-193931] p 2812 N94-27229
Float zone crystal growth using laser radiation [DLR-FB-93-10] p 3066 N94-27590
Characterization of semi-insulating gallium arsenide [AD-A273781] p 3068 N94-27704
Technical report of ISSP. Ser. A, no. 2677: Octa-twin model of tetrapod ZnO crystals [JTN-94-80563] p 3069 N94-27756
Hydrothermal growth and characterization of oxides in zirconium alloys [DE94-602981] p 2743 N94-27829
Prometheus in space: Research Committee on Functional New Material [JTN-94-80580] p 2761 N94-28002
CRYSTAL LATTICES
Study on the mechanism of titanium alloy toughness and the improvement of properties p 2726 N94-25566
Study on improvement in physical analysis method of metallic materials p 2728 N94-25577
Lighter alkali hydride and deuteride 1: Electronic properties of pure solids [DE93-616188] p 3051 N94-25914
Formation of three types of quasi-crystals in Al-Pd-Mg system [REPT-A-2667] p 3053 N94-26071
Polar and chemical domain structures of lead scandium tantalate (PST) [DE94-600760] p 3056 N94-26363
Window least squares method applied to statistical noise smoothing of positron annihilation data [DE93-634665] p 3003 N94-26385
Multi-channel Kondo necklace [DE93-634754] p 3057 N94-26389
Technical report of ISSP. Ser. A, no. 2673: Two successive spin glass transitions in non-diluted Heisenberg-like spin glass Ni(0.42)Mn(0.58) TiO3 [JTN-94-80559] p 2756 N94-27241
Experimental measurement of local displacement and chemical pair correlations in crystalline solid solutions [DE94-001124] p 3065 N94-27251
Technical report of ISSP. Ser. A, no. 2669: Relations between oxygen deficiency and structures in the La-Sr-Cu-O system. 3: Oxygen contents and structure of (La, Sr)8Cu8O(16+delta) phase [JTN-94-80555] p 3066 N94-27353
Localization properties of one-dimensional electrified chains [DE94-603672] p 3067 N94-27635
Hyperfine structure of positronium energy levels in a crystal [DE94-603898] p 3068 N94-27729
Hydrogen physics [DE94-701317] p 2719 N94-27822
CRYSTAL STRUCTURE
Study on synthesis and characteristics of intermetallic compound with strong electron correlation p 2726 N94-25563
Study on computerized experiment of amorphous transformation process by solid phase reaction p 2726 N94-25564
Study on microscopic structural controls and electronic properties at material surfaces by ion beams p 2727 N94-25571
Microscopic study of local structure and charge distribution in metallic La2CuO(4+delta) [DE94-003801] p 3050 N94-25817
Aluminum-ion sputtering from Al surfaces with very-low-energy ions [REPT-A-2668] p 2733 N94-26073
The origins of ordering in CuPt [DE94-003864] p 2736 N94-26351
Polar and chemical domain structures of lead scandium tantalate (PST) [DE94-600760] p 3056 N94-26363
Problems of application of charged particles channeling effects in crystals in high-energy physics [DE93-634023] p 3032 N94-26405
Crystal chemistry and self-lubricating properties of monochalcogenides gallium selenide and tin selenide [DE93-041177] p 2751 N94-26422
The 27th Annual Meeting of the Israel Society for Microscopy and the 12th Annual Meeting of the Israel Society for Histochemistry and Cytochemistry [DE93-632416] p 2716 N94-26519
Deformation twinning: Influence of strain rate [DE94-002693] p 2738 N94-26621
Neutron and x ray scattering studies of the interactions between Ca(2+)-binding proteins and their regulatory targets: Comparisons of troponin C and calmodulin [DE94-002706] p 2901 N94-26623
The coordination and atom transfer chemistry of titanium porphyrin complexes [DE94-003091] p 2704 N94-26779
Electronic structure of a single oxygen vacancy in rutile TiO2 [DE94-602717] p 3062 N94-26901
Technical report of ISSP. Ser. A, no. 2673: Two successive spin glass transitions in non-diluted Heisenberg-like spin glass Ni(0.42)Mn(0.58) TiO3 [JTN-94-80559] p 2756 N94-27241
First principles calculations for the cleaved and annealed Ge(111) surfaces [DE93-617048] p 3066 N94-27347
Hyperfine structure of positronium energy levels in a crystal [DE94-603898] p 3068 N94-27729
Technical report of ISSP. Ser. A, no. 2677: Octa-twin model of tetrapod ZnO crystals [JTN-94-80563] p 3069 N94-27756
Characterization of ZnS-GaP naon-composites [DE94-004888] p 2712 N94-27813
Antarctic Record, Vol. 36, No. 2 [REPT-107] p 2683 N94-27963
Crystallographyic analyses of clathrate hydrates included in Vostok ice cores p 2885 N94-27969
CRYSTAL SURFACES
On line quantification of crystal surfaces by stereo imaging [NASA-CR-195277] p 3066 N94-27561
CRYSTALLINITY
The fracture behavior of a CVD crystalline Si3N4/amorphous Si3N4 composite [DE94-002646] p 2750 N94-26124
Crystal chemistry and self-lubricating properties of monochalcogenides gallium selenide and tin selenide [DE93-041177] p 2751 N94-26422
Octahedral metallomesogens: Liquid crystallinity in low aspect ratio materials [AD-A274830] p 3059 N94-26571
Electron microscopy studies of undoped and phosphorus doped Si:H and Si,C:H films [DE94-004738] p 3069 N94-27757
CRYSTALLITES
Bench-scale synthesis of nanoscale materials [DE94-004787] p 2742 N94-27786
CRYSTALLIZATION
Crystallization and microstructural control of ferroelectric thin-films and glass-ceramics [AD-A273767] p 2748 N94-25854
Oriented lead zirconate titanate thin films: Characterization of film crystallization [DE94-003104] p 3053 N94-26025
Fabrication technology [DE94-003017] p 2763 N94-26778
Mechanism of mechanical fatigue of silica glass [DE94-003165] p 2753 N94-26783
Morphology transitions during non-equilibrium growth processes [ITN-94-85236] p 3065 N94-27243
The Science Reports of the Research Institutes, Tohoku University. Series A: Physics, Chemistry, and Metallurgy. Volume 38, No. 1: Amorphous Materials 14 [JTN-94-80610] p 2744 N94-28158
Differential scanning calorimetric study of solid state amorphization and crystallization in Zr/Co and Zr/Ni multilayers p 2745 N94-28161
Formation and crystallization of hydrogen-induced amorphous Ti3InH(4.5) alloy p 2745 N94-28163
CRYSTALLOGRAPHY
Study on improvement in physical analysis method of metallic materials p 2728 N94-25577
Three-wave nonlinear interactions in KTiOPO4 (KTP) and KTP isomorphs [AD-A274079] p 3052 N94-25993
Cracking of textured zinc coating during forming process [DE94-003414] p 2750 N94-26085
Grain by grain study of the mechanisms of crack propagation during iodine SCC of Zry-4 [DE93-633765] p 2734 N94-26162
Liquid and solid solubility of Ag in Bi2Sr2CaCu2O8 [DE94-002829] p 2735 N94-26273

Developments in crystallographic phase analysis in the SEM: Backscattered electron Kikuchi patterns
[DE93-040755] p 3057 N94-26420

Crystallographyic analyses of clathrate hydrates included in Vostok ice cores p 2885 N94-27969

CRYSTALS

Three-wave nonlinear interactions in KTiOPO4 (KTP) and KTP isomorphs
[AD-A274079] p 3052 N94-25993

Cracking of textured zinc coating during forming process
[DE94-003414] p 2750 N94-26085

Determination of surface recombination velocity and bulk lifetime in detector grade silicon and germanium crystals
[DE94-003886] p 3053 N94-26094

Crystal potential retrieval in HRTEM
[DE94-601883] p 3055 N94-26171

Electron energy loss spectroscopy in a crystalline environment using inner shell ionization
[DE94-601820] p 3018 N94-26334

Polar and chemical domain structures of lead scandium tantalate (PST)
[DE94-600760] p 3056 N94-26363

Problems of application of charged particles channeling effects in crystals in high-energy physics
[DE93-634023] p 3032 N94-26405

Crystal chemistry and self-lubricating properties of monochalcogenides gallium selenide and tin selenide
[DE93-041177] p 2751 N94-26422

Design of a high-precision double crystal tunable monochromator
[DE94-003004] p 2811 N94-26787

Development of K(1-x)Na(x)TiOPO4 crystals for nonlinear applications
[AD-A274336] p 3063 N94-27055

Experimental measurement of local displacement and chemical pair correlations in crystalline solid solutions
[DE94-001124] p 3065 N94-27251

Characterization of semi-insulating gallium arsenide
[AD-A273781] p 3068 N94-27704

CULTIVATION

Development of Purkinje cells in vitro
p 2905 N94-27483

CULTURE TECHNIQUES

Development of Purkinje cells in vitro
p 2905 N94-27483

CUMULUS CLOUDS

Interactions between a tropical mixed boundary layer and cumulus convection in a radiative-convective model
[DE94-000848] p 2877 N94-25979

The numerical simulation of marine boundary layer clouds
[AD-A273669] p 2894 N94-26195

CURING

Technique to predict the curing behaviour of unsaturated polyester materials
[PB94-124856] p 2748 N94-25892

Modelling the inhibition cure behaviour of unsaturated polyester moulding materials
[PB94-124864] p 2748 N94-25893

Stress relaxation in dough moulding compounds
[PB94-124872] p 2748 N94-25894

An ultrasonic testing technique for monitoring the cure and mechanical properties of polymeric materials
[AD-A274536] p 2753 N94-26842

Phosphazene-containing amine as curing agent for phthalonitrile-base polymer
[AD-D016029] p 2755 N94-27147

Ultrasonic measurement technique to determine the state of cure in thermosetting materials
[PB94-124328] p 2756 N94-27217

Dual cure low-VOC coating process
[DE94-000365] p 2756 N94-27611

Property enchancement of polyimide films by way of the incorporation of lanthanide metal ions
p 2758 N94-27926

CURRENT ALGEBRA

The algebra of non-local charges in non-linear sigma models
[DE94-601563] p 2991 N94-25884

Vector meson exchanges and CP asymmetry in K(sup +/-) yields pi(sup +/-)pi(sup 0)
[DE94-601605] p 3014 N94-25887

Low-energy hadronic interactions beyond the current algebra approach
[DE94-602600] p 3022 N94-26900

CURRENT DENSITY

Electromagnetic properties of a toroidal solenoid
[DE93-613032] p 2766 N94-25866

Grain boundary degradation of YBCO superconductors sintered in CO2-containing atmospheres
[DE94-003206] p 3053 N94-26029

The potential for large critical currents in the high T(sub c) oxides p 2854 N94-26058

Investigation of a normal incidence high-performance p-type strained layer In(0.3)Ga(0.7)As / In(0.52)Al(0.48) as quantum well infrared photodetector
[AD-A274854] p 3055 N94-26188

Scaling of sustained ZT-40 M reversed field pinches
[DE94-003318] p 3043 N94-26321

Processing and properties of Ag-clad Bi-2223 tapes
[DE94-004603] p 2783 N94-26589

A mechanism for resistive dissipation in Ag sheathed Bi2Sr2CaCu2O8 and Bi2Sr2Ca2Cu3O10
[DE94-003009] p 3060 N94-26771

Evaluation of APC NbTi superconductor in a model dipole magnet
[DE94-003258] p 3060 N94-26795

Powder synthesis, fabrication, and transport properties of long-length Ag clad Bi-2223 conductors
[DE94-002376] p 2740 N94-26957

Channel model for AC electric arc
[PB94-124591] p 2786 N94-27327

Correlation between electrical activity and the size of single sinoatrial node cells p 2907 N94-27513

CURRENT DISTRIBUTION

An optimal constrained linear inverse method for magnetic source imaging
[DE94-004014] p 2957 N94-25663

An optimal constrained linear inverse method for magnetic source imaging
[DE94-002264] p 2996 N94-26936

Modeling of the coupled magnetospheric and neutral wind dynamos
[NASA-CR-195273] p 2883 N94-27852

CURVATURE

Combining shape and color information for 3D object recognition
[AD-A274123] p 2967 N94-27064

On the model of the relativistic particle with curvature and torsion
[DE94-606330] p 3029 N94-27848

CURVE FITTING

Piecewise least squares fitting technique using finite interval method with Hermite polynomials
[VTT-PUBS-135] p 2990 N94-25733

Aspects of goodness-of-fit
[AD-A274826] p 3003 N94-26495

CURVES (GEOMETRY)

A theory of multi-scale, curvature and torsion based shape representation for planar and space curves
[ISBN-0-315-63894-X] p 2974 N94-27805

CYCLES

Characteristics and development report for the T1576 power supply and the MC3935 battery
[DE94-003675] p 2783 N94-26372

Lyapunov exponents for some quasi-periodic cocycles
[PB94-124377] p 2997 N94-26994

CYCLIC AMP

The polymodal receptor p 2908 N94-27539

CYCLIC HYDROCARBONS

Analytical method for estimation of the total amount of aromatic and poly aromatic compounds in diesel fuel
[PB94-123692] p 2759 N94-25907

CYCLIC LOADS

Growth of small fatigue cracks in Incoloy-908
[DE94-003406] p 2836 N94-26129

Limitations of power conversion systems under transient loads and impact on the pulsed tokamak power reactor
[DE94-003404] p 3043 N94-26324

Computer modelling of cyclic deformation of high-temperature materials
[AD-A274504] p 2840 N94-27034

An experimental investigation of fatigue damage in aluminum 2024-T3 alloys p 2747 N94-27900

Propeller off-axis loads due to thrust axis incidence and nacelle magnus force p 2652 N94-28319

CYCLOGENESIS

Mesoscale frontal evolution of the ERICA IOP-5A Cyclone
[AD-A274906] p 2893 N94-26183

CYCLONES

Development and testing of the Coupled Ocean/Atmosphere Mesoscale Prediction System (COAMPS)
[AD-A273925] p 2892 N94-25793

A modeling study of the mesocyclone
[AD-A274889] p 2893 N94-26168

Mesoscale frontal evolution of the ERICA IOP-5A Cyclone
[AD-A274906] p 2893 N94-26183

Tropical cyclone report, 1992
[AD-A274464] p 2896 N94-27025

CYCLOTRON FREQUENCY

Design of folded waveguide antenna for Alcator C-Mod
[DE94-003584] p 2767 N94-25924

RF modeling and design of a folded waveguide launcher for the Alcator C-Mod tokamak
[DE94-003588] p 3041 N94-25933

Design and control of phased ICRF antenna arrays
[DE94-002796] p 3046 N94-27261

CYCLOTRON RADIATION

Hydrogen uptake into silicon from an ECR plasma
[DE94-003771] p 3050 N94-25815

Development of fusion technology
[DE93-633444] p 3042 N94-26159

CYCLOTRON RESONANCE

Hydrogen uptake into silicon from an ECR plasma
[DE94-003771] p 3050 N94-25815

Plasma surface cleaning using microwave plasmas
[DE94-002754] p 2713 N94-26014

Compton Gamma Ray Observatory/BATSE observations of energetic electrons scattered by cyclotron resonance with waves from powerful VLF transmitters
[NASA-CR-195240] p 3115 N94-26790

On radio frequency wave induced radial transport and wave helicity
[IPPCZ-326] p 2777 N94-27838

The ZnO thin films with C-axis orientation prepared on the room temperature substrate by the ECR multipolar plasma sputtering method
[DE94-605039] p 2758 N94-27857

CYCLOTRON RESONANCE DEVICES

Electrical analysis of wideband and distributed windows using time-dependent field codes
[DE94-002987] p 2768 N94-26310

Computer simulations of radiation generation from relativistic electron beams
[AD-A274139] p 3024 N94-27133

Mode analysis of gyrotron oscillation using a k-spectrometer
[DE94-701195] p 2813 N94-27703

CYCLOTRONS

TRIUMF scientific activities
[CTN-94-61062] p 3117 N94-26656

A direct current rectification scheme for microwave space power conversion using traveling wave electron acceleration p 2687 N94-27371

CYLINDRICAL ANTENNAS

Numeric solution of the electric field integral equation using Galerkin's method for axially symmetric cases
[ESA-TT-1264] p 2768 N94-26315

CYLINDRICAL BODIES

Flow past a circular cylinder with a permeable wake splitter plate
[AD-A273765] p 2790 N94-25872

SAG compensated vibration isolation mount
[AD-D016040] p 2841 N94-27110

Research on bluff body vortex wakes
[AD-A273780] p 2796 N94-27319

Wave propagation in the shallow regions of the earth's crust and the borehole vicinity
[ITN-94-85237] p 2882 N94-27330

Direct simulation Monte-Carlo of near continuum hypersonic flow with chemical reactions
[DLR-FB-93-01] p 2797 N94-27588

Circular cylinder in axial flow
[ISBN-0-315-59114-5] p 2798 N94-27873

CYLINDRICAL COORDINATES

Wave propagation in the shallow regions of the earth's crust and the borehole vicinity
[ITN-94-85237] p 2882 N94-27330

CYLINDRICAL SHELLS

Series solution for a cylindrical composite shell subject to axisymmetric loadings
[ISBN-0-315-60559-6] p 2844 N94-27810

CYLINDRICAL WAVES

Theoretical and experimental investigation of converging cylindrical shock waves propagating in narrow cylindrical chambers
[ISBN-0-315-84694-1] p 2795 N94-27313

D

DAMAGE

Study on variation of damage generation mechanism by fatigue on TiAl compounds due to different slip systems p 2729 N94-25579

Study on elucidation of damage generation process by electron beam lithography p 2729 N94-25581

Study on evaluation of crack generation and crack growth behaviors under static loading at high temperature and under combined loading p 2730 N94-25583

Investigation of plasma etch induced damage in compound semiconductor devices
[DE94-002849] p 3052 N94-25989

Ion implantation of diamond: Damage, doping, and lift-off
[DE94-001133] p 3054 N94-26137

Damage tolerance assessment handbook. Volume 1: Introduction fracture mechanics fatigue crack propagation
[AD-A274777] p 2836 N94-26186

Design and life-time of polymer matrix composite structures: Summary
[VTT-TIED-1415] p 2707 N94-26260

Damage tolerance assessment handbook. Volume 2: Aircraft damage tolerance evaluation
[AD-A274778] p 2837 N94-26357

Deformation, constitutive behavior, and damage of advanced structural materials under multiaxial loading
[AD-A274165] p 2709 N94-27142

DAMAGE ASSESSMENT

Study on elucidation of damage generation process by electron beam lithography p 2729 N94-25581

Effect of impact face damage on strength of sandwich composites
[VTT-PUBS-128] p 2704 N94-25734

Meeting of the Eighth Session of the Scientific Advisory Committee of the World Climate Impact Assessment and Response Strategies Programme
[DE93-633954] p 2866 N94-26163

Aircraft wheel life assessment
[AD-A274378] p 2823 N94-26976

Development of an automated fracture assessment system for nuclear structures (appendix 1/1)
p 2841 N94-27187

Testing procedure for toughness characterisation of ceramic matrix composites
[REPT-932-430-101] p 2711 N94-27586

DAMPING

Kinetic resonance damping rate of the toroidal ion temperature gradient mode
[DE94-003511] p 3041 N94-25923

Proceedings of Damping 1993, volume 1
[AD-A274226] p 2840 N94-26922

Extraction of modal parameters from an operating HAWT using the Natural Excitation Technique (NExT)
[DE94-001831] p 2859 N94-27004

Multiple model adaptive control of a large flexible space structure with purposeful dither for enhanced identifiability
[AD-A274132] p 2987 N94-27122

An improvement in the modified finite element procedure for underwater shock analysis
[DE94-004451] p 2797 N94-27617

DARK MATTER

The meaning of EROS/MACHO
[DE94-003003] p 3104 N94-26311

DATA ACQUISITION

Distributing functionality in the drift scan camera system
[DE94-003640] p 2809 N94-25599

Naval Interactive Data Analysis System (NIDAS), software user's manual
[NASA-CR-195179] p 2956 N94-25606

Autonomous support for microorganism research in space p 2903 N94-25672

Predicting nonlinear time series
[AD-A274051] p 2990 N94-25834

Comparative investigation of high-latitude ionospheric structure and effects near solar maximum
[AD-A273799] p 2877 N94-25877

Digital control and data acquisition for high-value GTA welding
[DE94-000885] p 2821 N94-25980

Remote Earth Sciences data collection using ACTS
[NASA-CR-195227] p 2848 N94-26236

Auxiliary controller for time-to-digital converter module readout
[DE93-634172] p 2948 N94-26266

New Thomson scattering laser control for D3-D
[DE94-002890] p 3043 N94-26274

Overall analysis of meteorological information in the Daeduk nuclear complex
[DE93-632594] p 2894 N94-26469

New FORTRAN computer programs to acquire and process isotopic mass spectrometric data: Operator's manual
[DE94-003174] p 2965 N94-26784

Memory subsystem performance of programs using copying garbage collection
[AD-A274258] p 3099 N94-27014

Monaural and binaural processing of complex waveforms
[AD-A274209] p 3010 N94-27067

Conifer tree influence on Digital Terrain Elevation Data (DTED): A case study at Dulles International Airport
[AD-A274213] p 2849 N94-27069

An XCP user's guide and reference manual
[AD-A274519] p 2900 N94-27090

Interchangeable end effector tools utilized on the PFMA
[NASA-CR-193925] p 2823 N94-27149

Meteorological data at the Nagaoka Institute of Snow and Ice Studies
[REPT-158] p 2896 N94-27169

Development of an automatic fatigue-data acquisition system using commercial software
[NAL-TM-650] p 2842 N94-27207

CMT-Si
[PB94-123619] p 2812 N94-27216

Advanced development of particle beam probe diagnostic system
[DE94-002316] p 3047 N94-27720

Computer aided data recording and analyzing system for the engine test p 2764 N94-27979

DATA BASE MANAGEMENT SYSTEMS

Naval Interactive Data Analysis System (NIDAS), software user's manual
[NASA-CR-195179] p 2956 N94-25606

Standardizing exchange formats
[DE93-616798] p 3095 N94-25751

Performance measurement of three commercial object-oriented database management systems
[AD-A274028] p 3096 N94-25765

Source code for the OO1 benchmark and the AFIT simulation benchmark
[AD-A274035] p 2958 N94-25799

Hypermedia support for engineering design systems: Application to fatigue analysis
[VTT-TIED-1432] p 2837 N94-26255

OPM Scheme Editor 2: A graphical editor for specifying object-protocol structures
[DE94-003477] p 2962 N94-26327

Hanford Environmental Information System (HEIS) sample/data entry flow summary
[DE94-002494] p 3098 N94-26559

Design considerations when using external hypertext engines from applications
[DE94-002213] p 3098 N94-26598

Retrieval using plausible inference
[AD-A274252] p 3099 N94-27013

Bibliographic Retrieval System (BARS) Sandia Shock Compression (SSC) database Shock Physics Index (SPHINX) database, volume 3
[DE94-001705] p 3099 N94-27022

Active database architectures and the design of sentinel for constraint management
[AD-A274205] p 3099 N94-27101

Design and implementation of a DBMS performance assessment tool
[CWI-CS-R9270] p 2972 N94-27576

The TMIS life-cycle process document, revision A
[NASA-TM-109698] p 2697 N94-27775

Concurrent shadow paging: Snapshots, read-only transactions, and on-the-fly multi-level incremental dumping
[PB94-133139] p 3100 N94-28385

DATA BASES

Knowledge base systems for chemical compounds designing support p 2723 N94-25550

Study on knowledge extraction and systematization for material design p 2727 N94-25568

Comparative investigation of high-latitude ionospheric structure and effects near solar maximum
[AD-A273799] p 2877 N94-25877

The effect of elevation data representation on nocturnal drainage wind simulations
[DE94-003624] p 2892 N94-25936

Using database technology to support domain-oriented application composition systems
[AD-A274091] p 3096 N94-26024

Index to BROND-2, CENDL-2, ENDF/B-6, JEF-2, JENDL-3
[DE93-634500] p 3016 N94-26034

Software redesign for usability: A case study
[DE94-003704] p 2960 N94-26048

Design and implementation of a query editor for the Amadeus system
[AD-A274955] p 3097 N94-26300

Scientific and Technical Information (STI)....what's the status?
[DE94-003731] p 3097 N94-26348

International energy: Research organizations, 1988-1992
[DE93-017267] p 3098 N94-26398

US Army aviation epidemiology data registry: Incidence and outcomes of aviator flying evaluation boards
[AD-A274711] p 2910 N94-26432

Hanford Environmental Information System (HEIS) sample/data entry flow summary
[DE94-002494] p 3098 N94-26559

A formalization of objects using equational dynamic logic
[PB94-125218] p 2965 N94-26852

Monograph of the aviation epidemiology data register for calendar year 1988
[AD-A274589] p 2911 N94-26985

Orientation competition in cortical filters
[PB94-125366] p 2939 N94-27001

An object-oriented database interface for Ada
[AD-A274391] p 2968 N94-27075

Active database architectures and the design of sentinel for constraint management
[AD-A274205] p 3099 N94-27101

Monograph of the Aviation Epidemiology Data Register for CY 1992
[AD-A274400] p 2911 N94-27130

Schema integration in object-oriented databases
[CWI-CS-R9320] p 2970 N94-27548

NSWC Crane Aerospace Cell Test History Database
p 2860 N94-28102

Variability of measured sonic boom signatures
p 2651 N94-28197

Concurrent shadow paging: Snapshots, read-only transactions, and on-the-fly multi-level incremental dumping
[PB94-133139] p 3100 N94-28385

DATA COMPRESSION

Probabilistic methods for image generation and encoding
[AD-A274294] p 2964 N94-26682

Trapezoid-oriented compression of run length coded map data
[PB94-123312] p 2849 N94-26848

Encoding approaches for data link transmission of weather graphics
[AD-A274497] p 2772 N94-26963

Image quality analysis of compressed synthetic aperture radar imagery
[AD-A273399] p 2774 N94-27170

SPECTRUM analysis of multispectral imagery in conjunction with wavelet/KLT data compression
[DE94-003961] p 2851 N94-27727

The 1994 Space and Earth Science Data Compression Workshop
[NASA-CP-3255] p 2945 N94-28251

An image assessment study of image acceptability of the Galileo low gain antenna mission
p 2945 N94-28252

Image compression software for the SOHO LASCO and EIT experiments p 2945 N94-28253

Comparison of the lossy image data compressions for the MESUR Pathfinder and for the Huygens Titan Probe
p 2945 N94-28254

Advanced End-to-end Simulation for On-board Processing (AESOP) p 2945 N94-28255

Performance considerations for the application of the lossless browse and residual model
p 2946 N94-28256

Image quality measures and their performance
p 2946 N94-28257

A comparison of spectral decorrelation techniques and performance evaluation metrics for a wavelet-based, multispectral data compression algorithm
p 2946 N94-28258

A comparative study of SAR data compression schemes p 2946 N94-28259

Perceptual compression of magnitude-detected synthetic aperture radar imagery p 2946 N94-28260

Compression of multispectral Landsat imagery using the Embedded Zerotree Wavelet (EZW) algorithm
p 2947 N94-28261

Vector quantizer designs for joint compression and terrain categorization of multispectral imagery
p 2947 N94-28262

Wavelet compression techniques for hyperspectral data p 2947 N94-28263

Some practical aspects of lossless and nearly-lossless compression of AVHRR imagery p 2947 N94-28264

DATA CONVERSION ROUTINES

PATRAN 2.5/EAL interface guide
[NASA-TM-109053] p 2972 N94-27655

DATA FLOW ANALYSIS

Parallel Assessment Window System (PAWS) enhancements
[AD-A274094] p 2979 N94-25786

Run-time recognition of task parallelism within the P++ parallel array class library
[DE94-002707] p 2980 N94-26120

Survey of visualization and analysis tools
[NASA-TM-108436] p 2809 N94-26150

Enhanced adaptive statistical filter providing improved performance for target motion analysis noise discrimination statement of government interest
[AD-D016039] p 2786 N94-27109

DATA INTEGRATION

Data analysis and data fusion for intelligence analysis and decision support. Research plan 1993-2000
[PB94-123569] p 3005 N94-27173

Circulars of the Electrotechnical Laboratory. No. 223: An extended survey on provable information base systems
[JTN-94-80550] p 3100 N94-27336

Multi-sensor data fusion in a distributed environment: Architectural solutions
[NLR-TP-92243-U] p 2989 N94-27800

DATA LINKS
System design analysis of a lightweight laser satellite terminal
[AD-A274033] p 2690 N94-25769
Airborne data link operational evaluation test plan
[AD-A274096] p 2664 N94-25788
Code division multiple access local area network communications employing fiber optic signal processing techniques
[AD-A274897] p 3096 N94-26160
Laser-based communication link
[FFI-93/7023] p 2817 N94-26203
Optoelectronic technology consortium
[AD-A274595] p 3036 N94-26857
Encoding approaches for data link transmission of weather graphics
[AD-A274497] p 2772 N94-26963
Packet radio data link applications in the NASA Langley Research Center Transport Systems Research Vehicle
[NASA-TM-109071] p 2665 N94-27423

DATA MANAGEMENT
Rendering of three-dimensional data sets derived from finite-difference and spectral methods
[AD-A273724] p 3096 N94-25997
Using database technology to support domain-oriented application composition systems
[AD-A274091] p 3096 N94-26024
The High Performance Storage System
[DE94-004351] p 2948 N94-26578
The NOGAPS ten year AMIP integration
[AD-A274332] p 2900 N94-26887
An object-oriented database interface for Ada
[AD-A274391] p 2968 N94-27075
Researches of the Electrotechnical Laboratory. No. 955: Speech recognition by description of acoustic characteristic variations
[JTN-94-80604] p 2775 N94-27249
Circulars of the Electrotechnical Laboratory. No. 223: An extended survey on provable information base systems
[JTN-94-80550] p 3100 N94-27336
Global change research related to the Earth's energy and hydrologic cycle
[NASA-CR-195270] p 2869 N94-27430
Efficient rebalancing of tree-type main memory dictionaries
[PB94-133105] p 3100 N94-28396

DATA PROCESSING
Repeated knots in least squares multiquadric functions
[AD-A273866] p 2990 N94-25594
Naval Interactive Data Analysis System (NIDAS), software user's manual
[NASA-CR-195179] p 2956 N94-25606
A data processing system at the hybrid spectrometer
[DE93-616801] p 3013 N94-25828
Set based analysis of arithmetic
[AD-A274112] p 3002 N94-25903
Survey of visualization and analysis tools
[NASA-TM-108436] p 2809 N94-26150
Parametric analysis of the space power plants on the base of criterion of specific mass in generalized design variants
[DE93-634153] p 2701 N94-26166
Numerical treatment of experimental data in calibration procedures
[DE93-634289] p 3097 N94-26382
On the reliability of a window least squares algorithm
[DE93-634666] p 2962 N94-26386
Separation and reconstruction of electron neutrino interaction in the IHEP-JINR neutrino detector and BARS detector
[DE93-634182] p 3019 N94-26393
Usefulness of compile-time restructuring of LGDF programs in throughput-critical applications
[AD-A274915] p 2963 N94-26530
Automatic test case generation using PROLOG
[NPL-DITC-215/93] p 2964 N94-26655
DUSOL: Improved software for analysis of ultrasonic velocity data on anisotropic materials
[NPL-DMM(A)-104] p 2965 N94-26816
A preliminary method for atmospheric soundings in real time using satellite and ground-based remotely sensed data
[AD-A274381] p 2880 N94-26828
Optoelectronic technology consortium
[AD-A274595] p 3036 N94-26857
Compilation of corrections for postprocessing of laser bathymetry data
[PB94-123668] p 2900 N94-27156
DALIA: A language for the description and analysis of digital systems p 2954 N94-27192
Pigs in cyberspace p 2689 N94-27376
On modeling and controlling intelligent systems
[DE94-002446] p 2988 N94-27706
SPECTRUM analysis of multispectral imagery in conjunction with wavelet/KLT data compression
[DE94-003961] p 2851 N94-27727
ADP Analysis project for the Human Resources Management Division p 2978 N94-27927
Computer aided data recording and analyzing system for the engine test p 2764 N94-27979

DATA PROCESSING EQUIPMENT
A data processing system at the hybrid spectrometer
[DE93-616801] p 3013 N94-25828
Fast parallel algorithms for short-range molecular dynamics
[DE93-018519] p 3016 N94-26033
Description of the Experimental Avionics Systems Integration Laboratory (EASILY)
[NASA-TM-109072] p 2681 N94-27425

DATA REDUCTION
Repeated knots in least squares multiquadric functions
[AD-A273866] p 2990 N94-25594
Survey of visualization and analysis tools
[NASA-TM-108436] p 2809 N94-26150
Analysis and interpretation of the meteorology of the 1988 coastal transition zone experiment
[AD-A274710] p 2894 N94-26431
Data analysis and data fusion for intelligence analysis and decision support. Research plan 1993-2000
[PB94-123569] p 3005 N94-27173
Quick-look system of auroral absorption images by imaging riometer p 2884 N94-27968

DATA RETRIEVAL
Standardizing exchange formats
[DE93-616798] p 3095 N94-25751

DATA SAMPLING
Development of digital resampling and pulse compression computer software
[DREP-92-32] p 2969 N94-27318

DATA STORAGE
Standardizing exchange formats
[DE93-616798] p 3095 N94-25751
Out of core, out of mind: Practical parallel I/O
[DE94-003107] p 2979 N94-25952
The High Performance Storage System
[DE94-004351] p 2948 N94-26578
On-board software for the JET-X telescope on the Spectrum-X mission p 2951 N94-26727
Virtual data
[DE94-002718] p 2986 N94-26807
High-speed, high-density, coherent time-domain optical memory
[AD-A274249] p 3037 N94-27010
Memory subsystem performance of programs using copying garbage collection
[AD-A274258] p 3099 N94-27014
Memory subsystem performance of programs with intensive heap allocation
[AD-A274122] p 2967 N94-27063
Aviation Epidemiology Data Register: Indexing the AEDR document laser optic archive
[AD-A274185] p 2911 N94-27097
Garbage collection in a multiprocessor Smalltalk system
[ISBN-0-315-51159-1] p 2982 N94-27332

DATA STRUCTURES
Multimedia in Views
[CWI-CS-R9263] p 2961 N94-26218
Editing tree structures
[CWI-CS-R9264] p 2961 N94-26219
Hypermedia support for engineering design systems: Application to fatigue analysis
[VTT-TIED-1432] p 2837 N94-26255
Circulars of the Electrotechnical Laboratory. No. 223: An extended survey on provable information base systems
[JTN-94-80550] p 3100 N94-27336
Computer code for controller partitioning with IFPC application: A user's manual
[NASA-CR-195291] p 2678 N94-27414
Concurrent shadow paging: Snapshots, read-only transactions, and on-the-fly multi-level incremental dumping
[PB94-133139] p 3100 N94-28385
Efficient rebalancing of tree-type main memory dictionaries
[PB94-133105] p 3100 N94-28396

DATA SYSTEMS
Computing in space: Issues and answers
p 2948 N94-26714
NASA's spacecraft data system p 2950 N94-26723
Circulars of the Electrotechnical Laboratory. No. 223: An extended survey on provable information base systems
[JTN-94-80550] p 3100 N94-27336
Report of the National Research Institute for Earth Science and Disaster Prevention, No. 51
[JTN-94-80509] p 2886 N94-27985
Observation with STS seismometer at Nakaizu, central Japan: Observation system and comparison with tiltmeter p 2886 N94-27986
Development of a method for predicting snowfall intensity and compacted snow on roads
p 2853 N94-27990
Conception of snow information network system in Yamagata Prefecture p 2853 N94-27991

DATA TRANSFER (COMPUTERS)
The use of ASN.1 and XDR for data representation in real-time distributed systems
[AD-A273769] p 2959 N94-25855
Out of core, out of mind: Practical parallel I/O
[DE94-003107] p 2979 N94-25952
Design and specification of the Xpress transfer high-speed protocol
[AD-A274941] p 3097 N94-26297
PDEF: A standard file format for data interchange
[AD-A274694] p 3098 N94-26451

DATA TRANSMISSION
Meteor Burst Communications (MBC) throughput improvement tests
[AD-A273941] p 2767 N94-25990
Design and specification of the Xpress transfer high-speed protocol
[AD-A274941] p 3097 N94-26297
Modeling and simulation of a fiber distributed data interface local area network
[AD-A274838] p 3098 N94-26500
Optoelectronic technology consortium
[AD-A274595] p 3036 N94-26857
An efficient off-line electronic cash system based on the representation problem
[CWI-CS-R9323] p 2776 N94-27551
Communication on the Paragon
[DE94-003103] p 2983 N94-27713
Image quality measures and their performance
p 2946 N94-28257
A comparison of spectral decorrelation techniques and performance evaluation metrics for a wavelet-based, multispectral data compression algorithm
p 2946 N94-28258
Open communication in manufacturing automation
[PB94-132479] p 2976 N94-28377

DAWN CHORUS
Memories of National Institute of Polar Research. Series A-19. Upper atmosphere physics: ELF emission in high latitudes: Ray path calculation and ground-satellite observations
[JTN-94-80592] p 2882 N94-27342

DAYGLOW
Analysis of EUV/FUV dayglow and auroral measurements
[NASA-CR-195237] p 2883 N94-27393

DE HAVILLAND AIRCRAFT
Wind tunnel investigation of propfan slipstream/wing interactions on a De Havilland air motor powered semispan model at Mach numbers 0.6 and 0.7
p 2651 N94-28316
Flow field investigation in the near slipstream of an 8-bladed propfan on the De Havilland WTEJ half-model at Mach numbers 0.6 and 0.7 p 2651 N94-28317
Assessing the effects of Tuned Vibration Absorbers (TVAs) on interior cabin noise levels: A correlation between analytical acoustic predictions and flight test measurements p 2652 N94-28318

DEAD RECKONING
Dead reckoning navigation
[VTT-TIED-1402] p 2664 N94-25808

DEATH
Evaluation and improvement of the inquest system on work accidents (TOT)
[VTT-TIED-1418] p 2762 N94-26261

DEBONDING (MATERIALS)
Investigation of compressive behavior for metal matrix composites with a circular hole
[AD-A273835] p 2705 N94-25739
Numerical simulations of interfacial debonding in ductile-phase reinforced intermetallic matrix composites
[DE94-003639] p 2706 N94-25938

DEBRIS
Safety standards for aircraft shelter
[FFI-92/4003] p 2680 N94-26305
Physics of debris clouds from hypervelocity impacts
[NASA-CR-193932] p 2696 N94-26791
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle mission STS-60
[NASA-TM-109193] p 2692 N94-27956

DECAY RATES
Study of invisible nucleon decay, N approaches nu nu nu bar, and a forbidden nuclear transition in the Kamiokande detector
[ICRR-299-93-11] p 3028 N94-27759
Dynamics of metastable states in supersonic beams
[ITN-94-85232] p 3028 N94-27760

DECISION MAKING

The effect of the time restrictions on information search and information integration in a dynamic task environment
[AD-A273759] p 3095 N94-25723

Developing realistic cooperative behaviors for autonomous agents in air combat simulation
[AD-A274077] p 2937 N94-25774

Implementing a multiple criteria model base in co-op with a graphical user interface generator
[AD-A274901] p 3093 N94-26181

Automated information management for designers: Functional requirements for computer based associates that support access and use of technical information in design
[AD-A274603] p 3099 N94-26891

Interactive control of a parallel simulation from a remote graphics workstation
[AD-A274217] p 2981 N94-27070

Practical problems in aggregating expert opinions
[DE94-002623] p 3094 N94-27707

Intertemporal bargaining and dynamic consistency
[PB94-133147] p 3095 N94-28386

DECISION THEORY

Rational handling of multiple goals for mobile robots
[NASA-CR-195177] p 2985 N94-26006

DECODERS

The Communication Link and Error ANalysis (CLEAN) simulator
[NASA-CR-195243] p 2968 N94-27168

Telecommand decoder specification
[ESA-PSS-04-151-ISSUE-1] p 2693 N94-27583

DECODING

Coded communications with nonideal interleaving
[ITN-94-85235] p 2774 N94-27242

DECOMPOSITION

Satellite attitude determination using linear combination of models
[AD-A274082] p 2694 N94-25996

The importance of vibrationally excited nitrogen in silicon nitride deposition systems
[AD-A274874] p 2750 N94-26167

Implementation and performance of a domain decomposition algorithm in Sisal
[DE94-002012] p 2981 N94-27092

The PRISM project: Infrastructure and algorithms for parallel eigensolvers
[DE94-005125] p 2973 N94-27717

DECONDITIONING

Workshop on Countering Space Adaptation with Exercise: Current Issues
[NASA-CP-3252] p 2934 N94-28361

DECOUPLING

Dimensional crossover from non-renormalizability to renormalizability
[DE93-613052] p 3006 N94-26193

DEEP SPACE

High performance flight computer developed for deep space applications p 2949 N94-26718

Space Station technology testbed: 2010 deep space transport p 2687 N94-27368

DEFECTS

General Motors Corporation and Pacific Northwest Laboratory staff exchange: Inspection of case hardened steels and metal-matrix composites
[DE94-003470] p 2706 N94-25982

Modeling defect production in high energy collision cascades
[DE94-003810] p 3017 N94-26049

Oxygen reduction at a YSZ interface with cathode materials La(1-x)(Ca or Sr)(x)MnO3(1-x)CaMnO3
[DE94-002954] p 3054 N94-26147

Study of the homogeneity of InP wafers
[AD-A273658] p 3055 N94-26194

Design and life-time of polymer matrix composite structures: Summary
[VTT-TIED-1415] p 2707 N94-26260

Influence of point defects on grain boundary diffusion in oxides
[DE94-003164] p 3060 N94-26782

Investigation of ACC/CCI tunnel diodes
[AD-A274549] p 2785 N94-26845

Indium donor complexes with cation vacancies in CdTe and ZnSe
[DE94-002731] p 3063 N94-26958

Squeeze casting: A literature review
[PB94-124575] p 2741 N94-27326

Characterization of semi-insulating gallium arsenide
[AD-A273781] p 3068 N94-27704

DEFENSE COMMUNICATIONS SYSTEM (DCS)

Ir-fibers in a laser threat warning system and robot shot warning system
[PB94-124476] p 3038 N94-27209

DEFENSE INDUSTRY

Future of aerospace
[PB94-120185] p 2669 N94-26906

DEFENSE PROGRAM

An assessment of testing requirement impacts on nuclear thermal propulsion ground test facility design
[DE94-002933] p 2702 N94-26560

Report of the defense science board task force on aircraft assessment
[AD-A274531] p 2669 N94-26835

Satellite navigation system GPS: A review of principles and performance and developments in general
[PB94-124534] p 2665 N94-27210

Defense force management: Challenges facing DOD as it continues to downsize its civilian work force. Report to the Chairman, Subcommittee on Federal Services, Post Office, and Civil Service, Committee on Governmental Affairs, US Senate
[GAO/NSIAD-93-123] p 3095 N94-28177

DEFLECTORS

Micro-electron deflector
[AD-D016055] p 2787 N94-27672

DEFORESTATION

Assessment of tropical forests using satellite data
[SILVA-CARELICA-21] p 2850 N94-27182

Global tropical forest cover assessments using satellite imagery p 2850 N94-27183

Mapping closed tropical forest cover in West Africa using NOAA/AVHRR-LAC data p 2850 N94-27184

Training on assessment and mapping of deforestation: WFW conference, Brazil
[INPE-5482-PRE/1781] p 2850 N94-27384

Role of remote sensing in energy, water, and carbon cycle studies over the Amazon
[INPE-5486-PRE/1786] p 2852 N94-27957

Mission to Planet Earth: A program to understand global environmental change
[NASA-PAM-556] p 2869 N94-27958

DEFORMATION

Study on phase transformation due to deformation in ferromagnetic fields at cryogenic condition
p 2724 N94-25556

Study on elucidation of damage generation process by electron beam lithography p 2729 N94-25581

Radiation hardening effects on localized deformation and stress corrosion cracking of stainless steels
[DE94-004308] p 2731 N94-25804

Influence of grain structure and solute composition on the work hardening behavior of aluminium at cryogenic temperatures
[DE94-003415] p 2733 N94-26087

Users manual for CATNIP: A Computer Analysis Tool for Normal Impact Penetration
[DE94-003671] p 2962 N94-26371

Deformation, constitutive behavior, and damage of advanced structural materials under multiaxial loading
[AD-A274165] p 2709 N94-27142

Crustal deformation measurements in the vicinity of Vandenberg Air Force Base
[AD-A274166] p 2881 N94-27143

Effect of precipitate structure on hot deformation of Al-Mg-Mn alloys
[DE94-004596] p 2741 N94-27622

The deformation of copper-tungsten composites
[ISBN-0-315-84939-8] p 2712 N94-27688

The estimation of pre-stress by deformation rate analysis and suggestion of a mechanism from the elast-plastical theory p 2871 N94-28156

Studies in ice mechanics
[PB94-133055] p 2900 N94-28393

DEGASSING

Experimental study of lunar and SNC (Mars) magmas
[NASA-CR-195274] p 3107 N94-27850

DEGRADATION

Failure mechanisms of high temperature semiconductor lasers
[AD-A273833] p 2815 N94-25616

Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparison and verification of methods
[DE94-003664] p 2749 N94-26007

DEGREES OF FREEDOM

Optimal control design advantages utilizing two-degree-of-freedom controllers
[AD-A273839] p 2984 N94-25743

Parameter estimation of linear systems from frequency response measurements (computer program)
[ESDU-93016] p 2976 N94-28137

DELAMINATING

The effects of embedded internal delaminations on composite laminate compression strength; an experimental review
[NASA-TM-108440] p 2707 N94-26127

Interface phenomena in metal-ceramic composites
[AD-A274167] p 2709 N94-27125

DELTA WINGS

Supercruiser Arrow HS-8 p 2671 N94-25711

Computation of transonic viscous flow past the NTF 65-degree Delta Wing p 2659 N94-27930

Normal force of low aspect ratio cropped-delta wings at pre-stall angles of attack and subsonic speeds
[ESDU-93034] p 2648 N94-27955

Control jets in interaction with hypersonic rarefied flow
p 2698 N94-28020

Theoretical and experimental investigation of a delta wing with turbulent leading-edge jets
p 2659 N94-28029

DEMAND (ECONOMICS)

Methodology development of forecasting inter-regional air transport demand in China
[DLR-FB-93-24] p 2660 N94-27746

Air traffic in recession p 2662 N94-28240

DEMAND ASSIGNMENT MULTIPLE ACCESS

Analysis of a multiaccess/switching technique for multibeam satellites in a prioritized ISDN environment
[ISBN-0-315-84632-1] p 2776 N94-27345

DEMODULATION

Analysis of linear combining and its application to frequency-hopped signals
[ISBN-0-315-84007-2] p 2770 N94-26624

Development of digital resampling and pulse compression computer software
[DREP-92-32] p 2969 N94-27318

DEMODULATORS

A fast Fourier transform radix-2 complex butterfly with built-in self-test
[ISBN-0-315-84139-7] p 2982 N94-27649

DEMOGRAPHY

Monograph of the Aviation Epidemiology Data Register for CY 1992
[AD-A274400] p 2911 N94-27130

DENSE PLASMAS

A study of the global properties of hadronic matter at large densities
[ISBN-0-315-57234-5] p 3025 N94-27260

DENSITY (MASS/VOLUME)

Advances in preparing and characterizing low density pan-carbon microcellular foam
[DE94-002278] p 2748 N94-25932

Orthobaric densities and molar volumes of liquids: Aliphatic and cyclic ketones
[ESDU-93010] p 2720 N94-28060

Solubility, viscosity, and density of refrigerant/lubricant mixtures
[DE94-004237] p 2721 N94-28069

DENSITY (NUMBER/VOLUME)

Quantum statistical inference for density estimation
[DE94-002625] p 3073 N94-26805

DENSITY DISTRIBUTION

Neutron reflection interferometry
[DE94-601876] p 2714 N94-26170

Gaseous hydrogen/oxygen injector performance characterization
[NASA-CR-194464] p 2701 N94-26208

On the application of Allan variance method for Ring Laser Gyro performance characterization
[DE94-003880] p 2810 N94-26525

DENSITY MEASUREMENT

An optimal constrained linear inverse method for magnetic source imaging
[DE94-004014] p 2957 N94-25663

Upper atmosphere neutral and plasma density modeling
[AD-A274768] p 2879 N94-26569

Laser blow-off lithium beam probing with high temporal resolution for edge plasma diagnostics
[DE94-701176] p 2820 N94-27701

DEOXYRIBONUCLEIC ACID

Molecular biological studies on the human radioresistance and drug resistance
[DE93-632682] p 2910 N94-26549

Cloning of rat RXR alpha cDNA and the expression of its mRNA in regenerating liver and primary cultured hepatocytes p 2905 N94-27479

Construction and test of experiment hardware for a space experiment on Spacelab mission IML-2
[DLR-FB-93-23] p 2903 N94-27743

DEPOSITION

Characterization of the energy deposition produced by the primary electron beam on the EXCEDE 3 program. Appendix B and C
[AD-A273878] p 3012 N94-25726

Mechanistic studies of opto-electronic materials and syntheses using multiple laser and surface diagnostics
[AD-A274528] p 3036 N94-26834

Equivalent performance in different helical resonator plasma polymerization coater platforms
[DE94-001517] p 2753 N94-26933

Synthesis of diamond film assisted by an arcjet plasma source, part 2
[INPE-5527-PRP/178-PT-2] p 3066 N94-27329

The ZnO thin films with C-axis orientation prepared on the room temperature substrate by the ECR multipolar plasma sputtering method
[DE94-605039] p 2758 N94-27857

DEPTH
Users manual for CATNIP: A Computer Analysis Tool for Normal Impact Penetration
[DE94-003671] p 2962 N94-26371

DEPTH MEASUREMENT
Compilation of corrections for postprocessing of laser bathymetry data
[PB94-123668] p 2900 N94-27156
Scanview: A grafical program for analysis of laserbathymetry data
[PB94-124443] p 2900 N94-27208

DESCENT
Examples of flight path optimisation using a multivariate gradient-search method
[ESDU-93021] p 2670 N94-28092
Using formal specification in the Guidance and Control Software (GCS) experiment. Formal design and verification technology for life critical systems
[NASA-CR-194884] p 2956 N94-28267

DESCRIPTIONS
DALIA: A language for the description and analysis of digital systems p 2954 N94-27192

DESERTIFICATION
Meeting of the Eighth Session of the Scientific Advisory Committee of the World Climate Impact Assessment and Response Strategies Programme
[DE93-633954] p 2866 N94-26163

DESIGN ANALYSIS
Aircraft maneuvers for the evaluation of flying qualities and agility. Volume 1: Maneuver development process and initial maneuver set
[AD-A273913] p 2666 N94-25590
Systematic Propulsion Optimization Tools (SPOT)
p 2976 N94-25666
Pressurized Lunar Rover (PLR) p 2833 N94-25704
System design analysis of a lightweight laser satellite terminal
[AD-A274033] p 2690 N94-25769
Design analysis of a combined optical/LADAR deep-space surveillance satellite
[AD-A274040] p 2694 N94-25832
Aircraft maneuvers for the evaluation of flying qualities and agility. Volume 3: Simulation data
[AD-A273814] p 2667 N94-25961
Parametric analysis of the space power plants on the base of criterion of specific mass in generalized design variants
[DE93-634153] p 2701 N94-26166
Response surface design: comparisons
[AD-A274690] p 2838 N94-26448
Handbook of photovoltaic power generating design for introduction
[DE94-725199] p 2858 N94-26913
Orbital transfer rocket engine technology 7.5K-LB thrust rocket engine preliminary design
[NASA-CR-190754] p 2703 N94-27213
Design and experimental performance of a two stage partial admission turbine. Task B.1/B.4
[NASA-CR-179548] p 2824 N94-27228
Rocket engine numerical simulation
p 2688 N94-27375
Planetary Instrument Definition and Development Program (PIDDP). Instrument for future planetary flight missions: A visible-infrared imaging spectrometer for planetary missions
[NASA-CR-195254] p 3106 N94-27409
Investigation of aerodynamic design issues with regions of separated flow p 2658 N94-27902
Object-oriented development methods
p 2975 N94-27938
The deterministic power-spectral-density-method for nonlinear systems
[AD-B179687] p 3001 N94-28353

DESORPTION
Evaluation of a Canadian minitube air sampling system
[FOA-C-40307-4.6] p 2866 N94-25809
The reactivity of lithium toward non-aqueous solvents of relevance to energy storage applications as studied by surface analytical techniques
[DE94-003483] p 2856 N94-26464
Adsorption and desorption studies of cesium on sapphire surfaces
[DE94-003798] p 3070 N94-28067

DETECTION
FNAS lightning detection
[NASA-CR-193927] p 2893 N94-26134
Summaries of BFRL fire research in-house projects and grants, 1993
[PB94-121050] p 2763 N94-26756
Finding the missing pieces of the standard model
[ISBN-0-315-57174-8] p 3024 N94-27259
Mapping of seawater intrusion into the coastal aquifer of Israel (the seawater-freshwater interface) by TDEM (Time Domain Electromagnetic) method
[ITN-94-85238] p 2850 N94-27331
Trace organic chemical detection using an ultraviolet excitation molecular beam fluorometer
[DE94-002649] p 2704 N94-27708
Effects of historical and predictive information on ability of transport pilot to predict an alert
[NASA-TM-4547] p 2673 N94-27864
Effects of expected-value information and display format on recognition of aircraft subsystem abnormalities
[NASA-TP-3395] p 2673 N94-27882
Fiber optic sensors for corrosion detection
p 3040 N94-27923

DETONATION
Numerical simulation of the reignition of detonation by reflected shocks
[AD-A274755] p 2795 N94-27252
Propellants and explosives in ballistic missiles
[UCRL-LR-113578] p 2760 N94-28222

DETONATION WAVES
Shock wave interaction with L-shaped structures
[AD-A273774] p 2790 N94-25858
Numerical simulation of the reignition of detonation by reflected shocks
[AD-A274755] p 2795 N94-27252
Mach reflection of spherical detonation waves
[DE93-016604] p 2797 N94-27705
Consequences of impacts of small asteroids and comets with Earth p 2889 N94-28301

DEUTERIDES
Lighter alkali hydride and deuteride 1: Electronic properties of pure solids
[DE93-616188] p 3051 N94-25914
The reactivity of lithium toward non-aqueous solvents of relevance to energy storage applications as studied by surface analytical techniques
[DE94-003483] p 2856 N94-26464

DEUTERIUM
High-speed repetitive pellet injector for plasma fueling of magnetic confinement fusion devices
[DE94-002792] p 3042 N94-26140
New conditioning procedure derived from operating experience with the Common Long-Pulse Ion Source
[DE94-002891] p 3045 N94-26865
High gas-efficiency hydrogen negative ion sources
[PB93-232163] p 3025 N94-27348
Influence of lattice damage on retention and transport of deuterium in beta silicon carbide
[DE94-005206] p 3068 N94-27693
Ion-driven permeation of deuterium in metals
[DE94-701104] p 2744 N94-27876

DIAGNOSIS
The effect of the time restrictions on information search and information integration in a dynamic task environment
[AD-A273759] p 3095 N94-25723
Gordon Research Conference on the Physics and Chemistry of Laser Diagnostics in Combustion
[AD-A274609] p 2716 N94-26893

DIALYSIS
Effect of sera from patients treated with long-term hemodialysis on mRNA's for collagenase, stromelysin, and tissue inhibitor of metalloprotease in cultured human synovial cells p 2920 N94-27481

DIAMAGNETISM
Technical report of ISSP. Ser. A, no. 2678: Magnetic properties of carbon nanotubes
[JTN-94-80564] p 3064 N94-27174

DIAMOND FILMS
Buckyball microwave plasmas: Fragmentation and diamond-film growth
[DE94-003209] p 3053 N94-26031
Growth, characterization and device development in monocrystalline diamond films
[AD-A274245] p 3060 N94-26839
Fabrication and characterization of nano-crystalline diamond films
[DE94-002202] p 3062 N94-26934
Interface properties of wide bandgap semiconductor structures
[AD-A274356] p 3063 N94-27058
Synthesis of diamond film assisted by an arcjet plasma source, part 2
[INPE-5527-PRP/178-PT-2] p 3066 N94-27329

DIAMONDS
Molecular beam mass spectrometry studies of the chemical vapor deposition of diamond
[DE94-003802] p 3049 N94-25601
Collaborative research on ion implantation of ceramics
[DE93-019177] p 2749 N94-26080
Ion implantation of diamond: Damage, doping, and lift-off
[DE94-001133] p 3054 N94-26137
Regrowth zones in laser annealed radiation damaged diamond
[DE94-600821] p 3056 N94-26364
Fabrication technology
[DE94-003017] p 2763 N94-26778
He(+) and H(+) microbeam damage, swelling and annealing in diamonds
[DE94-601912] p 3063 N94-26987
Technical report of ISSP. Ser. A, no. 2675: High-field cyclotron resonance and valence-band structure in semiconducting diamond
[JTN-94-80561] p 3065 N94-27245

DIAPHRAGMS (MECHANICS)
Fluid dynamic linear accelerometer
[AD-D016042] p 2678 N94-27112
Development of liquid membrane separation processes p 2717 N94-27386
Glass cylindrical filter for electrolysis cell
p 2718 N94-27391

DICTIONARIES
Correspondence dictionary from free English term to INIS descriptors
[DE94-701173] p 3100 N94-27700

DIELECTRIC POLARIZATION
Dielectric polarizability of sphere with arbitrary anisotropy
[PB94-133113] p 2779 N94-28397

DIELECTRIC PROPERTIES
NNN-Ising model simulation of nanodomain textures in relaxor-type lead scandium tantalate
[DE94-601884] p 2748 N94-25844
Refractive and dielectric properties of helium, argon and nitrogen gases
[PB94-123783] p 3008 N94-26851
Calculation of the electromagnetic critical state response of high T(sub c) superconductor tape
[DE94-002894] p 3061 N94-26868

DIELECTRICS
Optimization of experimental conditions in IR reflectance determination of BPSG properties
[DE94-002742] p 2713 N94-25978
Joint services electronics program
[AD-A274643] p 2785 N94-27027
Ferroelectric fluoride memory FET development
[AD-A274341] p 2785 N94-27057
Effective conductivity of wire mesh reflectors for space deployable antenna systems
[NASA-CR-191605] p 2788 N94-27770
Electromagnetic modeling of bi-isotropic media
[PB94-132909] p 2778 N94-28382

DIESEL ENGINES
The emission characteristics of a high speed diesel engine p 2764 N94-27980
Development of advanced high temperature in-cylinder components and tribological systems for low heat rejection diesel engines, phase 1
[NASA-CR-187158] p 2827 N94-27984

DIESEL FUELS
Analytical method for estimation of the total amount of aromatic and poly aromatic compounds in diesel fuel
[PB94-123692] p 2759 N94-25907

DIFFERENTIAL AMPLIFIERS
Object imaging accomplished with an integrated circuit robotic tactile sensor incorporating a piezoelectric polyvinylidene fluoride thin film
[AD-A274038] p 2780 N94-25845

DIFFERENTIAL CALCULUS
Towards a theory of growing surfaces: Mapping two-dimensional Laplacian growth onto Hamiltonian dynamics and statistics
[DE94-002636] p 2991 N94-26079
Quantum subgroups and quantum co-set spaces and differential calculi on them
[DE94-602520] p 3073 N94-26876
A superprocess with a disappearing self-interaction
[AD-A274647] p 3009 N94-27108

DIFFERENTIAL EQUATIONS
Phase portraits of quadratic systems with finite multiplicity three and one critical point of infinity
[REPT-93-41] p 2991 N94-26215
On the error committed by stopping the Newton iteration in implicit Runge-Kutta methods
[TW-93-02] p 2992 N94-26229
On the phi(sub 0)-stability of perturbed nonlinear differential systems
[DE93-634304] p 2993 N94-26441
Cone-valued Lyapunov functions and the stability of stochastic differential equations
[DE94-601504] p 2994 N94-26458
On the (Phi)(sub 0)-stability of functional differential equations
[DE94-601507] p 3006 N94-26460
On a spline-approximation method for solving ordinary differential equations
[DE93-634290] p 2994 N94-26471

Kinetic equation identification from measurement of a particular solution
[DE93-634585] p 2995 N94-26768

Nonlinear hysteresis in an endochronic solid
[AD-A274594] p 2880 N94-26855

Poisson-lie group of pseudodifferential symbols
[PB94-124393] p 2997 N94-26996

A superprocess with a disappearing self-interaction
[AD-A274647] p 3009 N94-27108

White noise theory of robust nonlinear filtering with correlated state and observation noises
[PB94-126661] p 3004 N94-27211

Finite time differential equations and their application to control systems
[ISBN-0-315-85158-9] p 2988 N94-27277

Fractional calculus, gegenbauer transformations and integral equations
[PB93-237683] p 2999 N94-27349

Parallel implicit unstructured grid Euler solvers
[NASA-CR-191594] p 2999 N94-27434

Numerical experiment on finite element method for matching data
[DE94-701208] p 3000 N94-27731

DIFFERENTIAL GEOMETRY

Enumeration of n-fold tangent hyperplanes to a surface
[DE94-601544] p 2993 N94-26412

Quantum Hamiltonian differential geometry: How does quantization affect space?
[DE93-634306] p 2993 N94-26442

Quantum group and Manin plane related to a colored braid group representation
[DE94-601509] p 3072 N94-26461

Hotine's (omega, phi, nu) coordinate system
[PL-TR-93-2174] p 3001 N94-28216

DIFFERENTIAL PRESSURE

Fluid dynamic linear accelerometer
[AD-D016042] p 2678 N94-27112

DIFFRACTION

A study of two dimensional tapered periodic edge treatments to reduce wideband edge diffraction
[AD-A274054] p 2766 N94-25824

A new materials data compilation can help in actinide phase-diagram research
[DE94-000797] p 3058 N94-26514

Joint services electronics program
[AD-A274643] p 2785 N94-27027

Wave propagation in the shallow regions of the earth's crust and the borehole vicinity
[ITN-94-85237] p 2882 N94-27330

Inductive differentiation of nerve cells in mouse embryonic ectoderm at early primitive streak stage by retinoic acid p 2905 N94-27488

Optical parametric oscillator modeling with diffraction, depletion, and double refraction
[DE94-001504] p 3040 N94-27999

DIFFRACTION PATHS

Developments in the application of the geometrical theory of diffraction and computer graphics to aircraft inter-antenna coupling analysis
[ISBN-0-315-84643-7] p 2776 N94-27308

DIFFRACTION PATTERNS

Debye-Waller factors of the light actinide metals
[DE94-000685] p 2733 N94-26069

Advanced technology development multi-color holography
[NASA-CR-193931] p 2812 N94-27229

DIFFUSE RADIATION

Illumination in diverse codimensions
[NASA-CR-191596] p 2971 N94-27572

DIFFUSION

A Shuttle mechanism for molten-electrolyte lithium batteries
[DE94-002914] p 2781 N94-26144

Diffusion of substitutional elements in Ti in its hcp phase
[DE93-633762] p 2733 N94-26160

Longitudinal diffusion of a proton bunch under external noise
[DE93-634022] p 3032 N94-26165

Numerical solution of singularity-perturbed two-point boundary-value problems
[DE94-601542] p 2993 N94-26410

Simplified high-efficiency silicon cell processing
[DE94-002683] p 2857 N94-26617

A robust upwind discretization method for advection, diffusion and source terms
[CWI-NM-R9308] p 2868 N94-26774

Influence of point defects on grain boundary diffusion in oxides
[DE94-003164] p 3060 N94-26782

A superprocess with a disappearing self-interaction
[AD-A274647] p 3009 N94-27108

Ion-driven permeation of deuterium in metals
[DE94-701104] p 2744 N94-27876

DIFFUSION COEFFICIENT

Study on alloy films for hydrogen separation
p 2726 N94-25565

Study on substance diffusion in thin films with controlled structures p 2727 N94-25570

Longitudinal diffusion of a proton bunch under external noise
[DE93-634022] p 3032 N94-26165

Influence of point defects on grain boundary diffusion in oxides
[DE94-003164] p 3060 N94-26782

DIFFUSION PUMPS

A large high vacuum, high pumping speed space simulation chamber for electric propulsion
[NASA-TM-106453] p 2690 N94-26142

DIFFUSION THEORY

Arbitrary-order numerical schemes for model parabolic equations
[CRANFIELD-AERO-9210] p 3005 N94-25781

DIFFUSION WELDING

Method of bonding molybdenum to steel
[AD-D016079] p 2747 N94-28187

Joining of fibre reinforced metal matrix composite materials
[PB94-132453] p 2712 N94-28376

DIFFUSIVITY

Longitudinal diffusion of a proton bunch under external noise
[DE93-634022] p 3032 N94-26165

A transient symmetrical method for the measurement of temperature dependent thermal diffusivity
[VTT-TIED-1452] p 3008 N94-26256

Numerical solution of singularity-perturbed two-point boundary-value problems
[DE94-601542] p 2993 N94-26410

Calculation of single and multiple jets in cross-flow with and without impingement using Reynolds-stress-transport closure p 2803 N94-28024

DIGITAL COMPUTERS

Developing a graphical user interface to support a real-time digital signal processing system
[AD-A274032] p 2960 N94-26018

DIGITAL DATA

PDEF: A standard file format for data interchange
[AD-A274694] p 3098 N94-26451

Conifer tree influence on Digital Terrain Elevation Data (DTED): A case study at Dulles International Airport
[AD-A274213] p 2849 N94-27069

DIGITAL ELECTRONICS

Bundle Intensity and Beamgate Length recorder (BIBL)
[DIGEL-1993-7] p 3031 N94-25619

Digital input module
[DIGEL-1993-6] p 2779 N94-25620

Test methods and custom hardware for functional testing of a high speed GaAs DRAM
[AD-A274859] p 2781 N94-26175

Processing, fabrication, and demonstration of HTS integrated microwave circuits, appendix A
[AD-A274600] p 2785 N94-26890

DALIA: A language for the description and analysis of digital systems p 2954 N94-27192

Coherence and satisfiability of waveform timing specifications
[ISBN-0-315-57769-X] p 3009 N94-27268

DIGITAL FILTERS

Detection of transient vector-fields in additive noise
[FFI-93/7028] p 2768 N94-26232

Kalman filtering of narrowband interference from direct sequence spread spectrum communications systems
[ISBN-0-315-84011-0] p 2784 N94-26627

An integrated delta-sigma based IIR filter
[ISBN-0-315-83593-1] p 2784 N94-26631

Digital filter design for sensor simulation: Application to the Brazilian remote sensing satellite
[INPE-5523-RPQ/665] p 2849 N94-26827

Validation tests of TOPSIM 4
[ESA-STM-249] p 2972 N94-27582

DIGITAL SIMULATION

Digital filter design for sensor simulation: Application to the Brazilian remote sensing satellite
[INPE-5523-RPQ/665] p 2849 N94-26827

DIGITAL SYSTEMS

The question of standards for digital interactive television
[AD-A273872] p 2765 N94-25725

Digital control and data acquisition for high-value GTA welding
[DE94-000885] p 2821 N94-25980

Meteor Burst Communications (MBC) throughput improvement tests
[AD-A273941] p 2767 N94-25990

Digital systems validation book plan. Volume 3: Handbook
[AD-A274099] p 2672 N94-26028

Optimization of Vector Product Format (VPF) data for map background display in army tactical systems
[AD-A274687] p 2848 N94-26446

A current evaluation of the digital beamforming testbed at Rome Laboratory
[AD-A274311] p 3032 N94-26881

DALIA: A language for the description and analysis of digital systems p 2954 N94-27192

Pulse control method and its characteristics
[DE94-701187] p 2989 N94-27809

A simulator investigation of helicopter flight control system mode transitions
[UTIAS-348] p 2682 N94-27879

DIGITAL TECHNIQUES

A current evaluation of the digital beamforming testbed at Rome Laboratory
[AD-A274311] p 3032 N94-26881

Pulse control method and its characteristics
[DE94-701187] p 2989 N94-27809

DIGITAL TELEVISION

The question of standards for digital interactive television
[AD-A273872] p 2765 N94-25725

DIGITAL TO ANALOG CONVERTERS

Fast generator of program waveforms signals
[DE93-634230] p 2948 N94-26381

Inverted pendulum control apparatus using transputers
[DE94-701224] p 2973 N94-27732

DIMENSIONAL MEASUREMENT

Automated in-situ inspection systems for underground storage tanks
[AD-A274644] p 2764 N94-27144

DIMENSIONAL STABILITY

A materials compatibility study in FM-1, a liquid component of a paste extrudable explosive
[DE94-001166] p 2759 N94-26198

DIMERS

A Shuttle mechanism for molten-electrolyte lithium batteries
[DE94-002914] p 2781 N94-26144

DIODES

Investigation of plasma etch induced damage in compound semiconductor devices
[DE94-002849] p 3052 N94-25989

Diode-laser-pumped, gas-cell atomic clocks
[AD-A274812] p 3008 N94-26484

DIOPHANTINE EQUATION

Symmetric and asymmetric diophantine approximation by continued fractions
[PB94-126455] p 2998 N94-27030

DIPOLE ANTENNAS

Receiving antennas for electromagnetic pulses and transients
[ISBN-0-315-62312-8] p 2777 N94-27871

DIPOLE MOMENTS

Polarizability matrix of layered chiral sphere
[PB94-132834] p 2778 N94-28355

DIRAC EQUATION

The Dirac equation in Kerr spacetime, spheroidal coordinates and the M.I.T. bag model of hadrons
[DE94-601566] p 3006 N94-25886

On Poisson brackets and symplectic structures for the classical and quantum Zitterbewegung
[DE93-634305] p 2992 N94-26267

On the relativistic invariant representation of arbitrary bilinear combinations of Dirac spinors
[DE93-634343] p 3019 N94-26456

DIRECT CURRENT

Review of tokamak experiments on direct electron heating and current drive with fast waves
[DE94-004185] p 3041 N94-25801

Preparation and characterization of high temperature superconductor film surfaces
[AD-A274293] p 3059 N94-26681

A direct current rectification scheme for microwave space power conversion using traveling wave electron acceleration p 2687 N94-27371

Image theory for DC problems involving a conducting half space bounded by the general anisotropic impedance surface
[PB94-132917] p 2779 N94-28390

DIRECTION FINDING

Prewhitening of colored noise fields for detection of threshold sources
[AD-A274346] p 3010 N94-26923

DIRECTIONAL CONTROL

Pneumatic management of blunted-forebody flow asymmetry for high-angle-of-attack directional control
p 2679 N94-28028

DIRECTIONAL COUPLERS

An electronic switch based on quantum interference
[ISBN-0-315-84609-7] p 2787 N94-27650

DIRECTIONAL SOLIDIFICATION (CRYSTALS)

Study on production of materials with one direction solidification texture p 2727 N94-25572

Nonlinear dynamics and pattern selection at the crystal-melt interface
[DE94-003112] p 3060 N94-26780

DIRICHLET PROBLEM
Numerical solution of singularity-perturbed two-point boundary-value problems
[DE94-601542] p 2993 N94-26410

DISARMAMENT
Contributions to CD Space Committee 1992
[PB94-124401] p 3101 N94-27218

DISCOLORATION
A materials compatibility study in FM-1, a liquid component of a paste extrudable explosive
[DE94-001166] p 2759 N94-26198

DISCONTINUITY
Iron: What is melt?
[DE94-003373] p 2735 N94-26322

DISCRETE FUNCTIONS
Some aspects of nonlinear discrete-time descriptor systems in economics
[PB94-126653] p 3101 N94-26918

DISCRIMINATORS
The continuum spectral characteristics of gamma ray bursts observed by BATSE p 3114 N94-26686

DISEASES
NCVS, volume 5
[AD-A274975] p 2902 N94-27165
Compaction-like blastomere aggregation caused by 1-oleoyl-2-acetylglycerol in mouse embryos: An electron microscopic observation p 2905 N94-27487
Anorectal malformations induced by intraperitoneal injection of all-trans retinoic acid in suncus
p 2905 N94-27489
Enhancement of skin sympathetic nerve activity in amyotrophic lateral sclerosis p 2930 N94-27532

DISK OPERATING SYSTEM (DOS)
Users guide for GRIKURV: A code for drawing graphs
[PB94-123593] p 2968 N94-27154

DISKS (SHAPES)
Guidelines for unlubricated sliding wear tests. Part 2: Procedures for pin-on-disc testing
[PB94-123270] p 2825 N94-27324

DISORIENTATION
Standardization of aircraft control and performance symbology on the USAF head-up display
[AD-A274283] p 2673 N94-26989

DISPERSING
Process modelling of aluminium alloys. Modelling of the quench sensitivity of alloy AA6082
[PB94-124567] p 2741 N94-27325

DISPERSION
Cad of GeO2-SiO2 double-layer core dispersion-shifted single-mode fibre
[DE93-634325] p 3035 N94-26383

DISPLACEMENT
Structure and properties of intermetallic composites synthesized in situ using solid state displacement reactions
[DE94-004312] p 2705 N94-25805

DISPLACEMENT MEASUREMENT
Experimental measurement of local displacement and chemical pair correlations in crystalline solid solutions
[DE94-001124] p 3065 N94-27251

DISPLAY DEVICES
Image quality and the display modulation transfer function: Experimental findings
[AD-A274061] p 2679 N94-25773
IRMA: A program for three-dimensional color display of data
[AD-A273811] p 2959 N94-25879
The National Center for Advanced Information Components Manufacturing: Program update
[DE94-002647] p 2960 N94-26118
Color head down display program
[AD-A274807] p 2672 N94-26340
A graphical workstation based part-task flight simulator for preliminary rapid evaluation of advanced displays
p 2641 N94-27286
VENI, video, VICI: The merging of computer and video technologies p 2686 N94-27362
An artificial reality environment for remote factory control and monitoring p 2687 N94-27369
Multiple exposure CCD detector for high-speed laser pump, x ray probe Laue scattering
[DE94-004618] p 2820 N94-27781

DISSIPATION
A mechanism for resistive dissipation in Ag sheathed Bi2Sr2CaCu2O8 and Bi2Sr2Ca2Cu3O10
[DE94-003009] p 3060 N94-26771

DISSOLVING
Dissolution of secondary phases during extrusion
[PB94-124583] p 2732 N94-25908

DISTANCE
The effect of body orientation on the perception of vertical and horizontal distance in an outdoor setting
p 2915 N94-27461

DISTORTION
Implications for high speed research: The relationship between sonic boom signature distortion and atmospheric turbulence p 2650 N94-28190

DISTRIBUTED PARAMETER SYSTEMS
Module interconnection frameworks for a real-time spreadsheet
[AD-A273853] p 2956 N94-25588
Operator theoretic methods in the control of distributed and nonlinear systems
[AD-A274160] p 2988 N94-27139

DISTRIBUTED PROCESSING
Module interconnection frameworks for a real-time spreadsheet
[AD-A273853] p 2956 N94-25588
The use of ASN.1 and XDR for data representation in real-time distributed systems
[AD-A273769] p 2959 N94-25855
Weapon system sensor integration for a DIS-compatible virtual cockpit
[AD-A274088] p 2672 N94-26021
Coordinated scheduling for dynamic real-time systems
[NASA-CR-195231] p 3093 N94-26206
NPSNET-4: A real-time, 3D distributed interactive virtual world
[AD-A274942] p 2961 N94-26298
Parallel grid generation algorithm for distributed memory computers
[NASA-TP-3429] p 2963 N94-26466
Usefulness of compile-time restructuring of LGDF programs in throughput-critical applications
[AD-A274915] p 2963 N94-26530
Computational strategies for three-dimensional flow simulations on distributed computer systems
[NASA-CR-195249] p 2793 N94-26595
Fault-tolerant scheduling in distributed critical real-time systems p 2952 N94-26735
Specification performance optimization and executive generation for onboard multiprocessor real time application with SynDEx p 2954 N94-26745
Parallel matrix transpose algorithms on distributed memory concurrent computers
[DE94-002424] p 2964 N94-26764
Central dynamic share scheduling in distributed systems
[REPT-93-48] p 2966 N94-26966
Trace-based compositional proof theory for fault tolerant distributed systems
[PB94-126737] p 2966 N94-26971
Parallel computers for advanced information processing p 2955 N94-27193
Simulating fail-stop in asynchronous distributed systems
[NASA-CR-195698] p 2974 N94-27767
Multi-sensor data fusion in a distributed environment: Architectural solutions
[NLR-TP-92243-U] p 2989 N94-27800
Proceedings of Workshop on Distributed Computing and Network
[DE94-701165] p 2983 N94-27804
Review and analysis of dense linear system solver package for distributed memory machines
p 2978 N94-27916

DISTRIBUTION (PROPERTY)
Developmental expression of protein kinase C type 1 isozyme in suncus and rat cerebella
p 2905 N94-27484

DISTRIBUTION FUNCTIONS
Isotonic estimation and rates of convergence in Wicksell's problem
[REPT-93-39] p 3002 N94-26213
Aspects of goodness-of-fit
[AD-A274826] p 3003 N94-26495
Estimation and tests-of-fit for the three parameter Weibull distribution
[AD-A274827] p 3004 N94-26496
Delta f Algorithm
[DE94-003120] p 2963 N94-26521
Relativistic collision rate calculations for electron-air interactions
[DE94-004204] p 3020 N94-26527
Symmetric and asymmetric diophantine approximation by continued fractions
[PB94-126455] p 2998 N94-27030

DISTRIBUTORS
Optimising BMW four-cylinder two-valve engines
[PB94-125101] p 2824 N94-27254

DISULFIDES
Voltammetric studies of poly(carbon disulfide)
[DE94-001385] p 2717 N94-26951

DITHERS
Multiple model adaptive control of a large flexible space structure with purposeful dither for enhanced identifiability
[AD-A274132] p 2987 N94-27122

DIURETICS
Protective action of an amiloride derivative (amiloride, 5-(N, N-dimethyl) hydrochloride) against in isolated ischemia/reperfusion newborn rabbit hearts
p 2904 N94-27466

DIURNAL VARIATIONS
Upper atmosphere neutral and plasma density modeling
[AD-A274768] p 2879 N94-26569
Initial ultraviolet-B intensity data at Lawrence Livermore National Laboratory
[DE94-004279] p 2869 N94-27267
Changes in circadian variations of urine excretion in tail-suspended rats p 2911 N94-27443

DIVERGENCE
High energy parton-parton elastic scattering in QCD
[DE94-003432] p 3028 N94-27736

DIVERTERS
Evaluation of helium cooling for fusion divertors
[DE94-002680] p 3042 N94-25976
Proceedings of the Second EGS4 User's Meeting in Japan
[DE93-520383] p 3032 N94-26543
Fusion reactor systems studies
[DE94-003162] p 3046 N94-27686

DMSP SATELLITES
Investigation of ACC/CCI tunnel diodes
[AD-A274549] p 2785 N94-26845
Leadex environmental phenomena and effects observed by DMSP, NOAA, and ERS-1 satellites
[AD-A274596] p 2868 N94-26888
DMSP satellites as gamma ray burst detectors
[DE94-004977] p 3116 N94-27793
Modeling the DMSP and CRRES dosimeters using the path length distribution method
[RXR-93051] p 2698 N94-28200

DOCUMENT STORAGE
Electronic document distribution: Design of the anonymous FTP Langley Technical Report Server
[NASA-TM-4567] p 2971 N94-27573

DOCUMENTS
Full-text information services at the desktop
[DE94-003728] p 3096 N94-25813
Scientific and Technical Information (STI)....what's the status?
[DE94-003731] p 3097 N94-26348

DOMAINS
Polar and chemical domain structures of lead scandium tantalate (PST)
[DE94-600760] p 3056 N94-26363

DOMES (STRUCTURAL FORMS)
A laboratory test on construction of ice domes and their load-carrying capacity p 2884 N94-27966

DOPA
Effect of L-dopa on hemodynamic functions in humans p 2929 N94-27526

DOPED CRYSTALS
Electric-field dependence of electroreflectance and photocurrent spectra at visible wavelengths in MOVPE-grown InAlGaP multiple strained quantum-well structures
[DE94-004692] p 2780 N94-25664
Microscopic study of local structure and charge distribution in metallic La2CuO(4+delta)
[DE94-003801] p 3050 N94-25817
MBE grown 3 to 5 strain relaxed buffer layers and superlattices characterized by atomic force microscopy
[DE94-002931] p 3056 N94-26308
Calorimeter with WLS fibers and parallel to beam scintillators
[DE93-634188] p 2810 N94-26378
On the electron mobility in slightly compensated heavily doped gallium arsenide at low temperatures
[DE93-634712] p 3057 N94-26387
Research and development of alternative components at Argonne National Laboratory for Molten Carbonate Fuel Cells
[DE94-000014] p 2857 N94-26583
MSOFC development status
[DE94-003192] p 2858 N94-26792
Effect of impurity correlation on the density of states in slightly compensated heavily doped semiconductors
[DE94-602539] p 3061 N94-26879
Ion implantation and dynamic recovery of tin-doped indium oxide films
[DE94-001126] p 3062 N94-26932
Indium donor complexes with cation vacancies in CdTe and ZnSe
[DE94-002731] p 3063 N94-26958
Development of K(1-x)Na(x)TiOPO4 crystals for nonlinear applications
[AD-A274336] p 3063 N94-27055
Electron microscopy studies of undoped and phosphorus doped Si:H and Si,C:H films
[DE94-004738] p 3069 N94-27757

Thermally stable oxygen and nitrogen implant isolation of C-doped Al(0.35)Ga(0.65)As
[DE94-004799] p 3069 N94-27790

DOPPLER EFFECT
On the wave and corpuscular properties of microparticles
[DE93-634450] p 3020 N94-26509

DOPPLER RADAR
A modeling study of the mesocyclone
[AD-A274889] p 2893 N94-26168
Machine intelligent gust front algorithm
[AD-A273695] p 2680 N94-26196
Examination of micro- and macro-physical structures and processes in hailstorms with respect to their modification
[DLR-FB-93-25] p 2897 N94-27751

DOSIMETERS
Modeling the DMSP and CRRES dosimeters using the path length distribution method
[RXR-93051] p 2698 N94-28200
The PROTEL contamination code
[RXR-93071] p 3040 N94-28202
Develop and fabricate a radiation dose measurement system for satellites
[PL-TR-93-2161] p 2698 N94-28210
Develop and fabricate a radiation dose measurement system for satellites
[PL-TR-93-2099] p 2698 N94-28217

DOUGLAS AIRCRAFT
Experimental apparatus for optimization of flap position for a three-element airfoil model p 2682 N94-27912

DOWNTIME
Human factors in airway facilities maintenance: Development of a prototype outage assessment inventory
[DOT/FAA/AM-94/5] p 2941 N94-26136

DRAG
Experimental investigation of the interaction of a thrust reverser jet with an external subsonic flow
p 2801 N94-28011
Vortex generators for control of shock-induced separation. Part 1: Introduction and aerodynamics
[ESDU-93024-PT-1] p 2806 N94-28095
Examples of excrescence drag prediction for typical wing components of a subsonic transport aircraft at the cruise condition
[ESDU-93032] p 2649 N94-28144

DRAG COEFFICIENTS
A numerical study of high-speed missile configurations using a block-structured parallel algorithm
[AD-A273776] p 2979 N94-25860

DRAG MEASUREMENT
Calculation of viscous drag of two low angle of attack supercritical profiles
[FFA-TN-1984-22] p 2644 N94-26104

DRAG REDUCTION
Experimental investigation of advanced hub and pylon fairing configurations to reduce helicopter drag
[NASA-TM-4540] p 2668 N94-26604

DRAINAGE
The effect of elevation data representation on nocturnal drainage wind simulations
[DE94-003624] p 2892 N94-25936

DRIFT (INSTRUMENTATION)
Test and evaluation of the Litton (Canada) Canadian strapdown gyroscope (CSG-2) Performance Evaluation Unit (PEU)
[DREO-1010] p 2813 N94-27597

DROP SIZE
Cloud liquid water content measurement tests using dual-wavelength radar
[PB94-125960] p 2896 N94-26959

DROP TESTS
Status report for the development of the Antarctic penetrator: 1990-year program p 2885 N94-27973

DROP TOWERS
Condensation inside tubes: Computer program for pressure drop in straight tubes (horizontal and vertical with downflow)
[ESDU-93014] p 2806 N94-28064

DROPS (LIQUIDS)
An apparatus for measurement of ignition and burning characteristics of metallic particles
[AD-A274815] p 2716 N94-26487

DROUGHT
Meeting of the Eighth Session of the Scientific Advisory Committee of the World Climate Impact Assessment and Response Strategies Programme
[DE93-633954] p 2866 N94-26163

DRUGS
Molecular biological studies on the human radioresistance and drug resistance
[DE93-632682] p 2910 N94-26549
Bakteriella toxiner-morgondagens hot (bacterial toxins-the threat of tomorrow)
[PB94-124229] p 2902 N94-27045
Effects of perfusion of amiodarone on electrophysiological properties in single rabbit ventricular myocytes p 2906 N94-27503
Fast and slow onsets of Na channel blocking actions due to lidocaine and disopyramide using concentration-clamp method p 2907 N94-27504
Electrophysiological effects of MS-551, a new Class 3 antiarrhythmic agent, on isolated rabbit ventricular muscles p 2907 N94-27505
Comparative investigation of new Class 3 antiarrhythmic drugs, E-4031 and MS-551, on electrophysiological properties in isolated rabbit ventricular myocytes
p 2907 N94-27506
Effects of Class 1 antiarrhythmic drugs on the intraventricular conduction: Influence of fiber orientation
p 2907 N94-27507
Effects of Class 3 antiarrhythmic agents, E-4031 and MS-551 on ventricular repolarization in isolated rabbit hearts p 2907 N94-27508
Block of cardiac sodium channels by Ro 22-9194 (R), a new antiarrhythmic agent: Effects on the maximum upstroke velocity (Vmax) of single guinea pig ventricular myocytes p 2907 N94-27511
Electrophysiological effects of an antiarrhythmic drug, moricizine on isolated guinea pig ventricular muscles
p 2907 N94-27512

DUAL SPIN SPACECRAFT
An approximate solution for the spinup dynamics of near axisymmetric axial gyrostats using the method of multiple scales
[AD-A273723] p 2698 N94-26223

DUAL THRUST NOZZLES
Evaluation of moderate angle of attack roll of a dual engine, thrust vectoring aircraft using quantitative feedback theory
[AD-A274118] p 2667 N94-25905

DUCTED BODIES
Aerodynamic performance of novel ducted-tip wings
p 2654 N94-28331

DUCTED FANS
The design of a counter rotating ultra-high-bypass fan simulator for windtunnel investigation
[DLR-FB-93-20] p 2675 N94-27739

DUCTED FLOW
Dynamic response of a compressor research facility
[AD-A273836] p 2679 N94-25740

DUCTILITY
Study on performance evaluation of pressure vessel steel in corrosion environments with sulfide
p 2730 N94-25582
Numerical simulations of interfacial debonding in ductile-phase reinforced intermetallic matrix composites
[DE94-003639] p 2706 N94-25938
Influence of grain structure and solute composition on the work hardening behavior of aluminium at cryogenic temperatures
[DE94-003415] p 2733 N94-26087
Processing and mechanical properties of laminated metal composites of Al 6090-25 volume percent SiC(sub p) and Al 5182
[DE94-001070] p 2708 N94-26930
Current status of research and development on nickel and iron aluminides
[DE94-004247] p 2741 N94-27616
Formation and high mechanical strength of Al-based alloys containing a nanoscale icosahedral phase as a main constituent p 2746 N94-28171

DUST
Dust control for Enabler p 2943 N94-25680
CCD-Camera images of BEST-TWO and processing results
[AD-A274140] p 2811 N94-27134
Analytic approximation to randomly oriented spheroid extinction
[DREV-4712-93] p 3038 N94-27598
Reanalysis of Mariner 9 UV Spectrometer Data for Ozone, Cloud, and Dust Abundances, and Their Interaction Over Climate Timescales
[NASA-CR-195244] p 3107 N94-27885
Cooling the Martian atmosphere: The spectral overlap of the C02 15 micrometers band and dust
p 3107 N94-27886
Martian atmospheric radiation budget
p 3107 N94-27887
Mars ozone: Mariner 9 revisited p 3107 N94-27888
Why is the north polar cap on Mars different than the south polar cap? p 3107 N94-27889
How well was total ozone abundance inferred with Mariner 9? p 3108 N94-27891
In situ Mars ozone detector p 3108 N94-27892

DUST COLLECTORS
Dust control for Enabler p 2943 N94-25680

DUST STORMS
Cooling the Martian atmosphere: The spectral overlap of the C02 15 micrometers band and dust
p 3107 N94-27886

DYADICS
Eigenwaves in the general uniaxial bianisotropic medium with symmetric parameter dyadics
[PB94-132891] p 2778 N94-28381
Plane wave propagation in an anisotropic chiral medium with isotropic permittivity and permeability
[PB94-133097] p 2778 N94-28384
Analytic solution for the dyadic Green's function of a nonreciprocal uniaxial bianisotropic medium
[PB94-133162] p 2779 N94-28388
Image theory for DC problems involving a conducting half space bounded by the general anisotropic impedance surface
[PB94-132917] p 2779 N94-28390
Green dyadic and dipole fields for a medium with anisotropic chirality
[PB94-132933] p 2779 N94-28391

DYE LASERS
Broad band tunable dye laser development
[DE93-632978] p 2816 N94-26157
Physical characteristics of polymethylmethacrylate scintillator SOFG-120
[DE93-634184] p 2810 N94-26395

DYES
Langmuir-Blodgett film of amylose-esters and chiral azo-dyes (structure and second order nonlinear optical behaviour)
[ETN-94-95390] p 2747 N94-25749

DYNAMIC CHARACTERISTICS
Dynamic response of S-2 glass reinforced plastic structural armor
[AD-A273868] p 2747 N94-25596
Enhanced simulation software for rocket turbopump, turbulent, annular liquid seals
[NASA-CR-195239] p 2825 N94-27383
Study of the kinematic and dynamic characteristics of a wormgear transmission for helicopter applications
[NASA-CR-195287] p 2826 N94-27657
Wing design for a civil tiltrotor transport aircraft: A preliminary study p 2671 N94-27917
Landscape dynamics of northeastern forests
[NASA-CR-195272] p 2852 N94-28070

DYNAMIC CONTROL
Neural networks for dynamic flight control
[AD-A274089] p 2676 N94-25785
Implementation of integral manifold control on a two degree of freedom flexible joint manipulator: Theory and experiments
[ISBN-0-315-83572-9] p 2823 N94-26658
Dynamic control of kinematically redundant manipulators
[ISBN-0-315-84627-5] p 2825 N94-27344
Dynamics and robust control for uncertain flexible space systems
[INPE-5510-TAE/020] p 2696 N94-27357
System identification of the Large-Angle Magnetic Suspension Test Facility (LAMSTF)
p 2682 N94-27908

DYNAMIC MODELS
Parameter estimation by genetic algorithms
[DE94-002924] p 2961 N94-26146
An interactive, physically-based simulation system
[ISBN-0-315-83884-1] p 2963 N94-26616
Simulation dynamics of a multibody chain: Recursion based on chain modal coordinates
[ISBN-0-315-83555-9] p 2994 N94-26659
Wobble-nutation modes of the Earth
[ISBN-0-315-84246-6] p 3102 N94-26669
Substructure synthesis methods for viscoelastic structures
[UTIAS-349] p 2695 N94-26712
Chaotic dynamics of the solar cycle
[AD-A274315] p 3110 N94-26883
Generalized finite element dynamic modelling and simulation for flexible robot manipulators
[ISBN-0-315-84623-2] p 2825 N94-27343
Dynamics and robust control for uncertain flexible space systems
[INPE-5510-TAE/020] p 2696 N94-27357
System identification of the Large-Angle Magnetic Suspension Test Facility (LAMSTF)
p 2682 N94-27908
Superfluid helium sloshing dynamics induced oscillations and fluctuations of angular momentum, force and moment actuated on spacecraft driven by gravity gradient or jitter acceleration associated with slew motion
[NASA-CR-193928] p 2799 N94-27931
Nonlinear solvers p 2829 N94-28053

DYNAMIC PRESSURE
Development and implementation of a scramjet cycle analysis code with a finite-rate-chemistry combustion model for use on a personal computer
[AD-A273834] p 2673 N94-25617

DYNAMIC PROGRAMMING

A linear description of the discrete lot-sizing and scheduling problem [MEMO-COSOR-92-47] p 2992 N94-26227

Interacting cortical filters for object recognition [PB94-125374] p 2938 N94-26873

DYNAMIC RESPONSE

Dynamic response of S-2 glass reinforced plastic structural armor [AD-A273868] p 2747 N94-25596

Characteristics and control response of the TOPAZ 2 reactor system real-time dynamic simulator [DE94-003788] p 2699 N94-25600

Dynamic response of a compressor research facility [AD-A273836] p 2679 N94-25740

The railway track response function [REPT-93-40] p 2837 N94-26214

Analysis/test correlation using VAWT-SDS on a step-relaxation test for the rotating Sandia 34 m test bed [DE94-002290] p 2857 N94-26700

Enhanced simulation software for rocket turbopump, turbulent, annular liquid seals [NASA-CR-195239] p 2825 N94-27383

Lift-curve slope for structural response calculations [ESDU-93013] p 2646 N94-28063

An initial investigation into methods of computing transonic aerodynamic sensitivity coefficients [NASA-CR-195705] p 2648 N94-28072

DYNAMIC STABILITY

Stability of large scale interconnected dynamical systems [DE94-601536] p 2993 N94-26408

DYNAMIC STRUCTURAL ANALYSIS

Project WISH: The Emerald City p 2703 N94-25690

Structural evaluation of concepts for a solar energy concentrator for Space Station advanced development program [NASA-TP-3375] p 2695 N94-26609

The free vibration of plates, shallow shells and solids [ISBN-0-315-83931-7] p 2838 N94-26622

Asymptotically stable neural networks for identification of nonlinear dynamic systems [ISBN-0-315-84328-4] p 2985 N94-26629

Dynamics of a flexible extendible beam [ISBN-0-315-84278-4] p 2838 N94-26639

Optimal architectural design of parallel and hybrid manipulators [ISBN-0-315-84351-9] p 2822 N94-26657

Analysis/test correlation using VAWT-SDS on a step-relaxation test for the rotating Sandia 34 m test bed [DE94-002290] p 2857 N94-26700

Response of structures to impact loads using elastic and plastic analysis [ISBN-0-315-84647-X] p 2842 N94-27309

Bulk-Flow Analysis, part A [NASA-CR-193911-PT-A] p 2796 N94-27377

Finite element analysis of damped vibrations of laminated composite plates [ISBN-0-315-84928-2] p 2843 N94-27585

Super finite elements for nonlinear static and dynamic analysis of stiffened plate structures [ISBN-0-315-63903-2] p 2844 N94-27808

Multidisciplinary aeroelastic analysis of a generic hypersonic vehicle [NASA-TM-4544] p 2691 N94-27868

Methods of testing for endurance of structural elements using simulated acoustic loading [ESDU-93027] p 3011 N94-28141

Structural study of Cu/Co multilayer by anomalous small-angle x ray scattering p 2744 N94-28160

DYNAMIC TESTS

The effect of the time restrictions on information search and information integration in a dynamic task environment [AD-A273759] p 3095 N94-25723

Proceedings of Damping 1993, volume 2 [AD-A274227] p 2840 N94-26953

DYNAMICAL SYSTEMS

Stability of large scale interconnected dynamical systems [DE94-601536] p 2993 N94-26408

The onset of chaos in a periodically forced nonlinear oscillator [ISBN-0-315-84564-3] p 2842 N94-27272

DYNAMO THEORY

Chaotic dynamics of the solar cycle [AD-A274315] p 3110 N94-26883

DYSPROSIUM

Studies of heavy-ion reactions and transuranic nuclei [DE94-004642] p 3029 N94-27783

DYSPROSIUM COMPOUNDS

Laser surface modification of intermetallic compounds [DREA-CR-92-416] p 2820 N94-27668

E

E GLASS

Testing composite-to-metal tubular lap joints [DE94-003225] p 2836 N94-26032

E REGION

Quiet-time intensifications along the poleward auroral boundary near midnight [ATR-93(7248)-2] p 2877 N94-26201

Ionospheric modification by high power, obliquely propagated HF radio wave transmissions. Part 1: Experimental [AD-A273746] p 2878 N94-26224

EARTH (PLANET)

Underground structure in the eastern part of Kanagawa Prefecture inferred from explosion seismic observations p 2886 N94-27987

New Developments Regarding the KT Event and Other Catastrophes in Earth History [NASA-CR-195169] p 2887 N94-28294

Axial focusing of impact energy in the Earth's interior: Proof-of-principle tests of a new hypothesis p 2888 N94-28296

EARTH ATMOSPHERE

Automation of closed environments in space for human comfort and safety p 2943 N94-25684

The Lightcraft project: Flight technology for a hypersonic mass transit system p 2670 N94-25695

Characterization of the energy deposition produced by the primary electron beam on the EXCEDE 3 program. Appendix B and C [AD-A273878] p 3012 N94-25726

Methane emissions from natural wetlands [DE93-040796] p 2865 N94-25790

The effect of elevation data representation on nocturnal drainage wind simulations [DE94-003624] p 2892 N94-25936

Testbed model and data assimilation for ARM [DE94-000432] p 2893 N94-26082

Numerical procedure for planetary wave solution [DE94-004280] p 2879 N94-26576

ARM Fourier transform spectrometer data analysis tools [DE94-000865] p 2895 N94-26697

The Sixteenth Symposium on Coordinated Observations of the Ionosphere and the Magnetosphere in the Polar Regions: Program and abstracts [JTN-94-80601] p 2882 N94-27300

An overview of the ASCOT program [DE94-004356] p 2869 N94-27601

Utilization of remote sensing data for global climate change research in Malaysia p 2875 N94-28290

EARTH CRUST

Studies on the measurement of subsurface fractures and geostress using acoustic emission technique for deep coalbed development [REPT-7] p 2879 N94-26475

A geological and geophysical information system for Eurasia [AD-A274818] p 3098 N94-26490

Crustal deformation measurements in the vicinity of Vandenberg Air Force Base [AD-A274166] p 2881 N94-27143

Wave propagation in the shallow regions of the earth's crust and the borehole vicinity [ITN-94-85237] p 2882 N94-27330

Report of the National Research Institute for Earth Science and Disaster Prevention, No. 51 [JTN-94-80509] p 2886 N94-27985

Underground structure in the eastern part of Kanagawa Prefecture inferred from explosion seismic observations p 2886 N94-27987

Analysis of S-wave seismogram envelope of deep earthquakes and estimation of random inhomogeneities in the Kanto-Tokai area p 2886 N94-27988

EARTH GRAVITATION

Correlation between the gravity field and the bathymetry in the North Atlantic Ocean [ETN-94-95036] p 2899 N94-26108

EARTH IONOSPHERE

Norwegian ionospheric satellite experiment: High latitude, low Earth orbit plasma measurements [FFI-93/7025] p 2876 N94-25807

Dynamics explorer interdisciplinary scientist investigations [NASA-CR-195226] p 2878 N94-26204

Upper atmosphere neutral and plasma density modeling [AD-A274768] p 2879 N94-26569

Ionosphere-magnetosphere coupling [NASA-CR-195222] p 2881 N94-27237

The Sixteenth Symposium on Coordinated Observations of the Ionosphere and the Magnetosphere in the Polar Regions: Program and abstracts [JTN-94-80601] p 2882 N94-27300

Ionospheric calibration for single frequency altimeter measurements [NASA-CR-195709] p 2883 N94-27883

EARTH LIMB

Zodiacal light data investigation. Interim results for the Earthlimb Clutter Experiment [AD-A274461] p 3104 N94-27265

EARTH MAGNETOSPHERE

Dynamics explorer interdisciplinary scientist investigations [NASA-CR-195226] p 2878 N94-26204

Auroral Tomography Workshop Proceedings [PB94-123718] p 2881 N94-27040

Ionosphere-magnetosphere coupling [NASA-CR-195222] p 2881 N94-27237

The Sixteenth Symposium on Coordinated Observations of the Ionosphere and the Magnetosphere in the Polar Regions: Program and abstracts [JTN-94-80601] p 2882 N94-27300

Memories of National Institute of Polar Research. Series A-19. Upper atmosphere physics: ELF emission in high latitudes: Ray path calculation and ground-satellite observations [JTN-94-80592] p 2882 N94-27342

Configuration of the near-Earth plasma sheet [NASA-CR-195271] p 2883 N94-27438

EARTH MANTLE

Electrical conductivity of perovskite-magnesiowuestite as a function of pressure and temperature [DE94-002714] p 2880 N94-26806

EARTH MOVEMENTS

Wobble-nutation modes of the Earth [ISBN-0-315-84246-6] p 3102 N94-26669

An integrated approach to seismic event location: 1. Evaluating how method of location affects the volume of groups of hypocenters [PL-TR-92-2323] p 2887 N94-28214

EARTH OBSERVATIONS (FROM SPACE)

The potential for the Department of Defense to use space-based remote sensing to support DOD and other government agencies' environmental programs [AD-A273895] p 2847 N94-25656

Feasibility study of a multiaperture telescope for deep-space Earth surveillance [AD-A273903] p 3102 N94-25658

Remote Earth Sciences data collection using ACTS [NASA-CR-195227] p 2848 N94-26236

Assessment of tropical forests using satellite data [SILVA-CARELICA-21] p 2850 N94-27182

Global tropical forest cover assessments using satellite imagery p 2850 N94-27183

Global change research related to the Earth's energy and hydrologic cycle [NASA-CR-195270] p 2869 N94-27430

A comparative study of SAR data compression schemes p 2946 N94-28259

EARTH ORBITAL ENVIRONMENTS

SAFT nickel hydrogen cell cycling status p 2861 N94-28110

EARTH ORBITS

Space Habitat, assembly and repair facility p 2691 N94-25696

A virtual environment for satellite modeling and orbital analysis in a distributed interactive simulation [AD-A274114] p 2694 N94-25904

EARTH PLANETARY STRUCTURE

Report of the National Research Institute for Earth Science and Disaster Prevention, No. 51 [JTN-94-80509] p 2886 N94-27985

Underground structure in the eastern part of Kanagawa Prefecture inferred from explosion seismic observations p 2886 N94-27987

Analysis of S-wave seismogram envelope of deep earthquakes and estimation of random inhomogeneities in the Kanto-Tokai area p 2886 N94-27988

EARTH RADIATION BUDGET

Differentiating the role of land surface variability and cloudiness variability on global energy transport within the atmosphere and oceans [NASA-CR-195229] p 2847 N94-26222

Science support for the Earth radiation budget experiment [NASA-CR-191600] p 2894 N94-26506

Nimbus-7 Earth radiation budget calibration history. Part 2: The Earth flux channels [NASA-RP-1335-PT-2] p 2814 N94-27981

EARTH RADIATION BUDGET EXPERIMENT

Science support for the Earth radiation budget experiment [NASA-CR-191600] p 2894 N94-26506

EARTH ROTATION

Wobble-nutation modes of the Earth [ISBN-0-315-84246-6] p 3102 N94-26669

Trajectories of ballistic impact ejecta on a rotating Earth p 2887 N94-28295

EARTH SCIENCES

Mission to Planet Earth: A program to understand global environmental change
[NASA-PAM-556] p 2869 N94-27958

The 1994 Space and Earth Science Data Compression Workshop
[NASA-CP-3255] p 2945 N94-28251

EARTH SURFACE

The effect of elevation data representation on nocturnal drainage wind simulations
[DE94-003624] p 2892 N94-25936

Cratering rates from lunar xenospherules
[DE94-003481] p 3106 N94-27007

EARTH TERMINALS

System design analysis of a lightweight laser satellite terminal
[AD-A274033] p 2690 N94-25769

Thailand satellite ground receiving station in global change research cooperation p 2875 N94-28291

EARTH-IONOSPHERE WAVEGUIDE

Excitation of Earth-ionosphere waveguide in the ELF and lower VLF bands by modulated ionospheric current
[AD-A274969] p 2878 N94-26304

EARTH-MARS TRAJECTORIES

Project APEX: Advanced manned exploration of the Martian moon Phobos p 3079 N94-25688

Mars transportation system p 2833 N94-25689

Comet nucleus and asteroid sample return missions
p 2689 N94-25692

EARTHQUAKES

Report of the National Research Institute for Earth Science and Disaster Prevention, No. 51
[JTN-94-80509] p 2886 N94-27985

Observation with STS seismometer at Nakaizu, central Japan: Observation system and comparison with tiltmeter p 2886 N94-27986

Underground structure in the eastern part of Kanagawa Prefecture inferred from explosion seismic observations
p 2886 N94-27987

Analysis of S-wave seismogram envelope of deep earthquakes and estimation of random inhomogeneities in the Kanto-Tokai area p 2886 N94-27988

ECCENTRICITY

Modulating terrestrial impacts from Oort cloud comets by the adiabatically changing galactic tides
p 2890 N94-28305

ECOLOGY

Telepresence in the human exploration of Mars: Field studies in analog environments p 2685 N94-27360

Global Change and Terrestrial Ecosystems (GCTE): Progress report and prospects for Asian contributions
p 2874 N94-28281

ECONOMIC ANALYSIS

Ways to improve MHD power plants and prospects of their application p 2854 N94-26056

Some aspects of nonlinear discrete-time descriptor systems in economics
[PB94-126653] p 3101 N94-26918

ECONOMIC FACTORS

Deregulation of air traffic in America: A model to be initiated? p 2661 N94-28232

Air traffic in recession p 2662 N94-28240

ECONOMIC IMPACT

The advantages of the location Germany must not be jeopardized in air traffic p 2661 N94-28236

ECONOMICS

Overview of the Photovoltaic Manufacturing Technology (PVMaT) project
[DE93-018234] p 2856 N94-26426

Fusion Energy Advisory Committee: Advice and recommendations to the US Department of Energy in response to the charge letter of September 1, 1992
[DE93-019842] p 3043 N94-26428

ECOSYSTEMS

Active layer dynamics and arctic hydrology and meteorology
[DE94-001724] p 2892 N94-25951

Grassland/atmosphere response to changing climate: Coupling regional and local scales
[DE94-003111] p 2866 N94-26026

SIMA: A model for forest succession based on the carbon and nitrogen cycles with application to silvicultural management of the forest ecosystem
[SILVA-CARELICA-22] p 2848 N94-26258

Measuring variation in ecosystem sensitivity to stress
[AD-A274232] p 2868 N94-26817

EDDY CURRENTS

Development of non-destructive testing technology for the crack of steam generator tubes
[DE93-632953] p 2835 N94-26399

Correlation of experimental data and three-dimensional finite element modeling of a spinning quadrupole
[DE93-041173] p 3008 N94-26421

EDDY VISCOSITY

Calculation of single and multiple jets in cross-flow with and without impingement using Reynolds-stress-transport closure p 2803 N94-28024

EDEMA

Influence of mechanical stimulation on inflammatory edema p 2906 N94-27497

EDGE DETECTION

The determination of surface roughness from reflected step edges
[AD-A273987] p 2984 N94-25900

Image segmentation by a combination of edge detection and region growing
[ETN-94-95032] p 2960 N94-26106

Parallel algorithm for dominant points correspondences in robot binocular stereo vision p 2686 N94-27364

EDGES

A study of two dimensional tapered periodic edge treatments to reduce wideband edge diffraction
[AD-A274054] p 2766 N94-25824

The determination of surface roughness from reflected step edges
[AD-A273987] p 2984 N94-25900

Polarimetric investigation of edge scattering by mono- and bistatic microwave imaging
[ESA-TT-1284] p 2768 N94-26317

EDITING

Editing tree structures
[CWI-CS-R9264] p 2961 N94-26219

Red's natural editor: A program designed to edit FORTRAN programs
[DE94-003271] p 2962 N94-26318

ActorStudio: An interactive user interface editor
[PB94-132859] p 2976 N94-28356

EDITING ROUTINES (COMPUTERS)

Editing tree structures
[CWI-CS-R9264] p 2961 N94-26219

Design and implementation of a query editor for the Amadeus system
[AD-A274955] p 3097 N94-26300

Red's natural editor: A program designed to edit FORTRAN programs
[DE94-003271] p 2962 N94-26318

OPM Scheme Editor 2: A graphical editor for specifying object-protocol structures
[DE94-003477] p 2962 N94-26327

Design considerations when using external hypertext engines from applications
[DE94-002213] p 3098 N94-26598

ActorStudio: An interactive user interface editor
[PB94-132859] p 2976 N94-28356

EDUCATION

Development of the Air Force contingency contracting course framework
[AD-A273921] p 3093 N94-25895

Federal Information Exchange (FEDIX) user's guide: Fall 1993, Version 5.0/Release 1.0
[DE94-003826] p 3097 N94-26350

Benefits estimation for simulation systems used for aircrew training in a multiship environment
[AD-A274313] p 2938 N94-26882

Workload transition: Implications for individual and team performance
[AD-A274538] p 2941 N94-26964

COMPETENCE 2000: Study on training requirements of the Norwegian metallurgical industry
[PB94-124609] p 2741 N94-27328

Training on assessment and mapping of deforestation: WFW conference, Brazil
[INPE-5482-PRE/1781] p 2850 N94-27384

Predoctoral training grant in the area of physical sciences
[DE94-004406] p 3039 N94-27603

The 1993 NASA-ODU American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program
[NASA-CR-191544] p 3085 N94-27893

Selected data on Federal support to universities and colleges: FY 1991
[NSF-93-320] p 3101 N94-28201

Laboratory of Space Technology
[PB94-133204] p 2689 N94-28358

EFFICIENCY

Efficient implementation of high-level parallel symbolic languages p 2955 N94-27196

Wieand's theorem
[PB94-126711] p 3004 N94-27223

Thermodynamics of combined cycle plant
p 2831 N94-28079

EFFLUENTS

Advances in passive-remote and extractive Fourier transform infrared spectroscopic systems
[DE94-001424] p 2868 N94-26952

EGRESS

Assured crew return vehicle post landing configuration design and test p 2697 N94-25671

EIGENVALUES

Parameter estimation by genetic algorithms
[DE94-002924] p 2961 N94-26146

Winding numbers in homotopy theory from integers to reals
[DE94-601510] p 2992 N94-26367

Bifurcation sequences at 1:4 resonance: An inventory
[PB94-125408] p 2997 N94-27028

The PRISM project: Infrastructure and algorithms for parallel eigensolvers
[DE94-005125] p 2973 N94-27717

Eigenwaves in the general uniaxial bianisotropic medium with symmetric parameter dyadics
[PB94-132891] p 2778 N94-28381

EIGENVECTORS

Parameter estimation by genetic algorithms
[DE94-002924] p 2961 N94-26146

EINSTEIN EQUATIONS

Vortices in curved spacetime
[DE94-601559] p 3072 N94-26417

EJECTA

Trajectories of ballistic impact ejecta on a rotating Earth p 2887 N94-28295

EJECTORS

Ejectors and jet pumps: Computer program for design and performance for liquid flow
[ESDU-93022] p 2832 N94-28093

EL NINO

Propagation of cold air masses in East Asia and its associated planetary-scale function
[AD-A274304] p 2895 N94-26850

ELASTIC DEFORMATION

Nanoscale plasticity in silica glass
[DE94-004212] p 2751 N94-26554

Fluid dynamic linear accelerometer
[AD-D016042] p 2678 N94-27112

On the Lagrangian and updated Lagrangian nonlinear finite element formulations
[ISBN-0-315-61111-1] p 3001 N94-27948

Flat rectangular orthotropic plates under uniformly distributed normal pressure. Elastic stresses and deflections for various forms of edge restraint
[ESDU-93011] p 2845 N94-28061

ELASTIC MEDIA

Dynamic and kinematic P wave tracing for a three-dimensional elastic inhomogeneous media by the asymptotic ray theory and application
[ITN-94-85239] p 2775 N94-27244

ELASTIC PROPERTIES

Debye-Waller factors of the light actinide metals
[DE94-000685] p 2733 N94-26069

DUSOL: Improved software for analysis of ultrasonic velocity data on anisotropic materials
[NPL-DMM(A)-104] p 2965 N94-26816

Geometry changes in the elastic-plastic analysis of steel spatial skeletal structures
[IFTR-37/1993] p 2839 N94-26825

Nonlinear hysteresis in an endochronic solid
[AD-A274594] p 2880 N94-26855

Flat rectangular orthotropic plates under uniformly distributed normal pressure. Elastic stresses and deflections for various forms of edge restraint
[ESDU-93011] p 2845 N94-28061

Analysis and control of hourglass instabilities in underintegrated linear and nonlinear elasticity
[NASA-CR-195293] p 2846 N94-28266

ELASTIC SCATTERING

Theoretical and computational studies in intermediate energy nuclear physics
[DE94-004177] p 3012 N94-25800

The amplitude of the elastic hadron-hadron scattering in the coulombic range of transfer momenta
[DE93-613183] p 3014 N94-25869

Structure functions of sea quarks, Kogut-Susskind pole and dynamics of pp- and pp-bar-interactions at high energies
[DE93-613184] p 3031 N94-25870

Spin effects in hard interactions (interest in accelerated polarized beam)
[DE93-634398] p 3031 N94-26044

Elastic scattering by a spherical inclusion
[AD-A274713] p 2878 N94-26433

Spin asymmetry in resonant electron-hydrogen elastic scattering
[DE94-601813] p 3023 N94-26943

Calculations of asymmetries in electron-alkali scattering
[DE94-601816] p 3023 N94-26945

Mapping between the Sinh-Gordon and Ising models
[DE94-601535] p 2998 N94-27162

Atomic processes in Inertial Electrostatic Confinement (IEC) devices
[DE94-005015] p 3047 N94-27715

High energy parton-parton elastic scattering in QCD
[DE94-003432] p 3028 N94-27736

ELASTIC SHELLS

New variational techniques for acoustic radiation and scattering from elastic shell structures
[AD-A274599] p 3010 N94-26889

ELASTIC WAVES

Elastic wave up/down decomposition in inhomogeneous and anisotropic media: An operator approach and its approximations
[PB94-126497] p 2881 N94-26880

Wave propagation in the shallow regions of the earth's crust and the borehole vicinity
[ITN-94-85237] p 2882 N94-27330

Compressibility effects on rotor forces in the leakage path between a shrouded pump impeller and its housing
p 2796 N94-27379

Double excitation of He and H(-) by fast proton and anti-proton impact
[DE94-004581] p 3026 N94-27620

ELASTODYNAMICS

Elastic wave up/down decomposition in inhomogeneous and anisotropic media: An operator approach and its approximations
[PB94-126497] p 2881 N94-26880

ELASTOMERS

Thermoplastic elastomers having alternate crystalline structure for us as high energy binders
[AD-D016035] p 2755 N94-27203

Development of a new seal for use on large openings of pressurized spacecraft
[NASA-TM-108444] p 2825 N94-27560

ELECTRIC ARCS

Channel model for AC electric arc
[PB94-124591] p 2786 N94-27327

ELECTRIC BATTERIES

Reference electrodes for solid polymer electrolytes
[DE94-004583] p 2780 N94-25806

Exploratory Technology Research Program for Electrochemical Energy Storage
[DE94-003479] p 2781 N94-26047

A Shuttle mechanism for molten-electrolyte lithium batteries
[DE94-002914] p 2781 N94-26144

Low-cost photovoltaic inverters incorporating application-specific integrated circuits
[DE94-003270] p 2856 N94-26463

Voltammetric studies of poly(carbon disulfide)
[DE94-001385] p 2717 N94-26951

NSWC Crane Aerospace Cell Test History Database
p 2860 N94-28102

Battery charge control: Which approach is best?
p 2863 N94-28124

Use of calorimetry for end of charge determination
p 2863 N94-28128

High rate lithium/thionyl chloride bipolar battery development p 2864 N94-28133

ELECTRIC CHARGE

The electric field between non conductive rectangular charged surfaces placed near a small spherical conductive earthed surface and determination of critical density of charge
[DE93-634324] p 2783 N94-26443

ELECTRIC CONDUCTORS

The electric field between non conductive rectangular charged surfaces placed near a small spherical conductive earthed surface and determination of critical density of charge
[DE93-634324] p 2783 N94-26443

Length-scale dependent ensemble-averaged conductance of a 1D disordered conductor: Conductance minimum
[DE94-602732] p 3062 N94-26902

ELECTRIC CONNECTORS

Development of fusion technology
[DE93-633444] p 3042 N94-26159

ADC test support program
[AD-A274819] p 2783 N94-26491

ELECTRIC CONTACTS

Visible light emitting materials and injection devices
[AD-A274418] p 2786 N94-27079

ELECTRIC CURRENT

Electric-field dependence of electroreflectance and photocurrent spectra at visible wavelengths in MOVPE-grown InAlGaP multiple strained quantum-well structures
[DE94-004692] p 2780 N94-25664

Study of the homogeneity of InP wafers
[AD-A273658] p 3055 N94-26194

The effect of processing on the microstructure of Ag-sheathed Bi-2223 wires
[DE94-004627] p 3055 N94-26243

MBE grown 3 to 5 strain relaxed buffer layers and superlattices characterized by atomic force microscopy
[DE94-002931] p 3056 N94-26308

Recombination and metastability in amorphous silicon and silicon germanium alloys
[DE94-000237] p 2736 N94-26481

Numerical simulation of plasma vertical position stabilization in ITER
[DE93-634588] p 3044 N94-26510

Interference analysis of multichannel transmission lines: A system's analysis
[PB94-126505] p 2772 N94-26909

A model of electric breakdown in polycrystalline semiconductors with highly nonlinear I - V characteristics
[DE94-601537] p 3063 N94-27017

A direct current rectification scheme for microwave space power conversion using traveling wave electron acceleration p 2687 N94-27371

Effects of perfusion of amiodarone on electrophysiological properties in single rabbit ventricular myocytes p 2906 N94-27503

Fast and slow onsets of Na channel blocking actions due to lidocaine and disopyramide using concentration-clamp method p 2907 N94-27504

Electrophysiological effects of MS-551, a new Class 3 antiarrhythmic agent, on isolated rabbit ventricular muscles p 2907 N94-27505

Comparative investigation of new Class 3 antiarrhythmic drugs, E-4031 and MS-551, on electrophysiological properties in isolated rabbit ventricular myocytes
p 2907 N94-27506

Effects of Class 1 antiarrhythmic drugs on the intraventricular conduction: Influence of fiber orientation
p 2907 N94-27507

Geometrical resonances in the nyquist noise spectrum for ballistic conductors
[DE94-603668] p 3027 N94-27631

Technical report of ISSP. Ser. A, no. 2687: Quantized persistent currents of a quantum dot in a strong magnetic field
[JTN-94-80573] p 3028 N94-27758

The effect of Ti conduit on the critical current in (Nb, Ti)3Sn cable-in-conduit conductors
[DE94-701204] p 2788 N94-27817

Experimental results of 40-kA Nb3Al conductor
[DE94-701207] p 2788 N94-27821

Silicon device performance measurements to support temperature range enhancement
[NASA-CR-195265] p 2844 N94-27824

Image theory for DC problems involving a conducting half space bounded by the general anisotropic impedance surface
[PB94-132917] p 2779 N94-28390

ELECTRIC DIPOLES

Electromagnetic fields and interference
[PB94-126489] p 2771 N94-26877

Green dyadic and dipole fields for a medium with anisotropic chirality
[PB94-132933] p 2779 N94-28391

ELECTRIC DISCHARGES

Method of optimizing the charging of a battery of storage cells, and apparatus for performing the method
[AD-D016066] p 2781 N94-26102

Development of an industrial CO2 laser for mask marking
[DE93-632901] p 2816 N94-26184

Inertial electrostatic confinement as a power source for electric propulsion p 2688 N94-27373

Proceedings of the 16th Symposium on Plasma Physics and Technology
[DE94-604181] p 3047 N94-27698

Cycle life versus depth of discharge update on modeling studies --- Nickel-Hydrogen Batteries
p 2862 N94-28115

Battery charge control: Which approach is best?
p 2863 N94-28124

ELECTRIC ENERGY STORAGE

Exploratory Technology Research Program for Electrochemical Energy Storage
[DE94-003479] p 2781 N94-26047

Exploratory technology research program for electrochemical energy storage
[DE94-003480] p 2855 N94-26329

ELECTRIC FIELDS

Back-reaction beyond the mean field approximation
[DE94-003936] p 3012 N94-25612

Electric-field dependence of electroreflectance and photocurrent spectra at visible wavelengths in MOVPE-grown InAlGaP multiple strained quantum-well structures
[DE94-004692] p 2780 N94-25664

Catalog of absolutely calibrated, range normalized, wideband, electric field waveforms from triggered lightning flashes in Florida
[AD-A273793] p 2892 N94-25873

Design of folded waveguide antenna for Alcator C-Mod
[DE94-003584] p 2767 N94-25924

Modelling of ionisation reactions and of the resulting electric fields in one-dimensional hypersonic shock waves with the direct simulation Monte Carlo method
[IC-AERO-92-01] p 2644 N94-26248

Numeric solution of the electric field integral equation using Galerkin's method for axially symmetric cases
[ESA-TT-1264] p 2768 N94-26315

The effect of high frequency electric field on hypersound amplification in superlattice
[DE93-634326] p 3057 N94-26384

The electric field between non conductive rectangular charged surfaces placed near a small spherical conductive earthed surface and determination of critical density of charge
[DE93-634324] p 2783 N94-26443

Computer program for numerical evaluation of the performance of an overmoded TM01 circular to TE10 rectangular waveguide mode converter
[AD-A274548] p 2771 N94-26844

A direct current rectification scheme for microwave space power conversion using traveling wave electron acceleration p 2687 N94-27371

Configuration of the near-Earth plasma sheet
[NASA-CR-195271] p 2883 N94-27438

Transmittance fluctuations and non-linearity in random chains in the presence of applied electric fields
[DE94-603665] p 2787 N94-27628

Localization properties of one-dimensional electrified chains
[DE94-603672] p 3067 N94-27635

The three-dimensional hydrogen atom in crossed magnetic and electric fields
[DE94-606301] p 3029 N94-27847

MUSIC for localization of thunderstorm cells
[DE94-004985] p 2897 N94-28146

Electrostatic image solution for the conducting prolate spheroid
[PB94-133154] p 2778 N94-28387

Green dyadic and dipole fields for a medium with anisotropic chirality
[PB94-132933] p 2779 N94-28391

ELECTRIC FILTERS

Enhanced adaptive statistical filter providing improved performance for target motion analysis noise discrimination statement of government interest
[AD-D016039] p 2786 N94-27109

ELECTRIC FURNACES

Physical modelling and adaptive predictive control of diffusion/LPCVD reactors
[PB94-126398] p 2763 N94-26819

ELECTRIC GENERATORS

Merging photovoltaic hardware development with hybrid applications in the USA
[DE94-002682] p 2857 N94-26612

ELECTRIC HYBRID VEHICLES

Natural gas applications for hybrid vehicles.
[PB94-117108] p 2759 N94-26753

ELECTRIC MOTOR VEHICLES

Exploratory Technology Research Program for Electrochemical Energy Storage
[DE94-003479] p 2781 N94-26047

Exploratory technology research program for electrochemical energy storage
[DE94-003480] p 2855 N94-26329

Feasibility study on introduction of transportation-use petroleum substitution energy
[DE94-725205] p 2759 N94-26905

ELECTRIC MOTORS

Hardware design of a spherical mini-rover
p 2833 N94-25669

ELECTRIC NETWORKS

Electromagnetic fields and interference
[PB94-126489] p 2771 N94-26877

ELECTRIC POTENTIAL

Characteristics and development report for the T1576 power supply and the MC3935 battery
[DE94-003675] p 2783 N94-26372

Reconstruction of multiple cracks from experimental electrostatic boundary measurements
[NASA-CR-191584] p 2994 N94-26601

A mechanism for resistive dissipation in Ag sheathed Bi2Sr2CaCu2O8 and Bi2Sr2Ca2Cu3O10
[DE94-003009] p 3060 N94-26771

Molecular surface electrostatic potentials in the analysis of non-hydrogen-bonding noncovalent interactions
[AD-A274612] p 3022 N94-26894

Polar optical oscillation modes in GaAs-based double heterostructures: Long wavelength limit
[DE94-601874] p 3062 N94-26897

Interference analysis of multichannel transmission lines: A system's analysis
[PB94-126505] p 2772 N94-26909

A model of electric breakdown in polycrystalline semiconductors with highly nonlinear I - V characteristics
[DE94-601537] p 3063 N94-27017

Channel model for AC electric arc
[PB94-124591] p 2786 N94-27327

Effects of perfusion of amiodarone on electrophysiological properties in single rabbit ventricular myocytes p 2906 N94-27503

Fast and slow onsets of Na channel blocking actions due to lidocaine and disopyramide using concentration-clamp method p 2907 N94-27504
Electrophysiological effects of MS-551, a new Class 3 antiarrhythmic agent, on isolated rabbit ventricular muscles p 2907 N94-27505
Comparative investigation of new Class 3 antiarrhythmic drugs, E-4031 and MS-551, on electrophysiological properties in isolated rabbit ventricular myocytes p 2907 N94-27506
Effects of Class 3 antiarrhythmic agents, E-4031 and MS-551 on ventricular repolarization in isolated rabbit hearts p 2907 N94-27508
Electrical coupling between the sino-atrial node and atrial muscle: Cell to cell interaction through an external circuit and its simulation by computer modeling p 2907 N94-27509
A study on tissue excitation of cardiac muscle under electrical field stimulation p 2907 N94-27510
Block of cardiac sodium channels by Ro 22-9194 (R), a new antiarrhythmic agent: Effects on the maximum upstroke velocity (Vmax) of single guinea pig ventricular myocytes p 2907 N94-27511
Electrophysiological effects of an antiarrhythmic drug, moricizine on isolated guinea pig ventricular muscles p 2907 N94-27512
Correlation between electrical activity and the size of single sinoatrial node cells p 2907 N94-27513
The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experimental study in rabbit single sinoatrial node cells p 2908 N94-27514
The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experiments using small sinoatrial node tissue preparations isolated from rabbit hearts p 2908 N94-27515
The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Postganglionic vagal stimulation in isolated rabbit hearts p 2908 N94-27516
Desensitization to acethylcholine in pacemaker cells of the sinoatrial node p 2908 N94-27537
Image potential of a tunnelling electron moving near two different metals [DE94-603657] p 3069 N94-27819
Battery charge control: Which approach is best? p 2863 N94-28124
Bipolar Ag-Zn battery p 2864 N94-28135
The PROTEL contamination code [RXR-93071] p 3040 N94-28202

ELECTRIC POWER PLANTS
Programme for the promotion of wind power production [DE94-702065] p 2855 N94-26242
Solar resource-utility load matching assessment: NREL photovoltaic project summary [DE94-000232] p 2856 N94-26480
Combined Cycles for Power Plants [VKI-LS-1993-08] p 2830 N94-28077
Introduction to combined cycles p 2789 N94-28078
Thermodynamics of combined cycle plant p 2831 N94-28079
Steam plant: Steam turbines for combined cycles p 2831 N94-28085
Fibrous ceramic candle filter for particle removal in pressurized fluidized bed combustion [PB94-133089] p 2876 N94-28383
Emissions of nitrogen oxides (NO(x) and N2O) in pressurized fluidized bed combustion [PB94-133071] p 2876 N94-28395

ELECTRIC POWER SUPPLIES
Hybrid power system for remote communications stations [AD-A274963] p 2782 N94-26301
Merging photovoltaic hardware development with hybrid applications in the USA [DE94-002682] p 2857 N94-26612

ELECTRIC POWER TRANSMISSION
Solar resource-utility load matching assessment: NREL photovoltaic project summary [DE94-000232] p 2856 N94-26480

ELECTRIC PROPULSION
A large high vacuum, high pumping speed space simulation chamber for electric propulsion [NASA-TM-106453] p 2690 N94-26142
Inertial electrostatic confinement as a power source for electric propulsion p 2688 N94-27373
A study of DC-DC converters with MCT's for arcjet power supplies [NASA-CR-191204] p 2703 N94-27662

ELECTRIC ROCKET ENGINES
An investigation of magnetic field effects on plume density and temperature profiles of an applied-field MPD thruster [NASA-TM-106416] p 2700 N94-26090

ELECTRIC STIMULI
Annals of the Research Inst. of Environmental Medicine, Nagoya Univ., volume 44 [REPT-44-VOL-44] p 2911 N94-27442
Effects of high-intensity electric field stimulation on the electromechanical performance of cardiac muscle: Influence of fiber orientation p 2904 N94-27467
On the mechanism of reentrant arrhythmias following DC defibrillation: Influence of fiber orientation to the effects of low-energy electric field stimulation on the effective refractory period of cardiac muscle p 2904 N94-27468
A study on tissue excitation of cardiac muscle under electrical field stimulation p 2907 N94-27510
Analysis of the Electrically Evoked Response (EER) of the cat p 2908 N94-27519
Difference in skin blood flow reduction depending on activating maneuver of skin sympathetic nerve activity p 2929 N94-27525
An attempt of intraneural stimulation by microelectrode inserted in skin sympathetic nerve fascicle p 2930 N94-27529
Enhancement of skin sympathetic nerve activity in amyotrophic lateral sclerosis p 2930 N94-27532
Electrical stimulation in exercise training p 2935 N94-28371

ELECTRIC SWITCHES
AC to DC power converter with regulated bi-polar outputs [AD-D016032] p 2786 N94-27145
Nickel-hydrogen cell reversal characteristics p 2862 N94-28114

ELECTRIC WIRE
Digital input module [DIGEL-1993-6] p 2779 N94-25620
The effect of processing on the microstructure of Ag-sheathed Bi-2223 wires [DE94-004627] p 3055 N94-26243
A study on the development of high-T(c) superconducting wire [DE93-632438] p 2783 N94-26546
Microwave coupling into a slotted cavity [PB94-123742] p 2772 N94-27041

ELECTRICAL FAULTS
A model of electric breakdown in polycrystalline semiconductors with highly nonlinear I - V characteristics [DE94-601537] p 3063 N94-27017

ELECTRICAL IMPEDANCE
Signal amplifier-shapers for multiwire detectors [DE93-634171] p 2783 N94-26438
Image theory for DC problems involving a conducting half space bounded by the general anisotropic impedance surface [PB94-132917] p 2779 N94-28390

ELECTRICAL INSULATION
Technical report of ISSP. Ser. A, no. 2676: Charge mass singularity in two-dimensional Hubbard model [JTN-94-80562] p 3065 N94-27248

ELECTRICAL MEASUREMENT
Study on measurement and evaluation methods for superconductive characteristics p 2725 N94-25560
Theoretical and computational studies in intermediate energy nuclear physics [DE94-004177] p 3012 N94-25800
A general purpose I(sub DDQ) measurement circuit [DE94-002733] p 2781 N94-25977
Exploration of GaAs structures for solid-state detectors [DE93-634191] p 3056 N94-26379
The electric field between non conductive rectangular charged surfaces placed near a small spherical conductive earthed surface and determination of critical density of charge [DE93-634324] p 2783 N94-26443
Voltammetric studies of poly(carbon disulfide) [DE94-001385] p 2717 N94-26951
The PROTEL contamination code [RXR-93071] p 3040 N94-28202

ELECTRICAL PROPERTIES
The structural, chemical, and electrical properties of He-implantation-induced nanocavities in silicon [DE94-002681] p 3052 N94-25971
Investigation of plasma etch induced damage in compound semiconductor devices [DE94-002849] p 3052 N94-25989
Alternative materials for solid oxide fuel cells: Processing and interactions of materials [DE94-000016] p 2855 N94-26114
A Shuttle mechanism for molten-electrolyte lithium batteries [DE94-002914] p 2781 N94-26144
The origins of ordering in CuPt [DE94-003864] p 2736 N94-26351
A study on the development of high-T(c) superconducting wire [DE93-632438] p 2783 N94-26546
Design and evaluation of an electromagnetic beam waveguide for measuring electrical properties of materials [NASA-TP-3418] p 2769 N94-26611
A mechanism for resistive dissipation in Ag sheathed Bi2Sr2CaCu2O8 and Bi2Sr2Ca2Cu3O10 [DE94-003009] p 3060 N94-26771
Determination of thermal properties of commercial Ni-MH cells p 2864 N94-28132
High rate lithium/thionyl chloride bipolar battery development p 2864 N94-28133
Advanced silver zinc battery development for the SRB and ET range safety subsystems p 2865 N94-28136

ELECTRICAL RESISTIVITY
Study on characteristics and electronic structures of materials with strong electronic correlations by ferromagnetic fields p 2724 N94-25557
Study on ferromagnetic field magnet using strong and highly conductive material p 2725 N94-25559
Study on synthesis and characteristics of intermetallic compound with strong electron correlation p 2726 N94-25563
The Lightcraft project: Flight technology for a hypersonic mass transit system p 2670 N94-25695
Optical conductivity and resistivity in the two-band Emery model [DE94-601943] p 3051 N94-25945
Formation of three types of quasi-crystals in Al-Pd-Mg system [REPT-A-2667] p 3053 N94-26071
The formation of conducting gold films by thermal decomposition and direct patterning using electron beam lithography of the gold cluster Au55P(C6H5)312C16 [AD-A273720] p 2749 N94-26074
Toward insulating quasicrystalline alloy in Al-Pd-Re icosahedral phase [REPT-A-2666] p 2736 N94-26477
Chemical vapor deposition and characterization of tungsten boron alloy films [DE94-002648] p 2738 N94-26610
Electrical conductivity of perovskite-magnesiowuestite as a function of pressure and temperature [DE94-002714] p 2880 N94-26806
Disintegration of (C60) by Xe ion irradiation [DE94-601913] p 3023 N94-26929
Time domain reflectometry for measuring bulk soil electrical conductivity and comparison with the Em38 instrument [PB94-125432] p 2881 N94-27052
Mapping of seawater intrusion into the coastal aquifer of Israel (the seawater-freshwater interface) by TDEM (Time Domain Electromagnetic) method [ITN-94-85238] p 2850 N94-27331
Transmittance fluctuations and non-linearity in random chains in the presence of applied electric fields [DE94-603665] p 2787 N94-27628
Geometrical resonances in the nyquist noise spectrum for ballistic conductors [DE94-603668] p 3027 N94-27631
Effective conductivity of wire mesh reflectors for space deployable antenna systems [NASA-CR-191605] p 2788 N94-27770
An experimental investigation of fatigue damage in aluminum 2024-T3 alloys p 2747 N94-27900

ELECTRO-OPTICAL EFFECT
Electric-field dependence of electroreflectance and photocurrent spectra at visible wavelengths in MOVPE-grown InAlGaP multiple strained quantum-well structures [DE94-004692] p 2780 N94-25664

ELECTRO-OPTICS
Solid state research [AD-A274063] p 3049 N94-25645
Component characterization and development 2 [AD-A274002] p 2765 N94-25660
An overview of the TNO contribution to VAST 92 [AD-A273751] p 2893 N94-26016
Peculiarities and application perspectives of metal-ion implants in glasses [DE94-004671] p 3035 N94-26246
Multichip module high speed testing [AD-A274873] p 2782 N94-26343
Optoelectronic Technology Consortium [AD-A274909] p 2782 N94-26344
Mechanistic studies of opto-electronic materials and syntheses using multiple laser and surface diagnostics [AD-A274528] p 3036 N94-26834
Optoelectronic technology consortium [AD-A274595] p 3036 N94-26857
An optoelectronic graphics display processor [AD-A274401] p 3037 N94-26990
Design and evaluation of fault tolerance in opto-electronic computing [AD-A274281] p 2954 N94-27016
Electro-optic materials by solid source MOCVD [DE94-005120] p 2757 N94-27716

ELECTROACOUSTIC TRANSDUCERS
Non-contact ultrasonic inspection
[VTT-TIED-1454] p 2835 N94-26257
ELECTROCARDIOGRAPHY
Cardiac output and cardiac contractility by impedance cardiography during exercise of runners
p 2935 N94-28367
ELECTROCATALYSTS
The Science Reports of the Research Institutes, Tohoku University. Series A: Physics, Chemistry, and Metallurgy. Volume 38, No. 1: Amorphous Materials 14
[JTN-94-80610] p 2744 N94-28158
The electrocatalytic oxidation of ethylene and methane, and reduction of oxygen on gas-diffusion electrodes made of amorphous nickel-valve metal-platinum group metal alloys p 2722 N94-28165
ELECTROCHEMICAL CELLS
Reference electrodes for solid polymer electrolytes
[DE94-004583] p 2780 N94-25806
Molten salt techniques for reproducible excess heat
[AD-A274935] p 2714 N94-26296
Exploratory technology research program for electrochemical energy storage
[DE94-003480] p 2855 N94-26329
ELECTROCHEMICAL CORROSION
Observation on metal surface in aqueous solution using an electrochemical Scanning Tunneling Microscope (STM) p 2724 N94-25554
Fundamental study on monitoring technology on local surface damages p 2724 N94-25555
Study on improvements in fretting fatigue characteristics of high strength structural member p 2726 N94-25567
The electrochemical behavior of the Al3Fe intermetallic compound and localized corrosion of impure 1100 Al
[DE94-002037] p 2739 N94-26912
Electrochemical properties of passive films on 440C stainless steel
[ISBN-0-315-64248-3] p 2757 N94-27801
ELECTROCHEMICAL OXIDATION
The Science Reports of the Research Institutes, Tohoku University. Series A: Physics, Chemistry, and Metallurgy. Volume 38, No. 1: Amorphous Materials 14
[JTN-94-80610] p 2744 N94-28158
The electrocatalytic oxidation of ethylene and methane, and reduction of oxygen on gas-diffusion electrodes made of amorphous nickel-valve metal-platinum group metal alloys p 2722 N94-28165
ELECTROCHEMISTRY
Alternative materials for solid oxide fuel cells: Processing and interactions of materials
[DE94-000016] p 2855 N94-26114
A Shuttle mechanism for molten-electrolyte lithium batteries
[DE94-002914] p 2781 N94-26144
In situ spectroscopic applications to the study of rechargeable lithium batteries
[DE94-003478] p 2782 N94-26328
Exploratory technology research program for electrochemical energy storage
[DE94-003480] p 2855 N94-26329
Template synthesis of metal microtubule ensembles utilizing chemical, electrochemical, and vacuum deposition techniques
[AD-A274676] p 2715 N94-26444
Early stages in the development of stress corrosion cracks
[DE94-003867] p 2838 N94-26524
Opportunities for High Aspect Ratio Micro-Electro-Magnetic-Mechanical Systems (HAR-MEMMS) at Lawrence Berkeley Laboratory
[DE94-003499] p 2827 N94-27722
ELECTRODE MATERIALS
Research and development of alternative components at Argonne National Laboratory for Molten Carbonate Fuel Cells
[DE94-000014] p 2857 N94-26583
ELECTRODES
Reference electrodes for solid polymer electrolytes
[DE94-004583] p 2780 N94-25806
The AFIT multielectrode array for neural recording and simulation: Design, testing, and encapsulation
[AD-A274086] p 2909 N94-25943
Double layer capacitance of carbon foam electrodes
[DE94-002651] p 2780 N94-25975
Exploratory Technology Research Program for Electrochemical Energy Storage
[DE94-003479] p 2781 N94-26047
Alternative materials for solid oxide fuel cells: Processing and interactions of materials
[DE94-000016] p 2855 N94-26114
A Shuttle mechanism for molten-electrolyte lithium batteries
[DE94-002914] p 2781 N94-26144
Low cost, radial flow, solid oxide fuel cell
[DE94-002982] p 2858 N94-26785
Voltammetric studies of poly(carbon disulfide)
[DE94-001385] p 2717 N94-26951
Channel model for AC electric arc
[PB94-124591] p 2786 N94-27327
Screen test for cadmium and nickel plates
p 2860 N94-28106
Performance model of a recirculating stack nickel hydrogen cell p 2861 N94-28112
The electrocatalytic oxidation of ethylene and methane, and reduction of oxygen on gas-diffusion electrodes made of amorphous nickel-valve metal-platinum group metal alloys p 2722 N94-28165
ELECTROENCEPHALOGRAPHY
The AFIT multielectrode array for neural recording and simulation: Design, testing, and encapsulation
[AD-A274086] p 2909 N94-25943
The use of EEG as a workload assessment tool in flight test
[AD-A274568] p 2910 N94-26847
Performance recovery in the baboon following (+)G sub z-induced loss of consciousness
[AD-A274411] p 2902 N94-26991
Interhemispheric phase relationship of alpha waves and cerebral dominance p 2927 N94-27518
Brain wave correlates of attentional states: Event related potentials and quantitative EEG analysis during performance of cognitive and perceptual tasks
p 2940 N94-27901
ELECTROFORMING
A study on heat transfer in a scramjet leading edge model
[NAL-TR-1187T] p 2675 N94-27608
ELECTROLUMINESCENCE
Recombination and metastability in amorphous silicon and silicon germanium alloys
[DE94-000237] p 2736 N94-26481
Light emitting porous silicon
[AD-A274152] p 3038 N94-27137
ELECTROLYTE METABOLISM
Changes in fluid and electrolyte metabolism during water immersion at high or thermoneutral temperature
p 2912 N94-27445
ELECTROLYTES
Exploratory Technology Research Program for Electrochemical Energy Storage
[DE94-003479] p 2781 N94-26047
Alternative materials for solid oxide fuel cells: Processing and interactions of materials
[DE94-000016] p 2855 N94-26114
A Shuttle mechanism for molten-electrolyte lithium batteries
[DE94-002914] p 2781 N94-26144
Processing of LaCrO3 for solid oxide fuel cell applications
[DE94-002981] p 2857 N94-26747
Computer simulation of aqueous Na-Cl electrolytes
[DE94-002622] p 3030 N94-28001
Performance model of a recirculating stack nickel hydrogen cell p 2861 N94-28112
ELECTROLYTIC CELLS
A Shuttle mechanism for molten-electrolyte lithium batteries
[DE94-002914] p 2781 N94-26144
Processing of LaCrO3 for solid oxide fuel cell applications
[DE94-002981] p 2857 N94-26747
Low cost, radial flow, solid oxide fuel cell
[DE94-002982] p 2858 N94-26785
MSOFC development status
[DE94-003192] p 2858 N94-26792
Perovskite solid electrolytes for SOFC
[DE94-001923] p 2859 N94-27005
Bulletin of the Institute for Chemical Reaction Science, Tohoku University, volume 2
[JTN-94-80602] p 2717 N94-27385
Glass cylindrical filter for electrolysis cell
p 2718 N94-27391
ELECTROMAGNETIC ABSORPTION
Se EXAFS study of the elevated wurtzite to rock salt structural phase transition in CdSe nanocrystals
[DE94-003247] p 3054 N94-26125
Kiruna geophysical data. Data summary 93/4-6, April-June 1993
[PB94-123700] p 2881 N94-27039
Kiruna geophysical data. Data summary 93/1-3, January-March, 1993
[PB94-123791] p 2881 N94-27043
Experimental and theoretical investigation of RF absorption and reflection from preformed plasmas
[AD-A274189] p 3046 N94-27098
ELECTROMAGNETIC ACCELERATION
On a theory of two-beam mechanisms of charged particle acceleration in electrodynamic structures
[DE94-003482] p 3032 N94-26330
ELECTROMAGNETIC COMPATIBILITY
Developments in the application of the geometrical theory of diffraction and computer graphics to aircraft inter-antenna coupling analysis
[ISBN-0-315-84643-7] p 2776 N94-27308
ELECTROMAGNETIC COUPLING
Fast wave current drive technology development at ORNL
[DE94-004243] p 3046 N94-27568
ELECTROMAGNETIC FIELDS
Back-reaction beyond the mean field approximation
[DE94-003936] p 3012 N94-25612
Modeling electromagnetic effects in MMICs for T/R modules
[AD-A273808] p 2766 N94-25736
Electromagnetic properties of a toroidal solenoid
[DE93-613032] p 2766 N94-25866
The effect of high frequency electric field on hypersound amplification in superlattice
[DE93-634326] p 3057 N94-26384
Spinor and isospinor structure of relativistic particle propagators
[DE94-601552] p 3019 N94-26424
Using the TSAR electromagnetic modeling system
[DE94-002617] p 2771 N94-26803
S-76 high intensity radiated fields, volume 2
[AD-A274572] p 2771 N94-26836
S-76 high intensity radiated fields, volume 1
[AD-A274571] p 2771 N94-26854
Calculation of the electromagnetic critical state response of high T(sub c) superconductor tape
[DE94-002894] p 3061 N94-26868
Electromagnetic fields and interference
[PB94-126489] p 2771 N94-26877
S-76 high intensity radiated fields, volume 3
[AD-A274416] p 2772 N94-26980
Microwave coupling into a slotted cavity
[PB94-123742] p 2772 N94-27041
Polarizability matrix of layered chiral sphere
[PB94-132834] p 2778 N94-28355
Fields and potentials in general uniaxial bianisotropic media I. Axial sources
[PB94-132875] p 2778 N94-28379
ELECTROMAGNETIC INTERACTIONS
Heavy charged leptons in an SU(3)(sub L) x U(1)(sub N) model
[DE93-634367] p 3016 N94-26041
Unsegmented electromagnetic calorimeter prototype. Energy and coordinate resolution
[DE93-634185] p 2810 N94-26396
Constraints on singlet right-handed neutrinos coming from the Z(0)-width
[DE93-634393] p 3022 N94-26766
Cosmological phase transitions
[DE94-003001] p 3104 N94-26786
Progress in SSC Higgs physics: Report of the Higgs working group
[DE94-003224] p 3022 N94-26793
Stopping powers and cross sections due to two-photon processes in relativistic nucleus-nucleus collisions
[NASA-CR-4574] p 3033 N94-27646
Topics in electroweak baryogenesis: The sphaleron and T-violation
[DE94-004886] p 3029 N94-27811
ELECTROMAGNETIC INTERFERENCE
Kalman filtering of narrowband interference from direct sequence spread spectrum communications systems
[ISBN-0-315-84011-0] p 2784 N94-26627
Electromagnetic fields and interference
[PB94-126489] p 2771 N94-26877
Interference analysis of multichannel transmission lines: A system's analysis
[PB94-126505] p 2772 N94-26909
Microwave coupling into a slotted cavity
[PB94-123742] p 2772 N94-27041
Discrete vacuum ultra violet reflective interference filter
[AD-D016059] p 2756 N94-27675
ELECTROMAGNETIC MEASUREMENT
An evaluation of an airborne remote sensing system used to determine ice thickness and geometry of a first year sea ice ridge located in the Beaufort Sea
[ISBN-0-315-84383-7] p 2849 N94-26667
Mapping of seawater intrusion into the coastal aquifer of Israel (the seawater-freshwater interface) by TDEM (Time Domain Electromagnetic) method
[ITN-94-85238] p 2850 N94-27331
ELECTROMAGNETIC NOISE
Low noise measurements in an RF environment
[AD-A273813] p 2767 N94-25960
Detection of transient vector-fields in additive noise
[FFI-93/7028] p 2768 N94-26232
The analysis of thermal and 1/F noise in MOS devices, circuits and systems
[ISBN-0-315-57811-4] p 2787 N94-27642

Characteristics of 30-MHz interference noises observed by riometers p 2884 N94-27965

VHF-UHF noise surveys at Gulkana, Elmensdorf AFB, Galena AFB, Kotzebue and Cape Lisburne, Alaska and NRL, Pomonkey, Maryland [PL-TR-93-2136] p 2777 N94-28211

ELECTROMAGNETIC NOISE MEASUREMENT

Low noise measurements in an RF environment [AD-A273813] p 2767 N94-25960

VHF-UHF noise surveys at Gulkana, Elmensdorf AFB, Galena AFB, Kotzebue and Cape Lisburne, Alaska and NRL, Pomonkey, Maryland [PL-TR-93-2136] p 2777 N94-28211

ELECTROMAGNETIC PROPERTIES

Electromagnetic properties of a toroidal solenoid [DE93-613032] p 2766 N94-25866

ELECTROMAGNETIC PULSES

Experiments and numerical simulations of electromagnetic wave propagation in plasma varying rapidly in space and time [AD-A274376] p 2772 N94-26975

S-76 high intensity radiated fields, volume 3 [AD-A274416] p 2772 N94-26980

Receiving antennas for electromagnetic pulses and transients [ISBN-0-315-62312-8] p 2777 N94-27871

ELECTROMAGNETIC RADIATION

Catalog of absolutely calibrated, range normalized, wideband, electric field waveforms from triggered lightning flashes in Florida [AD-A273793] p 2892 N94-25873

A research program on radiative transfer model development in support of the ARM program [DE94-001146] p 2767 N94-25950

Polarimetric investigation of edge scattering by mono- and bistatic microwave imaging [ESA-TT-1284] p 2768 N94-26317

S-76 high intensity radiated fields, volume 2 [AD-A274572] p 2771 N94-26836

Interference analysis of multichannel transmission lines: A system's analysis [PB94-126505] p 2772 N94-26909

S-76 high intensity radiated fields, volume 3 [AD-A274416] p 2772 N94-26980

Theoretical and experimental analysis of the spatial and temporal behaviour of the intensity of an electro-magnetic wave reflected from a diffuse target after passing through a turbulent atmosphere [ITN-94-85230] p 2774 N94-27234

The Sixteenth Symposium on Coordinated Observations of the Ionosphere and the Magnetosphere in the Polar Regions: Program and abstracts [JTN-94-80601] p 2882 N94-27300

Enhancement of the rate of radiative processes in the field of a magnetic monopole [DE94-603717] p 3074 N94-27696

Fiber optic true time-delay array antenna feed system [AD-D016063] p 2777 N94-27734

Radiations from hot nuclei p 3030 N94-27915

ELECTROMAGNETIC SCATTERING

Extension of On-Surface Radiation Condition (OSRC) theory to full-vector electromagnetic wave scattering by three-dimensional conducting, dielectric, and coated targets [AD-A274023] p 2766 N94-25757

Joint services electronics program [AD-A274692] p 2783 N94-26449

Experimental and theoretical investigation of RF absorption and reflection from preformed plasmas [AD-A274189] p 3046 N94-27098

Theoretical and experimental analysis of the spatial and temporal behaviour of the intensity of an electro-magnetic wave reflected from a diffuse target after passing through a turbulent atmosphere [ITN-94-85230] p 2774 N94-27234

ELECTROMAGNETIC SHIELDING

Microwave coupling into a slotted cavity [PB94-123742] p 2772 N94-27041

Method for improving electromagnetic shielding performance of composite materials by electropulsing [AD-D016050] p 2709 N94-27076

Method for improving electromagnetic shielding performance of composite materials by electroplating [AD-D016038] p 2709 N94-27091

ELECTROMAGNETIC SPECTRA

Wavelet compression techniques for hyperspectral data p 2947 N94-28263

ELECTROMAGNETIC WAVE TRANSMISSION

Technical description of the Vulcano software library [FFI-93/7024] p 2767 N94-26105

Design and evaluation of an electromagnetic beam waveguide for measuring electrical properties of materials [NASA-TP-3418] p 2769 N94-26611

Experiments and numerical simulations of electromagnetic wave propagation in plasma varying rapidly in space and time [AD-A274376] p 2772 N94-26975

FOA 39 --- electronic countermeasures [PB94-124252] p 2773 N94-27159

Technical report of ISSP. Ser. A, no. 2671: Quasi-localization of light waves in Fibonacci dielectric multilayers [JTN-94-80557] p 3064 N94-27231

JARE data reports. No. 186: Upper atmosphere physics data. Syowa and Asuka Stations, 1990 [JTN-94-80594] p 2881 N94-27299

Memories of National Institute of Polar Research. Series A-19. Upper atmosphere physics: ELF emission in high latitudes: Ray path calculation and ground-satellite observations [JTN-94-80592] p 2882 N94-27342

Nonlinear transverse propagation of photons in a ultrarelativistically hot and magnetized electron-positron plasma: Coupling of Langmuir and electromagnetic solitons [DE94-603667] p 3046 N94-27630

Plane wave propagation and polarization properties in transversely bianisotropic uniaxial medium [PB94-132883] p 2778 N94-28380

ELECTROMAGNETISM

Joint services electronics program [AD-A274643] p 2785 N94-27027

Proton electromagnetic form factor near the proton-antiproton threshold and quasinuclear bound state [DE94-606458] p 3027 N94-27681

Hybrid techniques for complex aerospace electromagnetics problems p 2779 N94-27894

Polarizability matrix of layered chiral sphere [PB94-132834] p 2778 N94-28355

Fields and potentials in general uniaxial bianisotropic media I. Axial sources [PB94-132875] p 2778 N94-28379

Analytic solution for the dyadic Green's function of a nonreciprocal uniaxial bianisotropic medium [PB94-133162] p 2779 N94-28388

Dielectric polarizability of sphere with arbitrary anisotropy [PB94-133113] p 2779 N94-28397

ELECTROMECHANICAL DEVICES

Automatic assembly planning and its role in agile manufacturing: A Sandia perspective [DE94-002291] p 2821 N94-25970

ELECTROMYOGRAPHY

The electrogastrogram during parabolic flight p 2913 N94-27452

ELECTRON ACCELERATION

On a theory of two-beam mechanisms of charged particle acceleration in electrodynamic structures [DE94-003482] p 3032 N94-26330

A direct current rectification scheme for microwave space power conversion using traveling wave electron acceleration p 2687 N94-27371

Acceleration of electrons and ions by strong lower-hybrid turbulence in solar flares [NASA-TM-109723] p 3111 N94-27953

ELECTRON ACCELERATORS

Analytical study of beam handling and emittance control [AD-A274412] p 3033 N94-27078

ELECTRON BEAM WELDING

Evaluating non-chlorinated solvents for welding applications [DE94-003332] p 2824 N94-27181

ELECTRON BEAMS

Study on elucidation of damage generation process by electron beam lithography p 2729 N94-25581

Characterization of the energy deposition produced by the primary electron beam on the EXCEDE 3 program. Appendix B and C [AD-A273878] p 3012 N94-25726

An electromagnetic calorimeter with wavelength shifting fiber readout [DE93-616664] p 2809 N94-25735

The formation of conducting gold films by thermal decomposition and direct patterning using electron beam lithography of the gold cluster Au55P(C6H5)312C16 [AD-A273720] p 2749 N94-26074

JLC-1 [DE93-520380] p 3031 N94-26113

Laboratory plasma studies [AD-A274655] p 3043 N94-26356

Study on the compensated lead hadron calorimeter characteristics by means of hadron and electron beams [DE93-634176] p 2810 N94-26439

Investigation of plasma instabilities in the polar cusp [NASA-CR-195212] p 2879 N94-26599

HPm-tubes: Literature survey comprising 1992 [PB94-123643] p 2785 N94-27038

Analytical study of beam handling and emittance control [AD-A274412] p 3033 N94-27078

Characterization of the energy deposition produced by the primary electron beam on the EXCEDE 3 program [AD-A274453] p 3033 N94-27084

Inertial electrostatic confinement as a power source for electric propulsion p 2688 N94-27373

Space Experiments with Particle Accelerators (SEPAC) [NASA-CR-193935] p 2761 N94-27664

System for conditioning an electron beam for improved free-electron laser operation [AD-D016054] p 2820 N94-27671

Micro-electron deflector [AD-D016055] p 2787 N94-27672

A prototype presampler for the uranium-scintillator calorimeter in Zeus [NIKHEF-H/93-11] p 2814 N94-28098

ELECTRON BUNCHING

Technical report of ISSP. Ser. A, no. 2688: Suppression of higher-order modes in an RF cavity by resistive material [JTN-94-80574] p 2787 N94-27606

ELECTRON DENSITY (CONCENTRATION)

Coherent HF radar system for the study of natural and heater induced ionospheric irregularities [AD-A273804] p 2876 N94-25752

Comparative investigation of high-latitude ionospheric structure and effects near solar maximum [AD-A273799] p 2877 N94-25877

Effect of impurity correlation on the density of states in slightly compensated heavily doped semiconductors [DE94-602539] p 3061 N94-26879

Analysis of density limit and efficiency in lower hybrid current drive [DE94-604995] p 3049 N94-27856

ELECTRON DENSITY PROFILES

Analysis of EUV/FUV dayglow and auroral measurements [NASA-CR-195237] p 2883 N94-27393

Laser blow-off lithium beam probing with high temporal resolution for edge plasma diagnostics [DE94-701176] p 2820 N94-27701

ELECTRON DIFFRACTION

Electron energy loss spectroscopy in a crystalline environment using inner shell ionization [DE94-601820] p 3018 N94-26334

Developments in crystallographic phase analysis in the SEM: Backscattered electron Kikuchi patterns [DE93-040755] p 3057 N94-26420

Delocalization in electron impact ionization in a crystalline environment [DE94-601819] p 3062 N94-26927

ELECTRON DISTRIBUTION

Fermi surface ridge at second and third Umklapp positron annihilations in Y Ba2Cu3O(7-delta) [DE93-634760] p 3070 N94-27995

ELECTRON EMISSION

Secondary electron emission from copper surface due to neodymium and gadolinium ion bombardment [DE94-701115] p 3027 N94-27718

ELECTRON ENERGY

Characterization of the energy deposition produced by the primary electron beam on the EXCEDE 3 program. Appendix B and C [AD-A273878] p 3012 N94-25726

Review of tokamak experiments on direct electron heating and current drive with fast waves [DE94-004185] p 3041 N94-25801

Measurement of magnetic fluctuation induced energy transport [DE94-003846] p 3042 N94-26132

Electron energy loss spectroscopy in a crystalline environment using inner shell ionization [DE94-601820] p 3018 N94-26334

Suppression of thermal grain growth in nickel by prior electron irradiation [DE94-004602] p 2737 N94-26587

Analytical study of beam handling and emittance control [AD-A274412] p 3033 N94-27078

Implementation of a compact magnetic electron energy spectrometer for intense relativistic electron beams [AD-A274451] p 3033 N94-27082

Analysis of density limit and efficiency in lower hybrid current drive [DE94-604995] p 3049 N94-27856

Energy parameters of the incident auroral electrons derived by the intensity ratio of auroral emissions p 2779 N94-27964

Nonequilibrium radiation and chemistry models for aerocapture vehicle flowfields [NASA-CR-195706] p 2648 N94-28071

ELECTRON FLUX DENSITY
Persistence of auroral electron flux events from DMSP/F9 electron measurements
[RXR-92012] p 2887 N94-28206
ELECTRON GAS
Geometrical resonances in the nyquist noise spectrum for ballistic conductors
[DE94-603668] p 3027 N94-27631
ELECTRON IMPACT
Delocalization in electron impact ionization in a crystalline environment
[DE94-601819] p 3062 N94-26927
ELECTRON IRRADIATION
Electrical properties of p-type GaInP2
[AD-A273771] p 3051 N94-25856
Suppression of thermal grain growth in nickel by prior electron irradiation
[DE94-004602] p 2737 N94-26587
ELECTRON MICROSCOPY
Study on improvement in physical analysis method of metallic materials p 2728 N94-25577
Electron microscopy of AIN-SiC interfaces and solid solutions
[DE94-002449] p 3059 N94-26765
ELECTRON MOBILITY
On the electron mobility in slightly compensated heavily doped gallium arsenide at low temperatures
[DE93-634712] p 3057 N94-26387
ELECTRON PHONON INTERACTIONS
Anisotropy in the electrical, magnetic and optical properties of Pb2Sr2RCu3O8
[ISBN-0-315-84930-4] p 3070 N94-27974
ELECTRON PLASMA
Fast H-alpha line broadening during the 100 ns REB injection into a plasma
[IPPCZ-322] p 3048 N94-27836
ELECTRON PRECIPITATION
Persistence of auroral electron flux events from DMSP/F9 electron measurements
[RXR-92012] p 2887 N94-28206
Proton aurora and substorm intensifications
[ATR-93(7248)-1] p 2887 N94-28218
ELECTRON RECOMBINATION
Merged-beam studies of electron-recombination and excitation of atomic and molecular hydrogen ions
[ETN-94-95339] p 3019 N94-26478
ELECTRON SCATTERING
Review of tokamak experiments on direct electron heating and current drive with fast waves
[DE94-004185] p 3041 N94-25801
Convergent close-coupling calculation of electron-sodium scattering
[DE94-601815] p 3014 N94-25842
Theoretical and experimental studies of elementary physics
[DE94-002310] p 3008 N94-25988
Deciphering the quark-gluon structure of the photon in electron(gamma) collisions
[DE93-634386] p 3017 N94-26043
Crystal potential retrieval in HRTEM
[DE94-601883] p 3055 N94-26171
Separation and reconstruction of electron neutrino interaction in the IHEP-JINR neutrino detector and BARS detector
[DE93-634182] p 3019 N94-26393
Relativistic collision rate calculations for electron-air interactions
[DE94-004204] p 3020 N94-26527
Calculation of electron-potassium scattering
[DE94-601812] p 3023 N94-26942
First observation of neutral current proton electron scattering at the square root of s = 300 GeV
[DE94-701107] p 3030 N94-27877
ELECTRON SPIN
Spin asymmetry in resonant electron-hydrogen elastic scattering
[DE94-601813] p 3023 N94-26943
Technical report of ISSP. Ser. A, no. 2681: Orbital and spin susceptibilities of the plane copper sites in YBa2Cu3O(x) system
[JTN-94-80567] p 3064 N94-27177
ELECTRON STATES
Rydberg states in multiply charged ions
[DE94-002335] p 3021 N94-26760
Technical report of ISSP. Ser. A, no. 2679: Novel electronic states of partially deuterated (DMe-DCNQI)2Cu
[JTN-94-80565] p 3064 N94-27175
Technical report of ISSP. Ser. A, no. 2680: Determination of intervalley scattering time in germanium by subpicosecond time-resolved Raman spectroscopy
[JTN-94-80566] p 3064 N94-27176
Technical report of ISSP. Ser. A, no. 2681: Orbital and spin susceptibilities of the plane copper sites in YBa2Cu3O(x) system
[JTN-94-80567] p 3064 N94-27177
Technical report of ISSP. Ser. A, no. 2671: Quasi-localization of light waves in Fibonacci dielectric multilayers
[JTN-94-80557] p 3064 N94-27231
Technical report of ISSP. Ser. A, no. 2674: High-field cyclotron resonance and impurity transition in n- and p-3C-SiC at magnetic fields up to 175 T
[JTN-94-80560] p 3064 N94-27232
Technical report of ISSP. Ser. A, no. 2670: Electronic structure of light transition metal compounds studied by photoemission
[JTN-94-80556] p 3065 N94-27239
Technical report of ISSP. Ser. A, no. 2672: Magneto-optical effects of excitons in BiI3 crystals under pulsed high magnetic fields. 3: Excitons confined around a stacking disorder formed by a bending stress
[JTN-94-80558] p 3065 N94-27240
Technical report of ISSP. Ser. A, no. 2675: High-field cyclotron resonance and valence-band structure in semiconducting diamond
[JTN-94-80561] p 3065 N94-27245
Technical report of ISSP. Ser. A, no. 2676: Charge mass singularity in two-dimensional Hubbard model
[JTN-94-80562] p 3065 N94-27248
ELECTRON TRANSFER
Translational-energy-resolved studies of photogenerated carrier-induced reactions on UHV semiconductor surfaces
[DE94-004169] p 3058 N94-26526
Voltammetric studies of poly(carbon disulfide)
[DE94-001385] p 2717 N94-26951
Research in pulsed power plasma physics
[AD-A274323] p 3045 N94-27074
Hydrogen physics
[DE94-701317] p 2719 N94-27822
ELECTRON TRANSITIONS
Computational analysis of some aspects of a synthetic route to ammonium dinitramide
[AD-A274648] p 2704 N94-26353
Rydberg states in multiply charged ions
[DE94-002335] p 3021 N94-26760
International bulletin on atomic and molecular data for fusion. No. 46
[DE94-601818] p 3023 N94-26947
Technical report of ISSP. Ser. A, no. 2676: Charge mass singularity in two-dimensional Hubbard model
[JTN-94-80562] p 3065 N94-27248
Technical report of ISSP. Ser. A, no. 2687: Quantized persistent currents of a quantum dot in a strong magnetic field
[JTN-94-80573] p 3028 N94-27758
Dynamics of metastable states in supersonic beams
[ITN-94-85232] p 3028 N94-27760
ELECTRON TUNNELING
Image potential of a tunnelling electron moving near two different metals
[DE94-603657] p 3069 N94-27819
ELECTRON-POSITRON PAIRS
Gamma Large Area Silicon Telescope (GLAST): Applying silicon strip detector technology to the detection of gamma rays in space
[DE94-003451] p 3116 N94-27740
Research on elementary particle physics, part 2
[DE94-004956] p 3029 N94-27815
ELECTRON-POSITRON PLASMAS
Nonlinear transverse propagation of photons in a ultrarelativistically hot and magnetized electron-positron plasma: Coupling of Langmuir and electromagnetic solitons
[DE94-603667] p 3046 N94-27630
ELECTRONIC CONTROL
Sequential multi-point injection of a natural gas engine. Topical report, November 1991 - April 1992
[PB94-126794] p 2824 N94-27224
ELECTRONIC COUNTERMEASURES
Evaluation of an Acoustic Charge Transport (ACT) device for adaptive interference suppression in spread spectrum communications systems
[AD-A274073] p 2765 N94-25647
FOA 39 --- electronic countermeasures
[PB94-124252] p 2773 N94-27159
ELECTRONIC EQUIPMENT
RF-station control crate
[DIGEL-1992-9] p 2779 N94-25618
Engineering Technical Letter (ETL) 93-5: Fire protection engineering criteria, electronic equipment installations
[AD-A274835] p 2762 N94-26084
Microwave and pulsed power
[DE94-003019] p 2782 N94-26312
Joint services electronics program
[AD-A274692] p 2783 N94-26449
Generalized emulation microcircuit program
[AD-A274749] p 2785 N94-26797
A fully integrated 16 channel digitally trimmed pulse shaping amplifier
[DE94-004555] p 2787 N94-27618
Advances in gamma ray field instrumentation at Los Alamos
[DE93-040264] p 2813 N94-27624
Control system for tracking nonlinear systems
[AD-D016057] p 2787 N94-27673
ELECTRONIC EQUIPMENT TESTS
Hierarchical test development and design-for-testability for (a)synchronous semi-custom ASIC's
[ISBN-9-09-005928-8] p 2834 N94-26003
Test methods and custom hardware for functional testing of a high speed GaAs DRAM
[AD-A274859] p 2781 N94-26175
Symbolic model checking for sequential circuit verification
[AD-A274375] p 2786 N94-27061
ELECTRONIC FILTERS
An integrated delta-sigma based IIR filter
[ISBN-0-315-83593-1] p 2784 N94-26631
ELECTRONIC MAIL
Single term off-line coins
[CWI-CS-R9318] p 2776 N94-27546
An efficient off-line electronic cash system based on the representation problem
[CWI-CS-R9323] p 2776 N94-27551
ELECTRONIC PACKAGING
Experimental determination of the CU-IN-PB ternary phase diagram
[DE94-003765] p 2735 N94-26349
ELECTRONIC SPECTRA
Spectroscopy Division
[DE94-604074] p 2717 N94-26988
ELECTRONIC WARFARE
FOA 39 --- electronic countermeasures
[PB94-124252] p 2773 N94-27159
Smalltalk: A tool for development of an Ada implementation of EWCAC
[SKL-1600-46-003-01-0] p 2974 N94-27823
ELECTRONS
Heavy-electron behavior in large coordination compounds CeZn11 and UZn12
[REPT-A-2663] p 3049 N94-25614
Convergent close-coupling calculation of electron-sodium scattering
[DE94-601815] p 3014 N94-25842
Trapped electrons in solid hydrogen
[DE93-018628] p 3052 N94-25947
Theoretical and experimental studies of elementary physics
[DE94-002310] p 3008 N94-25988
Measurement of magnetic fluctuation induced energy transport
[DE94-003846] p 3042 N94-26132
Ionospheric modification by high power, obliquely propagated HF radio wave transmissions. Part 1: Experimental
[AD-A273746] p 2878 N94-26224
On Poisson brackets and symplectic structures for the classical and quantum Zitterbewegung
[DE93-634305] p 2992 N94-26267
Magnetic field induced contributions of supersymmetric particles to energy losses of neutron star
[DE93-634331] p 3104 N94-26269
Separation and reconstruction of electron neutrino interaction in the IHEP-JINR neutrino detector and BARS detector
[DE93-634182] p 3019 N94-26393
On the wave and corpuscular properties of microparticles
[DE93-634450] p 3020 N94-26509
Calculation of total cross sections for electron and positron scattering on sodium and potassium
[DE94-601814] p 3023 N94-26944
Calculations of asymmetries in electron-alkali scattering
[DE94-601816] p 3023 N94-26945
A measurement of the W mass using electrons at CDF
[DE94-004656] p 3028 N94-27748
Analysis of energetic proton and electron data in Neptune's magnetosphere
[NASA-CR-195707] p 3107 N94-27784
ELECTROPHORESIS
High definition Raman microscopic imaging
[DE94-003158] p 2716 N94-26781
ELECTROPHOTOMETERS
Characterization of the energy deposition produced by the primary electron beam on the EXCEDE 3 program
[AD-A274453] p 3033 N94-27084
ELECTROPHYSIOLOGY
Electrical stimulation in exercise training
p 2935 N94-28371
ELECTROPLATING
Vapor deposition of copper on stainless steel 304L
[DE94-001945] p 2740 N94-27006

Method for improving electromagnetic shielding performance of composite materials by electroplating
[AD-D016038] p 2709 N94-27091

ELECTROSLAG REFINING

Study on reactions between molten metal and oxide by magnetic flotation dissolution method
p 2725 N94-25558

ELECTROSTATIC CHARGE

Electrostatic image solution for the conducting prolate spheroid
[PB94-133154] p 2778 N94-28387

ELECTROSTATIC WAVES

Acceleration of electrons and ions by strong lower-hybrid turbulence in solar flares
[NASA-TM-109723] p 3111 N94-27953

ELECTROSTATICS

The electric field between non conductive rectangular charged surfaces placed near a small spherical conductive earthed surface and determination of critical density of charge
[DE93-634324] p 2783 N94-26443

Cryogenic size reduction of solid propellant
[AD-A274844] p 2759 N94-26800

Molecular surface electrostatic potentials in the analysis of non-hydrogen-bonding noncovalent interactions
[AD-A274612] p 3022 N94-26894

Inertial electrostatic confinement as a power source for electric propulsion p 2688 N94-27373

Atomic processes in Inertial Electrostatic Confinement (IEC) devices
[DE94-005015] p 3047 N94-27715

Computer simulation of aqueous Na-Cl electrolytes
[DE94-002622] p 3030 N94-28001

Electrostatic image solution for the conducting prolate spheroid
[PB94-133154] p 2778 N94-28387

ELECTROSTRICTION

Studies of non-linear optical effects for agile beam steering
[AD-A273998] p 3034 N94-25902

ELEMENTARY EXCITATIONS

Towards a theory of growing surfaces: Mapping two-dimensional Laplacian growth onto Hamiltonian dynamics and statistics
[DE94-002636] p 2991 N94-26079

Strongly interacting fermion systems
[DE94-002674] p 3021 N94-26677

Decay of non-equilibrium polariton condensate in semiconductors
[DE94-604016] p 3068 N94-27678

ELEMENTARY PARTICLE INTERACTIONS

Quark-antiquark bound states
[DE93-613054] p 3013 N94-25826

Principles of gauge theory of real hadrons
[DE93-613096] p 3013 N94-25835

Unravelling the structure of matter on high-performance computers
[DE94-601620] p 3015 N94-25891

Spin effects in hard interactions (interest in accelerated polarized beam)
[DE93-634398] p 3031 N94-26044

An antiproton-proton partial-wave analysis
[DE94-002690] p 3021 N94-26620

Low-energy hadronic interactions beyond the current algebra approach
[DE94-602600] p 3022 N94-26900

A variational approach to the quantum field theoretic bound-state problem
[ISBN-0-315-60960-5] p 3074 N94-27401

All-coupling polaron ground state energy in D-dimension
[DE94-603666] p 3027 N94-27629

Neutron-neutron scattering: Possibility of in-beam experiment
[DE94-606459] p 3027 N94-27682

ELEMENTARY PARTICLES

On the model of the relativistic particle with curvature and torsion
[DE94-606330] p 3029 N94-27848

Radiations from hot nuclei p 3030 N94-27915

ELEVATION

The effect of elevation data representation on nocturnal drainage wind simulations
[DE94-003624] p 2892 N94-25936

Differential global positioning system for the surface-towed ordnance locating system: Testing, results, and user's guide
[DE94-002980] p 2664 N94-26309

Conifer tree influence on Digital Terrain Elevation Data (DTED): A case study at Dulles International Airport
[AD-A274213] p 2849 N94-27069

ELEVATION ANGLE

Geometric correction of SPOT images with use of digital elevation models
[ETN-94-95033] p 2847 N94-26107

ELLIPTIC DIFFERENTIAL EQUATIONS

A survey of open problems in symplectic integration
[DE94-003966] p 3007 N94-27777

ELLIPTICAL POLARIZATION

Eigenwaves in the general uniaxial bianisotropic medium with symmetric parameter dyadics
[PB94-132891] p 2778 N94-28381

Plane wave propagation in an anisotropic chiral medium with isotropic permittivity and permeability
[PB94-133097] p 2778 N94-28384

EMBEDDED COMPUTER SYSTEMS

Development and analysis of secure embedded software
[VTT-TIED-1430] p 2961 N94-26254

Real-Time Embedded Processing for Space Applications
[ISBN-2-85428-335-X] p 2948 N94-26713

Use of HOOD coupled to real time monitors
p 2953 N94-26742

EMBRITTLEMENT

The role of point defect clusters in reactor pressure vessel embrittlement
[DE94-001122] p 2739 N94-26931

Failure behaviour of high density polyethylene with an embrittled surface layer due to weathering
[PB94-126406] p 2840 N94-26960

Mechanical behavior of amorphous alloys at elevated temperatures p 2746 N94-28167

EMBRYOS

Effects of ML-9, a myosin light-chain kinase inhibitor, on preimplantation development of the mouse
p 2905 N94-27486

Compaction-like blastomere aggregation caused by 1-oleoyl-2-acetylglycerol in mouse embryos: An electron microscopic observation p 2905 N94-27487

Inductive differentiation of nerve cells in mouse embryonic ectoderm at early primitive streak stage by retinoic acid p 2905 N94-27488

Proposed law of nature linking impacts, plume volcanism, and Milankovitch cycles to terrestrial vertebrate mass extinctions via greenhouse-embryo death coupling
p 2876 N94-28307

EMERGENCIES

Assured crew return vehicle post landing configuration design and test p 2697 N94-25671

Mesoscale meteorological measurements characterizing complex flows
[DE94-002359] p 2895 N94-26761

EMISSION SPECTRA

Study on analyzing method establishment for metallic material development p 2729 N94-25578

Trapped electrons in solid hydrogen
[DE93-018628] p 3052 N94-25947

Stationary plasma thruster plume emissions
[NASA-CR-194471] p 2701 N94-26209

Electron energy loss spectroscopy in a crystalline environment using inner shell ionization
[DE94-601820] p 3018 N94-26334

A study of gamma ray burst continuum properties presnting evidence for two spectral states in bursts
p 3114 N94-26688

Researches of the Electrotechnical Laboratory. No. 53: Spectral emission from combustion gas containing scattering media
[JTN-94-80603] p 2717 N94-27246

Energy parameters of the incident auroral electrons derived by the intensity ratio of auroral emissions
p 2779 N94-27964

The kinetics and dynamics of the coma of Halley's comet
[NASA-CR-194828] p 3105 N94-28184

EMISSIVITY

Uncertainties in the characterization of the thermal environment of a solid rocket propellant fire
[DE94-002023] p 2760 N94-27719

Energy parameters of the incident auroral electrons derived by the intensity ratio of auroral emissions
p 2779 N94-27964

EMITTANCE

Longitudinal diffusion of a proton bunch under external noise
[DE93-634022] p 3032 N94-26165

Analytical study of beam handling and emittance control
[AD-A274412] p 3033 N94-27078

EMITTERS

S-76 high intensity radiated fields, volume 2
[AD-A274572] p 2771 N94-26836

S-76 high intensity radiated fields, volume 1
[AD-A274571] p 2771 N94-26854

Fibrous emissive burners selective and broad band
[PB94-128329] p 2859 N94-27225

EMULSIONS

Double layer capacitance of carbon foam electrodes
[DE94-002651] p 2780 N94-25975

Development of liquid membrane separation processes p 2717 N94-27386

ENAMELS

Dual cure low-VOC coating process
[DE94-000365] p 2756 N94-27611

ENCAPSULATING

A formalization of objects using equational dynamic logic
[PB94-125218] p 2965 N94-26852

END EFFECTORS

Autonomous space processor for orbital debris advanced design project in support of solar system exploration p 2697 N94-25667

Inertial-space disturbance rejection for space-based manipulators p 2683 N94-26281

Interchangeable end effector tools utilized on the PFMA
[NASA-CR-193925] p 2823 N94-27149

ENDANGERED SPECIES

Coupling of pelagic and benthic communities over a seamount in the Eastern North Pacific
[AD-A274750] p 2899 N94-26149

ENDOCRINE GLANDS

Endocrinological evaluations of muscle and bone atrophy in tail-suspended rats p 2903 N94-27444

ENERGY BANDS

Technical report of ISSP. Ser. A, no. 2679: Novel electronic states of partially deuterated (DMe-DCNQI)2Cu
[JTN-94-80565] p 3064 N94-27175

Technical report of ISSP. Ser. A, no. 2670: Electronic structure of light transition metal compounds studied by photoemission
[JTN-94-80556] p 3065 N94-27239

ENERGY BUDGETS

Surface roughness lengths
[AD-A274550] p 2895 N94-26846

Martian atmospheric radiation budget
p 3107 N94-27887

Role of remote sensing in energy, water, and carbon cycle studies over the Amazon
[INPE-5486-PRE/1786] p 2852 N94-27957

Research activities on the meteorology over the Asia-Pacific region p 2853 N94-28271

ENERGY CONSUMPTION

Solar energy utilization in the USSR
p 2853 N94-26052

ENERGY CONVERSION

Ways to improve MHD power plants and prospects of their application p 2854 N94-26056

Parametric analysis of the space power plants on the base of criterion of specific mass in generalized design variants
[DE93-634153] p 2701 N94-26166

High temperature solid oxide fuel development activities
[DE94-002973] p 2858 N94-26871

ENERGY CONVERSION EFFICIENCY

Ways to improve MHD power plants and prospects of their application p 2854 N94-26056

Controls, monitoring and performance measurements
p 2831 N94-28086

ENERGY DISSIPATION

An electromagnetic calorimeter with wavelength shifting fiber readout
[DE93-616664] p 2809 N94-25735

Rescattering and energy loss of fast partons in nuclear matter
[DE94-002918] p 3018 N94-26145

Parametric analysis of the space power plants on the base of criterion of specific mass in generalized design variants
[DE93-634153] p 2701 N94-26166

Magnetic field induced contributions of supersymmetric particles to energy losses of neutron star
[DE93-634331] p 3104 N94-26269

Electron energy loss spectroscopy in a crystalline environment using inner shell ionization
[DE94-601820] p 3018 N94-26334

The influence of energy losses with time in NbTi superconductors in pulsed magnetic fields
[DE93-634761] p 3058 N94-26512

Relativistic collision rate calculations for electron-air interactions
[DE94-004204] p 3020 N94-26527

A prototype presampler for the uranium-scintillator calorimeter in Zeus
[NIKHEF-H/93-11] p 2814 N94-28098

Consequences of impacts of small asteroids and comets with Earth p 2889 N94-28301

ENERGY DISTRIBUTION

A study of very high energy hadron interactions through observation of cosmic-ray families of visible energy greater than 500 TeV, 1 p 3112 N94-25625

A study of very high energy hadron interactions through observation of cosmic-ray families of visible energy greater than 500 TeV, 2 p 3112 N94-25626

ENERGY GAPS (SOLID STATE)

Surface modes and chiral symmetry (Wilson fermions in a box)
[DE94-004946] p 3029 N94-27814

ENERGY LEVELS

High resolution fourier transform absorption spectrum of 79Br2 B3 Pi(Ou+) X1 sigma g+
[AD-A273864] p 2956 N94-25610

On the estimation of matrix elements for optical transitions in semiconductors
[DE93-613550] p 3051 N94-25851

Biexciton formation by two-photon absorption in quantum wells
[DE93-613551] p 3071 N94-25852

On the classification scheme for resonant states of muonic molecules
[DE93-613645] p 3014 N94-25853

Electronic structure of a single oxygen vacancy in rutile TiO2
[DE94-602717] p 3062 N94-26901

International bulletin on atomic and molecular data for fusion. No. 42-45, Mar. 1991 - Dec. 1992
[DE94-601817] p 3045 N94-26946

International bulletin on atomic and molecular data for fusion. No. 46
[DE94-601818] p 3023 N94-26947

Hyperfine structure of positronium energy levels in a crystal
[DE94-603898] p 3068 N94-27729

Hypersensitive transition spectrum of f-element and coordination structure
[DE94-604133] p 3070 N94-27843

ENERGY METHODS

Separable expansions of the NN t-matrix by way of exact half off the energy shell methods
[DE94-601615] p 3015 N94-25890

Weak coupling in statistical energy analysis ion Research, Univ. of Southampton, Southampton SO9 5NH, England)
[ISVR-TR-228] p 2832 N94-28174

ENERGY OF FORMATION

Zinc(2) oxide stability in alkaline sodium phosphate solutions at elevated temperatures
[DE94-003316] p 2715 N94-26320

ENERGY POLICY

Programme for the promotion of wind power production
[DE94-702065] p 2855 N94-26242

An overview of DOE's wind turbine development programs
[DE93-018224] p 2856 N94-26513

Present situation of the development of petroleum substitution energy (France)
[DE94-725201] p 2760 N94-26914

ENERGY REQUIREMENTS

An overview of DOE's wind turbine development programs
[DE93-018224] p 2856 N94-26513

ENERGY SOURCES

Renewable energy systems in Mexico: Installation of a hybrid system
[DE93-013716] p 2853 N94-25946

ENERGY SPECTRA

Energy concentration in high energy hadron-gamma families p 3113 N94-25632

Hadron gas ionization calorimeters
[DE93-634186] p 2810 N94-26397

Study on the compensated lead hadron calorimeter characteristics by means of hadron and electron beams
[DE93-634176] p 2810 N94-26439

Calculations of population transfer during intense laser pulses
[DE94-001060] p 2818 N94-26698

A measurement of the energy spectra of cosmic rays from 20 to 1000 GeV per AMU
[NASA-CR-195246] p 3115 N94-27167

Spectroscopy and strong decays of baryons
[ISBN-0-315-49073-X] p 3024 N94-27258

ENERGY STORAGE

Exploratory Technology Research Program for Electrochemical Energy Storage
[DE94-003479] p 2781 N94-26047

A study on the development of high T(sub c) superconducting materials
[DE93-633529] p 3057 N94-26404

Low-cost photovoltaic inverters incorporating application-specific integrated circuits
[DE94-003270] p 2856 N94-26463

The reactivity of lithium toward non-aqueous solvents of relevance to energy storage applications as studied by surface analytical techniques
[DE94-003483] p 2856 N94-26464

The 1993 NASA Aerospace Battery Workshop
[NASA-CP-3254] p 2860 N94-28100

Advanced energy storage for space applications: A follow-up p 2860 N94-28103

Experimental evaluation of battery cells for space-based radar application p 2860 N94-28104

ENERGY TECHNOLOGY

Theoretical and computational studies in intermediate energy nuclear physics
[DE94-004177] p 3012 N94-25800

Renewable energy systems in Mexico: Installation of a hybrid system
[DE93-013716] p 2853 N94-25946

General Motors Corporation and Pacific Northwest Laboratory staff exchange: Inspection of case hardened steels and metal-matrix composites
[DE94-003470] p 2706 N94-25982

NEMO 2: New energy systems and technologies
[DE94-702060] p 2855 N94-26240

SIHTI 2: Energy and environmental technology
[DE94-702061] p 2867 N94-26241

Scientific and Technical Information (STI)....what's the status?
[DE94-003731] p 3097 N94-26348

International energy: Research organizations, 1988-1992
[DE93-017267] p 3098 N94-26398

Fusion Energy Advisory Committee: Advice and recommendations to the US Department of Energy in response to the charge letter of September 1, 1992
[DE93-019842] p 3043 N94-26428

An overview of the ASCOT program
[DE94-004356] p 2869 N94-27601

Combined Cycles for Power Plants
[VKI-LS-1993-08] p 2830 N94-28077

Clean coal technology p 2832 N94-28089

ENERGY TRANSFER

Vibrational energy transfer within the B 3Pi (O(+) sub u) state of 79BR2 upon collision with N2, O2, NO, and SF6
[AD-A273905] p 3011 N94-25589

Characterization of the energy deposition produced by the primary electron beam on the EXCEDE 3 program. Appendix B and C
[AD-A273878] p 3012 N94-25726

Spectroscopic and vibrational energy transfer studies in molecular bromine
[AD-A273795] p 3014 N94-25875

Surface physics with cold and thermal neutron reflectometry
[DE94-001447] p 2733 N94-26070

Interpreting the implied meridional oceanic energy transport in AMIP
[DE94-001538] p 2898 N94-26072

Measurement of magnetic fluctuation induced energy transport
[DE94-003846] p 3042 N94-26132

Dynamics explorer interdisciplinary scientist investigations
[NASA-CR-195226] p 2878 N94-26204

Differentiating the role of land surface variability and cloudiness variability on global energy transport within the atmosphere and oceans
[NASA-CR-195229] p 2847 N94-26222

The dynamics of interacting nonlinearities governing long wavelength driftwave turbulence
[DE94-001785] p 2793 N94-26558

Characterization of the energy deposition produced by the primary electron beam on the EXCEDE 3 program
[AD-A274453] p 3033 N94-27084

ENGINE AIRFRAME INTEGRATION

The design of a counter rotating ultra-high-bypass fan simulator for windtunnel investigation
[DLR-FB-93-20] p 2675 N94-27739

ENGINE DESIGN

Supercruiser Arrow HS-8 p 2671 N94-25711

The design of a long-range megatransport aircraft p 2671 N94-25718

Orbit transfer rocket engine technology program
[NASA-CR-189229] p 2702 N94-26542

A technique for integrating engine cycle and aircraft configuration optimization
[NASA-CR-191602] p 2668 N94-26606

Orbital transfer vehicle engine technology high velocity ratio diffusing crossover
[NASA-CR-194447] p 2703 N94-27212

Orbital transfer rocket engine technology 7.5K-LB thrust rocket engine preliminary design
[NASA-CR-190754] p 2703 N94-27213

Inertial electrostatic confinement as a power source for electric propulsion p 2688 N94-27373

Development of hypersonic engine seals: Flow effects of preload and engine pressures
[NASA-TM-106333] p 2826 N94-27599

Gas fired advanced turbine system
[DE94-003193] p 2827 N94-27874

Transient model applications. 1: Compressor heat soak/clearance effects modeling p 2828 N94-28048

Transient model applications. 2: Compressor stall modeling methods p 2829 N94-28049

Transient model applications. 3: Transient engine simulation and analysis of an ice ingestion test p 2829 N94-28050

Engine simulation technology p 2829 N94-28051

Transient engine simulation p 2829 N94-28052

Nonlinear solvers p 2829 N94-28053

Engine simulation systems p 2829 N94-28054

ENGINE FAILURE

STS-51 pad abort. OV103-engine 2033 (ME-2) fuel flowmeter sensor open circuit
[NASA-CR-193924] p 2701 N94-26230

Optimal control of helicopters following power failure
[NAL-TR-1190] p 2678 N94-27206

Compressor stability p 2828 N94-28046

Engine starting and stopping p 2828 N94-28047

Transient model applications. 2: Compressor stall modeling methods p 2829 N94-28049

ENGINE INLETS

Wind tunnel investigation of an STOL aircraft model: An effect of engine nacelle shape
[NAL-TM-653] p 2647 N94-27235

Influence of headwind on hot gas reingestion and consideration of pressure ratio scaling p 2675 N94-28018

Unsteady aspects of hot gas reingestion and statistical analysis p 2676 N94-28019

ENGINE MONITORING INSTRUMENTS

An algorithm for determination of bearing health through automated vibration monitoring
[AD-A274591] p 2823 N94-26986

Effects of expected-value information and display format on recognition of aircraft subsystem abnormalities
[NASA-TP-3395] p 2673 N94-27882

ENGINE NOISE

CRC customer versus rater octane number requirement program (1990)
[AD-A273997] p 2758 N94-25901

ENGINE PARTS

Aircraft turbine engine reliability and inspection investigations
[AD-A274860] p 2673 N94-26176

Optimising BMW four-cylinder two-valve engines
[PB94-125101] p 2824 N94-27254

Interdisciplinary technology p 2686 N94-27363

A review of recent aeroelastic analysis methods for propulsion at NASA Lewis Research Center
[NASA-TP-3406] p 2846 N94-28227

ENGINE STARTERS

Gas Turbine Engine Transient Behaviour
[VKI-LS-1993-06] p 2828 N94-28043

Engine starting and stopping p 2828 N94-28047

ENGINE TESTS

Test results of the RS-44 integrated component evaluator liquid oxygen/hydrogen rocket engine
[NASA-CR-194443] p 2701 N94-26231

Sequential multi-point injection of a natural gas engine. Topical report, November 1991 - April 1992
[PB94-126794] p 2824 N94-27224

Computer aided data recording and analyzing system for the engine test p 2764 N94-27979

The emission characteristics of a high speed diesel engine p 2764 N94-27980

Transient model applications. 3: Transient engine simulation and analysis of an ice ingestion test p 2829 N94-28050

ENGINEERING

Selected data on Federal support to universities and colleges: FY 1991
[NSF-93-320] p 3101 N94-28201

ENGINEERS

General Motors Corporation and Pacific Northwest Laboratory staff exchange: Inspection of case hardened steels and metal-matrix composites
[DE94-003470] p 2706 N94-25982

ENSTATITE

Electrical conductivity of perovskite-magnesiowuestite as a function of pressure and temperature
[DE94-002714] p 2880 N94-26806

ENTHALPY

A numerical approach to Stefan problem
[IPPCZ-334] p 2844 N94-27841

Calculation of the thermoneutral potential of NiCd and NiH2 cells p 2861 N94-28111

Differential scanning calorimetric study of solid state amorphization and crystallization in Zr/Co and Zr/Ni multilayers p 2745 N94-28161

Formation and crystallization of hydrogen-induced amorphous Ti3InH(4.5) alloy p 2745 N94-28163

ENTRAINMENT

An experimental study of plunging liquid jet induced air carryunder and dispersion
[AD-A274414] p 2794 N94-26979

ENTROPY

Parametric analysis of the space power plants on the base of criterion of specific mass in generalized design variants
[DE93-634153] p 2701 N94-26166

Zinc(2) oxide stability in alkaline sodium phosphate solutions at elevated temperatures
[DE94-003316] p 2715 N94-26320

Quantum statistical inference for density estimation
[DE94-002625] p 3073 N94-26805

ENUMERATION

Enumeration of n-fold tangent hyperplanes to a surface
[DE94-601544] p 2993 N94-26412

ENVIRONMENT EFFECTS

Preliminary design of nine high speed civil transports
p 2671 N94-25710

Selfsimilar solutions of a nonlinear transport equation
[REPT-93-42] p 2865 N94-25760

Implications of policies and prevent climate change for future food security
[DE93-018872] p 2866 N94-25948

Active layer dynamics and arctic hydrology and meteorology
[DE94-001724] p 2892 N94-25951

Grassland/atmosphere response to changing climate: Coupling regional and local scales
[DE94-003111] p 2866 N94-26026

Meeting of the Eighth Session of the Scientific Advisory Committee of the World Climate Impact Assessment and Response Strategies Programme
[DE93-633954] p 2866 N94-26163

SIHTI 2: Energy and environmental technology
[DE94-702061] p 2867 N94-26241

Titanium 1992: Volume 3: Science and technology
[AD-A274800] p 2735 N94-26337

Measuring variation in ecosystem sensitivity to stress
[AD-A274232] p 2868 N94-26817

Leadex environmental phenomena and effects observed by DMSP, NOAA, and ERS-1 satellites
[AD-A274596] p 2868 N94-26888

NASA-UVA light aerospace alloy and structures technology program (LA2ST)
[NASA-CR-195275] p 2844 N94-27851

Asia-Pacific Seminar on Global Change Research Cooperation
[JTN-94-80517] p 2871 N94-28268

Changes in phytoplankton population in the Chao Phraya estuary, Thailand, during the eutrophication mechanisms studies p 2875 N94-28287

Land use change in Thailand and its impact on environmental change: Joint Thai-Japanese research project (1993-1995) p 2875 N94-28288

Study on environment monitoring over whole China using NDVI from AVHRR data and future project
p 2875 N94-28289

Utilization of remote sensing data for global climate change research in Malaysia p 2875 N94-28290

Utilization of remote sensing data for global change research p 2875 N94-28292

Contribution of satellite observation to global change research p 2876 N94-28293

Proposed law of nature linking impacts, plume volcanism, and Milankovitch cycles to terrestrial vertebrate mass extinctions via greenhouse-embryo death coupling
p 2876 N94-28307

ENVIRONMENT MANAGEMENT

The potential for the Department of Defense to use space-based remote sensing to support DOD and other government agencies' environmental programs
[AD-A273895] p 2847 N94-25656

Hanford Environmental Information System (HEIS) sample/data entry flow summary
[DE94-002494] p 3098 N94-26559

Feasibility study on construction of a global environment research and development information network
[DE94-725198] p 2868 N94-26904

Present situation of the development of petroleum substitution energy (France)
[DE94-725201] p 2760 N94-26914

Coastal Zone Management Act and related legislation, revision 3
[DE94-004180] p 2869 N94-27691

Environmental management and audit
p 2870 N94-28153

ENVIRONMENT MODELS

Grassland/atmosphere response to changing climate: Coupling regional and local scales
[DE94-003111] p 2866 N94-26026

Why is the north polar cap on Mars different than the south polar cap? p 3107 N94-27889

Landscape dynamics of northeastern forests
[NASA-CR-195272] p 2852 N94-28070

ENVIRONMENT POLLUTION

Study on neutron activation analysis
[DE93-632191] p 3017 N94-26116

Cooling towers for combined cycles: New developments to meet environmental requirements
p 2832 N94-28088

ENVIRONMENT PROTECTION

Analysis and development of an F-5 pollution prevention management program with recommendations for creation of similar programs for other aircraft
[AD-A274016] p 2865 N94-25755

Engineering Technical Letter (ETL) 93-5: Fire protection engineering criteria, electronic equipment installations
[AD-A274835] p 2762 N94-26084

Effects of plastic media blasting on aircraft skin
[AD-A274817] p 2668 N94-26488

Numerical analysis of the photo-dissociation/radical oxidation of formaldehyde by ultraviolet light in a photolytic reactor
[AD-A274539] p 2868 N94-26843

Vapor deposition of copper on stainless steel 304L
[DE94-001945] p 2740 N94-27006

Automated in-situ inspection systems for underground storage tanks
[AD-A274644] p 2764 N94-27144

Coastal Zone Management Act and related legislation, revision 3
[DE94-004180] p 2869 N94-27691

Journal of NIRE, volume 2, number 4
[JTN-94-80554] p 2869 N94-28147

Recent legal movement on water quality regulation in Japan p 2869 N94-28148

Environmental management and audit
p 2870 N94-28153

Lufthansa Yearbook 1992
[DSK-9734-H-92] p 2660 N94-28230

The single European market: Economical advance, ecological problem? p 2661 N94-28235

ENVIRONMENT SIMULATION

ObjectSim: A reusable object oriented DIS visual simulation
[AD-A274030] p 2958 N94-25767

NPSNET-4: A real-time, 3D distributed interactive virtual world
[AD-A274942] p 2961 N94-26298

ENVIRONMENTAL CONTROL

Automation of closed environments in space for human comfort and safety p 2943 N94-25684

Designing for human presence in space: An introduction to environmental control and life support systems
[NASA-RP-1324] p 2942 N94-27437

Study on posture control and adaption mechanism under weightlessness: Results of second rehearsal for space experiment using carp p 2912 N94-27446

Study on posture control and adaptation mechanism under weightlessness: Summary report of ground operations performed for carp experiment (FMPT/L-2) in Space Shuttle mission p 2912 N94-27447

ENVIRONMENTAL ENGINEERING

Bulletin of Precision and Intelligence Laboratory, No. 68
[JTN-94-80609] p 3010 N94-27282

Silence amenity engineering: Past and present
p 3011 N94-27283

ENVIRONMENTAL MONITORING

Assessment of tropical forests using satellite data
[SILVA-CARELICA-21] p 2850 N94-27182

Global tropical forest cover assessments using satellite imagery p 2850 N94-27183

Mapping closed tropical forest cover in West Africa using NOAA/AVHRR-LAC data p 2850 N94-27184

Woody biomass density in the Tendelti area of the central Sudan p 2850 N94-27185

MUSIC for localization of thunderstorm cells
[DE94-004985] p 2897 N94-28146

Journal of NIRE, volume 2, number 4
[JTN-94-80554] p 2869 N94-28147

Environmental management and audit
p 2870 N94-28153

Asia-Pacific Seminar on Global Change Research Cooperation
[JTN-94-80517] p 2871 N94-28268

Role and activity of STA on Asian Pacific regional cooperation p 2853 N94-28269

Cooperative research projects on satellite remote sensing for the hydrological subjects
p 2853 N94-28270

Research activities on the meteorology over the Asia-Pacific region p 2853 N94-28271

NASDA contribution plan to Asian countries
p 2853 N94-28273

Global concern on research cooperation for environment p 2872 N94-28275

Progress in the study of global change in China
p 2873 N94-28276

Research and observation programmes on global changes in Indonesia p 2873 N94-28277

Country report on global change research for the Republic of Korea p 2873 N94-28278

Philippine thrust on environmental research relating to global change p 2873 N94-28279

The Environmental Research and Training Centre
p 2873 N94-28280

Global Change and Terrestrial Ecosystems (GCTE): Progress report and prospects for Asian contributions
p 2874 N94-28281

Global change: A research strategy for Australia 1992-1996 p 2874 N94-28282

A progress report on global change studies in China
p 2874 N94-28283

Indian activities on the core programme IGAP and proposals for network activities p 2874 N94-28284

HDGEC activity in Asia Pacific region
p 2874 N94-28286

Changes in phytoplankton population in the Chao Phraya estuary, Thailand, during the eutrophication mechanisms studies p 2875 N94-28287

Land use change in Thailand and its impact on environmental change: Joint Thai-Japanese research project (1993-1995) p 2875 N94-28288

Study on environment monitoring over whole China using NDVI from AVHRR data and future project
p 2875 N94-28289

Utilization of remote sensing data for global climate change research in Malaysia p 2875 N94-28290

Thailand satellite ground receiving station in global change research cooperation p 2875 N94-28291

Utilization of remote sensing data for global change research p 2875 N94-28292

Contribution of satellite observation to global change research p 2876 N94-28293

ENVIRONMENTAL QUALITY

Asia-Pacific Seminar on Global Change Research Cooperation
[JTN-94-80517] p 2871 N94-28268

The Environmental Research and Training Centre
p 2873 N94-28280

Global Change and Terrestrial Ecosystems (GCTE): Progress report and prospects for Asian contributions
p 2874 N94-28281

Utilization of remote sensing data for global change research p 2875 N94-28292

Contribution of satellite observation to global change research p 2876 N94-28293

ENVIRONMENTAL SURVEYS

Planetary surface exploration MESUR/autonomous lunar rover p 2833 N94-25683

Leadex environmental phenomena and effects observed by DMSP, NOAA, and ERS-1 satellites
[AD-A274596] p 2868 N94-26888

ENVIRONMENTAL TESTS

NASA Lewis Research Center lean-, rich-burn materials test burner rig
[NASA-CR-194437] p 2680 N94-26141

A study of psychological factors affecting an extremely isolated environment p 2927 N94-27517

ENZYME ACTIVITY

Neutron and x ray scattering studies of the interactions between Ca(2+)-binding proteins and their regulatory targets: Comparisons of troponin C and calmodulin
[DE94-002706] p 2901 N94-26623

Modulation by galactosamine-induced hepatitis of biological responses of the rat exposed to high altitude hypoxia p 2904 N94-27464

Effects of gamma ray radiation on the developing mouse cerebellum: Apoptotic cell death and induction of tissue transglutaminase p 2904 N94-27472

Effects of ML-9, a myosin light-chain kinase inhibitor, on preimplantation development of the mouse
p 2905 N94-27486

Activation by G protein beta gamma subunits of G protein-coupled receptor kinase p 2931 N94-27534

ENZYMES

Neutron and x ray scattering studies of the interactions between Ca(2+)-binding proteins and their regulatory targets: Comparisons of troponin C and calmodulin
[DE94-002706] p 2901 N94-26623

Protective action of platelet-activating factor antagonist, TCV-309, against ischemia reperfusion injury in isolated rabbit hearts p 2904 N94-27465

The intracellular second messenger system in c-fos gene induction by ACTH p 2904 N94-27477

Effect of sera from patients treated with long-term hemodialysis on mRNA's for collagenase, stromelysin, and tissue inhibitor of metalloprotease in cultured human synovial cells p 2920 N94-27481

Developmental expression of protein kinase C type 1 isozyme in suncus and rat cerebella
p 2905 N94-27484
Effects of ML-9, a myosin light-chain kinase inhibitor, on preimplantation development of the mouse
p 2905 N94-27486

ENZYMOLOGY
Neutron and x ray scattering studies of the interactions between Ca(2+)-binding proteins and their regulatory targets: Comparisons of troponin C and calmodulin
[DE94-002706] p 2901 N94-26623

EPIDEMIOLOGY
US Army aviation epidemiology data registry: Incidence and outcomes of aviator flying evaluation boards
[AD-A274711] p 2910 N94-26432
Monograph of the aviation epidemiology data register for calendar year 1988
[AD-A274589] p 2911 N94-26985
Monograph of the Aviation Epidemiology Data Register for CY 1992
[AD-A274400] p 2911 N94-27130

EPITAXY
Investigation of a normal incidence high-performance p-type strained layer In(0.3)Ga(0.7)As / In(0.52)Al(0.48) as quantum well infrared photodetector
[AD-A274854] p 3055 N94-26188
The epitaxial growth of Ge on Si(100) using Te as a surfactant
[DE94-003437] p 3056 N94-26326
Ordering and phase separation in MOCVD InGaP alloys and unicompositional quantum wells
[DE94-004693] p 3056 N94-26352
Growth, characterization and device development in monocrystalline diamond films
[AD-A274245] p 3060 N94-26839
Atomic layer epitaxy of group 4 materials: Surface processes, thin films, devices and their characterization
[AD-A274325] p 3061 N94-26885
The growth and characterization of GaN as a photodetector
[AD-A274570] p 3063 N94-26965
Interface properties of wide bandgap semiconductor structures
[AD-A274356] p 3063 N94-27058
Bulletin of Precision and Intelligence Laboratory, No. 68
[JTN-94-80609] p 3010 N94-27282
Electro-optic materials by solid source MOCVD
[DE94-005120] p 2757 N94-27716

EPOXY COMPOUNDS
Dual cure low-VOC coating process
[DE94-000365] p 2756 N94-27611

EPOXY MATRIX COMPOSITES
Testing composite-to-metal tubular lap joints
[DE94-003225] p 2836 N94-26032
Design study of fiber-composite penetrator cases
[DE94-003203] p 2707 N94-26099
Design and life-time of polymer matrix composite structures: Summary
[VTT-TIED-1415] p 2707 N94-26260

EPOXY RESINS
X ray absorption studies of Ti/polymer and Cr/polymer interfaces
[DE94-003008] p 2753 N94-26770
Fatigue resistance of unnotched and post impact(+/-30 deg/0 deg) 3-D braided composites
[NASA-CR-191590] p 2711 N94-27433
Corrosion resistant coatings from conducting polymers
[DE94-003959] p 2757 N94-27747

EQUALIZERS (CIRCUITS)
Equalization and cancellation of nonlinear intersymbol interference in a dispersive satellite communication channel
[ISBN-0-315-85147-3] p 2775 N94-27274

EQUATIONS OF MOTION
A comparison of three approximate mathematical models for the gravity gradient stabilized satellite
[AD-A273832] p 2694 N94-25615
Hill equations for satellite orbit determination
[ETN-94-95374] p 2690 N94-25787
The modal solution to the Moon's orbit using canonical Floquet perturbation theory
[AD-A273732] p 2690 N94-26001
Towards a theory of growing surfaces: Mapping two-dimensional Laplacian growth onto Hamiltonian dynamics and statistics
[DE94-002636] p 2991 N94-26079
Analytical solution of Mori's equation with secant hyperbolic memory
[DE94-601541] p 3006 N94-26368
The Hamiltonian structures of the super KP hierarchy associated with an even parity superlax operator
[DE94-601506] p 2994 N94-26459
Electronic structure of a single oxygen vacancy in rutile TiO2
[DE94-602717] p 3062 N94-26901
A superprocess with a disappearing self-interaction
[AD-A274647] p 3009 N94-27108
A parametric sensitivity study for single-stage-to-orbit hypersonic vehicles using trajectory optimization
[NASA-CR-195703] p 2697 N94-27789

EQUATIONS OF STATE
New equation of state for stainless steel 347
[DE94-004189] p 2732 N94-25974

EQUILIBRIUM EQUATIONS
Single-server queues with spatially distributed arrivals
[PB94-126638] p 2986 N94-26916

EQUIPMENT SPECIFICATIONS
Baseline for a Nordtest method. Reliability stress screening of components. A guide for component users
[PB94-123775] p 2835 N94-27042
Coherence and satisfiability of waveform timing specifications
[ISBN-0-315-57769-X] p 3009 N94-27268
An analysis of the loads applied to a heavy Space Station rack during translation and rotation tasks
[NASA-TM-104790] p 2697 N94-28183

EQUIVALENCE
Some aspects of nonlinear discrete-time descriptor systems in economics
[PB94-126653] p 3101 N94-26918
Process algebra of concurrent constraint programming
[PB94-126695] p 2966 N94-26919
Wieand's theorem
[PB94-126711] p 3004 N94-27223

EQUIVALENT CIRCUITS
Electromagnetic fields and interference
[PB94-126489] p 2771 N94-26877
Channel model for AC electric arc
[PB94-124591] p 2786 N94-27327

ERBIUM
Hypersensitive transition spectrum of f-element and coordination structure
[DE94-604133] p 3070 N94-27843
Fiber laser amplifiers and oscillators
[AD-A274231] p 2820 N94-28068

ERGOMETERS
The 1991-1992 project summaries
p 2943 N94-25698
Proprioceptive isokinetic exercise test
[NASA-TM-104015] p 2902 N94-27227

ERROR ANALYSIS
Knowledge organization in intelligent tutoring systems for diagnostic problem solving in complex dynamic domains
[AD-A273986] p 2984 N94-25899
Accuracy analysis of multi-axis machines
[ETN-94-95341] p 3002 N94-26000
Improved measurement accuracy in a Long Trace Profiler: Compensation for laser pointing instability
[DE94-003408] p 2816 N94-26130
Methods for improving low-angle, low-altitude radar tracking accuracy
[AD-A274914] p 2768 N94-26347
Software Error Estimation Program (SWEEP), version 02.00.00 user manual
[AD-A274697] p 2962 N94-26373
On the application of Allan variance method for Ring Laser Gyro performance characterization
[DE94-003880] p 2810 N94-26525
Local uniform grid refinement and systems of coupled partial differential equations
[CWI-NM-R9307] p 2995 N94-26773
The Communication Link and Error ANalysis (CLEAN) simulator
[NASA-CR-195243] p 2968 N94-27168
Advanced technology development multi-color holography
[NASA-CR-193931] p 2812 N94-27229
An unavailability model for errors made during surveillance testing
[DE94-000816] p 2835 N94-27613
Reanalysis of Mariner 9 UV Spectrometer Data for Ozone, Cloud, and Dust Abundances, and Their Interaction Over Climate Timescales
[NASA-CR-195244] p 3107 N94-27885

ERROR CORRECTING CODES
Improved performance of hybrid error control techniques for real-time digital communications over noisy channels
[ISBN-0-315-84281-4] p 2770 N94-26625

ERROR CORRECTING DEVICES
Method of correcting rotational motion error in SAR and ISAR imagery
[AD-D016033] p 2773 N94-27146

ERROR DETECTION CODES
Improved performance of hybrid error control techniques for real-time digital communications over noisy channels
[ISBN-0-315-84281-4] p 2770 N94-26625
Advanced End-to-end Simulation for On-board Processing (AESOP) p 2945 N94-28255

ERRORS
Detection geometry and reconstruction error in magnetic source imaging
[DE94-004012] p 2809 N94-25662
Improved measurement accuracy in a Long Trace Profiler: Compensation for laser pointing instability
[DE94-003408] p 2816 N94-26130
Coded communications with nonideal interleaving
[ITN-94-85235] p 2774 N94-27242
An unavailability model for errors made during surveillance testing
[DE94-000816] p 2835 N94-27613
BATSE burst location accuracy and constraints on the fraction of repeating GRB sources
[DE94-004981] p 3116 N94-27714
A comparative study of SAR data compression schemes p 2946 N94-28259

ESCAPE SYSTEMS
Assured crew return vehicle post landing configuration design and test p 2697 N94-25671

ESCHERICHIA
Vacuum-UV-effects on E. coli plasmid pUC19: Inactivation, strand break induction and mutation induction
[DLR-FB-93-26] p 2903 N94-27754

ESTERS
Langmuir-Blodgett film of amylose-esters and chiral azo-dyes (structure and second order nonlinear optical behaviour)
[ETN-94-95390] p 2747 N94-25749

ESTIMATING
Analytical method for estimation of the total amount of aromatic and poly aromatic compounds in diesel fuel
[PB94-123692] p 2759 N94-25907
Multiple model adaptive estimation applied to the LAMBDA URV for failure detection and identification
[AD-A274078] p 3002 N94-25992
Parameter estimation by genetic algorithms
[DE94-002924] p 2961 N94-26146
Isotonic estimation and rates of convergence in Wicksell's problem
[REPT-93-39] p 3002 N94-26213
Parameter estimation for ARMA models with infinite variance innovations
[AD-A274654] p 3003 N94-26355
Optimal nonlinear estimation for aircraft flight control in wind shear p 2643 N94-27296
Practical problems in aggregating expert opinions
[DE94-002623] p 3094 N94-27707
Estimators for the Cauchy distribution
[DE94-004990] p 3005 N94-27816
Parameter estimation of linear systems from frequency response measurements (computer program)
[ESDU-93016] p 2976 N94-28137

ESTUARIES
An experimental study of siphonal jets in a turbulent boundary layer crossflow p 2802 N94-28015

ETA-MESONS
Pseudoscalar glueball in the composite interpolating fields approach
[DE93-634374] p 3016 N94-26042
Meson X(1814) as a candidate for a hybrid state
[DE93-634447] p 3017 N94-26045
Study of the process (pi)(sup -)A(yields)(pi)(sup -)(eta)'(eta)A at the moment 36 GeV/c
[DE93-634530] p 3024 N94-27250
Pi plus pi minus gamma and K+ K- production in two photon collisions at ARGUS
[ISBN-0-315-63598-3] p 3027 N94-27684
Future directions in particle and nuclear physics at multi-GeV hadron beam facilities
[DE94-002946] p 3027 N94-27711
Proceedings of the workshop on (pi), K, (eta)-nucleon interactions
[DE94-701314] p 3027 N94-27733

ETCHING
Investigation of plasma etch induced damage in compound semiconductor devices
[DE94-002849] p 3052 N94-25989
Opportunities for High Aspect Ratio Micro-Electro-Magnetic-Mechanical Systems (HAR-MEMMS) at Lawrence Berkeley Laboratory
[DE94-003499] p 2827 N94-27722

ETHANE
Laser probes of natural gas ignition chemistry
[PB94-128345] p 2717 N94-27226
Viscosity of liquids: Halogenated ethanes
[ESDU-93012] p 2720 N94-28062

ETHERS
Reactivity of nitrate radical (NO3) toward organic compounds p 2704 N94-27387

ETHYL COMPOUNDS
Controlled synthesis of polyenes by catalytic methods
[DE94-004168] p 2749 N94-25973

ETHYLENE

The electrocatalytic oxidation of ethylene and methane, and reduction of oxygen on gas-diffusion electrodes made of amorphous nickel-valve metal-platinum group metal alloys p 2722 N94-28165

EUCLIDEAN GEOMETRY

Illumination in diverse codimensions [NASA-CR-191596] p 2971 N94-27572

EULER BUCKLING

The railway track response function [REPT-93-40] p 2837 N94-26214

EULER EQUATIONS OF MOTION

Comments regarding two upwind methods for solving two-dimensional external flows using unstructured grids [NASA-TM-109078] p 2644 N94-26154

High-lift system analysis method using unstructured meshes [NLR-TP-92351-U] p 2647 N94-27554

Agglomeration multigrid for the three-dimensional Euler equations [NASA-CR-191595] p 2999 N94-27557

Experimental and theoretical investigations of the influence of the jet on the flow around a bypass-engine [DLR-FB-93-17] p 2675 N94-27593

Prediction of undsteady flows in turbomachinery using the linearized Euler equations on deforming grids [NASA-CR-195285] p 2675 N94-27654

Numerical assessment of aerodynamic interactions on missiles with transverse jets control p 2659 N94-28031

Application of the MBTEC Euler code to the Challenger and the CF-18 complete aircraft configurations p 2653 N94-28324

Solution of the Euler equations using unstructured grids p 2656 N94-28338

Solution-adaptive simulation of transonic cascade flows p 2657 N94-28344

Multigrid solutions of the 2D Euler/Navier-Stokes equations on unstructured meshes p 2658 N94-28349

EULER-LAGRANGE EQUATION

On the Lagrangian and updated Lagrangian nonlinear finite element formulations [ISBN-0-315-61111-1] p 3001 N94-27948

EUROPE

A geological and geophysical information system for Eurasia [AD-A274818] p 3098 N94-26490

Lufthansa Yearbook 1992 [DSK-9734-H-92] p 2660 N94-28230

Air traffic of the European Community with European neighbors p 2661 N94-28233

A sky above Europe p 2661 N94-28234

The single European market: Economical advance, ecological problem? p 2661 N94-28235

Air traffic administration enroute to Europe p 2661 N94-28238

Lufthansa and Europe p 2663 N94-28247

EUROPEAN AIRBUS

A340 testing p 2662 N94-28242

EUROPEAN SPACE AGENCY

Science beyond the atmosphere: The history of space research in Europe [ESA-HSR-SPECIAL] p 2689 N94-28207

EUROPIUM

Molecular dynamics simulation and crystal-field theory: Predicting the optical spectra and structure of rare-earth doped inorganic glasses [ISBN-0-315-84679-8] p 3025 N94-27310

EUTECTIC ALLOYS

Eutectic transformation L in equilibrium to Zr6Fe23 + Fe(tau) in the Fe-Zr system [DE93-633766] p 2735 N94-26295

EUTECTICS

Liquid and solid solubility of Ag in Bi2Sr2CaCu2O8 [DE94-002829] p 2735 N94-26273

Design of a high-precision double crystal tunable monochromator [DE94-003004] p 2811 N94-26787

Research into the microstructure and mechanical behavior of eutectic Bi-Sn and In-Sn [DE94-004558] p 2741 N94-27619

EVALUATION

Mapping of seawater intrusion into the coastal aquifer of Israel (the seawater-freshwater interface) by TDEM (Time Domain Electromagnetic) method [ITN-94-85238] p 2850 N94-27331

Eye-head coordination and swinging of the visual scene when wearing visually up-down reversing mirror for 14 days p 2915 N94-27462

Comparative measurement of visual stability in cosmic space: Onboard experiment and pre-flight activities p 2916 N94-27463

EVAPORATION

Study on synthesis and characteristics of intermetallic compound with strong electron correlation p 2726 N94-25563

Over-the-horizon propagation measurements at six radar-frequency bands at the Atlantic Ocean Coast [AD-A274151] p 2773 N94-27136

Thermocapillary flow with evaporation and condensation and its effect on liquid retention in low-G fluid acquisition devices [NASA-TP-3463] p 2797 N94-27639

EVAPORATORS

Modelling the mass migration phenomena in partially frozen heat pipes [DE94-002716] p 2797 N94-27709

EVAPOTRANSPIRATION

R and D for creation, measurement, application of ultra-high vacuum p 2723 N94-25549

EXCAVATION

Effects of slot on rock surface for percussive rock excavation: Water jet assisted percussive rock excavation p 2871 N94-28155

EXCIMER LASERS

A study of vibrational relaxation of electronically-excited molecules [DE93-613553] p 3013 N94-25827

EXCIMERS

A study of vibrational relaxation of electronically-excited molecules [DE93-613553] p 3013 N94-25827

EXCITATION

Two dimensional self-consistent fluid simulation of RF inductive sources [DE94-003635] p 2767 N94-25937

Analysis/test correlation using VAWT-SDS on a step-relaxation test for the rotating Sandia 34 m test bed [DE94-002290] p 2857 N94-26700

Extraction of modal parameters from an operating HAWT using the Natural Excitation Technique (NExT) [DE94-001831] p 2859 N94-27004

Effect of PGE2 receptor agonists butaprost, M and B 28767 and an antagonist AH 6809 on the BK response of visceral polymodal receptors p 2906 N94-27494

Effects of perfusion of amiodarone on electrophysiological properties in single rabbit ventricular myocytes p 2906 N94-27503

Fast and slow onsets of Na channel blocking actions due to lidocaine and disopyramide using concentration-clamp method p 2907 N94-27504

Electrophysiological effects of MS-551, a new Class 3 antiarrhythmic agent, on isolated rabbit ventricular muscles p 2907 N94-27505

Comparative investigation of new Class 3 antiarrhythmic drugs, E-4031 and MS-551, on electrophysiological properties in isolated rabbit ventricular myocytes p 2907 N94-27506

Effects of Class 1 antiarrhythmic drugs on the intraventricular conduction: Influence of fiber orientation p 2907 N94-27507

Effects of Class 3 antiarrhythmic agents, E-4031 and MS-551 on ventricular repolarization in isolated rabbit hearts p 2907 N94-27508

A study on tissue excitation of cardiac muscle under electrical field stimulation p 2907 N94-27510

Block of cardiac sodium channels by Ro 22-9194 (R), a new antiarrhythmic agent: Effects on the maximum upstroke velocity (Vmax) of single guinea pig ventricular myocytes p 2907 N94-27511

Electrophysiological effects of an antiarrhythmic drug, moricizine on isolated guinea pig ventricular muscles p 2907 N94-27512

Correlation between electrical activity and the size of single sinoatrial node cells p 2907 N94-27513

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experimental study in rabbit single sinoatrial node cells p 2908 N94-27514

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experiments using small sinoatrial node tissue preparations isolated from rabbit hearts p 2908 N94-27515

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Postganglionic vagal stimulation in isolated rabbit hearts p 2908 N94-27516

Double excitation of He and H(-) by fast proton and anti-proton impact [DE94-004581] p 3026 N94-27620

Trace organic chemical detection using an ultraviolet excitation molecular beam fluorometer [DE94-002649] p 2704 N94-27708

Radiations from hot nuclei p 3030 N94-27915

EXCITONS

Biexciton formation by two-photon absorption in quantum wells [DE93-613551] p 3071 N94-25852

Instantaneous amplitude and frequency dynamics of coherent wave mixing in semiconductor quantum wells [DE94-003262] p 3054 N94-26128

Technical report of ISSP. Ser. A, no. 2672: Magneto-optical effects of excitons in BiI3 crystals under pulsed high magnetic fields. 3: Excitons confined around a stacking disorder formed by a bending stress [JTN-94-80558] p 3065 N94-27240

EXCRETION

Changes in circadian variations of urine excretion in tail-suspended rats p 2911 N94-27443

EXERCISE PHYSIOLOGY

The effect of platform motion on human energy expenditure during walking. An exploratory experiment [AD-A273760] p 2940 N94-25724

Plasma volume shifts and exercise thermoregulation with water immersion and six-degree head-down tilt [NASA-TM-108781] p 2901 N94-26093

Sympathetic nerve activity during dynamic leg exercise p 2929 N94-27527

Workshop on Countering Space Adaptation with Exercise: Current Issues [NASA-CP-3252] p 2934 N94-28361

Exercise detraining: Applicability to microgravity p 2934 N94-28364

Aerobic fitness and orthostatic tolerance: Evidence against an association p 2934 N94-28365

Does training-induced orthostatic hypotension result from reduced carotid baroreflex responsiveness? p 2935 N94-28366

EXHAUST EMISSION

UV absorption technique for monitoring mobile source NO emissions [AD-A273858] p 2713 N94-25964

Natural gas applications for hybrid vehicles. [PB94-117108] p 2759 N94-26753

Compilation of air pollutant emission factors. Volume 1: Stationary point and area sources. Supplement F [PB94-121431] p 2867 N94-26757

Feasibility study on introduction of transportation-use petroleum substitution energy [DE94-725205] p 2759 N94-26905

Optimising BMW four-cylinder two-valve engines [PB94-125101] p 2824 N94-27254

Pressure-gain combustion [DE94-002975] p 2719 N94-27712

Technical Report of National Research Institute of Fisheries Engineering: Fishing Boat and Instrument, No. 12 [JTN-94-80595] p 2764 N94-27976

The emission characteristics of a high speed diesel engine p 2764 N94-27980

Gas turbine combustion and emission control p 2831 N94-28082

EXHAUST GASES

Analysis and development of an F-5 pollution prevention management program with recommendations for creation of similar programs for other aircraft [AD-A274016] p 2865 N94-25755

UV absorption technique for monitoring mobile source NO emissions [AD-A273858] p 2713 N94-25964

Feasibility study on introduction of transportation-use petroleum substitution energy [DE94-725205] p 2759 N94-26905

Technical Report of National Research Institute of Fisheries Engineering: Fishing Boat and Instrument, No. 12 [JTN-94-80595] p 2764 N94-27976

The emission characteristics of a high speed diesel engine p 2764 N94-27980

Experiments into the scaling parameters required for exhaust gas ingestion testing of vertical landing aircraft p 2671 N94-28017

Influence of headwind on hot gas reingestion and consideration of pressure ratio scaling p 2675 N94-28018

Unsteady aspects of hot gas reingestion and statistical analysis p 2676 N94-28019

Fibrous ceramic candle filter for particle removal in pressurized fluidized bed combustion [PB94-133089] p 2876 N94-28383

EXHAUST NOZZLES

A study of jet effect and ground effect interference on a STOL fighter p 2671 N94-28034

EXHAUST SYSTEMS

Computational and Experimental Assessment of Jets in Cross Flow [AGARD-CP-534] p 2799 N94-28003

Advanced metallic exhaust impinged structural concepts demonstration p 2832 N94-28209

EXISTENCE THEOREMS

Spaces of algebraic cycles [PB94-124369] p 2996 N94-26993

Fixed point type theorems and projection-interaction approximation
[DE94-603669] p 3000 N94-27632

EXOBIOLOGY

Autonomous support for microorganism research in space p 2903 N94-25672

Aerospace medicine and biology: A continuing bibliography with indexes (supplement 386)
[NASA-SP-7011(386)] p 2933 N94-28208

Aerospace medicine and biology: A continuing bibliography with indexes (supplement 387)
[NASA-SP-7011(387)] p 2933 N94-28213

Aerospace medicine and biology: A cumulative index to a continuing bibliography (supplement 384)
[NASA-SP-7011(384)] p 2934 N94-28219

Workshop on Countering Space Adaptation with Exercise: Current Issues
[NASA-CP-3252] p 2934 N94-28361

Muscular activity and its relationship to biomechanics and human performance p 2934 N94-28362

EXOTHERMIC REACTIONS

Technique to predict the curing behaviour of unsaturated polyester materials
[PB94-124856] p 2748 N94-25892

Modelling the inhibition cure behaviour of unsaturated polyester moulding materials
[PB94-124864] p 2748 N94-25893

On the thermal ignition with variable pre-exponential factor
[DE93-616009] p 2713 N94-25913

EXPEDITIONS

Telepresence in the human exploration of Mars: Field studies in analog environments p 2685 N94-27360

EXPENDABLE STAGES (SPACECRAFT)

Access to space study
[NASA-TM-109693] p 2685 N94-27151

EXPERIMENT DESIGN

Development of fusion technology
[DE93-633444] p 3042 N94-26159

An approach to studying the reliability of microgravity experiments
[NASA-TM-106489] p 2834 N94-26199

Response surface design comparisons
[AD-A274690] p 2838 N94-26448

Tokamak Physics Experiment poloidal field design
[DE94-001542] p 3045 N94-27019

EXPERT SYSTEMS

Knowledge base systems for chemical compounds designing support p 2723 N94-25550

Automation of closed environments in space for human comfort and safety p 2943 N94-25684

Developing realistic cooperative behaviors for autonomous agents in air combat simulation
[AD-A274077] p 2937 N94-25774

Emerging technologies
[DE94-003022] p 3102 N94-26023

Hypermedia support for engineering design systems: Application to fatigue analysis
[VTT-TIED-1432] p 2837 N94-26255

Design of a computer expert system for adhesive selection using artificial intelligence techniques
[AD-A274715] p 2751 N94-26434

A rough set approach to speech recognition
[ISBN-0-315-83894-9] p 2769 N94-26619

Institute for Information Technology
[NRC-37061] p 3118 N94-26709

An artificial reality environment for remote factory control and monitoring p 2687 N94-27369

Multi-sensor data fusion in a distributed environment: Architectural solutions
[NLR-TP-92243-U] p 2989 N94-27800

A hybrid formalism for representation and interpretation of image knowledge
[INPE-5485-PRE/1784] p 2989 N94-27833

Thunderstorm Hypothesis Reasoner
[NASA-CR-195714] p 2897 N94-27884

EXPLOSIONS

Safety standards for aircraft shelter
[FFI-92/4003] p 2680 N94-26305

EXPLOSIVES

Emerging technologies
[DE94-003022] p 3102 N94-26023

Computational studies of energetic organic molecules
[AD-A274726] p 3018 N94-26172

A materials compatibility study in FM-1, a liquid component of a paste extrudable explosive
[DE94-001166] p 2759 N94-26198

Propellants and explosives in ballistic missiles
[UCRL-LR-113578] p 2760 N94-28222

EXPONENTIAL FUNCTIONS

Conditionally exponential convex functions on locally compact groups
[DE93-613025] p 2990 N94-25865

EXPONENTS

Lyapunov exponents for some quasi-periodic cocycles
[PB94-124377] p 2997 N94-26994

EXPOSURE

A materials compatibility study in FM-1, a liquid component of a paste extrudable explosive
[DE94-001166] p 2759 N94-26198

EXTERNAL STORES

Application of the influence function method using the interference distributed loads code to prediction of store aerodynamic load during separation from the CF-18 fighter aircraft p 2654 N94-28330

EXTERNAL TANKS

Structural analysis of a frangible nut used on the NASA Space Shuttle
[DE94-003672] p 2821 N94-25811

Advanced silver zinc battery development for the SRB and ET range safety subsystems p 2865 N94-28136

EXTINCTION

Analytic approximation to randomly oriented spheroid extinction
[DREV-4712-93] p 3038 N94-27598

Impacts, extinctions, volcanism, glaciations, and tectonics: Matches and mismatches
p 2888 N94-28298

The end-Permian mass extinction: A complex, multicausal extinction p 2888 N94-28299

Science observed: The mass-extinction debates
p 2888 N94-28300

Mass extinctions: Persistent problems and new directions p 2889 N94-28302

An evaluation of criteria that may be used to identify species surviving a mass extinction
p 2889 N94-28304

Proposed law of nature linking impacts, plume volcanism, and Milankovitch cycles to terrestrial vertebrate mass extinctions via greenhouse-embryo death coupling
p 2876 N94-28307

A general theory of impacts and mass extinctions, and the consequences of large-body impact on the Earth
p 2891 N94-28310

Were all extinction events caused by impacts?
p 2891 N94-28311

Ozone control of biological activity during Earth's history, including the KT catastrophe p 2876 N94-28312

Supernovae and mass extinctions
p 2891 N94-28314

EXTRACTION

Emerging technologies
[DE94-003022] p 3102 N94-26023

EXTRAPOLATION

Advanced qualification techniques
[DE94-003709] p 2780 N94-25812

EXTRATERRESTRIAL LIFE

The Fermi paradox: An approach based on percolation theory p 2687 N94-27370

EXTRATERRESTRIAL RADIATION

Space radiation health research, 1991-1992
[NASA-TM-109721] p 2932 N94-27556

Radiations from hot nuclei p 3030 N94-27915

Develop and fabricate a radiation dose measurement system for satellites
[PL-TR-93-2161] p 2698 N94-28210

Develop and fabricate a radiation dose measurement system for satellites
[PL-TR-93-2099] p 2698 N94-28217

EXTRATERRESTRIAL RESOURCES

A widely adaptable habitat construction system utilizing space resources p 2688 N94-27374

EXTRAVEHICULAR ACTIVITY

Extra-Vehicular Activity (EVA) glove evaluation test protocol
[NASA-TM-108442] p 2943 N94-27952

EXTRAVEHICULAR MOBILITY UNITS

Enabler operator station p 2943 N94-25679

EXTREME ULTRAVIOLET RADIATION

Analysis of EUV/FUV dayglow and auroral measurements
[NASA-CR-195237] p 2883 N94-27393

EXTREMELY HIGH FREQUENCIES

NASA satellite communications application research, phase 2 addendum. Efficient high power, solid state amplifier for EHF communications
[NASA-CR-195712] p 2777 N94-27946

EXTREMELY LOW FREQUENCIES

JARE data reports. No. 186: Upper atmosphere physics data. Syowa and Asuka Stations, 1990
[JTN-94-80594] p 2881 N94-27299

Memories of National Institute of Polar Research. Series A-19. Upper atmosphere physics: ELF emission in high latitudes: Ray path calculation and ground-satellite observations
[JTN-94-80592] p 2882 N94-27342

EXTREMELY LOW RADIO FREQUENCIES

Excitation of Earth-ionosphere waveguide in the ELF and lower VLF bands by modulated ionospheric current
[AD-A274969] p 2878 N94-26304

EXTRUDING

Dissolution of secondary phases during extrusion
[PB94-124583] p 2732 N94-25908

Synthesis, rheology, and forming of Y-Ba-Cu-O ceramics
[DE94-005558] p 2757 N94-27695

EYE (ANATOMY)

Microtubules for nonlinear optical limiting
[AD-A273940] p 3035 N94-25941

EYE MOVEMENTS

Effects of imaginary target on induced eye movements by linear acceleration p 2914 N94-27456

Eye-head coordination and swinging of the visual scene when wearing visually up-down reversing mirror for 14 days p 2915 N94-27462

Impaired associated movement in Parkinson's disease: An evaluation of Bell's phenomenon
p 2928 N94-27520

EYE PROTECTION

Microtubules for nonlinear optical limiting
[AD-A273940] p 3035 N94-25941

F

F REGION

Ionospheric modification by high power, obliquely propagated HF radio wave transmissions. Part 1: Experimental
[AD-A273746] p 2878 N94-26224

F-106 AIRCRAFT

Leading-edge vortex-system details obtained on F-106B aircraft using a rotating vapor screen and surface techniques
[NASA-TP-3374-VIDEO-SUPPL] p 2647 N94-27161

F-15 AIRCRAFT

Design and flight test of the Propulsion Controlled Aircraft (PCA) flight control system on the NASA F-15 test aircraft
[NASA-CR-186028] p 2674 N94-27432

F-16 AIRCRAFT

Design of a subsonic envelope flight control system for the Vista F-16 using quantitative feedback theory
[AD-A274057] p 2676 N94-25771

F-18 AIRCRAFT

An investigation into the aerodynamic effects of wing patches
[ISBN-0-315-84121-4] p 2646 N94-26672

Report of the defense science board task force on aircraft assessment
[AD-A274531] p 2669 N94-26835

Controlled oscillation of forebody vortices by nozzle jet blowing
[ISBN-0-315-84134-6] p 2678 N94-27648

Measurements of steady and dynamic pressure on an F/A-18 wind tunnel model at high angles of attack
p 2653 N94-28323

Application of the influence function method using the interference distributed loads code to prediction of store aerodynamic load during separation from the CF-18 fighter aircraft p 2654 N94-28330

Preliminary assessment of aerodynamic effects of wing repair patches p 2657 N94-28346

F-22 AIRCRAFT

Report of the defense science board task force on aircraft assessment
[AD-A274531] p 2669 N94-26835

F-5 AIRCRAFT

Analysis and development of an F-5 pollution prevention management program with recommendations for creation of similar programs for other aircraft
[AD-A274016] p 2865 N94-25755

FABRICATION

Lithium drifted silicon detector fabrication on gettered floating-zone silicon
[DE94-003890] p 3054 N94-26095

A study on the development of high T(sub c) superconducting materials
[DE93-633529] p 3057 N94-26404

Demonstration of monolithic co-fabrication of Y1Ba2Cu3O7-Sigma and CMOS devices on the same sapphire substrate
[AD-A274757] p 3059 N94-26566

Processing and properties of Ag-clad Bi-2223 tapes
[DE94-004603] p 2783 N94-26589

Simplified high-efficiency silicon cell processing
[DE94-002683] p 2857 N94-26617

Diagnostics and microelectronics
[DE94-003016] p 2784 N94-26777

Fabrication technology
[DE94-003017] p 2763 N94-26778

MSOFC development status
[DE94-003192] p 2858 N94-26792

Calculation of the electromagnetic critical state response of high T(sub c) superconductor tape
[DE94-002894] p 3061 N94-26868

Processing, fabrication, and demonstration of HTS integrated microwave circuits, appendix A
[AD-A274600] p 2785 N94-26890
Powder synthesis, fabrication, and transport properties of long-length Ag clad Bi-2223 conductors
[DE94-002376] p 2740 N94-26957
An optoelectronic graphics display processor
[AD-A274401] p 3037 N94-26990
Ferroelectric fluoride memory FET development
[AD-A274341] p 2785 N94-27057
Fullerene fabrication using an arc furnace. Characterization of the product
[DE94-603006] p 3029 N94-27834
High rate lithium/thionyl chloride bipolar battery development p 2864 N94-28133
Dry etching process development for submicron and nanometer semiconductor devices
[PB94-133196] p 2788 N94-28357

FABRICS
Design for producing fiberglass fabric in a lunar environment p 2765 N94-25676
A constitutive model for layered wire mesh and aramid cloth fabric
[DE94-003275] p 2708 N94-26796
Automated fabric inspection system
[AD-A274522] p 2835 N94-26833

FACE (ANATOMY)
Orientation competition in cortical filters
[PB94-125366] p 2939 N94-27001

FACE CENTERED CUBIC LATTICES
Formation and crystallization of hydrogen-induced amorphous Ti3InH(4.5) alloy p 2745 N94-28163

FACTOR ANALYSIS
A test of the theory of reasoned action at the group level of analysis
[AD-A273965] p 2937 N94-25897

FACTORIAL DESIGN
Space transportation vehicle design evaluation using saturated designs p 2693 N94-27928

FAILURE
Characteristics and control response of the TOPAZ 2 reactor system real-time dynamic simulator
[DE94-003788] p 2699 N94-25600
Failure mechanisms of high temperature semiconductor lasers
[AD-A273833] p 2815 N94-25616
Multiple model adaptive estimation applied to the LAMBDA URV for failure detection and identification
[AD-A274078] p 3002 N94-25992
Failure behaviour of high density polyethylene with an embrittled surface layer due to weathering
[PB94-126406] p 2840 N94-26960
Modelling the mass migration phenomena in partially frozen heat pipes
[DE94-002716] p 2797 N94-27709

FAILURE ANALYSIS
Computer modelling of cyclic deformation of high-temperature materials
[AD-A273852] p 2704 N94-25608
Project Ares 3 p 2671 N94-25712
Aircraft turbine engine reliability and inspection investigations
[AD-A274860] p 2673 N94-26176
Automated information management for designers: Functional requirements for computer based associates that support access and use of technical information in design
[AD-A274603] p 3099 N94-26891
Baseline for a Nordtest method. Reliability stress screening of components. A guide for component users
[PB94-123775] p 2835 N94-27042
Development of a performance evaluation tool (MMSOFE) for detection of failures with Multiple Model Adaptive Estimation (MMAE)
[AD-A274218] p 2665 N94-27071
Simulating fail-stop in asynchronous distributed systems
[NASA-CR-195698] p 2974 N94-27767
Mechanically fastened composite laminates subjected to combined bearing-bypass and shear loading
p 2712 N94-27914
Orbital management and design considerations for NiCd satellite power systems p 2862 N94-28118

FAILURE MODES
Baseline for a Nordtest method. Reliability stress screening of components. A guide for component users
[PB94-123775] p 2835 N94-27042
Investigation of the bond strength of a discrete skin-stiffener interface
[NLR-TP-92183-U] p 2670 N94-27796

FAIRINGS
Experimental investigation of advanced hub and pylon fairing configurations to reduce helicopter drag
[NASA-TM-4540] p 2668 N94-26604
Experimental and theoretical studies of T-tail configurations for commuter aircraft applications
p 2653 N94-28322

FALSE ALARMS
Combatting inherent vulnerabilities of CFAR algorithms and a new robust CFAR design
[AD-A274918] p 2770 N94-26751

FAR FIELDS
Characterization of an LCD for use as a programmable phase shifter to produce a single-lobed far-field pattern in a phased array
[AD-A273883] p 3034 N94-25729

FAR INFRARED RADIATION
Weak bump quasars
[NASA-CR-195267] p 3103 N94-27933

FAR ULTRAVIOLET RADIATION
Technical report of ISSP. Ser. A, no. 2688: Suppression of higher-order modes in an RF cavity by resistive material
[JTN-94-80574] p 2787 N94-27606
Discrete vacuum ultra violet reflective interference filter
[AD-D016059] p 2756 N94-27675
Vacuum-UV-effects on E. coli plasmid pUC19: Inactivation, strand break induction and mutation induction
[DLR-FB-93-26] p 2903 N94-27754

FARADAY EFFECT
Fiber optic Faraday flux transformer specification
[AD-D016058] p 3039 N94-27674

FAST FOURIER TRANSFORMATIONS
A real-time convolution algorithm and architecture with applications in SAR processing
[AD-A273817] p 2959 N94-25963
An ultrasonic testing technique for monitoring the cure and mechanical properties of polymeric materials
[AD-A274536] p 2753 N94-26842
A fast Fourier transform radix-2 complex butterfly with built-in self-test
[ISBN-0-315-84139-7] p 2982 N94-27649

FAST NEUTRONS
Nonswelling behavior of HT9 alloy irradiated to high exposure
[DE94-003502] p 2736 N94-26522

FASTENERS
Structural analysis of a frangible nut used on the NASA Space Shuttle
[DE94-003672] p 2821 N94-25811
Mechanically fastened composite laminates subjected to combined bearing-bypass and shear loading
p 2712 N94-27914

FATIGUE (MATERIALS)
Bulletin of National Research Institute for Metals in Fiscal Year 1993, no. 14
[REPT-14] p 2722 N94-25544
Study on the mechanism of titanium alloy toughness and the improvement of properties
p 2726 N94-25566
Study on improvements in fretting fatigue characteristics of high strength structural member p 2726 N94-25567
Growth of small fatigue cracks in Incoloy-908
[DE94-003406] p 2836 N94-26129
Damage tolerance assessment handbook. Volume 1: Introduction fracture mechanics fatigue crack propagation
[AD-A274777] p 2836 N94-26186
Guidelines for controlling stress corrosion cracking and corrosion fatigue of stainless steels: A literature review
[VTT-TIED-1420] p 2837 N94-26262
Experimental determination of the CU-IN-PB ternary phase diagram
[DE94-003765] p 2735 N94-26349
Damage tolerance assessment handbook. Volume 2: Aircraft damage tolerance evaluation
[AD-A274778] p 2837 N94-26357
Effects of plastic media blasting on aircraft skin
[AD-A274817] p 2668 N94-26488
Mechanism of mechanical fatigue of silica glass
[DE94-003165] p 2753 N94-26783
Titanium 1992: Science and Technology, volume 1
[AD-A274798-VOL-1] p 2739 N94-26799
Development of fibre-metal laminates, ARALL and GLARE, new fatigue resistant materials
[PB94-126471] p 2669 N94-26969
Fatigue resistance of unnotched and post impact(+/-30 deg/0 deg) 3-D braided composites
[NASA-CR-191590] p 2711 N94-27433
Weldability aspects in the design and fabrication of aluminium structures subjected to fatigue loads. Part 2: Weldability of aluminium alloys using advanced MIG and TIG techniques. Effect of the weld bead geometrical factors on the fatigue behavior of the welded joint
[PB94-132446] p 2833 N94-28375

FATIGUE LIFE
Study on evaluation of crack generation and crack growth behaviors under static loading at high temperature and under combined loading p 2730 N94-25583
Design and life-time of polymer matrix composite structures: Summary
[VTT-TIED-1415] p 2707 N94-26260
Ceramic technology project
[DE94-003782] p 2750 N94-26332
Effects of plastic media blasting on aircraft skin
[AD-A274817] p 2668 N94-26488
Fatigue resistance under tension-compression of laminates IM6/5245C and AS4/3501-6
[IAR-CR-25] p 2708 N94-26711
Development of fibre-metal laminates, ARALL and GLARE, new fatigue resistant materials
[PB94-126471] p 2669 N94-26969
Computer modelling of cyclic deformation of high-temperature materials
[AD-A274504] p 2840 N94-27034
Modification of a model for fatigue life predictions based on level-crossing
[PB94-123395] p 2842 N94-27198
Methods of testing for endurance of structural elements using simulated acoustic loading
[ESDU-93027] p 3011 N94-28141

FATIGUE TESTING MACHINES
Development of an automatic fatigue-data acquisition system using commercial software
[NAL-TM-650] p 2842 N94-27207

FATIGUE TESTS
Study on variation of damage generation mechanism by fatigue on TiAl compounds due to different slip systems p 2729 N94-25579
Characterization of fatigue damage in a metal matrix composite (SCS-6/Ti-15-3) at elevated temperature
[AD-A273797] p 2706 N94-25876
The identification of inflow fluid dynamics parameters that can be used to scale fatigue loading spectra of wind turbine structural components
[DE94-000231] p 2791 N94-26117
Guidelines for controlling stress corrosion cracking and corrosion fatigue of stainless steels: A literature review
[VTT-TIED-1420] p 2837 N94-26262
Stress analysis of a secondary-bending specimen
[AD-A274842] p 2838 N94-26501
Crack closure, a literature study
[PB94-123361] p 2842 N94-27197
Modification of a model for fatigue life predictions based on level-crossing
[PB94-123395] p 2842 N94-27198
Methods of testing for endurance of structural elements using simulated acoustic loading
[ESDU-93027] p 3011 N94-28141

FAULT DETECTION
An algorithm for determination of bearing health through automated vibration monitoring
[AD-A274591] p 2823 N94-26986
Development of a performance evaluation tool (MMSOFE) for detection of failures with Multiple Model Adaptive Estimation (MMAE)
[AD-A274218] p 2665 N94-27071
Automatic, real-time fault monitor verifying network in a microwave landing system
[CA-PATENT-1325261] p 2665 N94-27275
Fault detection and isolation p 2642 N94-27289

FAULT TOLERANCE
Modeling and experimental verification of single event upsets p 2684 N94-26287
Simulation modeling for long duration spacecraft control systems p 2684 N94-26288
Fast incremental compiler transformations for multiple instruction retry
[NASA-CR-195209] p 2964 N94-26680
Fault tolerant real-time processing system for space use p 2949 N94-26720
Fault-tolerant scheduling in distributed critical real-time systems p 2952 N94-26735
Hard real-time reliable multicast in the DEDOS system
[PB94-126745] p 2966 N94-26920
Trace-based compositional proof theory for fault tolerant distributed systems
[PB94-126737] p 2966 N94-26971
An algorithm for determination of bearing health through automated vibration monitoring
[AD-A274591] p 2823 N94-26986
Design and evaluation of fault tolerance in opto-electronic computing
[AD-A274281] p 2954 N94-27016
Refinement for fault-tolerance: An aircraft hand-off protocol
[NASA-CR-195697] p 2666 N94-27768
An overview on development of neural network technology p 2990 N94-27913

Comparative analysis of different configurations of PLC-based safety systems from reliability point of view
p 2836 N94-27925

FAULT TREES

Simulation modeling for long duration spacecraft control systems p 2684 N94-26288

FEASIBILITY

Project Columbiad: Reestablishment of human presence on the Moon p 2689 N94-25687

Short-range cloud amount forecasting with model output statistics
[AD-A274769] p 2895 N94-26798

FEASIBILITY ANALYSIS

Feasibility study on introduction of transportation-use petroleum substitution energy
[DE94-725205] p 2759 N94-26905

FEDERAL BUDGETS

NASA: Major challenges for management. Testimony before the Legislation and National Security Subcommittee, Committee on Government Operations, House of Representatives
[GAO/T-NSIAD-94-18] p 3095 N94-28176

Selected data on Federal support to universities and colleges: FY 1991
[NSF-93-320] p 3101 N94-28201

FEEDBACK

Four phase microwave pulse generator for pulsed EPR spectrometer p 2718 N94-27388

High repetition rate, mode locked, figure eight laser with extracavity feedback
[AD-D016053] p 2820 N94-27670

FEEDBACK CONTROL

The application of a C(star) flight control law to large civil transport aircraft
[CRANFIELD-AERO-9303] p 2676 N94-25640

Bioregenerative system components for microgravity
p 2903 N94-25673

Design of a subsonic envelope flight control system for the Vista F-16 using quantitative feedback theory
[AD-A274057] p 2676 N94-25771

Design of a flight controller for an unmanned research vehicle with control surface failures using quantitative feedback theory
[AD-A274049] p 2677 N94-25833

Evaluation of moderate angle of attack roll of a dual engine, thrust vectoring aircraft using quantitative feedback theory
[AD-A274118] p 2667 N94-25905

Multiple model adaptive estimation applied to the LAMBDA URV for failure detection and identification
[AD-A274078] p 3002 N94-25992

Modelling and stability of a shape memory alloy position control system
[ISBN-0-315-84467-1] p 2740 N94-27304

Fiber optic Faraday flux transformer specification
[AD-D016058] p 3039 N94-27674

Comparison of dynamic analysis of a Schilling hydraulic manipulator with experimental results
[DE94-004597] p 2827 N94-27780

Pulse control method and its characteristics
[DE94-701187] p 2989 N94-27809

Topics in the design, analysis and implementation of feedback control systems
[ISBN-0-315-84934-7] p 2989 N94-27975

On the use of feedback to control sound radiation from a plate excited by a turbulent boundary layer
[ISVR-TR-227] p 2807 N94-28175

Optical pattern recognition system utilizing resonator array
[AD-D016071] p 3040 N94-28224

FEEDERS

An automatic 14-day paste diet feeder for animals
[NASA-TM-108804] p 2901 N94-26086

FEMALES

Female combat helicopter pilot selection criteria
[AD-A273935] p 2938 N94-26749

FERMI LIQUIDS

Crossover between BCS and performed-Boson theories with increasing interactions
[DE93-019018] p 3017 N94-26078

Fermi-liquid to non-Fermi-liquid transition in a dynamical generalization of the CPA in a disordered Hubbard model
[DE94-601875] p 2714 N94-26169

Technical report of ISSP. Ser. A, no. 2683: Itinerant character of 5f electrons in UNi2Ga
[JTN-94-80569] p 3025 N94-27337

FERMI SURFACES

Window least squares method applied to statistical noise smoothing of positron annihilation data
[DE93-634665] p 3003 N94-26385

Fermi surface ridge at second and third Umklapp positron annihilations in Y Ba2Cu3O(7-delta)
[DE93-634760] p 3070 N94-27995

FERMIONS

Back-reaction beyond the mean field approximation
[DE94-003936] p 3012 N94-25612

Fermionic field theory and gauge interactions on random lattices
[DE94-601565] p 3051 N94-25885

Aspects of nonrenormalizable terms in a superstring standard-like models
[DE93-614530] p 3071 N94-25911

Crossover between BCS and performed-Boson theories with increasing interactions
[DE93-019018] p 3017 N94-26078

Dynamic breaking of U(N) and appearance of Chern-Simons term in 4-fermion theories
[DE93-634342] p 3019 N94-26455

Strongly interacting fermion systems
[DE94-002674] p 3021 N94-26677

Finite density effects in gauge theories
[ISBN-0-315-50637-7] p 3074 N94-27403

Surface modes and chiral symmetry (Wilson fermions in a box)
[DE94-004946] p 3029 N94-27814

Solution of the Heisenberg equation for the four-fermion contact interaction by the method of dynamical mappings
[DE94-606341] p 3075 N94-27858

FERRITES

Ferrite phase shifters using stress insensitive materials
[AD-A274639] p 2708 N94-26895

FERROELECTRICITY

Crystallization and microstructural control of ferroelectric thin-films and glass-ceramics
[AD-A273767] p 2748 N94-25854

Ferroelectric thin film microstructure development and related property enhancement
[DE94-002741] p 3061 N94-26856

Ferroelectricity in a Langmuir-Blodgett multilayer film of a liquid crystalline side-chain polymer
[AD-A274477] p 2754 N94-27033

Ferroelectric fluoride memory FET development
[AD-A274341] p 2785 N94-27057

Electro-optic materials by solid source MOCVD
[DE94-005120] p 2757 N94-27716

FERROFLUIDS

Using ferro-magnetic fluids to lubricate non-conformal isothermal contacts
[INPE-5520-TAE/021] p 2827 N94-27665

FERROMAGNETIC MATERIALS

Study on characteristics and electronic structures of materials with strong electronic correlations by ferromagnetic fields p 2724 N94-25557

Power laws, flicker noise, and the barkhausen effect
[AD-A274702] p 3008 N94-26376

FERROMAGNETISM

Study on phase transformation due to deformation in ferromagnetic fields at cryogenic condition
p 2724 N94-25556

Volume dependence of vanadium magnetism
[DE94-601838] p 3050 N94-25843

Non-contact ultrasonic inspection
[VTT-TIED-1454] p 2835 N94-26257

Center for nonlinear phenomena and magnetic materials
[AD-A274176] p 3009 N94-27126

FERROUS METALS

List of papers published by the members of Institute for Materials Research, Tohoku University 1992
[JTN-94-80608] p 3118 N94-27355

FETUSES

Anorectal malformations induced by intraperitoneal injection of all-trans retinoic acid in suncus
p 2905 N94-27489

Cross-sectional anatomy of day 30 suncus fetuses
p 2905 N94-27490

Skeletal development and ossification of the swine fetuses p 2905 N94-27491

FEYNMAN DIAGRAMS

Pseudoscalar glueball in the composite interpolating fields approach
[DE93-634374] p 3016 N94-26042

Meson X(1814) as a candidate for a hybrid state
[DE93-634447] p 3017 N94-26045

Stochastic space-time, confinement potential and particle propagator
[DE94-606415] p 3074 N94-27680

FIBER COMPOSITES

Inner fiber observation for metal matrix composites under the stress load condition utilizing Synchrotron Orbital Radiation (SR) by X-ray CT p 2724 N94-25553

Continuous fiber reinforced thermoplastic composites: Literature survey
[VTT-TIED-1422] p 2704 N94-25651

Lunar preform manufacturing p 2765 N94-25677

A nonlinear three-dimensional micromechanics model for fiber-reinforced laminated composites
[AD-A273772] p 2705 N94-25857

Influence of embedded optical fibers on compressive strength of advanced composites
[AD-A273775] p 2705 N94-25859

Design study of fiber-composite penetrator cases
[DE94-003203] p 2707 N94-26099

A constitutive model for layered wire mesh and aramid cloth fabric
[DE94-003275] p 2708 N94-26796

Design and test of postbuckled stiffened curved plates: A literature survey
[PB94-126521] p 2840 N94-26961

Intelligent material systems and structures. Part 6: Measurements of adhesion between optical fibres and composite materials
[PB94-123577] p 2756 N94-27215

Thermoplastic or thermosetting composites in aircrafts
[PB94-123809] p 2710 N94-27253

A widely adaptable habitat construction system utilizing space resources p 2688 N94-27374

The deformation of copper-tungsten composites
[ISBN-0-315-84939-8] p 2712 N94-27688

Joining of fibre reinforced metal matrix composite materials
[PB94-132453] p 2712 N94-28376

FIBER OPTICS

An electromagnetic calorimeter with wavelength shifting fiber readout
[DE93-616664] p 2809 N94-25735

Development of a multi-sensor in situ fiber optic fluorometer
[DE94-003399] p 3035 N94-26100

Code division multiple access local area network communications employing fiber optic signal processing techniques
[AD-A274897] p 3096 N94-26180

Multichip module high speed testing
[AD-A274873] p 2782 N94-26343

Cad of GeO2-SiO2 double-layer core dispersion-shifted single-mode fibre
[DE93-634325] p 3035 N94-26383

Modeling and simulation of a fiber distributed data interface local area network
[AD-A274838] p 3098 N94-26500

Fiber-optic-based laser vapor screen flow visualization system for aerodynamic research in larger scale subsonic and transonic wind tunnels
[NASA-TM-4514] p 2647 N94-26706

A space fiber-optic x ray burst detector
[DE94-002722] p 2696 N94-26808

Detection of low-intensity magnetic fields with a magnetostrictive fiber optic sensor
[AD-A274120] p 3037 N94-27062

Method of measuring liquid level
[AD-D016049] p 3038 N94-27153

Evanescent field infrared spectroscopy using chalcogenide glass fiber
[ITN-94-85233] p 3038 N94-27178

Ir-fibers in a laser threat warning system and robot shot warning system
[PB94-124476] p 3038 N94-27209

Kinoform/lens system for injecting a high power laser beam into an optical fiber
[DE94-003226] p 2819 N94-27262

Fiber optic Faraday flux transformer specification
[AD-D016058] p 3039 N94-27674

Fiber optic true time-delay array antenna feed system
[AD-D016063] p 2777 N94-27734

Multiple exposure CCD detector for high-speed laser pump, x ray probe Laue scattering
[DE94-004618] p 2820 N94-27781

Fiber optic sensors for corrosion detection
p 3040 N94-27923

Optical pattern recognition system utilizing resonator array
[AD-D016071] p 3040 N94-28224

FIBER ORIENTATION

Characterization of fatigue damage in a metal matrix composite (SCS-6/Ti-15-3) at elevated temperature
[AD-A273797] p 2706 N94-25876

Effects of Class 1 antiarrhythmic drugs on the intraventricular conduction: Influence of fiber orientation
p 2907 N94-27507

FIBER STRENGTH

Inert strength of pristine silica glass fibers
[DE94-004685] p 2750 N94-26247

Engineering limitations of ceramic composites for high performance and high temperature applications
[DE94-001676] p 2754 N94-27021

FIBROBLASTS

Thyroid hormone action in cultured human skin fibroblasts: Evaluation using spheroid culture
p 2919 N94-27478

FIELD ALIGNED CURRENTS
Configuration of the near-Earth plasma sheet [NASA-CR-195271] p 2883 N94-27438
Modeling of the coupled magnetospheric and neutral wind dynamos [NASA-CR-195273] p 2883 N94-27852
FIELD COILS
Development of fusion technology [DE93-633444] p 3042 N94-26159
Tokamak Physics Experiment poloidal field design [DE94-001542] p 3045 N94-27019
Experimental results of 40-kA Nb3Al conductor [DE94-701207] p 2788 N94-27821
FIELD EFFECT TRANSISTORS
Modeling electromagnetic effects in MMICs for T/R modules [AD-A273808] p 2766 N94-25736
Ferroelectric fluoride memory FET development [AD-A274341] p 2785 N94-27057
AC to DC power converter with regulated bi-polar outputs [AD-D016032] p 2786 N94-27145
Thermally stable oxygen and nitrogen implant isolation of C-doped Al(0.35)Ga(0.65)As [DE94-004799] p 3069 N94-27790
Silicon device performance measurements to support temperature range enhancement [NASA-CR-195265] p 2844 N94-27824
FIELD EMISSION
A direct current rectification scheme for microwave space power conversion using traveling wave electron acceleration p 2687 N94-27371
FIELD OF VIEW
Elastic backscattering lidar for a MSTI satellite [DE94-002701] p 2816 N94-26126
Digital filter design for sensor simulation: Application to the Brazilian remote sensing satellite [INPE-5523-RPQ/665] p 2849 N94-26827
DMSP satellites as gamma ray burst detectors [DE94-004977] p 3116 N94-27793
Optical pattern recognition system utilizing resonator array [AD-D016071] p 3040 N94-28224
FIELD THEORY (ALGEBRA)
On kinetic expansion in scalar field theory [DE93-634338] p 3072 N94-26553
Limit theorems for functionals of Markov processes and renormalizable stable fields [AD-A274645] p 3004 N94-27106
FIELD THEORY (PHYSICS)
Coherent state approach for the (Phi)(sup 6)-lattice model and phase transitions [DE93-613053] p 3050 N94-25825
Quark-antiquark bound states [DE93-613054] p 3013 N94-25826
Fermionic field theory and gauge interactions on random lattices [DE94-601565] p 3051 N94-25885
Higher spin extensions of the Virasoro algebra, area-preserving algebras and the matrix algebra a-bar(sub (infinity)) [DE94-601557] p 3006 N94-26415
Differential regularization of a non-relativistic anyon model [DE94-601558] p 3019 N94-26416
Vortices in curved spacetime [DE94-601559] p 3072 N94-26417
Orthodox gravity [DE94-601560] p 2878 N94-26418
Dynamic breaking of U(N) and appearance of Chern-Simons term in 4-fermion theories [DE93-634342] p 3019 N94-26455
A cosmological field theory [ISBN-0-315-84271-7] p 3104 N94-26638
Thermodynamics and form factors of supersymmetric integrable field theories [DE94-602557] p 3073 N94-26896
Normal forms for perturbations of the euler top [PB94-125390] p 3009 N94-26968
Improved numerical methods for quantum field theory (Outstanding Junior Investigator Award) [DE94-001793] p 3073 N94-27002
Mapping between the Sinh-Gordon and Ising models [DE94-601535] p 2998 N94-27162
Operator regularization and renormalization theory [ISBN-0-315-49334-8] p 3007 N94-27264
Second-order phase transition in (g(phi)4)2 theory [DE94-603677] p 3067 N94-27638
Solution of the Heisenberg equation for the four-fermion contact interaction by the method of dynamical mappings [DE94-606341] p 3075 N94-27858
FIGHTER AIRCRAFT
Extension of On-Surface Radiation Condition (OSRC) theory to full-vector electromagnetic wave scattering by three-dimensional conducting, dielectric, and coated targets [AD-A274023] p 2766 N94-25757
Report of the defense science board task force on aircraft assessment [AD-A274531] p 2669 N94-26835
FILM COOLING
Study on film generation phenomena by particle deposition p 2728 N94-25575
Analysis of cooling jets near the leading edge of turbine blades p 2676 N94-28037
Advanced metallic exhaust impinged structural concepts demonstration p 2832 N94-28209
FILM THICKNESS
In situ x ray reflectivity measurements of thin film structural evolution [DE94-002289] p 3051 N94-25944
Using ferro-magnetic fluids to lubricate non-conformal isothermal contacts [INPE-5520-TAE/021] p 2827 N94-27665
Calculation methods for steadily loaded central circumferential groove hydrodynamic journal bearings (guide to use of computer program A9304) [ESDU-93004] p 2830 N94-28073
Calculation methods for steadily loaded axial groove hydrodynamic journal bearings (guide to use of computer program A9305) [ESDU-93005] p 2830 N94-28074
Calculation methods for steadily loaded axial groove hydrodynamic journal bearings. Low viscosity process fluid lubrication (guide to use of computer program A9306) [ESDU-93006] p 2830 N94-28075
FILTRATION
Bioregenerative system components for microgravity p 2903 N94-25673
FINANCE
Single term off-line coins [CWI-CS-R9318] p 2776 N94-27546
An efficient off-line electronic cash system based on the representation problem [CWI-CS-R9323] p 2776 N94-27551
FINANCIAL MANAGEMENT
NASA: Major challenges for management. Testimony before the Legislation and National Security Subcommittee, Committee on Government Operations, House of Representatives [GAO/T-NSIAD-94-18] p 3095 N94-28176
FINE STRUCTURE
Topological amplitudes in string theory [DE94-601561] p 3071 N94-25882
Morphological analysis of ionomers [DE94-003660] p 2749 N94-26005
High resolution measurements of mixing and reaction processes in turbulent flows [AD-A274970] p 2793 N94-26534
An x ray absorption fine structure study of ordering in polythiophene thin films [AD-A274235] p 2753 N94-26822
FINITE DIFFERENCE THEORY
Theory and modeling of stimulated Raman scattering [AD-A273755] p 3033 N94-25721
Extension of On-Surface Radiation Condition (OSRC) theory to full-vector electromagnetic wave scattering by three-dimensional conducting, dielectric, and coated targets [AD-A274023] p 2766 N94-25757
Arbitrary-order numerical schemes for model parabolic equations [CRANFIELD-AERO-9210] p 3005 N94-25781
Rendering of three-dimensional data sets derived from finite-difference and spectral methods [AD-A273724] p 3096 N94-25997
A positive finite-difference advection scheme applied on locally refined grids [CWI-NM-R9309] p 2867 N94-26216
Numerical solution of singularity-perturbed two-point boundary-value problems [DE94-601542] p 2993 N94-26410
The application of FD-TD method to antenna radiation patterns [ISBN-0-315-83893-0] p 2769 N94-26618
VLUGR2: A vectorized local uniform grid refinement code for PDE's in 2D [CWI-NM-R9306] p 2965 N94-26772
Using the TSAR electromagnetic modeling system [DE94-002617] p 2771 N94-26803
Nonlinear hysteresis in an endochronic solid [AD-A274594] p 2880 N94-26855
Elastic wave up/down decomposition in inhomogeneous and anisotropic media: An operator approach and its approximations [PB94-126497] p 2881 N94-26880
FINITE ELEMENT METHOD
Study on elucidation of damage generation process by electron beam lithography p 2729 N94-25581
Piecewise least squares fitting technique using finite interval method with Hermite polynomials [VTT-PUBS-135] p 2990 N94-25733
Structural analysis of a frangible nut used on the NASA Space Shuttle [DE94-003672] p 2821 N94-25811
Design study of fiber-composite penetrator cases [DE94-003203] p 2707 N94-26099
Parameter estimation by genetic algorithms [DE94-002924] p 2961 N94-26146
Longitudinal diffusion of a proton bunch under external noise [DE93-634022] p 3032 N94-26165
Correlation of experimental data and three-dimensional finite element modeling of a spinning quadrupole [DE93-041173] p 3008 N94-26421
Stress analysis of a secondary-bending specimen [AD-A274842] p 2838 N94-26501
A comparative study of serial and parallel aeroelastic computations of wings [NASA-TM-108805] p 2645 N94-26538
Structural evaluation of concepts for a solar energy concentrator for Space Station advanced development program [NASA-TP-3375] p 2695 N94-26609
Wobble-nutation modes of the Earth [ISBN-0-315-84246-6] p 3102 N94-26669
Nonlinear hysteresis in an endochronic solid [AD-A274594] p 2880 N94-26855
An automatic contact algorithm in DYNA3D for impact problems [DE94-002856] p 2965 N94-26862
New variational techniques for acoustic radiation and scattering from elastic shell structures [AD-A274599] p 3010 N94-26889
Computation of stress intensity factors by the mode enrichment technique with applications to geometrically nonlinear problems [PB94-126513] p 2840 N94-26910
Aircraft wheel life assessment [AD-A274378] p 2823 N94-26976
Joint services electronics program [AD-A274643] p 2785 N94-27027
Numerical Analysis Methods of Surface Cracks [VTT-PUBS-119] p 2841 N94-27186
Method for calculating stress intensity factors for surface cracks (appendix 2/1) p 2841 N94-27188
Quality assurance for fracture mechanical finite element analyses (appendix 3/1) p 2841 N94-27189
Applications of the weight function method (appendix 4/1) p 2842 N94-27190
Finite element analysis of damped vibrations of laminated composite plates [ISBN-0-315-84928-2] p 2843 N94-27585
A study on heat transfer in a scramjet leading edge model [NAL-TR-1187T] p 2675 N94-27608
An improvement in the modified finite element procedure for underwater shock analysis [DE94-004451] p 2797 N94-27617
Thermocapillary flow with evaporation and condensation and its effect on liquid retention in low-G fluid acquisition devices [NASA-TP-3463] p 2797 N94-27639
PATRAN 2.5/EAL interface guide [NASA-TM-109053] p 2972 N94-27655
Numerical experiment on finite element method for matching data [DE94-701208] p 3000 N94-27731
Super finite elements for nonlinear static and dynamic analysis of stiffened plate structures [ISBN-0-315-63903-2] p 2844 N94-27808
Hybrid techniques for complex aerospace electromagnetics problems p 2779 N94-27894
Mechanically fastened composite laminates subjected to combined bearing-bypass and shear loading p 2712 N94-27914
Analysis and control of hourglass instabilities in underintegrated linear and nonlinear elasticity [NASA-CR-195293] p 2846 N94-28266
FINITE VOLUME METHOD
High-lift system analysis method using unstructured meshes [NLR-TP-92351-U] p 2647 N94-27554
The numerical calculation of laminar and turbulent flows using penalty function finite volume methods [ISBN-0-315-61377-7] p 2799 N94-27947
Techniques for accurately solving unsteady shock waves and contact discontinuities p 2656 N94-28342

FINS

Low-speed pressure distribution measurements over the aft-fuselage, fins, and stabilators of a 1/9th scale F/A-18 wind-tunnel model [AD-A274870] p 2644 N94-26342

Flowfield dynamics in blunt fin-induced shock wave/turbulent boundary layer interactions [NASA-CR-195170] p 2798 N94-27802

Contribution of body-mounted fins and tailplanes to lateral derivatives due to sideslip at subsonic speeds for general body width to height ratio [ESDU-93007] p 2648 N94-28057

FIR FILTERS

Role of anticausal inverses in multirate filter-banks. Part 1: System theoretic fundamentals [AD-A274279] p 2997 N94-27015

Causal fir matrices with anticausal fir inverses, and application in characterization of biorthonormal filter banks [AD-A274509] p 2998 N94-27035

FIRE (CLIMATOLOGY)

MODIS airborne simulator visible and near-infrared calibration, 1991 FIRE-Cirrus field experiment. Calibration version: FIRE King 1.1 [NASA-TM-104600] p 2897 N94-28182

FIRE CONTROL CIRCUITS

Effects of repeating resistance testing on firing ability of igniter EP360-3 [AD-A274814] p 2759 N94-26486

FIRE FIGHTING

Summaries of BFRL fire research in-house projects and grants, 1993 [PB94-121050] p 2763 N94-26756

FIRE PREVENTION

HDR reactor containment fire modeling with BRI2 [VTT-PUBS-113] p 3031 N94-25621

Engineering Technical Letter (ETL) 93-5: Fire protection engineering criteria, electronic equipment installations [AD-A274835] p 2762 N94-26084

The structural behaviour of the steel or composite concrete and steel frames and the connections of frame members during the fire: A literature review [VTT-TIED-1437] p 2837 N94-26307

Summaries of BFRL fire research in-house projects and grants, 1993 [PB94-121050] p 2763 N94-26756

Annual conference on fire research, 1993: Book of abstracts [PB94-121324] p 2717 N94-26907

Impact of improved materials and cabin water spray on commuter aircraft postcrash fire survivability [AD-A274421] p 2660 N94-27081

Risks and issues in fire safety on the Space Station [NASA-TM-106430] p 2692 N94-27436

FIRES

HDR reactor containment fire modeling with BRI2 [VTT-PUBS-113] p 3031 N94-25621

Engineering Technical Letter (ETL) 93-5: Fire protection engineering criteria, electronic equipment installations [AD-A274835] p 2762 N94-26084

Fire simulation based on convection calculation [VTT-TIED-1411] p 2762 N94-26259

Summaries of BFRL fire research in-house projects and grants, 1993 [PB94-121050] p 2763 N94-26756

Annual conference on fire research, 1993: Book of abstracts [PB94-121324] p 2717 N94-26907

SP industry calorimeter for rate of heat release measurements up to 10MW [PB94-124211] p 2811 N94-27044

Uncertainties in the characterization of the thermal environment of a solid rocket propellant fire [DE94-002023] p 2760 N94-27719

FISHES

Coupling of pelagic and benthic communities over a seamount in the Eastern North Pacific [AD-A274750] p 2899 N94-26149

Study on posture control and adaption mechanism under weightlessness: Results of second rehearsal for space experiment using carp p 2912 N94-27446

FISSION

A double arm time-of-flight spectrometer based on position-sensitive parallel-grid avalanche counters [DE93-616665] p 3012 N94-25750

FISSION PRODUCTS

Index to BROND-2, CENDL-2, ENDF/B-6, JEF-2, JENDL-3 [DE93-634500] p 3016 N94-26034

FIXED POINTS (MATHEMATICS)

Semantics, orderings and recursion in the weakest precondition calculus [CWI-CS-R9267] p 2995 N94-26776

Fixed point type theorems and projection-interaction approximation [DE94-603669] p 3000 N94-27632

FIXED WINGS

A finite wake theory for two-dimensional rotary wing unsteady aerodynamics [AD-A274921] p 2645 N94-26535

Preliminary assessment of aerodynamic effects of wing repair patches p 2657 N94-28346

FLAME PROPAGATION

Summaries of BFRL fire research in-house projects and grants, 1993 [PB94-121050] p 2763 N94-26756

Impact of improved materials and cabin water spray on commuter aircraft postcrash fire survivability [AD-A274421] p 2660 N94-27081

FLAME RETARDANTS

Impact of improved materials and cabin water spray on commuter aircraft postcrash fire survivability [AD-A274421] p 2660 N94-27081

FLAME SPECTROSCOPY

Researches of the Electrotechnical Laboratory. No. 53: Spectral emission from combustion gas containing scattering media [JTN-94-80603] p 2717 N94-27246

FLAMES

Characterization of acoustic effects on flame structures by beam deflection technique [DE94-003240] p 2714 N94-26122

FLAMMABILITY

Microgravity ignition experiment p 2761 N94-25707

The structural behaviour of the steel or composite concrete and steel frames and the connections of frame members during the fire: A literature review [VTT-TIED-1437] p 2837 N94-26307

Composite raw materials for the building industry [VTT-TIED-1433] p 2708 N94-26544

Annual conference on fire research, 1993: Book of abstracts [PB94-121324] p 2717 N94-26907

FLAPS (CONTROL SURFACES)

Experimental apparatus for optimization of flap position for a three-element airfoil model p 2682 N94-27912

Wing lift increment at zero angle of attack due to deployment of single-slotted flaps at low speeds [ESDU-93019] p 2649 N94-28140

Thin-layer Navier-Stokes computations for multi-element airfoils p 2656 N94-28341

FLASH LAMPS

Flash unit for high speed photography [PML-1992-91] p 2811 N94-26647

FLAT PLATES

User's guide for the thermal analyst's help desk expert system [NASA-CR-194885] p 2695 N94-26103

Nominally 2-dimensional flow about a normal flat plate [AD-A274472] p 2794 N94-27026

Numerical simulation of receptivity and transition in a boundary layer on a flat plate with a suction hole [NASA-CR-195708] p 2798 N94-27782

Comparison of the interactions of two and three dimensional transverse jets with a hypersonic free stream p 2659 N94-28021

Experiments on interaction force of jets in hypervelocity cross-flow in a shock tunnel p 2659 N94-28022

A numerical investigation of a subsonic jet in a crossflow p 2803 N94-28023

Flat rectangular orthotropic plates under uniformly distributed normal pressure. Elastic stresses and deflections for various forms of edge restraint [ESDU-93011] p 2845 N94-28061

FLAT SURFACES

Failure mechanisms of high temperature semiconductor lasers [AD-A273833] p 2815 N94-25616

Bathymetric data set extraction program. Users guide [AD-A274761] p 2899 N94-26567

Development of a 2f optical performance measurement system [DE94-003489] p 3039 N94-27721

FLATTENING

Study on the production of flaky amorphous alloy powders by impact flattening of atomized liquid droplets on a rapidly rotating wheel p 2746 N94-28169

FLAVOR (PARTICLE PHYSICS)

Photon and hadron production of heavy flavors [DE94-004655] p 3018 N94-26245

Flavor changing neutral currents in SU(3) x U(1) models [DE94-602576] p 3022 N94-26899

Weak hadronic decays of heavy flavor mesons [ISBN-0-315-55542-4] p 3026 N94-27402

FLEXIBLE BODIES

Selected topics in robotics for space exploration [NASA-CP-10131] p 2682 N94-26278

Dynamics of a flexible extendible beam [ISBN-0-315-84278-4] p 2838 N94-26639

Implementation of integral manifold control on a two degree of freedom flexible joint manipulator: Theory and experiments [ISBN-0-315-83572-9] p 2823 N94-26658

Generalized finite element dynamic modelling and simulation for flexible robot manipulators [ISBN-0-315-84623-2] p 2825 N94-27343

FLEXIBLE SPACECRAFT

A study on piezoelectric actuators and sensors for vibration control of flexible space structures [AD-A274925] p 2695 N94-26532

Substructure synthesis methods for viscoelastic structures [UTIAS-349] p 2695 N94-26712

Dynamics and robust control for uncertain flexible space systems [INPE-5510-TAE/020] p 2696 N94-27357

FLEXIBLE WINGS

A comparative study of serial and parallel aeroelastic computations of wings [NASA-TM-108805] p 2645 N94-26538

FLIGHT CHARACTERISTICS

Aircraft maneuvers for the evaluation of flying qualities and agility. Volume 1: Maneuver development process and initial maneuver set [AD-A273913] p 2666 N94-25590

Aircraft maneuvers for the evaluation of flying qualities and agility. Volume 3: Simulation data [AD-A273814] p 2667 N94-25961

Standardization of aircraft control and performance symbology on the USAF head-up display [AD-A274283] p 2673 N94-26989

Techniques to improve maneuver stability characteristics of a nonlinear wide-body transport airplane in cruise flight [NASA-TM-4521] p 2679 N94-27660

A study of jet effect and ground effect interference on a STOL fighter p 2671 N94-28034

Transitional flight characteristics of a geometrically simplified STOVL model p 2672 N94-28035

FLIGHT CONDITIONS

Development and implementation of a scramjet cycle analysis code with a finite-rate-chemistry combustion model for use on a personal computer [AD-A273834] p 2673 N94-25617

Variability of measured sonic boom signatures p 2651 N94-28197

FLIGHT CONTROL

Design of a subsonic envelope flight control system for the Vista F-16 using quantitative feedback theory [AD-A274057] p 2676 N94-25771

Neural networks for dynamic flight control [AD-A274089] p 2676 N94-25785

Design of a flight controller for an unmanned research vehicle with control surface failures using quantitative feedback theory [AD-A274049] p 2677 N94-25833

Evaluation of moderate angle of attack roll of a dual engine, thrust vectoring aircraft using quantitative feedback theory [AD-A274118] p 2667 N94-25905

Multiple model adaptive estimation applied to the LAMBDA URV for failure detection and identification [AD-A274078] p 3002 N94-25992

Discovery learning in autonomous agents using genetic algorithms [AD-A274083] p 2677 N94-25998

Technology drivers for flight telerobotic system software p 2684 N94-26289

The Ariane 5 data management system p 2950 N94-26724

PRONAOS flight software: A real-time application for a balloonborne scientific gondola p 2950 N94-26725

Fluid dynamic linear accelerometer [AD-D016042] p 2678 N94-27112

Automation of formation flight control [AD-A274137] p 2678 N94-27132

Optimal nonlinear estimation for aircraft flight control in wind shear p 2643 N94-27296

Computer code for controller partitioning with IFPC application: A user's manual [NASA-CR-195291] p 2678 N94-27414

Design and flight test of the Propulsion Controlled Aircraft (PCA) flight control system on the NASA F-15 test aircraft [NASA-CR-186028] p 2674 N94-27432

Techniques to improve maneuver stability characteristics of a nonlinear wide-body transport airplane in cruise flight [NASA-TM-4521] p 2679 N94-27660

A simulator investigation of helicopter flight control system mode transitions [UTIAS-348] p 2682 N94-27879

Comparison of performance in simulator flight among subjects with different simulator experiences p 2933 N94-27943

FLIGHT CREWS
Airborne data link operational evaluation test plan
[AD-A274096] p 2664 N94-25788
A comparison of two hardware implementations of a crew selection system
[AD-A274913] p 2937 N94-26346
US Army aviation epidemiology data registry: Incidence and outcomes of aviator flying evaluation boards
[AD-A274711] p 2910 N94-26432
The use of EEG as a workload assessment tool in flight test
[AD-A274568] p 2910 N94-26847
Benefits estimation for simulation systems used for aircrew training in a multiship environment
[AD-A274313] p 2938 N94-26882
Effects of historical and predictive information on ability of transport pilot to predict an alert
[NASA-TM-4547] p 2673 N94-27864

FLIGHT ENVELOPES
Design of a subsonic envelope flight control system for the Vista F-16 using quantitative feedback theory
[AD-A274057] p 2676 N94-25771

FLIGHT HAZARDS
The relationship of an integral wind shear hazard to aircraft performance limitations
[NASA-TM-109080] p 2677 N94-26593
A data fusion algorithm for multi-sensor microburst hazard assessment p 2641 N94-27287
Investigation of air transportation technology at Princeton University, 1992-1993 p 2643 N94-27294
Special investigation report: Safety issues related to wake vortex encounters during visual approach to landing
[PB94-917002] p 2660 N94-27881

FLIGHT INSTRUMENTS
Standardization of aircraft control and performance symbology on the USAF head-up display
[AD-A274283] p 2673 N94-26989
A graphical workstation based part-task flight simulator for preliminary rapid evaluation of advanced displays
p 2641 N94-27286

FLIGHT MANAGEMENT SYSTEMS
The Ariane 5 data management system
p 2950 N94-26724
PRONAOS flight software: A real-time application for a balloonborne scientific gondola p 2950 N94-26725
MATRA Marconi Space: The Silex on-board processor and on-board software p 2950 N94-26726

FLIGHT MECHANICS
University of Toronto Institute for Aerospace Studies
[CTN-94-61013] p 3117 N94-26701

FLIGHT OPERATIONS
Air traffic management as principled negotiation between intelligent agents p 2643 N94-27297

FLIGHT PATHS
Genetic algorithms applied to a mission routing problem
[AD-A274130] p 2968 N94-27120
Optimal nonlinear estimation for aircraft flight control in wind shear p 2643 N94-27296
Examples of flight path optimisation using a multivariate gradient-search method
[ESDU-93021] p 2670 N94-28092

FLIGHT SAFETY
Eagle RTS: A design of a regional transport
p 2671 N94-25709
S-76 high intensity radiated fields, volume 2
[AD-A274572] p 2771 N94-26836
S-76 high intensity radiated fields, volume 1
[AD-A274571] p 2771 N94-26854
S-76 high intensity radiated fields, volume 3
[AD-A274416] p 2772 N94-26980
Air traffic management as principled negotiation between intelligent agents p 2643 N94-27297
Aircraft accident report: Runway departure following landing American Airlines flight 102, McDonnell Douglas DC-10-30, N139AA, Dallas/Fort Worth International Airport, Texas, April 14, 1993
[PB94-910402] p 2660 N94-27766
Effects of historical and predictive information on ability of transport pilot to predict an alert
[NASA-TM-4547] p 2673 N94-27864
Special investigation report: Safety issues related to wake vortex encounters during visual approach to landing
[PB94-917002] p 2660 N94-27881
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle mission STS-60
[NASA-TM-109193] p 2692 N94-27956
The 1993 Federal Aviation Administration plan for research, engineering and development
p 2643 N94-27960
Lufthansa Yearbook 1992
[DSK-9734-H-92] p 2660 N94-28230
A sky above Europe p 2661 N94-28234

FLIGHT SIMULATION
Report on a visit to the Arvin/Calspan Corporation, Buffalo, New York, USA, September 1992
[CRANFIELD-AERO-9305] p 2676 N94-25653
Developing realistic cooperative behaviors for autonomous agents in air combat simulation
[AD-A274077] p 2937 N94-25774
Piloted simulation study of an ILS approach of a twin-pusher business/commuter turboprop aircraft configuration
[NASA-TM-4516] p 2646 N94-26602

FLIGHT SIMULATORS
Report on a visit to the Arvin/Calspan Corporation, Buffalo, New York, USA, September 1992
[CRANFIELD-AERO-9305] p 2676 N94-25653
Weapon system integration for the AFIT virtual cockpit
[AD-A274058] p 2667 N94-25772
Image quality and the display modulation transfer function: Experimental findings
[AD-A274061] p 2679 N94-25773
Developing realistic cooperative behaviors for autonomous agents in air combat simulation
[AD-A274077] p 2937 N94-25774
Benefits estimation for simulation systems used for aircrew training in a multiship environment
[AD-A274313] p 2938 N94-26882
Reconfigurable aircraft stick control
[AD-D016043] p 2681 N94-27113
A graphical workstation based part-task flight simulator for preliminary rapid evaluation of advanced displays
p 2641 N94-27286
Design and flight test of the Propulsion Controlled Aircraft (PCA) flight control system on the NASA F-15 test aircraft
[NASA-CR-186028] p 2674 N94-27432
A simulator investigation of helicopter flight control system mode transitions
[UTIAS-348] p 2682 N94-27879
Comparison of performance in simulator flight among subjects with different simulator experiences
p 2933 N94-27943

FLIGHT STABILITY TESTS
Optimal control of helicopters following power failure
[NAL-TR-1190] p 2678 N94-27206

FLIGHT TESTS
Aircraft maneuvers for the evaluation of flying qualities and agility. Volume 1: Maneuver development process and initial maneuver set
[AD-A273913] p 2666 N94-25590
Project Ares 3 p 2671 N94-25712
Design study to simulate the development of a commercial freight transportation system
p 2671 N94-25715
Aircraft maneuvers for the evaluation of flying qualities and agility. Volume 3: Simulation data
[AD-A273814] p 2667 N94-25961
Correlation of airloads on a two-bladed helicopter rotor
[NASA-TM-103982] p 2644 N94-26143
Report of the defense science board task force on aircraft assessment
[AD-A274531] p 2669 N94-26835
S-76 high intensity radiated fields, volume 2
[AD-A274572] p 2771 N94-26836
The use of EEG as a workload assessment tool in flight test
[AD-A274568] p 2910 N94-26847
S-76 high intensity radiated fields, volume 1
[AD-A274571] p 2771 N94-26854
S-76 high intensity radiated fields, volume 3
[AD-A274416] p 2772 N94-26980
Radiometric, spectral, and effectiveness equipment
[AD-A274208] p 3037 N94-27066
Flight testing of GPS and GPS-aided systems
[NLR-TP-92151-U] p 2666 N94-27831
On the aging of sonic booms p 2650 N94-28194
A340 testing p 2662 N94-28242

FLIGHT TRAINING
Image quality and the display modulation transfer function: Experimental findings
[AD-A274061] p 2679 N94-25773
Benefits estimation for simulation systems used for aircrew training in a multiship environment
[AD-A274313] p 2938 N94-26882
The Reports of Aeromedical Laboratory, volume 33, number 4
[JTN-94-80586] p 2933 N94-27942

FLIR DETECTORS
Mitsubishi 3-5 micrometers IR imager for machine-vision/ATA applications
[AD-A273812] p 3034 N94-25940
Weapon system sensor integration for a DIS-compatible virtual cockpit
[AD-A274088] p 2672 N94-26021
Focal plane arrays in advanced thermal images
[AD-B174292] p 3036 N94-26648
Enhanced tracking of airborne targets using forward looking infrared and laser return measurements
[AD-A274181] p 3037 N94-27102

FLOAT ZONES
Lithium drifted silicon detector fabrication on gettered floating-zone silicon
[DE94-003890] p 3054 N94-26095
Modelling of the MEA float zone using accelerometer data
[NASA-CR-193933] p 2761 N94-27220
Float zone crystal growth using laser radiation
[DLR-FB-93-10] p 3066 N94-27590

FLOATING POINT ARITHMETIC
Arithmetic performances of onboard computers
p 2952 N94-26738

FLOQUET THEOREM
Modal control of a satellite in an unstable periodic orbit about the Earth-Sun interior Lagrange point
[AD-A273707] p 2694 N94-25776
The modal solution to the Moon's orbit using canonical Floquet perturbation theory
[AD-A273732] p 2690 N94-26001

FLOTATION
Basic research on levitation fusing/solidification technology p 2723 N94-25552
Study on reactions between molten metal and oxide by magnetic flotation dissolution method
p 2725 N94-25558

FLOW CHARACTERISTICS
A study on structure of benthic boundary layer in coastal waters
[REPT-4] p 2898 N94-25635
Experimental contribution to the study of secondary flows in centrifugal turbopump stator components
[ECL-92-35] p 2789 N94-25654
Propagation of experimental uncertainties from the tunnel to the body coordinate system in 3-D LDV flow field studies
[NASA-CR-191607] p 2680 N94-26603
Design and experimental performance of a two stage partial admission turbine. Task B.1/B.4
[NASA-CR-179548] p 2824 N94-27228
Fifty years of jet in cross flow research
p 2799 N94-28004
Transitional flight characteristics of a geometrically simplified STOVL model p 2672 N94-28035
High-performance parallel analysis of coupled problems for aircraft propulsion
[NASA-CR-195292] p 2845 N94-28181
Wind tunnel investigation of propfan slipstream/wing interactions on a De Havilland air motor powered semispan model at Mach numbers 0.6 and 0.7
p 2651 N94-28316

FLOW DISTORTION
The measurement of disturbance levels in the Langley Research Center 20-inch Mach 6 tunnel
[NASA-CR-4571] p 2646 N94-26548
Unsteady aspects of hot gas reingestion and statistical analysis p 2676 N94-28019
Compressor stability p 2828 N94-28046

FLOW DISTRIBUTION
A study on structure of benthic boundary layer in coastal waters
[REPT-4] p 2898 N94-25635
A modeling study of the mesocyclone
[AD-A274889] p 2893 N94-26168
Propagation of experimental uncertainties from the tunnel to the body coordinate system in 3-D LDV flow field studies
[NASA-CR-191607] p 2680 N94-26603
Fiber-optic-based laser vapor screen flow visualization system for aerodynamic research in larger scale subsonic and transonic wind tunnels
[NASA-TM-4514] p 2647 N94-26706
Experimental investigation of the flow quality in the GLT20 subsonic-transonic boundary layer wind tunnel
[PB94-126539] p 2681 N94-26815
Numerical studies on the dynamics of bubble, turbulent, free shear flows: Effect of the inter-phase coupling on the global flow evolution
[AD-A274521] p 2794 N94-26832
Experimental verification of tomographic reconstruction of turbulent air flow structure using optical wavefront measurements
[AD-A274392] p 2795 N94-27129
Streamwise vorticity in a turbine rotor with conical endwalls
[DLR-FB-93-13] p 2826 N94-27591
Fifty years of jet in cross flow research
p 2799 N94-28004
Topological structure of a jet in a cross flow
p 2801 N94-28014
Experiments into the scaling parameters required for exhaust gas ingestion testing of vertical landing aircraft
p 2671 N94-28017

A numerical investigation of a subsonic jet in a crossflow p 2803 N94-28023

Navier-Stokes simulation of two and three dimensional jets in crossflow, effects of grid, and boundary conditions p 2804 N94-28026

Pneumatic management of blunted-forebody flow asymmetry for high-angle-of-attack directional control p 2679 N94-28028

Theoretical and experimental investigation of a delta wing with turbulent leading-edge jets p 2659 N94-28029

Numerical assessment of aerodynamic interactions on missiles with transverse jets control p 2659 N94-28031

First experimental assessment of RCS plume-flow field interaction on Hermes leading edge thruster configuration p 2703 N94-28032

Numerical simulation of a powered-lift landing p 2671 N94-28033

Nonequilibrium radiation and chemistry models for aerocapture vehicle flowfields [NASA-CR-195706] p 2648 N94-28071

An initial investigation into methods of computing transonic aerodynamic sensitivity coefficients [NASA-CR-195705] p 2648 N94-28072

Numerical simulation of turbulent free jet by TFKE model p 2871 N94-28157

Flow field investigation in the near slipstream of an 8-bladed propfan on the De Havilland WTEJ half-model at Mach numbers 0.6 and 0.7 p 2651 N94-28317

Potential flow modelling of airfoil stall p 2654 N94-28332

FLOW EQUATIONS

Parallel implicit unstructured grid Euler solvers [NASA-CR-191594] p 2999 N94-27434

High-lift system analysis method using unstructured meshes [NLR-TP-92351-U] p 2647 N94-27554

Time-step enlargement and optimal smoothing in Runge-Kutta time-integration algorithms by implicit and explicit smoothing [NLR-TP-92221-U] p 2798 N94-27799

FLOW MEASUREMENT

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 4: Laser velocimeter wake data, advance ratio of 0.037 [NASA-TM-109040-VOL-4] p 2645 N94-26483

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 1: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0081 and hover tip speed of 603 feet/second [NASA-TM-109040-VOL-1] p 2645 N94-26489

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 2: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 710 feet/second [NASA-TM-109040-VOL-2] p 2645 N94-26492

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 3: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 603 feet/second [NASA-TM-109040-VOL-3] p 2645 N94-26497

The measurement of disturbance levels in the Langley Research Center 20-inch Mach 6 tunnel [NASA-CR-4571] p 2646 N94-26548

Gordon Research Conference on the Physics and Chemistry of Laser Diagnostics in Combustion [AD-A274609] p 2716 N94-26893

An XCP user's guide and reference manual [AD-A274519] p 2900 N94-27090

Calibrating/testing meters in hot water test bench VM7 [PB94-124294] p 2812 N94-27160

The measurements of muscle blood flow by laser Doppler flowmetry with needle type probe p 2908 N94-27530

Transverse vorticity measurements in the University of Houston two stream shear layer facility [AD-A273910] p 2797 N94-27562

Attached and separated trailing edge flow measurements with a triple-split hot-film probe p 2656 N94-28339

FLOW RESISTANCE

Validated heat-transfer and pressure-drop prediction methods based on the discrete-element method. Phase 2: Two-dimensional rib roughness [DE94-002379] p 2794 N94-26763

FLOW STABILITY

Calibrating/testing meters in hot water test bench VM7 [PB94-124294] p 2812 N94-27160

Compressor stability p 2828 N94-28046

FLOW VELOCITY

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 4: Laser velocimeter wake data, advance ratio of 0.037 [NASA-TM-109040-VOL-4] p 2645 N94-26483

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 1: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0081 and hover tip speed of 603 feet/second [NASA-TM-109040-VOL-1] p 2645 N94-26489

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 2: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 710 feet/second [NASA-TM-109040-VOL-2] p 2645 N94-26492

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 3: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 603 feet/second [NASA-TM-109040-VOL-3] p 2645 N94-26497

Pump CFD code validation tests [NASA-CR-193939] p 2822 N94-26597

Calibrating/testing meters in hot water test bench VM7 [PB94-124294] p 2812 N94-27160

FLOW VISUALIZATION

Numerical simulation of tomographic reconstruction for the study of turbulence using optical wavefront sensor measurements [AD-A273851] p 2789 N94-25587

Flow past a circular cylinder with a permeable wake splitter plate [AD-A273765] p 2790 N94-25872

Feature isolation and quantification of evolving datasets [NASA-CR-195230] p 2961 N94-26207

Focused Schlieren flow visualization studies of multiple venturi fuel injectors in a high pressure combustor [NASA-TM-106479] p 2674 N94-26573

Fiber-optic-based laser vapor screen flow visualization system for aerodynamic research in larger scale subsonic and transonic wind tunnels [NASA-TM-4514] p 2647 N94-26706

Radar cross section visualization using sample buffer progressive refinement volume rendering [AD-A274179] p 2773 N94-27127

Leading-edge vortex-system details obtained on F-106B aircraft using a rotating vapor screen and surface techniques [NASA-TP-3374-VIDEO-SUPPL] p 2647 N94-27161

Locating tie-points on a grid p 2978 N94-27906

Unsteady wake structures in transverse jets p 2800 N94-28006

First experimental assessment of RCS plume-flow field interaction on Hermes leading edge thruster configuration p 2703 N94-28032

Effects of free-stream turbulence on a jet in a cross flow p 2805 N94-28036

Infrared imaging for transition detection in a transonic blowdown wind tunnel p 2653 N94-28325

FLOWMETERS

STS-51 pad abort. OV103-engine 2033 (ME-2) fuel flowmeter sensor open circuit [NASA-CR-193924] p 2701 N94-26230

Calibrating/testing meters in hot water test bench VM7 [PB94-124294] p 2812 N94-27160

FLUENCE

Nonswelling behavior of HT9 alloy irradiated to high exposure [DE94-003502] p 2736 N94-26522

FLUID DYNAMICS

The identification of inflow fluid dynamics parameters that can be used to scale fatigue loading spectra of wind turbine structural components [DE94-000231] p 2791 N94-26117

University of Toronto Institute for Aerospace Studies [CTN-94-61013] p 3117 N94-26701

Nominally 2-dimensional flow about a normal flat plate [AD-A274472] p 2794 N94-27026

Fluid dynamic linear accelerometer [AD-D016042] p 2678 N94-27112

Experimental verification of tomographic reconstruction of turbulent air flow structure using optical wavefront measurements [AD-A274392] p 2795 N94-27129

Basic research on natural gas combustion phenomena [PB94-129046] p 2717 N94-27256

FLUID FILMS

Using ferro-magnetic fluids to lubricate non-conformal isothermal contacts [INPE-5520-TAE/021] p 2827 N94-27665

FLUID FILTERS

Bulletin of the Institute for Chemical Reaction Science, Tohoku University, volume 2 [JTN-94-80602] p 2717 N94-27385

Glass cylindrical filter for electrolysis cell p 2718 N94-27391

FLUID FLOW

Interface configuration experiment: Preliminary results [NASA-TM-109684] p 2760 N94-25849

Numerical solution of singularity-perturbed two-point boundary-value problems [DE94-601542] p 2993 N94-26410

Solidification modeling of a spiral casting to determine material fluidity [DE94-002212] p 2739 N94-26935

Report of three microgravity experiments by the drop shaft [JTN-94-80579] p 2761 N94-27341

FLUID JETS

An experimental study of plunging liquid jet induced air carryunder and dispersion [AD-A274414] p 2794 N94-26979

FLUID MANAGEMENT

Interface configuration experiment: Preliminary results [NASA-TM-109684] p 2760 N94-25849

FLUID MECHANICS

Computational mechanics [DE94-003015] p 2965 N94-26775

A survey of open problems in symplectic integration [DE94-003966] p 3007 N94-27777

FLUID TRANSMISSION LINES

Dynamic response of a compressor research facility [AD-A273836] p 2679 N94-25740

FLUID-SOLID INTERACTIONS

Study on interfacial reaction analysis at interfacial joining p 2728 N94-25574

A thermodynamically consistent constitutive theory for a rigid solid-stokesian fluid mixture [DE93-633202] p 2792 N94-26401

FLUIDIZED BED PROCESSORS

Fibrous ceramic candle filter for particle removal in pressurized fluidized bed combustion [PB94-133089] p 2876 N94-28383

Experimental studies of pressurised fluidised bed combustion at Helsinki University of Technology, 1991-1992 [PB94-133063] p 2876 N94-28394

Emissions of nitrogen oxides (NO(x) and N2O) in pressurized fluidized bed combustion [PB94-133071] p 2876 N94-28395

FLUORESCENCE

Detecting actin fibers in cell images using minimal spanning trees [AD-A273914] p 2984 N94-25591

Development of a multi-sensor in situ fiber optic fluorometer [DE94-003399] p 3035 N94-26100

Fiber optic sensors for corrosion detection p 3040 N94-27923

FLUORIDES

Object imaging accomplished with an integrated circuit robotic tactile sensor incorporating a piezoelectric polyvinylidene fluoride thin film [AD-A274038] p 2780 N94-25845

Hadron gas ionization calorimeters [DE93-634186] p 2810 N94-26397

Ferroelectric fluoride memory FET development [AD-A274341] p 2785 N94-27057

New monomers for high performance polymers p 2758 N94-27904

FLUORINE

Novel oxidizing reagents derived from elemental fluorine [ITN-94-85231] p 2719 N94-27687

FLUORINE COMPOUNDS

Novel oxidizing reagents derived from elemental fluorine [ITN-94-85231] p 2719 N94-27687

FLUORO COMPOUNDS

New monomers for high performance polymers p 2758 N94-27904

FLUOROHYDROCARBONS

Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparison and verification of methods [DE94-003664] p 2749 N94-26007

Thermophysical properties of HFC-143a and HFC-152a [DE94-004236] p 2719 N94-27567

FLUOROPOLYMERS

Trifluoromethyl-substituted polymers [NASA-CR-195217] p 2751 N94-26641

FLUTTER
Multidisciplinary aeroelastic analysis of a generic hypersonic vehicle
[NASA-TM-4544] p 2691 N94-27868

FLUTTER ANALYSIS
Understanding and development of a prediction method of transonic limit cycle oscillation characteristics of fighter aircraft
[NLR-TP-92210-U] p 2679 N94-27798
Multidisciplinary aeroelastic analysis of a generic hypersonic vehicle
[NASA-TM-4544] p 2691 N94-27868

FLUX (RATE)
A semiclassical reactive flux method for the calculation of condensed phase activated rate constants
[AD-A274850] p 3020 N94-26562
Fiber optic Faraday flux transformer specification
[AD-D016058] p 3039 N94-27674

FLUX DENSITY
Hydrogen uptake into silicon from an ECR plasma
[DE94-003771] p 3050 N94-25815
Measurement of magnetic fluctuation induced energy transport
[DE94-003846] p 3042 N94-26132
CRRES high energy proton flux map
[AD-A274803] p 2878 N94-26338

FLUX PINNING
Flux flow, pinning, and resistive behavior in superconducting networks
[DE94-003400] p 3050 N94-25848

FLUX VECTOR SPLITTING
High-lift system analysis method using unstructured meshes
[NLR-TP-92351-U] p 2647 N94-27554
A new flux vector splitting scheme
p 2657 N94-28343

FLY BY WIRE CONTROL
The application of a C(star) flight control law to large civil transport aircraft
[CRANFIELD-AERO-9303] p 2676 N94-25640
Report on a visit to the Arvin/Calspan Corporation, Buffalo, New York, USA, September 1992
[CRANFIELD-AERO-9305] p 2676 N94-25653
A simulator investigation of helicopter flight control system mode transitions
[UTIAS-348] p 2682 N94-27879

FLYING PERSONNEL
Monograph of the Aviation Epidemiology Data Register for CY 1992
[AD-A274400] p 2911 N94-27130
Air traffic administration enroute to Europe
p 2661 N94-28238

FLYWHEELS
A study on the development of high T(sub c) superconducting materials
[DE93-633529] p 3057 N94-26404

FOAMS
Advances in preparing and characterizing low density pan-carbon microcellular foam
[DE94-002278] p 2748 N94-25932
Double layer capacitance of carbon foam electrodes
[DE94-002651] p 2780 N94-25975
Soft ground arresting system for airports
[DOT/FAA/CT-93/80] p 2680 N94-26202
Cryogenic insulation studies
[NASA-CR-195266] p 2756 N94-27429

FOCAL PLANE DEVICES
Performance comparison of shearing interferometer and Hartmann wave front sensors
[AD-A274031] p 3034 N94-25768
Focal plane arrays in advanced thermal images
[AD-B174292] p 3036 N94-26648
Focal plane antenna array for millimeter waves
[AD-D016034] p 2774 N94-27202

FOCUSING
Focusing properties of a three-element quadrupole lens system and its stigmatic focusing behaviour
[DE93-616534] p 2766 N94-25915
An investigation of methods for determining depth from focus
[ISBN-0-315-64015-4] p 2988 N94-27645

FOOD PROCESSING
Bioregenerative system components for microgravity
p 2903 N94-25673

FORCED CONVECTION
Forced convection heat transfer in straight tubes. Part 2: Laminar and transitional flow
[ESDU-93018-PT-2] p 2807 N94-28139

FORCED VIBRATION
The onset of chaos in a periodically forced nonlinear oscillator
[ISBN-0-315-84564-3] p 2842 N94-27272

FOREBODIES
A sensitivity equation approach to shape optimization in fluid flows
[NASA-CR-191598] p 2999 N94-27415

FORECASTING
A preliminary analysis of the US west climatology
[DE94-003028] p 2894 N94-26313
Short-range cloud amount forecasting with model output statistics
[AD-A274769] p 2895 N94-26798
Practical problems in aggregating expert opinions
[DE94-002623] p 3094 N94-27707

FOREST MANAGEMENT
SIMA: A model for forest succession based on the carbon and nitrogen cycles with application to silvicultural management of the forest ecosystem
[SILVA-CARELICA-22] p 2848 N94-26258

FORESTS
SIMA: A model for forest succession based on the carbon and nitrogen cycles with application to silvicultural management of the forest ecosystem
[SILVA-CARELICA-22] p 2848 N94-26258
Role of remote sensing in energy, water, and carbon cycle studies over the Amazon
[INPE-5486-PRE/1786] p 2852 N94-27957
Landscape dynamics of northeastern forests
[NASA-CR-195272] p 2852 N94-28070

FORM FACTORS
CP violating form factors for three gauge boson vertex in the two Higgs doublet and left-right symmetric models
[DE94-601704] p 3014 N94-25841
The delta (1232) resonance transition form factor
[DE94-003442] p 3017 N94-26101
Light-quark, heavy-quark systems: An update
[DE94-002298] p 3021 N94-26759
Thermodynamics and form factors of supersymmetric integrable field theories
[DE94-602557] p 3073 N94-26896
Proton electromagnetic form factor near the proton-antiproton threshold and quasinuclear bound state
[DE94-606458] p 3027 N94-27681

FORMALDEHYDE
Numerical analysis of the photo-dissociation/radical oxidation of formaldehyde by ultraviolet light in a photolytic reactor
[AD-A274539] p 2868 N94-26843

FORMALISM
Formal methods for dependable real-time systems
p 2953 N94-26740
A formalization of objects using equational dynamic logic
[PB94-125218] p 2965 N94-26852
Trace-based compositional proof theory for fault tolerant distributed systems
[PB94-126737] p 2966 N94-26971
A hybrid formalism for representation and interpretation of image knowledge
[INPE-5485-PRE/1784] p 2989 N94-27833

FORMAT
PDEF: A standard file format for data interchange
[AD-A274694] p 3098 N94-26451

FORTRAN
An algorithm to find the intersection of two convex polygons
[AD-A274722] p 2961 N94-26148
Red's natural editor: A program designed to edit FORTRAN programs
[DE94-003271] p 2962 N94-26318
Programming in Fortran M
[DE94-002756] p 2963 N94-26407
New FORTRAN computer programs to acquire and process isotopic mass spectrometric data: Operator's manual
[DE94-003174] p 2965 N94-26784
Ma42: A new frontal code for solving sparse unsymmetric systems
[PB94-124302] p 2998 N94-27115

FOSSIL FUELS
Implications of policies and prevent climate change for future food security
[DE93-018872] p 2866 N94-25948

FOSSILS
The biostratigraphy and paleogeography of Maastrichtian inoceramids p 2889 N94-28303
An evaluation of criteria that may be used to identify species surviving a mass extinction
p 2889 N94-28304

FOUR BODY PROBLEM
Study of the critical points at infinity arising from the failure of the Palais-smale condition for n-body type problems
[DE94-603656] p 3000 N94-27818

FOURIER TRANSFORMATION
High resolution fourier transform absorption spectrum of 79Br2 B3 Pi(Ou+) X1 sigma g+
[AD-A273864] p 2956 N94-25610
Dimensional crossover from non-renormalizability to renormalizability
[DE93-613052] p 3006 N94-26193
ARM Fourier transform spectrometer data analysis tools
[DE94-000865] p 2895 N94-26697
Advances in passive-remote and extractive Fourier transform infrared spectroscopic systems
[DE94-001424] p 2868 N94-26952
Estimates for cone multipliers
[PB94-124385] p 2997 N94-26995
Role of anticausal inverses in multirate filter-banks. Part 1: System theoretic fundamentals
[AD-A274279] p 2997 N94-27015
Radial basis function approximation: From gridded centers to scattered centers
[AD-A274184] p 2998 N94-27103

FOVEA
An algorithm for stereo correspondence problems on the analogy of human vision
[NAL-TR-1185] p 2940 N94-27584

FRACTALS
Probabilistic methods for image generation and encoding
[AD-A274294] p 2964 N94-26682
Center for nonlinear phenomena and magnetic materials
[AD-A274176] p 3009 N94-27126
Fractals and their applications to remote sensing and digital mapping
[ISBN-0-315-59469-1] p 2852 N94-27870

FRACTIONATION
Seasonal snow of arctic Alaska R4D investigations
[DE93-040082] p 2892 N94-25939

FRACTOGRAPHY
Grain by grain study of the mechanisms of crack propagation during iodine SCC of Zry-4
[DE93-633765] p 2734 N94-26162

FRACTURE MECHANICS
FR/GE/UK/US International Test Operations Procedure (ITOP) 1-1-050 development of laboratory vibration test schedules
[AD-A273887] p 2836 N94-25732
Investigation of compressive behavior for metal matrix composites with a circular hole
[AD-A273835] p 2705 N94-25739
Determination of fracture stress and effective crack tip radius from toughness (Klc) and yield strength (Y)
[AD-A274014] p 2836 N94-25754
An investigation of cavitation in a mechanically alloyed 15 volume percent SiCp/IN9021 aluminum composite
[DE94-003371] p 2748 N94-25959
Fracture behavior of 20% Nb particulate reinforced alumina composite
[DE94-002830] p 2706 N94-26019
The fracture behavior of a CVD crystalline Si3N4/amorphous Si3N4 composite
[DE94-002646] p 2750 N94-26124
Damage tolerance assessment handbook. Volume 1: Introduction fracture mechanics fatigue crack propagation
[AD-A274777] p 2836 N94-26186
Results from a fracture mechanical serial investigation of breechrings on the M109A3GN howitzer
[FFI-93/8002] p 2837 N94-26233
Guidelines for controlling stress corrosion cracking and corrosion fatigue of stainless steels: A literature review
[VTT-TIED-1420] p 2837 N94-26262
Fracture Toughness Round Robin Test International in pressure tube materials
[DE93-634140] p 2837 N94-26265
Bimaterial interfaces and their role in the mechanical performance of the in-situ composites
[AD-A274688] p 2707 N94-26447
Stress analysis of a secondary-bending specimen
[AD-A274842] p 2838 N94-26501
Computer modelling of cyclic deformation of high-temperature materials
[AD-A274504] p 2840 N94-27034
Interface phenomena in metal-ceramic composites
[AD-A274167] p 2709 N94-27125
Numerical Analysis Methods of Surface Cracks
[VTT-PUBS-119] p 2841 N94-27186
Quality assurance for fracture mechanical finite element analyses (appendix 3/1) p 2841 N94-27189
Crack closure, a literature study
[PB94-123361] p 2842 N94-27197
Implementation of thermal residual stresses in the analysis of fiber bridged matrix crack growth in titanium matrix composites
[NASA-TM-109082] p 2711 N94-27658
The development of stress intensity factors
[DRA-TR-93057] p 2845 N94-27954
Studies in ice mechanics
[PB94-133055] p 2900 N94-28393

FRACTURE STRENGTH

Structure and properties of intermetallic composites synthesized in situ using solid state displacement reactions
[DE94-004312] p 2705 N94-25805

Numerical simulations of interfacial debonding in ductile-phase reinforced intermetallic matrix composites
[DE94-003639] p 2706 N94-25938

Effect of loading mode on the fracture toughness of a reduced activation ferritic/martensitic stainless steel
[DE94-004290] p 2732 N94-25987

Fracture behavior of 20% Nb particulate reinforced alumina composite
[DE94-002830] p 2706 N94-26019

The fracture behavior of a CVD crystalline Si3N4/amorphous Si3N4 composite
[DE94-002646] p 2750 N94-26124

Fracture Toughness Round Robin Test International in pressure tube materials
[DE93-634140] p 2837 N94-26265

Experimental determination of the CU-IN-PB ternary phase diagram
[DE94-003765] p 2735 N94-26349

Damage tolerance assessment handbook. Volume 2: Aircraft damage tolerance evaluation
[AD-A274778] p 2837 N94-26357

Mechanism of mechanical fatigue of silica glass
[DE94-003165] p 2753 N94-26783

Titanium 1992: Science and Technology, volume 1
[AD-A274798-VOL-1] p 2739 N94-26799

Evaluation of crack arrest fracture toughness of parent plate, weld metal and heat affected zone of BIS 812 EMA ship plate steel
[AD-A274871] p 2839 N94-26859

Processing and mechanical properties of laminated metal composites of Al 6090-25 volume percent SiC(sub p) and Al 5182
[DE94-001070] p 2708 N94-26930

Development of fibre-metal laminates, ARALL and GLARE, new fatigue resistant materials
[PB94-126471] p 2669 N94-26969

Aluminum alloy 8090-T8771 thick plate material characterization
[AD-A274146] p 2987 N94-27077

Examination of hardness, fracture toughness and microstructure in Al2O3-B4C binary ceramics
[PB94-124237] p 2755 N94-27158

SP/MSP tests for the evaluation of FGM
[NAL-SP-17] p 2710 N94-27279

SP/MSP tests for the evaluation of FGM
p 2710 N94-27280

Research on the development of fracture characteristics evaluation system for ceramics and metal composite materials p 2710 N94-27281

Fatigue resistance of unnotched and post impact(+/-30 deg/0 deg) 3-D braided composites
[NASA-CR-191590] p 2711 N94-27433

Cryogenic fracture behavior of 316LN in magnetic fields up to 14.6 T
[DE94-005215] p 2742 N94-27694

Fracture toughness and crack resistance of damage tolerant and high strength Al-Li alloys
[NLR-TP-91249-U] p 2743 N94-27795

Status and prospects for aluminium-lithium alloys in aircraft structures
[NLR-TP-92193-U] p 2743 N94-27797

FRACTURES (MATERIALS)

A review of carbide fuel corrosion for nuclear thermal propulsion applications
[DE94-003938] p 2699 N94-25613

Characterization of fatigue damage in a metal matrix composite (SCS-6/Ti-15-3) at elevated temperature
[AD-A273797] p 2706 N94-25876

FRACTURING

Structural analysis of a frangible nut used on the NASA Space Shuttle
[DE94-003672] p 2821 N94-25811

General Motors Corporation and Pacific Northwest Laboratory staff exchange: Inspection of case hardened steels and metal-matrix composites
[DE94-003470] p 2706 N94-25982

Damage tolerance assessment handbook. Volume 1: Introduction fracture mechanics fatigue crack propagation
[AD-A274777] p 2836 N94-26186

FRAGMENTATION

Fragmentation of Ge(1-x) Sn(x) Se2 glasses
[DE94-603009] p 2758 N94-27837

FRANCE

Present situation of the development of petroleum substitution energy (France)
[DE94-725201] p 2760 N94-26914

FREE ELECTRON LASERS

The proceedings of the KEK FEL Simulation Code Workshop
[DE93-520378] p 2816 N94-26112

Laboratory plasma studies
[AD-A274655] p 3043 N94-26356

Practical design of resonant cavity for a RF free electron laser
[AD-A274306] p 2819 N94-26941

System for conditioning an electron beam for improved free-electron laser operation
[AD-D016054] p 2820 N94-27671

FREE ENERGY

Zinc(2) oxide stability in alkaline sodium phosphate solutions at elevated temperatures
[DE94-003316] p 2715 N94-26320

Phase stability in the Cd-Mg system
[DE94-004976] p 2743 N94-27792

FREE FLIGHT

Experiments on interaction force of jets in hypervelocity cross-flow in a shock tunnel p 2659 N94-28022

FREE FLOW

The measurement of disturbance levels in the Langley Research Center 20-inch Mach 6 tunnel
[NASA-CR-4571] p 2646 N94-26548

Comparison of the interactions of two and three dimensional transverse jets with a hypersonic free stream p 2659 N94-28021

A numerical investigation of a subsonic jet in a crossflow p 2803 N94-28023

Effects of free-stream turbulence on a jet in a cross flow p 2805 N94-28036

FREE JETS

Calculation of single and multiple jets in cross-flow with and without impingement using Reynolds-stress-transport closure p 2803 N94-28024

FREE VIBRATION

The free vibration of plates, shallow shells and solids
[ISBN-0-315-83931-7] p 2838 N94-26622

Finite element analysis of damped vibrations of laminated composite plates
[ISBN-0-315-84928-2] p 2843 N94-27585

FREEZING

Modelling the mass migration phenomena in partially frozen heat pipes
[DE94-002716] p 2797 N94-27709

FREIGHTERS

Integrators: A challenge for air cargo
p 2662 N94-28244

FREON

Freon recovery from nitrogen tetroxide and freon solutions
[PL-TR-92-3051] p 2721 N94-28215

FREQUENCIES

Instantaneous amplitude and frequency dynamics of coherent wave mixing in semiconductor quantum wells
[DE94-003262] p 3054 N94-26128

FREQUENCY CONTROL

Broad band tunable dye laser development
[DE93-632978] p 2816 N94-26157

FREQUENCY CONVERTERS

Three-wave nonlinear interactions in KTiOPO4 (KTP) and KTP isomorphs
[AD-A274079] p 3052 N94-25993

A study of DC-DC converters with MCT's for arcjet power supplies
[NASA-CR-191204] p 2703 N94-27662

FREQUENCY DISTRIBUTION

Aviation Epidemiology Data Register: Indexing the AEDR document laser optic archive
[AD-A274185] p 2911 N94-27097

FREQUENCY DIVISION MULTIPLE ACCESS

Design and test of a regenerative satellite transmultiplexer
[ISBN-0-315-85280-1] p 2786 N94-27303

FREQUENCY HOPPING

Methods for improving low-angle, low-altitude radar tracking accuracy
[AD-A274914] p 2768 N94-26347

Analysis of linear combining and its application to frequency-hopped signals
[ISBN-0-315-84007-2] p 2770 N94-26624

The performance of nonorthogonal noncoherent frequency hopped M-ary FSK in additive white Gaussian noise, fading and jamming
[ISBN-0-315-85243-7] p 2775 N94-27301

FREQUENCY MODULATION

Direct-conversion-to-baseband for a nonlinear FM signal
[AD-A274861] p 2768 N94-26189

Excitation of Earth-ionosphere waveguide in the ELF and lower VLF bands by modulated ionospheric current
[AD-A274969] p 2878 N94-26304

An analysis of FM jamming and noise quality measures
[AD-A274349] p 2772 N94-26924

Parametric time-scale methods in signal analysis
[AD-A274212] p 2773 N94-27068

FREQUENCY RANGES

Microtubules for nonlinear optical limiting
[AD-A273940] p 3035 N94-25941

Investigation of plasma instabilities in the polar cusp
[NASA-CR-195212] p 2879 N94-26599

Parameter estimation of linear systems from frequency response measurements (computer program)
[ESDU-93016] p 2976 N94-28137

FREQUENCY SHIFT

Technical report of ISSP. Ser. A, no. 2682: Pressure dependence of Sm:YAG fluorescence to 50 GPa: A new calibration as a high pressure scale
[JTN-94-80568] p 3066 N94-27354

FREQUENCY SHIFT KEYING

Laser-based communication link
[FFI-93/7023] p 2817 N94-26203

Analysis of linear combining and its application to frequency-hopped signals
[ISBN-0-315-84007-2] p 2770 N94-26624

The performance of nonorthogonal noncoherent frequency hopped M-ary FSK in additive white Gaussian noise, fading and jamming
[ISBN-0-315-85243-7] p 2775 N94-27301

FREQUENCY STANDARDS

Diode-laser-pumped, gas-cell atomic clocks
[AD-A274812] p 3008 N94-26484

FRESH WATER

Conversion of the CLUSE model for applications over open ocean
[AD-A273750] p 2893 N94-26013

FRESNEL INTEGRALS

An approximate solution for the spinup dynamics of near axisymmetric axial gyrostats using the method of multiple scales
[AD-A273723] p 2698 N94-26223

FRETTING CORROSION

Study on improvements in fretting fatigue characteristics of high strength structural member p 2726 N94-25567

FRICTION

Cracking of textured zinc coating during forming process
[DE94-003414] p 2750 N94-26085

FRICTION FACTOR

Experimental analysis of heat transfer characteristics and pressure drop through screen regenerative heat exchangers
[AD-A273902] p 2790 N94-25657

Validated heat-transfer and pressure-drop prediction methods based on the discrete-element method. Phase 2: Two-dimensional rib roughness
[DE94-002379] p 2794 N94-26763

FRONTS (METEOROLOGY)

Mesoscale frontal evolution of the ERICA IOP-5A Cyclone
[AD-A274906] p 2893 N94-26183

Machine intelligent gust front algorithm
[AD-A273695] p 2680 N94-26196

FROUDE NUMBER

E. H. P. estimation of high speed fishing boats by some existing methods p 2764 N94-27978

FRUSTRATION

Ising critical behaviour in the one-dimensional frustrated quantum XY model
[DE93-634755] p 3057 N94-26390

FUEL CELLS

Alternative materials for solid oxide fuel cells: Processing and interactions of materials
[DE94-000016] p 2855 N94-26114

Oxygen reduction at a YSZ interface with cathode materials La(1-x)(Ca or Sr)(x)MnO3(1-x)CaMnO3
[DE94-002954] p 3054 N94-26147

Design of gasifiers to optimize fuel cell systems
[DE94-000010] p 2856 N94-26581

Research and development of alternative components at Argonne National Laboratory for Molten Carbonate Fuel Cells
[DE94-000014] p 2857 N94-26583

Sealant research for solid oxide fuel cells
[DE94-000015] p 2857 N94-26584

Processing of LaCrO3 for solid oxide fuel cell applications
[DE94-002981] p 2857 N94-26747

Low cost, radial flow, solid oxide fuel cell
[DE94-002982] p 2858 N94-26785

MSOFC development status
[DE94-003192] p 2858 N94-26792

High temperature solid oxide fuel cell: Customer test units
[DE94-002961] p 2858 N94-26869

High temperature solid oxide fuel development activities
[DE94-002973] p 2858 N94-26871

Perovskite solid electrolytes for SOFC
[DE94-001923] p 2859 N94-27005

FUEL COMBUSTION

NASA Lewis Research Center lean-, rich-burn materials test burner rig
[NASA-CR-194437] p 2680 N94-26141

Theoretical determination of chemical rate constants using novel time-dependent methods
[NASA-CR-195221] p 2714 N94-26205

An apparatus for measurement of ignition and burning characteristics of metallic particles
[AD-A274815] p 2716 N94-26487

Laser probes of natural gas ignition chemistry
[PB94-128345] p 2717 N94-27226

Basic research on natural gas combustion phenomena
[PB94-129046] p 2717 N94-27256

Broad specification fuels combustion technology program, phase 2
[NASA-CR-191066] p 2719 N94-27854

Gas turbine combustion and emission control
p 2831 N94-28082

FUEL CONSUMPTION

Optimising BMW four-cylinder two-valve engines
[PB94-125101] p 2824 N94-27254

Development of advanced high temperature in-cylinder components and tribological systems for low heat rejection diesel engines, phase 1
[NASA-CR-187158] p 2827 N94-27984

FUEL CORROSION

A review of carbide fuel corrosion for nuclear thermal propulsion applications
[DE94-003938] p 2699 N94-25613

FUEL FLOW

STS-51 pad abort. OV103-engine 2033 (ME-2) fuel flowmeter sensor open circuit
[NASA-CR-193924] p 2701 N94-26230

FUEL INJECTION

Focused Schlieren flow visualization studies of multiple venturi fuel injectors in a high pressure combustor
[NASA-TM-106479] p 2674 N94-26573

Application of railgun principle to high-velocity hydrogen pellet injection for magnetic fusion reactor fueling
[DE94-004411] p 3044 N94-26579

Sequential multi-point injection of a natural gas engine. Topical report, November 1991 - April 1992
[PB94-126794] p 2824 N94-27224

Inertial electrostatic confinement as a power source for electric propulsion p 2688 N94-27373

A numerical study of mixing and combustion in hypervelocity flows through a scramjet combustor model
p 2808 N94-27911

Recent developments in the simulation of steady and transient transverse jet interactions for missile, rotorcraft, and propulsive applications p 2804 N94-28030

FUEL PUMPS

Test results of the RS-44 integrated component evaluator liquid oxygen/hydrogen rocket engine
[NASA-CR-194443] p 2701 N94-26231

FUEL SPRAYS

An apparatus for measurement of ignition and burning characteristics of metallic particles
[AD-A274815] p 2716 N94-26487

FUEL SYSTEMS

Design of a refueling tanker delivering liquid hydrogen
p 2671 N94-25717

Sequential multi-point injection of a natural gas engine. Topical report, November 1991 - April 1992
[PB94-126794] p 2824 N94-27224

FUEL TANKS

Automated in-situ inspection systems for underground storage tanks
[AD-A274644] p 2764 N94-27144

FUEL TESTS

Space-R thermionic space nuclear power system design and technology demonstration
[DE94-002017] p 2700 N94-25930

FUEL-AIR RATIO

Focused Schlieren flow visualization studies of multiple venturi fuel injectors in a high pressure combustor
[NASA-TM-106479] p 2674 N94-26573

FULLERENES

Strongly interacting fermion systems
[DE94-002674] p 3021 N94-26677

Disintegration of (C60) by Xe ion irradiation
[DE94-601913] p 3023 N94-26929

Experimental investigations of strong interaction in the non-perturbative QCD region
[DE94-001178] p 3024 N94-26949

Fullerene fabrication using an arc furnace. Characterization of the product
[DE94-603006] p 3029 N94-27834

FUNCTION GENERATORS

Fast generator of program waveforms signals
[DE93-634230] p 2948 N94-26381

FUNCTIONAL ANALYSIS

Estimation and tests-of-fit for the three parameter Weibull distribution
[AD-A274827] p 3004 N94-26496

FUNCTIONAL DESIGN SPECIFICATIONS

The Enabler: A concept for a lunar work vehicle
p 2833 N94-25675

Pre-orbital criticality safety for the NEPSTP mission
[DE94-002600] p 3005 N94-26802

Automated information management for designers: Functional requirements for computer based associates that support access and use of technical information in design
[AD-A274603] p 3099 N94-26891

Planetary Instrument Definition and Development Program (PIDDP). Instrument for future planetary flight missions: A visible-infrared imaging spectrometer for planetary missions
[NASA-CR-195254] p 3106 N94-27409

FUNCTIONAL INTEGRATION

Second-order phase transition in (g(phi)4)2 theory
[DE94-603677] p 3067 N94-27638

FUNCTIONALLY GRADIENT MATERIALS

SP/MSP tests for the evaluation of FGM
p 2710 N94-27280

FUNCTIONALS

Fast vertex search (in plane)
[DE93-616655] p 2959 N94-25917

Limit theorems for functionals of Markov processes and renormalizable stable fields
[AD-A274645] p 3004 N94-27106

FUNCTIONS (MATHEMATICS)

Repeated knots in least squares multiquadric functions
[AD-A273866] p 2990 N94-25594

Conditionally exponential convex functions on locally compact groups
[DE93-613025] p 2990 N94-25865

The railway track response function
[REPT-93-40] p 2837 N94-26214

Estimation and tests-of-fit for the three parameter Weibull distribution
[AD-A274827] p 3004 N94-26496

FUSELAGES

Low-speed pressure distribution measurements over the aft-fuselage, fins, and stabilators of a 1/9th scale F/A-18 wind-tunnel model
[AD-A274870] p 2644 N94-26342

Development and evaluation of a near infrared reflecting and low visibility paint scheme for RAAF P-3C Orion aircraft
[AD-A274881] p 2669 N94-26864

Design and test of postbuckled stiffened curved plates: A literature survey
[PB94-126521] p 2840 N94-26961

Development of fibre-metal laminates, ARALL and GLARE, new fatigue resistant materials
[PB94-126471] p 2669 N94-26969

Impact tests on fibre metal laminates under a tensile load
[PB94-126570] p 2710 N94-27201

Calculation of unsteady incompressible inviscid flow about wings and bodies using CANAERO-T panel model
p 2655 N94-28334

FUSION (MELTING)

Basic research on levitation fusing/solidification technology p 2723 N94-25552

FUSION REACTORS

Experimental and numerical investigation of shock wave propagation through complex geometry, gas continuous, two-phase media
[DE94-001408] p 2791 N94-26121

A robust helium-cooled shield/blanket design for ITER
[DE94-003402] p 3043 N94-26323

Limitations of power conversion systems under transient loads and impact on the pulsed tokamak power reactor
[DE94-003404] p 3043 N94-26324

Application of railgun principle to high-velocity hydrogen pellet injection for magnetic fusion reactor fueling
[DE94-004411] p 3044 N94-26579

Fusion reactor systems studies
[DE94-003162] p 3046 N94-27686

FUSION WELDING

Study on interfacial reaction analysis at interfacial joining p 2728 N94-25574

Joining of fibre reinforced metal matrix composite materials
[PB94-132453] p 2712 N94-28376

FUZZY SETS

Fuzzy robust statistics for application to the fuzzy c-means clustering algorithm
[AD-A274719] p 3003 N94-26436

Ranking alternatives using fuzzy numbers: A computational approach short communication
[INPE-5483-PRE/1782] p 2974 N94-27835

FUZZY SYSTEMS

Vulnerability assessment using a fuzzy logic based method
[AD-A274075] p 2957 N94-25649

Investigation into model-based fuzzy logic control
[AD-A274660] p 2985 N94-26336

Designing and optimizing fuzzy-logic controllers
[ISBN-0-315-83505-2] p 2985 N94-26660

Sensor-based navigation of a mobile robot using automatically constructed fuzzy rules
[DE94-001137] p 2986 N94-26948

G

GADOLINIUM

Measurement of metastable population distribution in gadolinium atomic beam by laser resonance photoionization method
[DE94-701194] p 3029 N94-27820

GALACTIC COSMIC RAYS

Stopping powers and cross sections due to two-photon processes in relativistic nucleus-nucleus collisions
[NASA-CR-4574] p 3033 N94-27646

GALACTIC RADIO WAVES

Development of imaging riometers
p 2884 N94-27967

Quick-look system of auroral absorption images by imaging riometer p 2884 N94-27968

GALACTIC ROTATION

Modulating terrestrial impacts from Oort cloud comets by the adiabatically changing galactic tides
p 2890 N94-28305

GALACTIC STRUCTURE

The meaning of EROS/MACHO
[DE94-003003] p 3104 N94-26311

GALAXIES

The meaning of EROS/MACHO
[DE94-003003] p 3104 N94-26311

Sloan Digital Sky Survey
[DE94-004662] p 3103 N94-27750

Modulating terrestrial impacts from Oort cloud comets by the adiabatically changing galactic tides
p 2890 N94-28305

GALERKIN METHOD

Numeric solution of the electric field integral equation using Galerkin's method for axially symmetric cases
[ESA-TT-1264] p 2768 N94-26315

The nonlinear Galerkin method: A multi-scale method applied to the simulation of homogeneous turbulent flows
[NASA-CR-191581] p 2792 N94-26499

Center for nonlinear phenomena and magnetic materials
[AD-A274176] p 3009 N94-27126

GALLIUM ALLOYS

Study of the hyperfine magnetic field at Ta-181 site in the Heusler Co2ScSn, Co2ScGa, and Co2HfSn alloys
[DE94-603989] p 3067 N94-27623

GALLIUM ARSENIDE LASERS

Failure mechanisms of high temperature semiconductor lasers
[AD-A273833] p 2815 N94-25616

GALLIUM ARSENIDES

Failure mechanisms of high temperature semiconductor lasers
[AD-A273833] p 2815 N94-25616

Electric-field dependence of electroreflectance and photocurrent spectra at visible wavelengths in MOVPE-grown InAlGaP multiple strained quantum-well structures
[DE94-004692] p 2780 N94-25664

Modeling electromagnetic effects in MMICs for T/R modules
[AD-A273808] p 2766 N94-25736

Biexciton formation by two-photon absorption in quantum wells
[DE93-613551] p 3071 N94-25852

Investigation of plasma etch induced damage in compound semiconductor devices
[DE94-002849] p 3052 N94-25989

The state of the art of thin-film photovoltaics
[DE94-000224] p 2855 N94-26115

Instantaneous amplitude and frequency dynamics of coherent wave mixing in semiconductor quantum wells
[DE94-003262] p 3054 N94-26128

Test methods and custom hardware for functional testing of a high speed GaAs DRAM
[AD-A274859] p 2781 N94-26175

Ordering and phase separation in MOCVD InGaP alloys and unicompositional quantum wells
[DE94-004693] p 3056 N94-26352

Exploration of GaAs structures for solid-state detectors
[DE93-634191] p 3056 N94-26379

On the electron mobility in slightly compensated heavily doped gallium arsenide at low temperatures
[DE93-634712] p 3057 N94-26387

Development of GaAs charge-coupled devices
[ISBN-0-315-84116-8] p 3059 N94-26703

Mechanistic studies of opto-electronic materials and syntheses using multiple laser and surface diagnostics [AD-A274528] p 3036 N94-26834

AB-Initio calculation of the valence-band offset at strained GaAs/InAs (001) heterojunction [DE94-602538] p 3061 N94-26878

Polar optical oscillation modes in GaAs-based double heterostructures: Long wavelength limit [DE94-601874] p 3062 N94-26897

High-efficiency, thin-film solar cells [DE94-000250] p 2860 N94-27625

Characterization of semi-insulating gallium arsenide [AD-A273781] p 3068 N94-27704

Dry etching process development for submicron and nanometer semiconductor devices [PB94-133196] p 2788 N94-28357

GALLIUM NITRIDES

Nitride semiconductors for ultraviolet detection [AD-A274246] p 3060 N94-26840

Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device development [AD-A274247] p 3061 N94-26841

The growth and characterization of GaN as a photodetector [AD-A274570] p 3063 N94-26965

GALLIUM PHOSPHIDES

Electric-field dependence of electroreflectance and photocurrent spectra at visible wavelengths in MOVPE-grown InAlGaP multiple strained quantum-well structures [DE94-004692] p 2780 N94-25664

Electrical properties of p-type GaInP2 [AD-A273771] p 3051 N94-25856

Ordering and phase separation in MOCVD InGaP alloys and unicompositional quantum wells [DE94-004693] p 3056 N94-26352

High-efficiency, thin-film solar cells [DE94-000250] p 2860 N94-27625

GALLIUM SELENIDES

Crystal chemistry and self-lubricating properties of monochalcogenides gallium selenide and tin selenide [DE93-041177] p 2751 N94-26422

GAME THEORY

Communication complexity of t-intersection problems in generalized Boolean algebras [PB94-126646] p 2996 N94-26917

Intertemporal bargaining and dynamic consistency [PB94-133147] p 3095 N94-28386

GAMMA FUNCTION

How to build analogues of the Bessel-Clifford expansions for the sum of the repulsive Coulomb potential and central potential decreasing more rapidly than the centrifugal one? [DE93-634308] p 3007 N94-26472

GAMMA RAY ASTRONOMY

TEV emission from close binaries [DE93-634330] p 3104 N94-26268

A simple satellite system to locate gamma ray bursters using scintillating fiber technology [DE94-601287] p 3117 N94-27996

GAMMA RAY BURSTS

BATSE Data Analysis [NASA-CR-195545] p 3114 N94-26685

The continuum spectral characteristics of gamma ray bursts observed by BATSE p 3114 N94-26686

Continuum spectral characteristics of bursts measured with BATSE large area detectors p 3114 N94-26687

A study of gamma ray burst continuum properties presnting evidence for two spectral states in bursts p 3114 N94-26688

Channel to energy calibration results for the BATSE large area detectors p 3115 N94-26690

Compton Gamma Ray Observatory/BATSE observations of energetic electrons scattered by cyclotron resonance with waves from powerful VLF transmitters [NASA-CR-195240] p 3115 N94-26790

BATSE burst location accuracy and constraints on the fraction of repeating GRB sources [DE94-004981] p 3116 N94-27714

DMSP satellites as gamma ray burst detectors [DE94-004977] p 3116 N94-27793

Gamma ray bursts from the accretion of solid bodies onto high-velocity Galactic neutron stars [DE94-005006] p 3117 N94-27827

A simple satellite system to locate gamma ray bursters using scintillating fiber technology [DE94-601287] p 3117 N94-27996

GAMMA RAY OBSERVATORY

Compton Gamma Ray Observatory/BATSE observations of energetic electrons scattered by cyclotron resonance with waves from powerful VLF transmitters [NASA-CR-195240] p 3115 N94-26790

GAMMA RAY SPECTRA

Proceedings of the Second EGS4 User's Meeting in Japan [DE93-520383] p 3032 N94-26543

Channel to energy calibration results for the BATSE large area detectors p 3115 N94-26690

GAMMA RAY SPECTROMETERS

DMSP satellites as gamma ray burst detectors [DE94-004977] p 3116 N94-27793

GAMMA RAY TELESCOPES

Gamma Large Area Silicon Telescope (GLAST): Applying silicon strip detector technology to the detection of gamma rays in space [DE94-003451] p 3116 N94-27740

GAMMA RAYS

Penetrating nature of very collimated high-energy shower-clusters of hadrons and gamma rays p 3113 N94-25631

Hardware design of a spherical mini-rover p 2833 N94-25669

TEV emission from close binaries [DE93-634330] p 3104 N94-26268

Exploration of GaAs structures for solid-state detectors [DE93-634191] p 3056 N94-26379

Studies on the application of radiation for genetic transformation in higher plants [DE93-632656] p 2901 N94-26470

Annals of the Research Inst. of Environmental Medicine, Nagoya Univ., volume 44 [REPT-44-VOL-44] p 2911 N94-27442

Advances in gamma ray field instrumentation at Los Alamos [DE93-040264] p 2813 N94-27624

Study of invisible nucleon decay, N approaches nu nu nu bar, and a forbidden nuclear transition in the Kamiokande detector [ICRR-299-93-11] p 3028 N94-27759

Radiations from hot nuclei p 3030 N94-27915

GANGLIA

Effects of capsaicin on freshly dissociated rat dorsal root ganglion cells p 2906 N94-27499

Size distribution of retrogradely labeled dorsal root ganglion cells: Test of normality p 2906 N94-27500

GANTRY CRANES

Performance measures from the explorer platform berthing experiment p 2683 N94-26283

GAS ANALYSIS

Study on development of chemical measurement method utilizing plasmas p 2728 N94-25576

Package integrity measurement technology and quality assurance [AD-A273881] p 2834 N94-25727

SP industry calorimeter for rate of heat release measurements up to 10MW [PB94-124211] p 2811 N94-27044

Experiments on interaction force of jets in hypervelocity cross-flow in a shock tunnel p 2659 N94-28022

GAS BEARINGS

Researches of the Electrotechnical Laboratory. No. 52: Studies of externally pressurized porous gas bearings [JTN-94-80549] p 2825 N94-27351

GAS CHROMATOGRAPHY

Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparison and verification of methods [DE94-003664] p 2749 N94-26007

Determination of lead isotope ratios in seawater by purge and trap GC/MS after ethylation p 2870 N94-28152

GAS COMPOSITION

Evaluation of a concentration probe for application in a supersonic flow field [AD-A273915] p 2643 N94-25592

The study of single-pass GMA welds with different cover gas compositions on HSLA-100 steel [AD-A274857] p 2822 N94-26174

GAS COOLED REACTORS

Limitations of power conversion systems under transient loads and impact on the pulsed tokamak power reactor [DE94-003404] p 3043 N94-26324

GAS COOLING

Evaluation of helium cooling for fusion divertors [DE94-002680] p 3042 N94-25976

A robust helium-cooled shield/blanket design for ITER [DE94-003402] p 3043 N94-26323

GAS DENSITY

Gaseous hydrogen/oxygen injector performance characterization [NASA-CR-194464] p 2701 N94-26208

Mix induced by single shock passage through a material interface [DE93-019505] p 2792 N94-26427

Refractive and dielectric properties of helium, argon and nitrogen gases [PB94-123783] p 3008 N94-26851

Condensation inside tubes: Computer program for pressure drop in straight tubes (horizontal and vertical with downflow) [ESDU-93014] p 2806 N94-28064

GAS DETECTORS

Development of SO(x) and NO(x) solid electrolyte sensors p 2725 N94-25562

Automated system for gas detectors providing with binary mixtures [DE93-634192] p 2715 N94-26406

GAS DISCHARGE TUBES

Optimum for the gasdynamic system in a fast-axial-flow CO2 laser [AD-A274305] p 2819 N94-26940

GAS DISCHARGES

Study on development of chemical measurement method utilizing plasmas p 2728 N94-25576

Buckyball microwave plasmas: Fragmentation and diamond-film growth [DE94-003209] p 3053 N94-26031

GAS DYNAMICS

Optimum for the gasdynamic system in a fast-axial-flow CO2 laser [AD-A274305] p 2819 N94-26940

Research in pulsed power plasma physics [AD-A274323] p 3045 N94-27074

A second-order shock-adaptive Godunov scheme based on the generalized Lagrangian formulation [ISBN-0-315-84549-X] p 2795 N94-27307

TVD flux-difference split methods for high-speed thermochemical nonequilibrium flows with strong shocks [UTIAS-350] p 2799 N94-27880

Nonequilibrium radiation and chemistry models for aerocapture vehicle flowfields [NASA-CR-195706] p 2648 N94-28071

High-performance parallel analysis of coupled problems for aircraft propulsion [NASA-CR-195292] p 2845 N94-28181

The kinetics and dynamics of the coma of Halley's comet [NASA-CR-194828] p 3105 N94-28184

GAS FLOW

Computation of non-isentropic internal flows with variable density [AD-A274848] p 2794 N94-26801

Performance model of a recirculating stack nickel hydrogen cell p 2861 N94-28112

High-performance parallel analysis of coupled problems for aircraft propulsion [NASA-CR-195292] p 2845 N94-28181

GAS INJECTION

Development of fusion technology [DE93-633444] p 3042 N94-26159

Flowing DPF design for propulsion experiments [AD-A274973] p 2701 N94-26537

Sequential multi-point injection of a natural gas engine. Topical report, November 1991 - April 1992 [PB94-126794] p 2824 N94-27224

Numerical investigation of thrust vectoring by injection of secondary air into nozzle flows p 2801 N94-28013

GAS IONIZATION

Study on development of chemical measurement method utilizing plasmas p 2728 N94-25576

Stationary plasma thruster plume emissions [NASA-CR-194471] p 2701 N94-26209

Hadron gas ionization calorimeters [DE93-634186] p 2810 N94-26397

GAS JETS

The growth and characterization of GaN as a photodetector [AD-A274570] p 3063 N94-26965

Scalar mixing in the subsonic jet in crossflow p 2800 N94-28008

A numerical investigation of a subsonic jet in a crossflow p 2803 N94-28023

Navier-Stokes simulation of two and three dimensional jets in crossflow, effects of grid, and boundary conditions p 2804 N94-28026

GAS MIXTURES

Automated system for gas detectors providing with binary mixtures [DE93-634192] p 2715 N94-26406

Numerical simulation of the reignition of detonation by reflected shocks [AD-A274755] p 2795 N94-27252

TVD flux-difference split methods for high-speed thermochemical nonequilibrium flows with strong shocks [UTIAS-350] p 2799 N94-27880

GAS STREAMS

Comparison of the interactions of two and three dimensional transverse jets with a hypersonic free stream p 2659 N94-28021

GAS TEMPERATURE

SP industry calorimeter for rate of heat release measurements up to 10MW [PB94-124211] p 2811 N94-27044

GAS TUNGSTEN ARC WELDING
Corrosion resistance at welded zones of nuclear fuel reprocessing system p 2722 N94-25546
The influence of TIG welding thermal cycles on HSLA-100 steel plate
[AD-A274248] p 2740 N94-27009
Weldability aspects in the design and fabrication of aluminium structures subjected to fatigue loads. Part 2: Weldability of aluminium alloys using advanced MIG and TIG techniques. Effect of the weld bead geometrical factors on the fatigue behavior of the welded joint
[PB94-132446] p 2833 N94-28375

GAS TURBINE ENGINES
Gas Turbine Engine Transient Behaviour
[VKI-LS-1993-06] p 2828 N94-28043
Gas-turbine engine steady-state behavior p 2828 N94-28044
Transient performance p 2828 N94-28045
Compressor stability p 2828 N94-28046
Engine simulation technology p 2829 N94-28051
Transient engine simulation p 2829 N94-28052
Nonlinear solvers p 2829 N94-28053
Engine simulation systems p 2829 N94-28054
A review of recent aeroelastic analysis methods for propulsion at NASA Lewis Research Center
[NASA-TP-3406] p 2846 N94-28227

GAS TURBINES
Computation of non-isentropic internal flows with variable density
[AD-A274848] p 2794 N94-26801
Pressure-gain combustion
[DE94-002975] p 2719 N94-27712
Gas fired advanced turbine system
[DE94-003193] p 2827 N94-27874
Combined Cycles for Power Plants
[VKI-LS-1993-08] p 2830 N94-28077
Introduction to combined cycles p 2789 N94-28078
Thermodynamics of combined cycle plant p 2831 N94-28079
Development of the gas turbine. Part 1: Design philosophy and performance p 2831 N94-28080
Development of the gas turbine. Part 2: Manufacturing, commissioning, and operation p 2831 N94-28081
Gas turbine combustion and emission control p 2831 N94-28082
Steam plant for combined cycles: Heat recovery steam generators, design principles, and construction details p 2831 N94-28083

GAS-GAS INTERACTIONS
Mix induced by single shock passage through a material interface
[DE93-019505] p 2792 N94-26427

GASEOUS FUELS
Gas turbine combustion and emission control p 2831 N94-28082

GASEOUS ROCKET PROPELLANTS
Hydrogen-oxygen torch ignitor
[NASA-TM-106493] p 2691 N94-27424

GASIFICATION
Feasibility study on introduction of the bio-fuel power generation in tropical regions
[DE94-725203] p 2858 N94-26838

GASOLINE
Numerical analysis of the photo-dissociation/radical oxidation of formaldehyde by ultraviolet light in a photolytic reactor
[AD-A274539] p 2868 N94-26843

GATES (CIRCUITS)
Low threshold all-optical crossbar switch on GaAs-GaAlAs channel waveguide arrays
[AD-A274971] p 2783 N94-26536
Partitioning structural VHDL circuits for parallel execution on hypercubes
[AD-A274390] p 2785 N94-26830

GAUGE INVARIANCE
CP violating form factors for three gauge boson vertex in the two Higgs doublet and left-right symmetric models
[DE94-601704] p 3014 N94-25841
Principles of gauge theory of real hadrons
[DE93-616857] p 3015 N94-25920
A dependence of exclusive vector meson production in muon-nucleus scattering
[DE94-003363] p 3016 N94-25957
Dynamical group of relativistic straight-line string
[DE93-634347] p 3072 N94-26037
Lepton masses in an SU(3)(sub L) x U(1)(sub N) gauge model
[DE93-634366] p 3016 N94-26040
Classical solutions of Yang-Mills-Chern-Simons theory in 2+1 dimensions: A quasi-linear superposition
[DE93-634335] p 3006 N94-26270
Differential regularization of a non-relativistic anyon model
[DE94-601558] p 3019 N94-26416
Gauge invariance and transport properties in superconductors above T(c)
[DE94-604013] p 3068 N94-27677

GAUGE THEORY
Principles of gauge theory of real hadrons
[DE93-613096] p 3013 N94-25835
Fermionic field theory and gauge interactions on random lattices
[DE94-601565] p 3051 N94-25885
Principles of gauge theory of real hadrons
[DE93-616857] p 3015 N94-25920
Dimensional crossover from non-renormalizability to renormalizability
[DE93-613052] p 3006 N94-26193
Vortices in curved spacetime
[DE94-601559] p 3072 N94-26417
Finite density effects in gauge theories
[ISBN-0-315-50637-7] p 3074 N94-27403
Quantum chromodynamics and nuclear physics at extreme energy density
[DE94-004418] p 3026 N94-27604
Relativistic two-body system in 1+1-dimensional QED. 1: On the circle S1
[DE94-603716] p 3067 N94-27647

GAUSSIAN ELIMINATION
A numerical determination of bifurcation points for low Reynolds number conical flows
[AD-A273984] p 2791 N94-25991
Ma42: A new frontal code for solving sparse unsymmetric systems
[PB94-124302] p 2998 N94-27115

GELATION
Double layer capacitance of carbon foam electrodes
[DE94-002651] p 2780 N94-25975
Stabilization of polyaniline solutions
[DE94-003958] p 2704 N94-27745

GENE EXPRESSION
The intracellular second messenger system in c-fos gene induction by ACTH p 2904 N94-27477
Cloning of rat RXR alpha cDNA and the expression of its mRNA in regenerating liver and primary cultured hepatocytes p 2905 N94-27479
Effect of sera from patients treated with long-term hemodialysis on mRNA's for collagenase, stromelysin, and tissue inhibitor of metalloprotease in cultured human synovial cells p 2920 N94-27481
Expression analysis of Thyroxine-Binding Globulin Complete Deficiency in Japanese (TBG-CDJ) p 2905 N94-27482

GENERAL AVIATION AIRCRAFT
A revolutionary approach to composite construction and flight management systems for small, general aviation airplanes p 2671 N94-25714
EGADS: A microcomputer program for estimating the aerodynamic performance of general aviation aircraft
[NASA-TM-104013] p 2667 N94-26091

GENERAL OVERVIEWS
The effects of embedded internal delaminations on composite laminate compression strength; an experimental review
[NASA-TM-108440] p 2707 N94-26127
Critical survey of plasma processing
[AD-A274233] p 3044 N94-26820
Highlights 1993 --- Lawrence Berkeley Laboratory
[DE94-002270] p 3118 N94-26937
Smart structures, an overview
[AD-A274147] p 2987 N94-27093
Silence amenity engineering: Past and present p 3011 N94-27283
Reinventing information services to increase customer satisfaction
[DE94-003718] p 3100 N94-27563

GENES
The intracellular second messenger system in c-fos gene induction by ACTH p 2904 N94-27477
Cloning of rat RXR alpha cDNA and the expression of its mRNA in regenerating liver and primary cultured hepatocytes p 2905 N94-27479
Cloning of a novel POU family gene by RT-PCR method p 2905 N94-27480
Expression analysis of Thyroxine-Binding Globulin Complete Deficiency in Japanese (TBG-CDJ) p 2905 N94-27482

GENETIC ALGORITHMS
Discovery learning in autonomous agents using genetic algorithms
[AD-A274083] p 2677 N94-25998
Parameter estimation by genetic algorithms
[DE94-002924] p 2961 N94-26146
What can we learn from genetic algorithms: A new perspective for search methods
[PB94-125234] p 2967 N94-26997
Genetic algorithms applied to a mission routing problem
[AD-A274130] p 2968 N94-27120
Designing robust control laws using genetic algorithms p 2643 N94-27295

GENETIC CODE
Cloning of a novel POU family gene by RT-PCR method p 2905 N94-27480
Expression analysis of Thyroxine-Binding Globulin Complete Deficiency in Japanese (TBG-CDJ) p 2905 N94-27482

GENETIC ENGINEERING
Studies on the application of radiation for genetic transformation in higher plants
[DE93-632656] p 2901 N94-26470
Development of inbred strains from Japanese wild rats (Rattus norvegicus) p 2906 N94-27492

GENETICS
Studies on the application of radiation for genetic transformation in higher plants
[DE93-632656] p 2901 N94-26470

GEOCHEMISTRY
A general theory of impacts and mass extinctions, and the consequences of large-body impact on the Earth p 2891 N94-28310

GEOCHRONOLOGY
The biostratigraphy and paleogeography of Maastrichtian inoceramids p 2889 N94-28303
An extraterrestrial event at the tertiary-quaternary boundary p 2890 N94-28309
A general theory of impacts and mass extinctions, and the consequences of large-body impact on the Earth p 2891 N94-28310
Were all extinction events caused by impacts? p 2891 N94-28311

GEODESIC LINES
On the first integrals of geodesics
[DE93-612974] p 3007 N94-25603

GEODESY
Crustal deformation measurements in the vicinity of Vandenberg Air Force Base
[AD-A274166] p 2881 N94-27143

GEODETIC COORDINATES
Construction and applications of the two dimensional Delaunay triangulated irregular network and the three dimensional Delaunay tetrahedron model
[ETN-94-95034] p 2848 N94-26651
Hotine's (omega, phi, nu) coordinate system
[PL-TR-93-2174] p 3001 N94-28216

GEODETIC SURVEYS
High-production global positioning system methods for survey applications: The pseudo-kinematic method with the Trimvec programming system
[ETN-94-95035] p 2665 N94-26539
Crustal deformation measurements in the vicinity of Vandenberg Air Force Base
[AD-A274166] p 2881 N94-27143

GEOGRAPHIC INFORMATION SYSTEMS
Remote sensing and GIS for the management and investigation of the Wadden Sea
[BCRS-92-20] p 2847 N94-26228
PDEF: A standard file format for data interchange
[AD-A274694] p 3098 N94-26451
A geological and geophysical information system for Eurasia
[AD-A274818] p 3098 N94-26490
Trapezoid-oriented compression of run length coded map data
[PB94-123312] p 2849 N94-26848

GEOGRAPHY
The effect of elevation data representation on nocturnal drainage wind simulations
[DE94-003624] p 2892 N94-25936

GEOIDS
Geoid determination: With help of the alternative scattering method
[ETN-94-95375] p 2847 N94-25746

GEOLOGICAL SURVEYS
A geological and geophysical information system for Eurasia
[AD-A274818] p 3098 N94-26490

GEOLOGY
Geological Dating by Ar-40 - Ar-39 method
[DE94-601975] p 2880 N94-26874
Crustal deformation measurements in the vicinity of Vandenberg Air Force Base
[AD-A274166] p 2881 N94-27143

GEOMAGNETIC PULSATIONS
Collisionless shock structures of Earth and other planets
[NASA-CR-195257] p 3104 N94-27407

GEOMAGNETIC TAIL
Collisionless shock structures of Earth and other planets
[NASA-CR-195257] p 3104 N94-27407
Proton aurora and substorm intensifications
[ATR-93(7248)-1] p 2887 N94-28218

GEOMAGNETISM
Detection geometry and reconstruction error in magnetic source imaging
[DE94-004012] p 2809 N94-25662
Determination of the geomagnetic external contribution by nonlinear optimization methods
[DE94-600882] p 2878 N94-26365
About stochastization of motion of charged particles in geomagnetic field and in the field of a wave packet
[DE93-634309] p 2879 N94-26502
Kiruna geophysical data. Data summary 93/4-6, April-June 1993
[PB94-123700] p 2881 N94-27039
Kiruna geophysical data. Data summary 93/1-3, January-March, 1993
[PB94-123791] p 2881 N94-27043
Solar-geophysical data number 590, October 1993. Part 1: (Prompt reports). Data for September, August 1993, and late data
[PB94-125903] p 3110 N94-27053
JARE data reports. No. 186: Upper atmosphere physics data. Syowa and Asuka Stations, 1990
[JTN-94-80594] p 2881 N94-27299
Persistence of auroral electron flux events from DMSP/F9 electron measurements
[RXR-92012] p 2887 N94-28206

GEOMETRIC RECTIFICATION (IMAGERY)
Geometric correction of SPOT images with use of digital elevation models
[ETN-94-95033] p 2847 N94-26107

GEOMETRY
A strange application of Kolmogorov complexity
[CWI-CS-R9328] p 2973 N94-27737

GEOMORPHOLOGY
Morphodynamics of inter-tidal areas: The Wadden Sea
[NLR-TP-92356-U] p 2851 N94-27555

GEOPHYSICAL OBSERVATORIES
Kiruna geophysical data. Data summary 93/1-3, January-March, 1993
[PB94-123791] p 2881 N94-27043

GEOPHYSICS
A geological and geophysical information system for Eurasia
[AD-A274818] p 3098 N94-26490
Kiruna geophysical data. Data summary 93/4-6, April-June 1993
[PB94-123700] p 2881 N94-27039
Kiruna geophysical data. Data summary 93/1-3, January-March, 1993
[PB94-123791] p 2881 N94-27043
Solar-geophysical data number 590, October 1993. Part 1: (Prompt reports). Data for September, August 1993, and late data
[PB94-125903] p 3110 N94-27053
Solar-geophysical data number 590, October 1993. Part 2: (Comprehensive reports). Data for April 1993, and miscellaneous
[PB94-125911] p 3110 N94-27054
Global change research related to the Earth's energy and hydrologic cycle
[NASA-CR-195270] p 2869 N94-27430
Calibration of SAR systems
[DLR-FB-93-18] p 2777 N94-27738

GEOSYNCHRONOUS ORBITS
SAFT nickel hydrogen cell cycling status
p 2861 N94-28110

GEOTHERMAL RESOURCES
Volcanology and volcanic activity with a primary focus on potential hazard impacts for the Hawaii geothermal project
[DE94-001614] p 2879 N94-26515

GERMANATES
Crystallization and microstructural control of ferroelectric thin-films and glass-ceramics
[AD-A273767] p 2748 N94-25854

GERMANIUM
Determination of surface recombination velocity and bulk lifetime in detector grade silicon and germanium crystals
[DE94-003886] p 3053 N94-26094
The epitaxial growth of Ge on Si(100) using Te as a surfactant
[DE94-003437] p 3056 N94-26326
The response of an hyperpure Ge detector to ionizing radiation
[ISBN-0-315-83968-6] p 2811 N94-26662
Technical report of ISSP. Ser. A, no. 2680: Determination of intervalley scattering time in germanium by subpicosecond time-resolved Raman spectroscopy
[JTN-94-80566] p 3064 N94-27176

GERMANIUM ALLOYS
Recombination and metastability in amorphous silicon and silicon germanium alloys
[DE94-000237] p 2736 N94-26481
Continuous roll-to-roll a-Si photovoltaic manufacturing technology
[DE94-000260] p 2859 N94-27610

GERMANIUM COMPOUNDS
Study on synthesis and characteristics of intermetallic compound with strong electron correlation
p 2726 N94-25563
Stress relaxation in sputtered W films and W/GeSi/Si heterostructures
[DE94-004007] p 3055 N94-26239
Energy Dispersive X ray Diffraction (EDXD) apparatus for liquids at high temperature p 2721 N94-28159

GERMANY
The advantages of the location Germany must not be jeopardized in air traffic p 2661 N94-28236
Lufthansa facing the single European market
p 2661 N94-28237
Munich Airport: The new Lufthansa hub
p 2662 N94-28239
German-American relations in air traffic are to be criticized p 2662 N94-28241

GERT
Development of an automatic fatigue-data acquisition system using commercial software
[NAL-TM-650] p 2842 N94-27207

GETTERS
Binding of copper and nickel to cavities in silicon formed by helium ion implantation
[DE94-003769] p 3050 N94-25814
Lithium drifted silicon detector fabrication on gettered floating-zone silicon
[DE94-003890] p 3054 N94-26095

GLACIERS
Remote sensing of global snowpack energy and mass balance: In-situ measurements on the snow of interior and Arctic Alaska
[NASA-CR-195704] p 2851 N94-27787
Impacts, extinctions, volcanism, glaciations, and tectonics: Matches and mismatches
p 2888 N94-28298
Extraterrestrial accretion and glacial cycles
p 2890 N94-28308
Were all extinction events caused by impacts?
p 2891 N94-28311

GLACIOLOGY
Were all extinction events caused by impacts?
p 2891 N94-28311

GLASS
Lunar preform manufacturing p 2765 N94-25677
Crystallization and microstructural control of ferroelectric thin-films and glass-ceramics
[AD-A273767] p 2748 N94-25854
Optimization of experimental conditions in IR reflectance determination of BPSG properties
[DE94-002742] p 2713 N94-25978
Peculiarities and application perspectives of metal-ion implants in glasses
[DE94-004671] p 3035 N94-26246
How reliable is the HMSA integral equation for the pair structure of supercooled and amorphous mixtures?
[DE94-601543] p 3006 N94-26411
Modelling and predicting properties of polymers in the amorphous glassy state
[ETN-94-95345] p 2752 N94-26645
Molecular dynamics simulation and crystal-field theory: Predicting the optical spectra and structure of rare-earth doped inorganic glasses
[ISBN-0-315-84679-8] p 3025 N94-27310
Ion implantation in silicate glasses
[DE94-003785] p 2757 N94-27726
Fragmentation of Ge(1-x) Sn(x) Se2 glasses
[DE94-603009] p 2758 N94-27837
Experimental study of lunar and SNC (Mars) magmas
[NASA-CR-195274] p 3107 N94-27850

GLASS FIBER REINFORCED PLASTICS
Dynamic response of S-2 glass reinforced plastic structural armor
[AD-A273868] p 2747 N94-25596
Testing composite-to-metal tubular lap joints
[DE94-003225] p 2836 N94-26032

GLASS FIBERS
Design for producing fiberglass fabric in a lunar environment p 2765 N94-25676
Lunar preform manufacturing p 2765 N94-25677
Testing composite-to-metal tubular lap joints
[DE94-003225] p 2836 N94-26032
Inert strength of pristine silica glass fibers
[DE94-004685] p 2750 N94-26247
The deposition of boron nitride and carbon films on silica glass fibers
[DE94-004684] p 2751 N94-26564
Evanescent field infrared spectroscopy using chalcogenide glass fiber
[ITN-94-85233] p 3038 N94-27178
Ir-fibers in a laser threat warning system and robot shot warning system
[PB94-124476] p 3038 N94-27209

GLASS TRANSITION TEMPERATURE
Modelling and predicting properties of polymers in the amorphous glassy state
[ETN-94-95345] p 2752 N94-26645
Fragmentation of Ge(1-x) Sn(x) Se2 glasses
[DE94-603009] p 2758 N94-27837

GLOBAL POSITIONING SYSTEM
Analysis and simulation of a GPS receiver design using combined delay-lock and modified tanlock loops
[AD-A274037] p 2664 N94-25810
Comparative investigation of high-latitude ionospheric structure and effects near solar maximum
[AD-A273799] p 2877 N94-25877
Differential global positioning system for the surface-towed ordnance locating system: Testing, results, and user's guide
[DE94-002980] p 2664 N94-26309
High-production global positioning system methods for survey applications: The pseudo-kinematic method with the Trimvec programming system
[ETN-94-95035] p 2665 N94-26539
Development of a performance evaluation tool (MMSOFE) for detection of failures with Multiple Model Adaptive Estimation (MMAE)
[AD-A274218] p 2665 N94-27071
Satellite navigation system GPS: A review of principles and performance and developments in general
[PB94-124534] p 2665 N94-27210
Investigation of air transportation technology at Ohio University, 1992-1993 p 2642 N94-27288
Fault detection and isolation p 2642 N94-27289
Improved modeling of GPS selective availability
p 2642 N94-27290
Realtime mitigation of GPS SA errors using Loran-C
p 2642 N94-27291
A GPS coverage model p 2642 N94-27292
Ground station siting considerations for DGPS
p 2642 N94-27293
Differential GPS methods and performance for marine applications
[DREP-93-09] p 2665 N94-27667
Flight testing of GPS and GPS-aided systems
[NLR-TP-92151-U] p 2666 N94-27831
Ionospheric calibration for single frequency altimeter measurements
[NASA-CR-195709] p 2883 N94-27883
A simulation of GPS and differential GPS sensors
p 2666 N94-27918

GLOBAL WARMING
Mission to Planet Earth: A program to understand global environmental change
[NASA-PAM-556] p 2869 N94-27958

GLOBULINS
Expression analysis of Thyroxine-Binding Globulin Complete Deficiency in Japanese (TBG-CDJ)
p 2905 N94-27482

GLOVES
Control panel dimensions for gloved operation study 2: Toggle switches minimum spacing required between toggle
[AD-A274518] p 2942 N94-27089
Extra-Vehicular Activity (EVA) glove evaluation test protocol
[NASA-TM-108442] p 2943 N94-27952

GLOW DISCHARGES
Study on development of chemical measurement method utilizing plasmas p 2728 N94-25576
Theoretical aspects of the agile mirror
[AD-A274890] p 2767 N94-26177
First experimental assessment of RCS plume-flow field interaction on Hermes leading edge thruster configuration p 2703 N94-28032

GLUONS
The Cherenkov hadronic like-jets
[DE93-634525] p 3016 N94-26010
On the gluon propagator in the infrared region
[DE93-634345] p 3016 N94-26035
Pseudoscalar glueball in the composite interpolating fields approach
[DE93-634374] p 3016 N94-26042
Deciphering the quark-gluon structure of the photon in electron(gamma) collisions
[DE93-634386] p 3017 N94-26043
The STAR experiment at the Relativistic Heavy Ion Collider
[DE94-003409] p 3017 N94-26083
Signatures for hybrids
[DE94-004244] p 3020 N94-26574
Experimental investigations of strong interaction in the non-perturbative QCD region
[DE94-001178] p 3024 N94-26949
A jet calculus approach including coherence effects and the associated problem of moment inversion
[ISBN-0-315-51715-8] p 3025 N94-27266

Aspects of perturbative corrections in quantum chromodynamics [ISBN-0-315-63607-6] p 3074 N94-27398

GOALS

Clean coal technology p 2832 N94-28089

GOLD

The formation of conducting gold films by thermal decomposition and direct patterning using electron beam lithography of the gold cluster Au55P(C6H5)312C16 [AD-A273720] p 2749 N94-26074

GOLD ALLOYS

Stress corrosion cracking and dealloying of copper-gold alloy in iodine vapor [DE93-633790] p 2734 N94-26264

GOLD ISOTOPES

Production of (phi) mesons in central Si + Au collisions at 14.6 AGeV/c [DE94-003196] p 3012 N94-25795

GOODNESS OF FIT

Estimation and tests-of-fit for the three parameter Weibull distribution [AD-A274827] p 3004 N94-26496

GOVERNMENT PROCUREMENT

Analysis of cost and schedule growth on sole source and competitive Air Force contracts [AD-A273920] p 3094 N94-26814

GOVERNMENT/INDUSTRY RELATIONS

Small business innovation research program solicitation [NASA-TM-109695] p 3094 N94-27661

GRAIN BOUNDARIES

Study on high temperature damage control and life improvement p 2729 N94-25580

The role of grain boundary chemistry and structure in the environmentally-assisted intergranular cracking of nickel-base alloys [DE94-003159] p 2732 N94-25954

Grain boundary degradation of YBCO superconductors sintered in CO2-containing atmospheres [DE94-003206] p 3053 N94-26029

A mechanism for resistive dissipation in Ag sheathed Bi2Sr2CaCu2O8 and Bi2Sr2Ca2Cu3O10 [DE94-003009] p 3060 N94-26771

Influence of point defects cn grain boundary diffusion in oxides [DE94-003164] p 3060 N94-26782

A model of electric breakdown in polycrystalline semiconductors with highly nonlinear I - V characteristics [DE94-601537] p 3063 N94-27017

Interface phenomena in metal-ceramic composites [AD-A274167] p 2709 N94-27125

Deformation, constitutive behavior, and damage of advanced structural materials under multiaxial loading [AD-A274165] p 2709 N94-27142

Grain boundary chromium concentration effects on the IGSCC and IASCC of austenitic stainless steels [DE94-004268] p 2741 N94-27570

GRAIN SIZE

Diffusion of substitutional elements in Ti in its hcp phase [DE93-633762] p 2733 N94-26160

Study of precipitation and recrystallization in Al alloy 2519 by backscattered electron imaging methods [AD-A274919] p 2736 N94-26533

CEN-VAMAS round robin on grain size measurement for advanced technical ceramics [VAMAS-TR-12] p 2752 N94-26654

Computer modelling of cyclic deformation of high-temperature materials [AD-A274504] p 2840 N94-27034

High temperature grain growth and oxidation of Fe-29Ni-17Co (Kovar (tm)) alloy leads [DE94-004691] p 3069 N94-27753

Characterization of ZnS-GaP naon-composites [DE94-004888] p 2712 N94-27813

GRAINS (FOOD)

Oil production from buckwheat stillage by thermochemical liquefaction p 2871 N94-28154

GRAMMARS

Parsing schemata: A framework for parallel and sequential parsing [PB94-125267] p 2981 N94-26998

GRAND UNIFIED THEORY

Why is the Higgs doublet light? [DE94-601711] p 3018 N94-26333

GRANITE

Effects of slot on rock surface for percussive rock excavation: Water jet assisted percussive rock excavation p 2871 N94-28155

The estimation of pre-stress by deformation rate analysis and suggestion of a mechanism from the elast-plastical theory p 2871 N94-28156

GRANTS

University program management information system, FY 1993 [NASA-TM-109719] p 3100 N94-27413

GRANULAR MATERIALS

The microstructural response of granular soil under uniaxial strain [AD-A274808] p 2763 N94-26341

Computer simulation and experiments on the quasi-static mechanics and transport properties of granular materials [AD-A274192] p 2823 N94-27104

GRAPH THEORY

The Chaco user's guide [DE94-003669] p 2962 N94-26370

Simulation approaches for calculations in directed graphical models [AD-A274825] p 3003 N94-26494

Some properties of graphs with local Ore conditions [PB94-126612] p 2996 N94-26962

Graphs satisfying a local ore-type condition [PB94-126679] p 3007 N94-27222

GRAPHICAL USER INTERFACE

Knowledge organization in intelligent tutoring systems for diagnostic problem solving in complex dynamic domains [AD-A273986] p 2984 N94-25899

A virtual environment for satellite modeling and orbital analysis in a distributed interactive simulation [AD-A274114] p 2694 N94-25904

Integration of interactive interfaces with intelligent tutoring systems: An implementation [AD-A273869] p 2985 N94-25966

Developing a sophisticated user interface to support domain-oriented application composition and generation systems [AD-A274080] p 2960 N94-25994

Developing a graphical user interface to support a real-time digital signal processing system [AD-A274032] p 2960 N94-26018

Software redesign for usability: A case study [DE94-003704] p 2960 N94-26048

Emerging Human-Computer Interface (HCI) design guidelines for Graphical User Interface (GUI) [DE94-004293] p 2941 N94-26555

Vcalc: A 3-space vector calculator [AD-A274520] p 2965 N94-26831

Advanced End-to-end Simulation for On-board Processing (AESOP) p 2945 N94-28255

ActorStudio: An interactive user interface editor [PB94-132859] p 2976 N94-28356

GRAPHITE

A study of graphite peek composite with central elliptical holes under tension [AD-A273779] p 2705 N94-25863

Technical report of ISSP. Ser. A, no. 2678: Magnetic properties of carbon nanotubes [JTN-94-80564] p 3064 N94-27174

Fullerene fabrication using an arc furnace. Characterization of the product [DE94-603006] p 3029 N94-27834

GRAPHITE-EPOXY COMPOSITES

Influence of embedded optical fibers on compressive strength of advanced composites [AD-A273775] p 2705 N94-25859

Fatigue resistance under tension-compression of laminates IM6/5245C and AS4/3501-6 [IAR-CR-25] p 2708 N94-26711

GRAPHITIZATION

Ion implantation of diamond: Damage, doping, and lift-off [DE94-001133] p 3054 N94-26137

Regrowth zones in laser annealed radiation damaged diamond [DE94-600821] p 3056 N94-26364

High performance fibers [AD-A274693] p 2707 N94-26450

GRAPHS (CHARTS)

Subgraph approximations for large directed graphical models [AD-A274813] p 3003 N94-26485

Kiruna geophysical data. Data summary 93/4-6, April-June 1993 [PB94-123700] p 2881 N94-27039

Graphs satisfying a local ore-type condition [PB94-126679] p 3007 N94-27222

GRASSLANDS

Grassland/atmosphere response to changing climate: Coupling regional and local scales [DE94-003111] p 2866 N94-26026

GRATINGS (SPECTRA)

Binary optical elements: Studies in design, manufacture and performance [ISBN-0-315-60643-6] p 3039 N94-27643

Development of a holographic illumination system for a time-integrating correlator [DSIS-94-00111] p 2814 N94-27763

GRAVITATION

On string theory interacting with two-dimensional gravity [DE94-601562] p 3071 N94-25883

Orthodox gravity [DE94-601560] p 2878 N94-26418

The gravity equations in the Lobachevskij space [DE93-634334] p 2879 N94-26504

Frontiers of science and measurement: Report on a seminar jointly organized by the National Physical Laboratory and the Institute of Physics [PB94-124310] p 3009 N94-27131

Exercise detraining: Applicability to microgravity p 2934 N94-28364

Aerobic fitness and orthostatic tolerance: Evidence against an association p 2934 N94-28365

GRAVITATION THEORY

Dimensional crossover from non-renormalizability to renormalizability [DE93-613052] p 3006 N94-26193

Orthodox gravity [DE94-601560] p 2878 N94-26418

Stochastic space-time, confinement potential and particle propagator [DE94-606415] p 3074 N94-27680

GRAVITATIONAL EFFECTS

Autonomous support for microorganism research in space p 2903 N94-25672

Intermittent gravity: How much, how often, how long? [NASA-TM-108800] p 2944 N94-26098

Report of three microgravity experiments by the drop shaft [JTN-94-80579] p 2761 N94-27341

The electrogastrogram during parabolic flight p 2913 N94-27452

Vertical gaze direction during parabolic flight p 2913 N94-27453

Heart rate change in normal and labyrinthectomized hamsters during parabolic flight p 2914 N94-27454

Effects of imaginary target on induced eye movements by linear acceleration p 2914 N94-27456

The mechanism of caloric nystagmus under microgravity. 1: Changes of endolymphatic pressure in the semicircular canal of pigeon by caloric stimulation p 2914 N94-27457

Comparative measurement of visual stability in cosmic space: Onboard experiment and pre-flight activities p 2916 N94-27463

Root gravitropism in maize and Arabidopsis [NASA-CR-195710] p 2903 N94-27940

Evaluation of near-infrared spectrophotometric method for individual tolerance to +Gz acceleration p 2933 N94-27944

GRAVITATIONAL FIELDS

Correlation between the gravity field and the bathymetry in the North Atlantic Ocean [ETN-94-95036] p 2899 N94-26108

Characterization of acoustic effects on flame structures by beam deflection technique [DE94-003240] p 2714 N94-26122

Orthodox gravity [DE94-601560] p 2878 N94-26418

Spinor and isospinor structure of relativistic particle propagators [DE94-601552] p 3019 N94-26424

Gravitational field of a point mass in the Lobachevskij space [DE93-634333] p 3072 N94-26503

The gravity equations in the Lobachevskij space [DE93-634334] p 2879 N94-26504

Stochastic space-time, confinement potential and particle propagator [DE94-606415] p 3074 N94-27680

Lifetimes of lunar satellite orbits [NASA-TP-3394] p 2690 N94-27771

GRAVITATIONAL PHYSIOLOGY

Intermittent gravity: How much, how often, how long? [NASA-TM-108800] p 2944 N94-26098

Performance recovery in the baboon following (+)G sub z-induced loss of consciousness [AD-A274411] p 2902 N94-26991

Workshop on Countering Space Adaptation with Exercise: Current Issues [NASA-CP-3252] p 2934 N94-28361

Exercise detraining: Applicability to microgravity p 2934 N94-28364

Visit to CERMA: Centre d'Etudes et de Recherches de Medecine Aerospatiale, Centre for Studies and Research in Aviation and Space Medicine, Bretigny sur Orge, France, November 16-18, 1992 [PB94-132990] p 2937 N94-28392

GRAVITROPISM

Root gravitropism in maize and Arabidopsis [NASA-CR-195710] p 2903 N94-27940

GRAVITY ANOMALIES

Geoid determination: With help of the alternative scattering method [ETN-94-95375] p 2847 N94-25746

GRAVITY GRADIENT SATELLITES

A comparison of three approximate mathematical models for the gravity gradient stabilized satellite [AD-A273832] p 2694 N94-25615

GRAVITY WAVES

Numerical procedure for planetary wave solution [DE94-004280] p 2879 N94-26576

GRAY SCALE

Automated fabric inspection system [AD-A274522] p 2835 N94-26833

Image quality measures and their performance p 2946 N94-28257

GRAZING INCIDENCE

Comparison of technology for high-power laser mirrors and synchrotron radiation mirrors [DE94-002913] p 3035 N94-26276

GREEN'S FUNCTIONS

Elastic wave up/down decomposition in inhomogeneous and anisotropic media: An operator approach and its approximations [PB94-126497] p 2881 N94-26880

Electronic structure of a single oxygen vacancy in rutile TiO2 [DE94-602717] p 3062 N94-26901

An efficient and accurate Green's function analysis of packaged microwave integrated circuits [ISBN-0-315-84425-6] p 2787 N94-27653

Fields and potentials in general uniaxial bianisotropic media I. Axial sources [PB94-132875] p 2778 N94-28379

Analytic solution for the dyadic Green's function of a nonreciprocal uniaxial bianisotropic medium [PB94-133162] p 2779 N94-28388

Green dyadic and dipole fields for a medium with anisotropic chirality [PB94-132933] p 2779 N94-28391

GREENHOUSE EFFECT

Methane emissions from natural wetlands [DE93-040796] p 2865 N94-25790

Meeting of the Eighth Session of the Scientific Advisory Committee of the World Climate Impact Assessment and Response Strategies Programme [DE93-633954] p 2866 N94-26163

A conceptual framework for the evaluation of cost-effectiveness of projects to reduce GHG emissions and sequester carbon [DE93-040448] p 2867 N94-26419

Proposed law of nature linking impacts, plume volcanism, and Milankovitch cycles to terrestrial vertebrate mass extinctions via greenhouse-embryo death coupling p 2876 N94-28307

GRID GENERATION (MATHEMATICS)

Parallel grid generation algorithm for distributed memory computers [NASA-TP-3429] p 2963 N94-26466

VLUGR2: A vectorized local uniform grid refinement code for PDE's in 2D [CWI-NM-R9306] p 2965 N94-26772

Using the TSAR electromagnetic modeling system [DE94-002617] p 2771 N94-26803

Building 3-D models from unregistered range images [AD-A274126] p 2986 N94-27032

A parallel computational fluid dynamics unstructured grid generator [AD-A274129] p 2795 N94-27119

Agglomeration multigrid for the three-dimensional Euler equations [NASA-CR-191595] p 2999 N94-27557

Solution of the Euler equations using unstructured grids p 2656 N94-28338

GROOVES

Calculation methods for steadily loaded central circumferential groove hydrodynamic journal bearings (guide to use of computer program A9304) [ESDU-93004] p 2830 N94-28073

Calculation methods for steadily loaded axial groove hydrodynamic journal bearings (guide to use of computer program A9305) [ESDU-93005] p 2830 N94-28074

Calculation methods for steadily loaded axial groove hydrodynamic journal bearings. Low viscosity process fluid lubrication (guide to use of computer program A9306) [ESDU-93006] p 2830 N94-28075

GROUND BASED CONTROL

Project Ares 3 p 2671 N94-25712

Optical communications for transport aircraft p 2643 N94-27298

GROUND EFFECT (AERODYNAMICS)

Experimental data for CFD validation of impinging jets in crossflow with application to ASTOVL flow problems p 2801 N94-28010

Experiments on the ground vortex formed by an impinging jet in cross flow p 2802 N94-28016

Numerical simulation of a powered-lift landing p 2671 N94-28033

A study of jet effect and ground effect interference on a STOL fighter p 2671 N94-28034

GROUND HANDLING

Handbook for handling and storage of nickel-cadmium batteries: Lessons learned [NASA-RP-1326] p 2702 N94-26613

GROUND STATE

Hook spectroscopy as an atomic number density diagnostic applied to laser-ablated copper plasmas [DE94-002645] p 3042 N94-26081

All-coupling polaron ground state energy in D-dimension [DE94-603666] p 3027 N94-27629

Correlated mean field Ansatz for the Kondo necklace [DE94-603671] p 3067 N94-27634

GROUND STATIONS

Hybrid power system for remote communications stations [AD-A274963] p 2782 N94-26301

Ground station siting considerations for DGPS p 2642 N94-27293

GROUND TESTS

Soft ground arresting system for airports [DOT/FAA/CT-93/80] p 2680 N94-26202

An assessment of testing requirement impacts on nuclear thermal propulsion ground test facility design [DE94-002933] p 2702 N94-26560

S-76 high intensity radiated fields, volume 2 [AD-A274572] p 2771 N94-26836

S-76 high intensity radiated fields, volume 1 [AD-A274571] p 2771 N94-26854

S-76 high intensity radiated fields, volume 3 [AD-A274416] p 2772 N94-26980

Conifer tree influence on Digital Terrain Elevation Data (DTED): A case study at Dulles International Airport [AD-A274213] p 2849 N94-27069

GROUND TRACKS

Tropical cyclone report, 1992 [AD-A274464] p 2896 N94-27025

GROUND TRUTH

A comparative evaluation of SAR and SLAR [DE94-002922] p 2848 N94-26277

Short-range cloud amount forecasting with model output statistics [AD-A274769] p 2895 N94-26798

GROUND-AIR-GROUND COMMUNICATION

Packet radio data link applications in the NASA Langley Research Center Transport Systems Research Vehicle [NASA-TM-109071] p 2665 N94-27423

GROUP DYNAMICS

A test of the theory of reasoned action at the group level of analysis [AD-A273965] p 2937 N94-25897

An investigation of integrated product development implementation issues: A case study of Bosma Machine and Tool Corp. [AD-A273917] p 2942 N94-27320

Intertemporal bargaining and dynamic consistency [PB94-133147] p 3095 N94-28386

GROUP THEORY

Conditionally exponential convex functions on locally compact groups [DE93-613025] p 2990 N94-25865

Duality for multiparametric quantum GL(n) and for a Lorentz quantum group [DE93-613048] p 3005 N94-25868

On the gluon propagator in the infrared region [DE93-634345] p 3016 N94-26035

Dynamical group of relativistic straight-line string [DE93-634347] p 3072 N94-26037

Matrix near rings and pseudo distributivity [DE94-601505] p 2992 N94-26366

Quantum group and Manin plane related to a colored braid group representation [DE94-601509] p 3072 N94-26461

A concurrent, multigroup, discrete ordinates model of neutron transport [DE94-004334] p 3020 N94-26577

Deformation of the exterior algebra and the GL(sub q) (r, included in) algebra [DE94-602558] p 2996 N94-26898

GROWTH

Effects of ML-9, a myosin light-chain kinase inhibitor, on preimplantation development of the mouse p 2905 N94-27486

Compaction-like blastomere aggregation caused by 1-oleoyl-2-acetylglycerol in mouse embryos: An electron microscopic observation p 2905 N94-27487

Inductive differentiation of nerve cells in mouse embryonic ectoderm at early primitive streak stage by retinoic acid p 2905 N94-27488

Cross-sectional anatomy of day 30 suncus fetuses p 2905 N94-27490

GUIDE VANES

An investigation of the effects of the high maximum-thickness-to-chord ratio on the performance of nozzle guide vanes in a transonic planar cascade [ISBN-0-315-84107-9] p 2793 N94-26671

The renewing of the test section of the NAL transonic wind tunnel. Part 1: Reconstruction of the 1st corner turning vanes and aerodynamic stress measurement [NAL-TM-651] p 2681 N94-27247

GUN LAUNCHERS

Energy and technology review, July 1993 [DE94-004219] p 3118 N94-27566

GUST LOADS

The deterministic power-spectral-density method [AD-B175894] p 2678 N94-27395

The deterministic power-spectral-density-method for nonlinear systems [AD-B179687] p 3001 N94-28353

GUSTS

Machine intelligent gust front algorithm [AD-A273695] p 2680 N94-26196

The deterministic power-spectral-density-method for nonlinear systems [AD-B179687] p 3001 N94-28353

GYROSCOPES

An approximate solution for the spinup dynamics of near axisymmetric axial gyrostats using the method of multiple scales [AD-A273723] p 2698 N94-26223

GYROTROPISM

Modern photoacoustic spectroscopy problems. Theory and experiment (a review) [IFTR-41/1993] p 2716 N94-26823

H

H ALPHA LINE

Fast H-alpha line broadening during the 100 ns REB injection into a plasma [IPPCZ-322] p 3048 N94-27836

H-INFINITY CONTROL

Necessary and sufficient conditions for the existence of the stabilizing solution of the Riccati equation in a Hilbert space: A Popov function approach [PB94-125341] p 2997 N94-26999

Operator theoretic methods in the control of distributed and nonlinear systems [AD-A274160] p 2988 N94-27139

HABITABILITY

First lunar outpost p 2943 N94-25694

HABITATS

Portable Habitat for Antarctic Scientific Research (PHASR) p 2943 N94-25681

Design and development of the second generation Mars Habitat p 2943 N94-25693

First lunar outpost p 2943 N94-25694

Space Habitat, assembly and repair facility p 2691 N94-25696

Lunar base habitat designs: Characterizing the environment, and selecting habitat designs for future trade-offs [NASA-CR-195687] p 2943 N94-27934

Landscape dynamics of northeastern forests [NASA-CR-195272] p 2852 N94-28070

HADRONS

Secondary particle in background levels and effects on detectors at future hadron colliders [DE94-003378] p 3011 N94-25598

Contributions to the 23rd ICRC from emulsion chamber experiments at Mt. Chacaltaya and Pamirs [ICRR-REPT-295-93-7] p 3112 N94-25624

A study of very high energy hadron interactions through observation of cosmic-ray families of visible energy greater than 500 TeV, 1 p 3112 N94-25625

A study of very high energy hadron interactions through observation of cosmic-ray families of visible energy greater than 500 TeV, 2 p 3112 N94-25626

A study of very high energy hadron interactions through observation of cosmic-ray families with visible energy not less than 500 TeV, 3 p 3112 N94-25627

Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 1 p 3112 N94-25628

Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 2 p 3113 N94-25629

Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 3 p 3113 N94-25630

Penetrating nature of very collimated high-energy shower-clusters of hadrons and gamma rays p 3113 N94-25631

Energy concentration in high energy hadron-gamma families p 3113 N94-25632

Violation of Feynman scaling law in the forward region
p 3113 N94-25633
Simultaneous observation of families and air showers at Mt. Chacaltaya p 3114 N94-25634
Theoretical and computational studies in intermediate energy nuclear physics
[DE94-004177] p 3012 N94-25800
Principles of gauge theory of real hadrons
[DE93-613096] p 3013 N94-25835
Hadron jets and nucleon clusters in the relativistic nuclear collisions
[DE93-613434] p 3031 N94-25850
The amplitude of the elastic hadron-hadron scattering in the coulombic range of transfer momenta
[DE93-613183] p 3014 N94-25869
Principles of gauge theory of real hadrons
[DE93-616857] p 3015 N94-25920
A research program in experimental and theoretical high energy physics
[DE94-002156] p 3031 N94-25931
Monte Carlo event generators for hadron-hadron collisions
[DE94-003212] p 3015 N94-25955
The Cherenkov hadronic like-jets
[DE93-634525] p 3016 N94-26010
Deciphering the quark-gluon structure of the photon in electron(gamma) collisions
[DE93-634386] p 3017 N94-26043
Spin effects in hard interactions (interest in accelerated polarized beam)
[DE93-634398] p 3031 N94-26044
Meson X(1814) as a candidate for a hybrid state
[DE93-634447] p 3017 N94-26045
The STAR experiment at the Relativistic Heavy Ion Collider
[DE94-003409] p 3017 N94-26083
Photon and hadron production of heavy flavors
[DE94-004655] p 3018 N94-26245
Calorimeter with WLS fibers and parallel to beam scintillators
[DE93-634188] p 2810 N94-26378
Hadron gas ionization calorimeters
[DE93-634186] p 2810 N94-26397
Study on the compensated lead hadron calorimeter characteristics by means of hadron and electron beams
[DE93-634176] p 2810 N94-26439
Low-energy hadronic interactions beyond the current algebra approach
[DE94-602600] p 3022 N94-26900
Study of the process (pi)(sup -)A(yields)(pi)(sup -)(eta)'(eta)A at the moment 36 GeV/c
[DE93-634530] p 3024 N94-27250
A study of the global properties of hadronic matter at large densities
[ISBN-0-315-57234-5] p 3025 N94-27260
Quantum chromodynamics and nuclear physics at extreme energy density
[DE94-004418] p 3026 N94-27604
Indiana University high energy physics, task A
[DE94-000961] p 3033 N94-27614
Future directions in particle and nuclear physics at multi-GeV hadron beam facilities
[DE94-002946] p 3027 N94-27711
Proceedings of the workshop on (pi), K, (eta)-nucleon interactions
[DE94-701314] p 3027 N94-27733
A prototype presampler for the uranium-scintillator calorimeter in Zeus
[NIKHEF-H/93-11] p 2814 N94-28098

HAFNIUM ALLOYS
Study of the hyperfine magnetic field at Ta-181 site in the Heusler Co2ScSn, Co2ScGa, and Co2HfSn alloys
[DE94-603989] p 3067 N94-27623

HAILSTORMS
Examination of micro- and macro-physical structures and processes in hailstorms with respect to their modification
[DLR-FB-93-25] p 2897 N94-27751

HALF SPACES
Image theory for DC problems involving a conducting half space bounded by the general anisotropic impedance surface
[PB94-132917] p 2779 N94-28390

HALITES
Lighter alkali hydride and deuteride 1: Electronic properties of pure solids
[DE93-616188] p 3051 N94-25914
Se EXAFS study of the elevated wurtzite to rock salt structural phase transition in CdSe nanocrystals
[DE94-003247] p 3054 N94-26125

HALL EFFECT
Gauge invariance and transport properties in superconductors above T(c)
[DE94-604013] p 3068 N94-27677

HALLEY'S COMET
The kinetics and dynamics of the coma of Halley's comet
[NASA-CR-194828] p 3105 N94-28184

HALOGENS
Structure of ionic fluids in equilibrium with a microporous ionic matrix
[DE94-600563] p 2715 N94-26391
Molecular surface electrostatic potentials in the analysis of non-hydrogen-bonding noncovalent interactions
[AD-A274612] p 3022 N94-26894

HALOS
Longitudinal diffusion of a proton bunch under external noise
[DE93-634022] p 3032 N94-26165
The meaning of EROS/MACHO
[DE94-003003] p 3104 N94-26311

HAMILTONIAN FUNCTIONS
Convergent close-coupling calculation of electron-sodium scattering
[DE94-601815] p 3014 N94-25842
Towards a theory of growing surfaces: Mapping two-dimensional Laplacian growth onto Hamiltonian dynamics and statistics
[DE94-002636] p 2991 N94-26079
On Poisson brackets and symplectic structures for the classical and quantum Zitterbewegung
[DE93-634305] p 2992 N94-26267
Gauging of Chern-Simons p-Barnes
[DE94-601553] p 2993 N94-26425
Quantum Hamiltonian differential geometry: How does quantization affect space?
[DE93-634306] p 2993 N94-26442
The Hamiltonian structures of the super KP hierarchy associated with an even parity superlax operator
[DE94-601506] p 2994 N94-26459
On the wave and corpuscular properties of microparticles
[DE93-634450] p 3020 N94-26509
Electronic structure of a single oxygen vacancy in rutile TiO2
[DE94-602717] p 3062 N94-26901
Some properties of graphs with local Ore conditions
[PB94-126612] p 2996 N94-26962
Normal forms for perturbations of the euler top
[PB94-125390] p 3009 N94-26968
Poisson-lie group of pseudodifferential symbols
[PB94-124393] p 2997 N94-26996
Graphs satisfying a local ore-type condition
[PB94-126679] p 3007 N94-27222
Study of the critical points at infinity arising from the failure of the Palais-smale condition for n-body type problems
[DE94-603656] p 3000 N94-27818

HANDBOOKS
Digital systems validation book plan. Volume 3: Handbook
[AD-A274099] p 2672 N94-26028
Damage tolerance assessment handbook. Volume 1: Introduction fracture mechanics fatigue crack propagation
[AD-A274777] p 2836 N94-26186
Handbook for handling and storage of nickel-cadmium batteries: Lessons learned
[NASA-RP-1326] p 2702 N94-26613
Handbook of photovoltaic power generating design for introduction
[DE94-725199] p 2858 N94-26913

HARDENING (MATERIALS)
The role of point defect clusters in reactor pressure vessel embrittlement
[DE94-001122] p 2739 N94-26931

HARDENING (SYSTEMS)
Safety standards for aircraft shelter
[FFI-92/4003] p 2680 N94-26305

HARDNESS
Advanced qualification techniques
[DE94-003709] p 2780 N94-25812
Cracking of textured zinc coating during forming process
[DE94-003414] p 2750 N94-26085
Examination of hardness, fracture toughness and microstructure in Al2O3-B4C binary ceramics
[PB94-124237] p 2755 N94-27158
Process modelling of aluminium alloys. Modelling of the quench sensitivity of alloy AA6082
[PB94-124567] p 2741 N94-27325

HARDWARE
Hardware and software reliability estimation using simulations
[NASA-CR-187588] p 2973 N94-27663

HARDWARE DESCRIPTION LANGUAGES
Proposed Object Oriented Programming (OOP) enhancements to the Very High Speed Integrated Circuits (VHSIC) Hardware Description Language (VHDL)
[AD-A274004] p 2957 N94-25661
A VHDL register transfer level model of the linear token passing multiplex data bus protocol for the high speed data bus
[AD-A273734] p 2980 N94-26009
Partitioning structural VHDL circuits for parallel execution on hypercubes
[AD-A274390] p 2785 N94-26830
Design of a parallel discrete event simulation coprocessor
[AD-A274135] p 2982 N94-27123
Alternative architectures for domain-oriented application composition and generation systems
[AD-A274180] p 2968 N94-27128

HARMONIC CONTROL
A finite wake theory for two-dimensional rotary wing unsteady aerodynamics
[AD-A274921] p 2645 N94-26535

HARMONIC EXCITATION
Control of leading-edge separation on an airfoil by localized excitation
[DLR-FB-93-16] p 2647 N94-27592

HARMONIC GENERATIONS
Computer simulations of radiation generation from relativistic electron beams
[AD-A274139] p 3024 N94-27133
Technical report of ISSP. Ser. A, no. 2686: High-order harmonic generation and ionization using ultrashort KrF and Ti:Sapphire lasers
[JTN-94-80572] p 2820 N94-27605
Sum frequency generation using an optical parametric oscillator
[DE94-001827] p 3040 N94-28000

HARMONIC OSCILLATION
Understanding and development of a prediction method of transonic limit cycle oscillation characteristics of fighter aircraft
[NLR-TP-92210-U] p 2679 N94-27798

HARMONIC OSCILLATORS
Spectroscopic and vibrational energy transfer studies in molecular bromine
[AD-A273795] p 3014 N94-25875

HASTELLOY (TRADEMARK)
Creep rupture properties of a nickel-base heat-resistant alloy Hastelloy XR under varying temperature/stress condition
[DE94-701175] p 2743 N94-27807

HAWAII
Volcanology and volcanic activity with a primary focus on potential hazard impacts for the Hawaii geothermal project
[DE94-001614] p 2879 N94-26515

HAZARDS
Summaries of BFRL fire research in-house projects and grants, 1993
[PB94-121050] p 2763 N94-26756
Cryogenic size reduction of solid propellant
[AD-A274844] p 2759 N94-26800
Risks and issues in fire safety on the Space Station
[NASA-TM-106430] p 2692 N94-27436
Development of a method for predicting snowfall intensity and compacted snow on roads
p 2853 N94-27990
Conception of snow information network system in Yamagata Prefecture p 2853 N94-27991

HEAD DOWN TILT
Plasma volume shifts and exercise thermoregulation with water immersion and six-degree head-down tilt
[NASA-TM-108781] p 2901 N94-26093
Frequency analysis of body sway induced by optokinetic stimulation p 2914 N94-27455

HEAD MOVEMENT
Eye-head coordination and swinging of the visual scene when wearing visually up-down reversing mirror for 14 days p 2915 N94-27462

HEAD-UP DISPLAYS
Standardization of aircraft control and performance symbology on the USAF head-up display
[AD-A274283] p 2673 N94-26989

HEALING
The value of electrical stimulation as an exercise training modality p 2936 N94-28372

HEALTH
NCVS, volume 5
[AD-A274975] p 2902 N94-27165
Space radiation health research, 1991-1992
[NASA-TM-109721] p 2932 N94-27556

HEALTH PHYSICS
Space radiation health research, 1991-1992
[NASA-TM-109721] p 2932 N94-27556

HEARING
Signal- and listener-based factors in complex auditory pattern perception
[AD-A274148] p 2939 N94-27094
Comparison of methods of predicting community response to impulsive and nonimpulsive noise
p 2651 N94-28196

Sonic booms and marine mammals: Informational status and recommendations p 2651 N94-28198

HEART

EcarHeart2 version 1.0: Programmers documentation
[PB94-124633] p 2909 N94-25909

Electrical coupling between the sino-atrial node and atrial muscle: Cell to cell interaction through an external circuit and its simulation by computer modeling
p 2907 N94-27509

Correlation between electrical activity and the size of single sinoatrial node cells p 2907 N94-27513

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experimental study in rabbit single sinoatrial node cells
p 2908 N94-27514

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experiments using small sinoatrial node tissue preparations isolated from rabbit hearts p 2908 N94-27515

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Postganglionic vagal stimulation in isolated rabbit hearts
p 2908 N94-27516

Desensitization to acethylcholine in pacemaker cells of the sinoatrial node p 2908 N94-27537

Autonomic nervous system and cardiovascular control: Clinical implications of the 1/f fluctuations of heart rate
p 2932 N94-27540

HEART DISEASES

Protective action of platelet-activating factor antagonist, TCV-309, against ischemia reperfusion injury in isolated rabbit hearts p 2904 N94-27465

Protective action of an amiloride derivative (amiloride, 5-(N, N-dimethyl) hydrochloride) against in isolated ischemia/reperfusion newborn rabbit hearts
p 2904 N94-27466

On the mechanism of reentrant arrhythmias following DC defibrillation: Influence of fiber orientation to the effects of low-energy electric field stimulation on the effective refractory period of cardiac muscle
p 2904 N94-27468

Positive chronotropic effect of mechanical stretch on the sinoatrial node: Roles of neurotransmitters and stretch activated channels p 2904 N94-27469

The role of beta-adrenoceptor stimulation in the progression of chronic heart failure
p 2932 N94-27541

HEART FUNCTION

EcarHeart2 version 1.0: Programmers documentation
[PB94-124633] p 2909 N94-25909

Protective action of platelet-activating factor antagonist, TCV-309, against ischemia reperfusion injury in isolated rabbit hearts p 2904 N94-27465

Protective action of an amiloride derivative (amiloride, 5-(N, N-dimethyl) hydrochloride) against in isolated ischemia/reperfusion newborn rabbit hearts
p 2904 N94-27466

Effects of high-intensity electric field stimulation on the electromechanical performance of cardiac muscle: Influence of fiber orientation p 2904 N94-27467

On the mechanism of reentrant arrhythmias following DC defibrillation: Influence of fiber orientation to the effects of low-energy electric field stimulation on the effective refractory period of cardiac muscle
p 2904 N94-27468

Positive chronotropic effect of mechanical stretch on the sinoatrial node: Roles of neurotransmitters and stretch activated channels p 2904 N94-27469

HEART RATE

Passive and active behavior of the cardiovascular system under increased gravitational loads in a chronically instrumental conscious baboon model
[AD-A274344] p 2910 N94-26973

Heart rate change in normal and labyrinthectomized hamsters during parabolic flight p 2914 N94-27454

Positive chronotropic effect of mechanical stretch on the sinoatrial node: Roles of neurotransmitters and stretch activated channels p 2904 N94-27469

Autonomic nervous system and cardiovascular control: Clinical implications of the 1/f fluctuations of heart rate
p 2932 N94-27540

HEAT

Changes in pain sensation induced by repetitive application of noxious heat pulses to the human skin
p 2924 N94-27501

HEAT AFFECTED ZONE

Evaluation of crack arrest fracture toughness of parent plate, weld metal and heat affected zone of BIS 812 EMA ship plate steel
[AD-A274871] p 2839 N94-26859

The influence of TIG welding thermal cycles on HSLA-100 steel plate
[AD-A274248] p 2740 N94-27009

HEAT EXCHANGERS

Experimental analysis of heat transfer characteristics and pressure drop through screen regenerative heat exchangers
[AD-A273902] p 2790 N94-25657

Validated heat-transfer and pressure-drop prediction methods based on the discrete-element method. Phase 2: Two-dimensional rib roughness
[DE94-002379] p 2794 N94-26763

HEAT FLUX

Design of folded waveguide antenna for Alcator C-Mod
[DE94-003584] p 2767 N94-25924

Interpreting the implied meridional oceanic energy transport in AMIP
[DE94-001538] p 2898 N94-26072

Methodology for first wall design
[DE94-002795] p 3045 N94-26861

Numerical and experimental analyses of the radiant heat flux produced by quartz heating systems
[NASA-TP-3387] p 3011 N94-27659

Uncertainties in the characterization of the thermal environment of a solid rocket propellant fire
[DE94-002023] p 2760 N94-27719

Forced convection heat transfer in straight tubes. Part 2: Laminar and transitional flow
[ESDU-93018-PT-2] p 2807 N94-28139

HEAT GENERATION

Molten salt techniques for reproducible excess heat
[AD-A274935] p 2714 N94-26296

HEAT MEASUREMENT

Technique to predict the curing behaviour of unsaturated polyester materials
[PB94-124856] p 2748 N94-25892

Modelling the inhibition cure behaviour of unsaturated polyester moulding materials
[PB94-124864] p 2748 N94-25893

Thermal conductivity of PAX 2A explosive by DSC
[AD-A274721] p 2759 N94-26437

An ultrasonic testing technique for monitoring the cure and mechanical properties of polymeric materials
[AD-A274536] p 2753 N94-26842

Use of calorimetry for end of charge determination
p 2863 N94-28128

Formation and crystallization of hydrogen-induced amorphous Ti3InH(4.5) alloy p 2745 N94-28163

HEAT OF DISSOCIATION

Three methods to measure RH bond energies
[DE94-003795] p 3013 N94-25816

HEAT OF SOLUTION

Binding of copper and nickel to cavities in silicon formed by helium ion implantation
[DE94-003769] p 3050 N94-25814

HEAT PIPES

Modelling the mass migration phenomena in partially frozen heat pipes
[DE94-002716] p 2797 N94-27709

HEAT PUMPS

The First Energy Conference: Israel and the Former USSR
[ISBN-965-229-098-X] p 2853 N94-26050

Absorption technology for solar and waste heat utilization p 2854 N94-26053

Environmental benefits of different types of heat pumps, available and expected
[DE94-002440] p 2866 N94-26123

HEAT RESISTANT ALLOYS

Study on high temperature damage control and life improvement p 2729 N94-25580

HEAT SHIELDING

Interaction between a high density-low temperature plasma and a frozen hydrogen pellet in a railgun injector
[DE94-000846] p 3041 N94-25949

Mounting of SSM's
[VTT-TIED-1442] p 2695 N94-26250

HEAT TRANSFER

Experimental analysis of heat transfer characteristics and pressure drop through screen regenerative heat exchangers
[AD-A273902] p 2790 N94-25657

Microgravity ignition experiment p 2761 N94-25707

Abstraction in, specification and proof of software for a 1D heat-transfer problem
[REPT-93-45] p 2790 N94-25763

Technique to predict the curing behaviour of unsaturated polyester materials
[PB94-124856] p 2748 N94-25892

Modelling the inhibition cure behaviour of unsaturated polyester moulding materials
[PB94-124864] p 2748 N94-25893

A research program on radiative transfer model development in support of the ARM program
[DE94-001146] p 2767 N94-25950

Absorption technology for solar and waste heat utilization p 2854 N94-26053

Interpreting the implied meridional oceanic energy transport in AMIP
[DE94-001538] p 2898 N94-26072

Orbit transfer rocket engine technology program enhanced heat transfer combustor technology
[NASA-CR-189236] p 2700 N94-26156

Fire simulation based on convection calculation
[VTT-TIED-1411] p 2762 N94-26259

Eleventh Symposium on Energy Engineering Sciences: Proceedings
[DE93-019930] p 2763 N94-26429

Validated heat-transfer and pressure-drop prediction methods based on the discrete-element method. Phase 2: Two-dimensional rib roughness
[DE94-002379] p 2794 N94-26763

Computational mechanics
[DE94-003015] p 2965 N94-26775

Solidification modeling of a spiral casting to determine material fluidity
[DE94-002212] p 2739 N94-26935

SP industry calorimeter for rate of heat release measurements up to 10MW
[PB94-124211] p 2811 N94-27044

Verification of thermal analysis codes for modeling solid rocket nozzles
[NASA-CR-195248] p 2702 N94-27150

A study on heat transfer in a scramjet leading edge model
[NAL-TR-1187T] p 2675 N94-27608

A numerical approach to Stefan problem
[IPPCZ-334] p 2844 N94-27841

Gravity dependence or pressure drop and heat transfer in straight two-phase heat transport system condenser ducts
[NLR-TP-92167-U] p 2798 N94-27853

Aerodynamic heating in hypersonic flows
p 2658 N94-27919

Comparison of the interactions of two and three dimensional transverse jets with a hypersonic free stream p 2659 N94-28021

Transient model applications. 1: Compressor heat soak/clearance effects modeling p 2828 N94-28048

Cooling towers for combined cycles: New developments to meet environmental requirements
p 2832 N94-28088

HEAT TRANSMISSION

Verification of thermal analysis codes for modeling solid rocket nozzles
[NASA-CR-195248] p 2702 N94-27150

HEAT TREATMENT

Computer aided simulation of heat treatment
[VTT-PUBS-131] p 2731 N94-25643

Stress relaxation in dough moulding compounds
[PB94-124872] p 2748 N94-25894

Diffusion of substitutional elements in Ti in its hcp phase
[DE93-633762] p 2733 N94-26160

Zr-Sn-Nb alloys: Preliminary studies
[DE93-633767] p 2734 N94-26263

Analysis of the effect on growth kinetics of gamma prima phase in Inconel 713C alloys
[DE93-633763] p 2735 N94-26294

Titanium 1992: Science and Technology, volume 1
[AD-A274798-VOL-1] p 2739 N94-26799

Powder synthesis, fabrication, and transport properties of long-length Ag clad Bi-2223 conductors
[DE94-002376] p 2740 N94-26957

Process modelling of aluminium alloys. Modelling of the quench sensitivity of alloy AA6082
[PB94-124567] p 2741 N94-27325

Effect of precipitate structure on hot deformation of Al-Mg-Mn alloys
[DE94-004596] p 2741 N94-27622

HEATING

Coronal heating via nanoflares
[DE94-000773] p 3110 N94-26696

Martian atmospheric radiation budget
p 3107 N94-27887

A modelling of the noise from simple coaxial jets. Part 3: With hot primary flow
[ISVR-TR-230-PT-3] p 2807 N94-28173

HEATING EQUIPMENT

Environmental benefits of different types of heat pumps, available and expected
[DE94-002440] p 2866 N94-26123

Rewarming methodologies in the field
[AD-A274744] p 2909 N94-26173

A method for testing of HVAC automation equipment using the emulator and the application of the method
[VTT-TIED-1435] p 2822 N94-26306

Numerical and experimental analyses of the radiant heat flux produced by quartz heating systems
[NASA-TP-3387] p 3011 N94-27659

HEAVY ELEMENTS

Development of laser spectroscopic technology in nuclear industry
[DE93-633327] p 2714 N94-26158

HEAVY IONS

Back-reaction beyond the mean field approximation
[DE94-003936] p 3012 N94-25612

A double arm time-of-flight spectrometer based on position-sensitive parallel-grid avalanche counters
[DE93-616665] p 3012 N94-25750

The STAR experiment at the Relativistic Heavy Ion Collider
[DE94-003409] p 3017 N94-26083

Relativistic heavy ion physics
[DE94-003161] p 3031 N94-26097

Experimental and numerical investigation of shock wave propagation through complex geometry, gas continuous, two-phase media
[DE94-001408] p 2791 N94-26121

Diffusion of substitutional elements in Ti in its hcp phase
[DE93-633762] p 2733 N94-26160

Future directions in particle and nuclear physics at multi-GeV hadron beam facilities
[DE94-002946] p 3027 N94-27711

Advanced development of particle beam probe diagnostic system
[DE94-002316] p 3047 N94-27720

Studies of heavy-ion reactions and transuranic nuclei
[DE94-004642] p 3029 N94-27783

HEAVY NUCLEI

Index to BROND-2, CENDL-2, ENDF/B-6, JEF-2, JENDL-3
[DE93-634500] p 3016 N94-26034

A study of the global properties of hadronic matter at large densities
[ISBN-0-315-57234-5] p 3025 N94-27260

Jet production in muon scattering at Fermilab E665
[DE94-004663] p 3028 N94-27752

HEAVY WATER

Hydrogen physics
[DE94-701317] p 2719 N94-27822

HEISENBERG THEORY

Solution of the Heisenberg equation for the four-fermion contact interaction by the method of dynamical mappings
[DE94-606341] p 3075 N94-27858

HELICOPTER CONTROL

Neural networks for dynamic flight control
[AD-A274089] p 2676 N94-25785

Linear modeling of rotorcraft for stability analysis and preliminary design
[AD-A274869] p 2677 N94-26192

The effects of tailwinds and control cross coupling on rotorcraft handling qualities for steep, decelerating instrument approaches and missed approaches
[IAR-AN-77] p 2677 N94-26710

Optimal control of helicopters following power failure
[NAL-TR-1190] p 2678 N94-27206

A simulator investigation of helicopter flight control system mode transitions
[UTIAS-348] p 2682 N94-27879

HELICOPTER DESIGN

Linear modeling of rotorcraft for stability analysis and preliminary design
[AD-A274869] p 2677 N94-26192

Computer code for interactive rotorcraft preliminary design using a harmonic balance method for rotor trim
[AD-A274924] p 2668 N94-26531

HELICOPTER PROPELLER DRIVE

Study of the kinematic and dynamic characteristics of a wormgear transmission for helicopter applications
[NASA-CR-195287] p 2826 N94-27657

HELICOPTER WAKES

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 4: Laser velocimeter wake data, advance ratio of 0.037
[NASA-TM-109040-VOL-4] p 2645 N94-26483

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 1: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0081 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-1] p 2645 N94-26489

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 2: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 710 feet/second
[NASA-TM-109040-VOL-2] p 2645 N94-26492

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 3: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-3] p 2645 N94-26497

HELICOPTERS

Linear modeling of rotorcraft for stability analysis and preliminary design
[AD-A274869] p 2677 N94-26192

Experimental investigation of advanced hub and pylon fairing configurations to reduce helicopter drag
[NASA-TM-4540] p 2668 N94-26604

Rotorcraft low altitude IFR benefit/cost analysis: Conclusions and recommendations
[AD-A274241] p 2665 N94-26826

S-76 high intensity radiated fields, volume 2
[AD-A274572] p 2771 N94-26836

S-76 high intensity radiated fields, volume 1
[AD-A274571] p 2771 N94-26854

HELIUM

Evaluation of helium cooling for fusion divertors
[DE94-002680] p 3042 N94-25976

A robust helium-cooled shield/blanket design for ITER
[DE94-003402] p 3043 N94-26323

Influence of helium generation rate and temperature history on mechanical properties of model Fe-Cr-Ni alloys irradiated in FFTF at relatively low displacement rates
[DE94-004264] p 2737 N94-26575

Technical report of ISSP. Ser. A, no. 2684: Wavelength dependence of nonsequential double ionization in He
[JTN-94-80570] p 3025 N94-27338

Helium transport and exhaust studies of H-mode discharges in the D3-D tokamak
[DE94-004744] p 3048 N94-27785

HELIUM IONS

Binding of copper and nickel to cavities in silicon formed by helium ion implantation
[DE94-003769] p 3050 N94-25814

The structural, chemical, and electrical properties of He-implantation-induced nanocavities in silicon
[DE94-002681] p 3052 N94-25971

Technical report of ISSP. Ser. A, no. 2684: Wavelength dependence of nonsequential double ionization in He
[JTN-94-80570] p 3025 N94-27338

Helium transport and exhaust studies of H-mode discharges in the D3-D tokamak
[DE94-004744] p 3048 N94-27785

Fuel ion rotation measurement and its implications on H-mode theories
[DE94-004860] p 3048 N94-27791

HELIUM PLASMA

Fuel ion rotation measurement and its implications on H-mode theories
[DE94-004860] p 3048 N94-27791

HELIUM-NEON LASERS

An apparatus for measurement of ignition and burning characteristics of metallic particles
[AD-A274815] p 2716 N94-26487

Zeeman laser interferometry for detection and chemical analysis
[DE94-003963] p 2719 N94-27728

HELMET MOUNTED DISPLAYS

Weapon system integration for the AFIT virtual cockpit
[AD-A274058] p 2667 N94-25772

Helmet head tracking mounting device
[AD-D016048] p 2942 N94-27114

HELMETS

Helmet head tracking mounting device
[AD-D016048] p 2942 N94-27114

HELMHOLTZ RESONATORS

Characterization of acoustic effects on flame structures by beam deflection technique
[DE94-003240] p 2714 N94-26122

HEMODYNAMIC RESPONSES

Passive and active behavior of the cardiovascular system under increased gravitational loads in a chronically instrumental conscious baboon model
[AD-A274344] p 2910 N94-26973

Effect of L-dopa on hemodynamic functions in humans p 2929 N94-27526

HEMODYNAMICS

EcarHeart2 version 1.0: Programmers documentation
[PB94-124633] p 2909 N94-25909

Intermittent gravity: How much, how often, how long?
[NASA-TM-108800] p 2944 N94-26098

Aeromedical issues related to positive pressure breathing for +Gz protection
[AD-A274717] p 2910 N94-26435

Analysis on one minute wave in body fluid volume and muscle pumping referred to body parts generating the one minute wave during human active standing
p 2929 N94-27528

HEMOGLOBIN

Evaluation of near-infrared spectrophotometric method for individual tolerance to +Gz acceleration
p 2933 N94-27944

HEPATITIS

Modulation by galactosamine-induced hepatitis of biological responses of the rat exposed to high altitude hypoxia p 2904 N94-27464

HERMES MANNED SPACEPLANE

First experimental assessment of RCS plume-flow field interaction on Hermes leading edge thruster configuration p 2703 N94-28032

HERMETIC SEALS

Package integrity measurement technology and quality assurance
[AD-A273881] p 2834 N94-25727

HETEROGENEITY

Controlled heterogeneous nucleation of melt-textured YBa2Cu3O(6+x) by addition of Al2O3 particles
[AD-A274605] p 3062 N94-26892

Electromagnetic modeling of bi-isotropic media
[PB94-132909] p 2778 N94-28382

HETEROJUNCTION DEVICES

Development of intermetallic compounds for high performance luminescence elements
p 2722 N94-25545

Development of a 4-bit parallel analog-to-digital converter and a four-quadrant double-balanced mixer using heterojunction bipolar transistor technology
[AD-A274074] p 2947 N94-25648

A physics-based heterojunction bipolar transistor model for integrated circuit simulation
[AD-A274081] p 2781 N94-25995

Interface properties of wide bandgap semiconductor structures
[AD-A274356] p 3063 N94-27058

HETEROJUNCTIONS

A physics-based heterojunction bipolar transistor model for integrated circuit simulation
[AD-A274081] p 2781 N94-25995

Stress relaxation in sputtered W films and W/GeSi/Si heterostructures
[DE94-004007] p 3055 N94-26239

Pseudomorphic semiconducting heterostructures from combinations of AIN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device development
[AD-A274247] p 3061 N94-26841

AB-Initio calculation of the valence-band offset at strained GaAs/InAs (001) heterojunction
[DE94-602538] p 3061 N94-26878

Polar optical oscillation modes in GaAs-based double heterostructures: Long wavelength limit
[DE94-601874] p 3062 N94-26897

A tri-state optical switch for local area network communications p 2789 N94-27922

HEURISTIC METHODS

Thunderstorm Hypothesis Reasoner
[NASA-CR-195714] p 2897 N94-27884

HIGH ALTITUDE

A study of very high energy hadron interactions through observation of cosmic-ray families of visible energy greater than 500 TeV, 1 p 3112 N94-25625

A study of very high energy hadron interactions through observation of cosmic-ray families of visible energy greater than 500 TeV, 2 p 3112 N94-25626

Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 2 p 3113 N94-25629

Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 3 p 3113 N94-25630

Violation of Feynman scaling law in the forward region
p 3113 N94-25633

Simultaneous observation of families and air showers at Mt. Chacaltaya p 3114 N94-25634

HIGH ALTITUDE ENVIRONMENTS

Contributions to the 23rd ICRC from emulsion chamber experiments at Mt. Chacaltaya and Pamirs
[ICRR-REPT-295-93-7] p 3112 N94-25624

A study of very high energy hadron interactions through observation of cosmic-ray families with visible energy not less than 500 TeV, 3 p 3112 N94-25627

HIGH ALTITUDE PRESSURE

The Reports of Aeromedical Laboratory, volume 33, number 4
[JTN-94-80586] p 2933 N94-27942

HIGH ALTITUDE TESTS

Project Ares 3 p 2671 N94-25712

HIGH DEFINITION TELEVISION

VENI, video, VICI: The merging of computer and video technologies p 2686 N94-27362

HIGH ENERGY ELECTRONS

A study of LPM suppression of bremsstrahlung at 25 GeV
[DE94-003457] p 3018 N94-26133

Implementation of a compact magnetic electron energy spectrometer for intense relativistic electron beams
[AD-A274451] p 3033 N94-27082

Computer simulations of radiation generation from relativistic electron beams
[AD-A274139] p 3024 N94-27133

HIGH ENERGY INTERACTIONS

Contributions to the 23rd ICRC from emulsion chamber experiments at Mt. Chacaltaya and Pamirs
[ICRR-REPT-295-93-7] p 3112 N94-25624

A study of very high energy hadron interactions through observation of cosmic-ray families of visible energy greater than 500 TeV, 1 p 3112 N94-25625

A study of very high energy hadron interactions through observation of cosmic-ray families of visible energy greater than 500 TeV, 2 p 3112 N94-25626

A study of very high energy hadron interactions through observation of cosmic-ray families with visible energy not less than 500 TeV, 3 p 3112 N94-25627

Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 1 p 3112 N94-25628

Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 2 p 3113 N94-25629

Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 3 p 3113 N94-25630

Penetrating nature of very collimated high-energy shower-clusters of hadrons and gamma rays
p 3113 N94-25631

Energy concentration in high energy hadron-gamma families p 3113 N94-25632

Violation of Feynman scaling law in the forward region
p 3113 N94-25633

Simultaneous observation of families and air showers at Mt. Chacaltaya p 3114 N94-25634

Hadron jets and nucleon clusters in the relativistic nuclear collisions
[DE93-613434] p 3031 N94-25850

The amplitude of the elastic hadron-hadron scattering in the coulombic range of transfer momenta
[DE93-613183] p 3014 N94-25869

Structure functions of sea quarks, Kogut-Susskind pole and dynamics of pp- and pp-bar-interactions at high energies
[DE93-613184] p 3031 N94-25870

A research program in experimental and theoretical high energy physics
[DE94-002156] p 3031 N94-25931

The proceedings of the KEK FEL Simulation Code Workshop
[DE93-520378] p 2816 N94-26112

JLC-1
[DE93-520380] p 3031 N94-26113

Harvard University High Energy Physics
[DE94-002406] p 3032 N94-26119

Problems of application of charged particles channeling effects in crystals in high-energy physics
[DE93-634023] p 3032 N94-26405

Proceedings of the Second EGS4 User's Meeting in Japan
[DE93-520383] p 3032 N94-26543

A study of the global properties of hadronic matter at large densities
[ISBN-0-315-57234-5] p 3025 N94-27260

Indiana University high energy physics, task A
[DE94-000961] p 3033 N94-27614

Future directions in particle and nuclear physics at multi-GeV hadron beam facilities
[DE94-002946] p 3027 N94-27711

The status of the solar neutrino problem
[DE94-003934] p 3111 N94-27742

Research on elementary particle physics, part 2
[DE94-004956] p 3029 N94-27815

HIGH ENERGY PROPELLANTS

Computational studies of energetic organic molecules
[AD-A274726] p 3018 N94-26172

Proceedings of the High Energy Density Matter (HEDM) Contractor's Conference
[AD-A274452] p 3033 N94-27083

HIGH FIELD MAGNETS

Study on ferromagnetic field magnet using strong and highly conductive material p 2725 N94-25559

Cryogenic fracture behavior of 316LN in magnetic fields up to 14.6 T
[DE94-005215] p 2742 N94-27694

HIGH FREQUENCIES

The effect of high frequency electric field on hypersound amplification in superlattice
[DE93-634326] p 3057 N94-26384

MILCOM 92 and standardization for HF-communication. A study tour to the USA in October 1992
[PB94-124427] p 2774 N94-27219

HIGH GRAVITY ENVIRONMENTS

Passive and active behavior of the cardiovascular system under increased gravitational loads in a chronically instrumental conscious baboon model
[AD-A274344] p 2910 N94-26973

HIGH LEVEL LANGUAGES

Proposed Object Oriented Programming (OOP) enhancements to the Very High Speed Integrated Circuits (VHSIC) Hardware Description Language (VHDL)
[AD-A274004] p 2957 N94-25661

Efficient implementation of high-level parallel symbolic languages p 2955 N94-27196

HIGH POWER LASERS

Studies of non-linear optical effects for agile beam steering
[AD-A273998] p 3034 N94-25902

Comparison of technology for high-power laser mirrors and synchrotron radiation mirrors
[DE94-002913] p 3035 N94-26276

Design and evaluation of an electromagnetic beam waveguide for measuring electrical properties of materials
[NASA-TP-3418] p 2769 N94-26611

Phase conjugation and pulse compression of high energy lasers: From nanoseconds to microseconds
[DE94-001061] p 2818 N94-26699

Phase conjugated lasers applied to commercial x ray lithography
[DE94-001529] p 2819 N94-27018

Kinoform/lens system for injecting a high power laser beam into an optical fiber
[DE94-003226] p 2819 N94-27262

HIGH PRESSURE

Fundamental study on monitoring technology on local surface damages p 2724 N94-25555

The use of on-line ion chromatography for high temperature and high pressure reaction studies
[DE94-002525] p 2713 N94-26075

Se EXAFS study of the elevated wurtzite to rock salt structural phase transition in CdSe nanocrystals
[DE94-003247] p 3054 N94-26125

Calibrating/testing meters in hot water test bench VM7
[PB94-124294] p 2812 N94-27160

Technical report of ISSP. Ser. A, no. 2682: Pressure dependence of Sm:YAG fluorescence to 50 GPa: A new calibration as a high pressure scale
[JTN-94-80568] p 3066 N94-27354

High-temperature and high-pressure flow calorimeter
p 2718 N94-27390

HIGH RESOLUTION

High resolution fourier transform absorption spectrum of 79Br2 B3 Pi(Ou+) X1 sigma g+
[AD-A273864] p 2956 N94-25610

High resolution studies of sunspots and flux tubes
[NASA-CR-195216] p 3111 N94-27321

HIGH REYNOLDS NUMBER

The high Reynolds number flow through an axial-flow pump
[AD-A273844] p 2789 N94-25604

Flow past a circular cylinder with a permeable wake splitter plate
[AD-A273765] p 2790 N94-25872

Computational investigation of the compressible dynamic stall characteristics of the Sikorsky SSC-A09 airfoil
[AD-A274867] p 2644 N94-26191

HIGH SPEED

Design optimization of high-speed proprotor aircraft
[NASA-TM-103988] p 2667 N94-26151

Multichip module high speed testing
[AD-A274873] p 2782 N94-26343

HIGH SPEED PHOTOGRAPHY

Flash unit for high speed photography
[PML-1992-91] p 2811 N94-26647

HIGH STRENGTH

Study on the mechanism of titanium alloy toughness and the improvement of properties
p 2726 N94-25566

High performance fibers
[AD-A274693] p 2707 N94-26450

Mechanical properties and microstructure of thermomechanically processed, high manganese steel
[ARL-TR-146] p 2747 N94-28212

HIGH STRENGTH ALLOYS

The transition from stress corrosion cracking to corrosion fatigue in AA-7075 and AA-8090
[ISBN-0-315-59526-4] p 2744 N94-27950

HIGH STRENGTH STEELS

Study on improvements in fretting fatigue characteristics of high strength structural member p 2726 N94-25567

Study on performance evaluation of pressure vessel steel in corrosion environments with sulfide
p 2730 N94-25582

Study on fatigue crack propagation characteristics around welded joint interface in complexed conditions
p 2730 N94-25584

Design of cold-formed HSS channels for bending and eccentric compression: Bending in the plane of symmetry
[VTT-TIED-1403] p 2762 N94-25622

Weldability of Direct-Quenched and Tempered (DQT) high strength steel HT80
[VTT-TIED-1406] p 2731 N94-25623

Weldability of Accelerated-Cooled (AcC) high strength TMCP steel HT50
[VTT-TIED-1410] p 2731 N94-25784

The study of single-pass GMA welds with different cover gas compositions on HSLA-100 steel
[AD-A274857] p 2822 N94-26174

The influence of weld metal alloying additions to extend the heat input range for the submerged arc welding of high strength steels
[AD-A274284] p 2738 N94-26679

HIGH TEMPERATURE

Fundamental study on monitoring technology on local surface damages p 2724 N94-25555

Failure mechanisms of high temperature semiconductor lasers
[AD-A273833] p 2815 N94-25616

Characterization of fatigue damage in a metal matrix composite (SCS-6/Ti-15-3) at elevated temperature
[AD-A273797] p 2706 N94-25876

The use of on-line ion chromatography for high temperature and high pressure reaction studies
[DE94-002525] p 2713 N94-26075

Zinc(2) oxide stability in alkaline sodium phosphate solutions at elevated temperatures
[DE94-003316] p 2715 N94-26320

High performance fibers
[AD-A274693] p 2707 N94-26450

Attachment techniques for high temperature strain
[AD-A274766] p 2811 N94-26568

High-temperature and high-pressure flow calorimeter
p 2718 N94-27390

High temperature grain growth and oxidation of Fe-29Ni-17Co (Kovar (tm)) alloy leads
[DE94-004691] p 3069 N94-27753

Development of advanced high temperature in-cylinder components and tribological systems for low heat rejection diesel engines, phase 1
[NASA-CR-187158] p 2827 N94-27984

HIGH TEMPERATURE ENVIRONMENTS

Preparation of creep data sheet: Material strength data sheet p 2723 N94-25548

Study on evaluation of crack generation and crack growth behaviors under static loading at high temperature and under combined loading p 2730 N94-25583

Radiation hardening effects on localized deformation and stress corrosion cracking of stainless steels
[DE94-004308] p 2731 N94-25804

Engineering limitations of ceramic composites for high performance and high temperature applications
[DE94-001676] p 2754 N94-27021

High temperature sensor/microphone development for active noise control
[NASA-CR-195214] p 2812 N94-27214

Creep rupture properties of a nickel-base heat-resistant alloy Hastelloy XR under varying temperature/stress condition
[DE94-701175] p 2743 N94-27807

Microspheres for laser velocimetry in high temperature wind tunnel p 2682 N94-27903

HIGH TEMPERATURE GASES

Pressure distributions on a 0.02-scale Space Shuttle orbiter nose at Mach 21.5 in helium
[NASA-TM-4495] p 2646 N94-26592

Experiments into the scaling parameters required for exhaust gas ingestion testing of vertical landing aircraft
p 2671 N94-28017

Influence of headwind on hot gas reingestion and consideration of pressure ratio scaling
p 2675 N94-28018

Unsteady aspects of hot gas reingestion and statistical analysis p 2676 N94-28019

Fibrous ceramic candle filter for particle removal in pressurized fluidized bed combustion
[PB94-133089] p 2876 N94-28383

Experimental studies of pressurised fluidised bed combustion at Helsinki University of Technology, 1991-1992
[PB94-133063] p 2876 N94-28394

HIGH TEMPERATURE PLASMAS

Interaction between a high density-low temperature plasma and a frozen hydrogen pellet in a railgun injector
[DE94-000846] p 3041 N94-25949

A study of the global properties of hadronic matter at large densities
[ISBN-0-315-57234-5] p 3025 N94-27260

Nonlinear transverse propagation of photons in a ultrarelativistically hot and magnetized electron-positron plasma: Coupling of Langmuir and electromagnetic solitons
[DE94-603667] p 3046 N94-27630

Proceedings of the 16th Symposium on Plasma Physics and Technology
[DE94-604181] p 3047 N94-27698

HIGH TEMPERATURE SUPERCONDUCTORS
Microscopic study of local structure and charge distribution in metallic La2CuO(4+delta)
[DE94-003801] p 3050 N94-25817
Flux flow, pinning, and resistive behavior in superconducting networks
[DE94-003400] p 3050 N94-25848
Optical conductivity and resistivity in the two-band Emery model
[DE94-601943] p 3051 N94-25945
The First Energy Conference: Israel and the Former USSR
[ISBN-965-229-098-X] p 2853 N94-26050
Prospects for utilization of superconductors in the power industry p 2854 N94-26057
The potential for large critical currents in the high T(sub c) oxides p 2854 N94-26058
Liquid and solid solubility of Ag in Bi2Sr2CaCu2O8
[DE94-002829] p 2735 N94-26273
Submillimeter residual losses in high-(Tc) superconductors
[DE94-003241] p 3058 N94-26516
Preparation and characterization of high temperature superconductor film surfaces
[AD-A274293] p 3059 N94-26681
Calculation of the electromagnetic critical state response of high T(sub c) superconductor tape
[DE94-002894] p 3061 N94-26868
Processing, fabrication, and demonstration of HTS integrated microwave circuits, appendix A
[AD-A274600] p 2785 N94-26890
Technical report of ISSP. Ser. A, no. 2683: Itinerant character of 5f electrons in UNi2Ga
[JTN-94-80569] p 3025 N94-27337
Gauge invariance and transport properties in superconductors above T(c)
[DE94-604013] p 3068 N94-27677
Evaluation of high temperature superconductive thermal bridges for space-borne cryogenic infrared detectors
p 2815 N94-27921
The optical properties of high-T(c) superconductors grown by pulsed laser deposition
[ISBN-0-315-84917-7] p 3039 N94-27962
Anisotropy in the electrical, magnetic and optical properties of Pb2Sr2RCu3O8
[ISBN-0-315-84930-4] p 3070 N94-27974
HIGH TEMPERATURE TESTS
Investigation of tension-compression fatigue behavior of a cross-ply metal matrix composite at room and elevated temperatures
[AD-A273731] p 2706 N94-25999
High temperature tension test equipment of heat resistant composite materials
[NAL-TM-652] p 2710 N94-27255
SP/MSP tests for the evaluation of FGM
[NAL-SP-17] p 2710 N94-27279
SP/MSP tests for the evaluation of FGM
p 2710 N94-27280
Research on the development of fracture characteristics evaluation system for ceramics and metal composite materials p 2710 N94-27281
HILBERT SPACE
Quantizable configurations of the relativistic string
[DE93-634346] p 3072 N94-26036
Necessary and sufficient conditions for the existence of the stabilizing solution of the Riccati equation in a Hilbert space: A Popov function approach
[PB94-125341] p 2997 N94-26999
Joint essential maximal numerical range
[DE94-603674] p 3000 N94-27637
Hessenberg matrices in Krylov subspaces and the computation of the spectrum
[PB94-133170] p 3001 N94-28389
HILL METHOD
Hill equations for satellite orbit determination
[ETN-94-95374] p 2690 N94-25787
HISS
Memories of National Institute of Polar Research. Series A-19. Upper atmosphere physics: ELF emission in high latitudes: Ray path calculation and ground-satellite observations
[JTN-94-80592] p 2882 N94-27342
HISTOCHEMICAL ANALYSIS
The 27th Annual Meeting of the Israel Society for Microscopy and the 12th Annual Meeting of the Israel Society for Histochemistry and Cytochemistry
[DE93-632416] p 2716 N94-26519
HISTORIES
FNAS lightning detection
[NASA-CR-193927] p 2893 N94-26134
The evolution of the high-speed civil transport
[NASA-TM-109089] p 3117 N94-26155
Nasa Langley Research Center seventy-fifth anniversary publications, 1992
[NASA-TM-109691] p 3118 N94-27431
Effects of historical and predictive information on ability of transport pilot to predict an alert
[NASA-TM-4547] p 2673 N94-27864
Development of the gas turbine. Part 1: Design philosophy and performance p 2831 N94-28080
Science beyond the atmosphere: The history of space research in Europe
[ESA-HSR-SPECIAL] p 2689 N94-28207
HODOSCOPES
The 1024 scintillation hodoscope
[DE93-634183] p 2810 N94-26394
HOLE GEOMETRY (MECHANICS)
Three-dimensional elastic stress concentration factors: Plain or countersunk hole in a wide plate subjected to tension, bending, or pin loading
[ESDU-93030] p 2845 N94-28143
HOLES (MECHANICS)
Investigation of compressive behavior for metal matrix composites with a circular hole
[AD-A273835] p 2705 N94-25739
A study of graphite peek composite with central elliptical holes under tension
[AD-A273779] p 2705 N94-25863
Mechanically fastened composite laminates subjected to combined bearing-bypass and shear loading
p 2712 N94-27914
Three-dimensional elastic stress concentration factors: Plain or countersunk hole in a wide plate subjected to tension, bending, or pin loading
[ESDU-93030] p 2845 N94-28143
HOLLOW CATHODES
Theoretical aspects of the agile mirror
[AD-A274890] p 2767 N94-26177
HOLMIUM
The development of Cr, Tm, Ho:YAG lasers for airborne lidar
[AD-A274895] p 2816 N94-26178
HOLOGRAMMETRY
Resonant holographic measurements of laser ablation plume expansion in vacuum and argon gas backgrounds
[DE94-001407] p 2813 N94-27615
HOLOGRAPHIC INTERFEROMETRY
Resonant holographic measurements of laser ablation plume expansion in vacuum and argon gas backgrounds
[DE94-001407] p 2813 N94-27615
HOLOGRAPHY
High definition Raman microscopic imaging
[DE94-003158] p 2716 N94-26781
Advanced technology development multi-color holography
[NASA-CR-193931] p 2812 N94-27229
Resonant holographic measurements of laser ablation plume expansion in vacuum and argon gas backgrounds
[DE94-001407] p 2813 N94-27615
Binary optical elements: Studies in design, manufacture and performance
[ISBN-0-315-60643-6] p 3039 N94-27643
The x ray holographic microscopy using the atomic-force microscope
[DE94-004003] p 2814 N94-27779
HOMING DEVICES
Elastic backscattering lidar for a MSTI satellite
[DE94-002701] p 2816 N94-26126
HOMOGENEITY
Study on solidification of non-homogeneous melting/solidification materials p 2728 N94-25573
Study of the homogeneity of InP wafers
[AD-A273658] p 3055 N94-26194
HOMOGENEOUS TURBULENCE
On prediction of equilibrium states in homogeneous compressible turbulence
[NASA-CR-4570] p 2792 N94-26467
The dynamics of interacting nonlinearities governing long wavelength driftwave turbulence
[DE94-001785] p 2793 N94-26558
HOMOGENIZING
Study on solidification of non-homogeneous melting/solidification materials p 2728 N94-25573
HOMOLOGY
Spaces of algebraic cycles
[PB94-124369] p 2996 N94-26993
HOMOMORPHISMS
Filtering, coding, and compression with Malvar wavelets
[AD-A274055] p 2780 N94-25770
HOMOTOPY THEORY
Winding numbers in homotopy theory from integers to reals
[DE94-601510] p 2992 N94-26367
Research in robust control for hypersonic aircraft
[NASA-CR-195250] p 2678 N94-26821
HORIZONTAL FLIGHT
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 4: Laser velocimeter wake data, advance ratio of 0.037
[NASA-TM-109040-VOL-4] p 2645 N94-26483
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 1: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0081 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-1] p 2645 N94-26489
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 2: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 710 feet/second
[NASA-TM-109040-VOL-2] p 2645 N94-26492
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 3: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-3] p 2645 N94-26497
HORIZONTAL TAIL SURFACES
Contribution of body-mounted fins and tailplanes to lateral derivatives due to sideslip at subsonic speeds for general body width to height ratio
[ESDU-93007] p 2648 N94-28057
HORMONES
Thyroid hormone action in cultured human skin fibroblasts: Evaluation using spheroid culture
p 2919 N94-27478
Interaction between endogenous opioid and Cholecystokinin (CCK) in modulating respiratory responses induced by thin-fiber muscular afferents
p 2906 N94-27502
Muscle sympathetic nerve activity in patients with hyper-and hypothyroidism: A microneurographic study
p 2930 N94-27531
Treatment of orthostatic hypotension by nasal administration of vasopressin p 2930 N94-27533
HORN ANTENNAS
Design and evaluation of an electromagnetic beam waveguide for measuring electrical properties of materials
[NASA-TP-3418] p 2769 N94-26611
The application of FD-TD method to antenna radiation patterns
[ISBN-0-315-83893-0] p 2769 N94-26618
HORSEPOWER
E. H. P. estimation of high speed fishing boats by some existing methods p 2764 N94-27978
HORSESHOE VORTICES
Separated flow generated by a vectored jet in a crossflow p 2800 N94-28007
HOT ISOSTATIC PRESSING
The processing of powder metallurgically produced near gamma-titanium aluminide
[ISBN-0-315-84018-8] p 2738 N94-26633
Transparent polycrystalline body with high ultraviolet transmittance, process for making and applications thereof
[CA-PATENT-1325511] p 3066 N94-27276
HOT STARS
TEV emission from close binaries
[DE93-634330] p 3104 N94-26268
HOT WORKING
The processing of powder metallurgically produced near gamma-titanium aluminide
[ISBN-0-315-84018-8] p 2738 N94-26633
Hot deformation behaviour of Si(p)/Al composites and their matrices and an Al-Mg-Si alloy
[ISBN-0-315-84699-2] p 2711 N94-27314
HOT-WIRE ANEMOMETERS
Evaluation of a concentration probe for application in a supersonic flow field
[AD-A273915] p 2643 N94-25592
Effects of free-stream turbulence on a jet in a cross flow p 2805 N94-28036
HOWITZERS
Results from a fracture mechanical serial investigation of breechrings on the M109A3GN howitzer
[FFI-93/8002] p 2837 N94-26233
HTPB PROPELLANTS
Cryogenic size reduction of solid propellant
[AD-A274844] p 2759 N94-26800
HULLS (STRUCTURES)
Evaluation of crack arrest fracture toughness of parent plate, weld metal and heat affected zone of BIS 812 EMA ship plate steel
[AD-A274871] p 2839 N94-26859
HUMAN BEHAVIOR
Man's ability to adapt himself for the seasonal climatic changes: From viewpoint of anticipation and seasonable behavior p 2919 N94-27476
HUMAN BODY
Creation of prototype aircrew protection equipment based on face anthropometry
[AD-A273865] p 2940 N94-25611

A multivariate anthropometric method for crew station design: Abridged
[AD-A274588] p 2941 N94-26984
NCVS, volume 5
[AD-A274975] p 2902 N94-27165
A study of psychological factors affecting an extremely isolated environment p 2927 N94-27517
Interhemispheric phase relationship of alpha waves and cerebral dominance p 2927 N94-27518
Hyperalgesia to cold in patients with Subacute Myelo-Optico-Neuropathy (SMON) p 2928 N94-27521
Effect of prostaglandin E1 on the relationship between skin sympathetic nerve activity and reduction in skin blood flow p 2929 N94-27524
Effect of L-dopa on hemodynamic functions in humans p 2929 N94-27526
Sympathetic nerve activity during dynamic leg exercise p 2929 N94-27527
Analysis on one minute wave in body fluid volume and muscle pumping referred to body parts generating the one minute wave during human active standing p 2929 N94-27528
An attempt of intraneural stimulation by microelectrode inserted in skin sympathetic nerve fascicle p 2930 N94-27529
Muscle sympathetic nerve activity in patients with hyper-and hypothyroidism: A microneurographic study p 2930 N94-27531
Treatment of orthostatic hypotension by nasal administration of vasopressin p 2930 N94-27533
The value of electrical stimulation as an exercise training modality p 2936 N94-28372

HUMAN FACTORS ENGINEERING
Creation of prototype aircrew protection equipment based on face anthropometry
[AD-A273865] p 2940 N94-25611
Variable speed controller p 2943 N94-25678
Design and development of the second generation Mars Habitat p 2943 N94-25693
Pax: A permanent base for human habitation of Mars p 2943 N94-25706
The effect of platform motion on human energy expenditure during walking. An exploratory experiment
[AD-A273760] p 2940 N94-25724
Airborne data link operational evaluation test plan
[AD-A274096] p 2664 N94-25788
Human factors in airway facilities maintenance: Development of a prototype outage assessment inventory
[DOT/FAA/AM-94/5] p 2941 N94-26136
Emerging Human-Computer Interface (HCI) design guidelines for Graphical User Interface (GUI)
[DE94-004293] p 2941 N94-26555
A multivariate anthropometric method for crew station design: Abridged
[AD-A274588] p 2941 N94-26984
Designing for human presence in space: An introduction to environmental control and life support systems
[NASA-RP-1324] p 2942 N94-27437
One from many: Selecting an appropriate human performance model
[DCIEM-93-25] p 2942 N94-27683
Human computer interface guide, revision A
[NASA-TM-109708] p 2955 N94-27769
Extra-Vehicular Activity (EVA) glove evaluation test protocol
[NASA-TM-108442] p 2943 N94-27952
Visit to CERMA: Centre d'Etudes et de Recherches de Medecine Aerospatiale, Centre for Studies and Research in Aviation and Space Medicine, Bretigny sur Orge, France, November 16-18, 1992
[PB94-132990] p 2937 N94-28392

HUMAN PERFORMANCE
Airborne data link operational evaluation test plan
[AD-A274096] p 2664 N94-25788
A test of the theory of reasoned action at the group level of analysis
[AD-A273965] p 2937 N94-25897
Proficiency scaling based on conditional probability functions for attributes
[AD-A273816] p 3002 N94-25962
Effects of methamphetamine on vigilance and tracking during extended wakefulness
[AD-A274896] p 2909 N94-26179
Performance assessment in sustained operations using a computer-based synthetic work task
[AD-A274707] p 2937 N94-26430
Long term learning: Integration of knowledge acquisition and knowledge compilation
[AD-A274775] p 3098 N94-26570
Workload transition: Implications for individual and team performance
[AD-A274538] p 2941 N94-26964
On the development of motor chunks and concurrent processing in a structured continuous keypressing task
[AD-A274153] p 2939 N94-27138
One from many: Selecting an appropriate human performance model
[DCIEM-93-25] p 2942 N94-27683
An analysis of the loads applied to a heavy Space Station rack during translation and rotation tasks
[NASA-TM-104790] p 2697 N94-28183
Muscular activity and its relationship to biomechanics and human performance p 2934 N94-28362

HUMAN REACTIONS
CRC customer versus rater octane number requirement program (1990)
[AD-A273997] p 2758 N94-25901
Performance assessment in sustained operations using a computer-based synthetic work task
[AD-A274707] p 2937 N94-26430
Telescience testbedding for physiological experiments under hypobaric hypoxic conditions p 2913 N94-27449
Telescience testbedding under hypobaric hypoxic conditions: Evaluation by operation ability and recognition ability p 2913 N94-27450
Telescience testbedding for physiological experiments under hypobaric hypoxic conditions: Development and evaluation in CNV measuring p 2913 N94-27451
The electrogastrogram during parabolic flight p 2913 N94-27452
Experimental studies of loudness and annoyance response to sonic booms p 2651 N94-28195
Comparison of methods of predicting community response to impulsive and nonimpulsive noise p 2651 N94-28196
Muscular activity and its relationship to biomechanics and human performance p 2934 N94-28362

HUMAN RELATIONS
A test of the theory of reasoned action at the group level of analysis
[AD-A273965] p 2937 N94-25897

HUMAN RESOURCES
ADP Analysis project for the Human Resources Management Division p 2978 N94-27927

HUMAN-COMPUTER INTERFACE
Interface technical specification of the V.25 bis emulator
[AD-A273754] p 2948 N94-25720
Airborne data link operational evaluation test plan
[AD-A274096] p 2664 N94-25788
Knowledge organization in intelligent tutoring systems for diagnostic problem solving in complex dynamic domains
[AD-A273986] p 2984 N94-25899
EcarHeart2 version 1.0: Programmers documentation
[PB94-124633] p 2909 N94-25909
Integration of interactive interfaces with intelligent tutoring systems: An implementation
[AD-A273869] p 2985 N94-25966
Developing a sophisticated user interface to support domain-oriented application composition and generation systems
[AD-A274080] p 2960 N94-25994
Developing a graphical user interface to support a real-time digital signal processing system
[AD-A274032] p 2960 N94-26018
Design and implementation of a query editor for the Amadeus system
[AD-A274955] p 3097 N94-26300
Emerging Human-Computer Interface (HCI) design guidelines for Graphical User Interface (GUI)
[DE94-004293] p 2941 N94-26555
Interactive control of a parallel simulation from a remote graphics workstation
[AD-A274217] p 2981 N94-27070
An object-oriented database interface for Ada
[AD-A274391] p 2968 N94-27075
The coming technological singularity: How to survive in the post-human era p 2685 N94-27359
Human computer interface guide, revision A
[NASA-TM-109708] p 2955 N94-27769
Visualization techniques to aid in the analysis of multispectral astrophysical data sets
[NASA-CR-195268] p 3105 N94-27932

HUMIDITY
Rewarming methodologies in the field
[AD-A274744] p 2909 N94-26173

HURRICANES
Development and testing of the Coupled Ocean/Atmosphere Mesoscale Prediction System (COAMPS)
[AD-A273925] p 2892 N94-25793
Developing prediction regions for a time series model for hurricane forecasting
[AD-A273777] p 2892 N94-25861

HYBRID PROPULSION
MINOTAUR (Maryland's innovative orbital technologically advanced University rocket) p 2703 N94-25685

HYDRATES
Crystallographyic analyses of clathrate hydrates included in Vostok ice cores p 2885 N94-27969

HYDRAULIC EQUIPMENT
Comparison of dynamic analysis of a Schilling hydraulic manipulator with experimental results
[DE94-004597] p 2827 N94-27780

HYDRAULIC JETS
Effects of slot on rock surface for percussive rock excavation: Water jet assisted percussive rock excavation p 2871 N94-28155

HYDRIDES
Molten salt techniques for reproducible excess heat
[AD-A274935] p 2714 N94-26296

HYDROCARBON COMBUSTION
Laser probes of natural gas ignition chemistry
[PB94-128345] p 2717 N94-27226

HYDROCARBON FUEL PRODUCTION
Report of National Institute for Resources and Environment. No. 5: Study on direct liquefaction of woody biomass
[JTN-94-80551] p 2859 N94-27204

HYDROCARBON FUELS
Theoretical determination of chemical rate constants using novel time-dependent methods
[NASA-CR-195221] p 2714 N94-26205

HYDRODYNAMIC COEFFICIENTS
Influence of impeller shroud forces on turbopump rotor dynamics p 2796 N94-27378

HYDRODYNAMICS
Vortex methods
[DE94-003245] p 2789 N94-25597
Hydrodynamics, acoustics and scaling of traveling bubble cavitation
[AD-A273846] p 2789 N94-25605
A numerical study of quantized vortices in HeII
[ISBN-9-03-860232-4] p 2792 N94-26479
Image potential of a tunnelling electron moving near two different metals
[DE94-603657] p 3069 N94-27819
Calculation methods for steadily loaded central circumferential groove hydrodynamic journal bearings (guide to use of computer program A9304)
[ESDU-93004] p 2830 N94-28073
Calculation methods for steadily loaded axial groove hydrodynamic journal bearings (guide to use of computer program A9305)
[ESDU-93005] p 2830 N94-28074
Calculation methods for steadily loaded axial groove hydrodynamic journal bearings. Low viscosity process fluid lubrication (guide to use of computer program A9306)
[ESDU-93006] p 2830 N94-28075
Forced convection heat transfer in straight tubes. Part 2: Laminar and transitional flow
[ESDU-93018-PT-2] p 2807 N94-28139
An enhanced global spectral model
[PL-TR-92-2011] p 2898 N94-28223

HYDROELECTRICITY
COMPETENCE 2000: Study on training requirements of the Norwegian metallurgical industry
[PB94-124609] p 2741 N94-27328

HYDROFORMING
Polymer-bound rhodium hydroformylation catalysts
[ETN-94-95388] p 2712 N94-25747

HYDROGEN
Hydrogen trapping with Pd coated alloy films p 2723 N94-25551
Hydrogen uptake into silicon from an ECR plasma
[DE94-003771] p 3050 N94-25815
Trapped electrons in solid hydrogen
[DE93-018628] p 3052 N94-25947
Interaction between a high density-low temperature plasma and a frozen hydrogen pellet in a railgun injector
[DE94-000846] p 3041 N94-25949
Application of railgun principle to high-velocity hydrogen pellet injection for magnetic fusion reactor fueling
[DE94-004411] p 3044 N94-26579
An investigation of the effect of surface impurities on the adsorption kinetics of hydrogen chemisorbed onto iron
[NASA-CR-195213] p 2716 N94-26643
Spin asymmetry in resonant electron-hydrogen elastic scattering
[DE94-601813] p 3023 N94-26943
Spectroscopy and dynamics of molecular and ionic impurities embedded in solid hydrogen
[AD-A274149] p 3064 N94-27095
Numerical simulation of the reignition of detonation by reflected shocks
[AD-A274755] p 2795 N94-27252
Hydrogen physics
[DE94-701317] p 2719 N94-27822

HYDROGEN ATOMS
Study on alloy films for hydrogen separation p 2726 N94-25565

Merged-beam studies of electron-recombination and excitation of atomic and molecular hydrogen ions
[ETN-94-95339] p 3019 N94-26478

Shine through measurements with hydrogen beam in JT-60
[DE94-701113] p 3047 N94-27699

The three-dimensional hydrogen atom in crossed magnetic and electric fields
[DE94-606301] p 3029 N94-27847

HYDROGEN BONDS

Molecular surface electrostatic potentials in the analysis of non-hydrogen-bonding noncovalent interactions
[AD-A274612] p 3022 N94-26894

Hydrogen physics
[DE94-701317] p 2719 N94-27822

HYDROGEN EMBRITTLEMENT

Study on performance evaluation of pressure vessel steel in corrosion environments with sulfide
p 2730 N94-25582

HYDROGEN FUELS

Proceedings of the High Energy Density Matter (HEDM) Contractor's Conference
[AD-A274452] p 3033 N94-27083

HYDROGEN IONS

Spectroscopy and dynamics of molecular and ionic impurities embedded in solid hydrogen
[AD-A274149] p 3064 N94-27095

High gas-efficiency hydrogen negative ion sources
[PB93-232163] p 3025 N94-27348

Double excitation of He and H(-) by fast proton and anti-proton impact
[DE94-004581] p 3026 N94-27620

HYDROGEN ISOTOPES

Muon transfer rates in collisions of hydrogen isotope mesic atoms on bare nuclei: Multichannel adiabatic approach
[DE94-606752] p 3030 N94-27861

HYDROGEN MASERS

Spin-polarized atomic hydrogen: Devices and phenomena
[ETN-94-95342] p 3016 N94-26002

HYDROGEN OXYGEN ENGINES

Gaseous hydrogen/oxygen injector performance characterization
[NASA-CR-194464] p 2701 N94-26208

Test results of the RS-44 integrated component evaluator liquid oxygen/hydrogen rocket engine
[NASA-CR-194443] p 2701 N94-26231

Orbit transfer rocket engine technology program
[NASA-CR-189229] p 2702 N94-26542

Orbital transfer rocket engine technology 7.5K-LB thrust rocket engine preliminary design
[NASA-CR-190754] p 2703 N94-27213

Lunar Transportation Facilities and Operations Study, option 1
[NASA-CR-195700] p 3109 N94-27982

HYDROGEN PLASMA

Hydrogen uptake into silicon from an ECR plasma
[DE94-003771] p 3050 N94-25815

HYDROGENATION

Deposition of a-SiC:H using organosilanes in an argon/hydrogen plasma
[DE94-004428] p 2751 N94-26580

The Science Reports of the Research Institutes, Tohoku University. Series A: Physics, Chemistry, and Metallurgy. Volume 38, No. 1: Amorphous Materials 14
[JTN-94-80610] p 2744 N94-28158

Formation and crystallization of hydrogen-induced amorphous Ti3InH(4.5) alloy p 2745 N94-28163

CO2 methanation catalysts prepared from amorphous Ni-valve metal alloys containing platinum group elements
p 2745 N94-28166

HYDROGRAPHY

Hydrographic and Acoustic Doppler Current Profiler (ADCP) data from the ONR eastern boundary current accelerated research initiative, 9-16 June 1992
[AD-A274115] p 2898 N94-26076

Compilation of corrections for postprocessing of laser bathymetry data
[PB94-123668] p 2900 N94-27156

Scanview: A grafical program for analysis of laserbathymetry data
[PB94-124443] p 2900 N94-27208

HYDROLOGICAL CYCLE

Meeting of the Eighth Session of the Scientific Advisory Committee of the World Climate Impact Assessment and Response Strategies Programme
[DE93-633954] p 2866 N94-26163

Global change research related to the Earth's energy and hydrologic cycle
[NASA-CR-195270] p 2869 N94-27430

Cooperative research projects on satellite remote sensing for the hydrological subjects
p 2853 N94-28270

Research activities on the meteorology over the Asia-Pacific region p 2853 N94-28271

HYDROLOGY

Sensitivity of climate models: Comparison of simulated and observed patterns for past climates
[DE93-019934] p 2865 N94-25789

Active layer dynamics and arctic hydrology and meteorology
[DE94-001724] p 2892 N94-25951

HYDROSTATIC PRESSURE

Fluid dynamic linear accelerometer
[AD-D016042] p 2678 N94-27112

HYDROSTATICS

A hydrostatic stress-dependent anisotropic model of viscoplasticity
[NASA-TM-106525] p 2711 N94-27640

An enhanced global spectral model
[PL-TR-92-2011] p 2898 N94-28223

HYDROXYL EMISSION

Photochemical processes and the atmospheric airglow emissions of OH and Na in the mesospheric region
[INPE-5380-PUD/050] p 2882 N94-27334

HYPERBOLIC DIFFERENTIAL EQUATIONS

On the oscillation of a class of hyperbolic equations of neutral type
[DE93-616815] p 2990 N94-25829

Oscillatory behaviour of solutions of coupled hyperbolic differential equations of neutral type
[DE93-616816] p 2990 N94-25830

Analytical solution of Mori's equation with secant hyperbolic memory
[DE94-601541] p 3006 N94-26368

HYPERBOLIC FUNCTIONS

Arbitrary-order high resolution schemes for model hyperbolic conservation laws
[CRANFIELD-AERO-9209] p 3005 N94-25823

HYPERCUBE MULTIPROCESSORS

Object-oriented design and implementation of a parallel Ada simulation system
[AD-A274119] p 2979 N94-25906

Fast parallel algorithms for short-range molecular dynamics
[DE93-018519] p 3016 N94-26033

Simulation modeling for long duration spacecraft control systems p 2684 N94-26288

An efficient communication scheme for solving the S(sub n) equations on message-passing multiprocessors
[DE94-000378] p 2769 N94-26482

Partitioning structural VHDL circuits for parallel execution on hypercubes
[AD-A274390] p 2785 N94-26830

Static task allocation for parallel processing systems during software development
[AD-A274204] p 2981 N94-27100

HYPERFINE STRUCTURE

Study of the hyperfine magnetic field at Ta-181 site in the Heusler Co2ScSn, Co2ScGa, and Co2HfSn alloys
[DE94-603989] p 3067 N94-27623

Hyperfine structure of positronium energy levels in a crystal
[DE94-603898] p 3068 N94-27729

HYPERGEOMETRIC FUNCTIONS

Asymptotics for Kummer functions, Bose plasmas, and related special functions
[DE94-601853] p 3007 N94-26928

HYPERNUCLEI

Proceedings of the workshop on (pi), K, (eta)-nucleon interactions
[DE94-701314] p 3027 N94-27733

HYPERPLANES

Enumeration of n-fold tangent hyperplanes to a surface
[DE94-601544] p 2993 N94-26412

HYPERSONIC AIRCRAFT

The design of four hypersonic reconnaissance aircraft
p 2671 N94-25716

Design of a refueling tanker delivering liquid hydrogen
p 2671 N94-25717

Research in robust control for hypersonic aircraft
[NASA-CR-195250] p 2678 N94-26821

Numerical investigation of thrust vectoring by injection of secondary air into nozzle flows p 2801 N94-28013

HYPERSONIC BOUNDARY LAYER

Experimental study on the shock wave interaction with a hypersonic boundary layer near a convex corner
p 2654 N94-28328

HYPERSONIC FLIGHT

Experiments on interaction force of jets in hypervelocity cross-flow in a shock tunnel p 2659 N94-28022

Computation of static pressure downstream of a normal shock for hypersonic flight (ambient temperature known)
[ESDU-93020] p 2649 N94-28091

HYPERSONIC FLOW

Chemical and vibrational nonequilibrium viscous flows: Modelling, internal and external flow applications
[ESA-TT-1274] p 2791 N94-26316

The measurement of disturbance levels in the Langley Research Center 20-inch Mach 6 tunnel
[NASA-CR-4571] p 2646 N94-26548

Direct simulation Monte-Carlo of near continuum hypersonic flow with chemical reactions
[DLR-FB-93-01] p 2797 N94-27588

Flowfield dynamics in blunt fin-induced shock wave/turbulent boundary layer interactions
[NASA-CR-195170] p 2798 N94-27302

Aerodynamic heating in hypersonic flows
p 2658 N94-27919

Computational and Experimental Assessment of Jets in Cross Flow
[AGARD-CP-534] p 2799 N94-28003

Control jets in interaction with hypersonic rarefied flow
p 2698 N94-28020

Comparison of the interactions of two and three dimensional transverse jets with a hypersonic free stream p 2659 N94-28021

HYPERSONIC INLETS

Experimental study on the shock wave interaction with a hypersonic boundary layer near a convex corner
p 2654 N94-28328

HYPERSONIC SHOCK

The Lightcraft project: Flight technology for a hypersonic mass transit system p 2670 N94-25695

Computation of static pressure downstream of a normal shock for hypersonic flight (ambient temperature known)
[ESDU-93020] p 2649 N94-28091

HYPERSONIC VEHICLES

A parametric sensitivity study for single-stage-to-orbit hypersonic vehicles using trajectory optimization
[NASA-CR-195703] p 2697 N94-27789

Multidisciplinary aeroelastic analysis of a generic hypersonic vehicle
[NASA-TM-4544] p 2691 N94-27868

Aerodynamic heating in hypersonic flows
p 2658 N94-27919

HYPERSONIC WIND TUNNELS

Aerodynamic heating in hypersonic flows
p 2658 N94-27919

HYPERSONICS

The Lightcraft project: Flight technology for a hypersonic mass transit system p 2670 N94-25695

Modelling of ionisation reactions and of the resulting electric fields in one-dimensional hypersonic shock waves with the direct simulation Monte Carlo method
[IC-AERO-92-01] p 2644 N94-26248

HYPERSPHERES

Static task allocation for parallel processing systems during software development
[AD-A274204] p 2981 N94-27100

HYPERTENSION

Monograph of the aviation epidemiology data register for calendar year 1988
[AD-A274589] p 2911 N94-26985

Muscle sympathetic nerve activity in humans
p 2932 N94-27538

HYPERVELOCITY FLOW

A numerical study of mixing and combustion in hypervelocity flows through a scramjet combustor model
p 2808 N94-27911

Experiments on interaction force of jets in hypervelocity cross-flow in a shock tunnel p 2659 N94-28022

HYPERVELOCITY IMPACT

Physics of debris clouds from hypervelocity impacts
[NASA-CR-193932] p 2696 N94-26791

Consequences of impacts of small asteroids and comets with Earth p 2889 N94-28301

A general theory of impacts and mass extinctions, and the consequences of large-body impact on the Earth
p 2891 N94-28310

Were all extinction events caused by impacts?
p 2891 N94-28311

HYPERVELOCITY LAUNCHERS

Energy and technology review, July 1993
[DE94-004219] p 3118 N94-27566

HYPERVELOCITY PROJECTILES

Breakwire technique for hypervelocity measurement
[AD-A274779] p 2809 N94-26358

HYPOTENSION

Effect of L-dopa on hemodynamic functions in humans p 2929 N94-27526

Treatment of orthostatic hypotension by nasal administration of vasopressin p 2930 N94-27533

Does training-induced orthostatic hypotension result from reduced carotid baroreflex responsiveness?
p 2935 N94-28366

HYPOTHERMIA

Rewarming methodologies in the field
[AD-A274744] p 2909 N94-26173

HYPOTHESES

Trace-based compositional proof theory for fault tolerant distributed systems
[PB94-126737] p 2966 N94-26971

Thunderstorm Hypothesis Reasoner
[NASA-CR-195714] p 2897 N94-27884
Science observed: The mass-extinction debates
p 2888 N94-28300
An evaluation of criteria that may be used to identify species surviving a mass extinction
p 2889 N94-28304

HYPOTONIA
Effect of L-dopa on hemodynamic functions in humans p 2929 N94-27526

HYPOXIA
The Reports of Aeromedical Laboratory, volume 33, number 4
[JTN-94-80586] p 2933 N94-27942
Symptoms of hypoxia at simulated altitude of 25,000 feet p 2933 N94-27945

HYSTERESIS
Nonlinear hysteresis in an endochronic solid
[AD-A274594] p 2880 N94-26855
Ferrite phase shifters using stress insensitive materials
[AD-A274639] p 2708 N94-26895

I

ICE
Methane emissions from natural wetlands
[DE93-040796] p 2865 N94-25790
Sound, speed, reflectivity, absorption, and thermal diffusivity measurements in Arctic ice in 1990
[AD-A274326] p 2899 N94-26886
Reanalysis of Mariner 9 UV Spectrometer Data for Ozone, Cloud, and Dust Abundances, and Their Interaction Over Climate Timescales
[NASA-CR-195244] p 3107 N94-27885
Why is the north polar cap on Mars different than the south polar cap? p 3107 N94-27889
A laboratory test on construction of ice domes and their load-carrying capacity p 2884 N94-27966
Transient model applications. 3: Transient engine simulation and analysis of an ice ingestion test
p 2829 N94-28050

ICE CLOUDS
Cloud liquid water content measurement tests using dual-wavelength radar
[PB94-125960] p 2896 N94-26959

ICE FLOES
Crystallographyic analyses of clathrate hydrates included in Vostok ice cores p 2885 N94-27969

ICE FORMATION
Leadex environmental phenomena and effects observed by DMSP, NOAA, and ERS-1 satellites
[AD-A274596] p 2868 N94-26888
Why is the north polar cap on Mars different than the south polar cap? p 3107 N94-27889
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle mission STS-60
[NASA-TM-109193] p 2692 N94-27956
Development of a method for predicting snowfall intensity and compacted snow on roads
p 2853 N94-27990
Program for calculation of maximum lift coefficient of plain aerofoils and wings at subsonic speeds
[ESDU-93015] p 2649 N94-28076
Ice accretion on aircraft wings p 2657 N94-28345
Studies in ice mechanics
[PB94-133055] p 2900 N94-28393

ICE REPORTING
An evaluation of an airborne remote sensing system used to determine ice thickness and geometry of a first year sea ice ridge located in the Beaufort Sea
[ISBN-0-315-84383-7] p 2849 N94-26667
The Hough transform algorithm for sea ice lead analysis: An evaluation
[AD-A274535] p 2899 N94-26853

IGNITERS
Effects of repeating resistance testing on firing ability of igniter EP360-3
[AD-A274814] p 2759 N94-26486
New rubber qualification for the igniter adapter
[NASA-CR-193936] p 2752 N94-26708
Hydrogen-oxygen torch ignitor
[NASA-TM-106493] p 2691 N94-27424

IGNITION
Microgravity ignition experiment p 2761 N94-25707
On the thermal ignition with variable pre-exponential factor
[DE93-616009] p 2713 N94-25913
An apparatus for measurement of ignition and burning characteristics of metallic particles
[AD-A274815] p 2716 N94-26487
Numerical simulation of the reignition of detonation by reflected shocks
[AD-A274755] p 2795 N94-27252
Hydrogen-oxygen torch ignitor
[NASA-TM-106493] p 2691 N94-27424
The addition of molecular oxygen to hydroperoxy-propyl radicals
[DE94-003662] p 2760 N94-27725

IGNITION SYSTEMS
Optimising BMW four-cylinder two-valve engines
[PB94-125101] p 2824 N94-27254

ILLUMINATING
Illumination in diverse codimensions
[NASA-CR-191596] p 2971 N94-27572

IMAGE ANALYSIS
Study on knowledge extraction and systematization for material design p 2727 N94-25568
Detecting actin fibers in cell images using minimal spanning trees
[AD-A273914] p 2984 N94-25591
SHIVA: A unix-based, menu-driven, color image processing software package
[AD-A274071] p 2957 N94-25646
Zernike moments and rotation invariant object recognition. A neural network oriented case study
[AD-A273749] p 2767 N94-26011
Image segmentation by a combination of edge detection and region growing
[ETN-94-95032] p 2960 N94-26106
Capture and location of blobs in digital images
[ISBN-0-315-84382-9] p 3036 N94-26666
Proceedings of the Fourth Euroseminar on Microscopy Applied to Building Materials
[PB94-119807] p 2839 N94-26754
Interacting cortical filters for object recognition
[PB94-125374] p 2938 N94-26873
Woody biomass density in the Tendelti area of the central Sudan p 2850 N94-27185
Motion analysis from a sequence of range images
[ISBN-0-315-84684-4] p 2969 N94-27311
Robust estimation for range image segmentation and fitting
[ISBN-0-315-84686-0] p 2998 N94-27312
Estimation of image motion in scenes containing multiple moving objects
[ISBN-0-315-85208-9] p 2969 N94-27346
SPECTRUM analysis of multispectral imagery in conjunction with wavelet/KLT data compression
[DE94-003961] p 2851 N94-27727
Locating tie-points on a grid p 2978 N94-27906
Quick-look system of auroral absorption images by imaging riometer p 2884 N94-27968
The interaction region associated with twin jets and a normal crossflow p 2800 N94-28009
An image assessment study of image acceptability of the Galileo low gain antenna mission
p 2945 N94-28252
Image compression software for the SOHO LASCO and EIT experiments p 2945 N94-28253

IMAGE CLASSIFICATION
Mapping closed tropical forest cover in West Africa using NOAA/AVHRR-LAC data p 2850 N94-27184
Vector quantizer designs for joint compression and terrain categorization of multispectral imagery
p 2947 N94-28262

IMAGE CORRELATORS
Solid estimation feature based correlation method for measuring control points required for correcting satellite images
[VTT-JULK-772] p 2848 N94-26253

IMAGE ENHANCEMENT
Human visual system enhancement of reconstructed satellite images
[AD-A273867] p 2693 N94-25595
Improved quality of reconstructed images through sifting of data in statistical image reconstruction
[AD-A273884] p 3034 N94-25730
Auroral Tomography Workshop Proceedings
[PB94-123718] p 2881 N94-27040
An image assessment study of image acceptability of the Galileo low gain antenna mission
p 2945 N94-28252

IMAGE FILTERS
Non-adaptive robust filters for speckle noise reduction
[INPE-5519-PRE/1794] p 2776 N94-27335

IMAGE PROCESSING
Study on knowledge extraction and systematization for material design p 2727 N94-25568
Calculation of a 3-D pose of a known object in a single perspective view
[VTT-PUBS-122] p 2957 N94-25642
SHIVA: A unix-based, menu-driven, color image processing software package
[AD-A274071] p 2957 N94-25646
An optimal constrained linear inverse method for magnetic source imaging
[DE94-004014] p 2957 N94-25663
Improved quality of reconstructed images through sifting of data in statistical image reconstruction
[AD-A273884] p 3034 N94-25730
Objective image quality metrics: Applications for partially compensated images of space objects
[AD-A273837] p 2847 N94-25741
Color image segmentation
[AD-A274027] p 2984 N94-25759
Image quality and the display modulation transfer function: Experimental findings
[AD-A274061] p 2679 N94-25773
Mitsubishi 3-5 micrometers IR imager for machine-vision/ATA applications
[AD-A273812] p 3034 N94-25940
Zernike moments and rotation invariant object recognition. A neural network oriented case study
[AD-A273749] p 2767 N94-26011
Surface physics with cold and thermal neutron reflectometry
[DE94-001447] p 2733 N94-26070
Image segmentation by a combination of edge detection and region growing
[ETN-94-95032] p 2960 N94-26106
Solid estimation feature based correlation method for measuring control points required for correcting satellite images
[VTT-JULK-772] p 2848 N94-26253
Color head down display program
[AD-A274807] p 2672 N94-26340
Extracting complete 3-dimensional boundary representation from multiple range images
[ISBN-0-315-83776-4] p 2963 N94-26615
Application of Markov random field theory to image coding and motion estimation
[ISBN-0-315-83435-8] p 2964 N94-26632
Probabilistic methods for image generation and encoding
[AD-A274294] p 2964 N94-26682
On-board software for the JET-X telescope on the Spectrum-X mission p 2951 N94-26727
Automated fabric inspection system
[AD-A274522] p 2835 N94-26833
The Hough transform algorithm for sea ice lead analysis: An evaluation
[AD-A274535] p 2899 N94-26853
The morphological processing of binary images
[AD-A274310] p 2996 N94-26972
Characterization and calibration of the Agema 880+ imaging radiometer
[AD-A274417] p 3036 N94-26981
Orientation competition in cortical filters
[PB94-125366] p 2939 N94-27001
High-speed, high-density, coherent time-domain optical memory
[AD-A274249] p 3037 N94-27010
Building 3-D models from unregistered range images
[AD-A274126] p 2986 N94-27032
Top down influences on bottom-up processing
[AD-A274220] p 2939 N94-27072
Multiple model adaptive control of a large flexible space structure with purposeful dither for enhanced identifiability
[AD-A274132] p 2987 N94-27122
CCD-Camera images of BEST-TWO and processing results
[AD-A274140] p 2811 N94-27134
Multivariate spectral analysis to extract materials from multispectral data
[AD-A274142] p 2709 N94-27135
Operator theoretic methods in the control of distributed and nonlinear systems
[AD-A274160] p 2988 N94-27139
Compilation of corrections for postprocessing of laser bathymetry data
[PB94-123668] p 2900 N94-27156
Translation and rotation invariant pattern recognition
[PB94-123676] p 2968 N94-27157
Image quality analysis of compressed synthetic aperture radar imagery
[AD-A273399] p 2774 N94-27170
CMT-Si
[PB94-123619] p 2812 N94-27216
Estimation of image motion in scenes containing multiple moving objects
[ISBN-0-315-85208-9] p 2969 N94-27346
Thirteen ways to say nothing with scientific visualization
[NASA-CR-195280] p 2970 N94-27542
On line quantification of crystal surfaces by stereo imaging
[NASA-CR-195277] p 3066 N94-27561
Development of Calcomp compatible interface library 'piflib' on X Window System
[DE94-701190] p 2973 N94-27702

SPECTRUM analysis of multispectral imagery in conjunction with wavelet/KLT data compression
[DE94-003961] p 2851 N94-27727

Multi-sensor data fusion in a distributed environment: Architectural solutions
[NLR-TP-92243-U] p 2989 N94-27800

A hybrid formalism for representation and interpretation of image knowledge
[INPE-5485-PRE/1784] p 2989 N94-27833

Multispectral and textural classifications of a SPOT HRV-1 image, region of Sherbrooke, Quebec, Canada
[ISBN-0-315-84978-9] p 2851 N94-27863

Development of imaging riometers
p 2884 N94-27967

Quick-look system of auroral absorption images by imaging riometer p 2884 N94-27968

Optical pattern recognition system utilizing resonator array
[AD-D016071] p 3040 N94-28224

The 1994 Space and Earth Science Data Compression Workshop
[NASA-CP-3255] p 2945 N94-28251

An image assessment study of image acceptability of the Galileo low gain antenna mission
p 2945 N94-28252

Image compression software for the SOHO LASCO and EIT experiments p 2945 N94-28253

Performance considerations for the application of the lossless browse and residual model
p 2946 N94-28256

Some practical aspects of lossless and nearly-lossless compression of AVHRR imagery p 2947 N94-28264

IMAGE RECONSTRUCTION

Human visual system enhancement of reconstructed satellite images
[AD-A273867] p 2693 N94-25595

Improved quality of reconstructed images through sifting of data in statistical image reconstruction
[AD-A273884] p 3034 N94-25730

Objective image quality metrics: Applications for partially compensated images of space objects
[AD-A273837] p 2847 N94-25741

Extracting complete 3-dimensional boundary representation from multiple range images
[ISBN-0-315-83776-4] p 2963 N94-26615

Advanced technology development multi-color holography
[NASA-CR-193931] p 2812 N94-27229

Properties of the near-axis bispectrum applied to high-resolution astronomical imaging
[ISBN-0-315-85247-X] p 3103 N94-27302

Robust estimation for range image segmentation and fitting
[ISBN-0-315-84686-0] p 2998 N94-27312

A theory of multi-scale, curvature and torsion based shape representation for planar and space curves
[ISBN-0-315-63894-X] p 2974 N94-27805

Fractals and their applications to remote sensing and digital mapping
[ISBN-0-315-59469-1] p 2852 N94-27870

Visual surface perception: Surface reconstruction from shading and stereo
[ISBN-0-315-60974-5] p 2975 N94-27872

Image quality measures and their performance
p 2946 N94-28257

IMAGE RESOLUTION

Objective image quality metrics: Applications for partially compensated images of space objects
[AD-A273837] p 2847 N94-25741

Image quality and the display modulation transfer function: Experimental findings
[AD-A274061] p 2679 N94-25773

Encoding approaches for data link transmission of weather graphics
[AD-A274497] p 2772 N94-26963

Method of correcting rotational motion error in SAR and ISAR imagery
[AD-D016033] p 2773 N94-27146

Image quality analysis of compressed synthetic aperture radar imagery
[AD-A273399] p 2774 N94-27170

Image quality measures and their performance
p 2946 N94-28257

Perceptual compression of magnitude-detected synthetic aperture radar imagery p 2946 N94-28260

IMAGE ROTATION

Three dimensional object recognition using a complex autoregressive model
[AD-A274388] p 2995 N94-26829

IMAGES

Matrix near rings and pseudo distributivity
[DE94-601505] p 2992 N94-26366

IMAGING SPECTROMETERS

Mapping coastal habitats using an imaging spectrometer
[ISBN-0-315-84362-4] p 2848 N94-26664

Planetary Instrument Definition and Development Program (PIDDP). Instrument for future planetary flight missions: A visible-infrared imaging spectrometer for planetary missions
[NASA-CR-195254] p 3106 N94-27409

MODIS airborne simulator visible and near-infrared calibration, 1992 ASTEX field experiment. Calibration version: ASTEX King 1.0
[NASA-TM-104599] p 2897 N94-28179

MODIS airborne simulator visible and near-infrared calibration, 1991 FIRE-Cirrus field experiment. Calibration version: FIRE King 1.1
[NASA-TM-104600] p 2897 N94-28182

IMAGING TECHNIQUES

Detecting actin fibers in cell images using minimal spanning trees
[AD-A273914] p 2984 N94-25591

Feasibility study of a multiaperture telescope for deep-space Earth surveillance
[AD-A273903] p 3102 N94-25658

Detection geometry and reconstruction error in magnetic source imaging
[DE94-004012] p 2809 N94-25662

An optimal constrained linear inverse method for magnetic source imaging
[DE94-004014] p 2957 N94-25663

Color image segmentation
[AD-A274027] p 2984 N94-25759

Object imaging accomplished with an integrated circuit robotic tactile sensor incorporating a piezoelectric polyvinylidene fluoride thin film
[AD-A274038] p 2780 N94-25845

Imaging with x ray lasers
[DE94-002844] p 2816 N94-26020

Surface physics with cold and thermal neutron reflectometry
[DE94-001447] p 2733 N94-26070

Image segmentation by a combination of edge detection and region growing
[ETN-94-95032] p 2960 N94-26106

Study of precipitation and recrystallization in Al alloy 2519 by backscattered electron imaging methods
[AD-A274919] p 2736 N94-26533

High resolution measurements of mixing and reaction processes in turbulent flows
[AD-A274970] p 2793 N94-26534

Focal plane arrays in advanced thermal images
[AD-B174292] p 3036 N94-26648

Response of an airborne synthetic aperture radar to sea ice in the marginal ice zone
[ISBN-0-315-84243-1] p 2849 N94-26668

High definition Raman microscopic imaging
[DE94-003158] p 2716 N94-26781

An optimal constrained linear inverse method for magnetic source imaging
[DE94-002264] p 2996 N94-26936

Characterization and calibration of the Agema 880+ imaging radiometer
[AD-A274417] p 3036 N94-26981

Auroral Tomography Workshop Proceedings
[PB94-123718] p 2881 N94-27040

Combining shape and color information for 3D object recognition
[AD-A274123] p 2967 N94-27064

CCD-Camera images of BEST-TWO and processing results
[AD-A274140] p 2811 N94-27134

Multivariate spectral analysis to extract materials from multispectral data
[AD-A274142] p 2709 N94-27135

VENI, video, VICI: The merging of computer and video technologies p 2686 N94-27362

On line quantification of crystal surfaces by stereo imaging
[NASA-CR-195277] p 3066 N94-27561

RIAD visual imaging branch assessment
p 2815 N94-27895

Locating tie-points on a grid p 2978 N94-27906

Development of imaging riometers
p 2884 N94-27967

Quick-look system of auroral absorption images by imaging riometer p 2884 N94-27968

An image assessment study of image acceptability of the Galileo low gain antenna mission
p 2945 N94-28252

Image compression software for the SOHO LASCO and EIT experiments p 2945 N94-28253

Wavelet compression techniques for hyperspectral data p 2947 N94-28263

Infrared imaging for transition detection in a transonic blowdown wind tunnel p 2653 N94-28325

IMIDES

Application of the Positron Annihilation Technique to the study of vapor absorption process in polyethylene (LDPE) and in imide polymer (6FDA-TMPD PI)
[DE94-602737] p 2720 N94-27998

IMPACT DAMAGE

Effect of impact face damage on strength of sandwich composites
[VTT-PUBS-128] p 2704 N94-25734

Experimental study of the angled crack in GLARE 3
[PB94-126554] p 2669 N94-26954

Impact tests on fibre metal laminates under a tensile load
[PB94-126570] p 2710 N94-27201

The development of stress intensity factors
[DRA-TR-93057] p 2845 N94-27954

IMPACT LOADS

Effect of impact face damage on strength of sandwich composites
[VTT-PUBS-128] p 2704 N94-25734

Piezoelectric measurements on impact loaded PZT ceramics
[NPL-DMM(A)-88] p 2752 N94-26652

A constitutive model for layered wire mesh and aramid cloth fabric
[DE94-003275] p 2708 N94-26796

Response of structures to impact loads using elastic and plastic analysis
[ISBN-0-315-84647-X] p 2842 N94-27309

Axial focusing of impact energy in the Earth's interior: Proof-of-principle tests of a new hypothesis
p 2888 N94-28296

IMPACT PREDICTION

A survey of uncontrolled satellite reentry and impact prediction
[AD-A274903] p 2695 N94-26750

An automatic contact algorithm in DYNA3D for impact problems
[DE94-002856] p 2965 N94-26862

IMPACT RESISTANCE

Computational studies of energetic organic molecules
[AD-A274726] p 3018 N94-26172

IMPACT STRENGTH

Effect of impact face damage on strength of sandwich composites
[VTT-PUBS-128] p 2704 N94-25734

High impact strength poly(lactide) tough biodegradable materials
[ETN-94-95389] p 2747 N94-25748

Design study of fiber-composite penetrator cases
[DE94-003203] p 2707 N94-26099

IMPACT TESTING MACHINES

The development of a horizontal impact sled facility and subsequent crashworthiness experiments
[NIAR-93-15] p 2680 N94-26200

IMPACT TESTS

Design study of fiber-composite penetrator cases
[DE94-003203] p 2707 N94-26099

The development of a horizontal impact sled facility and subsequent crashworthiness experiments
[NIAR-93-15] p 2680 N94-26200

Users manual for CATNIP: A Computer Analysis Tool for Normal Impact Penetration
[DE94-003671] p 2962 N94-26371

Piezoelectric measurements on impact loaded PZT ceramics
[NPL-DMM(A)-88] p 2752 N94-26652

A constitutive model for layered wire mesh and aramid cloth fabric
[DE94-003275] p 2708 N94-26796

Impact tests on fibre metal laminates under a tensile load
[PB94-126570] p 2710 N94-27201

Status report for the development of the Antarctic penetrator: 1990-year program p 2885 N94-27973

IMPEDANCE MEASUREMENT

Fundamental study on monitoring technology on local surface damages p 2724 N94-25555

IMPELLERS

Orbital transfer vehicle engine technology high velocity ratio diffusing crossover
[NASA-CR-194447] p 2703 N94-27212

Influence of impeller shroud forces on turbopump rotor dynamics p 2796 N94-27378

IMPLANTATION

The AFIT multielectrode array for neural recording and simulation: Design, testing, and encapsulation
[AD-A274086] p 2909 N94-25943

Ion implantation of diamond: Damage, doping, and lift-off
[DE94-001133] p 3054 N94-26137

IMPLANTED ELECTRODES (BIOLOGY)

An attempt of intraneural stimulation by microelectrode inserted in skin sympathetic nerve fascicle
p 2930 N94-27529

IMPULSES

Impulsive control and stabilization
[ISBN-0-315-84563-5] p 2988 N94-27271

IMPURITIES

Study on development of chemical measurement method utilizing plasmas p 2728 N94-25576

Study on analyzing method establishment for metallic material development p 2729 N94-25578

Binding of copper and nickel to cavities in silicon formed by helium ion implantation
[DE94-003769] p 3050 N94-25814

An atom probe investigation of the influence of trace impurities on the mechanical behavior of NiAl
[DE94-002797] p 2734 N94-26272

An investigation of the effect of surface impurities on the adsorption kinetics of hydrogen chemisorbed onto iron
[NASA-CR-195213] p 2716 N94-26643

Effect of impurity correlation on the density of states in slightly compensated heavily doped semiconductors
[DE94-602539] p 3061 N94-26879

IN SITU MEASUREMENT

Development of a multi-sensor in situ fiber optic fluorometer
[DE94-003399] p 3035 N94-26100

Automated in-situ inspection systems for underground storage tanks
[AD-A274644] p 2764 N94-27144

Neutron-neutron scattering: Possibility of in-beam experiment
[DE94-606459] p 3027 N94-27682

IN-FLIGHT MONITORING

Balloon-borne measurements of the SN1987A hard x ray continuum p 3115 N94-26689

Effects of expected-value information and display format on recognition of aircraft subsystem abnormalities
[NASA-TP-3395] p 2673 N94-27882

INCIDENCE

Aluminum-ion sputtering from Al surfaces with very-low-energy ions
[REPT-A-2668] p 2733 N94-26073

Discrete vacuum ultra violet reflective interference filter
[AD-D016059] p 2756 N94-27675

INCLUSIONS

The study of single-pass GMA welds with different cover gas compositions on HSLA-100 steel
[AD-A274857] p 2822 N94-26174

Electromagnetic modeling of bi-isotropic media
[PB94-132909] p 2778 N94-28382

Dielectric polarizability of sphere with arbitrary anisotropy
[PB94-133113] p 2779 N94-28397

INCOMPRESSIBLE BOUNDARY LAYER

Circular cylinder in axial flow
[ISBN-0-315-59114-5] p 2798 N94-27873

Unified approach for direct and inverse boundary layer prediction using cubic spline collocation
p 2653 N94-28326

INCOMPRESSIBLE FLOW

Vortex methods
[DE94-003245] p 2789 N94-25597

The high Reynolds number flow through an axial-flow pump
[AD-A273844] p 2789 N94-25604

Riemann solvers for solving the incompressible Navier-Stokes equations using the artificial compressibility method
[CRANFIELD-AERO-9208] p 2790 N94-25778

Non-isoenergetic inviscid slot flow
p 2655 N94-28333

Calculation of unsteady incompressible inviscid flow about wings and bodies using CANAERO-T panel model
p 2655 N94-28334

Recent advances in the spectral element method
p 2657 N94-28348

INCOMPRESSIBLE FLUIDS

Bulk-Flow Analysis, part A
[NASA-CR-193911-PT-A] p 2796 N94-27377

INCONEL (TRADEMARK)

Structural analysis of a frangible nut used on the NASA Space Shuttle
[DE94-003672] p 2821 N94-25811

Analysis of the effect on growth kinetics of gamma prima phase in Inconel 713C alloys
[DE93-633763] p 2735 N94-26294

INDENTATION

Nanoscale plasticity in silica glass
[DE94-004212] p 2751 N94-26554

INDEXES (DOCUMENTATION)

Index to BROND-2, CENDL-2, ENDF/B-6, JEF-2, JENDL-3
[DE93-634500] p 3016 N94-26034

A new materials data compilation can help in actinide phase-diagram research
[DE94-000797] p 3058 N94-26514

Aviation Epidemiology Data Register: Indexing the AEDR document laser optic archive
[AD-A274185] p 2911 N94-27097

NASA SBIR abstracts of 1992, phase 1 projects
[NASA-TM-109694] p 3094 N94-27772

Aeronautical engineering: A continuing bibliography with indexes (supplement 301)
[NASA-SP-7037(301)] p 2643 N94-28203

Aerospace medicine and biology: A cumulative index to a continuing bibliography (supplement 384)
[NASA-SP-7011(384)] p 2934 N94-28219

INDIA

Indian activities on the core programme IGAP and proposals for network activities p 2874 N94-28284

INDIAN OCEAN

Tropical cyclone report, 1992
[AD-A274464] p 2896 N94-27025

INDICATING INSTRUMENTS

Monitoring activity with a wrist-worn actigraph: Effects of amplifier passband and threshold variations
[AD-A274705] p 2909 N94-26377

INDIUM

Indium donor complexes with cation vacancies in CdTe and ZnSe
[DE94-002731] p 3063 N94-26958

Modelling of the MEA float zone using accelerometer data
[NASA-CR-193933] p 2761 N94-27220

Research on high-efficiency, large-area, CuInSe2 based thin-film modules
[DE94-000259] p 3067 N94-27609

INDIUM ALLOYS

Research into the microstructure and mechanical behavior of eutectic Bi-Sn and In-Sn
[DE94-004558] p 2741 N94-27619

Formation and crystallization of hydrogen-induced amorphous Ti3InH(4.5) alloy p 2745 N94-28163

INDIUM ANTIMONIDES

Development of intermetallic compounds for high performance luminescence elements
p 2722 N94-25545

INDIUM ARSENIDES

AB-Initio calculation of the valence-band offset at strained GaAs/InAs (001) heterojunction
[DE94-602538] p 3061 N94-26878

INDIUM COMPOUNDS

Nitride semiconductors for ultraviolet detection
[AD-A274246] p 3060 N94-26840

Ion implantation and dynamic recovery of tin-doped indium oxide films
[DE94-001126] p 3062 N94-26932

INDIUM ISOTOPES

Indium donor complexes with cation vacancies in CdTe and ZnSe
[DE94-002731] p 3063 N94-26958

INDIUM PHOSPHIDES

Electric-field dependence of electroreflectance and photocurrent spectra at visible wavelengths in MOVPE-grown InAlGaP multiple strained quantum-well structures
[DE94-004692] p 2780 N94-25664

Electrical properties of p-type GaInP2
[AD-A273771] p 3051 N94-25856

Study of the homogeneity of InP wafers
[AD-A273658] p 3055 N94-26194

Ordering and phase separation in MOCVD InGaP alloys and unicompositional quantum wells
[DE94-004693] p 3056 N94-26352

High-efficiency, thin-film solar cells
[DE94-000250] p 2860 N94-27625

INDIUM TELLURIDES

The state of the art of thin-film photovoltaics
[DE94-000224] p 2855 N94-26115

INDONESIA

Research and observation programmes on global changes in Indonesia p 2873 N94-28277

INDUCTANCE

Channel model for AC electric arc
[PB94-124591] p 2786 N94-27327

INDUSTRIAL AREAS

The advantages of the location Germany must not be jeopardized in air traffic p 2661 N94-28236

INDUSTRIAL MANAGEMENT

The effectiveness of AMT investment in UK metal component manufacture
[IND-MANU-SCI-TECH-REPT-3] p 2762 N94-25775

Business process redesign: Design the improved process
[AD-A274947] p 3093 N94-26299

INDUSTRIAL PLANTS

Compilation of air pollutant emission factors. Volume 1: Stationary point and area sources. Supplement F
[PB94-121431] p 2867 N94-26757

SP industry calorimeter for rate of heat release measurements up to 10MW
[PB94-124211] p 2811 N94-27044

An artificial reality environment for remote factory control and monitoring p 2687 N94-27369

INDUSTRIAL SAFETY

Evaluation and improvement of the inquest system on work accidents (TOT)
[VTT-TIED-1418] p 2762 N94-26261

INDUSTRIAL WASTES

Collaboration of chemical oxidation and biological treatment for removal of refractory organic substances
p 2870 N94-28149

Treatment of refractory organic substances with combined use of chemical oxidation and biological treatment. Part 2: Biodegradability of ozonation products of chlorophenol p 2870 N94-28151

Oil production from buckwheat stillage by thermochemical liquefaction p 2871 N94-28154

INDUSTRIES

System software and tools for high performance computing environments: A report on the findings of the Pasadena Workshop
[DE94-003918] p 2956 N94-25602

General Motors Corporation and Pacific Northwest Laboratory staff exchange: Inspection of case hardened steels and metal-matrix composites
[DE94-003470] p 2706 N94-25982

Overview of the Photovoltaic Manufacturing Technology (PVMaT) project
[DE93-018234] p 2856 N94-26426

Compilation of air pollutant emission factors. Volume 1: Stationary point and area sources. Supplement F
[PB94-121431] p 2867 N94-26757

Fabrication technology
[DE94-003017] p 2763 N94-26778

Generalized emulation microcircuit program
[AD-A274749] p 2785 N94-26797

COMPETENCE 2000: Study on training requirements of the Norwegian metallurgical industry
[PB94-124609] p 2741 N94-27328

INELASTIC COLLISIONS

Correlations in inelastic collisions of relativistic nuclei with emulsion at (4.1 - 4.5) A GeV/c
[DE93-634526] p 3030 N94-27994

INELASTIC SCATTERING

Optical conductivity and resistivity in the two-band Emery model
[DE94-601943] p 3051 N94-25945

A dependence of exclusive vector meson production in muon-nucleus scattering
[DE94-003363] p 3016 N94-25957

Harvard University High Energy Physics
[DE94-002406] p 3032 N94-26119

Separation and reconstruction of electron neutrino interaction in the IHEP-JINR neutrino detector and BARS detector
[DE93-634182] p 3019 N94-26393

Delocalization in electron impact ionization in a crystalline environment
[DE94-601819] p 3062 N94-26927

Calculations of asymmetries in electron-alkali scattering
[DE94-601816] p 3023 N94-26945

First observation of neutral current proton electron scattering at the square root of s = 300 GeV
[DE94-701107] p 3030 N94-27877

Correlations in inelastic collisions of relativistic nuclei with emulsion at (4.1 - 4.5) A GeV/c
[DE93-634526] p 3030 N94-27994

INEQUALITIES

Cone-valued Lyapunov functions and the stability of stochastic differential equations
[DE94-601504] p 2994 N94-26458

On the (Phi)(sub 0)-stability of functional differential equations
[DE94-601507] p 3006 N94-26460

Estimates for cone multipliers
[PB94-124385] p 2997 N94-26995

Symmetric and asymmetric diophantine approximation by continued fractions
[PB94-126455] p 2998 N94-27030

Polyhedral characterization of the economic lot-sizing problem with start-up costs
[MEMO-COSOR-92-46] p 2969 N94-27396

A strange application of Kolmogorov complexity
[CWI-CS-R9328] p 2973 N94-27737

INERTIAL CONFINEMENT FUSION

Experimental and numerical investigation of shock wave propagation through complex geometry, gas continuous, two-phase media
[DE94-001408] p 2791 N94-26121

Research in pulsed power plasma physics
[AD-A274323] p 3045 N94-27074

INERTIAL FUSION (REACTOR)

Fusion Energy Advisory Committee: Advice and recommendations to the US Department of Energy in response to the charge letter of September 1, 1992
[DE93-019842] p 3043 N94-26428

INERTIAL GUIDANCE

On the application of Allan variance method for Ring Laser Gyro performance characterization
[DE94-003880] p 2810 N94-26525

INERTIAL NAVIGATION

An adaptive Kalman filter for tactical missiles guidance systems
[ISBN-0-315-84115-X] p 2677 N94-26636

Flight testing of GPS and GPS-aided systems
[NLR-TP-92151-U] p 2666 N94-27831

INFERENCE

Developing realistic cooperative behaviors for autonomous agents in air combat simulation
[AD-A274077] p 2937 N94-25774

INFORMATION

Image quality and the display modulation transfer function: Experimental findings
[AD-A274061] p 2679 N94-25773

INFORMATION DISSEMINATION

Full-text information services at the desktop
[DE94-003728] p 3096 N94-25813

INFORMATION FLOW

Usefulness of compile-time restructuring of LGDF programs in throughput-critical applications
[AD-A274915] p 2963 N94-26530

INFORMATION MANAGEMENT

Automated information management for designers: Functional requirements for computer based associates that support access and use of technical information in design
[AD-A274603] p 3099 N94-26891

Circulars of the Electrotechnical Laboratory. No. 223: An extended survey on provable information base systems
[JTN-94-80550] p 3100 N94-27336

On modeling and controlling intelligent systems
[DE94-002446] p 2988 N94-27706

The TMIS life-cycle process document, revision A
[NASA-TM-109698] p 2697 N94-27775

INFORMATION PROCESSING (BIOLOGY)

Induced pictorial representations
[AD-A274251] p 2939 N94-27012

Signal- and listener-based factors in complex auditory pattern perception
[AD-A274148] p 2939 N94-27094

Interhemispheric phase relationship of alpha waves and cerebral dominance p 2927 N94-27518

Function of selective attention intrinsic to the saccade system: Does the voluntary control override the stimulus driven control? p 2928 N94-27523

INFORMATION RETRIEVAL

The effect of the time restrictions on information search and information integration in a dynamic task environment
[AD-A273759] p 3095 N94-25723

Full-text information services at the desktop
[DE94-003728] p 3096 N94-25813

Design and implementation of a query editor for the Amadeus system
[AD-A274955] p 3097 N94-26300

Retrieval using plausible inference
[AD-A274252] p 3099 N94-27013

Bibliographic Retrieval System (BARS) Sandia Shock Compression (SSC) database Shock Physics Index (SPHINX) database, volume 3
[DE94-001705] p 3099 N94-27022

Query optimization strategies for browsing sessions
[CWI-CS-R9268] p 3100 N94-27394

Reinventing information services to increase customer satisfaction
[DE94-003718] p 3100 N94-27563

Electronic document distribution: Design of the anonymous FTP Langley Technical Report Server
[NASA-TM-4567] p 2971 N94-27573

Correspondence dictionary from free English term to INIS descriptors
[DE94-701173] p 3100 N94-27700

INFORMATION SYSTEMS

Full-text information services at the desktop
[DE94-003728] p 3096 N94-25813

The television as robot servant
[AD-A273985] p 2984 N94-25898

Scientific and Technical Information (STI)....what's the status?
[DE94-003731] p 3097 N94-26348

Federal Information Exchange (FEDIX) user's guide: Fall 1993, Version 5.0/Release 1.0

Human computer interface guide, revision A
[NASA-TM-109708] p 2955 N94-27769

Comparison of Object-Oriented Analysis and Design Methods: A Collection of Papers
[MEMO-INF-92-69] p 2975 N94-27936

Observation with STS seismometer at Nakaizu, central Japan: Observation system and comparison with tiltmeter p 2686 N94-27986

INFORMATION THEORY

Circulars of the Electrotechnical Laboratory. No. 223: An extended survey on provable information base systems
[JTN-94-80550] p 3100 N94-27336

A strange application of Kolmogorov complexity
[CWI-CS-R9328] p 2973 N94-27737

INFORMATION TRANSFER

Feasibility study on construction of a global environment research and development information network
[DE94-725198] p 2868 N94-26904

The intracellular second messenger system in c-fos gene induction by ACTH p 2904 N94-27477

INFRARED ABSORPTION

Study on knowledge extraction and systematization for material design p 2727 N94-25568

INFRARED ASTRONOMY SATELLITE

Zodiacal light data investigation. Interim results for the Earthlimb Clutter Experiment
[AD-A274461] p 3104 N94-27265

INFRARED DETECTORS

High temperature superconducting infrared imaging satellite p 2698 N94-25700

Investigation of a normal incidence high-performance p-type strained layer In(0.3)Ga(0.7)As / In(0.52)Al(0.48) as quantum well infrared photodetector
[AD-A274854] p 3055 N94-26188

Analysis of the influence of weather on infrared imagery
[FEL-92-A421] p 3036 N94-26649

Radiometric, spectral, and effectiveness equipment
[AD-A274208] p 3037 N94-27066

Zodiacal light data investigation. Interim results for the Earthlimb Clutter Experiment
[AD-A274461] p 3104 N94-27265

INFRARED IMAGERY

Mitsubishi 3-5 micrometers IR imager for machine-vision/ATA applications
[AD-A273812] p 3034 N94-25940

An overview of the TNO contribution to VAST 92
[AD-A273751] p 2893 N94-26016

Focal plane arrays in advanced thermal images
[AD-B174292] p 3036 N94-26648

Analysis of the influence of weather on infrared imagery
[FEL-92-A421] p 3036 N94-26649

The Hough transform algorithm for sea ice lead analysis: An evaluation
[AD-A274535] p 2899 N94-26853

Leadex environmental phenomena and effects observed by DMSP, NOAA, and ERS-1 satellites
[AD-A274596] p 2868 N94-26888

Characterization and calibration of the Agema 880+ imaging radiometer
[AD-A274417] p 3036 N94-26981

Computer model for generation of infrared images
[PB94-123551] p 3005 N94-27172

Infrared imaging for transition detection in a transonic blowdown wind tunnel p 2653 N94-28325

INFRARED INTERFEROMETERS

Modelling atmospheric turbulence effects on ground-based telescope systems
[DE94-004211] p 3102 N94-26528

INFRARED LASERS

Enhanced tracking of airborne targets using forward looking infrared and laser return measurements
[AD-A274181] p 3037 N94-27102

Ir-fibers in a laser threat warning system and robot shot warning system
[PB94-124476] p 3038 N94-27209

INFRARED PHOTOGRAPHY

CMT-Si
[PB94-123619] p 2812 N94-27216

INFRARED RADIATION

Optimization of experimental conditions in IR reflectance determination of BPSG properties
[DE94-002742] p 2713 N94-25978

On the gluon propagator in the infrared region
[DE93-634345] p 3016 N94-26035

Investigation of a normal incidence high-performance p-type strained layer In(0.3)Ga(0.7)As / In(0.52)Al(0.48) as quantum well infrared photodetector
[AD-A274854] p 3055 N94-26188

Dimensional crossover from non-renormalizability to renormalizability
[DE93-613052] p 3006 N94-26193

Ir-fibers in a laser threat warning system and robot shot warning system
[PB94-124476] p 3038 N94-27209

Excited Landau levels, orbital angular momentum and axial anomaly
[DE94-606407] p 3068 N94-27679

INFRARED SPECTRA

Multivariate calibration applied to near-infrared spectroscopy for the quantitative analysis of dilute aqueous solutions
[DE94-003231] p 2716 N94-26794

Computer model for generation of infrared images
[PB94-123551] p 3005 N94-27172

Zodiacal light data investigation. Interim results for the Earthlimb Clutter Experiment
[AD-A274461] p 3104 N94-27265

INFRARED SPECTROMETERS

Planetary Instrument Definition and Development Program (PIDDP). Instrument for future planetary flight missions: A visible-infrared imaging spectrometer for planetary missions
[NASA-CR-195254] p 3106 N94-27409

INFRARED SPECTROSCOPY

Advances in passive-remote and extractive Fourier transform infrared spectroscopic systems
[DE94-001424] p 2868 N94-26952

Spectroscopy Division
[DE94-604074] p 2717 N94-26988

Spectroscopy and dynamics of molecular and ionic impurities embedded in solid hydrogen
[AD-A274149] p 3064 N94-27095

Evanescent field infrared spectroscopy using chalcogenide glass fiber
[ITN-94-85233] p 3038 N94-27178

The Reports of Aeromedical Laboratory, volume 33, number 4
[JTN-94-80586] p 2933 N94-27942

Evaluation of near-infrared spectrophotometric method for individual tolerance to +Gz acceleration
p 2933 N94-27944

INFRARED TRACKING

Radiometric, spectral, and effectiveness equipment
[AD-A274208] p 3037 N94-27066

INGESTION (ENGINES)

Transient model applications. 3: Transient engine simulation and analysis of an ice ingestion test
p 2829 N94-28050

INHIBITORS

Technique to predict the curing behaviour of unsaturated polyester materials
[PB94-124856] p 2748 N94-25892

Modelling the inhibition cure behaviour of unsaturated polyester moulding materials
[PB94-124864] p 2748 N94-25893

Effect of sera from patients treated with long-term hemodialysis on mRNA's for collagenase, stromelysin, and tissue inhibitor of metalloprotease in cultured human synovial cells p 2920 N94-27481
The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experimental study in rabbit single sinoatrial node cells
p 2908 N94-27514
The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experiments using small sinoatrial node tissue preparations isolated from rabbit hearts p 2908 N94-27515
The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Postganglionic vagal stimulation in isolated rabbit hearts
p 2908 N94-27516
Effects of p-chlorophenol on sulfate reduction in marine sediments p 2870 N94-28150

INHOMOGENEITY
Efficient modeling in transversely isotropic inhomogeneous media
[DE94-003394] p 2877 N94-25847
Elastic wave up/down decomposition in inhomogeneous and anisotropic media: An operator approach and its approximations
[PB94-126497] p 2881 N94-26880
Spectral and temporal correlations of multifrequency waves in the turbulent atmosphere
[ITN-94-85229] p 2774 N94-27233
Analysis of S-wave seismogram envelope of deep earthquakes and estimation of random inhomogeneities in the Kanto-Tokai area p 2886 N94-27988

INJECTORS
Interaction between a high density-low temperature plasma and a frozen hydrogen pellet in a railgun injector
[DE94-000846] p 3041 N94-25949
High-speed repetitive pellet injector for plasma fueling of magnetic confinement fusion devices
[DE94-002792] p 3042 N94-26140
Gaseous hydrogen/oxygen injector performance characterization
[NASA-CR-194464] p 2701 N94-26208

INJURIES
Eccentric exercise testing and training
p 2934 N94-28363

INLET AIRFRAME CONFIGURATIONS
The design of a counter rotating ultra-high-bypass fan simulator for windtunnel investigation
[DLR-FB-93-20] p 2675 N94-27739

INLET FLOW
The high Reynolds number flow through an axial-flow pump
[AD-A273844] p 2789 N94-25604
Experimental study on the shock wave interaction with a hypersonic boundary layer near a convex corner
p 2654 N94-28328

INLET PRESSURE
Pressure-gain combustion
[DE94-002975] p 2719 N94-27712

INLET TEMPERATURE
Gas fired advanced turbine system
[DE94-003193] p 2827 N94-27874

INNER RADIATION BELT
Compton Gamma Ray Observatory/BATSE observations of energetic electrons scattered by cyclotron resonance with waves from powerful VLF transmitters
[NASA-CR-195240] p 3115 N94-26790

INPUT
Digital input module
[DIGEL-1993-6] p 2779 N94-25620

INPUT/OUTPUT ROUTINES
Out of core, out of mind: Practical parallel I/O
[DE94-003107] p 2979 N94-25952
Concurrent shadow paging: Snapshots, read-only transactions, and on-the-fly multi-level incremental dumping
[PB94-133139] p 3100 N94-28385

INSPECTION
Statistical quality management
[MEMO-COSOR-92-43] p 2834 N94-26008
Results from a fracture mechanical serial investigation of breechrings on the M109A3GN howitzer
[FFI-93/8002] p 2837 N94-26233
Non-contact ultrasonic inspection
[VTT-TIED-1454] p 2835 N94-26257
Automated fabric inspection system
[AD-A274522] p 2835 N94-26833
Space Shuttle main engine turbopump bearing assessment program
[NASA-TM-108447] p 2833 N94-28265

INSTALLING
Cooling towers for combined cycles: Design philosophy, performance testing, and operating problems
p 2832 N94-28087

INSTRUCTION SETS (COMPUTERS)
Fast incremental compiler transformations for multiple instruction retry
[NASA-CR-195209] p 2964 N94-26680
A complete version of the Ada tasking coprocessor
p 2950 N94-26721

INSTRUMENT APPROACH
The effects of tailwinds and control cross coupling on rotorcraft handling qualities for steep, decelerating instrument approaches and missed approaches
[IAR-AN-77] p 2677 N94-26710
Ground station siting considerations for DGPS
p 2642 N94-27293

INSTRUMENT COMPENSATION
Observation with STS seismometer at Nakaizu, central Japan: Observation system and comparison with tiltmeter p 2886 N94-27986

INSTRUMENT LANDING SYSTEMS
Piloted simulation study of an ILS approach of a twin-pusher business/commuter turboprop aircraft configuration
[NASA-TM-4516] p 2646 N94-26602

INSULATORS
The electric field between non conductive rectangular charged surfaces placed near a small spherical conductive earthed surface and determination of critical density of charge
[DE93-634324] p 2783 N94-26443
Technical report of ISSP. Ser. A, no. 2679: Novel electronic states of partially deuterated (DMe-DCNQI)2Cu
[JTN-94-80565] p 3064 N94-27175
Technical report of ISSP. Ser. A, no. 2676: Charge mass singularity in two-dimensional Hubbard model
[JTN-94-80562] p 3065 N94-27248

INTEGERS
Winding numbers in homotopy theory from integers to reals
[DE94-601510] p 2992 N94-26367

INTEGRAL CALCULUS
A survey of open problems in symplectic integration
[DE94-003966] p 3007 N94-27777

INTEGRAL EQUATIONS
Numeric solution of the electric field integral equation using Galerkin's method for axially symmetric cases
[ESA-TT-1264] p 2768 N94-26315
How reliable is the HMSA integral equation for the pair structure of supercooled and amorphous mixtures?
[DE94-601543] p 3006 N94-26411
New variational techniques for acoustic radiation and scattering from elastic shell structures
[AD-A274599] p 3010 N94-26889
Joint services electronics program
[AD-A274643] p 2785 N94-27027
Fractional calculus, gegenbauer transformations and integral equations
[PB93-237683] p 2999 N94-27349
A variational approach to the quantum field theoretic bound-state problem
[ISBN-0-315-60960-5] p 3074 N94-27401
Methods in unsteady aerodynamics
[DLR-FB-93-21] p 2648 N94-27741

INTEGRAL TRANSFORMATIONS
Fractional calculus, gegenbauer transformations and integral equations
[PB93-237683] p 2999 N94-27349

INTEGRALS
On the first integrals of geodesics
[DE93-612974] p 3007 N94-25603

INTEGRATED CIRCUITS
Development of a 4-bit parallel analog-to-digital converter and a four-quadrant double-balanced mixer using heterojunction bipolar transistor technology
[AD-A274074] p 2947 N94-25648
Modeling electromagnetic effects in MMICs for T/R modules
[AD-A273808] p 2766 N94-25736
Advanced qualification techniques
[DE94-003709] p 2780 N94-25812
Object imaging accomplished with an integrated circuit robotic tactile sensor incorporating a piezoelectric polyvinylidene fluoride thin film
[AD-A274038] p 2780 N94-25845
A general purpose I(sub DDQ) measurement circuit
[DE94-002733] p 2781 N94-25977
A physics-based heterojunction bipolar transistor model for integrated circuit simulation
[AD-A274081] p 2781 N94-25995
Modeling and experimental verification of single event upsets p 2684 N94-26287
Optoelectronic Technology Consortium
[AD-A274909] p 2782 N94-26344
The 12-channel flash-ADC FASTBUS module
[DE93-634229] p 2783 N94-26380
Fast generator of program waveforms signals
[DE93-634230] p 2948 N94-26381
Processing, fabrication, and demonstration of HTS integrated microwave circuits, appendix A
[AD-A274600] p 2785 N94-26890
An optoelectronic graphics display processor
[AD-A274401] p 3037 N94-26990
A fully integrated 16 channel digitally trimmed pulse shaping amplifier
[DE94-004555] p 2787 N94-27618
The analysis of thermal and 1/F noise in MOS devices, circuits and systems
[ISBN-0-315-57811-4] p 2787 N94-27642
An efficient and accurate Green's function analysis of packaged microwave integrated circuits
[ISBN-0-315-84425-6] p 2787 N94-27653
Characterization of semi-insulating gallium arsenide
[AD-A273781] p 3068 N94-27704

INTEGRATED OPTICS
Optoelectronic Technology Consortium
[AD-A274909] p 2782 N94-26344

INTELLIGENCE
The central executive component of working memory
[AD-A274295] p 2938 N94-26683
On modeling and controlling intelligent systems
[DE94-002446] p 2988 N94-27706

INTELLIGENCE TESTS
Extending the rule space model to a semantically-rich domain: Diagnostic assessment in architecture
[AD-A273789] p 2948 N94-25864
A diagnostic classification model for document processing skills
[AD-A273790] p 3096 N94-25925

INTERACTIONAL AERODYNAMICS
Coupled 2-dimensional cascade theory for noise an d unsteady aerodynamics of blade row interaction in turbofans. Volume 2: Documentation for computer code CUP2D
[NASA-CR-4506-VOL-2] p 2675 N94-27778
Numerical assessment of aerodynamic interactions on missiles with transverse jets control
p 2659 N94-28031
First experimental assessment of RCS plume-flow field interaction on Hermes leading edge thruster configuration p 2703 N94-28032

INTERACTIVE CONTROL
IRMA: A program for three-dimensional color display of data
[AD-A273811] p 2959 N94-25879
Interactive control of a parallel simulation from a remote graphics workstation
[AD-A274217] p 2981 N94-27070

INTERATOMIC FORCES
Debye-Waller factors of the light actinide metals
[DE94-000685] p 2733 N94-26069
International bulletin on atomic and molecular data for fusion. No. 46
[DE94-601818] p 3023 N94-26947

INTERFACE STABILITY
Interface configuration experiment: Preliminary results
[NASA-TM-109684] p 2760 N94-25849
Composite raw materials for the building industry
[VTT-TIED-1433] p 2708 N94-26544

INTERFACES
Float zone crystal growth using laser radiation
[DLR-FB-93-10] p 3066 N94-27590

INTERFACIAL TENSION
MBE grown 3 to 5 strain relaxed buffer layers and superlattices characterized by atomic force microscopy
[DE94-002931] p 3056 N94-26308
Interfacial area and interfacial transfer in two-phase flow
[DE93-041226] p 2792 N94-26468
Report of three microgravity experiments by the drop shaft
[JTN-94-80579] p 2761 N94-27341

INTERFERENCE IMMUNITY
Evaluation of an Acoustic Charge Transport (ACT) device for adaptive interference suppression in spread spectrum communications systems
[AD-A274073] p 2765 N94-25647

INTERFEROMETERS
Performance comparison of shearing interferometer and Hartmann wave front sensors
[AD-A274031] p 3034 N94-25768
Experimental verification of tomographic reconstruction of turbulent air flow structure using optical wavefront measurements
[AD-A274392] p 2795 N94-27129

INTERFEROMETRY
An evaluation of the utility of ground-based high resolution interferometer (GB-HIS) soundings of the planetary boundary layer
[DE94-000960] p 3106 N94-25981
Neutron reflection interferometry
[DE94-601876] p 2714 N94-26170

INTERGRANULAR CORROSION

Radiation hardening effects on localized deformation and stress corrosion cracking of stainless steels [DE94-004308] p 2731 N94-25804

The role of grain boundary chemistry and structure in the environmentally-assisted intergranular cracking of nickel-base alloys [DE94-003159] p 2732 N94-25954

Grain boundary chromium concentration effects on the IGSCC and IASCC of austenitic stainless steels [DE94-004268] p 2741 N94-27570

INTERMETALLICS

Bulletin of National Research Institute for Metals in Fiscal Year 1993, no. 14 [REPT-14] p 2722 N94-25544

Development of intermetallic compounds for high performance luminescence elements p 2722 N94-25545

Study on synthesis and characteristics of intermetallic compound with strong electron correlation p 2726 N94-25563

Study on variation of damage generation mechanism by fatigue on TiAl compounds due to different slip systems p 2729 N94-25579

Heavy-electron behavior in large coordination compounds CeZn11 and UZn12 [REPT-A-2663] p 3049 N94-25614

Structure and properties of intermetallic composites synthesized in situ using solid state displacement reactions [DE94-004312] p 2705 N94-25805

Numerical simulations of interfacial debonding in ductile-phase reinforced intermetallic matrix composites [DE94-003639] p 2706 N94-25938

Structure of the modulated magnetic phase of Mn3Sn [DE94-002788] p 2733 N94-26092

An atom probe investigation of the influence of trace impurities on the mechanical behavior of NiAl [DE94-002797] p 2734 N94-26272

Eutectic transformation L in equilibrium to Zr6Fe23 + Fe(tau) in the Fe-Zr system [DE93-633766] p 2735 N94-26295

Experimental determination of the CU-IN-PB ternary phase diagram [DE94-003765] p 2735 N94-26349

Titanium 1992: Science and technology, volume 2 rence (7th) in san diego, california on june 29-july 2, 1992. Volume 2 [AD-A274799] p 2736 N94-26362

Structure and properties of composites synthesized in situ using solid state displacement reactions [DE94-004589] p 2737 N94-26585

A tri-junction diffusion couple analysis of the Nb-Cr-Ti system at 950 C [DE94-002637] p 2737 N94-26607

The processing of powder metallurgically produced near gamma-titanium aluminide [ISBN-0-315-84018-8] p 2738 N94-26633

The electrochemical behavior of the Al3Fe intermetallic compound and localized corrosion of impure 1100 Al [DE94-002037] p 2739 N94-26912

Interface phenomena in metal-ceramic composites [AD-A274167] p 2709 N94-27125

Microstructure and mechanical behaviour of L1(2) titanium trialuminides [ISBN-0-315-84488-4] p 2740 N94-27306

Current status of research and development on nickel and iron aluminides [DE94-004247] p 2741 N94-27616

Laser surface modification of intermetallic compounds [DREA-CR-92-416] p 2820 N94-27668

INTERNAL COMBUSTION ENGINES

Extraterrestrial surface propulsion systems p 2833 N94-25691

Ceramic technology project [DE94-003782] p 2750 N94-26332

Sequential multi-point injection of a natural gas engine. Topical report, November 1991 - April 1992 [PB94-126794] p 2824 N94-27224

Optimising BMW four-cylinder two-valve engines [PB94-125101] p 2824 N94-27254

Technical Report of National Research Institute of Fisheries Engineering: Fishing Boat and Instrument, No. 12 [JTN-94-80595] p 2764 N94-27976

Computer aided data recording and analyzing system for the engine test p 2764 N94-27979

INTERNAL CONVERSION

Dynamics of metastable states in supersonic beams [ITN-94-85232] p 3028 N94-27760

INTERNAL ENERGY

Se EXAFS study of the elevated wurtzite to rock salt structural phase transition in CdSe nanocrystals [DE94-003247] p 3054 N94-26125

INTERNATIONAL COOPERATION

Feasibility study on construction of a global environment research and development information network [DE94-725198] p 2868 N94-26904

How to make good use of international research collaboration, with emphasis on the evolving situation in Europe [PB94-119690] p 3101 N94-27323

The telemedicine spacebridge project: A joint US/Russian venture in long distance medicine via satellite [NASA-TM-106523] p 2693 N94-27427

Recent legal movement on water quality regulation in Japan p 2869 N94-28148

Lufthansa Yearbook 1992 [DSK-9734-H-92] p 2660 N94-28230

Air traffic of the European Community with European neighbors p 2661 N94-28233

A sky above Europe p 2661 N94-28234

The single European market: Economical advance, ecological problem? p 2661 N94-28235

Air traffic administration enroute to Europe p 2661 N94-28238

Role and activity of STA on Asian Pacific regional cooperation p 2853 N94-28269

Cooperative research projects on satellite remote sensing for the hydrological subjects p 2853 N94-28270

NASDA contribution plan to Asian countries p 2853 N94-28273

The Environmental Research and Training Centre p 2873 N94-28280

Global Change and Terrestrial Ecosystems (GCTE): Progress report and prospects for Asian contributions p 2874 N94-28281

Global change: A research strategy for Australia 1992-1996 p 2874 N94-28282

A progress report on global change studies in China p 2874 N94-28283

Atmospheric science research in Malaysia: Perspectives on international cooperation p 2874 N94-28285

INTERNATIONAL TRADE

The proliferation of aerospace weapons technology: Ballistic missiles and the case of Brazil [ISBN-0-315-84082-X] p 2763 N94-26634

COMPETENCE 2000: Study on training requirements of the Norwegian metallurgical industry [PB94-124609] p 2741 N94-27328

INTERNETS

A geological and geophysical information system for Eurasia [AD-A274818] p 3098 N94-26490

INTERPLANETARY FLIGHT

Project Minerva: A low-cost manned Mars mission based on indigenous propellant production p 2760 N94-25705

INTERPLANETARY MAGNETIC FIELDS

Quiet-time intensifications along the poleward auroral boundary near midnight [ATR-93(7248)-2] p 2877 N94-26201

Direct evidence of the interplanetary magnetic field effect on the cosmic-ray shadow by the sun [ICRR-296-93-8] p 3116 N94-27607

INTERPLANETARY SPACECRAFT

Project WISH: The Emerald City p 2703 N94-25690

Project Minerva: A low-cost manned Mars mission based on indigenous propellant production p 2760 N94-25705

INTERPOLATION

Pseudoscalar glueball in the composite interpolating fields approach [DE93-634374] p 3016 N94-26042

Users guide for GRIKURV: A code for drawing graphs [PB94-123593] p 2968 N94-27154

INTERPROCESSOR COMMUNICATION

Interface technical specification of the V.25 bis emulator [AD-A273754] p 2948 N94-25720

A VHDL register transfer level model of the linear token passing multiplex data bus protocol for the high speed data bus [AD-A273734] p 2980 N94-26009

The Chaco user's guide [DE94-003669] p 2962 N94-26370

A doubly logarithmic communication algorithm for the Completely Connected Optical Communication Parallel Computer [DE93-019408] p 2980 N94-26473

Parallel matrix transpose algorithms on distributed memory concurrent computers [DE94-002424] p 2964 N94-26764

Hard real-time reliable multicast in the DEDOS system [PB94-126745] p 2966 N94-26920

Static task allocation for parallel processing systems during software development [AD-A274204] p 2981 N94-27100

Virtual memory management and virtual bus overloading on multiple channel architectures [AD-A274127] p 2954 N94-27152

Garbage collection in a multiprocessor Smalltalk system [ISBN-0-315-51159-1] p 2982 N94-27332

Open communication in manufacturing automation [PB94-132479] p 2976 N94-28377

INTERSECTIONS

Locating tie-points on a grid p 2978 N94-27906

INTERSTELLAR COMMUNICATION

The Fermi paradox: An approach based on percolation theory p 2687 N94-27370

INTERSTITIALS

Microscopic study of local structure and charge distribution in metallic La2CuO(4+delta) [DE94-003801] p 3050 N94-25817

Influence of point defects on grain boundary diffusion in oxides [DE94-003164] p 3060 N94-26782

The role of point defect clusters in reactor pressure vessel embrittlement [DE94-001122] p 2739 N94-26931

INTERSYMBOLIC INTERFERENCE

Equalization and cancellation of nonlinear intersymbol interference in a dispersive satellite communication channel [ISBN-0-315-85147-3] p 2775 N94-27274

INTRUSION

Mapping of seawater intrusion into the coastal aquifer of Israel (the seawater-freshwater interface) by TDEM (Time Domain Electromagnetic) method [ITN-94-85238] p 2850 N94-27331

INVARIANCE

Spatial symmetry, local integrability and tetrahedron equations in the Baxter-Bazhanov model [DE93-634348] p 3002 N94-26038

C-periodicity and the physical mass in the 3-state Potts model [DE94-601551] p 3019 N94-26423

Dynamic breaking of U(N) and appearance of Chern-Simons term in 4-fermion theories [DE93-634342] p 3019 N94-26455

On the relativistic invariant representation of arbitrary bilinear combinations of Dirac spinors [DE93-634343] p 3019 N94-26456

Nuclear Theory Group, University of Washington recent and planned research [DE94-002729] p 3022 N94-26809

Classification of linear differential operators with an invariant subspace in monomials [PB94-126620] p 2996 N94-26915

Measurements of the B(sup 0)(bar B)(sup 0)CP asymmetry [DE94-003379] p 3063 N94-27047

Translation and rotation invariant pattern recognition [PB94-123676] p 2968 N94-27157

INVENTORIES

Modelling the mass migration phenomena in partially frozen heat pipes [DE94-002716] p 2797 N94-27709

INVERSE SCATTERING

Crystal potential retrieval in HRTEM [DE94-601883] p 3055 N94-26171

INVERSIONS

Overall analysis of meteorological information in the Daeduk nuclear complex [DE93-632594] p 2894 N94-26469

INVERTEBRATES

The biostratigraphy and paleogeography of Maastrichtian inoceramids p 2889 N94-28303

INVERTERS

Low-cost photovoltaic inverters incorporating application-specific integrated circuits [DE94-003270] p 2856 N94-26463

INVESTMENTS

The effectiveness of AMT investment in UK metal component manufacture [IND-MANU-SCI-TECH-REPT-3] p 2762 N94-25775

INVISCID FLOW

Vortex methods [DE94-003245] p 2789 N94-25597

A sensitivity equation approach to shape optimization in fluid flows [NASA-CR-191598] p 2999 N94-27415

Non-isoenergetic inviscid slot flow p 2655 N94-28333

Calculation of unsteady incompressible inviscid flow about wings and bodies using CANAERO-T panel model p 2655 N94-28334

IO

Studies for Io's extended atmosphere and neutral clouds and their impact on the local satellite atmosphere and on the planetary magnetosphere [NASA-CR-195255] p 3106 N94-27406

Studies for the loss of atomic and molecular species from Io
[NASA-CR-195702] p 3108 N94-27941

IODIDES

Technical report of ISSP. Ser. A, no. 2672: Magneto-optical effects of excitons in BiI3 crystals under pulsed high magnetic fields. 3: Excitons confined around a stacking disorder formed by a bending stress
[JTN-94-80558] p 3065 N94-27240

IODINE

Grain by grain study of the mechanisms of crack propagation during iodine SCC of Zry-4
[DE93-633765] p 2734 N94-26162

Stress corrosion cracking and dealloying of copper-gold alloy in iodine vapor
[DE93-633790] p 2734 N94-26264

ION BEAMS

Study on microscopic structural controls and electronic properties at material surfaces by ion beams
p 2727 N94-25571

An electromagnetic calorimeter with wavelength shifting fiber readout
[DE93-616664] p 2809 N94-25735

Experimental and numerical investigation of shock wave propagation through complex geometry, gas continuous, two-phase media
[DE94-001408] p 2791 N94-26121

Diffusion of substitutional elements in Ti in its hcp phase
[DE93-633762] p 2733 N94-26160

Studies of thin-film growth, adsorption, and oxidation by in situ, real-time, and ex situ ion beam analysis
[DE94-002907] p 3055 N94-26275

Modulation wavelength dependence of ion mixing in metallic superlattices
[DE94-004608] p 3059 N94-26591

Ion beam mixing of marker layers into amorphous aluminum oxide
[DE94-000901] p 2752 N94-26676

Research in pulsed power plasma physics
[AD-A274323] p 3045 N94-27074

Advanced development of particle beam probe diagnostic system
[DE94-002316] p 3047 N94-27720

Observation of stimulated emission from an MBE grown GaN film on sapphire
[DE94-003638] p 3068 N94-27724

ION CURRENTS

Perovskite solid electrolytes for SOFC
[DE94-001923] p 2859 N94-27005

Correlation between electrical activity and the size of single sinoatrial node cells p 2907 N94-27513

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experimental study in rabbit single sinoatrial node cells
p 2908 N94-27514

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experiments using small sinoatrial node tissue preparations isolated from rabbit hearts p 2908 N94-27515

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Postganglionic vagal stimulation in isolated rabbit hearts
p 2908 N94-27516

Postnatal changes in the autonomic modulation of L-type Ca(exp 2+) currents of rabbit ventricular cells
p 2931 N94-27535

Desensitization to acethylcholine in pacemaker cells of the sinoatrial node p 2908 N94-27537

ION CYCLOTRON RADIATION

Review of tokamak experiments on direct electron heating and current drive with fast waves
[DE94-004185] p 3041 N94-25801

Design of folded waveguide antenna for Alcator C-Mod
[DE94-003584] p 2767 N94-25924

Design and control of phased ICRF antenna arrays
[DE94-002796] p 3046 N94-27261

On radio frequency wave induced radial transport and wave helicity
[IPPCZ-326] p 2777 N94-27838

ION DENSITY (CONCENTRATION)

Inertial electrostatic confinement as a power source for electric propulsion p 2688 N94-27373

ION DISTRIBUTION

Acceleration of electrons and ions by strong lower-hybrid turbulence in solar flares
[NASA-TM-109723] p 3111 N94-27953

ION ENGINES

Manned mission to Mars with periodic refueling from electrically propelled tankers p 2689 N94-25670

ION IMPACT

Disintegration of (C60) by Xe ion irradiation
[DE94-601913] p 3023 N94-26929

ION IMPLANTATION

Study on microscopic structural controls and electronic properties at material surfaces by ion beams
p 2727 N94-25571

Binding of copper and nickel to cavities in silicon formed by helium ion implantation
[DE94-003769] p 3050 N94-25814

The structural, chemical, and electrical properties of He-implantation-induced nanocavities in silicon
[DE94-002681] p 3052 N94-25971

Collaborative research on ion implantation of ceramics
[DE93-019177] p 2749 N94-26080

Ion implantation of diamond: Damage, doping, and lift-off
[DE94-001133] p 3054 N94-26137

Peculiarities and application perspectives of metal-ion implants in glasses
[DE94-004671] p 3035 N94-26246

Regrowth zones in laser annealed radiation damaged diamond
[DE94-600821] p 3056 N94-26364

Ion implantation and dynamic recovery of tin-doped indium oxide films
[DE94-001126] p 3062 N94-26932

He(+) and H(+) microbeam damage, swelling and annealing in diamonds
[DE94-601912] p 3063 N94-26987

Ion implantation in silicate glasses
[DE94-003785] p 2757 N94-27726

Thermally stable oxygen and nitrogen implant isolation of C-doped Al(0.35)Ga(0.65)As
[DE94-004799] p 3069 N94-27790

Ion-driven permeation of deuterium in metals
[DE94-701104] p 2744 N94-27876

ION INJECTION

Inertial electrostatic confinement as a power source for electric propulsion p 2688 N94-27373

ION IRRADIATION

Disintegration of (C60) by Xe ion irradiation
[DE94-601913] p 3023 N94-26929

Influence of lattice damage on retention and transport of deuterium in beta silicon carbide
[DE94-005206] p 3068 N94-27693

Secondary electron emission from copper surface due to neodymium and gadolinium ion bombardment
[DE94-701115] p 3027 N94-27718

ION MICROSCOPES

An atom probe investigation of the influence of trace impurities on the mechanical behavior of NiAl
[DE94-002797] p 2734 N94-26272

ION PROBES

He(+) and H(+) microbeam damage, swelling and annealing in diamonds
[DE94-601912] p 3063 N94-26987

Advanced development of particle beam probe diagnostic system
[DE94-002316] p 3047 N94-27720

ION SCATTERING

Diffusion of substitutional elements in Ti in its hcp phase
[DE93-633762] p 2733 N94-26160

Studies of thin-film growth, adsorption, and oxidation by in situ, real-time, and ex situ ion beam analysis
[DE94-002907] p 3055 N94-26275

ION SOURCES

New conditioning procedure derived from operating experience with the Common Long-Pulse Ion Source
[DE94-002891] p 3045 N94-26865

High gas-efficiency hydrogen negative ion sources
[PB93-232163] p 3025 N94-27348

Advanced development of particle beam probe diagnostic system
[DE94-002316] p 3047 N94-27720

ION TEMPERATURE

Kinetic resonance damping rate of the toroidal ion temperature gradient mode
[DE94-003511] p 3041 N94-25923

Reduced Braginskii equations
[DE94-003510] p 3047 N94-27723

IONIC COLLISIONS

Relativistic heavy ion physics
[DE94-003161] p 3031 N94-26097

International bulletin on atomic and molecular data for fusion. No. 42-45, Mar. 1991 - Dec. 1992
[DE94-601817] p 3045 N94-26946

IONIC CRYSTALS

Lighter alkali hydride and deuteride 1: Electronic properties of pure solids
[DE93-616188] p 3051 N94-25914

Radiation-Induced Structural Changes, 2
[DE93-520314] p 3054 N94-26109

IONIC REACTIONS

Merged-beam studies of electron-recombination and excitation of atomic and molecular hydrogen ions
[ETN-94-95339] p 3019 N94-26478

IONIZATION

Two dimensional self-consistent fluid simulation of RF inductive sources
[DE94-003635] p 2767 N94-25937

Electron energy loss spectroscopy in a crystalline environment using inner shell ionization
[DE94-601820] p 3018 N94-26334

Delocalization in electron impact ionization in a crystalline environment
[DE94-601819] p 3062 N94-26927

Technical report of ISSP. Ser. A, no. 2684: Wavelength dependence of nonsequential double ionization in He
[JTN-94-80570] p 3025 N94-27338

Technical report of ISSP. Ser. A, no. 2686: High-order harmonic generation and ionization using ultrashort KrF and Ti:Sapphire lasers
[JTN-94-80572] p 2820 N94-27605

IONIZATION CHAMBERS

Development of laser spectroscopic technology in nuclear industry
[DE93-633327] p 2714 N94-26158

Hadron gas ionization calorimeters
[DE93-634186] p 2810 N94-26397

IONIZATION CROSS SECTIONS

Delocalization in electron impact ionization in a crystalline environment
[DE94-601819] p 3062 N94-26927

Analysis of EUV/FUV dayglow and auroral measurements
[NASA-CR-195237] p 2883 N94-27393

IONIZING RADIATION

Radiation applications of physical chemistry
p 2854 N94-26054

Radiation-Induced Structural Changes, 2
[DE93-520314] p 3054 N94-26109

The response of an hyperpure Ge detector to ionizing radiation
[ISBN-0-315-83968-6] p 2811 N94-26662

IONOSPHERIC CURRENTS

Excitation of Earth-ionosphere waveguide in the ELF and lower VLF bands by modulated ionospheric current
[AD-A274969] p 2878 N94-26304

IONOSPHERIC DISTURBANCES

Coherent HF radar system for the study of natural and heater induced ionospheric irregularities
[AD-A273804] p 2876 N94-25752

Comparative investigation of high-latitude ionospheric structure and effects near solar maximum
[AD-A273799] p 2877 N94-25877

Ionospheric modification by high power, obliquely propagated HF radio wave transmissions. Part 1: Experimental
[AD-A273746] p 2878 N94-26224

Performance statistics bulletin: High altitude meteor scatter propagation, August, September, October 1989
[AD-A274455] p 2773 N94-27085

IONOSPHERIC ELECTRON DENSITY

Ionospheric calibration for single frequency altimeter measurements
[NASA-CR-195709] p 2883 N94-27883

IONOSPHERIC HEATING

Excitation of Earth-ionosphere waveguide in the ELF and lower VLF bands by modulated ionospheric current
[AD-A274969] p 2878 N94-26304

IONOSPHERIC NOISE

Characteristics of 30-MHz interference noises observed by riometers p 2884 N94-27965

IONOSPHERIC PROPAGATION

Comparative investigation of high-latitude ionospheric structure and effects near solar maximum
[AD-A273799] p 2877 N94-25877

Kiruna geophysical data. Data summary 93/4-6, April-June 1993
[PB94-123700] p 2881 N94-27039

Kiruna geophysical data. Data summary 93/1-3, January-March, 1993
[PB94-123791] p 2881 N94-27043

JARE data reports. No. 186: Upper atmosphere physics data. Syowa and Asuka Stations, 1990
[JTN-94-80594] p 2881 N94-27299

IONOSPHERIC SOUNDING

Memories of National Institute of Polar Research. Series A-19. Upper atmosphere physics: ELF emission in high latitudes: Ray path calculation and ground-satellite observations
[JTN-94-80592] p 2882 N94-27342

Antarctic Record, Vol. 36, No. 2
[REPT-107] p 2883 N94-27963

Observation of the upper atmosphere physics at Asuka Station by the 30th Japanese Antarctic Research Expedition in 1989 p 2885 N94-27972

IONOSPHERICS

Auroral Tomography Workshop Proceedings
[PB94-123718] p 2881 N94-27040

IONS
Two dimensional self-consistent fluid simulation of RF inductive sources
[DE94-003635] p 2767 N94-25937
The use of on-line ion chromatography for high temperature and high pressure reaction studies
[DE94-002525] p 2713 N94-26075
Ion beam mixing of marker layers into amorphous aluminum oxide
[DE94-000901] p 2752 N94-26676
Rydberg states in multiply charged ions
[DE94-002335] p 3021 N94-26760
Influence of point defects on grain boundary diffusion in oxides
[DE94-003164] p 3060 N94-26782
Effect of temperature and recoil-energy spectra on irradiation-induced amorphization in Ca2La8(SiO4)6O2
[DE94-004371] p 3067 N94-27602
Technical report of ISSP. Ser. A, no. 2686: High-order harmonic generation and ionization using ultrashort KrF and Ti:Sapphire lasers
[JTN-94-80572] p 2820 N94-27605
Damage growth in MgAl2O4 crystals by Xe ion irradiations
[DE94-005009] p 3069 N94-27828
Effect of different ions on the anodic behaviour of alloy 800 in chloride solutions at high temperature
[DE94-602982] p 2743 N94-27832
Acceleration of electrons and ions by strong lower-hybrid turbulence in solar flares
[NASA-TM-109723] p 3111 N94-27953

IRIDIUM
Extraterrestrial accretion and glacial cycles
p 2890 N94-28308

IRON
Study on improvement in physical analysis method of metallic materials p 2728 N94-25577
Deviatoric stresses and plastic strain rates in strong shock waves for six metals
[DE94-002964] p 2733 N94-26022
Iron: What is melt?
[DE94-003373] p 2735 N94-26322
The electrochemical behavior of the Al3Fe intermetallic compound and localized corrosion of impure 1100 Al
[DE94-002037] p 2739 N94-26912

IRON ALLOYS
The role of grain boundary chemistry and structure in the environmentally-assisted intergranular cracking of nickel-base alloys
[DE94-003159] p 2732 N94-25954
Surface physics with cold and thermal neutron reflectometry
[DE94-001447] p 2733 N94-26070
Influence of helium generation rate and temperature history on mechanical properties of model Fe-Cr-Ni alloys irradiated in FFTF at relatively low displacement rates
[DE94-004264] p 2737 N94-26575
Experimental measurement of local displacement and chemical pair correlations in crystalline solid solutions
[DE94-001124] p 3065 N94-27251
Current status of research and development on nickel and iron aluminides
[DE94-004247] p 2741 N94-27616
Effect of different ions on the anodic behaviour of alloy 800 in chloride solutions at high temperature
[DE94-602982] p 2743 N94-27832
NMR study of quasicrystal Al(70)Pd(20)T(M10) alloy (T(M):Cr, Mn, Fe, and Co) p 2745 N94-28162
Production of an amorphous Fe(75)Si(10)B(15) sheet by a metallic mold casting method and its properties
p 2746 N94-28170

IRON COMPOUNDS
Study on reactions between molten metal and oxide by magnetic flotation dissolution method
p 2725 N94-25558
Study on microscopic structural controls and electronic properties at material surfaces by ion beams
p 2727 N94-25571

IRON OXIDES
Study on improvement in physical analysis method of metallic materials p 2728 N94-25577

IRRADIATION
Microstructural development in low activation ferritic alloys irradiated to 200 dpa at 420 C
[DE94-004269] p 2731 N94-25803
Studies on the application of radiation for genetic transformation in higher plants
[DE93-632656] p 2901 N94-26470
Nonswelling behavior of HT9 alloy irradiated to high exposure
[DE94-003502] p 2736 N94-26522
Molecular biological studies on the human radioresistance and drug resistance
[DE93-632682] p 2910 N94-26549
S-76 high intensity radiated fields, volume 2
[AD-A274572] p 2771 N94-26836
S-76 high intensity radiated fields, volume 1
[AD-A274571] p 2771 N94-26854
He(+) and H(+) microbeam damage, swelling and annealing in diamonds
[DE94-601912] p 3063 N94-26987
Research and development within nonlinear optics for protection of optical sensors against laser irradiation on of optical sensors against laser irradiation. Quarterannual report 1 (april 1993))
[PB94-124245] p 3037 N94-27046
Outgas and vacuum seal characteristics of irradiated polyimide O-ring
[DE94-701200] p 2757 N94-27812
Simulations of terrestrial in-situ cosmogenic-nuclide production
[DE94-004999] p 3117 N94-27826

ISCHEMIA
Protective action of platelet-activating factor antagonist, TCV-309, against ischemia reperfusion injury in isolated rabbit hearts p 2904 N94-27465
Protective action of an amiloride derivative (amiloride, 5-(N, N-dimethyl) hydrochloride) against in isolated ischemia/reperfusion newborn rabbit hearts
p 2904 N94-27466

ISING MODEL
NNN-Ising model simulation of nanodomain textures in relaxor-type lead scandium tantalate
[DE94-601884] p 2748 N94-25844
Holes in a two-dimensional quantum antiferromagnet
[DE93-634753] p 3057 N94-26388
Ising critical behaviour in the one-dimensional frustrated quantum XY model
[DE93-634755] p 3057 N94-26390
Mapping between the Sinh-Gordon and Ising models
[DE94-601535] p 2998 N94-27162

ISOBARS (PRESSURE)
An observational study of the extratropical anticyclones in the South American continent
[INPE-5387-TDI/476] p 2896 N94-27356

ISOMERS
The addition of molecular oxygen to hydroperoxy-propyl radicals
[DE94-003662] p 2760 N94-27725
Thermal conductivity of liquid aliphatic alcohols
[ESDU-93008] p 2720 N94-28058
Vapour pressures and critical points of liquids: Aliphatic and cyclic ketones
[ESDU-93009] p 2720 N94-28059
Orthobaric densities and molar volumes of liquids: Aliphatic and cyclic ketones
[ESDU-93010] p 2720 N94-28060

ISOSTATIC PRESSURE
Material optimization and manufacturing development of reduced cost powder metal titanium alloy components for gas turbine engine application, phase 2
[AD-A274410] p 2709 N94-26978

ISOTHERMAL FLOW
A modelling of the noise from simple coaxial jets. Part 3: With hot primary flow
[ISVR-TR-230-PT-3] p 2807 N94-28173

ISOTHERMS
Experimental determination of the CU-IN-PB ternary phase diagram
[DE94-003765] p 2735 N94-26349

ISOTONICITY
Isotonic estimation and rates of convergence in Wicksell's problem
[REPT-93-39] p 3002 N94-26213

ISOTOPES
Seasonal snow of arctic Alaska R4D investigations
[DE93-040082] p 2892 N94-25939

ISOTOPIC ENRICHMENT
Isotopically labeled CO2 from stratosphere: A tracer of carbon biogeochemistry
[DE94-002777] p 2877 N94-26015

ISOTOPIC SPIN
Spinor and isospinor structure of relativistic particle propagators
[DE94-601552] p 3019 N94-26424
Spin from isospin: The model of superparticle in a non-Grassmannian approach
[DE93-634341] p 3019 N94-26454

ISOTROPIC MEDIA
Efficient modeling in transversely isotropic inhomogeneous media
[DE94-003394] p 2877 N94-25847
Eigenwaves in the general uniaxial bianisotropic medium with symmetric parameter dyadics
[PB94-132891] p 2778 N94-28381

ISOTROPY
Design and test of postbuckled stiffened curved plates: A literature survey
[PB94-126521] p 2840 N94-26961
The PROTEL contamination code
[RXR-93071] p 3040 N94-28202
Plane wave propagation and polarization properties in transversely bianisotropic uniaxial medium
[PB94-132883] p 2778 N94-28380
Green dyadic and dipole fields for a medium with anisotropic chirality
[PB94-132933] p 2779 N94-28391

ISRAEL
Mapping of seawater intrusion into the coastal aquifer of Israel (the seawater-freshwater interface) by TDEM (Time Domain Electromagnetic) method
[ITN-94-85238] p 2850 N94-27331

ITERATION
Design and evaluation of fault tolerance in opto-electronic computing
[AD-A274281] p 2954 N94-27016

ITERATIVE SOLUTION
Research on primal-dual interior point algorithms for mathematical programming
[DE94-003982] p 2959 N94-25821
Preconditioning in parallel Runge-Kutta methods for stiff initial value problems
[CWI-NM-R9310] p 2991 N94-26217
On the error committed by stopping the Newton iteration in implicit Runge-Kutta methods
[TW-93-02] p 2992 N94-26229
A numerical solution to the one and two dimensional line radiative transfer equation
[ISBN-0-315-84258-X] p 2994 N94-26640
Nested Krylov methods based on GCR
[PB94-125317] p 2995 N94-26818
Computation of numerical solution of parabolic PDEs by monotone iterative methods
[ISBN-0-315-84553-8] p 2999 N94-27404
Iterative methods for the WLS state estimation on RISC, vector, and parallel computers
[DE94-004260] p 3000 N94-27569
Fixed point type theorems and projection-interaction approximation
[DE94-603669] p 3000 N94-27632
A parallel multigrid algorithm for solving the Navier-Stokes equations on a transputer system
[PREPRINT-699] p 2807 N94-28099
Hessenberg matrices in Krylov subspaces and the computation of the spectrum
[PB94-133170] p 3001 N94-28389

IUE
Ultraviolet observations of astronomical sources
[NASA-CR-195232] p 3102 N94-26234

J

J INTEGRAL
Effect of loading mode on the fracture toughness of a reduced activation ferritic/martensitic stainless steel
[DE94-004290] p 2732 N94-25987

JAMMERS
An analysis of FM jamming and noise quality measures
[AD-A274349] p 2772 N94-26924

JAMMING
An analysis of FM jamming and noise quality measures
[AD-A274349] p 2772 N94-26924
Development of a performance evaluation tool (MMSOFE) for detection of failures with Multiple Model Adaptive Estimation (MMAE)
[AD-A274218] p 2665 N94-27071
FOA 39 — electronic countermeasures
[PB94-124252] p 2773 N94-27159

JAPAN
An observational study of air pollution transport over a large urban complex
[REPT-6] p 2867 N94-26474
Meteorological data at the Nagaoka Institute of Snow and Ice Studies
[REPT-158] p 2896 N94-27169

JET AIRCRAFT
Report of the defense science board task force on aircraft assessment
[AD-A274531] p 2669 N94-26835
Methods for experimentally determining commercial jet aircraft landing parameters from video image data
[AD-A274207] p 2669 N94-27105
Experiments into the scaling parameters required for exhaust gas ingestion testing of vertical landing aircraft
p 2671 N94-28017

JET BOUNDARIES
A numerical investigation of a subsonic jet in a crossflow p 2803 N94-28023

JET CONTROL
Controlled oscillation of forebody vortices by nozzle jet blowing
[ISBN-0-315-84134-6] p 2678 N94-27648
Control jets in interaction with hypersonic rarefied flow
p 2698 N94-28020

Recent developments in the simulation of steady and transient transverse jet interactions for missile, rotorcraft, and propulsive applications p 2804 N94-28030

JET ENGINE FUELS
Broad specification fuels combustion technology program, phase 2
[NASA-CR-191066] p 2719 N94-27854

JET ENGINES
An algorithm for determination of bearing health through automated vibration monitoring
[AD-A274591] p 2823 N94-26986
Engine starting and stopping p 2828 N94-28047
High-performance parallel analysis of coupled problems for aircraft propulsion
[NASA-CR-195292] p 2845 N94-28181

JET EXHAUST
Experiments into the scaling parameters required for exhaust gas ingestion testing of vertical landing aircraft
p 2671 N94-28017

JET FLOW
Experimental and theoretical investigations of the influence of the jet on the flow around a bypass-engine
[DLR-FB-93-17] p 2675 N94-27593
Computational and Experimental Assessment of Jets in Cross Flow
[AGARD-CP-534] p 2799 N94-28003
Fifty years of jet in cross flow research
p 2799 N94-28004
The interaction region associated with twin jets and a normal crossflow p 2800 N94-28009
Experimental data for CFD validation of impinging jets in crossflow with application to ASTOVL flow problems
p 2801 N94-28010
Experimental investigation of the interaction of a thrust reverser jet with an external subsonic flow
p 2801 N94-28011
Vectored jets-induced interference on aircraft, prediction and verification p 2801 N94-28012
Topological structure of a jet in a cross flow
p 2801 N94-28014
An experimental study of siphonal jets in a turbulent boundary layer crossflow p 2802 N94-28015
Experiments on the ground vortex formed by an impinging jet in cross flow p 2802 N94-28016
Predictions of momentum and scalar fields in a jet in cross-flow using first and second order turbulence closures p 2803 N94-28025
Navier-Stokes simulation of two and three dimensional jets in crossflow, effects of grid, and boundary conditions p 2804 N94-28026
Effects, limits, and limitations of spanwise blowing
p 2659 N94-28027
Pneumatic management of blunted-forebody flow asymmetry for high-angle-of-attack directional control
p 2679 N94-28028
Theoretical and experimental investigation of a delta wing with turbulent leading-edge jets
p 2659 N94-28029
Recent developments in the simulation of steady and transient transverse jet interactions for missile, rotorcraft, and propulsive applications p 2804 N94-28030
Numerical assessment of aerodynamic interactions on missiles with transverse jets control
p 2659 N94-28031
Effects of free-stream turbulence on a jet in a cross flow p 2805 N94-28036
Navier-Stokes analysis of a swirling jet in crossflow
p 2806 N94-28038
Journal of NIRE, volume 2, number 4
[JTN-94-80554] p 2869 N94-28147
Numerical simulation of turbulent free jet by TFKE model p 2871 N94-28157
A modelling of the noise from simple coaxial jets. Part 3: With hot primary flow
[ISVR-TR-230-PT-3] p 2807 N94-28173

JET IMPINGEMENT
Experimental data for CFD validation of impinging jets in crossflow with application to ASTOVL flow problems
p 2801 N94-28010
Experiments on the ground vortex formed by an impinging jet in cross flow p 2802 N94-28016
Calculation of single and multiple jets in cross-flow with and without impingement using Reynolds-stress-transport closure p 2803 N94-28024
Advanced metallic exhaust impinged structural concepts demonstration p 2832 N94-28209

JET LIFT
Unsteady aspects of hot gas reingestion and statistical analysis p 2676 N94-28019
Transitional flight characteristics of a geometrically simplified STOVL model p 2672 N94-28035

JET PROPULSION
High-performance parallel analysis of coupled problems for aircraft propulsion
[NASA-CR-195292] p 2845 N94-28181

JET PUMPS
Ejectors and jet pumps: Computer program for design and performance for liquid flow
[ESDU-93022] p 2832 N94-28093

JET STREAMS (METEOROLOGY)
Investigation of mesoscale convective cloud clusters in South China
[AD-A274303] p 2895 N94-26678

JET THRUST
Experiments on interaction force of jets in hypervelocity cross-flow in a shock tunnel p 2659 N94-28022

JOINTS (ANATOMY)
Effect of sera from patients treated with long-term hemodialysis on mRNA's for collagenase, stromelysin, and tissue inhibitor of metalloprotease in cultured human synovial cells p 2920 N94-27481

JOINTS (JUNCTIONS)
Three methods to measure RH bond energies
[DE94-003795] p 3013 N94-25816
Bulletin of the Institute for Chemical Reaction Science, Tohoku University, volume 2
[JTN-94-80602] p 2717 N94-27385
Porous vycor glass tube joined to borosilicate glass
p 2718 N94-27392

JOSEPHSON JUNCTIONS
Flux flow, pinning, and resistive behavior in superconducting networks
[DE94-003400] p 3050 N94-25848
Ising critical behaviour in the one-dimensional frustrated quantum XY model
[DE93-634755] p 3057 N94-26390
Preparation and characterization of high temperature superconductor film surfaces
[AD-A274293] p 3059 N94-26681
Processing, fabrication, and demonstration of HTS integrated microwave circuits, appendix A
[AD-A274600] p 2785 N94-26890

JOURNAL BEARINGS
Calculation methods for steadily loaded central circumferential groove hydrodynamic journal bearings (guide to use of computer program A9304)
[ESDU-93004] p 2830 N94-28073
Calculation methods for steadily loaded axial groove hydrodynamic journal bearings (guide to use of computer program A9305)
[ESDU-93005] p 2830 N94-28074
Calculation methods for steadily loaded axial groove hydrodynamic journal bearings. Low viscosity process fluid lubrication (guide to use of computer program A9306)
[ESDU-93006] p 2830 N94-28075

JUNCTION DIODES
Electric-field dependence of electroreflectance and photocurrent spectra at visible wavelengths in MOVPE-grown InAlGaP multiple strained quantum-well structures
[DE94-004692] p 2780 N94-25664
Electrical properties of p-type GaInP2
[AD-A273771] p 3051 N94-25856

JUNCTION TRANSISTORS
A physics-based heterojunction bipolar transistor model for integrated circuit simulation
[AD-A274081] p 2781 N94-25995

JUPITER (PLANET)
The crash of P/Shoemaker-Levy 9 into Jupiter and its implications for comet bombardment on Earth
p 2891 N94-28313

JUPITER ATMOSPHERE
Studies for Io's extended atmosphere and neutral clouds and their impact on the local satellite atmosphere and on the planetary magnetosphere
[NASA-CR-195255] p 3106 N94-27406

K

K-EPSILON TURBULENCE MODEL
Computational prediction of isolated performance of an axisymmetric nozzle at Mach number 0.90
[NASA-TM-4506] p 2646 N94-26547
Predictions of momentum and scalar fields in a jet in cross-flow using first and second order turbulence closures p 2803 N94-28025
Navier-Stokes simulation of two and three dimensional jets in crossflow, effects of grid, and boundary conditions p 2804 N94-28026
Recent developments in the simulation of steady and transient transverse jet interactions for missile, rotorcraft, and propulsive applications p 2804 N94-28030

KALMAN FILTERS
Multiple model adaptive estimation applied to the LAMBDA URV for failure detection and identification
[AD-A274078] p 3002 N94-25992
Kalman filtering of narrowband interference from direct sequence spread spectrum communications systems
[ISBN-0-315-84011-0] p 2784 N94-26627
An adaptive Kalman filter for tactical missiles guidance systems
[ISBN-0-315-84115-X] p 2677 N94-26636
Development of a performance evaluation tool (MMSOFE) for detection of failures with Multiple Model Adaptive Estimation (MMAE)
[AD-A274218] p 2665 N94-27071
Enhanced tracking of airborne targets using forward looking infrared and laser return measurements
[AD-A274181] p 3037 N94-27102
A data fusion algorithm for multi-sensor microburst hazard assessment p 2641 N94-27287
Flight testing of GPS and GPS-aided systems
[NLR-TP-92151-U] p 2666 N94-27831

KAONS
Production of (phi) mesons in central Si + Au collisions at 14.6 AGeV/c
[DE94-003196] p 3012 N94-25795
Low-energy hadronic interactions beyond the current algebra approach
[DE94-602600] p 3022 N94-26900
Pi plus pi minus gamma and K+ K- production in two photon collisions at ARGUS
[ISBN-0-315-63598-3] p 3027 N94-27684

KELVIN-HELMHOLTZ INSTABILITY
Probability of accessing the multiple saturated states in the resistive interchange instability
[DE94-000478] p 3044 N94-26694

KERR CELLS
Characterization of nonlinear effects in optically pumped vertical cavity surface emitting lasers
[AD-A273840] p 2815 N94-25744

KETONES
Vapour pressures and critical points of liquids: Aliphatic and cyclic ketones
[ESDU-93009] p 2720 N94-28059
Orthobaric densities and molar volumes of liquids: Aliphatic and cyclic ketones
[ESDU-93010] p 2720 N94-28060

KINEMATICS
A global approach to kinematic path planning to robots with holonomic and nonholonomic constraints
p 2683 N94-26279
Inertial-space disturbance rejection for space-based manipulators p 2683 N94-26281
High-production global positioning system methods for survey applications: The pseudo-kinematic method with the Trimvec programming system
[ETN-94-95035] p 2665 N94-26539
Optimal architectural design of parallel and hybrid manipulators
[ISBN-0-315-84351-9] p 2822 N94-26657
Study of the kinematic and dynamic characteristics of a wormgear transmission for helicopter applications
[NASA-CR-195287] p 2826 N94-27657

KINESTHESIA
Proprioceptive isokinetic exercise test
[NASA-TM-104015] p 2902 N94-27227

KINETIC EQUATIONS
Kinetic equation identification from measurement of a particular solution
[DE93-634585] p 2995 N94-26768

KINETIC THEORY
Process modelling of aluminium alloys. Modelling of the quench sensitivity of alloy AA6082
[PB94-124567] p 2741 N94-27325

KINOFORM
Kinoform/lens system for injecting a high power laser beam into an optical fiber
[DE94-003226] p 2819 N94-27262

KLYSTRONS
JLC-1
[DE93-520380] p 3031 N94-26113
HPm-tubes: Literature survey comprising 1992
[PB94-123643] p 2785 N94-27038

KNOWLEDGE BASED SYSTEMS
Developing realistic cooperative behaviors for autonomous agents in air combat simulation
[AD-A274077] p 2937 N94-25774
A method for populating the knowledge base of APTAS, a domain-oriented application composition system
[AD-A274034] p 2766 N94-25797
Top down influences on bottom-up processing
[AD-A274220] p 2939 N94-27072
A method for populating the knowledge base of AFIT's domain-oriented application composition system
[AD-A274128] p 3099 N94-27118
Alternative architectures for domain-oriented application composition and generation systems
[AD-A274180] p 2968 N94-27128

KNOWLEDGE BASES (ARTIFICIAL INTELLIGENCE)
Knowledge base systems for chemical compounds designing support p 2723 N94-25550
A method for populating the knowledge base of APTAS, a domain-oriented application composition system
[AD-A274034] p 2766 N94-25797

KNOWLEDGE REPRESENTATION

Knowledge base systems for chemical compounds designing support p 2723 N94-25550

Study on knowledge extraction and systematization for material design p 2727 N94-25568

Knowledge organization in intelligent tutoring systems for diagnostic problem solving in complex dynamic domains
[AD-A273986] p 2984 N94-25899

A hybrid formalism for representation and interpretation of image knowledge
[INPE-5485-PRE/1784] p 2989 N94-27833

KOLMOGOROV THEORY

The nonlinear Galerkin method: A multi-scale method applied to the simulation of homogeneous turbulent flows
[NASA-CR-191581] p 2792 N94-26499

Modelling atmospheric turbulence effects on ground-based telescope systems
[DE94-004211] p 3102 N94-26528

A strange application of Kolmogorov complexity
[CWI-CS-R9328] p 2973 N94-27737

KONDO EFFECT

Multi-channel Kondo necklace
[DE93-634754] p 3057 N94-26389

Strongly interacting fermion systems
[DE94-002674] p 3021 N94-26677

Correlated mean field Ansatz for the Kondo necklace
[DE94-603671] p 3067 N94-27634

KORTEWEG-DEVRIES EQUATION

Poisson-lie group of pseudodifferential symbols
[PB94-124393] p 2997 N94-26996

KOVAR (TRADEMARK)

High temperature grain growth and oxidation of Fe-29Ni-17Co (Kovar (tm)) alloy leads
[DE94-004691] p 3069 N94-27753

KP INDEX

Persistence of auroral electron flux events from DMSP/F9 electron measurements
[RXR-92012] p 2887 N94-28206

KRAMERS-KRONIG FORMULA

Submillimeter residual losses in high-(Tc) superconductors
[DE94-003241] p 3058 N94-26516

KRYPTON FLUORIDE LASERS

Laboratory plasma studies
[AD-A274655] p 3043 N94-26356

Technical report of ISSP. Ser. A, no. 2685: ASE-free terawatt KrF/Ti : sapphire hybrid laser system
[JTN-94-80571] p 2820 N94-27339

Technical report of ISSP. Ser. A, no. 2686: High-order harmonic generation and ionization using ultrashort KrF and Ti:Sapphire lasers
[JTN-94-80572] p 2820 N94-27605

L

LABOR

Concepts and methods of measuring productivity at the organization level
[AD-A273126] p 3094 N94-27180

LABORATORIES

Measurement of laboratory quality
[VTT-TIED-1427] p 2679 N94-25652

The National Center for Advanced Information Components Manufacturing: Program update
[DE94-002647] p 2960 N94-26118

LACTATES

High impact strength poly(lactide) tough biodegradable materials
[ETN-94-95389] p 2747 N94-25748

LAGRANGIAN FUNCTION

Dynamical group of relativistic straight-line string
[DE93-634347] p 3072 N94-26037

Orthodox gravity
[DE94-601560] p 2878 N94-26418

Gauging of Chern-Simons p-Barnes
[DE94-601553] p 2993 N94-26425

Component structure of the N = 2 super-Yang-Mills theory in the harmonic superspace
[DE93-634340] p 3072 N94-26453

Spin from isospin: The model of superparticle in a non-Grassmannian approach
[DE93-634341] p 3019 N94-26454

Delta f Algorithm
[DE94-003120] p 2963 N94-26521

Low-energy hadronic interactions beyond the current algebra approach
[DE94-602600] p 3022 N94-26900

LAMINAR BOUNDARY LAYER

Prediction of leading-edge transition and relaminarization phenomena on a subsonic multi-element high-lift system p 2659 N94-27929

Experimental study on the shock wave interaction with a hypersonic boundary layer near a convex corner
p 2654 N94-28328

LAMINAR FLOW

Dynamic response of a compressor research facility
[AD-A273836] p 2679 N94-25740

The numerical calculation of laminar and turbulent flows using penalty function finite volume methods
[ISBN-0-315-61377-7] p 2799 N94-27947

Pneumatic management of blunted-forebody flow asymmetry for high-angle-of-attack directional control
p 2679 N94-28028

Calculation methods for steadily loaded axial groove hydrodynamic journal bearings (guide to use of computer program A9305)
[ESDU-93005] p 2830 N94-28074

Calculation methods for steadily loaded axial groove hydrodynamic journal bearings. Low viscosity process fluid lubrication (guide to use of computer program A9306)
[ESDU-93006] p 2830 N94-28075

Forced convection heat transfer in straight tubes. Part 2: Laminar and transitional flow
[ESDU-93018-PT-2] p 2807 N94-28139

LAMINATES

A nonlinear three-dimensional micromechanics model for fiber-reinforced laminated composites
[AD-A273772] p 2705 N94-25857

Influence of embedded optical fibers on compressive strength of advanced composites
[AD-A273775] p 2705 N94-25859

The effects of embedded internal delaminations on composite laminate compression strength; an experimental review
[NASA-TM-108440] p 2707 N94-26127

Bimaterial interfaces and their role in the mechanical performance of the in-situ composites
[AD-A274688] p 2707 N94-26447

Processing and mechanical properties of laminated metal composites of Al 6090-25 volume percent SiC(sub p) and Al 5182
[DE94-001070] p 2708 N94-26930

Experimental study of the angled crack in GLARE 3
[PB94-126554] p 2669 N94-26954

Development of fibre-metal laminates, ARALL and GLARE, new fatigue resistant materials
[PB94-126471] p 2669 N94-26969

Impact tests on fibre metal laminates under a tensile load
[PB94-126570] p 2710 N94-27201

The experimental behavior of spinning pretwisted laminated composite plates
[NASA-CR-195220] p 2711 N94-27352

Finite element analysis of damped vibrations of laminated composite plates
[ISBN-0-315-84928-2] p 2843 N94-27585

Mechanically fastened composite laminates subjected to combined bearing-bypass and shear loading
p 2712 N94-27914

Structural study of Cu/Co multilayer by anomalous small-angle x ray scattering p 2744 N94-28160

Differential scanning calorimetric study of solid state amorphization and crystallization in Zr/Co and Zr/Ni multilayers p 2745 N94-28161

LAND ICE

Ice surface temperature retrieval from AVHRR, ATSR, and passive microwave satellite data: Algorithm development and application
[NASA-CR-195276] p 2851 N94-27849

LAND MANAGEMENT

Asia-Pacific Seminar on Global Change Research Cooperation
[JTN-94-80517] p 2871 N94-28268

Global concern on research cooperation for environment p 2872 N94-28275

Land use change in Thailand and its impact on environmental change: Joint Thai-Japanese research project (1993-1995) p 2875 N94-28288

LAND SURFACE TEMPERATURE

Ice surface temperature retrieval from AVHRR, ATSR, and passive microwave satellite data: Algorithm development and application
[NASA-CR-195276] p 2851 N94-27849

LAND USE

Land use change in Thailand and its impact on environmental change: Joint Thai-Japanese research project (1993-1995) p 2875 N94-28288

LANDAU DAMPING

Review of tokamak experiments on direct electron heating and current drive with fast waves
[DE94-004185] p 3041 N94-25801

Kinetic resonance damping rate of the toroidal ion temperature gradient mode
[DE94-003511] p 3041 N94-25923

Analysis of density limit and efficiency in lower hybrid current drive
[DE94-604995] p 3049 N94-27856

LANDAU FACTOR

Excited Landau levels, orbital angular momentum and axial anomaly
[DE94-606407] p 3068 N94-27679

LANDING GEAR

Tests of highly loaded skids on a concrete runway
[NASA-TP-3435] p 2669 N94-26608

Aircraft wheel life assessment
[AD-A274378] p 2823 N94-26976

LANDING LOADS

Methods for experimentally determining commercial jet aircraft landing parameters from video image data
[AD-A274207] p 2669 N94-27105

LANDING SIMULATION

Piloted simulation study of an ILS approach of a twin-pusher business/commuter turboprop aircraft configuration
[NASA-TM-4516] p 2646 N94-26602

LANDSAT SATELLITES

Morphodynamics of inter-tidal areas: The Wadden Sea
[NLR-TP-92356-U] p 2851 N94-27555

LANGMUIR-BLODGETT FILMS

Langmuir-Blodgett film of amylose-esters and chiral azo-dyes (structure and second order nonlinear optical behaviour)
[ETN-94-95390] p 2747 N94-25749

Mechanical properties of polyaniline prepared by polymerization in an organized monolayer
[AD-A274350] p 2753 N94-26925

Ferroelectricity in a Langmuir-Blodgett multilayer film of a liquid crystalline side-chain polymer
[AD-A274477] p 2754 N94-27033

Langmuir-Blodgett and STM investigations of conducting polymer thin films
[AD-A274512] p 2755 N94-27087

Chemical polymerization and Langmuir-Blodgett techniques. 2: The polymerization of monolayers of 3-substituted pyrroles
[AD-A274478] p 2755 N94-27163

LANGUAGES

Induced pictorial representations
[AD-A274251] p 2939 N94-27012

LANTHANUM ALLOYS

Mechanical behavior of amorphous alloys at elevated temperatures p 2746 N94-28167

LANTHANUM COMPOUNDS

Successive structural phase transitions in stoichiometric La2NiO4 observed by x ray diffraction
[REPT-A-2665] p 3051 N94-25921

Phase diagram of La2NiO(4 + delta) (0 less than or equal to delta less than or equal to 0.18). 1: Phases at room temperature and phase transition above delta equal to 0.15
[REPT-A-2661] p 3053 N94-26089

Technical report of ISSP. Ser. A, no. 2669: Relations between oxygen deficiency and structures in the La-Sr-Cu-O system. 3: Oxygen contents and structure of (La, Sr)8Cu8O(16 + delta) phase
[JTN-94-80555] p 3066 N94-27353

LANTHANUM ISOTOPES

Microscopic study of local structure and charge distribution in metallic La2CuO(4 + delta)
[DE94-003801] p 3050 N94-25817

LANTHANUM OXIDES

Microscopic study of local structure and charge distribution in metallic La2CuO(4 + delta)
[DE94-003801] p 3050 N94-25817

Preparation and characterization of high temperature superconductor film surfaces
[AD-A274293] p 3059 N94-26681

LAP JOINTS

Testing composite-to-metal tubular lap joints
[DE94-003225] p 2836 N94-26032

LARGE SPACE STRUCTURES

Prototype space fabrication platform
[AD-A273904] p 2694 N94-25659

Proceedings of Damping 1993, volume 2
[AD-A274227] p 2840 N94-26953

Proceedings of Damping 1993, volume 3
[AD-A274228] p 2840 N94-27008

Multiple model adaptive control of a large flexible space structure with purposeful dither for enhanced identifiability
[AD-A274132] p 2987 N94-27122

Dynamics and robust control for uncertain flexible space systems
[INPE-5510-TAE/020] p 2696 N94-27357

LARMOR RADIUS

Toroidal plasma beta-FLR limit in a toroidally linked mirror system
[DE94-003119] p 3041 N94-25792

LARYNX

NCVS, volume 5
[AD-A274975] p 2902 N94-27165

LASER ABLATION
Resonant holographic measurements of laser ablation plume expansion in vacuum and argon gas backgrounds
[DE94-001407] p 2813 N94-27615
LASER ALTIMETERS
Laser altimetry simulator. Version 3.0: User's guide
[NASA-TM-104588] p 2877 N94-26152
LASER ANNEALING
Regrowth zones in laser annealed radiation damaged diamond
[DE94-600821] p 3056 N94-26364
LASER APPLICATIONS
Characterization of an LCD for use as a programmable phase shifter to produce a single-lobed far-field pattern in a phased array
[AD-A273883] p 3034 N94-25729
Microtubules for nonlinear optical limiting
[AD-A273940] p 3035 N94-25941
Deciphering the quark-gluon structure of the photon in electron(gamma) collisions
[DE93-634386] p 3017 N94-26043
Improved measurement accuracy in a Long Trace Profiler: Compensation for laser pointing instability
[DE94-003408] p 2816 N94-26130
Broad band tunable dye laser development
[DE93-632978] p 2816 N94-26157
Development of an industrial CO2 laser for mask marking
[DE93-632901] p 2816 N94-26184
Development of surgical CW Nd:YAG laser with optical fiber delivery system
[DE93-632902] p 2817 N94-26185
Laser manipulation of metastable neon atoms
[ETN-94-95344] p 2817 N94-26225
Compact, solid-state femtosecond source
[AD-A273932] p 2817 N94-26271
Diode-laser-pumped, gas-cell atomic clocks
[AD-A274812] p 3008 N94-26484
Laser Doppler velocimetry in a low speed multistage compressor
[AD-A274836] p 2818 N94-26498
Beam-quality measurements for materials processing lasers and the proposed ISO standard
[DE94-002738] p 2819 N94-26811
Mechanistic studies of opto-electronic materials and syntheses using multiple laser and surface diagnostics
[AD-A274528] p 3036 N94-26834
Gordon Research Conference on the Physics and Chemistry of Laser Diagnostics in Combustion
[AD-A274609] p 2716 N94-26893
Enhanced tracking of airborne targets using forward looking infrared and laser return measurements
[AD-A274181] p 3037 N94-27102
Compilation of corrections for postprocessing of laser bathymetry data
[PB94-123668] p 2900 N94-27156
Scanview: A grafical program for analysis of laserbathymetry data
[PB94-124443] p 2900 N94-27208
High repetition rate, mode locked, figure eight laser with extracavity feedback
[AD-D016053] p 2820 N94-27670
System for conditioning an electron beam for improved free-electron laser operation
[AD-D016054] p 2820 N94-27671
Optical pattern recognition system utilizing resonator array
[AD-D016071] p 3040 N94-28224
LASER ARRAYS
Characterization of an LCD for use as a programmable phase shifter to produce a single-lobed far-field pattern in a phased array
[AD-A273883] p 3034 N94-25729
LASER BEAMS
Studies of non-linear optical effects for agile beam steering
[AD-A273996] p 3034 N94-25902
Microtubules for nonlinear optical limiting
[AD-A273940] p 3035 N94-25941
Comparison of technology for high-power laser mirrors and synchrotron radiation mirrors
[DE94-002913] p 3035 N94-26276
Regrowth zones in laser annealed radiation damaged diamond
[DE94-600821] p 3056 N94-26364
Fiber-optic-based laser vapor screen flow visualization system for aerodynamic research in larger scale subsonic and transonic wind tunnels
[NASA-TM-4514] p 2647 N94-26706
Beam-quality measurements for materials processing lasers and the proposed ISO standard
[DE94-002738] p 2819 N94-26811
Research and development within nonlinear optics for protection of optical sensors against laser irradiation on of optical sensors against laser irradiation. Quarterannual report 1 (april 1993))
[PB94-124245] p 3037 N94-27046
Kinoform/lens system for injecting a high power laser beam into an optical fiber
[DE94-003226] p 2819 N94-27262
Predoctoral training grant in the area of physical sciences
[DE94-004406] p 3039 N94-27603
Technical report of ISSP. Ser. A, no. 2686: High-order harmonic generation and ionization using ultrashort KrF and Ti:Sapphire lasers
[JTN-94-80572] p 2820 N94-27605
LASER CAVITIES
Characterization of nonlinear effects in optically pumped vertical cavity surface emitting lasers
[AD-A273840] p 2815 N94-25744
Ultra-high aggregate bandwidth two-dimensional multiple-wavelength diode laser arrays
[AD-A274018] p 2815 N94-25756
Practical design of resonant cavity for a RF free electron laser
[AD-A274306] p 2819 N94-26941
High repetition rate, mode locked, figure eight laser with extracavity feedback
[AD-D016053] p 2820 N94-27670
LASER DAMAGE
Microtubules for nonlinear optical limiting
[AD-A273940] p 3035 N94-25941
Regrowth zones in laser annealed radiation damaged diamond
[DE94-600821] p 3056 N94-26364
LASER DOPPLER VELOCIMETERS
Laser Doppler velocimetry in a low speed multistage compressor
[AD-A274836] p 2818 N94-26498
Propagation of experimental uncertainties from the tunnel to the body coordinate system in 3-D LDV flow field studies
[NASA-CR-191607] p 2680 N94-26603
Turbulent boundary layer inner-outer interactions
[AD-A274357] p 2794 N94-27059
The measurements of muscle blood flow by laser Doppler flowmetry with needle type probe
p 2908 N94-27530
Microspheres for laser velocimetry in high temperature wind tunnel p 2682 N94-27903
LASER GYROSCOPES
On the application of Allan variance method for Ring Laser Gyro performance characterization
[DE94-003880] p 2810 N94-26525
LASER HEATING
Float zone crystal growth using laser radiation
[DLR-FB-93-10] p 3066 N94-27590
Laser surface modification of intermetallic compounds
[DREA-CR-92-416] p 2820 N94-27668
A numerical approach to Stefan problem
[IPPCZ-334] p 2844 N94-27841
LASER INDUCED FLUORESCENCE
Spectroscopic and vibrational energy transfer studies in molecular bromine
[AD-A273795] p 3014 N94-25875
Hook spectroscopy as an atomic number density diagnostic applied to laser-ablated copper plasmas
[DE94-002645] p 3042 N94-26081
Laser probes of natural gas ignition chemistry
[PB94-128345] p 2717 N94-27226
Technical report of ISSP. Ser. A, no. 2682: Pressure dependence of Sm:YAG fluorescence to 50 GPa: A new calibration as a high pressure scale
[JTN-94-80568] p 3066 N94-27354
Scalar mixing in the subsonic jet in crossflow
p 2800 N94-28008
LASER INTERFEROMETRY
The determination of surface roughness from reflected step edges
[AD-A273987] p 2984 N94-25900
Zeeman laser interferometry for detection and chemical analysis
[DE94-003963] p 2719 N94-27728
LASER MATERIALS
Development of intermetallic compounds for high performance luminescence elements
p 2722 N94-25545
Physical characteristics of polymethylmethacrylate scintillator SOFG-120
[DE93-634184] p 2810 N94-26395
LASER MODE LOCKING
High repetition rate, mode locked, figure eight laser with extracavity feedback
[AD-D016053] p 2820 N94-27670
Fiber laser amplifiers and oscillators
[AD-A274231] p 2820 N94-28068
LASER OUTPUTS
Development of intermetallic compounds for high performance luminescence elements
p 2722 N94-25545
Hook spectroscopy as an atomic number density diagnostic applied to laser-ablated copper plasmas
[DE94-002645] p 3042 N94-26081
Regrowth zones in laser annealed radiation damaged diamond
[DE94-600821] p 3056 N94-26364
Development of lasers optimized for pumping Ti:Al2O3 lasers
[NASA-CR-4573] p 2818 N94-26705
Research and development within nonlinear optics for protection of optical sensors against laser irradiation on of optical sensors against laser irradiation. Quarterannual report 1 (april 1993))
[PB94-124245] p 3037 N94-27046
Laser phase induced intensity noise in fiber-optic signal processing and sensing systems
[ITN-94-85234] p 2819 N94-27179
Optical parametric oscillator modeling with diffraction, depletion, and double refraction
[DE94-001504] p 3040 N94-27999
Fiber laser amplifiers and oscillators
[AD-A274231] p 2820 N94-28068
LASER PLASMA INTERACTIONS
Proceedings of the 16th Symposium on Plasma Physics and Technology
[DE94-604181] p 3047 N94-27698
LASER PLASMAS
Imaging with x ray lasers
[DE94-002844] p 2816 N94-26020
LASER POWER BEAMING
A direct current rectification scheme for microwave space power conversion using traveling wave electron acceleration p 2687 N94-27371
LASER PUMPING
Compact, solid-state femtosecond source
[AD-A273932] p 2817 N94-26271
Diode-laser-pumped, gas-cell atomic clocks
[AD-A274812] p 3008 N94-26484
Development of lasers optimized for pumping Ti:Al2O3 lasers
[NASA-CR-4573] p 2818 N94-26705
LASER SPECTROSCOPY
Development of laser spectroscopic technology in nuclear industry
[DE93-633327] p 2714 N94-26158
Study on laser atomic spectroscopy
[DE93-633328] p 2817 N94-26402
Spectroscopy Division
[DE94-604074] p 2717 N94-26988
Molecular dynamics simulation and crystal-field theory: Predicting the optical spectra and structure of rare-earth doped inorganic glasses
[ISBN-0-315-84679-8] p 3025 N94-27310
Laser blow-off lithium beam probing with high temporal resolution for edge plasma diagnostics
[DE94-701176] p 2820 N94-27701
LASER STABILITY
Diode-laser-pumped, gas-cell atomic clocks
[AD-A274812] p 3008 N94-26484
High-speed, high-density, coherent time-domain optical memory
[AD-A274249] p 3037 N94-27010
LASER TARGETS
New Thomson scattering laser control for D3-D
[DE94-002890] p 3043 N94-26274
LASER WELDING
Distributed Nd:YAG laser welding and process control in inert glove boxes
[DE94-002629] p 2818 N94-26605
LASERS
Control system for tracking nonlinear systems
[AD-D016057] p 2787 N94-27673
LATE STARS
Coronal heating via nanoflares
[DE94-000773] p 3110 N94-26696
LATERAL CONTROL
Theoretical and experimental investigation of a delta wing with turbulent leading-edge jets
p 2659 N94-28029
Numerical assessment of aerodynamic interactions on missiles with transverse jets control
p 2659 N94-28031
LATITUDE
Differential global positioning system for the surface-towed ordnance locating system: Testing, results, and user's guide
[DE94-002980] p 2664 N94-26309
LATTICE PARAMETERS
Zinc(2) oxide stability in alkaline sodium phosphate solutions at elevated temperatures
[DE94-003316] p 2715 N94-26320

Polar and chemical domain structures of lead scandium tantalate (PST)
[DE94-600760] p 3056 N94-26363

LATTICE VIBRATIONS
Octahedral metallomesogens: Liquid crystallinity in low aspect ratio materials
[AD-A274830] p 3059 N94-26571

LAUNCH VEHICLES
MINOTAUR (Maryland's innovative orbital technologically advanced University rocket)
p 2703 N94-25685
A comparison of users' and providers' perceptions of critical spacelift vehicle characteristics and capabilities
[AD-A273907] p 2691 N94-26017
Proceedings of Damping 1993, volume 2
[AD-A274227] p 2840 N94-26953
Access to space study
[NASA-TM-109693] p 2685 N94-27151

LAUNCHING
Energy and technology review, July 1993
[DE94-004219] p 3118 N94-27566

LAW (JURISPRUDENCE)
Coastal Zone Management Act and related legislation, revision 3
[DE94-004180] p 2869 N94-27691
Recent legal movement on water quality regulation in Japan p 2869 N94-28148

LAY-UP
The experimental behavior of spinning pretwisted laminated composite plates
[NASA-CR-195220] p 2711 N94-27352

LEAD (METAL)
Determination of lead isotope ratios in seawater by purge and trap GC/MS after ethylation p 2870 N94-28152

LEAD ACID BATTERIES
Bipolar lead-acid batteries for electrical actuation applications p 2864 N94-28134

LEAD ALLOYS
Study on solidification of non-homogeneous melting/solidification materials p 2728 N94-25573

LEAD COMPOUNDS
NNN-Ising model simulation of nanodomain textures in relaxor-type lead scandium tantalate
[DE94-601884] p 2748 N94-25844
Crystallization and microstructural control of ferroelectric thin-films and glass-ceramics
[AD-A273767] p 2748 N94-25854
Polar and chemical domain structures of lead scandium tantalate (PST)
[DE94-600760] p 3056 N94-26363
The optical properties of high-T(c) superconductors grown by pulsed laser deposition
[ISBN-0-315-84917-7] p 3039 N94-27962
Anisotropy in the electrical, magnetic and optical properties of Pb2Sr2RCu3O8
[ISBN-0-315-84930-4] p 3070 N94-27974
Determination of lead isotope ratios in seawater by purge and trap GC/MS after ethylation p 2870 N94-28152

LEAD ISOTOPES
Determination of lead isotope ratios in seawater by purge and trap GC/MS after ethylation p 2870 N94-28152

LEAD ZIRCONATE TITANATES
Crystallization and microstructural control of ferroelectric thin-films and glass-ceramics
[AD-A273767] p 2748 N94-25854
Oriented lead zirconate titanate thin films: Characterization of film crystallization
[DE94-003104] p 3053 N94-26025
Piezoelectric measurements on impact loaded PZT ceramics
[NPL-DMM(A)-88] p 2752 N94-26652
Ferroelectric thin film microstructure development and related property enhancement
[DE94-002741] p 3061 N94-26856

LEADING EDGE SWEEP
Wing lift increment at zero angle of attack due to deployment of single-slotted flaps at low speeds
[ESDU-93019] p 2649 N94-28140

LEADING EDGES
Leading-edge vortex-system details obtained on F-106B aircraft using a rotating vapor screen and surface techniques
[NASA-TP-3374-VIDEO-SUPPL] p 2647 N94-27161
Composite leading edge/spar member for an aircraft control surface
[CA-PATENT-1-325-765] p 2669 N94-27273
Control of leading-edge separation on an airfoil by localized excitation
[DLR-FB-93-16] p 2647 N94-27592
A study on heat transfer in a scramjet leading edge model
[NAL-TR-1187T] p 2675 N94-27608
Prediction of leading-edge transition and relaminarization phenomena on a subsonic multi-element high-lift system p 2659 N94-27929
Effects, limits, and limitations of spanwise blowing
p 2659 N94-28027
Theoretical and experimental investigation of a delta wing with turbulent leading-edge jets
p 2659 N94-28029
First experimental assessment of RCS plume-flow field interaction on Hermes leading edge thruster configuration p 2703 N94-28032
Program for calculation of maximum lift coefficient of plain aerofoils and wings at subsonic speeds
[ESDU-93015] p 2649 N94-28076

LEAKAGE
Influence of impeller shroud forces on turbopump rotor dynamics p 2796 N94-27378
Compressibility effects on rotor forces in the leakage path between a shrouded pump impeller and its housing
p 2796 N94-27379
Development of hypersonic engine seals: Flow effects of preload and engine pressures
[NASA-TM-106333] p 2826 N94-27599

LEAST SQUARES METHOD
Repeated knots in least squares multiquadric functions
[AD-A273866] p 2990 N94-25594
Piecewise least squares fitting technique using finite interval method with Hermite polynomials
[VTT-PUBS-135] p 2990 N94-25733
Geoid determination: With help of the alternative scattering method
[ETN-94-95375] p 2847 N94-25746
Numerical treatment of experimental data in calibration procedures
[DE93-634289] p 3097 N94-26382
Window least squares method applied to statistical noise smoothing of positron annihilation data
[DE93-634665] p 3003 N94-26385
On the reliability of a window least squares algorithm
[DE93-634666] p 2962 N94-26386
MIMO recursive least squares control algorithm for the AN/FPN-44A Loran-C transmitter
[AD-A274820] p 2664 N94-26493
Iterative methods for the WLS state estimation on RISC, vector, and parallel computers
[DE94-004260] p 3000 N94-27569

LEBESGUE THEOREM
Topological conditions for the existence of invariant measures for unimodal maps
[PB94-123296] p 2849 N94-26866

LECTURES
The proceedings of the KEK FEL Simulation Code Workshop
[DE93-520378] p 2816 N94-26112
Cosmological phase transitions
[DE94-003001] p 3104 N94-26786
CMSC-130 introductory computer science, lecture notes
[AD-A274369] p 2967 N94-27060
How to make good use of international research collaboration, with emphasis on the evolving situation in Europe
[PB94-119690] p 3101 N94-27323

LEG (ANATOMY)
Sympathetic nerve activity during dynamic leg exercise
p 2929 N94-27527

LEGENDRE FUNCTIONS
On kinetic expansion in scalar field theory
[DE93-634338] p 3072 N94-26553

LENNARD-JONES POTENTIAL
Study on computerized experiment of amorphous transformation process by solid phase reaction
p 2726 N94-25564
Fast parallel algorithms for short-range molecular dynamics
[DE93-018519] p 3016 N94-26033
How reliable is the HMSA integral equation for the pair structure of supercooled and amorphous mixtures?
[DE94-601543] p 3006 N94-26411
Calculating the surface properties for the liquid-vapour interface: Illustrating the thermodynamic stability of the spherical microstructures
[DE94-601992] p 3073 N94-26837
The molecular matching problem
p 3030 N94-27910

LENSES
Kinoform/lens system for injecting a high power laser beam into an optical fiber
[DE94-003226] p 2819 N94-27262
Reflectometer employing an integrating sphere and lens-mirror concentrator
[AD-D016061] p 3039 N94-27676

LEPTONS
A possible way of connecting the Grassmann variables and the number of generation
[DE94-601624] p 2990 N94-25838
A research program in experimental and theoretical high energy physics
[DE94-002156] p 3031 N94-25931
Lepton masses in an SU(3)(sub L) x U(1)(sub N) gauge model
[DE93-634366] p 3016 N94-26040
Heavy charged leptons in an SU(3)(sub L) x U(1)(sub N) model
[DE93-634367] p 3016 N94-26041
Rescattering and energy loss of fast partons in nuclear matter
[DE94-002918] p 3018 N94-26145
A search for the production of direct leptons in nucleon-nucleus and nucleus-nucleus collisions
[DE94-004640] p 3018 N94-26244
Measurement of tau lepton branching fractions
[DE94-003423] p 3018 N94-26325
Why is the Higgs doublet light?
[DE94-601711] p 3018 N94-26333
Chance to use W-decay lepton channels for width determination
[DE93-634438] p 3020 N94-26507
Leptonic decay constants of heavy mesons in QCD
[DE93-634426] p 3022 N94-26767
Future directions in particle and nuclear physics at multi-GeV hadron beam facilities
[DE94-002946] p 3027 N94-27711
Search for the top quark in the single lepton + jets channel at D0
[DE94-004660] p 3028 N94-27749

LESIONS
The central executive component of working memory
[AD-A274295] p 2938 N94-26683

LETHALITY
Space radiation health research, 1991-1992
[NASA-TM-109721] p 2932 N94-27556
Supernovae and mass extinctions
p 2891 N94-28314

LEVELING
Alignment of the Amsterdam Pulse Stretcher (AmPS)
[MTG-93-02] p 2809 N94-25637

LEVITATION
Basic research on levitation fusing/solidification technology p 2723 N94-25552

LEVITATION MELTING
Basic research on levitation fusing/solidification technology p 2723 N94-25552

LIAPUNOV FUNCTIONS
Stability of large scale interconnected dynamical systems
[DE94-601536] p 2993 N94-26408
On the phi(sub 0)-stability of perturbed nonlinear differential systems
[DE93-634304] p 2993 N94-26441
Cone-valued Lyapunov functions and the stability of stochastic differential equations
[DE94-601504] p 2994 N94-26458
On the (Phi)(sub 0)-stability of functional differential equations
[DE94-601507] p 3006 N94-26460
Lyapunov exponents for some quasi-periodic cocycles
[PB94-124377] p 2997 N94-26994
Impulsive control and stabilization
[ISBN-0-315-84563-5] p 2988 N94-27271

LIBRARIES
Full-text information services at the desktop
[DE94-003728] p 3096 N94-25813
Index to BROND-2, CENDL-2, ENDF/B-6, JEF-2, JENDL-3
[DE93-634500] p 3016 N94-26034

LIE GROUPS
The massless representations of the conformal quantum algebra
[DE94-601555] p 3006 N94-26413
Affine algebras on the torus
[DE94-601556] p 3006 N94-26414
Higher spin extensions of the Virasoro algebra, area-preserving algebras and the matrix algebra a-bar(sub (infinity))
[DE94-601557] p 3006 N94-26415
Finite dimensional representations of the quantum superalgebra U(sub q)(gl(3/2))
[DE93-634303] p 2993 N94-26440
Quantum Hamiltonian differential geometry: How does quantization affect space?
[DE93-634306] p 2993 N94-26442
The extensions of space-time. Physics in the 8-dimensional homogeneous space D is equal to SU(2,2)/K
[DE93-634336] p 3072 N94-26551
String hypothesis and characters of coset CFTs
[DE93-634337] p 3007 N94-26552
Deformation of the exterior algebra and the GL(sub q) (r, included in) algebra
[DE94-602558] p 2996 N94-26898

Poisson-lie group of pseudodifferential symbols [PB94-124393] p 2997 N94-26996

Q - difference intertwining operators for a Lorentz quantum algebra [DE94-602559] p 2997 N94-27023

The gl(n/m) and related q-identitiesematics and computer science ends in nuclear and related q-identities [DE94-603653] p 3001 N94-27839

LIFE (DURABILITY)

Study on high temperature damage control and life improvement p 2729 N94-25580

Composite raw materials for the building industry [VTT-TIED-1433] p 2708 N94-26544

MSOFC development status [DE94-003192] p 2858 N94-26792

Space Station Freedom NiH2 cell testing program p 2861 N94-28108

LIFE CYCLE COSTS

MSOFC development status [DE94-003192] p 2858 N94-26792

Interdisciplinary technology p 2686 N94-27363

Automation life-cycle cost model [NASA-CR-195695] p 3095 N94-27866

LIFE SCIENCES

Asteroid exploration and utilization p 3080 N94-25697

The 27th Annual Meeting of the Israel Society for Microscopy and the 12th Annual Meeting of the Israel Society for Histochemistry and Cytochemistry [DE93-632416] p 2716 N94-26519

Spacelab life sciences 2 post mission report [NASA-CR-195544] p 2942 N94-27410

Aerospace medicine and biology: A continuing bibliography with indexes (supplement 386) [NASA-SP-7011(386)] p 2933 N94-28208

Aerospace medicine and biology: A continuing bibliography with indexes (supplement 387) [NASA-SP-7011(387)] p 2933 N94-28213

A general theory of impacts and mass extinctions, and the consequences of large-body impact on the Earth p 2891 N94-28310

LIFE SUPPORT SYSTEMS

Bioregenerative system components for microgravity p 2903 N94-25673

Enabler operator station p 2943 N94-25679

Automation of closed environments in space for human comfort and safety p 2943 N94-25684

Design and development of the second generation Mars Habitat p 2943 N94-25693

Pressurized Lunar Rover (PLR) p 2833 N94-25704

Designing for human presence in space: An introduction to environmental control and life support systems [NASA-RP-1324] p 2942 N94-27437

Aerospace medicine and biology: A continuing bibliography with indexes (supplement 386) [NASA-SP-7011(386)] p 2933 N94-28208

Aerospace medicine and biology: A continuing bibliography with indexes (supplement 387) [NASA-SP-7011(387)] p 2933 N94-28213

LIFT

An investigation into the aerodynamic effects of wing patches [ISBN-0-315-84121-4] p 2646 N94-26672

High-lift system analysis method using unstructured meshes [NLR-TP-92351-U] p 2647 N94-27554

Numerical simulation of a powered-lift landing p 2671 N94-28033

Program for calculation of maximum lift coefficient of plain aerofoils and wings at subsonic speeds [ESDU-93015] p 2649 N94-28076

Preliminary assessment of aerodynamic effects of wing repair patches p 2657 N94-28346

LIFT DEVICES

Eagle RTS: A design of a regional transport p 2671 N94-25709

LIFTING BODIES

Experimental and theoretical study of aerodynamic characteristics of some lifting bodies at angles of attack from -10 degrees to 53 degrees at Mach numbers from 2.30 to 4.62 [NASA-TM-4528] p 2646 N94-26693

Prediction of leading-edge transition and relaminarization phenomena on a subsonic multi-element high-lift system p 2659 N94-27929

LIGANDS

Transition metal activation and functionalization of carbon-hydrogen bonds [DE94-003650] p 2715 N94-26369

Radiochemistry Division annual progress report : 1991 [DE94-600652] p 2715 N94-26392

Property enchancement of polyimide films by way of the incorporation of lanthanide metal ions p 2758 N94-27926

LIGHT AIRCRAFT

Solar powered multipurpose remotely powered aircraft p 2671 N94-25719

EGADS: A microcomputer program for estimating the aerodynamic performance of general aviation aircraft [NASA-TM-104013] p 2667 N94-26091

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 4: Laser velocimeter wake data, advance ratio of 0.037 [NASA-TM-109040-VOL-4] p 2645 N94-26483

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 1: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0081 and hover tip speed of 603 feet/second [NASA-TM-109040-VOL-1] p 2645 N94-26489

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 2: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 710 feet/second [NASA-TM-109040-VOL-2] p 2645 N94-26492

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 3: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 603 feet/second [NASA-TM-109040-VOL-3] p 2645 N94-26497

LIGHT AMPLIFIERS

Theory and modeling of stimulated Raman scattering [AD-A273755] p 3033 N94-25721

All-optical gain switching of erbium-doped fibre amplifiers [ISBN-0-315-84120-6] p 2784 N94-26704

Fiber laser amplifiers and oscillators [AD-A274231] p 2820 N94-28068

LIGHT BEAMS

Three-wave nonlinear interactions in KTiOPO4 (KTP) and KTP isomorphs [AD-A274079] p 3052 N94-25993

Spectral and temporal correlations of multifrequency waves in the turbulent atmosphere [ITN-94-85229] p 2774 N94-27233

LIGHT ELEMENTS

Zr-rich corner of the Zr-Sn-O diagram [DE93-633764] p 2734 N94-26161

LIGHT EMISSION

Stationary plasma thruster plume emissions [NASA-CR-194471] p 2701 N94-26209

Researches of the Electrotechnical Laboratory. No. 53: Spectral emission from combustion gas containing scattering media [JTN-94-80603] p 2717 N94-27246

Observation of stimulated emission from an MBE grown GaN film on sapphire [DE94-003638] p 3068 N94-27724

Energy parameters of the incident auroral electrons derived by the intensity ratio of auroral emissions p 2779 N94-27964

LIGHT EMITTING DIODES

Analytical study of beam handling and emittance control [AD-A274412] p 3033 N94-27078

Visible light emitting materials and injection devices [AD-A274418] p 2786 N94-27079

LIGHT GAS GUNS

High-speed repetitive pellet injector for plasma fueling of magnetic confinement fusion devices [DE94-002792] p 3042 N94-26140

Energy and technology review, July 1993 [DE94-004219] p 3118 N94-27566

LIGHT MODULATION

Characterization of an LCD for use as a programmable phase shifter to produce a single-lobed far-field pattern in a phased array [AD-A273883] p 3034 N94-25729

Optoelectronic Technology Consortium [AD-A274909] p 2782 N94-26344

Micro-electron deflector [AD-D016055] p 2787 N94-27672

LIGHT SCATTERING

Theory and modeling of stimulated Raman scattering [AD-A273755] p 3033 N94-25721

A numerical solution to the one and two dimensional line radiative transfer equation [ISBN-0-315-84258-X] p 2994 N94-26640

Researches of the Electrotechnical Laboratory. No. 53: Spectral emission from combustion gas containing scattering media [JTN-94-80603] p 2717 N94-27246

Analytic approximation to randomly oriented spheroid extinction [DREV-4712-93] p 3038 N94-27598

Report of the National Research Institute for Earth Science and Disaster Prevention, No: 51 [JTN-94-80509] p 2886 N94-27985

Detection of water on road surface by the polarized light p 2886 N94-27989

LIGHT SOURCES

Object-oriented software construction at ALS [DE94-003418] p 2967 N94-27049

Laser phase induced intensity noise in fiber-optic signal processing and sensing systems [ITN-94-85234] p 2819 N94-27179

Opportunities for High Aspect Ratio Micro-Electro-Magnetic-Mechanical Systems (HAR-MEMMS) at Lawrence Berkeley Laboratory [DE94-003499] p 2827 N94-27722

MODIS airborne simulator visible and near-infrared calibration, 1992 ASTEX field experiment. Calibration version: ASTEX King 1.0 [NASA-TM-104599] p 2897 N94-28179

LIGHT TRANSMISSION

Analytic approximation to randomly oriented spheroid extinction [DREV-4712-93] p 3038 N94-27598

LIGHT WATER REACTORS

Fundamental study on monitoring technology on local surface damages p 2724 N94-25555

LIGHTNING

Catalog of absolutely calibrated, range normalized, wideband, electric field waveforms from triggered lightning flashes in Florida [AD-A273793] p 2892 N94-25873

FNAS lightning detection [NASA-CR-193927] p 2893 N94-26134

Thunderstorm Hypothesis Reasoner [NASA-CR-195714] p 2897 N94-27884

MUSIC for localization of thunderstorm cells [DE94-004985] p 2897 N94-28146

LIMESTONE

Effects of slot on rock surface for percussive rock excavation: Water jet assisted percussive rock excavation p 2871 N94-28155

LIMITS (MATHEMATICS)

Limit theorems for functionals of Markov processes and renormalizable stable fields [AD-A274645] p 3004 N94-27106

LINE CURRENT

Image theory for DC problems involving a conducting half space bounded by the general anisotropic impedance surface [PB94-132917] p 2779 N94-28390

LINE OF SIGHT COMMUNICATION

Laser-based communication link [FFI-93/7023] p 2817 N94-26203

LINE SHAPE

Laser phase induced intensity noise in fiber-optic signal processing and sensing systems [ITN-94-85234] p 2819 N94-27179

LINEAR ACCELERATORS

JLC-1 [DE93-520380] p 3031 N94-26113

Proceedings of the Second EGS4 User's Meeting in Japan [DE93-520383] p 3032 N94-26543

Fluid dynamic linear accelerometer [AD-D016042] p 2678 N94-27112

LINEAR AMPLIFIERS

Ultralinear wideband integrated circuit design [ISBN-0-315-84130-3] p 2784 N94-26675

LINEAR ARRAYS

Analyzing adaptive beamformer performance in a stable multipath environment [AD-A274029] p 2766 N94-25766

LINEAR EQUATIONS

Nested Krylov methods based on GCR [PB94-125317] p 2995 N94-26818

Ma42: A new frontal code for solving sparse unsymmetric systems [PB94-124302] p 2998 N94-27115

Review and analysis of dense linear system solver package for distributed memory machines p 2978 N94-27916

LINEAR FILTERS

Equalization and cancellation of nonlinear intersymbol interference in a dispersive satellite communication channel [ISBN-0-315-85147-3] p 2775 N94-27274

LINEAR INTEGRATED CIRCUITS

Ultralinear wideband integrated circuit design [ISBN-0-315-84130-3] p 2784 N94-26675

LINEAR OPERATORS

Classification of linear differential operators with an invariant subspace in monomials [PB94-126620] p 2996 N94-26915

Hessenberg matrices in Krylov subspaces and the computation of the spectrum [PB94-133170] p 3001 N94-28389

LINEAR POLARIZATION

Fiber optic Faraday flux transformer specification [AD-D016058] p 3039 N94-27674

LINEAR PROGRAMMING
A note on central cutting plane methods for convex programming
[REPT-93-44] p 2958 N94-25762
Research on primal-dual interior point algorithms for mathematical programming
[DE94-003982] p 2959 N94-25821
A linear description of the discrete lot-sizing and scheduling problem
[MEMO-COSOR-92-47] p 2992 N94-26227
Polyhedral characterization of the economic lot-sizing problem with start-up costs
[MEMO-COSOR-92-46] p 2969 N94-27396
LINEAR QUADRATIC GAUSSIAN CONTROL
Necessary and sufficient conditions for the existence of the stabilizing solution of the Riccati equation in a Hilbert space: A Popov function approach
[PB94-125341] p 2997 N94-26999
Multiple model adaptive control of a large flexible space structure with purposeful dither for enhanced identifiability
[AD-A274132] p 2987 N94-27122
Dynamics and robust control for uncertain flexible space systems
[INPE-5510-TAE/020] p 2696 N94-27357
LINEAR QUADRATIC REGULATOR
Solving the linear quadratic optimal control problem for infinite-dimensional systems
[ISBN-0-315-84562-7] p 2999 N94-27405
LINEAR SYSTEMS
Enumeration of n-fold tangent hyperplanes to a surface
[DE94-601544] p 2993 N94-26412
Review and analysis of dense linear system solver package for distributed memory machines
p 2978 N94-27916
Parameter estimation of linear systems from frequency response measurements (computer program)
[ESDU-93016] p 2976 N94-28137
LINEAR TRANSFORMATIONS
Satellite attitude determination using linear combination of models
[AD-A274082] p 2694 N94-25996
LINKAGES
Motion planning for serial manipulators with many degrees of freedom: Implementation of a sequential search strategy
[ISBN-0-315-83682-2] p 2822 N94-26642
Implementation of integral manifold control on a two degree of freedom flexible joint manipulator: Theory and experiments
[ISBN-0-315-83572-9] p 2823 N94-26658
Simulation dynamics of a multibody chain: Recursion based on chain modal coordinates
[ISBN-0-315-83555-9] p 2994 N94-26659
LIOUVILLE EQUATIONS
Stochastic solution to quantum dynamics
[NASA-TP-3408] p 3114 N94-26550
LIQUEFACTION
Report of National Institute for Resources and Environment. No. 5: Study on direct liquefaction of woody biomass
[JTN-94-80551] p 2859 N94-27204
Oil production from buckwheat stillage by thermochemical liquefaction p 2871 N94-28154
LIQUEFIED GASES
Physical characteristics of polymethylmethacrylate scintillator SOFG-120
[DE93-634184] p 2810 N94-26395
LIQUID AIR
An experimental study of plunging liquid jet induced air carryunder and dispersion
[AD-A274414] p 2794 N94-26979
LIQUID CHROMATOGRAPHY
Analytical method for estimation of the total amount of aromatic and poly aromatic compounds in diesel fuel
[PB94-123692] p 2759 N94-25907
LIQUID CRYSTALS
Characterization of an LCD for use as a programmable phase shifter to produce a single-lobed far-field pattern in a phased array
[AD-A273883] p 3034 N94-25729
Microtubules for nonlinear optical limiting
[AD-A273940] p 3035 N94-25941
Color head down display program
[AD-A274807] p 2672 N94-26340
Octahedral metallomesogens: Liquid crystallinity in low aspect ratio materials
[AD-A274830] p 3059 N94-26571
Ferroelectricity in a Langmuir-Blodgett multilayer film of a liquid crystalline side-chain polymer
[AD-A274477] p 2754 N94-27033
Liquid crystalline side-chain polysiloxanes with 4-amino-4'-stilbene-carboxylic ester mesogens
[AD-A274510] p 2754 N94-27036
Research and development within nonlinear optics for protection of optical sensors against laser irradiation on of optical sensors against laser irradiation. Quarterannual report 1 (april 1993))
[PB94-124245] p 3037 N94-27046
Ultrastructure processing of macromolecular materials
[AD-A274460] p 2754 N94-27086
LIQUID FLOW
Ejectors and jet pumps: Computer program for design and performance for liquid flow
[ESDU-93022] p 2832 N94-28093
LIQUID FUELS
An apparatus for measurement of ignition and burning characteristics of metallic particles
[AD-A274815] p 2716 N94-26487
Liquid monopropellants
[AD-D016074] p 2760 N94-28226
LIQUID HELIUM
Growth of small fatigue cracks in Incoloy-908
[DE94-003406] p 2836 N94-26129
LIQUID HELIUM 2
A numerical study of quantized vortices in HeII
[ISBN-9-03-860232-4] p 2792 N94-26479
Superfluid helium sloshing dynamics induced oscillations and fluctuations of angular momentum, force and moment actuated on spacecraft driven by gravity gradient or jitter acceleration associated with slew motion
[NASA-CR-193928] p 2799 N94-27931
LIQUID HYDROGEN
Project WISH: The Emerald City p 2703 N94-25690
Orbital transfer vehicle engine technology high velocity ratio diffusing crossover
[NASA-CR-194447] p 2703 N94-27212
Inertial electrostatic confinement as a power source for electric propulsion p 2688 N94-27373
LIQUID LEVELS
Method of measuring liquid level
[AD-D016049] p 3038 N94-27153
LIQUID METAL FAST BREEDER REACTORS
Nonswelling behavior of HT9 alloy irradiated to high exposure
[DE94-003502] p 2736 N94-26522
LIQUID METALS
Liquid metal MHD research and development in Israel
p 2854 N94-26055
Modelling the mass migration phenomena in partially frozen heat pipes
[DE94-002716] p 2797 N94-27709
LIQUID NITROGEN
The cryogenic tunnel Cologne at DLR
[DLR-MITT-93-10] p 2681 N94-27587
LIQUID PHASES
Development of liquid membrane separation processes p 2717 N94-27386
Energy Dispersive X ray Diffraction (EDXD) apparatus for liquids at high temperature p 2721 N94-28159
LIQUID PROPELLANT ROCKET ENGINES
Integrated model development for liquid fueled rocket propulsion systems
[NASA-CR-195253] p 2702 N94-27166
LIQUID ROCKET PROPELLANTS
Hydrogen-oxygen torch ignitor
[NASA-TM-106493] p 2691 N94-27424
Liquid monopropellants
[AD-D016074] p 2760 N94-28226
LIQUID SLOSHING
Report of three microgravity experiments by the drop shaft
[JTN-94-80579] p 2761 N94-27341
Superfluid helium sloshing dynamics induced oscillations and fluctuations of angular momentum, force and moment actuated on spacecraft driven by gravity gradient or jitter acceleration associated with slew motion
[NASA-CR-193928] p 2799 N94-27931
LIQUID SURFACES
Method of measuring liquid level
[AD-D016049] p 3038 N94-27153
LIQUID-GAS MIXTURES
Interface configuration experiment: Preliminary results
[NASA-TM-109684] p 2760 N94-25849
Report of three microgravity experiments by the drop shaft
[JTN-94-80579] p 2761 N94-27341
LIQUID-LIQUID INTERFACES
Mapping of seawater intrusion into the coastal aquifer of Israel (the seawater-freshwater interface) by TDEM (Time Domain Electromagnetic) method
[ITN-94-85238] p 2850 N94-27331
LIQUID-SOLID INTERFACES
Bulletin of National Research Institute for Metals in Fiscal Year 1993, no. 14
[REPT-14] p 2722 N94-25544
Observation on metal surface in aqueous solution using an electrochemical Scanning Tunneling Microscope (STM) p 2724 N94-25554
Study on interfacial reaction analysis at interfacial joining p 2728 N94-25574
Morphology transitions during non-equilibrium growth processes
[ITN-94-85236] p 3065 N94-27243
On line quantification of crystal surfaces by stereo imaging
[NASA-CR-195277] p 3066 N94-27561
LIQUID-VAPOR EQUILIBRIUM
Thermocapillary flow with evaporation and condensation and its effect on liquid retention in low-G fluid acquisition devices
[NASA-TP-3463] p 2797 N94-27639
LIQUID-VAPOR INTERFACES
Interface configuration experiment: Preliminary results
[NASA-TM-109684] p 2760 N94-25849
Calculating the surface properties for the liquid-vapour interface: Illustrating the thermodynamic stability of the spherical microstructures
[DE94-601992] p 3073 N94-26837
Report of three microgravity experiments by the drop shaft
[JTN-94-80579] p 2761 N94-27341
Thermocapillary flow with evaporation and condensation and its effect on liquid retention in low-G fluid acquisition devices
[NASA-TP-3463] p 2797 N94-27639
LIQUIDS
Bulletin of the Institute for Chemical Reaction Science, Tohoku University, volume 2
[JTN-94-80602] p 2717 N94-27385
Development of liquid membrane separation processes p 2717 N94-27386
Orthobaric densities and molar volumes of liquids: Aliphatic and cyclic ketones
[ESDU-93010] p 2720 N94-28060
Viscosity of liquids: Halogenated ethanes
[ESDU-93012] p 2720 N94-28062
Orthobaric densities and molar volumes of liquids: Fused ring compounds
[ESDU-93029] p 2721 N94-28097
Vapour pressures and critical points of liquids: Fused ring compounds
[ESDU-93028] p 2721 N94-28142
LIQUIDUS
Liquid and solid solubility of Ag in Bi2Sr2CaCu2O8
[DE94-002829] p 2735 N94-26273
LITHIUM
Lithium drifted silicon detector fabrication on gettered floating-zone silicon
[DE94-003890] p 3054 N94-26095
In situ spectroscopic applications to the study of rechargeable lithium batteries
[DE94-003478] p 2782 N94-26328
The reactivity of lithium toward non-aqueous solvents of relevance to energy storage applications as studied by surface analytical techniques
[DE94-003483] p 2856 N94-26464
High rate lithium/thionyl chloride bipolar battery development p 2864 N94-28133
LITHIUM ALLOYS
Issues for conversion coating of aluminum alloys with hydrotalcite
[DE94-003804] p 2732 N94-25819
An anodic dissolution-based mechanism for the rapid cracking, pre-exposure phenomenon demonstrated by Al-Li-Cu alloys
[DE94-004798] p 2742 N94-27788
NASA-UVA light aerospace alloy and structures technology program (LA2ST)
[NASA-CR-195275] p 2844 N94-27851
LITHIUM CHLORIDES
A Shuttle mechanism for molten-electrolyte lithium batteries
[DE94-002914] p 2781 N94-26144
LITHIUM COMPOUNDS
Issues for conversion coating of aluminum alloys with hydrotalcite
[DE94-003804] p 2732 N94-25819
LITHIUM NIOBATES
High temperature sensor/microphone development for active noise control
[NASA-CR-195214] p 2812 N94-27214
Electro-optic materials by solid source MOCVD
[DE94-005120] p 2757 N94-27716
LITHIUM OXIDES
Reference electrodes for solid polymer electrolytes
[DE94-004583] p 2780 N94-25806
LITHIUM SULFUR BATTERIES
In situ spectroscopic applications to the study of rechargeable lithium batteries
[DE94-003478] p 2782 N94-26328
LITHOGRAPHY
Study on elucidation of damage generation process by electron beam lithography p 2729 N94-25581

Opportunities for High Aspect Ratio Micro-Electro-Magnetic-Mechanical Systems (HAR-MEMMS) at Lawrence Berkeley Laboratory
[DE94-003499] p 2827 N94-27722

LIVER
Modulation by galactosamine-induced hepatitis of biological responses of the rat exposed to high altitude hypoxia p 2904 N94-27464
Cloning of rat RXR alpha cDNA and the expression of its mRNA in regenerating liver and primary cultured hepatocytes p 2905 N94-27479

LOAD TESTING MACHINES
High temperature tension test equipment of heat resistant composite materials
[NAL-TM-652] p 2710 N94-27255
SP/MSP tests for the evaluation of FGM
[NAL-SP-17] p 2710 N94-27279
SP/MSP tests for the evaluation of FGM
p 2710 N94-27280
Research on the development of fracture characteristics evaluation system for ceramics and metal composite materials p 2710 N94-27281

LOAD TESTS
Fatigue resistance under tension-compression of laminates IM6/5245C and AS4/3501-6
[IAR-CR-25] p 2708 N94-26711
Compatibility of refrigerants and lubricants with engineering plastics
[DE94-004959] p 2756 N94-27692
Creep rupture properties of a nickel-base heat-resistant alloy Hastelloy XR under varying temperature/stress condition
[DE94-701175] p 2743 N94-27807
A laboratory test on construction of ice domes and their load-carrying capacity p 2884 N94-27966
The estimation of pre-stress by deformation rate analysis and suggestion of a mechanism from the elast-plastical theory p 2871 N94-28156

LOADS (FORCES)
Effect of loading mode on the fracture toughness of a reduced activation ferritic/martensitic stainless steel
[DE94-004290] p 2732 N94-25987
The identification of inflow fluid dynamics parameters that can be used to scale fatigue loading spectra of wind turbine structural components
[DE94-000231] p 2791 N94-26117
Modification of a model for fatigue life predictions based on level-crossing
[PB94-123395] p 2842 N94-27198
Influence of impeller shroud forces on turbopump rotor dynamics p 2796 N94-27378
Vibrations in engineering structures: A review of model and full-scale test of a cable-stayed bridge and a traffic sign gantry
[NLR-TP-92321-U] p 2843 N94-27553
Mechanically fastened composite laminates subjected to combined bearing-bypass and shear loading
p 2712 N94-27914

LOCAL AREA NETWORKS
Code division multiple access local area network communications employing fiber optic signal processing techniques
[AD-A274897] p 3096 N94-26180
Modeling and simulation of a fiber distributed data interface local area network
[AD-A274838] p 3098 N94-26500
A tri-state optical switch for local area network communications p 2789 N94-27922

LOCI
Mach reflection of spherical detonation waves
[DE93-016604] p 2797 N94-27705

LOGARITHMS
A logarithmic barrier cutting plane method for convex programming
[REPT-93-43] p 2957 N94-25761
Unifying investigation of interior-point methods for convex programming
[PB94-126463] p 2967 N94-27031
An efficient off-line electronic cash system based on the representation problem
[CWI-CS-R9323] p 2776 N94-27551

LOGIC CIRCUITS
Use of parallel counters for triggering
[DE93-616656] p 2979 N94-25918
Processing, fabrication, and demonstration of HTS integrated microwave circuits, appendix A
[AD-A274600] p 2785 N94-26890
Symbolic model checking for sequential circuit verification
[AD-A274375] p 2786 N94-27061
DALIA: A language for the description and analysis of digital systems p 2954 N94-27192

LOGIC DESIGN
Test methods and custom hardware for functional testing of a high speed GaAs DRAM
[AD-A274859] p 2781 N94-26175
Investigation into model-based fuzzy logic control
[AD-A274660] p 2985 N94-26336

LOGIC PROGRAMMING
Deductive computer programming
[AD-A274966] p 2962 N94-26303
Process algebra of concurrent constraint programming
[PB94-126695] p 2966 N94-26919
Freeness analysis for logic programs-and correctness
[PB94-126703] p 2966 N94-26956
A characterization of stable models using a non-monotonic operator
[CWI-CS-R9315] p 2970 N94-27543
Modular termination proofs for logic and pure PROLOG programs
[CWI-CS-R9316] p 2970 N94-27544
A strategy for dynamic interpretation: A fragment and an implementation
[CWI-CS-R9317] p 2970 N94-27545

LOGISTICS MANAGEMENT
Development of the Air Force contingency contracting course framework
[AD-A273921] p 3093 N94-25895

LONG DURATION SPACE FLIGHT
Project Minerva: A low-cost manned Mars mission based on indigenous propellant production
p 2760 N94-25705
Simulation modeling for long duration spacecraft control systems p 2684 N94-26288
Psychophysiology in microgravity and the role of exercise p 2936 N94-28374

LONG TERM EFFECTS
Preparation of creep data sheet: Material strength data sheet p 2723 N94-25548

LONGITUDE
Differential global positioning system for the surface-towed ordnance locating system: Testing, results, and user's guide
[DE94-002980] p 2664 N94-26309

LONGITUDINAL CONTROL
Techniques to improve maneuver stability characteristics of a nonlinear wide-body transport airplane in cruise flight
[NASA-TM-4521] p 2679 N94-27660

LONGITUDINAL STABILITY
Techniques to improve maneuver stability characteristics of a nonlinear wide-body transport airplane in cruise flight
[NASA-TM-4521] p 2679 N94-27660

LOOP ANTENNAS
Receiving antennas for electromagnetic pulses and transients
[ISBN-0-315-62312-8] p 2777 N94-27871

LORAN C
MIMO recursive least squares control algorithm for the AN/FPN-44A Loran-C transmitter
[AD-A274820] p 2664 N94-26493
Realtime mitigation of GPS SA errors using Loran-C
p 2642 N94-27291

LORENTZ TRANSFORMATIONS
Principles of gauge theory of real hadrons
[DE93-613096] p 3013 N94-25835
Duality for multiparametric quantum GL(n) and for a Lorentz quantum group
[DE93-613048] p 3005 N94-25868
On the relativistic invariant representation of arbitrary bilinear combinations of Dirac spinors
[DE93-634343] p 3019 N94-26456

LOSSLESS EQUIPMENT
Performance considerations for the application of the lossless browse and residual model
p 2946 N94-28256

LOUDNESS
Experimental studies of loudness and annoyance response to sonic booms p 2651 N94-28195

LOW ALTITUDE
Methods for improving low-angle, low-altitude radar tracking accuracy
[AD-A274914] p 2768 N94-26347

LOW ASPECT RATIO
Octahedral metallomesogens: Liquid crystallinity in low aspect ratio materials
[AD-A274830] p 3059 N94-26571
Program to develop a performance and heat load prediction system for multistage turbines
[NASA-CR-195223] p 2674 N94-26588

LOW ASPECT RATIO WINGS
Normal force of low aspect ratio cropped-delta wings at pre-stall angles of attack and subsonic speeds
[ESDU-93034] p 2648 N94-27955

LOW CARBON STEELS
The influence of TIG welding thermal cycles on HSLA-100 steel plate
[AD-A274248] p 2740 N94-27009

LOW COST
Low-cost photovoltaic inverters incorporating application-specific integrated circuits
[DE94-003270] p 2856 N94-26463
Low cost, radial flow, solid oxide fuel cell
[DE94-002982] p 2858 N94-26785

LOW FREQUENCIES
Hydroacoustic wave-fields generated by different source types, a computational study
[PB94-123536] p 3010 N94-27037
Simulating high-frequency wind for long durations
[DE94-002739] p 2682 N94-27997

LOW GRAVITY MANUFACTURING
Study on melted solution stirring under microgravity
p 2730 N94-25585
Report of three microgravity experiments by the drop shaft
[JTN-94-80579] p 2761 N94-27341
Prometheus in space: Research Committee on Functional New Material
[JTN-94-80580] p 2761 N94-28002

LOW NOISE
Delta f Algorithm
[DE94-003120] p 2963 N94-26521

LOW PASS FILTERS
Probabilistic methods for image generation and encoding
[AD-A274294] p 2964 N94-26682

LOW PRESSURE
Combustion synthesis method p 2721 N94-25561
Modulation by galactosamine-induced hepatitis of biological responses of the rat exposed to high altitude hypoxia p 2904 N94-27464

LOW REYNOLDS NUMBER
A numerical determination of bifurcation points for low Reynolds number conical flows
[AD-A273984] p 2791 N94-25991

LOW SPEED
The high Reynolds number flow through an axial-flow pump
[AD-A273844] p 2789 N94-25604
Laser Doppler velocimetry in a low speed multistage compressor
[AD-A274836] p 2818 N94-26498

LOW SPEED WIND TUNNELS
Installation of models in the 2 m x 3 m low speed wind tunnel
[LTR-LA-286] p 2681 N94-27594
Transient flow features of a supersonic jet in a low speed cross flow p 2800 N94-28005
Evaluation of the buoyancy drag on automobile models in low speed wind tunnels p 2658 N94-28352

LOW TEMPERATURE
On the electron mobility in slightly compensated heavily doped gallium arsenide at low temperatures
[DE93-634712] p 3057 N94-26387
Variable temperature cold stage for microscope observation p 2718 N94-27389
The addition of molecular oxygen to hydroperoxy-propyl radicals
[DE94-003662] p 2760 N94-27725

LOW VISIBILITY
Development and evaluation of a near infrared reflecting and low visibility paint scheme for RAAF P-3C Orion aircraft
[AD-A274881] p 2669 N94-26864

LOWER BODY NEGATIVE PRESSURE
Pulse waveform and transcranial Doppler analysis during lower body negative pressure
[AD-A274516] p 2911 N94-27088
Aerobic fitness and orthostatic tolerance: Evidence against an association p 2934 N94-28365

LUBRICANTS
Measurement of viscosity, density, and gas solubility of refrigerant blends in selected synthetic lubricants
[DE94-003609] p 2713 N94-25934
Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparison and verification of methods
[DE94-003664] p 2749 N94-26007
Using ferro-magnetic fluids to lubricate non-conformal isothermal contacts
[INPE-5520-TAE/021] p 2827 N94-27665
Compatibility of refrigerants and lubricants with engineering plastics
[DE94-004959] p 2756 N94-27692
Solubility, viscosity, and density of refrigerant/lubricant mixtures
[DE94-004237] p 2721 N94-28069
Calculation methods for steadily loaded central circumferential groove hydrodynamic journal bearings (guide to use of computer program A9304)
[ESDU-93004] p 2830 N94-28073

Calculation methods for steadily loaded axial groove hydrodynamic journal bearings (guide to use of computer program A9305)
[ESDU-93005] p 2830 N94-28074
Calculation methods for steadily loaded axial groove hydrodynamic journal bearings. Low viscosity process fluid lubrication (guide to use of computer program A9306)
[ESDU-93006] p 2830 N94-28075

LUBRICATION
Using ferro-magnetic fluids to lubricate non-conformal isothermal contacts
[INPE-5520-TAE/021] p 2827 N94-27665

LUMINANCE
Image quality and the display modulation transfer function: Experimental findings
[AD-A274061] p 2679 N94-25773

LUMINESCENCE
Development of intermetallic compounds for high performance luminescence elements
p 2722 N94-25545

LUMINOSITY
Secondary particle in background levels and effects on detectors at future hadron colliders
[DE94-003378] p 3011 N94-25598

LUNAR BASES
Project Columbiad: Reestablishment of human presence on the Moon p 2689 N94-25687
First lunar outpost p 2943 N94-25694
The 1991-1992 project summaries
p 2943 N94-25698
Lunar base habitat designs: Characterizing the environment, and selecting habitat designs for future trade-offs
[NASA-CR-195687] p 2943 N94-27934

LUNAR COMPOSITION
Experimental study of lunar and SNC (Mars) magmas
[NASA-CR-195274] p 3107 N94-27850

LUNAR CONSTRUCTION EQUIPMENT
Lunar preform manufacturing p 2765 N94-25677

LUNAR ENVIRONMENT
Design for producing fiberglass fabric in a lunar environment p 2765 N94-25676
Extraterrestrial surface propulsion systems
p 2833 N94-25691
First lunar outpost p 2943 N94-25694
Lunar base habitat designs: Characterizing the environment, and selecting habitat designs for future trade-offs
[NASA-CR-195687] p 2943 N94-27934

LUNAR EXPLORATION
The Extended Mission Rover (EMR)
p 2689 N94-25674
Project Columbiad: Reestablishment of human presence on the Moon p 2689 N94-25687
Recent developments in the Robotic All Terrain Lunar Exploration Rover (RATLER) program
[DE93-040342] p 2821 N94-26110
The Robotic All-Terrain Lunar Exploration Rover (RATLER): Increased mobility through simplicity
p 2685 N94-26291
Lunar Transportation Facilities and Operations Study, option 1
[NASA-CR-195700] p 3109 N94-27982

LUNAR GRAVITATION
First lunar outpost p 2943 N94-25694
Lifetimes of lunar satellite orbits
[NASA-TP-3394] p 2690 N94-27771

LUNAR LANDING
Lunar Transportation Facilities and Operations Study, option 1
[NASA-CR-195700] p 3109 N94-27982
Lunar Transportation Facilities and Operations Study, option 2
[NASA-CR-195701] p 3109 N94-27983

LUNAR LANDING MODULES
Low-cost unmanned lunar lander
p 2697 N94-25699

LUNAR LAUNCH
Lunar Transportation Facilities and Operations Study, option 1
[NASA-CR-195700] p 3109 N94-27982
Lunar Transportation Facilities and Operations Study, option 2
[NASA-CR-195701] p 3109 N94-27983

LUNAR MOBILE LABORATORIES
Pressurized Lunar Rover (PLR) p 2833 N94-25704

LUNAR ORBITS
The modal solution to the Moon's orbit using canonical Floquet perturbation theory
[AD-A273732] p 2690 N94-26001
Nasa Langley Research Center seventy-fifth anniversary publications, 1992
[NASA-TM-109691] p 3118 N94-27431
Lifetimes of lunar satellite orbits
[NASA-TP-3394] p 2690 N94-27771

LUNAR PROGRAMS
Artemis common lunar lander. Phase 2: Study results for external review
[NASA-TM-109699] p 2692 N94-28205

LUNAR ROCKS
A widely adaptable habitat construction system utilizing space resources p 2688 N94-27374

LUNAR ROVING VEHICLES
The Enabler: A concept for a lunar work vehicle
p 2833 N94-25675
Planetary surface exploration MESUR/autonomous lunar rover p 2833 N94-25683
Recent developments in the Robotic All Terrain Lunar Exploration Rover (RATLER) program
[DE93-040342] p 2821 N94-26110
Early lunar rover mission studies
p 2684 N94-26290
The Robotic All-Terrain Lunar Exploration Rover (RATLER): Increased mobility through simplicity
p 2685 N94-26291
A multitasking behavioral control system for the Robotic All-Terrain Lunar Exploration Rover (RATLER)
p 2685 N94-26292
Artemis common lunar lander. Phase 2: Study results for external review
[NASA-TM-109699] p 2692 N94-28205

LUNAR SATELLITES
Copernicus: Lunar surface mapper
p 3081 N94-25702

LUNAR SOIL
A widely adaptable habitat construction system utilizing space resources p 2688 N94-27374
Experimental study of lunar and SNC (Mars) magmas
[NASA-CR-195274] p 3107 N94-27850

LUNAR SPACECRAFT
Minimum accommodation for aerobrake assembly, phase 2
[NASA-TM-107608] p 2692 N94-27774
Artemis common lunar lander. Phase 2: Study results for external review
[NASA-TM-109699] p 2692 N94-28205

LUNAR SURFACE
The Extended Mission Rover (EMR)
p 2689 N94-25674
Design for producing fiberglass fabric in a lunar environment p 2765 N94-25676
Planetary surface exploration MESUR/autonomous lunar rover p 2833 N94-25683
Project Columbiad: Reestablishment of human presence on the Moon p 2689 N94-25687
Artemis common lunar lander. Phase 2: Study results for external review
[NASA-TM-109699] p 2692 N94-28205

LUNAR SURFACE VEHICLES
Enabler operator station p 2943 N94-25679
Dust control for Enabler p 2943 N94-25680

M

MACH NUMBER
Development and implementation of a scramjet cycle analysis code with a finite-rate-chemistry combustion model for use on a personal computer
[AD-A273834] p 2673 N94-25617
Mix induced by single shock passage through a material interface
[DE93-019505] p 2792 N94-26427
Pressure distributions on a 0.02-scale Space Shuttle orbiter nose at Mach 21.5 in helium
[NASA-TM-4495] p 2646 N94-26592
Experimental and theoretical study of aerodynamic characteristics of some lifting bodies at angles of attack from -10 degrees to 53 degrees at Mach numbers from 2.30 to 4.62
[NASA-TM-4528] p 2646 N94-26693
The cryogenic tunnel Cologne at DLR
[DLR-MITT-93-10] p 2681 N94-27587
Normal force of low aspect ratio cropped-delta wings at pre-stall angles of attack and subsonic speeds
[ESDU-93034] p 2648 N94-27955
Transient flow features of a supersonic jet in a low speed cross flow p 2800 N94-28005
Wing lift increment at zero angle of attack due to deployment of single-slotted flaps at low speeds
[ESDU-93019] p 2649 N94-28140

MACH REFLECTION
Mach reflection of spherical detonation waves
[DE93-016604] p 2797 N94-27705

MACHINE LEARNING
A rough set approach to speech recognition
[ISBN-0-315-83894-9] p 2769 N94-26619
Using discovery-based learning to prove the behavior of an autonomous agent
[AD-A274131] p 2987 N94-27121
Translation and rotation invariant pattern recognition
[PB94-123676] p 2968 N94-27157
Artificial Intelligence Research Branch future plans
[NASA-TM-109733] p 2989 N94-28065

MACHINE TOOLS
The National Center for Advanced Information Components Manufacturing: Program update
[DE94-002647] p 2960 N94-26118

MACHINE TRANSLATION
PATRAN 2.5/EAL interface guide
[NASA-TM-109053] p 2972 N94-27655
ARM: Abstract Rewriting Machine
[CWI-CS-R9330] p 2974 N94-27794

MACHINE-INDEPENDENT PROGRAMS
The ergonomics of software porting: Automatically configuring software to the runtime environment or everything you wanted to know about your C compiler but didn't know who to ask
[CWI-CS-R9266] p 2961 N94-26221

MACHINERY
Variable speed controller p 2943 N94-25678

MACHINING
Effect of nitrocarburizing on shape of titanium alloy parts
[DE94-004040] p 2732 N94-25822
Opportunities for High Aspect Ratio Micro-Electro-Magnetic-Mechanical Systems (HAR-MEMMS) at Lawrence Berkeley Laboratory
[DE94-003499] p 2827 N94-27722

MACROMOLECULES
Ultrastructure processing of macromolecular materials
[AD-A274460] p 2754 N94-27086

MAGMA
Experimental study of lunar and SNC (Mars) magmas
[NASA-CR-195274] p 3107 N94-27850

MAGNESIUM
Dissolution of secondary phases during extrusion
[PB94-124583] p 2732 N94-25908

MAGNESIUM ALLOYS
Formation of three types of quasi-crystals in Al-Pd-Mg system
[REPT-A-2667] p 3053 N94-26071
Hot deformation behaviour of Si(p)/Al composites and their matrices and an Al-Mg-Si alloy
[ISBN-0-315-84699-2] p 2711 N94-27314
The corrosion behavior of sputter-deposited magnesium-valve metal alloys p 2745 N94-28164

MAGNESIUM FLUORIDES
Ferroelectric fluoride memory FET development
[AD-A274341] p 2785 N94-27057

MAGNESIUM OXIDES
Transparent polycrystalline body with high ultraviolet transmittance, process for making and applications thereof
[CA-PATENT-1325511] p 3066 N94-27276

MAGNET COILS
Development of an industrial CO2 laser for mask marking
[DE93-632901] p 2816 N94-26184

MAGNETIC CONTROL
High-speed repetitive pellet injector for plasma fueling of magnetic confinement fusion devices
[DE94-002792] p 3042 N94-26140

MAGNETIC DIPOLES
Evaluation of APC NbTi superconductor in a model dipole magnet
[DE94-003258] p 3060 N94-26795
Electromagnetic fields and interference
[PB94-126489] p 2771 N94-26877

MAGNETIC EFFECTS
An investigation of magnetic field effects on plume density and temperature profiles of an applied-field MPD thruster
[NASA-TM-106416] p 2700 N94-26090
Magnetostriction and magnetostrictive materials
[VTT-TIED-1434] p 3058 N94-26545
Direct evidence of the interplanetary magnetic field effect on the cosmic-ray shadow by the sun
[ICRR-296-93-8] p 3116 N94-27607
Cryogenic fracture behavior of 316LN in magnetic fields up to 14.6 T
[DE94-005215] p 2742 N94-27694

MAGNETIC FIELD CONFIGURATIONS
Structure of the modulated magnetic phase of Mn3Sn
[DE94-002788] p 2733 N94-26092
The ZnO thin films with C-axis orientation prepared on the room temperature substrate by the ECR multipolar plasma sputtering method
[DE94-605039] p 2758 N94-27857

MAGNETIC FIELD RECONNECTION
Nonlinear growth of strongly unstable tearing modes
[DE94-003366] p 3042 N94-25958

MAGNETIC FIELDS
Study on phase transformation due to deformation in ferromagnetic fields at cryogenic condition
p 2724 N94-25556

An optimal constrained linear inverse method for magnetic source imaging
[DE94-004014] p 2957 N94-25663
Electromagnetic properties of a toroidal solenoid
[DE93-613032] p 2766 N94-25866
An investigation of magnetic field effects on plume density and temperature profiles of an applied-field MPD thruster
[NASA-TM-106416] p 2700 N94-26090
Detection of transient vector-fields in additive noise
[FFI-93/7028] p 2768 N94-26232
Ising critical behaviour in the one-dimensional frustrated quantum XY model
[DE93-634755] p 3057 N94-26390
The influence of energy losses with time in NbTi superconductors in pulsed magnetic fields
[DE93-634761] p 3058 N94-26512
A mechanism for resistive dissipation in Ag sheathed Bi2Sr2CaCu2O8 and Bi2Sr2Ca2Cu3O10
[DE94-003009] p 3060 N94-26771
Asymptotics for Kummer functions, Bose plasmas, and related special functions
[DE94-601853] p 3007 N94-26928
An optimal constrained linear inverse method for magnetic source imaging
[DE94-002264] p 2996 N94-26936
Detection of low-intensity magnetic fields with a magnetostrictive fiber optic sensor
[AD-A274120] p 3037 N94-27062
Technical report of ISSP. Ser. A, no. 2674: High-field cyclotron resonance and impurity transition in n- and p-3C-SiC at magnetic fields up to 175 T
[JTN-94-80560] p 3064 N94-27232
Technical report of ISSP. Ser. A, no. 2672: Magneto-optical effects of excitons in BiI3 crystals under pulsed high magnetic fields. 3: Excitons confined around a stacking disorder formed by a bending stress
[JTN-94-80558] p 3065 N94-27240
Technical report of ISSP. Ser. A, no. 2675: High-field cyclotron resonance and valence-band structure in semiconducting diamond
[JTN-94-80561] p 3065 N94-27245
Researches of the Electrotechnical Laboratory. No. 51: Study of formation and sustainment of reversed field pinch by slow control of magnetic field
[JTN-94-80548] p 3046 N94-27350
Study of the hyperfine magnetic field at Ta-181 site in the Heusler Co2ScSn, Co2ScGa, and Co2HfSn alloys
[DE94-603989] p 3067 N94-27623
Fiber optic Faraday flux transformer specification
[AD-D016058] p 3039 N94-27674
Cryogenic fracture behavior of 316LN in magnetic fields up to 14.6 T
[DE94-005215] p 2742 N94-27694
Mode analysis of gyrotron oscillation using a k-spectrometer
[DE94-701195] p 2813 N94-27703
Atomic processes in Inertial Electrostatic Confinement (IEC) devices
[DE94-005015] p 3047 N94-27715
Advanced development of particle beam probe diagnostic system
[DE94-002316] p 3047 N94-27720
Passive stabilization of MHD instabilities at high (beta)n in the HBT-EP tokamak
[DE94-003317] p 3047 N94-27735
Technical report of ISSP. Ser. A, no. 2687: Quantized persistent currents of a quantum dot in a strong magnetic field
[JTN-94-80573] p 3028 N94-27758
Experimental results of 40-kA Nb3Al conductor
[DE94-701207] p 2788 N94-27821
The three-dimensional hydrogen atom in crossed magnetic and electric fields
[DE94-606301] p 3029 N94-27847

MAGNETIC FLUX
Flux flow, pinning, and resistive behavior in superconducting networks
[DE94-003400] p 3050 N94-25848
High resolution studies of sunspots and flux tubes
[NASA-CR-195216] p 3111 N94-27321
Technical report of ISSP. Ser. A, no. 2687: Quantized persistent currents of a quantum dot in a strong magnetic field
[JTN-94-80573] p 3028 N94-27758
Determination of the plasma column shape in the Tokamak Novillo cross section by magnetic probes
[DE94-604986] p 3048 N94-27844

MAGNETIC INDUCTION
Time domain reflectometry for measuring bulk soil electrical conductivity and comparison with the Em38 instrument
[PB94-125432] p 2881 N94-27052
Analytical study of beam handling and emittance control
[AD-A274412] p 3033 N94-27078

MAGNETIC LENSES
Focusing properties of a three-element quadrupole lens system and its stigmatic focusing behaviour
[DE93-616534] p 2766 N94-25915

MAGNETIC MATERIALS
First principle calculation for magneto-crystalline anisotropy
[DE93-634653] p 3052 N94-26012
Center for nonlinear phenomena and magnetic materials
[AD-A274176] p 3009 N94-27126
List of papers published by the members of Institute for Materials Research, Tohoku University 1992
[JTN-94-80608] p 3118 N94-27355

MAGNETIC MEASUREMENT
Measurement of magnetic fluctuation induced energy transport
[DE94-003846] p 3042 N94-26132
Detection of transient vector-fields in additive noise
[FFI-93/7028] p 2768 N94-26232
An optimal constrained linear inverse method for magnetic source imaging
[DE94-002264] p 2996 N94-26936
Determination of the plasma column shape in the Tokamak Novillo cross section by magnetic probes
[DE94-604986] p 3048 N94-27844

MAGNETIC MIRRORS
Toroidal plasma beta-FLR limit in a toroidally linked mirror system
[DE94-003119] p 3041 N94-25792

MAGNETIC MOMENTS
Volume dependence of vanadium magnetism
[DE94-601838] p 3050 N94-25843
Technical report of ISSP. Ser. A, no. 2678: Magnetic properties of carbon nanotubes
[JTN-94-80564] p 3064 N94-27174

MAGNETIC MONOPOLES
Enhancement of the rate of radiative processes in the field of a magnetic monopole
[DE94-603717] p 3074 N94-27696

MAGNETIC PERMEABILITY
Technical report of ISSP. Ser. A, no. 2678: Magnetic properties of carbon nanotubes
[JTN-94-80564] p 3064 N94-27174
Technical report of ISSP. Ser. A, no. 2681: Orbital and spin susceptibilities of the plane copper sites in YBa2Cu3O(x) system
[JTN-94-80567] p 3064 N94-27177
Technical report of ISSP. Ser. A, no. 2669: Relations between oxygen deficiency and structures in the La-Sr-Cu-O system. 3: Oxygen contents and structure of (La, Sr)8Cu8O(16+delta) phase
[JTN-94-80555] p 3066 N94-27353

MAGNETIC PROBES
Determination of the plasma column shape in the Tokamak Novillo cross section by magnetic probes
[DE94-604986] p 3048 N94-27844

MAGNETIC PROPERTIES
Study on characteristics and electronic structures of materials with strong electronic correlations by ferromagnetic fields p 2724 N94-25557

MAGNETIC PUMPING
Review of tokamak experiments on direct electron heating and current drive with fast waves
[DE94-004185] p 3041 N94-25801

MAGNETIC SIGNATURES
Kiruna geophysical data. Data summary 93/4-6, April-June 1993
[PB94-123700] p 2881 N94-27039
Kiruna geophysical data. Data summary 93/1-3, January-March, 1993
[PB94-123791] p 2881 N94-27043

MAGNETIC SPECTROSCOPY
Implementation of a compact magnetic electron energy spectrometer for intense relativistic electron beams
[AD-A274451] p 3033 N94-27082

MAGNETIC STORMS
Dynamics explorer interdisciplinary scientist investigations
[NASA-CR-195226] p 2878 N94-26204
Region 5395 of March 1989 -- solar activity, geomagnetic disturbances, and terrestrial effects
[PB94-120714] p 3110 N94-26755
Compton Gamma Ray Observatory/BATSE observations of energetic electrons scattered by cyclotron resonance with waves from powerful VLF transmitters
[NASA-CR-195240] p 3115 N94-26790
The Sixteenth Symposium on Coordinated Observations of the Ionosphere and the Magnetosphere in the Polar Regions: Program and abstracts
[JTN-94-80601] p 2882 N94-27300
Configuration of the near-Earth plasma sheet
[NASA-CR-195271] p 2883 N94-27438
Proton aurora and substorm intensifications
[ATR-93(7248)-1] p 2887 N94-28218

MAGNETIC SUSPENSION
Neural control of magnetic suspension systems
p 2682 N94-27905
System identification of the Large-Angle Magnetic Suspension Test Facility (LAMSTF)
p 2682 N94-27908

MAGNETIC VARIATIONS
Comparative investigation of high-latitude ionospheric structure and effects near solar maximum
[AD-A273799] p 2877 N94-25877

MAGNETIZATION
Power laws, flicker noise, and the barkhausen effect
[AD-A274702] p 3008 N94-26376
Technical report of ISSP. Ser. A, no. 2687: Quantized persistent currents of a quantum dot in a strong magnetic field
[JTN-94-80573] p 3028 N94-27758
Anisotropy in the electrical, magnetic and optical properties of Pb2Sr2RCu3O8
[ISBN-0-315-84930-4] p 3070 N94-27974

MAGNETOCARDIOGRAPHY
Detection geometry and reconstruction error in magnetic source imaging
[DE94-004012] p 2809 N94-25662

MAGNETOHYDRODYNAMIC FLOW
Liquid metal MHD research and development in Israel
p 2854 N94-26055
Ways to improve MHD power plants and prospects of their application p 2854 N94-26056
Shear flow generation from the interaction of neoclassical and drift wave transport processes
[DE94-003135] p 2791 N94-26096
Quiet-time intensifications along the poleward auroral boundary near midnight
[ATR-93(7248)-2] p 2877 N94-26201
Scaling of sustained ZT-40 M reversed field pinches
[DE94-003318] p 3043 N94-26321
Researches of the Electrotechnical Laboratory. No. 53: Spectral emission from combustion gas containing scattering media
[JTN-94-80603] p 2717 N94-27246

MAGNETOHYDRODYNAMIC GENERATORS
The Lightcraft project: Flight technology for a hypersonic mass transit system p 2670 N94-25695
Liquid metal MHD research and development in Israel
p 2854 N94-26055
Ways to improve MHD power plants and prospects of their application p 2854 N94-26056

MAGNETOHYDRODYNAMIC STABILITY
Toroidal plasma beta-FLR limit in a toroidally linked mirror system
[DE94-003119] p 3041 N94-25792
Nonlinear growth of strongly unstable tearing modes
[DE94-003366] p 3042 N94-25958
Investigation of plasma instabilities in the polar cusp
[NASA-CR-195212] p 2879 N94-26599
TFTR experimental data analysis collaboration
[DE94-004166] p 3047 N94-27690
Reduced Braginskii equations
[DE94-003510] p 3047 N94-27723
Numerical experiment on finite element method for matching data
[DE94-701208] p 3000 N94-27731
Passive stabilization of MHD instabilities at high (beta)n in the HBT-EP tokamak
[DE94-003317] p 3047 N94-27735

MAGNETOHYDRODYNAMIC WAVES
Review of tokamak experiments on direct electron heating and current drive with fast waves
[DE94-004185] p 3041 N94-25801
TFTR experimental data analysis collaboration
[DE94-004166] p 3047 N94-27690
The calculation for energy balance of heating plasmas by Alfven waves
[DE94-604994] p 3049 N94-27855

MAGNETOHYDRODYNAMICS
The Lightcraft project: Flight technology for a hypersonic mass transit system p 2670 N94-25695
Nonlinear growth of strongly unstable tearing modes
[DE94-003366] p 3042 N94-25958
The First Energy Conference: Israel and the Former USSR
[ISBN-965-229-098-X] p 2853 N94-26050
Liquid metal MHD research and development in Israel
p 2854 N94-26055
Nonlinear transverse propagation of photons in a ultrarelativistically hot and magnetized electron-positron plasma: Coupling of Langmuir and electromagnetic solitons
[DE94-603667] p 3046 N94-27630
TFTR experimental data analysis collaboration
[DE94-004166] p 3047 N94-27690
Numerical experiment on finite element method for matching data
[DE94-701208] p 3000 N94-27731

Analysis of density limit and efficiency in lower hybrid current drive
[DE94-604995] p 3049 N94-27856

MAGNETOMETERS
Detection geometry and reconstruction error in magnetic source imaging
[DE94-004012] p 2809 N94-25662
Determination of the geomagnetic external contribution by nonlinear optimization methods
[DE94-600882] p 2878 N94-26365

MAGNETOPLASMADYNAMICS
An investigation of magnetic field effects on plume density and temperature profiles of an applied-field MPD thruster
[NASA-TM-106416] p 2700 N94-26090
Flowing DPF design for propulsion experiments
[AD-A274973] p 2701 N94-26537

MAGNETOSHEATH
Collisionless shock structures of Earth and other planets
[NASA-CR-195257] p 3104 N94-27407

MAGNETOSPHERE-IONOSPHERE COUPLING
Ionosphere-magnetosphere coupling
[NASA-CR-195222] p 2881 N94-27237
The Sixteenth Symposium on Coordinated Observations of the Ionosphere and the Magnetosphere in the Polar Regions: Program and abstracts
[JTN-94-80601] p 2882 N94-27300

MAGNETOSTATIC FIELDS
On radio frequency wave induced radial transport and wave helicity
[IPPCZ-326] p 2777 N94-27838

MAGNETOSTRICTION
Magnetostriction and magnetostrictive materials
[VTT-TIED-1434] p 3058 N94-26545
Ferrite phase shifters using stress insensitive materials
[AD-A274639] p 2708 N94-26895
Detection of low-intensity magnetic fields with a magnetostrictive fiber optic sensor
[AD-A274120] p 3037 N94-27062

MAGNETRONS
HPm-tubes: Literature survey comprising 1992
[PB94-123643] p 2785 N94-27038

MAGNONS
Holes in a two-dimensional quantum antiferromagnet
[DE93-634753] p 3057 N94-26388

MAIN SEQUENCE STARS
Coronal heating via nanoflares
[DE94-000773] p 3110 N94-26696

MAINTENANCE
Human factors in airway facilities maintenance: Development of a prototype outage assessment inventory
[DOT/FAA/AM-94/5] p 2941 N94-26136
Development of the gas turbine. Part 2: Manufacturing, commissioning, and operation p 2831 N94-28081

MAINTENANCE TRAINING
Knowledge organization in intelligent tutoring systems for diagnostic problem solving in complex dynamic domains
[AD-A273986] p 2984 N94-25899
Production of a computer based lesson teaching employees how to use an air data tester
[ISBN-0-315-84708-5] p 2969 N94-27316

MAJORITY CARRIERS
The structural, chemical, and electrical properties of He-implantation-induced nanocavities in silicon
[DE94-002681] p 3052 N94-25971

MALAYSIA
Atmospheric science research in Malaysia: Perspectives on international cooperation p 2874 N94-28285

MALES
Thermoregulatory effects of caffeine ingestion during rest and exercise in men
[NASA-TM-108783] p 2901 N94-26210

MAMMALS
Proposed law of nature linking impacts, plume volcanism, and Milankovitch cycles to terrestrial vertebrate mass extinctions via greenhouse-embryo death coupling
p 2876 N94-28307

MAN MACHINE SYSTEMS
Institute for Information Technology
[NRC-37061] p 3118 N94-26709
Automated information management for designers: Functional requirements for computer based associates that support access and use of technical information in design
[AD-A274603] p 3099 N94-26891
Telepresence in the human exploration of Mars: Field studies in analog environments p 2685 N94-27360
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 386)
[NASA-SP-7011(386)] p 2933 N94-28208
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 387)
[NASA-SP-7011(387)] p 2933 N94-28213
Visit to CERMA: Centre d'Etudes et de Recherches de Medecine Aerospatiale, Centre for Studies and Research in Aviation and Space Medicine, Bretigny sur Orge, France, November 16-18, 1992
[PB94-132990] p 2937 N94-28392

MANAGEMENT INFORMATION SYSTEMS
Implementing a multiple criteria model base in co-op with a graphical user interface generator
[AD-A274901] p 3093 N94-26181
Information systems criteria for applying software reengineering: Guidelines for identifying information systems for software reengineering
[AD-A274699] p 3097 N94-26375
Data analysis and data fusion for intelligence analysis and decision support. Research plan 1993-2000
[PB94-123569] p 3005 N94-27173
University program management information system, FY 1993
[NASA-TM-109719] p 3100 N94-27413
The TMIS life-cycle process document, revision A
[NASA-TM-109698] p 2697 N94-27775

MANAGEMENT METHODS
Module interconnection frameworks for a real-time spreadsheet
[AD-A273853] p 2956 N94-25588
The effectiveness of AMT investment in UK metal component manufacture
[IND-MANU-SCI-TECH-REPT-3] p 2762 N94-25775
An exploratory survey of methods used to develop measures of performance
[AD-A273945] p 2834 N94-25896
Business process redesign: Design the improved process
[AD-A274947] p 3093 N94-26299
Benefits estimation for simulation systems used for aircrew training in a multiship environment
[AD-A274313] p 2938 N94-26882
An investigation of integrated product development implementation issues: A case study of Bosma Machine and Tool Corp.
[AD-A273917] p 2942 N94-27320
Polyhedral characterization of the economic lot-sizing problem with start-up costs
[MEMO-COSOR-92-46] p 2969 N94-27396

MANAGEMENT SYSTEMS
Automated information management for designers: Functional requirements for computer based associates that support access and use of technical information in design
[AD-A274603] p 3099 N94-26891
On modeling and controlling intelligent systems
[DE94-002446] p 2988 N94-27706

MANDRELS
Equivalent performance in different helical resonator plasma polymerization coater platforms
[DE94-001517] p 2753 N94-26933

MANEUVERABILITY
Analysis and optimization of preliminary aircraft configurations in relationship to emerging agility metrics
[NASA-CR-195228] p 2668 N94-26235

MANGANESE
An extraterrestrial event at the tertiary-quaternary boundary p 2890 N94-28309

MANGANESE ALLOYS
Microstructural development in low activation ferritic alloys irradiated to 200 dpa at 420 C
[DE94-004269] p 2731 N94-25803
Structure of the modulated magnetic phase of Mn3Sn
[DE94-002788] p 2733 N94-26092
NMR study of quasicrystal Al(70)Pd(20)T(M10) alloy (T(M):Cr, Mn, Fe, and Co) p 2745 N94-28162
Formation and high mechanical strength of Al-based alloys containing a nanoscale icosahedral phase as a main constituent p 2746 N94-28171
Mechanical properties and microstructure of thermomechanically processed, high manganese steel
[ARL-TR-146] p 2747 N94-28212

MANGANESE COMPOUNDS
Technical report of ISSP. Ser. A, no. 2673: Two successive spin glass transitions in non-diluted Heisenberg-like spin glass Ni(0.42)Mn(0.58) TiO3
[JTN-94-80559] p 2756 N94-27241

MANIFOLDS (MATHEMATICS)
Characterization of self-conjugate minimal surfaces in R(sup 3)
[DE94-601538] p 2993 N94-26409
Implementation of integral manifold control on a two degree of freedom flexible joint manipulator: Theory and experiments
[ISBN-0-315-83572-9] p 2823 N94-26658
Poisson-lie group of pseudodifferential symbols
[PB94-124393] p 2997 N94-26996
Illumination in diverse codimensions
[NASA-CR-191596] p 2971 N94-27572
A survey of open problems in symplectic integration
[DE94-003966] p 3007 N94-27777

MANIPULATORS
A global approach to kinematic path planning to robots with holonomic and nonholonomic constraints
p 2683 N94-26279
Inertial-space disturbance rejection for space-based manipulators p 2683 N94-26281
Performance measures from the explorer platform berthing experiment p 2683 N94-26283
Asymptotically stable neural networks for identification of nonlinear dynamic systems
[ISBN-0-315-84328-4] p 2985 N94-26629
Dynamics of a flexible extendible beam
[ISBN-0-315-84278-4] p 2838 N94-26639
Motion planning for serial manipulators with many degrees of freedom: Implementation of a sequential search strategy
[ISBN-0-315-83682-2] p 2822 N94-26642
Optimal architectural design of parallel and hybrid manipulators
[ISBN-0-315-84351-9] p 2822 N94-26657
Simulation dynamics of a multibody chain: Recursion based on chain modal coordinates
[ISBN-0-315-83555-9] p 2994 N94-26659
Interchangeable end effector tools utilized on the PFMA
[NASA-CR-193925] p 2823 N94-27149
Generalized finite element dynamic modelling and simulation for flexible robot manipulators
[ISBN-0-315-84623-2] p 2825 N94-27343
Dynamic control of kinematically redundant manipulators
[ISBN-0-315-84627-5] p 2825 N94-27344
Advanced control of a flexible spherical wrist
[ISBN-0-315-84424-8] p 2826 N94-27652
Local performance optimization for a class of redundant eight-degree-of-freedom manipulators
[NASA-TP-3417] p 2989 N94-27773
Comparison of dynamic analysis of a Schilling hydraulic manipulator with experimental results
[DE94-004597] p 2827 N94-27780

MANNED LUNAR SURFACE VEHICLES
The Extended Mission Rover (EMR)
p 2689 N94-25674
Pressurized Lunar Rover (PLR) p 2833 N94-25704

MANNED MARS MISSIONS
Manned mission to Mars with periodic refueling from electrically propelled tankers p 2689 N94-25670
Lowest cost, nearest term options for a manned Mars mission p 2689 N94-25682
Project APEX: Advanced manned exploration of the Martian moon Phobos p 3079 N94-25688
Project Minerva: A low-cost manned Mars mission based on indigenous propellant production
p 2760 N94-25705
Pax: A permanent base for human habitation of Mars
p 2943 N94-25706

MANNED SPACE FLIGHT
Future of aerospace
[PB94-120185] p 2669 N94-26906
Research and Development Annual Report, 1992
[NASA-TM-104777] p 3119 N94-27993

MANUFACTURING
Study on utilization of super clean, high vacuum space
p 2682 N94-25586
Lunar preform manufacturing p 2765 N94-25677
The effectiveness of AMT investment in UK metal component manufacture
[IND-MANU-SCI-TECH-REPT-3] p 2762 N94-25775
General Motors Corporation and Pacific Northwest Laboratory staff exchange: Inspection of case hardened steels and metal-matrix composites
[DE94-003470] p 2706 N94-25982
The National Center for Advanced Information Components Manufacturing: Program update
[DE94-002647] p 2960 N94-26118
Overview of the Photovoltaic Manufacturing Technology (PVMaT) project
[DE93-018234] p 2856 N94-26426
Adaptive path planning in changing environments
[DE94-003269] p 2985 N94-26462
Qualified manufacturing and interoperability for space applications p 2949 N94-26719
Fabrication technology
[DE94-003017] p 2763 N94-26778
Investigation of ACC/CCI tunnel diodes
[AD-A274549] p 2785 N94-26845
Material optimization and manufacturing development of reduced cost powder metal titanium alloy components for gas turbine engine application, phase 2
[AD-A274410] p 2709 N94-26978
Solar collector manufacturing activity, 1992
[DE94-003401] p 2859 N94-27048

A widely adaptable habitat construction system utilizing space resources p 2688 N94-27374
Multiple weight stepwise regression
[DE94-001602] p 3000 N94-27564
Continuous roll-to-roll a-Si photovoltaic manufacturing technology
[DE94-000260] p 2859 N94-27610
Development of the gas turbine. Part 2: Manufacturing, commissioning, and operation p 2831 N94-28081
Open communication in manufacturing automation
[PB94-132479] p 2976 N94-28377

MANY BODY PROBLEM
Theoretical and computational studies in intermediate energy nuclear physics
[DE94-004177] p 3012 N94-25800
Stability of large scale interconnected dynamical systems
[DE94-601536] p 2993 N94-26408
How reliable is the HMSA integral equation for the pair structure of supercooled and amorphous mixtures?
[DE94-601543] p 3006 N94-26411
Study of the critical points at infinity arising from the failure of the Palais-smale condition for n-body type problems
[DE94-603656] p 3000 N94-27818

MAPPING
Mapping closed tropical forest cover in West Africa using NOAA/AVHRR-LAC data p 2850 N94-27184
Fixed point type theorems and projection-interaction approximation
[DE94-603669] p 3000 N94-27632
Solution of the Heisenberg equation for the four-fermion contact interaction by the method of dynamical mappings
[DE94-606341] p 3075 N94-27858
Fractals and their applications to remote sensing and digital mapping
[ISBN-0-315-59469-1] p 2852 N94-27870

MARINE BIOLOGY
Coupling of pelagic and benthic communities over a seamount in the Eastern North Pacific
[AD-A274750] p 2899 N94-26149
Measuring variation in ecosystem sensitivity to stress
[AD-A274232] p 2868 N94-26817
Macrobenthic fauna in the dutch sector of the north sea in 1991
[PB94-126414] p 2868 N94-27200
Changes in phytoplankton population in the Chao Phraya estuary, Thailand, during the eutrophication mechanisms studies p 2875 N94-28287

MARINE CHEMISTRY
An experimental study of plunging liquid jet induced air carryunder and dispersion
[AD-A274414] p 2794 N94-26979

MARINE ENVIRONMENTS
Study on fatigue crack propagation characteristics around welded joint interface in complexed conditions
p 2730 N94-25584
Conversion of the CLUSE model for applications over open ocean
[AD-A273750] p 2893 N94-26013
The biostratigraphy and paleogeography of Maastrichtian inoceramids p 2889 N94-28303

MARINE MAMMALS
Sonic booms and marine mammals: Informational status and recommendations p 2651 N94-28198

MARINE METEOROLOGY
Naval Interactive Data Analysis System (NIDAS), software user's manual
[NASA-CR-195179] p 2956 N94-25606
Mesoscale frontal evolution of the ERICA IOP-5A Cyclone
[AD-A274906] p 2893 N94-26183
The numerical simulation of marine boundary layer clouds
[AD-A273669] p 2894 N94-26195
Propagation of cold air masses in East Asia and its associated planetary-scale function
[AD-A274304] p 2895 N94-26850

MARINE PROPULSION
Integration of interactive interfaces with intelligent tutoring systems: An implementation
[AD-A273869] p 2985 N94-25966

MARINER 9 SPACE PROBE
Reanalysis of Mariner 9 UV Spectrometer Data for Ozone, Cloud, and Dust Abundances, and Their Interaction Over Climate Timescales
[NASA-CR-195244] p 3107 N94-27885
Probing the Martian atmosphere in the ultraviolet
p 3108 N94-27890
How well was total ozone abundance inferred with Mariner 9? p 3108 N94-27891

MARKERS
Ion beam mixing of marker layers into amorphous aluminum oxide
[DE94-000901] p 2752 N94-26676

MARKET RESEARCH
Development of satellite telecommunications during the period 1990 - 2005
[CRANFIELD-AERO-9301] p 2765 N94-25639
Powerful selling and sales strategy
p 2662 N94-28245

MARKETING
Powerful selling and sales strategy
p 2662 N94-28245

MARKOV CHAINS
Single-server queues with spatially distributed arrivals
[PB94-126638] p 2986 N94-26916
The Communication Link and Error ANalysis (CLEAN) simulator
[NASA-CR-195243] p 2968 N94-27168

MARKOV PROCESSES
Application of Markov random field theory to image coding and motion estimation
[ISBN-0-315-83435-8] p 2964 N94-26632
Three dimensional object recognition using a complex autoregressive model
[AD-A274388] p 2995 N94-26829
Limit theorems for functionals of Markov processes and renormalizable stable fields
[AD-A274645] p 3004 N94-27106
White noise theory of robust nonlinear filtering with correlated state and observation noises
[PB94-126661] p 3004 N94-27211

MARS (PLANET)
Project APEX: Advanced manned exploration of the Martian moon Phobos p 3079 N94-25688
Mars transportation system p 2833 N94-25689
Telepresence in the human exploration of Mars: Field studies in analog environments p 2685 N94-27360
Reanalysis of Mariner 9 UV Spectrometer Data for Ozone, Cloud, and Dust Abundances, and Their Interaction Over Climate Timescales
[NASA-CR-195244] p 3107 N94-27885

MARS ATMOSPHERE
Extraterrestrial surface propulsion systems
p 2833 N94-25691
Reanalysis of Mariner 9 UV Spectrometer Data for Ozone, Cloud, and Dust Abundances, and Their Interaction Over Climate Timescales
[NASA-CR-195244] p 3107 N94-27885
Cooling the Martian atmosphere: The spectral overlap of the C02 15 micrometers band and dust
p 3107 N94-27886
Martian atmospheric radiation budget
p 3107 N94-27887
Mars ozone: Mariner 9 revisited p 3107 N94-27888
Why is the north polar cap on Mars different than the south polar cap? p 3107 N94-27889
Probing the Martian atmosphere in the ultraviolet
p 3108 N94-27890
How well was total ozone abundance inferred with Mariner 9? p 3108 N94-27891
In situ Mars ozone detector p 3108 N94-27892
The Martian atmospheric planetary boundary layer stability, fluxes, spectra, and similarity
[NASA-CR-195711] p 3108 N94-27935

MARS ENVIRONMENT
First lunar outpost p 2943 N94-25694
Why is the north polar cap on Mars different than the south polar cap? p 3107 N94-27889

MARS LANDING
Battery study for the Mars Environmental Survey (MESUR) Pathfinder p 2860 N94-28105

MARS SURFACE
Planetary surface exploration MESUR/autonomous lunar rover p 2833 N94-25683
Mars transportation system p 2833 N94-25689
Design and development of the second generation Mars Habitat p 2943 N94-25693
Project Ares 3 p 2671 N94-25712
Why is the north polar cap on Mars different than the south polar cap? p 3107 N94-27889
In situ Mars ozone detector p 3108 N94-27892

MARTENSITE
Microstructural development in low activation ferritic alloys irradiated to 200 dpa at 420 C
[DE94-004269] p 2731 N94-25803

MARTENSITIC STAINLESS STEELS
Electrochemical properties of passive films on 440C stainless steel
[ISBN-0-315-64248-3] p 2757 N94-27801

MARTENSITIC TRANSFORMATION
Study on phase transformation due to deformation in ferromagnetic fields at cryogenic condition
p 2724 N94-25556
Study on microscopic structural controls and electronic properties at material surfaces by ion beams
p 2727 N94-25571
Stress-induced phase transformation in ZrO2 materials
[ISBN-0-315-83373-4] p 2752 N94-26661

MARTINGALES
Bisexual branching diffusions
[AD-A274698] p 3008 N94-26374

MASKS
Development of an industrial CO2 laser for mask marking
[DE93-632901] p 2816 N94-26184

MASONRY
Proceedings of the Fourth Euroseminar on Microscopy Applied to Building Materials
[PB94-119807] p 2839 N94-26754

MASS
Small low mass advanced PBR's for bi-modal operation
[DE94-003201] p 2699 N94-25798
Parametric analysis of the space power plants on the base of criterion of specific mass in generalized design variants
[DE93-634153] p 2701 N94-26166

MASS BALANCE
Space Station evolution study oxygen loop closure
[NASA-CR-193938] p 2941 N94-26788

MASS FLOW
Propagation of cold air masses in East Asia and its associated planetary-scale function
[AD-A274304] p 2895 N94-26850

MASS FLOW RATE
SP industry calorimeter for rate of heat release measurements up to 10MW
[PB94-124211] p 2811 N94-27044

MASS SPECTRA
Aspects of nonrenormalizable terms in a superstring standard-like models
[DE93-614530] p 3071 N94-25911
Quantizable configurations of the relativistic string
[DE93-634346] p 3072 N94-26036
Meson X(1814) as a candidate for a hybrid state
[DE93-634447] p 3017 N94-26045
Leptonic decay constants of heavy mesons in QCD
[DE93-634426] p 3022 N94-26767
A measurement of the W mass using electrons at CDF
[DE94-004656] p 3028 N94-27748
Decay constants of heavy mesons in the relativistic potential model with velocity dependent corrections
[DE94-606495] p 3030 N94-27860

MASS SPECTROSCOPY
Study on analyzing method establishment for metallic material development p 2729 N94-25578
Molecular beam mass spectrometry studies of the chemical vapor deposition of diamond
[DE94-003802] p 3049 N94-25601
Three methods to measure RH bond energies
[DE94-003795] p 3013 N94-25816
New FORTRAN computer programs to acquire and process isotopic mass spectrometric data: Operator's manual
[DE94-003174] p 2965 N94-26784
Antiproton studies in penning traps
[AD-A274250] p 3024 N94-27011
Determination of lead isotope ratios in seawater by purge and trap GC/MS after ethylation p 2870 N94-28152

MASS TRANSFER
Absorption technology for solar and waste heat utilization p 2854 N94-26053
An April 1991 outburst from 4U0115+63 observed by BATSE
[NASA-CR-195252] p 3116 N94-27440

MASSIVELY PARALLEL PROCESSORS
Achieving high performance on the Intel Paragon
[DE94-003108] p 2979 N94-25953
Computational mechanics
[DE94-003015] p 2965 N94-26775
Efficient massively parallel simulation of dynamic channel assignment schemes for wireless cellular communications
[NASA-CR-191593] p 2971 N94-27558
High performance computing in chemistry and massively parallel computers: A simple transition?
[DE94-004318] p 2982 N94-27600

MATCHED FILTERS
Detection of transient vector-fields in additive noise
[FFI-93/7028] p 2768 N94-26232

MATCHING
Saving comparisons in the Crochemore-Perrin string matching algorithm
[CWI-CS-R9322] p 2971 N94-27550
The molecular matching problem
p 3030 N94-27910

MATERIALS
Development of the gas turbine. Part 1: Design philosophy and performance p 2831 N94-28080

MATERIALS HANDLING
Automated in-situ inspection systems for underground storage tanks
[AD-A274644] p 2764 N94-27144

MATHEMATICAL LOGIC

New binary integration strategies and corresponding R90 calculations
[AD-A274786] p 2769 N94-26359

A formalization of objects using equational dynamic logic
[PB94-125218] p 2965 N94-26852

Combining logics
[PB94-125242] p 2965 N94-26908

A characterization of stable models using a non-monotonic operator
[CWI-CS-R9315] p 2970 N94-27543

Modal logic, transition systems and processes
[CWI-CS-R9321] p 2970 N94-27549

MATHEMATICAL MODELS

The application of simulated annealing to stochastic systems
[AD-A273850] p 3001 N94-25607

A comparison of three approximate mathematical models for the gravity gradient stabilized satellite
[AD-A273832] p 2694 N94-25615

HDR reactor containment fire modeling with BRI2
[VTT-PUBS-113] p 3031 N94-25621

Binaural room simulation
[AD-A273823] p 3009 N94-25737

Hydrogen uptake into silicon from an ECR plasma
[DE94-003771] p 3050 N94-25815

Spatial symmetry, local integrability and tetrahedron equations in the Baxter-Bazhanov model
[DE93-634348] p 3002 N94-26038

Z(sub N)(sup n-1) broken model
[DE93-634357] p 3072 N94-26039

Geometric correction of SPOT images with use of digital elevation models
[ETN-94-95033] p 2847 N94-26107

The identification of inflow fluid dynamics parameters that can be used to scale fatigue loading spectra of wind turbine structural components
[DE94-000231] p 2791 N94-26117

SIMA: A model for forest succession based on the carbon and nitrogen cycles with application to silvicultural management of the forest ecosystem
[SILVA-CARELICA-22] p 2848 N94-26258

Simulation modeling for long duration spacecraft control systems p 2684 N94-26288

C-periodicity and the physical mass in the 3-state Potts model
[DE94-601551] p 3019 N94-26423

Subgraph approximations for large directed graphical models
[AD-A274813] p 3003 N94-26485

Simulation approaches for calculations in directed graphical models
[AD-A274825] p 3003 N94-26494

A concurrent, multigroup, discrete ordinates model of neutron transport
[DE94-004334] p 3020 N94-26577

Reconstruction of multiple cracks from experimental electrostatic boundary measurements
[NASA-CR-191584] p 2994 N94-26601

Piloted simulation study of an ILS approach of a twin-pusher business/commuter turboprop aircraft configuration
[NASA-TM-4516] p 2646 N94-26602

Analysis of the influence of weather on infrared imagery
[FEL-92-A421] p 3036 N94-26649

Simulation dynamics of a multibody chain: Recursion based on chain modal coordinates
[ISBN-0-315-83555-9] p 2994 N94-26659

A constitutive model for layered wire mesh and aramid cloth fabric
[DE94-003275] p 2708 N94-26796

Calculations of material removal, removal rate, and Preston coefficient in continuous lapping/polishing machines
[DE94-002619] p 2763 N94-26804

Physical modelling and adaptive predictive control of diffusion/LPCVD reactors
[PB94-126398] p 2763 N94-26819

Modern photoacoustic spectroscopy problems. Theory and experiment (a review)
[IFTR-41/1993] p 2716 N94-26823

Three dimensional object recognition using a complex autoregressive model
[AD-A274388] p 2995 N94-26829

Calculation of the electromagnetic critical state response of high T(sub c) superconductor tape
[DE94-002894] p 3061 N94-26868

Recursive bundle event structures
[PB94-125275] p 3004 N94-26870

Annual conference on fire research, 1993: Book of abstracts
[PB94-121324] p 2717 N94-26907

Combining logics
[PB94-125242] p 2965 N94-26908

Some aspects of nonlinear discrete-time descriptor systems in economics
[PB94-126653] p 3101 N94-26918

A non-linear mathematical model or finite, periodic rail corrugations
[REPT-93-49] p 2996 N94-26967

Kinetics of 2-pentadecylaniline polymerizations in monolayers: Relationships between experimental data and a new theoretical model
[AD-A274419] p 2754 N94-27080

Research in improved assessment of software reliability
[AD-A274161] p 2968 N94-27140

Numerical Analysis Methods of Surface Cracks
[VTT-PUBS-119] p 2841 N94-27186

UAH mathematical model of the variable polarity plasma ARC welding system calculation
[NASA-CR-193926] p 2824 N94-27221

High resolution studies of sunspots and flux tubes
[NASA-CR-195216] p 3111 N94-27321

Compressibility effects on rotor forces in the leakage path between a shrouded pump impeller and its housing
p 2796 N94-27379

Global barotropic response to a tropical forcing
[NASA-CR-195256] p 2896 N94-27408

A characterization of stable models using a non-monotonic operator
[CWI-CS-R9315] p 2970 N94-27543

Control of a hydrogen/oxygen steam generator
[DLR-FB-93-02] p 2826 N94-27589

Development of hypersonic engine seals: Flow effects of preload and engine pressures
[NASA-TM-106333] p 2826 N94-27599

An unavailability model for errors made during surveillance testing
[DE94-000816] p 2835 N94-27613

Lifetimes of lunar satellite orbits
[NASA-TP-3394] p 2690 N94-27771

Modeling of the coupled magnetospheric and neutral wind dynamos
[NASA-CR-195273] p 2883 N94-27852

Ion-driven permeation of deuterium in metals
[DE94-701104] p 2744 N94-27876

Reanalysis of Mariner 9 UV Spectrometer Data for Ozone, Cloud, and Dust Abundances, and Their Interaction Over Climate Timescales
[NASA-CR-195244] p 3107 N94-27885

A laboratory test on construction of ice domes and their load-carrying capacity p 2884 N94-27966

Numerical assessment of aerodynamic interactions on missiles with transverse jets control
p 2659 N94-28031

Numerical simulation of a powered-lift landing
p 2671 N94-28033

Gas Turbine Engine Transient Behaviour
[VKI-LS-1993-06] p 2828 N94-28043

Transient model applications. 2: Compressor stall modeling methods p 2829 N94-28049

Engine simulation technology p 2829 N94-28051

Landscape dynamics of northeastern forests
[NASA-CR-195272] p 2852 N94-28070

Nonequilibrium radiation and chemistry models for aerocapture vehicle flowfields
[NASA-CR-195706] p 2648 N94-28071

An initial investigation into methods of computing transonic aerodynamic sensitivity coefficients
[NASA-CR-195705] p 2648 N94-28072

A modelling of the noise from simple coaxial jets. Part 3: With hot primary flow
[ISVR-TR-230-PT-3] p 2807 N94-28173

Interaction of the sonic boom with atmospheric turbulence p 2650 N94-28191

The propagation of spark-produced N waves through turbulence p 2650 N94-28193

Performance considerations for the application of the lossless browse and residual model
p 2946 N94-28256

Extraterrestrial accretion and glacial cycles
p 2890 N94-28308

Intertemporal bargaining and dynamic consistency
[PB94-133147] p 3095 N94-28386

Lisp interface to geometric modelling operations
[PB94-133121] p 3001 N94-28398

MATHEMATICAL PROGRAMMING

A logarithmic barrier cutting plane method for convex programming
[REPT-93-43] p 2957 N94-25761

Research on primal-dual interior point algorithms for mathematical programming
[DE94-003982] p 2959 N94-25821

Formal methods for dependable real-time systems
p 2953 N94-26740

The CODE-TOP (COncurrent system DEvelopment using Transformations Of Predicate-transition nets) method: Examples of using it for system architecture specification, software specification, and code generation p 2953 N94-26744

New mixed integer algorithm for classification and placement of measurements in process flow networks
[PB94-126752] p 2966 N94-26921

MATRICES (MATHEMATICS)

Piecewise least squares fitting technique using finite interval method with Hermite polynomials
[VTT-PUBS-135] p 2990 N94-25733

Separable expansions of the NN t-matrix by way of exact half off the energy shell methods
[DE94-601615] p 3015 N94-25890

Matrix near rings and pseudo distributivity
[DE94-601505] p 2992 N94-26366

Parallel matrix transpose algorithms on distributed memory concurrent computers
[DE94-002424] p 2964 N94-26764

Simple currents versus orbifolds with discrete torsion: A complete classification
[NIKHEF-H/93-13] p 2995 N94-26812

Role of anticausal inverses in multirate filter-banks. Part 1: System theoretic fundamentals
[AD-A274279] p 2997 N94-27015

Ma42: A new frontal code for solving sparse unsymmetric systems
[PB94-124302] p 2998 N94-27115

The PRISM project: Infrastructure and algorithms for parallel eigensolvers
[DE94-005125] p 2973 N94-27717

Hessenberg matrices in Krylov subspaces and the computation of the spectrum
[PB94-133170] p 3001 N94-28389

MATRIX MATERIALS

Inner fiber observation for metal matrix composites under the stress load condition utilizing Synchrotron Orbital Radiation (SR) by X-ray CT p 2724 N94-25553

Lunar preform manufacturing p 2765 N94-25677

Characterization of fatigue damage in a metal matrix composite (SCS-6/Ti-15-3) at elevated temperature
[AD-A273797] p 2706 N94-25876

Engineering limitations of ceramic composites for high performance and high temperature applications
[DE94-001676] p 2754 N94-27021

Polyimide/inorganic composite-interpenetrating polymer network for stable second-order nonlinear optics
[AD-A274646] p 2709 N94-27107

Thermoplastic or thermosetting composites in aircrafts
[PB94-123809] p 2710 N94-27253

MATRIX METHODS

Hydroacoustic wave-fields generated by different source types, a computational study
[PB94-123536] p 3010 N94-27037

MATRIX THEORY

Role of anticausal inverses in multirate filter-banks. Part 1: System theoretic fundamentals
[AD-A274279] p 2997 N94-27015

Causal fir matrices with anticausal fir inverses, and application in characterization of biorthonormal filter banks
[AD-A274509] p 2998 N94-27035

MATTER (PHYSICS)

Dibaryon-induced instability of neutron stars
[DE93-634453] p 3103 N94-26046

Rescattering and energy loss of fast partons in nuclear matter
[DE94-002918] p 3018 N94-26145

MAXIMA

Joint essential maximal numerical range
[DE94-603674] p 3000 N94-27637

MAXIMUM ENTROPY METHOD

Quantum statistical inference for density estimation
[DE94-002625] p 3073 N94-26805

MAXIMUM LIKELIHOOD ESTIMATES

Parameter estimation for ARMA models with infinite variance innovations
[AD-A274654] p 3003 N94-26355

Non-adaptive robust filters for speckle noise reduction
[INPE-5519-PRE/1794] p 2776 N94-27335

MAXIMUM PRINCIPLE

Some properties of generalized biregular functions with values in a Clifford algebra
[DE93-613024] p 2991 N94-25881

MAXWELL EQUATION

Reduced Braginskii equations
[DE94-003510] p 3047 N94-27723

Fields and potentials in general uniaxial bianisotropic media I. Axial sources
[PB94-132875] p 2778 N94-28379

Plane wave propagation in an anisotropic chiral medium with isotropic permittivity and permeability
[PB94-133097] p 2778 N94-28384

MCMURDO SOUND
Telepresence in the human exploration of Mars: Field studies in analog environments p 2685 N94-27360
MEAN SQUARE VALUES
An optimal constrained linear inverse method for magnetic source imaging
[DE94-004014] p 2957 N94-25663
Short-range cloud amount forecasting with model output statistics
[AD-A274769] p 2895 N94-26798
An optimal constrained linear inverse method for magnetic source imaging
[DE94-002264] p 2996 N94-26936
MEASURING INSTRUMENTS
Bundle Intensity and Beamgate Length recorder (BIBL)
[DIGEL-1993-7] p 3031 N94-25619
Primary standards laboratory report 1st half 1993
[DE94-003138] p 2762 N94-26027
Lepton masses in an SU(3)(sub L) x U(1)(sub N) gauge model
[DE93-634366] p 3016 N94-26040
Improved measurement accuracy in a Long Trace Profiler: Compensation for laser pointing instability
[DE94-003408] p 2816 N94-26130
Breakwire technique for hypervelocity measurement
[AD-A274779] p 2809 N94-26358
Calibrating/testing meters in hot water test bench VM7
[PB94-124294] p 2812 N94-27160
Trace organic chemical detection using an ultraviolet excitation molecular beam fluorometer
[DE94-002649] p 2704 N94-27708
Energy Dispersive X ray Diffraction (EDXD) apparatus for liquids at high temperature p 2721 N94-28159
MECHANICAL ENGINEERING
The 1991-1992 project summaries
p 2943 N94-25698
MECHANICAL MEASUREMENT
An ultrasonic testing technique for monitoring the cure and mechanical properties of polymeric materials
[AD-A274536] p 2753 N94-26842
MECHANICAL PROPERTIES
Study on high temperature damage control and life improvement p 2729 N94-25580
Continuous fiber reinforced thermoplastic composites: Literature survey
[VTT-TIED-1422] p 2704 N94-25651
Structure and properties of intermetallic composites synthesized in situ using solid state displacement reactions
[DE94-004312] p 2705 N94-25805
Stress relaxation in dough moulding compounds
[PB94-124872] p 2748 N94-25894
An atom probe investigation of the influence of trace impurities on the mechanical behavior of NiAl
[DE94-002797] p 2734 N94-26272
Titanium 1992: Volume 3: Science and technology
[AD-A274800] p 2735 N94-26337
Titanium 1992: Science and technology, volume 2 rence (7th) in san diego, california on june 29-july 2, 1992. Volume 2
[AD-A274799] p 2736 N94-26362
Statistical mechanical properties of Z(N)(sup n-1) broken model
[DE93-634344] p 2993 N94-26457
Investigation of forced and isothermal chemical vapor infiltrated SiC/SiC ceramic matrix composites
[DE94-004544] p 2708 N94-26557
Mechanical properties of nanophase materials
[DE94-004625] p 2751 N94-26594
The influence of weld metal alloying additions to extend the heat input range for the submerged arc welding of high strength steels
[AD-A274284] p 2738 N94-26679
New rubber qualification for the igniter adapter
[NASA-CR-193936] p 2752 N94-26708
Proceedings of the Fourth Euroseminar on Microscopy Applied to Building Materials
[PB94-119807] p 2839 N94-26754
Mechanism of mechanical fatigue of silica glass
[DE94-003165] p 2753 N94-26783
An ultrasonic testing technique for monitoring the cure and mechanical properties of polymeric materials
[AD-A274536] p 2753 N94-26842
Thermoplastic or thermosetting composites in aircrafts
[PB94-123809] p 2710 N94-27253
Researches of the Electrotechnical Laboratory. No. 52: Studies of externally pressurized porous gas bearings
[JTN-94-80549] p 2825 N94-27351
Research into the microstructure and mechanical behavior of eutectic Bi-Sn and In-Sn
[DE94-004558] p 2741 N94-27619
Formation of glassy Pd-Ni-P alloys by mechanical alloying and their structure and thermal stability
p 2746 N94-28168
High Quality Aluminium Castings Conference
[PB94-133592] p 2747 N94-28359
Studies in ice mechanics
[PB94-133055] p 2900 N94-28393
MECHANICAL TWINNING
Deformation twinning: Influence of strain rate
[DE94-002693] p 2738 N94-26621
MEDICAL ELECTRONICS
Monitoring activity with a wrist-worn actigraph: Effects of amplifier passband and threshold variations
[AD-A274705] p 2909 N94-26377
MEDICAL EQUIPMENT
High impact strength poly(lactide) tough biodegradable materials
[ETN-94-95389] p 2747 N94-25748
Development of surgical CW Nd:YAG laser with optical fiber delivery system
[DE93-632902] p 2817 N94-26185
Biomedical polyurethane networks
[ETN-94-95391] p 2750 N94-26211
MEDICAL SCIENCE
Biomedical polyurethane networks
[ETN-94-95391] p 2750 N94-26211
MEDICAL SERVICES
Practice patterns of US Army medical department psychiatrists and psychologists
[AD-A274787] p 2909 N94-26360
The role of hyperbaric oxygen as a prophylaxis for radiation enteritis
[AD-A274974] p 2901 N94-26517
Monograph of the aviation epidemiology data register for calendar year 1988
[AD-A274589] p 2911 N94-26985
The telemedicine spacebridge project: A joint US/Russian venture in long distance medicine via satellite
[NASA-TM-106523] p 2693 N94-27427
MELTING
Liquid and solid solubility of Ag in Bi2Sr2CaCu2O8
[DE94-002829] p 2735 N94-26273
Iron: What is melt?
[DE94-003373] p 2735 N94-26322
Morphology transitions during non-equilibrium growth processes
[ITN-94-85236] p 3065 N94-27243
MELTING POINTS
Iron: What is melt?
[DE94-003373] p 2735 N94-26322
Microspheres for laser velocimetry in high temperature wind tunnel p 2682 N94-27903
Thermal conductivity of liquid carboxylic acids
[ESDU-93017] p 2721 N94-28138
MELTS (CRYSTAL GROWTH)
Study on melted solution stirring under microgravity
p 2730 N94-25585
Nonlinear dynamics and pattern selection at the crystal-melt interface
[DE94-003112] p 3060 N94-26780
Channel model for AC electric arc
[PB94-124591] p 2786 N94-27327
Float zone crystal growth using laser radiation
[DLR-FB-93-10] p 3066 N94-27590
Characterization of semi-insulating gallium arsenide
[AD-A273781] p 3068 N94-27704
MEMBRANES
Gauging of Chern-Simons p-Barnes
[DE94-601553] p 2993 N94-26425
Bulletin of the Institute for Chemical Reaction Science, Tohoku University, volume 2
[JTN-94-80602] p 2717 N94-27385
Development of liquid membrane separation processes p 2717 N94-27386
Effects of high-intensity electric field stimulation on the electromechanical performance of cardiac muscle: Influence of fiber orientation p 2904 N94-27467
On the mechanism of reentrant arrhythmias following DC defibrillation: Influence of fiber orientation to the effects of low-energy electric field stimulation on the effective refractory period of cardiac muscle
p 2904 N94-27468
Development of a 2f optical performance measurement system
[DE94-003489] p 3039 N94-27721
MEMORY
Air traffic controller working memory: Considerations in air traffic control tactical operations
[AD-A273722] p 2664 N94-26197
The central executive component of working memory
[AD-A274295] p 2938 N94-26683
MEMORY (COMPUTERS)
Fast parallel algorithms for short-range molecular dynamics
[DE93-018519] p 3016 N94-26033
Virtual data
[DE94-002718] p 2986 N94-26807
Memory subsystem performance of programs using copying garbage collection
[AD-A274258] p 3099 N94-27014
Memory subsystem performance of programs with intensive heap allocation
[AD-A274122] p 2967 N94-27063
Binary snapshots
[CWI-CS-R9319] p 2955 N94-27547
Parallel computing for probabilistic response analysis of high temperature composites
[NASA-CR-194467] p 2843 N94-27656
Review and analysis of dense linear system solver package for distributed memory machines
p 2978 N94-27916
MENTAL HEALTH
Practice patterns of US Army medical department psychiatrists and psychologists
[AD-A274787] p 2909 N94-26360
Human dimensions research team, operation restore hope
[AD-A274340] p 2939 N94-27056
MENTAL PERFORMANCE
Study on knowledge extraction and systematization for material design p 2727 N94-25568
Extending the rule space model to a semantically-rich domain: Diagnostic assessment in architecture
[AD-A273789] p 2948 N94-25864
A diagnostic classification model for document processing skills
[AD-A273790] p 3096 N94-25925
The use of EEG as a workload assessment tool in flight test
[AD-A274568] p 2910 N94-26847
Task demand, workload, and performance
[PB94-123627] p 2942 N94-27155
Brain wave correlates of attentional states: Event related potentials and quantitative EEG analysis during performance of cognitive and perceptual tasks
p 2940 N94-27901
Symptoms of hypoxia at simulated altitude of 25,000 feet p 2933 N94-27945
MERCURY ISOTOPES
Radiations from hot nuclei p 3030 N94-27915
MERIDIONAL FLOW
Interpreting the implied meridional oceanic energy transport in AMIP
[DE94-001538] p 2898 N94-26072
MESOMETEOROLOGY
Development and testing of the Coupled Ocean/Atmosphere Mesoscale Prediction System (COAMPS)
[AD-A273925] p 2892 N94-25793
Mesoscale meteorological measurements characterizing complex flows
[DE94-002359] p 2895 N94-26761
MESON-NUCLEON INTERACTIONS
Theoretical and computational studies in intermediate energy nuclear physics
[DE94-004177] p 3012 N94-25800
A dependence of exclusive vector meson production in muon-nucleus scattering
[DE94-003363] p 3016 N94-25957
Proceedings of the workshop on (pi), K, (eta)-nucleon interactions
[DE94-701314] p 3027 N94-27733
MESONS
Quark-antiquark bound states
[DE93-613054] p 3013 N94-25826
Weak interactions in a bilocal chiral theory
[DE93-613097] p 3013 N94-25836
Algorithms of the vertex coordinate reconstruction for straight tracks of short-lived particles
[DE93-616661] p 3015 N94-25919
Heavy quark production and spectroscopy
[DE94-003619] p 3015 N94-25935
Meson X(1814) as a candidate for a hybrid state
[DE93-634447] p 3017 N94-26045
Mesons and diquarks in a NJL-model at finite temperature and chemical potential
[DE93-634375] p 3020 N94-26505
Signatures for hybrids
[DE94-004244] p 3020 N94-26574
Measuring the time dependence of B(sub s)(sup 0) meson - anti B(sub s)(sup 0) meson oscillations
[ISBN-0-315-84367-5] p 3021 N94-26665
Light-quark, heavy-quark systems: An update
[DE94-002298] p 3021 N94-26759
Leptonic decay constants of heavy mesons in QCD
[DE93-634426] p 3022 N94-26767
Low-energy hadronic interactions beyond the current algebra approach
[DE94-602600] p 3022 N94-26900
Meson spectroscopy and particle astrophysics
[DE94-001799] p 3115 N94-27003

Measurements of the B(sup 0)(bar B)(sup 0)CP asymmetry
[DE94-003379] p 3063 N94-27047

Charmonium physics at a tau-charm factory
[PB94-124344] p 3024 N94-27199

Observation of excited charmed mesons
[ISBN-0-315-57014-8] p 3026 N94-27400

Weak hadronic decays of heavy flavor mesons
[ISBN-0-315-55542-4] p 3026 N94-27402

Indiana University high energy physics, task A
[DE94-000961] p 3033 N94-27614

Decay constants of heavy mesons in the relativistic potential model with velocity dependent corrections
[DE94-606495] p 3030 N94-27860

MESOSCALE PHENOMENA

Development and testing of the Coupled Ocean/Atmosphere Mesoscale Prediction System (COAMPS)
[AD-A273925] p 2892 N94-25793

A modeling study of the mesocyclone
[AD-A274889] p 2893 N94-26168

Mesoscale frontal evolution of the ERICA IOP-5A Cyclone
[AD-A274906] p 2893 N94-26183

A preliminary analysis of the US west climatology
[DE94-003028] p 2894 N94-26313

Investigation of mesoscale convective cloud clusters in South China
[AD-A274303] p 2895 N94-26678

Mesoscale meteorological measurements characterizing complex flows
[DE94-002359] p 2895 N94-26761

MESOSPHERE

Photochemical processes and the atmospheric airglow emissions of OH and Na in the mesospheric region
[INPE-5380-PUD/050] p 2882 N94-27334

MESSAGE PROCESSING

Interface technical specification of the V.25 bis emulator
[AD-A273754] p 2948 N94-25720

Programming in Fortran M
[DE94-002756] p 2963 N94-26407

An efficient communication scheme for solving the S(sub n) equations on message-passing multiprocessors
[DE94-000378] p 2769 N94-26482

Example of the EXPANSE signalling protocol
[PB94-125283] p 2771 N94-26872

Communication on the Paragon
[DE94-003103] p 2983 N94-27713

MESSAGES

A doubly logarithmic communication algorithm for the Completely Connected Optical Communication Parallel Computer
[DE93-019408] p 2980 N94-26473

METABOLIC DISEASES

Modulation by galactosamine-induced hepatitis of biological responses of the rat exposed to high altitude hypoxia p 2904 N94-27464

Protective action of an amiloride derivative (amiloride, 5-(N, N-dimethyl) hydrochloride) against in isolated ischemia/reperfusion newborn rabbit hearts
p 2904 N94-27466

METAL BONDING

Joining of fibre reinforced metal matrix composite materials
[PB94-132453] p 2712 N94-28376

METAL CLUSTERS

Peculiarities and application perspectives of metal-ion implants in glasses
[DE94-004671] p 3035 N94-26246

METAL COATINGS

Hydrogen trapping with Pd coated alloy films
p 2723 N94-25551

Issues for conversion coating of aluminum alloys with hydrotalcite
[DE94-003804] p 2732 N94-25819

Comparison of technology for high-power laser mirrors and synchrotron radiation mirrors
[DE94-002913] p 3035 N94-26276

Vapor deposition of copper on stainless steel 304L
[DE94-001945] p 2740 N94-27006

METAL FATIGUE

Interactions between corrosion fatigue and stress corrosion crack on steel for light water reactors
p 2722 N94-25547

Study on variation of damage generation mechanism by fatigue on TiAl compounds due to different slip systems p 2729 N94-25579

Study on evaluation of crack generation and crack growth behaviors under static loading at high temperature and under combined loading p 2730 N94-25583

Study on fatigue crack propagation characteristics around welded joint interface in complexed conditions
p 2730 N94-25584

An experimental study on the effects of compressive stress on the fatigue crack growth of low-alloy steel
[DE94-004447] p 2737 N94-26582

Status and prospects for aluminium-lithium alloys in aircraft structures
[NLR-TP-92193-U] p 2743 N94-27797

An experimental investigation of fatigue damage in aluminum 2024-T3 alloys p 2747 N94-27900

The transition from stress corrosion cracking to corrosion fatigue in AA-7075 and AA-8090
[ISBN-0-315-59526-4] p 2744 N94-27950

Fatigue propagation behaviour of short cracks (1-2 mm) in steels
[ESDU-93033] p 2845 N94-28145

METAL FIBERS

Impact tests on fibre metal laminates under a tensile load
[PB94-126570] p 2710 N94-27201

METAL FILMS

Study on alloy films for hydrogen separation
p 2726 N94-25565

Study on substance diffusion in thin films with controlled structures p 2727 N94-25570

The formation of conducting gold films by thermal decomposition and direct patterning using electron beam lithography of the gold cluster Au55P(C6H5)312C16
[AD-A273720] p 2749 N94-26074

Chemical vapor deposition and characterization of tungsten boron alloy films
[DE94-002648] p 2738 N94-26610

METAL FOILS

Reference electrodes for solid polymer electrolytes
[DE94-004583] p 2780 N94-25806

METAL FUELS

An apparatus for measurement of ignition and burning characteristics of metallic particles
[AD-A274815] p 2716 N94-26487

Nonswelling behavior of HT9 alloy irradiated to high exposure
[DE94-003502] p 2736 N94-26522

METAL HALIDES

Structure of ionic fluids in equilibrium with a microporous ionic matrix
[DE94-600563] p 2715 N94-26391

METAL HYDRIDES

Lighter alkali hydride and deuteride 1: Electronic properties of pure solids
[DE93-616188] p 3051 N94-25914

Development of nickel-metal hydride cell: An update
p 2864 N94-28130

Ni-MH storage test and cycle life test
p 2864 N94-28131

Determination of thermal properties of commercial Ni-MH cells p 2864 N94-28132

METAL IONS

Peculiarities and application perspectives of metal-ion implants in glasses
[DE94-004671] p 3035 N94-26246

Structure of ionic fluids in equilibrium with a microporous ionic matrix
[DE94-600563] p 2715 N94-26391

Microstructures of Si surface layers implanted with Cu
[DE94-004690] p 3058 N94-26565

Modulation wavelength dependence of ion mixing in metallic superlattices
[DE94-004608] p 3059 N94-26591

Secondary electron emission from copper surface due to neodymium and gadolinium ion bombardment
[DE94-701115] p 3027 N94-27718

Hypersensitive transition spectrum of f-element and coordination structure
[DE94-604133] p 3070 N94-27843

Property enchancement of polyimide films by way of the incorporation of lanthanide metal ions
p 2758 N94-27926

METAL MATRIX COMPOSITES

Bulletin of National Research Institute for Metals in Fiscal Year 1993, no. 14
[REPT-14] p 2722 N94-25544

Inner fiber observation for metal matrix composites under the stress load condition utilizing Synchrotron Orbital Radiation (SR) by X-ray CT p 2724 N94-25553

Investigation of compressive behavior for metal matrix composites with a circular hole
[AD-A273835] p 2705 N94-25739

Structure and properties of intermetallic composites synthesized in situ using solid state displacement reactions
[DE94-004312] p 2705 N94-25805

Characterization of fatigue damage in a metal matrix composite (SCS-6/Ti-15-3) at elevated temperature
[AD-A273797] p 2706 N94-25876

Numerical simulations of interfacial debonding in ductile-phase reinforced intermetallic matrix composites
[DE94-003639] p 2706 N94-25938

An investigation of cavitation in a mechanically alloyed 15 volume percent SiCp/IN9021 aluminum composite
[DE94-003371] p 2748 N94-25959

General Motors Corporation and Pacific Northwest Laboratory staff exchange: Inspection of case hardened steels and metal-matrix composites
[DE94-003470] p 2706 N94-25982

Investigation of tension-compression fatigue behavior of a cross-ply metal matrix composite at room and elevated temperatures
[AD-A273731] p 2706 N94-25999

Effects of post-fabrication processing on the tensile properties of centrifugally cast SiC particulate reinforced aluminum composites
[AD-A274865] p 2707 N94-26190

Titanium 1992: Volume 3: Science and technology
[AD-A274800] p 2735 N94-26337

Bimaterial interfaces and their role in the mechanical performance of the in-situ composites
[AD-A274688] p 2707 N94-26447

Processing and mechanical properties of laminated metal composites of Al 6090-25 volume percent SiC(sub p) and Al 5182
[DE94-001070] p 2708 N94-26930

Development of fibre-metal laminates, ARALL and GLARE, new fatigue resistant materials
[PB94-126471] p 2669 N94-26969

Interface phenomena in metal-ceramic composites
[AD-A274167] p 2709 N94-27125

Impact tests on fibre metal laminates under a tensile load
[PB94-126570] p 2710 N94-27201

High intensity x ray instrumentation for residual strain measurements in composites and textured materials
[ISBN-0-315-85169-4] p 2842 N94-27278

SP/MSP tests for the evaluation of FGM
[NAL-SP-17] p 2710 N94-27279

SP/MSP tests for the evaluation of FGM
p 2710 N94-27280

Research on the development of fracture characteristics evaluation system for ceramics and metal composite materials p 2710 N94-27281

Hot deformation behaviour of Si(p)/Al composites and their matrices and an Al-Mg-Si alloy
[ISBN-0-315-84699-2] p 2711 N94-27314

Finite element analysis of damped vibrations of laminated composite plates
[ISBN-0-315-84928-2] p 2843 N94-27585

A hydrostatic stress-dependent anisotropic model of viscoplasticity
[NASA-TM-106525] p 2711 N94-27640

Implementation of thermal residual stresses in the analysis of fiber bridged matrix crack growth in titanium matrix composites
[NASA-TM-109082] p 2711 N94-27658

The deformation of copper-tungsten composites
[ISBN-0-315-84939-8] p 2712 N94-27688

Low strain behaviour of a particulate reinforced aluminum alloy
[ISBN-0-315-84906-1] p 2744 N94-27961

Joining of fibre reinforced metal matrix composite materials
[PB94-132453] p 2712 N94-28376

METAL NITRIDES

Study on microscopic structural controls and electronic properties at material surfaces by ion beams
p 2727 N94-25571

Mechanistic studies of opto-electronic materials and syntheses using multiple laser and surface diagnostics
[AD-A274528] p 3036 N94-26834

METAL OXIDE SEMICONDUCTORS

Object imaging accomplished with an integrated circuit robotic tactile sensor incorporating a piezoelectric polyvinylidene fluoride thin film
[AD-A274038] p 2780 N94-25845

Demonstration of monolithic co-fabrication of Y1Ba2Cu3O7-Sigma and CMOS devices on the same sapphire substrate
[AD-A274757] p 3059 N94-26566

The analysis of thermal and 1/F noise in MOS devices, circuits and systems
[ISBN-0-315-57811-4] p 2787 N94-27642

A study of DC-DC converters with MCT's for arcjet power supplies
[NASA-CR-191204] p 2703 N94-27662

METAL OXIDES

Reference electrodes for solid polymer electrolytes
[DE94-004583] p 2780 N94-25806

Studies of thin-film growth, adsorption, and oxidation by in situ, real-time, and ex situ ion beam analysis
[DE94-002907] p 3055 N94-26275

Ion implantation and dynamic recovery of tin-doped indium oxide films
[DE94-001126] p 3062 N94-26932

METAL PARTICLES
An apparatus for measurement of ignition and burning characteristics of metallic particles
[AD-A274815] p 2716 N94-26487
METAL PLATES
Unsegmented electromagnetic calorimeter prototype. Energy and coordinate resolution
[DE93-634185] p 2810 N94-26396
Evaluation of crack arrest fracture toughness of parent plate, weld metal and heat affected zone of BIS 812 EMA ship plate steel
[AD-A274871] p 2839 N94-26859
The influence of TIG welding thermal cycles on HSLA-100 steel plate
[AD-A274248] p 2740 N94-27009
Aluminum alloy 8090-T8771 thick plate material characterization
[AD-A274146] p 2987 N94-27077
METAL POWDER
Material optimization and manufacturing development of reduced cost powder metal titanium alloy components for gas turbine engine application, phase 2
[AD-A274410] p 2709 N94-26978
METAL SHEETS
On experimental studies of yield surfaces of metals: A more general approach
[IFTR-42/1993] p 2739 N94-26824
Production of an amorphous Fe(75)Si(10)B(15) sheet by a metallic mold casting method and its properties
p 2746 N94-28170
METAL SURFACES
Observation on metal surface in aqueous solution using an electrochemical Scanning Tunneling Microscope (STM) p 2724 N94-25554
Study on interfacial reaction analysis at interfacial joining p 2728 N94-25574
Atomic-scale chemistry of metal surfaces
[REPT-A-2657] p 3012 N94-25636
Binding of copper and nickel to cavities in silicon formed by helium ion implantation
[DE94-003769] p 3050 N94-25814
A mimic model of Pt-Rh catalyst prepared by electrochemical deposition of Rh on Pt (100) surface
[REPT-A-2664] p 2715 N94-26476
An investigation of the effect of surface impurities on the adsorption kinetics of hydrogen chemisorbed onto iron
[NASA-CR-195213] p 2716 N94-26643
Stability of reference masses 2: The effect of environment and cleaning methods on the surfaces of stainless steel and allied materials
[NPL-DMM(A)-95] p 2738 N94-26653
On experimental studies of yield surfaces of metals: A more general approach
[IFTR-42/1993] p 2739 N94-26824
Secondary electron emission from copper surface due to neodymium and gadolinium ion bombardment
[DE94-701115] p 3027 N94-27718
Image potential of a tunnelling electron moving near two different metals
[DE94-603657] p 3069 N94-27819
METAL VAPORS
Hook spectroscopy as an atomic number density diagnostic applied to laser-ablated copper plasmas
[DE94-002645] p 3042 N94-26081
METAL WORKING
Titanium 1992: Volume 3: Science and technology
[AD-A274800] p 2735 N94-26337
Titanium 1992: Science and Technology, volume 1
[AD-A274798-VOL-1] p 2739 N94-26799
METAL-GAS SYSTEMS
Exploratory Technology Research Program for Electrochemical Energy Storage
[DE94-003479] p 2781 N94-26047
METAL-METAL BONDING
Method of bonding molybdenum to steel
[AD-D016079] p 2747 N94-28187
METAL-WATER REACTIONS
Fundamental study on monitoring technology on local surface damages p 2724 N94-25555
METALLIC GLASSES
Detection of low-intensity magnetic fields with a magnetostrictive fiber optic sensor
[AD-A274120] p 3037 N94-27062
METALLIC PLASMAS
Hook spectroscopy as an atomic number density diagnostic applied to laser-ablated copper plasmas
[DE94-002645] p 3042 N94-26081
METALLIZING
Experimental determination of the CU-IN-PB ternary phase diagram
[DE94-003765] p 2735 N94-26349
METALLOGRAPHY
Upset welding process for 21-6-9 spherical vessels
[DE93-018194] p 2832 N94-28229
METALLOIDS
List of papers published by the members of Institute for Materials Research, Tohoku University 1992
[JTN-94-80608] p 3118 N94-27355
METALLURGY
COMPETENCE 2000: Study on training requirements of the Norwegian metallurgical industry
[PB94-124609] p 2741 N94-27328
METALORGANIC CHEMICAL VAPOR DEPOSITION
Ordering and phase separation in MOCVD InGaP alloys and unicompositional quantum wells
[DE94-004693] p 3056 N94-26352
Mechanistic studies of opto-electronic materials and syntheses using multiple laser and surface diagnostics
[AD-A274528] p 3036 N94-26834
Nitride semiconductors for ultraviolet detection
[AD-A274246] p 3060 N94-26840
High-efficiency, thin-film solar cells
[DE94-000250] p 2860 N94-27625
Electro-optic materials by solid source MOCVD
[DE94-005120] p 2757 N94-27716
METALS
Knowledge base systems for chemical compounds designing support p 2723 N94-25550
Study on analyzing method establishment for metallic material development p 2729 N94-25578
Study on elucidation of damage generation process by electron beam lithography p 2729 N94-25581
The effectiveness of AMT investment in UK metal component manufacture
[IND-MANU-SCI-TECH-REPT-3] p 2762 N94-25775
Debye-Waller factors of the light actinide metals
[DE94-000685] p 2733 N94-26069
Power laws, flicker noise, and the barkhausen effect
[AD-A274702] p 3008 N94-26376
Template synthesis of metal microtubule ensembles utilizing chemical, electrochemical, and vacuum deposition techniques
[AD-A274676] p 2715 N94-26444
A new materials data compilation can help in actinide phase-diagram research
[DE94-000797] p 3058 N94-26514
Mechanical properties of nanophase materials
[DE94-004625] p 2751 N94-26594
Technical report of ISSP. Ser. A, no. 2679: Novel electronic states of partially deuterated (DMe-DCNQI)2Cu
[JTN-94-80565] p 3064 N94-27175
Resonant holographic measurements of laser ablation plume expansion in vacuum and argon gas backgrounds
[DE94-001407] p 2813 N94-27615
Image potential of a tunnelling electron moving near two different metals
[DE94-603657] p 3069 N94-27819
METASTABLE ATOMS
Measurement of metastable population distribution in gadolinium atomic beam by laser resonance photoionization method
[DE94-701194] p 3029 N94-27820
METASTABLE STATE
Collaborative research on ion implantation of ceramics
[DE93-019177] p 2749 N94-26080
Recombination and metastability in amorphous silicon and silicon germanium alloys
[DE94-000237] p 2736 N94-26481
Dynamics of metastable states in supersonic beams
[ITN-94-85232] p 3028 N94-27760
Measurement of metastable population distribution in gadolinium atomic beam by laser resonance photoionization method
[DE94-701194] p 3029 N94-27820
METEOR TRAILS
Meteor Burst Communications (MBC) throughput improvement tests
[AD-A273941] p 2767 N94-25990
METEORITE COLLISIONS
Impacts, extinctions, volcanism, glaciations, and tectonics: Matches and mismatches
p 2888 N94-28298
Science observed: The mass-extinction debates
p 2888 N94-28300
Consequences of impacts of small asteroids and comets with Earth p 2889 N94-28301
An extraterrestrial event at the tertiary-quaternary boundary p 2890 N94-28309
METEORITE CRATERS
Some implications of large impact craters and basins on Venus for terrestrial ringed craters and planetary evolution p 2890 N94-28306
METEORITIC COMPOSITION
Experimental study of lunar and SNC (Mars) magmas
[NASA-CR-195274] p 3107 N94-27850
Extraterrestrial accretion and glacial cycles
p 2890 N94-28308
An extraterrestrial event at the tertiary-quaternary boundary p 2890 N94-28309
METEORITIC DAMAGE
Consequences of impacts of small asteroids and comets with Earth p 2889 N94-28301
Were all extinction events caused by impacts?
p 2891 N94-28311
METEORITIC DIAMONDS
A general theory of impacts and mass extinctions, and the consequences of large-body impact on the Earth
p 2891 N94-28310
METEOROID CONCENTRATION
Extraterrestrial accretion and glacial cycles
p 2890 N94-28308
METEOROID SHOWERS
Low noise measurements in an RF environment
[AD-A273813] p 2767 N94-25960
Meteor Burst Communications (MBC) throughput improvement tests
[AD-A273941] p 2767 N94-25990
Performance statistics bulletin: High altitude meteor scatter propagation, August, September, October 1989
[AD-A274455] p 2773 N94-27085
METEOROLOGICAL CHARTS
Investigation of mesoscale convective cloud clusters in South China
[AD-A274303] p 2895 N94-26678
METEOROLOGICAL PARAMETERS
A preliminary analysis of the US west climatology
[DE94-003028] p 2894 N94-26313
Radar detection of low-altitude targets in a maritime environment. Volume 2: Meteorological and radar data
[AD-A274658] p 2768 N94-26335
Analysis and interpretation of the meteorology of the 1988 coastal transition zone experiment
[AD-A274710] p 2894 N94-26431
Overall analysis of meteorological information in the Daeduk nuclear complex
[DE93-632594] p 2894 N94-26469
Analysis of the influence of weather on infrared imagery
[FEL-92-A421] p 3036 N94-26649
Mesoscale meteorological measurements characterizing complex flows
[DE94-002359] p 2895 N94-26761
Surface roughness lengths
[AD-A274550] p 2895 N94-26846
Kiruna geophysical data. Data summary 93/4-6, April-June 1993
[PB94-123700] p 2881 N94-27039
Kiruna geophysical data. Data summary 93/1-3, January-March, 1993
[PB94-123791] p 2881 N94-27043
Meteorological data at the Nagaoka Institute of Snow and Ice Studies
[REPT-158] p 2896 N94-27169
The validation of ATSR measurements with in situ sea temperatures
[DE94-003195] p 2852 N94-27875
Report of the National Research Institute for Earth Science and Disaster Prevention, No. 51
[JTN-94-80509] p 2886 N94-27985
Development of a method for predicting snowfall intensity and compacted snow on roads
p 2853 N94-27990
Conception of snow information network system in Yamagata Prefecture p 2853 N94-27991
Research activities on the meteorology over the Asia-Pacific region p 2853 N94-28271
METEOROLOGICAL RADAR
Machine intelligent gust front algorithm
[AD-A273695] p 2680 N94-26196
Radar detection of low-altitude targets in a maritime environment. Volume 2: Meteorological and radar data
[AD-A274658] p 2768 N94-26335
Cloud liquid water content measurement tests using dual-wavelength radar
[PB94-125960] p 2896 N94-26959
Encoding approaches for data link transmission of weather graphics
[AD-A274497] p 2772 N94-26963
METEOROLOGICAL SATELLITES
A preliminary method for atmospheric soundings in real time using satellite and ground-based remotely sensed data
[AD-A274381] p 2880 N94-26828
METEOROLOGY
Developing prediction regions for a time series model for hurricane forecasting
[AD-A273777] p 2892 N94-25861
The effect of elevation data representation on nocturnal drainage wind simulations
[DE94-003624] p 2892 N94-25936
Active layer dynamics and arctic hydrology and meteorology
[DE94-001724] p 2892 N94-25951
Testbed model and data assimilation for ARM
[DE94-000432] p 2893 N94-26082

A preliminary analysis of the US west climatology
[DE94-003028] p 2894 N94-26313
Overall analysis of meteorological information in the Daeduk nuclear complex
[DE93-632594] p 2894 N94-26469
Recent ASCOT experiments in multi-layered flows
[DE94-002360] p 2880 N94-26762
Surface roughness lengths
[AD-A274550] p 2895 N94-26846
Atmospheric science research in Malaysia: Perspectives on international cooperation p 2874 N94-28285

METHAMPHETAMINE
Effects of methamphetamine on vigilance and tracking during extended wakefulness
[AD-A274896] p 2909 N94-26179

METHANATION
CO2 methanation catalysts prepared from amorphous Ni-valve metal alloys containing platinum group elements
p 2745 N94-28166

METHANE
Methane emissions from natural wetlands
[DE93-040796] p 2865 N94-25790
Implications of policies and prevent climate change for future food security
[DE93-018872] p 2866 N94-25948
A conceptual framework for the evaluation of cost-effectiveness of projects to reduce GHG emissions and sequester carbon
[DE93-040448] p 2867 N94-26419
Laser probes of natural gas ignition chemistry
[PB94-128345] p 2717 N94-27226
Basic research on natural gas combustion phenomena
[PB94-129046] p 2717 N94-27256
The electrocatalytic oxidation of ethylene and methane, and reduction of oxygen on gas-diffusion electrodes made of amorphous nickel-valve metal-platinum group metal alloys p 2722 N94-28165

METHOD OF MOMENTS
Numeric solution of the electric field integral equation using Galerkin's method for axially symmetric cases
[ESA-TT-1264] p 2768 N94-26315
Computer program for numerical evaluation of the performance of an overmoded TM01 circular to TE10 rectangular waveguide mode converter
[AD-A274548] p 2771 N94-26844
A jet calculus approach including coherence effects and the associated problem of moment inversion
[ISBN-0-315-51715-8] p 3025 N94-27266
Hybrid techniques for complex aerospace electromagnetics problems p 2779 N94-27894

METHOXY SYSTEMS
Preparation, characterization, and thermal behaviour study of lanthanides (3) and yttrium (3) 4-methoxy benzylidene pyruvate in solid state
[DE94-604079] p 3068 N94-27697

METHYL ALCOHOL
Feasibility study on introduction of transportation-use petroleum substitution energy
[DE94-725205] p 2759 N94-26905

METHYL COMPOUNDS
Effects of plastic media blasting on aircraft skin
[AD-A274817] p 2668 N94-26488
Basic research on natural gas combustion phenomena
[PB94-129046] p 2717 N94-27256
Novel oxidizing reagents derived from elemental fluorine
[ITN-94-85231] p 2719 N94-27687
New monomers for high performance polymers
p 2758 N94-27904

METHYL POLYSILOXANES
Sol-gel derived silica/siloxane composite materials: The effect of loading level and catalyst activity on silica domain formation
[DE94-002734] p 2712 N94-27710

METROLOGY
An exploratory survey of methods used to develop measures of performance
[AD-A273945] p 2834 N94-25896

MICE
Compaction-like blastomere aggregation caused by 1-oleoyl-2-acetylglycerol in mouse embryos: An electron microscopic observation p 2905 N94-27487

MICROANALYSIS
Study of the homogeneity of InP wafers
[AD-A273658] p 3055 N94-26194
Determination of lead isotope ratios in seawater by purge and trap GC/MS after ethylation p 2870 N94-28152

MICROBEAMS
He(+) and H(+) microbeam damage, swelling and annealing in diamonds
[DE94-601912] p 3063 N94-26987

MICROBIOLOGY
Microbiology research at some research institutes in the former Soviet Union: A survey of scientific publications
[PB94-123320] p 2902 N94-27171

MICROBURSTS (METEOROLOGY)
The relationship of an integral wind shear hazard to aircraft performance limitations
[NASA-TM-109080] p 2677 N94-26593
A data fusion algorithm for multi-sensor microburst hazard assessment p 2641 N94-27287
Investigation of air transportation technology at Princeton University, 1992-1993 p 2643 N94-27294
Optimal nonlinear estimation for aircraft flight control in wind shear p 2643 N94-27296

MICROCLIMATOLOGY
An overview of the ASCOT program
[DE94-004356] p 2869 N94-27601

MICROCOMPUTERS
The Hough transform algorithm for sea ice lead analysis: An evaluation
[AD-A274535] p 2899 N94-26853

MICROCRACKS
Characterization of fatigue damage in a metal matrix composite (SCS-6/Ti-15-3) at elevated temperature
[AD-A273797] p 2706 N94-25876
The fracture behavior of a CVD crystalline Si3N4/amorphous Si3N4 composite
[DE94-002646] p 2750 N94-26124

MICROCRYSTALS
Prometheus in space: Research Committee on Functional New Material
[JTN-94-80580] p 2761 N94-28002

MICROELECTRONICS
Solid state research
[AD-A274063] p 3049 N94-25645
Advanced qualification techniques
[DE94-003709] p 2780 N94-25812
A general purpose I(sub DDQ) measurement circuit
[DE94-002733] p 2781 N94-25977
The National Center for Advanced Information Components Manufacturing: Program update
[DE94-002647] p 2960 N94-26118
Experimental determination of the CU-IN-PB ternary phase diagram
[DE94-003765] p 2735 N94-26349
The 12-channel flash-ADC FASTBUS module
[DE93-634229] p 2783 N94-26380
Signal amplifier-shapers for multiwire detectors
[DE93-634171] p 2783 N94-26438
Diagnostics and microelectronics
[DE94-003016] p 2784 N94-26777
Generalized emulation microcircuit program
[AD-A274749] p 2785 N94-26797
Center for space microelectronics technology
[NASA-CR-195282] p 2786 N94-27574
Micro-electron deflector
[AD-D016055] p 2787 N94-27672
Opportunities for High Aspect Ratio Micro-Electro-Magnetic-Mechanical Systems (HAR-MEMMS) at Lawrence Berkeley Laboratory
[DE94-003499] p 2827 N94-27722

MICROGRAVITY
Study on melted solution stirring under microgravity
p 2730 N94-25585
Autonomous support for microorganism research in space p 2903 N94-25672
Bioregenerative system components for microgravity
p 2903 N94-25673
First lunar outpost p 2943 N94-25694
Microgravity ignition experiment p 2761 N94-25707
Risks and issues in fire safety on the Space Station
[NASA-TM-106430] p 2692 N94-27436
Annals of the Research Inst. of Environmental Medicine, Nagoya Univ., volume 44
[REPT-44-VOL-44] p 2911 N94-27442
Changes in circadian variations of urine excretion in tail-suspended rats p 2911 N94-27443
Endocrinological evaluations of muscle and bone atrophy in tail-suspended rats p 2903 N94-27444
Changes in fluid and electrolyte metabolism during water immersion at high or thermoneutral temperature
p 2912 N94-27445
Study on posture control and adaption mechanism under weightlessness: Results of second rehearsal for space experiment using carp p 2912 N94-27446
The mechanism of caloric nystagmus under microgravity. 1: Changes of endolymphatic pressure in the semicircular canal of pigeon by caloric stimulation
p 2914 N94-27457
Comparative measurement of visual stability in cosmic space: Onboard experiment and pre-flight activities
p 2916 N94-27463
Thermocapillary flow with evaporation and condensation and its effect on liquid retention in low-G fluid acquisition devices
[NASA-TP-3463] p 2797 N94-27639
Construction and test of experiment hardware for a space experiment on Spacelab mission IML-2
[DLR-FB-93-23] p 2903 N94-27743
Gravity dependence or pressure drop and heat transfer in straight two-phase heat transport system condenser ducts
[NLR-TP-92167-U] p 2798 N94-27853
An analysis of the loads applied to a heavy Space Station rack during translation and rotation tasks
[NASA-TM-104790] p 2697 N94-28183
Workshop on Countering Space Adaptation with Exercise: Current Issues
[NASA-CP-3252] p 2934 N94-28361
Exercise detraining: Applicability to microgravity
p 2934 N94-28364
Weightlessness and the human skeleton: A new perspective p 2935 N94-28368
The use of biomechanics in the study of movement in microgravity p 2936 N94-28373
Psychophysiology in microgravity and the role of exercise p 2936 N94-28374

MICROHARDNESS
The fracture behavior of a CVD crystalline Si3N4/amorphous Si3N4 composite
[DE94-002646] p 2750 N94-26124
The influence of TIG welding thermal cycles on HSLA-100 steel plate
[AD-A274248] p 2740 N94-27009

MICROINSTRUMENTATION
Diagnostics and microelectronics
[DE94-003016] p 2784 N94-26777
Opportunities for High Aspect Ratio Micro-Electro-Magnetic-Mechanical Systems (HAR-MEMMS) at Lawrence Berkeley Laboratory
[DE94-003499] p 2827 N94-27722

MICROMACHINING
Diagnostics and microelectronics
[DE94-003016] p 2784 N94-26777

MICROMECHANICS
A nonlinear three-dimensional micromechanics model for fiber-reinforced laminated composites
[AD-A273772] p 2705 N94-25857
Computer modelling of cyclic deformation of high-temperature materials
[AD-A274504] p 2840 N94-27034
Deformation, constitutive behavior, and damage of advanced structural materials under multiaxial loading
[AD-A274165] p 2709 N94-27142

MICROORGANISMS
Autonomous support for microorganism research in space p 2903 N94-25672
Journal of NIRE, volume 2, number 4
[JTN-94-80554] p 2869 N94-28147
Collaboration of chemical oxidation and biological treatment for removal of refractory organic substances
p 2870 N94-28149
Treatment of refractory organic substances with combined use of chemical oxidation and biological treatment. Part 2: Biodegradability of ozonation products of chlorophenol p 2870 N94-28151

MICROPARTICLES
Microspheres for laser velocimetry in high temperature wind tunnel p 2682 N94-27903

MICROPHONES
High temperature sensor/microphone development for active noise control
[NASA-CR-195214] p 2812 N94-27214

MICROPOROSITY
Structure of ionic fluids in equilibrium with a microporous ionic matrix
[DE94-600563] p 2715 N94-26391
Template synthesis of metal microtubule ensembles utilizing chemical, electrochemical, and vacuum deposition techniques
[AD-A274676] p 2715 N94-26444

MICROPROCESSORS
Low-cost photovoltaic inverters incorporating application-specific integrated circuits
[DE94-003270] p 2856 N94-26463
Development of a MIL-STD-1750 microprocessor system for space applications p 2949 N94-26715
High performance flight computer developed for deep space applications p 2949 N94-26718
Fault tolerant real-time processing system for space use p 2949 N94-26720
NASA's spacecraft data system p 2950 N94-26723
Arithmetic performances of onboard computers
p 2952 N94-26738
Microprocessor chip incorporating optical signal coupling transceiver
[AD-D016077] p 2788 N94-28186

MICROSCOPY
Detecting actin fibers in cell images using minimal spanning trees
[AD-A273914] p 2984 N94-25591
Regrowth zones in laser annealed radiation damaged diamond
[DE94-600821] p 3056 N94-26364

Proceedings of the Fourth Euroseminar on Microscopy Applied to Building Materials
[PB94-119807] p 2839 N94-26754
High definition Raman microscopic imaging
[DE94-003158] p 2716 N94-26781
The x ray holographic microscopy using the atomic-force microscope
[DE94-004003] p 2814 N94-27779

MICROSTRIP DEVICES
Temperature dependence of the radiation induced change of depletion voltage in silicon PIN detectors
[DE94-002705] p 3052 N94-25972
Gamma Large Area Silicon Telescope (GLAST): Applying silicon strip detector technology to the detection of gamma rays in space
[DE94-003451] p 3116 N94-27740

MICROSTRUCTURE
Study on microscopic structural controls and electronic properties at material surfaces by ion beams
p 2727 N94-25571
Study on production of materials with one direction solidification texture p 2727 N94-25572
Study on solidification of non-homogeneous melting/solidification materials p 2728 N94-25573
Study on interfacial reaction analysis at interfacial joining p 2728 N94-25574
Study on elucidation of damage generation process by electron beam lithography p 2729 N94-25581
Computer modelling of cyclic deformation of high-temperature materials
[AD-A273852] p 2704 N94-25608
Langmuir-Blodgett film of amylose-esters and chiral azo-dyes (structure and second order nonlinear optical behaviour)
[ETN-94-95390] p 2747 N94-25749
Microstructural development in low activation ferritic alloys irradiated to 200 dpa at 420 C
[DE94-004269] p 2731 N94-25803
Radiation hardening effects on localized deformation and stress corrosion cracking of stainless steels
[DE94-004308] p 2731 N94-25804
Structure and properties of intermetallic composites synthesized in situ using solid state displacement reactions
[DE94-004312] p 2705 N94-25805
Grain boundary degradation of YBCO superconductors sintered in CO2-containing atmospheres
[DE94-003206] p 3053 N94-26029
Modeling defect production in high energy collision cascades
[DE94-003810] p 3017 N94-26049
Collaborative research on ion implantation of ceramics
[DE93-019177] p 2749 N94-26080
Influence of grain structure and solute composition on the work hardening behavior of aluminium at cryogenic temperatures
[DE94-003415] p 2733 N94-26087
The fracture behavior of a CVD crystalline Si3N4/amorphous Si3N4 composite
[DE94-002646] p 2750 N94-26124
Zr-rich corner of the Zr-Sn-O diagram
[DE93-633764] p 2734 N94-26161
The study of single-pass GMA welds with different cover gas compositions on HSLA-100 steel
[AD-A274857] p 2822 N94-26174
Stress relaxation in sputtered W films and W/GeSi/Si heterostructures
[DE94-004007] p 3055 N94-26239
The effect of processing on the microstructure of Ag-sheathed Bi-2223 wires
[DE94-004627] p 3055 N94-26243
An atom probe investigation of the influence of trace impurities on the mechanical behavior of NiAl
[DE94-002797] p 2734 N94-26272
The microstructural response of granular soil under uniaxial strain
[AD-A274808] p 2763 N94-26341
Ordering and phase separation in MOCVD InGaP alloys and unicompositional quantum wells
[DE94-004693] p 3056 N94-26352
Template synthesis of metal microtubule ensembles utilizing chemical, electrochemical, and vacuum deposition techniques
[AD-A274676] p 2715 N94-26444
A study on the development of high-T(c) superconducting wire
[DE93-632438] p 2783 N94-26546
Microstructural development in irradiated vanadium alloys
[DE94-004307] p 2737 N94-26556
Microstructures of Si surface layers implanted with Cu
[DE94-004690] p 3058 N94-26565
Structure and properties of composites synthesized in situ using solid state displacement reactions
[DE94-004589] p 2737 N94-26585
Mechanical properties of nanophase materials
[DE94-004625] p 2751 N94-26594
The processing of powder metallurgically produced near gamma-titanium aluminide
[ISBN-0-315-84018-8] p 2738 N94-26633
The influence of weld metal alloying additions to extend the heat input range for the submerged arc welding of high strength steels
[AD-A274284] p 2738 N94-26679
Proceedings of the Fourth Euroseminar on Microscopy Applied to Building Materials
[PB94-119807] p 2839 N94-26754
Diagnostics and microelectronics
[DE94-003016] p 2784 N94-26777
Titanium 1992: Science and Technology, volume 1
[AD-A274798-VOL-1] p 2739 N94-26799
Ferroelectric thin film microstructure development and related property enhancement
[DE94-002741] p 3061 N94-26856
Controlled heterogeneous nucleation of melt-textured YBa2Cu3O(6+x) by addition of Al2O3 particles
[AD-A274605] p 3062 N94-26892
Fabrication and characterization of nano-crystalline diamond films
[DE94-002202] p 3062 N94-26934
Interface phenomena in metal-ceramic composites
[AD-A274167] p 2709 N94-27125
Accordion-like polymers for nonlinear applications
[AD-D016031] p 2755 N94-27148
Squeeze casting: A literature review
[PB94-124575] p 2741 N94-27326
Utility fog: A universal physical substance
p 2687 N94-27367
Research into the microstructure and mechanical behavior of eutectic Bi-Sn and In-Sn
[DE94-004558] p 2741 N94-27619
Effect of precipitate structure on hot deformation of Al-Mg-Mn alloys
[DE94-004596] p 2741 N94-27622
Electron microscopy studies of undoped and phosphorus doped Si:H and Si,C:H films
[DE94-004738] p 3069 N94-27757
An anodic dissolution-based mechanism for the rapid cracking, pre-exposure phenomenon demonstrated by Al-Li-Cu alloys
[DE94-004798] p 2742 N94-27788
Hydrothermal growth and characterization of oxides in zirconium alloys
[DE94-602981] p 2743 N94-27829
Fragmentation of Ge(1-x) Sn(x) Se2 glasses
[DE94-603009] p 2758 N94-27837
An experimental investigation of fatigue damage in aluminum 2024-T3 alloys p 2747 N94-27900
Application of the Positron Annihilation Technique to the study of vapor absorption process in polyethylene (LDPE) and in imide polymer (6FDA-TMPD PI)
[DE94-602737] p 2720 N94-27998
Mechanical properties and microstructure of thermomechanically processed, high manganese steel
[ARL-TR-146] p 2747 N94-28212
Studies in ice mechanics
[PB94-133055] p 2900 N94-28393

MICROWAVE CIRCUITS
Modeling electromagnetic effects in MMICs for T/R modules
[AD-A273808] p 2766 N94-25736
Processing, fabrication, and demonstration of HTS integrated microwave circuits, appendix A
[AD-A274600] p 2785 N94-26890
An efficient and accurate Green's function analysis of packaged microwave integrated circuits
[ISBN-0-315-84425-6] p 2787 N94-27653

MICROWAVE COUPLING
Microwave coupling into a slotted cavity
[PB94-123742] p 2772 N94-27041

MICROWAVE EQUIPMENT
Microwave and pulsed power
[DE94-003019] p 2782 N94-26312
Four phase microwave pulse generator for pulsed EPR spectrometer p 2718 N94-27388

MICROWAVE FREQUENCIES
A physics-based heterojunction bipolar transistor model for integrated circuit simulation
[AD-A274081] p 2781 N94-25995
Over-the-horizon propagation measurements at six radar-frequency bands at the Atlantic Ocean Coast
[AD-A274151] p 2773 N94-27136
Effective conductivity of wire mesh reflectors for space deployable antenna systems
[NASA-CR-191605] p 2788 N94-27770

MICROWAVE IMAGERY
Polarimetric investigation of edge scattering by mono- and bistatic microwave imaging
[ESA-TT-1284] p 2768 N94-26317
Leadex environmental phenomena and effects observed by DMSP, NOAA, and ERS-1 satellites
[AD-A274596] p 2868 N94-26888

MICROWAVE LANDING SYSTEMS
Automatic, real-time fault monitor verifying network in a microwave landing system
[CA-PATENT-1325261] p 2665 N94-27275

MICROWAVE OSCILLATORS
Electrical analysis of wideband and distributed windows using time-dependent field codes
[DE94-002987] p 2768 N94-26310
HPm-tubes: Literature survey comprising 1992
[PB94-123643] p 2785 N94-27038
Computer simulations of radiation generation from relativistic electron beams
[AD-A274139] p 3024 N94-27133

MICROWAVE RADIOMETERS
Cloud liquid water content measurement tests using dual-wavelength radar
[PB94-125960] p 2896 N94-26959

MICROWAVE RESONANCE
Plasma surface cleaning using microwave plasmas
[DE94-002754] p 2713 N94-26014

MICROWAVE SWITCHING
Ferrite phase shifters using stress insensitive materials
[AD-A274639] p 2708 N94-26895

MICROWAVE TRANSMISSION
Microwave coupling into a slotted cavity
[PB94-123742] p 2772 N94-27041

MICROWAVE TUBES
Electrical analysis of wideband and distributed windows using time-dependent field codes
[DE94-002987] p 2768 N94-26310
HPm-tubes: Literature survey comprising 1992
[PB94-123643] p 2785 N94-27038

MICROWAVES
Theoretical aspects of the agile mirror
[AD-A274890] p 2767 N94-26177
Microwave and pulsed power
[DE94-003019] p 2782 N94-26312
Experimental and theoretical investigation of RF absorption and reflection from preformed plasmas
[AD-A274189] p 3046 N94-27098
A direct current rectification scheme for microwave space power conversion using traveling wave electron acceleration p 2687 N94-27371
Electromagnetic modeling of bi-isotropic media
[PB94-132909] p 2778 N94-28382

MILITARY AIRCRAFT
A cost model for USAF acquisition of commercial aircraft for service in the special air mission fleet
[AD-A274012] p 3093 N94-25796

MILITARY OPERATIONS
Development of the Air Force contingency contracting course framework
[AD-A273921] p 3093 N94-25895
Report of the defense science board task force on aircraft assessment
[AD-A274531] p 2669 N94-26835
Human dimensions research team, operation restore hope
[AD-A274340] p 2939 N94-27056

MILITARY PSYCHOLOGY
Practice patterns of US Army medical department psychiatrists and psychologists
[AD-A274787] p 2909 N94-26360
Human dimensions research team, operation restore hope
[AD-A274340] p 2939 N94-27056

MILITARY TECHNOLOGY
Object interaction in a parallel object-oriented discrete-event simulation
[AD-A274084] p 2959 N94-25942
Optoelectronic technology consortium
[AD-A274595] p 3036 N94-26857
Air Force standards for nickel hydrogen battery
p 2862 N94-28116
AF Ni-Cd cell qualification program
p 2863 N94-28122
Visit to CERMA: Centre d'Etudes et de Recherches de Medecine Aerospatiale, Centre for Studies and Research in Aviation and Space Medicine, Bretigny sur Orge, France, November 16-18, 1992
[PB94-132990] p 2937 N94-28392

MILLIMETER WAVES
Electrical analysis of wideband and distributed windows using time-dependent field codes
[DE94-002987] p 2768 N94-26310
Laboratory plasma studies
[AD-A274655] p 3043 N94-26356
Focal plane antenna array for millimeter waves
[AD-D016034] p 2774 N94-27202

MILLING MACHINES
Accuracy analysis of multi-axis machines
[ETN-94-95341] p 3002 N94-26000

MIMD (COMPUTERS)
A Multitransputer Parallel Processing System (MTPPS) [DE94-604652] p 2981 N94-26903
MIMD parallel approaches to object labeling [ISBN-0-315-60198-1] p 2982 N94-27644
MIMO (CONTROL SYSTEMS)
Design of a subsonic envelope flight control system for the Vista F-16 using quantitative feedback theory [AD-A274057] p 2676 N94-25771
Evaluation of moderate angle of attack roll of a dual engine, thrust vectoring aircraft using quantitative feedback theory [AD-A274118] p 2667 N94-25905
MIMO recursive least squares control algorithm for the AN/FPN-44A Loran-C transmitter [AD-A274820] p 2664 N94-26493
Identification and H(infinity)/(mu)-synthesis control of the Sandia truss [DE94-002735] p 2839 N94-26810
MINERAL METABOLISM
Endocrinological evaluations of muscle and bone atrophy in tail-suspended rats p 2903 N94-27444
MINERAL OILS
Measurement of viscosity, density, and gas solubility of refrigerant blends in selected synthetic lubricants [DE94-003609] p 2713 N94-25934
Calculation methods for steadily loaded axial groove hydrodynamic journal bearings (guide to use of computer program A9305) [ESDU-93005] p 2830 N94-28074
MINERALOGY
Experimental study of lunar and SNC (Mars) magmas [NASA-CR-195274] p 3107 N94-27850
MINERALS
Some properties of graphs with local Ore conditions [PB94-126612] p 2996 N94-26962
MINIATURIZATION
Pigs in cyberspace p 2689 N94-27376
MINIMAL SURFACES
Characterization of self-conjugate minimal surfaces in R(sup 3) [DE94-601538] p 2993 N94-26409
Some remarks on the symmetry of self-conjugate minimal surfaces in R3 [DE94-603670] p 3007 N94-27633
MINIMAX TECHNIQUE
Phase portraits of quadratic systems with finite multiplicity three and one critical point of infinity [REPT-93-41] p 2991 N94-26215
MINIMUM DRAG
Examples of flight path optimisation using a multivariate gradient-search method [ESDU-93021] p 2670 N94-28092
MINING
Asteroid exploration and utilization p 3080 N94-25697
MINKOWSKI SPACE
Dimensional crossover from non-renormalizability to renormalizability [DE93-613052] p 3006 N94-26193
Classical solutions of Yang-Mills-Chern-Simons theory in 2+1 dimensions: A quasi-linear superposition [DE93-634335] p 3006 N94-26270
The extensions of space-time. Physics in the 8-dimensional homogeneous space D is equal to SU(2,2)/K [DE93-634336] p 3072 N94-26551
MINUTEMAN ICBM
Uncertainties in the characterization of the thermal environment of a solid rocket propellant fire [DE94-002023] p 2760 N94-27719
MIRRORS
Elastic backscattering lidar for a MSTI satellite [DE94-002701] p 2816 N94-26126
Theoretical aspects of the agile mirror [AD-A274890] p 2767 N94-26177
Mounting of SSM's [VTT-TIED-1442] p 2695 N94-26250
Comparison of technology for high-power laser mirrors and synchrotron radiation mirrors [DE94-002913] p 3035 N94-26276
Phase conjugated lasers applied to commercial x ray lithography [DE94-001529] p 2819 N94-27018
Reflectometer employing an integrating sphere and lens-mirror concentrator [AD-D016061] p 3039 N94-27676
The PROTEL contamination code [RXR-93071] p 3040 N94-28202
MISALIGNMENT
Performance impacts for actuator misalignments and failures in large-aperture adaptive-optic telescopes [AD-A273838] p 3034 N94-25742
Enhanced simulation software for rocket turbopump, turbulent, annular liquid seals [NASA-CR-195239] p 2825 N94-27383
MISSILE BODIES
Numerical assessment of aerodynamic interactions on missiles with transverse jets control p 2659 N94-28031
MISSILE COMPONENTS
Transparent polycrystalline body with high ultraviolet transmittance, process for making and applications thereof [CA-PATENT-1325511] p 3066 N94-27276
MISSILE CONFIGURATIONS
A numerical study of high-speed missile configurations using a block-structured parallel algorithm [AD-A273776] p 2979 N94-25860
Numerical assessment of aerodynamic interactions on missiles with transverse jets control p 2659 N94-28031
MISSILE CONTROL
Recent developments in the simulation of steady and transient transverse jet interactions for missile, rotorcraft, and propulsive applications p 2804 N94-28030
Numerical assessment of aerodynamic interactions on missiles with transverse jets control p 2659 N94-28031
MISSILE DEFENSE
Elastic backscattering lidar for a MSTI satellite [DE94-002701] p 2816 N94-26126
MISSILE DETECTION
Radar detection of low-altitude targets in a maritime environment. Volume 2: Meteorological and radar data [AD-A274658] p 2768 N94-26335
MISSILE TRACKING
Optimal control design advantages utilizing two-degree-of-freedom controllers [AD-A273839] p 2984 N94-25743
Elastic backscattering lidar for a MSTI satellite [DE94-002701] p 2816 N94-26126
MISSILES
A numerical study of high-speed missile configurations using a block-structured parallel algorithm [AD-A273776] p 2979 N94-25860
Numerical assessment of aerodynamic interactions on missiles with transverse jets control p 2659 N94-28031
MISSION PLANNING
The Extended Mission Rover (EMR) p 2689 N94-25674
Lowest cost, nearest term options for a manned Mars mission p 2689 N94-25682
Comet nucleus and asteroid sample return missions p 2689 N94-25692
First lunar outpost p 2943 N94-25694
Project Minerva: A low-cost manned Mars mission based on indigenous propellant production p 2760 N94-25705
Pax: A permanent base for human habitation of Mars p 2943 N94-25706
Access to space study [NASA-TM-109693] p 2685 N94-27151
Interdisciplinary technology p 2686 N94-27363
Space science: Causes and impacts of cutbacks to NASA's outer solar system exploration missions. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives [GAO/NSIAD-94-24] p 3106 N94-27418
MIXING
Modulation wavelength dependence of ion mixing in metallic superlattices [DE94-004608] p 3059 N94-26591
MIXING CIRCUITS
Development of a 4-bit parallel analog-to-digital converter and a four-quadrant double-balanced mixer using heterojunction bipolar transistor technology [AD-A274074] p 2947 N94-25648
A compact 150 GHz SIS receiver cooled by 4 K GM refrigerator [REPT-36] p 2776 N94-27340
MIXING LAYERS (FLUIDS)
Transverse vorticity measurements in the University of Houston two stream shear layer facility [AD-A273910] p 2797 N94-27562
Scalar mixing in the subsonic jet in crossflow p 2800 N94-28008
MIXING LENGTH FLOW THEORY
Development and implementation of a scramjet cycle analysis code with a finite-rate-chemistry combustion model for use on a personal computer [AD-A273834] p 2673 N94-25617
Performance of renormalization group algebraic turbulence model on boundary layer transition simulation [NASA-CR-194466] p 2644 N94-26131
Numerical simulation of turbulent free jet by TFKE model p 2871 N94-28157
MIXING RATIOS
Evaluation of a concentration probe for application in a supersonic flow field [AD-A273915] p 2643 N94-25592
MIXTURES
Analysis and computer tools for separation processes involving nonideal mixtures [DE94-004162] p 2960 N94-25986
MOBILE COMMUNICATION SYSTEMS
Low Earth orbit communications satellite p 2698 N94-25701
MOBILITY
The Robotic All-Terrain Lunar Exploration Rover (RATLER): Increased mobility through simplicity p 2685 N94-26291
Effect of temperature and recoil-energy spectra on irradiation-induced amorphization in Ca2La8(SiO4)6O2 [DE94-004371] p 3067 N94-27602
MODAL RESPONSE
Mode analysis of gyrotron oscillation using a k-spectrometer [DE94-701195] p 2813 N94-27703
MODEL REFERENCE ADAPTIVE CONTROL
Direct model reference adaptive control of robotic arms p 2683 N94-26282
Investigation into model-based fuzzy logic control [AD-A274660] p 2985 N94-26336
MODELS
An object model for multimedia programming [CWI-CS-R9327] p 2971 N94-27552
One from many: Selecting an appropriate human performance model [DCIEM-93-25] p 2942 N94-27683
MODERATORS
Characteristics and control response of the TOPAZ 2 reactor system real-time dynamic simulator [DE94-003788] p 2699 N94-25600
Space-R thermionic space nuclear power system: Design and technology demonstration [DE94-001890] p 2699 N94-25929
MODULATION
Modulation Simulation Program: Programmer's manual, version 1.00 [DREO-16] p 2973 N94-27761
Modulation Simulation Program: Operator's manual, version 1.00 [DREO-16] p 2975 N94-27951
MODULATION TRANSFER FUNCTION
Image quality and the display modulation transfer function: Experimental findings [AD-A274061] p 2679 N94-25773
MODULATORS
Diagnostics and microelectronics [DE94-003016] p 2784 N94-26777
MODULES
Module interconnection frameworks for a real-time spreadsheet [AD-A273853] p 2956 N94-25588
Design and development of the second generation Mars Habitat p 2943 N94-25693
A modular approach to evaluation cryptographic protocols using Petri nets [ISBN-0-315-85354-9] p 2972 N94-27595
MODULUS OF ELASTICITY
FR/GE/UK/US International Test Operations Procedure (ITOP) 1-1-050 development of laboratory vibration test schedules [AD-A273887] p 2836 N94-25732
Users manual for CATNIP: A Computer Analysis Tool for Normal Impact Penetration [DE94-003671] p 2962 N94-26371
Effects of physical aging on long-term behavior of composites p 2712 N94-27897
MOISTURE
Package integrity measurement technology and quality assurance [AD-A273881] p 2834 N94-25727
MOISTURE CONTENT
Package integrity measurement technology and quality assurance [AD-A273881] p 2834 N94-25727
Mechanism of mechanical fatigue of silica glass [DE94-003165] p 2753 N94-26783
Cloud liquid water content measurement tests using dual-wavelength radar [PB94-125960] p 2896 N94-26959
Time domain reflectometry for measuring bulk soil electrical conductivity and comparison with the Em38 instrument [PB94-125432] p 2881 N94-27052
MOLDING MATERIALS
Technique to predict the curing behaviour of unsaturated polyester materials [PB94-124856] p 2748 N94-25892

Modelling the inhibition cure behaviour of unsaturated polyester moulding materials
[PB94-124864] p 2748 N94-25893
Stress relaxation in dough moulding compounds
[PB94-124872] p 2748 N94-25894
MOLDS
Production of an amorphous Fe(75)Si(10)B(15) sheet by a metallic mold casting method and its properties
p 2746 N94-28170
MOLECULAR BEAM EPITAXY
Ultra-high aggregate bandwidth two-dimensional multiple-wavelength diode laser arrays
[AD-A274018] p 2815 N94-25756
Investigation of a normal incidence high-performance p-type strained layer In(0.3)Ga(0.7)As / In(0.52)Al(0.48) as quantum well infrared photodetector
[AD-A274854] p 3055 N94-26188
MBE grown 3 to 5 strain relaxed buffer layers and superlattices characterized by atomic force microscopy
[DE94-002931] p 3056 N94-26308
Nitride semiconductors for ultraviolet detection
[AD-A274246] p 3060 N94-26840
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device development
[AD-A274247] p 3061 N94-26841
Low temperature deposition and characterization of N- and p-type silicon carbide thin films and associated ohmic and Schottky contacts
[AD-A274345] p 2754 N94-26974
Visible light emitting materials and injection devices
[AD-A274418] p 2786 N94-27079
Observation of stimulated emission from an MBE grown GaN film on sapphire
[DE94-003638] p 3068 N94-27724
MOLECULAR BEAMS
Molecular beam mass spectrometry studies of the chemical vapor deposition of diamond
[DE94-003802] p 3049 N94-25601
Investigation of a normal incidence high-performance p-type strained layer In(0.3)Ga(0.7)As / In(0.52)Al(0.48) as quantum well infrared photodetector
[AD-A274854] p 3055 N94-26188
Trace organic chemical detection using an ultraviolet excitation molecular beam fluorometer
[DE94-002649] p 2704 N94-27708
Dynamics of metastable states in supersonic beams
[ITN-94-85232] p 3028 N94-27760
MOLECULAR BIOLOGY
Molecular biological studies on the human radioresistance and drug resistance
[DE93-632682] p 2910 N94-26549
NCVS, volume 5
[AD-A274975] p 2902 N94-27165
Space radiation health research, 1991-1992
[NASA-TM-109721] p 2932 N94-27556
Neutrons in biology
[DE94-701085] p 2903 N94-27862
MOLECULAR CHAINS
Atomic-scale chemistry of metal surfaces
[REPT-A-2657] p 3012 N94-25636
Localization properties of one-dimensional electrified chains
[DE94-603672] p 3067 N94-27635
MOLECULAR CLOUDS
Investigations of the dynamical evolution of protoplanetary nebulae
[NASA-CR-195278] p 3105 N94-27428
Modulating terrestrial impacts from Oort cloud comets by the adiabatically changing galactic tides
p 2890 N94-28305
MOLECULAR COLLISIONS
Vibrational energy transfer within the B 3Pi (O(+) sub u) state of 79BR2 upon collision with N2, O2, NO, and SF6
[AD-A273905] p 3011 N94-25589
International bulletin on atomic and molecular data for fusion. No. 42-45, Mar. 1991 - Dec. 1992
[DE94-601817] p 3045 N94-26946
International bulletin on atomic and molecular data for fusion. No. 46
[DE94-601818] p 3023 N94-26947
MOLECULAR DYNAMICS
Fast parallel algorithms for short-range molecular dynamics
[DE93-018519] p 3016 N94-26033
Modeling defect production in high energy collision cascades
[DE94-003810] p 3017 N94-26049
How reliable is the HMSA integral equation for the pair structure of supercooled and amorphous mixtures?
[DE94-601543] p 3006 N94-26411
Nanoscale plasticity in silica glass
[DE94-004212] p 2751 N94-26554
A semiclassical reactive flux method for the calculation of condensed phase activated rate constants
[AD-A274850] p 3020 N94-26562
Modeling Group 4 elements with new transferable tight-binding models
[DE94-000770] p 3059 N94-26695
International journal of quantum chemistry. Quantum Chemistry Symposium Number 27: Proceedings of the International Symposium on Atomic, Molecular, and Condensed Matter Theory and Computational Methods
[AD-A274352] p 3023 N94-26926
First principles calculations for the cleaved and annealed Ge(111) surfaces
[DE93-617048] p 3066 N94-27347
Computer simulation of aqueous Na-Cl electrolytes
[DE94-002622] p 3030 N94-28001
MOLECULAR ELECTRONICS
Molecular surface electrostatic potentials in the analysis of non-hydrogen-bonding noncovalent interactions
[AD-A274612] p 3022 N94-26894
MOLECULAR ENERGY LEVELS
Dynamics of metastable states in supersonic beams
[ITN-94-85232] p 3028 N94-27760
MOLECULAR EXCITATION
The importance of vibrationally excited nitrogen in silicon nitride deposition systems
[AD-A274874] p 2750 N94-26167
Dynamics of metastable states in supersonic beams
[ITN-94-85232] p 3028 N94-27760
MOLECULAR GASES
An investigation of the effect of surface impurities on the adsorption kinetics of hydrogen chemisorbed onto iron
[NASA-CR-195213] p 2716 N94-26643
MOLECULAR INTERACTIONS
Study on computerized experiment of amorphous transformation process by solid phase reaction
p 2726 N94-25564
International bulletin on atomic and molecular data for fusion. No. 46
[DE94-601818] p 3023 N94-26947
Spectroscopy and dynamics of molecular and ionic impurities embedded in solid hydrogen
[AD-A274149] p 3064 N94-27095
MOLECULAR PHYSICS
Dynamics of metastable states in supersonic beams
[ITN-94-85232] p 3028 N94-27760
MOLECULAR RELAXATION
A study of vibrational relaxation of electronically-excited molecules
[DE93-613553] p 3013 N94-25827
Spectroscopic and vibrational energy transfer studies in molecular bromine
[AD-A273795] p 3014 N94-25875
Progress in modeling atmospheric propagation of sonic booms p 2650 N94-28189
MOLECULAR SPECTRA
Spectroscopy Division
[DE94-604074] p 2717 N94-26988
MOLECULAR SPECTROSCOPY
Molecular surface electrostatic potentials in the analysis of non-hydrogen-bonding noncovalent interactions
[AD-A274612] p 3022 N94-26894
MOLECULAR STRUCTURE
Morphological analysis of ionomers
[DE94-003660] p 2749 N94-26005
Radiation-Induced Structural Changes, 2
[DE93-520314] p 3054 N94-26109
Transition metals in highly correlated discotic phases: Designing metallomesogens with selected intermolecular organizations
[AD-A274695] p 2736 N94-26452
An x ray absorption fine structure study of ordering in polythiophene thin films
[AD-A274235] p 2753 N94-26822
Controlled heterogeneous nucleation of melt-textured YBa2Cu3O(6+x) by addition of Al2O3 particles
[AD-A274605] p 3062 N94-26892
NCVS, volume 5
[AD-A274975] p 2902 N94-27165
Molecular dynamics simulation and crystal-field theory: Predicting the optical spectra and structure of rare-earth doped inorganic glasses
[ISBN-0-315-84679-8] p 3025 N94-27310
The molecular matching problem
p 3030 N94-27910
Thermal conductivity of liquid carboxylic acids
[ESDU-93017] p 2721 N94-28138
MOLECULAR WEIGHT
Chemical polymerization and Langmuir-Blodgett techniques. 2: The polymerization of monolayers of 3-substituted pyrroles
[AD-A274478] p 2755 N94-27163
MOLECULES
Atomic-scale chemistry of metal surfaces
[REPT-A-2657] p 3012 N94-25636
On the classification scheme for resonant states of muonic molecules
[DE93-613645] p 3014 N94-25853
Transition metal activation and functionalization of carbon-hydrogen bonds
[DE94-003650] p 2715 N94-26369
MOLLUSKS
An experimental study of siphonal jets in a turbulent boundary layer crossflow p 2802 N94-28015
MOLTEN SALT ELECTROLYTES
Molten salt techniques for reproducible excess heat
[AD-A274935] p 2714 N94-26296
MOLTEN SALTS
Structure of ionic fluids in equilibrium with a microporous ionic matrix
[DE94-600563] p 2715 N94-26391
Isothermal corrosion testing of steels in molten nitrate salts
[DE94-004695] p 2742 N94-27755
MOLYBDENUM
Study on development of chemical measurement method utilizing plasmas p 2728 N94-25576
Method of bonding molybdenum to steel
[AD-D016079] p 2747 N94-28187
MOLYBDENUM ALLOYS
Study on alloy films for hydrogen separation
p 2726 N94-25565
MOLYBDENUM DISULFIDES
LB-Deposited, side-chain substituted polyaniline, polypyrrole and the corresponding monomers, studied by STM
[AD-A274405] p 2754 N94-26977
MOMENTS OF INERTIA
Normal forms for perturbations of the euler top
[PB94-125390] p 3009 N94-26968
MOMENTUM
On the estimation of matrix elements for optical transitions in semiconductors
[DE93-613550] p 3051 N94-25851
How to build analogues of the Bessel-Clifford expansions for the sum of the repulsive Coulomb potential and central potential decreasing more rapidly than the centrifugal one?
[DE93-634308] p 3007 N94-26472
Study of the process (pi)(sup -)A(yields)(pi)(sup -)(eta)'(eta)A at the moment 36 GeV/c
[DE93-634530] p 3024 N94-27250
Predictions of momentum and scalar fields in a jet in cross-flow using first and second order turbulence closures p 2803 N94-28025
MOMENTUM THEORY
Computation of non-isentropic internal flows with variable density
[AD-A274848] p 2794 N94-26801
Excited Landau levels, orbital angular momentum and axial anomaly
[DE94-606407] p 3068 N94-27679
MOMENTUM TRANSFER
The amplitude of the elastic hadron-hadron scattering in the coulombic range of transfer momenta
[DE93-613183] p 3014 N94-25869
Two dimensional self-consistent fluid simulation of RF inductive sources
[DE94-003635] p 2767 N94-25937
A study of LPM suppression of bremsstrahlung at 25 GeV
[DE94-003457] p 3018 N94-26133
Topics in longshore currents
[AD-A274788] p 2899 N94-26361
Relativistic collision rate calculations for electron-air interactions
[DE94-004204] p 3020 N94-26527
The challenges of exclusive processes in QCD
[DE94-003429] p 3024 N94-27050
Experimental measurement of local displacement and chemical pair correlations in crystalline solid solutions
[DE94-001124] p 3065 N94-27251
MONAURAL SIGNALS
Monaural and binaural processing of complex waveforms
[AD-A274209] p 3010 N94-27067
MONITORS
A comparison of sleep scored from electroencephalography to sleep scored by wrist actigraphy
[AD-A273739] p 2910 N94-26748
Automatic, real-time fault monitor verifying network in a microwave landing system
[CA-PATENT-1325261] p 2665 N94-27275
MONOCHROMATORS
Design of a high-precision double crystal tunable monochromator
[DE94-003004] p 2811 N94-26787

MONOMERS

LB-Deposited, side-chain substituted polyaniline, polypyrrole and the corresponding monomers, studied by STM
[AD-A274405] p 2754 N94-26977

Langmuir-Blodgett and STM investigations of conducting polymer thin films
[AD-A274512] p 2755 N94-27087

New monomers for high performance polymers
p 2758 N94-27904

MONOMOLECULAR FILMS

Liquid crystalline side-chain polysiloxanes with 4-amino-4'-stilbene-carboxylic ester mesogens
[AD-A274510] p 2754 N94-27036

MONOPOLE ANTENNAS

Receiving antennas for electromagnetic pulses and transients
[ISBN-0-315-62312-8] p 2777 N94-27871

MONOPROPELLANTS

Liquid monopropellants
[AD-D016074] p 2760 N94-28226

MONOPULSE RADAR

Methods for improving low-angle, low-altitude radar tracking accuracy
[AD-A274914] p 2768 N94-26347

MONOTONE FUNCTIONS

Isotonic estimation and rates of convergence in Wicksell's problem
[REPT-93-39] p 3002 N94-26213

MONSOONS

Investigation of mesoscale convective cloud clusters in South China
[AD-A274303] p 2895 N94-26678

Propagation of cold air masses in East Asia and its associated planetary-scale function
[AD-A274304] p 2895 N94-26850

Simulation of the Indian and East-Asian summer monsoon in the ECMWF model: Sensitivity to horizontal resolution
[DE94-004276] p 2897 N94-27571

MONTE CARLO METHOD

Penetrating nature of very collimated high-energy shower-clusters of hadrons and gamma rays
p 3113 N94-25631

NNN-Ising model simulation of nanodomain textures in relaxor-type lead scandium tantalate
[DE94-601884] p 2748 N94-25844

On radiation defects in strip detectors
[DE93-616646] p 3015 N94-25916

Monte Carlo event generators for hadron-hadron collisions
[DE94-003212] p 3015 N94-25955

Crossover between BCS and performed-Boson theories with increasing interactions
[DE93-019018] p 3017 N94-26078

Laser manipulation of metastable neon atoms
[ETN-94-95344] p 2817 N94-26225

Modelling of ionisation reactions and of the resulting electric fields in one-dimensional hypersonic shock waves with the direct simulation Monte Carlo method
[IC-AERO-92-01] p 2644 N94-26248

Ising critical behaviour in the one-dimensional frustrated quantum XY model
[DE93-634755] p 3057 N94-26390

C-periodicity and the physical mass in the 3-state Potts model
[DE94-601551] p 3019 N94-26423

Subgraph approximations for large directed graphical models
[AD-A274813] p 3003 N94-26485

Simulation approaches for calculations in directed graphical models
[AD-A274825] p 3003 N94-26494

Stochastic solution to quantum dynamics
[NASA-TP-3408] p 3114 N94-26550

Measuring the time dependence of B(sub s)(sup 0) meson - anti B(sub s)(sup 0) meson oscillations
[ISBN-0-315-84367-5] p 3021 N94-26665

Direct simulation Monte-Carlo of near continuum hypersonic flow with chemical reactions
[DLR-FB-93-01] p 2797 N94-27588

Monte Carlo calculations of low background detector response
[DE94-004593] p 3116 N94-27621

Numerical and experimental analyses of the radiant heat flux produced by quartz heating systems
[NASA-TP-3387] p 3011 N94-27659

BATSE burst location accuracy and constraints on the fraction of repeating GRB sources
[DE94-004981] p 3116 N94-27714

Modeling the DMSP and CRRES dosimeters using the path length distribution method
[RXR-93051] p 2698 N94-28200

The PROTEL contamination code
[RXR-93071] p 3040 N94-28202

MOON

The Extended Mission Rover (EMR)
p 2689 N94-25674

The modal solution to the Moon's orbit using canonical Floquet perturbation theory
[AD-A273732] p 2690 N94-26001

MORPHOLOGY

Characterization of physically vapor deposited AF2400 thin films
[DE94-004019] p 2749 N94-25985

Morphological analysis of ionomers
[DE94-003660] p 2749 N94-26005

Oxygen reduction at a YSZ interface with cathode materials La(1-x)(Ca or Sr)(x)MnO3(1-x)CaMnO3
[DE94-002954] p 3054 N94-26147

MBE grown 3 to 5 strain relaxed buffer layers and superlattices characterized by atomic force microscopy
[DE94-002931] p 3056 N94-26308

High definition Raman microscopic imaging
[DE94-003158] p 2716 N94-26781

The morphological processing of binary images
[AD-A274310] p 2996 N94-26972

Morphology transitions during non-equilibrium growth processes
[ITN-94-85236] p 3065 N94-27243

Hydrothermal growth and characterization of oxides in zirconium alloys
[DE94-602981] p 2743 N94-27829

MOSSBAUER EFFECT

The Latin American conference on the applications of the Moessbaer effect
[DE93-615942] p 3051 N94-25912

MOTION PERCEPTION

Application of Markov random field theory to image coding and motion estimation
[ISBN-0-315-83435-8] p 2964 N94-26632

Motion analysis from a sequence of range images
[ISBN-0-315-84684-4] p 2969 N94-27311

Estimation of image motion in scenes containing multiple moving objects
[ISBN-0-315-85208-9] p 2969 N94-27346

Frequency analysis of body sway induced by optokinetic stimulation p 2914 N94-27455

Effects of imaginary target on induced eye movements by linear acceleration p 2914 N94-27456

MOTION SICKNESS

The electrogastrogram during parabolic flight
p 2913 N94-27452

MOTION SIMULATION

Motion planning for serial manipulators with many degrees of freedom: Implementation of a sequential search strategy
[ISBN-0-315-83682-2] p 2822 N94-26642

MOTION SIMULATORS

The effect of platform motion on human energy expenditure during walking. An exploratory experiment
[AD-A273760] p 2940 N94-25724

MOTION STABILITY

A comparison of three approximate mathematical models for the gravity gradient stabilized satellite
[AD-A273832] p 2694 N94-25615

Recent trend of domestic and international regulations on intact stability of ships for safety
p 2764 N94-27977

MOTOR VEHICLES

Dead reckoning navigation
[VTT-TIED-1402] p 2664 N94-25808

Unscreened low tension cables scrape abrasion testing
[PB94-123767] p 2823 N94-26849

Optimising BMW four-cylinder two-valve engines
[PB94-125101] p 2824 N94-27254

MOUNTING

Mounting of SSM's
[VTT-TIED-1442] p 2695 N94-26250

MOVING TARGET INDICATORS

Enhanced adaptive statistical filter providing improved performance for target motion analysis noise discrimination statement of government interest
[AD-D016039] p 2786 N94-27109

MULTICHANNEL COMMUNICATION

Interference analysis of multichannel transmission lines: A system's analysis
[PB94-126505] p 2772 N94-26909

Design and test of a regenerative satellite transmultiplexer
[ISBN-0-315-85280-1] p 2786 N94-27303

MULTIGRID METHODS

On the robustness of a multiple semi-coarsened grid method
[REPT-93-51] p 2992 N94-26252

Grid-independent convergence based on preconditioning techniques
[PB94-125358] p 2997 N94-27000

Agglomeration multigrid for the three-dimensional Euler equations
[NASA-CR-191595] p 2999 N94-27557

TVD flux-difference split methods for high-speed thermochemical nonequilibrium flows with strong shocks
[UTIAS-350] p 2799 N94-27880

A parallel multigrid algorithm for solving the Navier-Stokes equations on a transputer system
[PREPRINT-699] p 2807 N94-28099

MULTIMEDIA

Development of satellite telecommunications during the period 1990 - 2005
[CRANFIELD-AERO-9301] p 2765 N94-25639

Multimedia in Views
[CWI-CS-R9263] p 2961 N94-26218

Hypermedia support for engineering design systems: Application to fatigue analysis
[VTT-TIED-1432] p 2837 N94-26255

An object model for multimedia programming
[CWI-CS-R9327] p 2971 N94-27552

MULTIMISSION MODULAR SPACECRAFT

Performance measures from the explorer platform berthing experiment p 2683 N94-26283

MULTIPATH TRANSMISSION

Analyzing adaptive beamformer performance in a stable multipath environment
[AD-A274029] p 2766 N94-25766

Methods for improving low-angle, low-altitude radar tracking accuracy
[AD-A274914] p 2768 N94-26347

Laser phase induced intensity noise in fiber-optic signal processing and sensing systems
[ITN-94-85234] p 2819 N94-27179

Ground station siting considerations for DGPS
p 2642 N94-27293

MULTIPHASE FLOW

Eleventh Symposium on Energy Engineering Sciences: Proceedings
[DE93-019930] p 2763 N94-26429

MULTIPLEXING

The AFIT multielectrode array for neural recording and simulation: Design, testing, and encapsulation
[AD-A274086] p 2909 N94-25943

A VHDL register transfer level model of the linear token passing multiplex data bus protocol for the high speed data bus
[AD-A273734] p 2980 N94-26009

Comparative analysis of different configurations of PLC-based safety systems from reliability point of view
p 2836 N94-27925

MULTIPLICATION

The PRISM project: Infrastructure and algorithms for parallel eigensolvers
[DE94-005125] p 2973 N94-27717

MULTIPROCESSING (COMPUTERS)

An efficient communication scheme for solving the S(sub n) equations on message-passing multiprocessors
[DE94-000378] p 2769 N94-26482

Design and implementation of a multiprocessor for DSP and communications systems algorithm evaluation
[ISBN-0-315-84128-1] p 2980 N94-26674

On-board computer for control subsystem of satellite
p 2949 N94-26716

Real time avionics constraints: Silicon solutions
p 2949 N94-26717

Test of onboard real time applications (LICE (tm))
p 2952 N94-26737

Specification performance optimization and executive generation for onboard multiprocessor real time application with SynDEx p 2954 N94-26745

Partitioning structural VHDL circuits for parallel execution on hypercubes
[AD-A274390] p 2785 N94-26830

Hard real-time reliable multicast in the DEDOS system
[PB94-126745] p 2966 N94-26920

Automatic mapping of task and data parallel programs for efficient execution on multicomputers
[AD-A274125] p 2982 N94-27117

Design of a parallel discrete event simulation coprocessor
[AD-A274135] p 2982 N94-27123

Garbage collection in a multiprocessor Smalltalk system
[ISBN-0-315-51159-1] p 2982 N94-27332

Unified distributed simulation
[ISBN-0-315-59019-X] p 2983 N94-27685

An enhanced global spectral model
[PL-TR-92-2011] p 2898 N94-28223

MULTIPROGRAMMING

Ada multiple-programming for hard real time applications in space systems p 2951 N94-26730

MULTISENSOR APPLICATIONS

Development of a multi-sensor in situ fiber optic fluorometer
[DE94-003399] p 3035 N94-26100

An analysis of multiple sensor system payloads for unmanned aerial vehicles
[AD-A274905] p 2667 N94-26182
A data fusion algorithm for multi-sensor microburst hazard assessment p 2641 N94-27287
Multi-sensor data fusion in a distributed environment: Architectural solutions
[NLR-TP-92243-U] p 2989 N94-27800

MULTISPECTRAL BAND SCANNERS
Mapping coastal habitats using an imaging spectrometer
[ISBN-0-315-84362-4] p 2848 N94-26664

MULTISPECTRAL PHOTOGRAPHY
Morphodynamics of inter-tidal areas: The Wadden Sea
[NLR-TP-92356-U] p 2851 N94-27555
SPECTRUM analysis of multispectral imagery in conjunction with wavelet/KLT data compression
[DE94-003961] p 2851 N94-27727
Multispectral and textural classifications of a SPOT HRV-1 image, region of Sherbrooke, Quebec, Canada
[ISBN-0-315-84978-9] p 2851 N94-27863

MULTIVARIABLE CONTROL
Grey-box modelling and identification topics
[PB94-126380] p 2986 N94-27029

MULTIVARIATE STATISTICAL ANALYSIS
Radial base functions: L(sup p)-approximation orders with scattered centers
[AD-A274682] p 3003 N94-26445
A multivariate anthropometric method for crew station design: Abridged
[AD-A275588] p 2941 N94-26984
Radial basis function approximation: From gridded centers to scattered centers
[AD-A274184] p 2998 N94-27103
Multivariate spectral analysis to extract materials from multispectral data
[AD-A274142] p 2709 N94-27135
Examples of flight path optimisation using a multivariate gradient-search method
[ESDU-93021] p 2670 N94-28092

MUONS
On the classification scheme for resonant states of muonic molecules
[DE93-613645] p 3014 N94-25853
Theoretical and experimental studies of elementary physics
[DE94-002310] p 3008 N94-25988
Heavy charged leptons in an SU(3)(sub L) x U(1)(sub N) model
[DE93-634367] p 3016 N94-26041
Harvard University High Energy Physics
[DE94-002406] p 3032 N94-26119
Separation and reconstruction of electron neutrino interaction in the IHEP-JINR neutrino detector and BARS detector
[DE93-634182] p 3019 N94-26393
Measurements of the p (mu)d-molecule formation rate at different hydrogen temperature
[DE93-634636] p 3020 N94-26511
Indiana University high energy physics, task A
[DE94-000961] p 3033 N94-27614
Monte Carlo calculations of low background detector response
[DE94-004593] p 3116 N94-27621
Jet production in muon scattering at Fermilab E665
[DE94-004663] p 3028 N94-27752
Muon transfer rates in collisions of hydrogen isotope mesic atoms on bare nuclei: Multichannel adiabatic approach
[DE94-606752] p 3030 N94-27861

MUSCLES
Effects of perfusion of amiodarone on electrophysiological properties in single rabbit ventricular myocytes p 2906 N94-27503
Impaired associated movement in Parkinson's disease: An evaluation of Bell's phenomenon
p 2928 N94-27520
Contribution of muscle spindle afferent activity to transient pause in EMG during voluntary tonic contraction p 2928 N94-27522
Sympathetic nerve activity during dynamic leg exercise
p 2929 N94-27527
Analysis on one minute wave in body fluid volume and muscle pumping referred to body parts generating the one minute wave during human active standing
p 2929 N94-27528
The measurements of muscle blood flow by laser Doppler flowmetry with needle type probe
p 2908 N94-27530
Muscle sympathetic nerve activity in patients with hyper-and hypothyroidism: A microneurographic study
p 2930 N94-27531
Enhancement of skin sympathetic nerve activity in amyotrophic lateral sclerosis p 2930 N94-27532
Treatment of orthostatic hypotension by nasal administration of vasopressin p 2930 N94-27533
Muscle sympathetic nerve activity in humans
p 2932 N94-27538
Muscular activity and its relationship to biomechanics and human performance p 2934 N94-28362
Eccentric exercise testing and training
p 2934 N94-28363
Electrical stimulation in exercise training
p 2935 N94-28371

MUSCULAR FUNCTION
Impaired associated movement in Parkinson's disease: An evaluation of Bell's phenomenon
p 2928 N94-27520
Contribution of muscle spindle afferent activity to transient pause in EMG during voluntary tonic contraction p 2928 N94-27522

MUSCULAR STRENGTH
The value of electrical stimulation as an exercise training modality p 2936 N94-28372

MUSCULAR TONUS
Contribution of muscle spindle afferent activity to transient pause in EMG during voluntary tonic contraction p 2928 N94-27522

MUSCULOSKELETAL SYSTEM
Muscular activity and its relationship to biomechanics and human performance p 2934 N94-28362
Exercise detraining: Applicability to microgravity
p 2934 N94-28364

MUTATIONS
Studies on the application of radiation for genetic transformation in higher plants
[DE93-632656] p 2901 N94-26470
Molecular biological studies on the human radioresistance and drug resistance
[DE93-632682] p 2910 N94-26549
Vacuum-UV-effects on E. coli plasmid pUC19: Inactivation, strand break induction and mutation induction
[DLR-FB-93-26] p 2903 N94-27754

MYOCARDIUM
Protective action of platelet-activating factor antagonist, TCV-309, against ischemia reperfusion injury in isolated rabbit hearts p 2904 N94-27465
Protective action of an amiloride derivative (amiloride, 5-(N, N-dimethyl) hydrochloride) against in isolated ischemia/reperfusion newborn rabbit hearts
p 2904 N94-27466
Effects of high-intensity electric field stimulation on the electromechanical performance of cardiac muscle: Influence of fiber orientation p 2904 N94-27467
On the mechanism of reentrant arrhythmias following DC defibrillation: Influence of fiber orientation to the effects of low-energy electric field stimulation on the effective refractory period of cardiac muscle
p 2904 N94-27468
Positive chronotropic effect of mechanical stretch on the sinoatrial node: Roles of neurotransmitters and stretch activated channels p 2904 N94-27469
Effects of perfusion of amiodarone on electrophysiological properties in single rabbit ventricular myocytes p 2906 N94-27503
Fast and slow onsets of Na channel blocking actions due to lidocaine and disopyramide using concentration-clamp method p 2907 N94-27504
Electrophysiological effects of MS-551, a new Class 3 antiarrhythmic agent, on isolated rabbit ventricular muscles p 2907 N94-27505
Comparative investigation of new Class 3 antiarrhythmic drugs, E-4031 and MS-551, on electrophysiological properties in isolated rabbit ventricular myocytes
p 2907 N94-27506
Effects of Class 1 antiarrhythmic drugs on the intraventricular conduction: Influence of fiber orientation
p 2907 N94-27507
Effects of Class 3 antiarrhythmic agents, E-4031 and MS-551 on ventricular repolarization in isolated rabbit hearts p 2907 N94-27508
Electrical coupling between the sino-atrial node and atrial muscle: Cell to cell interaction through an external circuit and its simulation by computer modeling
p 2907 N94-27509
A study on tissue excitation of cardiac muscle under electrical field stimulation p 2907 N94-27510
Block of cardiac sodium channels by Ro 22-9194 (R), a new antiarrhythmic agent: Effects on the maximum upstroke velocity (Vmax) of single guinea pig ventricular myocytes p 2907 N94-27511
Electrophysiological effects of an antiarrhythmic drug, moricizine on isolated guinea pig ventricular muscles
p 2907 N94-27512
Postnatal changes in the autonomic modulation of L-type Ca(exp 2+) currents of rabbit ventricular cells
p 2931 N94-27535
Mechanism for regulation of myocardial contractility by autonomic drugs: Pathophysiological relevance in congestive heart failure p 2931 N94-27536

N

N-TYPE SEMICONDUCTORS
Visible light emitting materials and injection devices
[AD-A274418] p 2786 N94-27079

NACELLES
Wind tunnel investigation of an STOL aircraft model: An effect of engine nacelle shape
[NAL-TM-653] p 2647 N94-27235
Propeller off-axis loads due to thrust axis incidence and nacelle magnus force p 2652 N94-28319
A new approach to turboprop forward nacelle design
p 2655 N94-28336

NASA PROGRAMS
An assessment of testing requirement impacts on nuclear thermal propulsion ground test facility design
[DE94-002933] p 2702 N94-26560
Aerospace safety advisory panel
[NASA-TM-109692] p 3118 N94-27381
Nasa Langley Research Center seventy-fifth anniversary publications, 1992
[NASA-TM-109691] p 3118 N94-27431
Small business innovation research program solicitation
[NASA-TM-109695] p 3094 N94-27661
NASA SBIR abstracts of 1992, phase 1 projects
[NASA-TM-109694] p 3094 N94-27772
The 1993 NASA-ODU American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program
[NASA-CR-191544] p 3085 N94-27893
Research and Development Annual Report, 1992
[NASA-TM-104777] p 3119 N94-27993
NASA: Major challenges for management. Testimony before the Legislation and National Security Subcommittee, Committee on Government Operations, House of Representatives
[GAO/T-NSIAD-94-18] p 3095 N94-28176

NASA SPACE PROGRAMS
JSC almanac
[NASA-TM-109702] p 3119 N94-28204

NATIONAL AEROSPACE PLANE PROGRAM
A numerical study of mixing and combustion in hypervelocity flows through a scramjet combustor model
p 2808 N94-27911

NATIONAL AIRSPACE SYSTEM
Rotorcraft low altitude IFR benefit/cost analysis: Conclusions and recommendations
[AD-A274241] p 2665 N94-26826
Optical communications for transport aircraft
p 2643 N94-27298
The 1993 Federal Aviation Administration plan for research, engineering and development
p 2643 N94-27960

NATURAL GAS
Natural gas applications for hybrid vehicles.
[PB94-117108] p 2759 N94-26753
Feasibility study on introduction of transportation-use petroleum substitution energy
[DE94-725205] p 2759 N94-26905
Sequential multi-point injection of a natural gas engine. Topical report, November 1991 - April 1992
[PB94-126794] p 2824 N94-27224
Laser probes of natural gas ignition chemistry
[PB94-128345] p 2717 N94-27226
Basic research on natural gas combustion phenomena
[PB94-129046] p 2717 N94-27256
Combined Cycles for Power Plants
[VKI-LS-1993-08] p 2830 N94-28077
Introduction to combined cycles p 2789 N94-28078

NATURAL LANGUAGE (COMPUTERS)
A strategy for dynamic interpretation: A fragment and an implementation
[CWI-CS-R9317] p 2970 N94-27545

NAVIER-STOKES EQUATION
Riemann solvers for solving the incompressible Navier-Stokes equations using the artificial compressibility method
[CRANFIELD-AERO-9208] p 2790 N94-25778
A numerical determination of bifurcation points for low Reynolds number conical flows
[AD-A273984] p 2791 N94-25991
Comments regarding two upwind methods for solving two-dimensional external flows using unstructured grids
[NASA-TM-109078] p 2644 N94-26154
Computational prediction of isolated performance of an axisymmetric nozzle at Mach number 0.90
[NASA-TM-4506] p 2646 N94-26547
The dynamics of interacting nonlinearities governing long wavelength driftwave turbulence
[DE94-001785] p 2793 N94-26558
Numerical studies on the dynamics of bubble, turbulent, free shear flows: Effect of the inter-phase coupling on the global flow evolution
[AD-A274521] p 2794 N94-26832

Numerical simulation of receptivity and transition in a boundary layer on a flat plate with a suction hole
[NASA-CR-195708] p 2798 N94-27782
New constitutive equation for the volume viscosity in fluids
[NASA-TM-109104] p 2798 N94-27867
Navier-Stokes simulation of two and three dimensional jets in crossflow, effects of grid, and boundary conditions p 2804 N94-28026
Theoretical and experimental investigation of a delta wing with turbulent leading-edge jets
p 2659 N94-28029
Recent developments in the simulation of steady and transient transverse jet interactions for missile, rotorcraft, and propulsive applications p 2804 N94-28030
Numerical assessment of aerodynamic interactions on missiles with transverse jets control
p 2659 N94-28031
Navier-Stokes analysis of a swirling jet in crossflow
p 2806 N94-28038
A parallel multigrid algorithm for solving the Navier-Stokes equations on a transputer system
[PREPRINT-699] p 2807 N94-28099
Euler and Navier-Stokes wing/fuselage computations of the De Havilland Dash 8 aircraft p 2654 N94-28329
A study of blunt trailing edge airfoils using the Navier Stokes code: ARC2D p 2656 N94-28340
Thin-layer Navier-Stokes computations for multi-element airfoils p 2656 N94-28341
Solution-adaptive simulation of transonic cascade flows p 2657 N94-28344
Multigrid solutions of the 2D Euler/Navier-Stokes equations on unstructured meshes
p 2658 N94-28349

NAVIGATION
Sensor-based navigation of a mobile robot using automatically constructed fuzzy rules
[DE94-001137] p 2986 N94-26948
Fault detection and isolation p 2642 N94-27289

NAVIGATION AIDS
A simulation of GPS and differential GPS sensors
p 2666 N94-27918

NAVIGATION INSTRUMENTS
Dead reckoning navigation
[VTT-TIED-1402] p 2664 N94-25808
A simulation of GPS and differential GPS sensors
p 2666 N94-27918

NAVIGATION SATELLITES
A GPS coverage model p 2642 N94-27292

NAVY
Report of the defense science board task force on aircraft assessment
[AD-A274531] p 2669 N94-26835
The NOGAPS ten year AMIP integration
[AD-A274332] p 2900 N94-26887

NEAR FIELDS
Nonlinear hysteresis in an endochronic solid
[AD-A274594] p 2880 N94-26855
Experiments into the scaling parameters required for exhaust gas ingestion testing of vertical landing aircraft
p 2671 N94-28017

NEAR INFRARED RADIATION
Multivariate calibration applied to near-infrared spectroscopy for the quantitative analysis of dilute aqueous solutions
[DE94-003231] p 2716 N94-26794
Development and evaluation of a near infrared reflecting and low visibility paint scheme for RAAF P-3C Orion aircraft
[AD-A274881] p 2669 N94-26864
Planetary Instrument Definition and Development Program (PIDDP). Instrument for future planetary flight missions: A visible-infrared imaging spectrometer for planetary missions
[NASA-CR-195254] p 3106 N94-27409
Evaluation of near-infrared spectrophotometric method for individual tolerance to +Gz acceleration
p 2933 N94-27944

NEAR WAKES
Flow past a circular cylinder with a permeable wake splitter plate
[AD-A273765] p 2790 N94-25872
The effects of three-dimensional imposed 3-d disturbances on bluff-body near wake flows
[AD-A274845] p 2791 N94-26187
Nominally 2-dimensional flow about a normal flat plate
[AD-A274472] p 2794 N94-27026
Research on bluff body vortex wakes
[AD-A273780] p 2796 N94-27319

NEBULAE
Investigations of the dynamical evolution of protoplanetary nebulae
[NASA-CR-195278] p 3105 N94-27428

NEGATIVE IONS
High gas-efficiency hydrogen negative ion sources
[PB93-232163] p 3025 N94-27348

NEODYMIUM
Hypersensitive transition spectrum of f-element and coordination structure
[DE94-604133] p 3070 N94-27843

NEODYMIUM LASERS
Elastic backscattering lidar for a MSTI satellite
[DE94-002701] p 2816 N94-26126
Development of surgical CW Nd:YAG laser with optical fiber delivery system
[DE93-632902] p 2817 N94-26185
Development of high average power industrial Nd:YAG laser with peak power of 10 kW class
[DE93-633201] p 2818 N94-26520
Beam-quality measurements for materials processing lasers and the proposed ISO standard
[DE94-002738] p 2819 N94-26811

NEON
Laser manipulation of metastable neon atoms
[ETN-94-95344] p 2817 N94-26225

NEON ISOTOPES
The Cherenkov hadronic like-jets
[DE93-634525] p 3016 N94-26010

NEOPLASMS
Molecular biological studies on the human radioresistance and drug resistance
[DE93-632682] p 2910 N94-26549

NEPHANALYSIS
Short-range cloud amount forecasting with model output statistics
[AD-A274769] p 2895 N94-26798

NEPTUNE (PLANET)
Analysis of energetic proton and electron data in Neptune's magnetosphere
[NASA-CR-195707] p 3107 N94-27784

NERVES
Disturbed neuronal migration in the cerebral cortex of mice by low-dose gamma radiation
p 2904 N94-27470
Abnormal development of serotonin nerve fibers in the cerebral cortex of young rats with methylazoxymethanol induced microcephaly p 2905 N94-27485
Inductive differentiation of nerve cells in mouse embryonic ectoderm at early primitive streak stage by retinoic acid p 2905 N94-27488

NERVOUS SYSTEM
Influence of mechanical stimulation on inflammatory edema p 2906 N94-27497
The effect of naloxone on sleeping time in adjuvant arthritic rats p 2906 N94-27498
Effects of capsaicin on freshly dissociated rat dorsal root ganglion cells p 2906 N94-27499
Size distribution of retrogradely labeled dorsal root ganglion cells: Test of normality p 2906 N94-27500
Interaction between endogenous opioid and Cholecystokinin (CCK) in modulating respiratory responses induced by thin-fiber muscular afferents
p 2906 N94-27502
Electrical coupling between the sino-atrial node and atrial muscle: Cell to cell interaction through an external circuit and its simulation by computer modeling
p 2907 N94-27509
Correlation between electrical activity and the size of single sinoatrial node cells p 2907 N94-27513
The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experimental study in rabbit single sinoatrial node cells
p 2908 N94-27514
The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experiments using small sinoatrial node tissue preparations isolated from rabbit hearts p 2908 N94-27515
The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Postganglionic vagal stimulation in isolated rabbit hearts
p 2908 N94-27516
Hyperalgesia to cold in patients with Subacute Myelo-Optico-Neuropathy (SMON) p 2928 N94-27521

NETHERLANDS
Remote sensing and GIS for the management and investigation of the Wadden Sea
[BCRS-92-20] p 2847 N94-26228

NETWORK ANALYSIS
Development of a 4-bit parallel analog-to-digital converter and a four-quadrant double-balanced mixer using heterojunction bipolar transistor technology
[AD-A274074] p 2947 N94-25648
New mixed integer algorithm for classification and placement of measurements in process flow networks
[PB94-126752] p 2966 N94-26921
Integrated model development for liquid fueled rocket propulsion systems
[NASA-CR-195253] p 2702 N94-27166

NEURAL NETS
Color image segmentation
[AD-A274027] p 2984 N94-25759
A feasibility study on bird classification with neural network
[AD-A273753] p 2659 N94-25780
Neural networks for dynamic flight control
[AD-A274089] p 2676 N94-25785
Predicting nonlinear time series
[AD-A274051] p 2990 N94-25834
The AFIT multielectrode array for neural recording and simulation: Design, testing, and encapsulation
[AD-A274086] p 2909 N94-25943
Adaptive optimization and control using neural networks
[DE94-003941] p 2985 N94-25983
Zernike moments and rotation invariant object recognition. A neural network oriented case study
[AD-A273749] p 2767 N94-26011
Asymptotically stable neural networks for identification of nonlinear dynamic systems
[ISBN-0-315-84328-4] p 2985 N94-26629
Parallel computational geometry on analog Hopfield networks
[ISBN-0-315-84093-5] p 2980 N94-26635
Smart structures, an overview
[AD-A274147] p 2987 N94-27093
Translation and rotation invariant pattern recognition
[PB94-123676] p 2968 N94-27157
Motion analysis from a sequence of range images
[ISBN-0-315-84684-4] p 2969 N94-27311
Center for space microelectronics technology
[NASA-CR-195282] p 2786 N94-27574
On modeling and controlling intelligent systems
[DE94-002446] p 2988 N94-27706
Neural control of magnetic suspension systems
p 2682 N94-27905
An overview on development of neural network technology p 2990 N94-27913

NEUROBLASTS
Analysis of the Electrically Evoked Response (EER) of the cat p 2908 N94-27519

NEUROLOGY
Muscular activity and its relationship to biomechanics and human performance p 2934 N94-28362

NEUROMUSCULAR TRANSMISSION
Positive chronotropic effect of mechanical stretch on the sinoatrial node: Roles of neurotransmitters and stretch activated channels p 2904 N94-27469
Interaction between endogenous opioid and Cholecystokinin (CCK) in modulating respiratory responses induced by thin-fiber muscular afferents
p 2906 N94-27502
The value of electrical stimulation as an exercise training modality p 2936 N94-28372
The use of biomechanics in the study of movement in microgravity p 2936 N94-28373

NEURONS
Cortical mechanisms of attention, discrimination, and motor response to somesthetic stimuli
[AD-A274163] p 2940 N94-27141
Distribution of GABA immunoreactive neurons in the brain of rolling mouse Nagoya and gamma-irradiated mouse p 2904 N94-27471
Effects of gamma ray radiation on the developing mouse cerebellum: Apoptotic cell death and induction of tissue transglutaminase p 2904 N94-27472
Development of Purkinje cells in vitro
p 2905 N94-27483
Developmental expression of protein kinase C type 1 isozyme in suncus and rat cerebella
p 2905 N94-27484

NEUROPHYSIOLOGY
Top down influences on bottom-up processing
[AD-A274220] p 2939 N94-27072
Cortical mechanisms of attention, discrimination, and motor response to somesthetic stimuli
[AD-A274163] p 2940 N94-27141
Visit to CERMA: Centre d'Etudes et de Recherches de Medecine Aerospatiale, Centre for Studies and Research in Aviation and Space Medicine, Bretigny sur Orge, France, November 16-18, 1992
[PB94-132990] p 2937 N94-28392

NEUROTRANSMITTERS
Annals of the Research Inst. of Environmental Medicine, Nagoya Univ., volume 44
[REPT-44-VOL-44] p 2911 N94-27442
Distribution of GABA immunoreactive neurons in the brain of rolling mouse Nagoya and gamma-irradiated mouse p 2904 N94-27471
The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experimental study in rabbit single sinoatrial node cells
p 2908 N94-27514
The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experiments using small sinoatrial node tissue preparations isolated from rabbit hearts p 2908 N94-27515

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Postganglionic vagal stimulation in isolated rabbit hearts
p 2908 N94-27516

Postnatal changes in the autonomic modulation of L-type Ca(exp 2+) currents of rabbit ventricular cells
p 2931 N94-27535

Desensitization to acethylcholine in pacemaker cells of the sinoatrial node p 2908 N94-27537

The role of beta-adrenoceptor stimulation in the progression of chronic heart failure
p 2932 N94-27541

NEUTRAL ATMOSPHERES

Upper atmosphere neutral and plasma density modeling
[AD-A274768] p 2879 N94-26569

Modeling of the coupled magnetospheric and neutral wind dynamos
[NASA-CR-195273] p 2883 N94-27852

NEUTRAL BEAMS

Heavy neutral beam probe for edge plasma analysis in tokamaks
[DE94-003391] p 3041 N94-25846

New conditioning procedure derived from operating experience with the Common Long-Pulse Ion Source
[DE94-002891] p 3045 N94-26865

High gas-efficiency hydrogen negative ion sources
[PB93-232163] p 3025 N94-27348

Shine through measurements with hydrogen beam in JT-60
[DE94-701113] p 3047 N94-27699

Laser blow-off lithium beam probing with high temporal resolution for edge plasma diagnostics
[DE94-701176] p 2820 N94-27701

NEUTRAL CURRENTS

Flavor changing neutral currents in SU(3) x U(1) models
[DE94-602576] p 3022 N94-26899

First observation of neutral current proton electron scattering at the square root of s = 300 GeV
[DE94-701107] p 3030 N94-27877

NEUTRAL PARTICLES

Secondary particle in background levels and effects on detectors at future hadron colliders
[DE94-003378] p 3011 N94-25598

Two dimensional self-consistent fluid simulation of RF inductive sources
[DE94-003635] p 2767 N94-25937

NEUTRINOS

A research program in experimental and theoretical high energy physics
[DE94-002156] p 3031 N94-25931

Theoretical and experimental studies of elementary physics
[DE94-002310] p 3008 N94-25988

Separation and reconstruction of electron neutrino interaction in the IHEP-JINR neutrino detector and BARS detector
[DE93-634182] p 3019 N94-26393

Physical characteristics of polymethylmethacrylate scintillator SOFG-120
[DE93-634184] p 2810 N94-26395

About possible types of neutrino oscillations
[DE93-634449] p 3020 N94-26508

Constraints on singlet right-handed neutrinos coming from the Z(0)-width
[DE93-634393] p 3022 N94-26766

An analysis of monojet data in p(bar-p) collisions at square root of s equal to 1.8 TEV
[DE94-001822] p 3026 N94-27565

Cosmological constraints on very heavy stable neutrinos
[DE94-601669] p 3117 N94-28066

NEUTRON ABSORBERS

Experiment of neutron multiplication in beryllium
[DE94-604605] p 2742 N94-27730

NEUTRON ACTIVATION ANALYSIS

Study on neutron activation analysis
[DE93-632191] p 3017 N94-26116

NEUTRON BEAMS

On radiation defects in strip detectors
[DE93-616646] p 3015 N94-25916

Neutron reflection interferometry
[DE94-601876] p 2714 N94-26170

Neutron-neutron scattering: Possibility of in-beam experiment
[DE94-606459] p 3027 N94-27682

NEUTRON COUNTERS

Surface physics with cold and thermal neutron reflectometry
[DE94-001447] p 2733 N94-26070

Performance of a 14-MeV neutron generator as an in situ calibration source for TFTR
[DE94-004993] p 3048 N94-27825

NEUTRON DECAY

Radiations from hot nuclei p 3030 N94-27915

NEUTRON DIFFRACTION

Debye-Waller factors of the light actinide metals
[DE94-000685] p 2733 N94-26069

Neutrons in biology
[DE94-701085] p 2903 N94-27862

NEUTRON DISTRIBUTION

Experiment of neutron multiplication in beryllium
[DE94-604605] p 2742 N94-27730

NEUTRON EMISSION

Radiations from hot nuclei p 3030 N94-27915

NEUTRON FLUX DENSITY

Neutron-neutron scattering: Possibility of in-beam experiment
[DE94-606459] p 3027 N94-27682

NEUTRON IRRADIATION

Radiation hardening effects on localized deformation and stress corrosion cracking of stainless steels
[DE94-004308] p 2731 N94-25804

Temperature dependence of static RAM volatility
[DE93-040345] p 2948 N94-26111

Microstructural development in irradiated vanadium alloys
[DE94-004307] p 2737 N94-26556

Geological Dating by Ar-40 - Ar-39 method
[DE94-601975] p 2880 N94-26874

NEUTRON SCATTERING

Morphological analysis of ionomers
[DE94-003660] p 2749 N94-26005

Neutron reflection interferometry
[DE94-601876] p 2714 N94-26170

Neutrons in biology
[DE94-701085] p 2903 N94-27862

NEUTRON SOURCES

Toroidal plasma beta-FLR limit in a toroidally linked mirror system
[DE94-003119] p 3041 N94-25792

Surface physics with cold and thermal neutron reflectometry
[DE94-001447] p 2733 N94-26070

Atomic processes in Inertial Electrostatic Confinement (IEC) devices
[DE94-005015] p 3047 N94-27715

Performance of a 14-MeV neutron generator as an in situ calibration source for TFTR
[DE94-004993] p 3048 N94-27825

NEUTRON STARS

Dibaryon-induced instability of neutron stars
[DE93-634453] p 3103 N94-26046

TEV emission from close binaries
[DE93-634330] p 3104 N94-26268

Magnetic field induced contributions of supersymmetric particles to energy losses of neutron star
[DE93-634331] p 3104 N94-26269

Gamma ray bursts from the accretion of solid bodies onto high-velocity Galactic neutron stars
[DE94-005006] p 3117 N94-27827

NEUTRONS

Data on parity violation in the compound nucleus and its interpretation
[DE94-003965] p 3013 N94-25820

Index to BROND-2, CENDL-2, ENDF/B-6, JEF-2, JENDL-3
[DE93-634500] p 3016 N94-26034

Fusion Energy Advisory Committee: Advice and recommendations to the US Department of Energy in response to the charge letter of September 1, 1992
[DE93-019842] p 3043 N94-26428

A concurrent, multigroup, discrete ordinates model of neutron transport
[DE94-004334] p 3020 N94-26577

Pre-orbital criticality safety for the NEPSTP mission
[DE94-002600] p 3005 N94-26802

Monte Carlo calculations of low background detector response
[DE94-004593] p 3116 N94-27621

Neutron-neutron scattering: Possibility of in-beam experiment
[DE94-606459] p 3027 N94-27682

Atomic processes in Inertial Electrostatic Confinement (IEC) devices
[DE94-005015] p 3047 N94-27715

Experiment of neutron multiplication in beryllium
[DE94-604605] p 2742 N94-27730

Neutrons in biology
[DE94-701085] p 2903 N94-27862

Radiations from hot nuclei p 3030 N94-27915

NEWS MEDIA

Emerging computer technologies and the news media of the future p 2688 N94-27372

NEWTON METHODS

Correlation between the gravity field and the bathymetry in the North Atlantic Ocean
[ETN-94-95036] p 2899 N94-26108

NEWTON-RAPHSON METHOD

Calculation of a 3-D pose of a known object in a single perspective view
[VTT-PUBS-122] p 2957 N94-25642

NEWTONIAN FLUIDS

Calculation methods for steadily loaded central circumferential groove hydrodynamic journal bearings (guide to use of computer program A9304)
[ESDU-93004] p 2830 N94-28073

Calculation methods for steadily loaded axial groove hydrodynamic journal bearings. Low viscosity process fluid lubrication (guide to use of computer program A9306)
[ESDU-93006] p 2830 N94-28075

NICKEL

Binding of copper and nickel to cavities in silicon formed by helium ion implantation
[DE94-003769] p 3050 N94-25814

Molten salt techniques for reproducible excess heat
[AD-A274935] p 2714 N94-26296

Suppression of thermal grain growth in nickel by prior electron irradiation
[DE94-004602] p 2737 N94-26587

Detection of low-intensity magnetic fields with a magnetostrictive fiber optic sensor
[AD-A274120] p 3037 N94-27062

Development of nickel-metal hydride cell: An update
p 2864 N94-28130

Ni-MH storage test and cycle life test
p 2864 N94-28131

Determination of thermal properties of commercial Ni-MH cells p 2864 N94-28132

NICKEL ALLOYS

Hydrogen trapping with Pd coated alloy films
p 2723 N94-25551

Study on alloy films for hydrogen separation
p 2726 N94-25565

Study on film generation phenomena by particle deposition p 2728 N94-25575

The role of grain boundary chemistry and structure in the environmentally-assisted intergranular cracking of nickel-base alloys
[DE94-003159] p 2732 N94-25954

Influence of helium generation rate and temperature history on mechanical properties of model Fe-Cr-Ni alloys irradiated in FFTF at relatively low displacement rates
[DE94-004264] p 2737 N94-26575

Deformation twinning: Influence of strain rate
[DE94-002693] p 2738 N94-26621

Stability of reference masses 2: The effect of environment and cleaning methods on the surfaces of stainless steel and allied materials
[NPL-DMM(A)-95] p 2738 N94-26653

Experimental measurement of local displacement and chemical pair correlations in crystalline solid solutions
[DE94-001124] p 3065 N94-27251

Current status of research and development on nickel and iron aluminides
[DE94-004247] p 2741 N94-27616

A transmission electron microscope study of Ni4W precipitates in a Ni-37 wt. percent W alloy
[ISBN-0-315-59932-4] p 2743 N94-27803

Effect of different ions on the anodic behaviour of alloy 800 in chloride solutions at high temperature
[DE94-602982] p 2743 N94-27832

Differential scanning calorimetric study of solid state amorphization and crystallization in Zr/Co and Zr/Ni multilayers p 2745 N94-28161

The electrocatalytic oxidation of ethylene and methane, and reduction of oxygen on gas-diffusion electrodes made of amorphous nickel-valve metal-platinum group metal alloys p 2722 N94-28165

CO2 methanation catalysts prepared from amorphous Ni-valve metal alloys containing platinum group elements
p 2745 N94-28166

Mechanical behavior of amorphous alloys at elevated temperatures p 2746 N94-28167

Formation of glassy Pd-Ni-P alloys by mechanical alloying and their structure and thermal stability
p 2746 N94-28168

NICKEL CADMIUM BATTERIES

Characteristics and development report for the T1576 power supply and the MC3935 battery
[DE94-003675] p 2783 N94-26372

Handbook for handling and storage of nickel-cadmium batteries: Lessons learned
[NASA-RP-1326] p 2702 N94-26613

The 1993 NASA Aerospace Battery Workshop
[NASA-CP-3254] p 2860 N94-28100

Summary of NASA Aerospace Flight Battery Systems Program activities p 2860 N94-28101

Advanced energy storage for space applications: A follow-up p 2860 N94-28103

Experimental evaluation of battery cells for space-based radar application p 2860 N94-28104

Screen test for cadmium and nickel plates
p 2860 N94-28106

Analysis for nickel (3 and 4) in positive plates from nickel-cadmium cells p 2861 N94-28107

Calculation of the thermoneutral potential of NiCd and NiH2 cells p 2861 N94-28111

Orbital management and design considerations for NiCd satellite power systems p 2862 N94-28118

TOPEX/Poseidon battery performance during the first year of operation p 2862 N94-28119

Nickel cadmium battery operations on-orbit: Trials, tribulations, and success on the Upper Atmosphere Research Satellite p 2862 N94-28120

Performance test results of ETS-6 Ni-Cd cells p 2863 N94-28121

AF Ni-Cd cell qualification program p 2863 N94-28122

Discriminating performance parameters for 50 amp-hour and 60 amp-hour nickel-cadmium plates and battery cells p 2863 N94-28123

Some observations on battery charge control p 2863 N94-28125

Construction of temperature compensated constant voltage (VT) curves for super Ni-Cd (tm) cells p 2863 N94-28126

NICKEL COMPOUNDS

Successive structural phase transitions in stoichiometric La2NiO4 observed by x ray diffraction [REPT-A-2665] p 3051 N94-25921

Technical report of ISSP. Ser. A, no. 2673: Two successive spin glass transitions in non-diluted Heisenberg-like spin glass Ni(0.42)Mn(0.58) TiO3 [JTN-94-80559] p 2756 N94-27241

NICKEL HYDROGEN BATTERIES

The 1993 NASA Aerospace Battery Workshop [NASA-CP-3254] p 2860 N94-28100

Summary of NASA Aerospace Flight Battery Systems Program activities p 2860 N94-28101

Advanced energy storage for space applications: A follow-up p 2860 N94-28103

Experimental evaluation of battery cells for space-based radar application p 2860 N94-28104

Space Station Freedom NiH2 cell testing program p 2861 N94-28108

Ni-H2 cell characterization for INTELSAT programs p 2861 N94-28109

SAFT nickel hydrogen cell cycling status p 2861 N94-28110

Calculation of the thermoneutral potential of NiCd and NiH2 cells p 2861 N94-28111

Performance model of a recirculating stack nickel hydrogen cell p 2861 N94-28112

Thermal modeling of NiH2 batteries p 2862 N94-28113

Nickel-hydrogen cell reversal characteristics p 2862 N94-28114

Cycle life versus depth of discharge update on modeling studies --- Nickel-Hydrogen Batteries p 2862 N94-28115

Air Force standards for nickel hydrogen battery p 2862 N94-28116

Charge efficiency of Ni/H2 cells during transfer orbit of Telstar 4 satellites p 2862 N94-28117

Discriminating performance parameters for 50 amp-hour and 60 amp-hour nickel-cadmium plates and battery cells p 2863 N94-28123

A pressure based charge control system for the DSPSE NiH2 CPV battery p 2863 N94-28127

Advanced nickel-hydrogen spacecraft battery development p 2863 N94-28129

NICKEL OXIDES

Atomic-scale chemistry of metal surfaces [REPT-A-2657] p 3012 N94-25636

NICKEL PLATE

Screen test for cadmium and nickel plates p 2860 N94-28106

Analysis for nickel (3 and 4) in positive plates from nickel-cadmium cells p 2861 N94-28107

NICKEL ZINC BATTERIES

Exploratory Technology Research Program for Electrochemical Energy Storage [DE94-003479] p 2781 N94-26047

NIGHTGLOW

Upper atmosphere neutral and plasma density modeling [AD-A274768] p 2879 N94-26569

NIMBUS 7 SATELLITE

Nimbus-7 Earth radiation budget calibration history. Part 2: The Earth flux channels [NASA-RP-1335-PT-2] p 2814 N94-27981

NIOBIUM

Experimental results of 40-kA Nb3Al conductor [DE94-701207] p 2788 N94-27821

NIOBIUM ALLOYS

Fracture behavior of 20% Nb particulate reinforced alumina composite [DE94-002830] p 2706 N94-26019

The influence of energy losses with time in NbTi superconductors in pulsed magnetic fields [DE93-634761] p 3058 N94-26512

A tri-junction diffusion couple analysis of the Nb-Cr-Ti system at 950 C [DE94-002637] p 2737 N94-26607

Evaluation of APC NbTi superconductor in a model dipole magnet [DE94-003258] p 3060 N94-26795

The effect of Ti conduit on the critical current in (Nb, Ti)3Sn cable-in-conduit conductors [DE94-701204] p 2788 N94-27817

The corrosion behavior of sputter-deposited magnesium-valve metal alloys p 2745 N94-28164

CO2 methanation catalysts prepared from amorphous Ni-valve metal alloys containing platinum group elements p 2745 N94-28166

NIOBIUM CARBIDES

The influence of weld metal alloying additions to extend the heat input range for the submerged arc welding of high strength steels [AD-A274284] p 2738 N94-26679

NIOBIUM COMPOUNDS

Study on measurement and evaluation methods for superconductive characteristics p 2725 N94-25560

NITRATES

Bulletin of the Institute for Chemical Reaction Science, Tohoku University, volume 2 [JTN-94-80602] p 2717 N94-27385

Reactivity of nitrate radical (NO3) toward organic compounds p 2704 N94-27387

NITRIC OXIDE

UV absorption technique for monitoring mobile source NO emissions [AD-A273858] p 2713 N94-25964

NITRIDING

Combustion synthesis method p 2721 N94-25561

Study on microscopic structural controls and electronic properties at material surfaces by ion beams p 2727 N94-25571

Effect of nitrocarburizing on shape of titanium alloy parts [DE94-004040] p 2732 N94-25822

NITRO COMPOUNDS

Computational studies of energetic organic molecules [AD-A274726] p 3018 N94-26172

NITROGEN

Combustion synthesis method p 2721 N94-25561

The importance of vibrationally excited nitrogen in silicon nitride deposition systems [AD-A274874] p 2750 N94-26167

NITROGEN COMPOUNDS

Phase diagram of La2NiO(4 + delta) (0 less than or equal to delta less than or equal to 0.18). 1: Phases at room temperature and phase transition above delta equal to 0.15 [REPT-A-2661] p 3053 N94-26089

NITROGEN IONS

Study on microscopic structural controls and electronic properties at material surfaces by ion beams p 2727 N94-25571

Energy parameters of the incident auroral electrons derived by the intensity ratio of auroral emissions p 2779 N94-27964

NITROGEN OXIDES

Development of SO(x) and NO(x) solid electrolyte sensors p 2725 N94-25562

Technical Report of National Research Institute of Fisheries Engineering: Fishing Boat and Instrument, No. 12 [JTN-94-80595] p 2764 N94-27976

The emission characteristics of a high speed diesel engine p 2764 N94-27980

Emissions of nitrogen oxides (NO(x) and N2O) in pressurized fluidized bed combustion [PB94-133071] p 2876 N94-28395

NITROGEN TETROXIDE

Freon recovery from nitrogen tetroxide and freon solutions [PL-TR-92-3051] p 2721 N94-28215

NITROUS OXIDES

Implications of policies and prevent climate change for future food security [DE93-018872] p 2866 N94-25948

NOAA SATELLITES

Leadex environmental phenomena and effects observed by DMSP, NOAA, and ERS-1 satellites [AD-A274596] p 2868 N94-26888

NOISE (SOUND)

Bulletin of Precision and Intelligence Laboratory, No. 68 [JTN-94-80609] p 3010 N94-27282

NOISE INTENSITY

VHF-UHF noise surveys at Gulkana, Elmensdorf AFB, Galena AFB, Kotzebue and Cape Lisburne, Alaska and NRL, Pomonkey, Maryland [PL-TR-93-2136] p 2777 N94-28211

NOISE MEASUREMENT

On the application of Allan variance method for Ring Laser Gyro performance characterization [DE94-003880] p 2810 N94-26525

NOISE POLLUTION

Silence amenity engineering: Past and present p 3011 N94-27283

Cooling towers for combined cycles: New developments to meet environmental requirements p 2832 N94-28088

The single European market: Economical advance, ecological problem? p 2661 N94-28235

NOISE PREDICTION

Silence amenity engineering: Past and present p 3011 N94-27283

A modelling of the noise from simple coaxial jets. Part 3: With hot primary flow [ISVR-TR-230-PT-3] p 2807 N94-28173

NOISE PREDICTION (AIRCRAFT)

INM, Integrated Noise Model. Version 4.11: User's guide, supplement [AD-A273885] p 3009 N94-25731

Assessing the effects of Tuned Vibration Absorbers (TVAs) on interior cabin noise levels: A correlation between analytical acoustic predictions and flight test measurements p 2652 N94-28318

NOISE REDUCTION

Evaluation of an Acoustic Charge Transport (ACT) device for adaptive interference suppression in spread spectrum communications systems [AD-A274073] p 2765 N94-25647

High temperature sensor/microphone development for active noise control [NASA-CR-195214] p 2812 N94-27214

Optimising BMW four-cylinder two-valve engines [PB94-125101] p 2824 N94-27254

Silence amenity engineering: Past and present p 3011 N94-27283

Non-adaptive robust filters for speckle noise reduction [INPE-5519-PRE/1794] p 2776 N94-27335

On the use of feedback to control sound radiation from a plate excited by a turbulent boundary layer [ISVR-TR-227] p 2807 N94-28175

Assessing the effects of Tuned Vibration Absorbers (TVAs) on interior cabin noise levels: A correlation between analytical acoustic predictions and flight test measurements p 2652 N94-28318

NOISE SPECTRA

An analysis of FM jamming and noise quality measures [AD-A274349] p 2772 N94-26924

Laser phase induced intensity noise in fiber-optic signal processing and sensing systems [ITN-94-85234] p 2819 N94-27179

Geometrical resonances in the nyquist noise spectrum for ballistic conductors [DE94-603668] p 3027 N94-27631

NOMOGRAPHS

Experimental determination of the CU-IN-PB ternary phase diagram [DE94-003765] p 2735 N94-26349

NONDESTRUCTIVE TESTS

General Motors Corporation and Pacific Northwest Laboratory staff exchange: Inspection of case hardened steels and metal-matrix composites [DE94-003470] p 2706 N94-25982

Non-contact ultrasonic inspection [VTT-TIED-1454] p 2835 N94-26257

Design and life-time of polymer matrix composite structures: Summary [VTT-TIED-1415] p 2707 N94-26260

Development of non-destructive testing technology for the crack of steam generator tubes [DE93-632953] p 2835 N94-26399

Reconstruction of multiple cracks from experimental electrostatic boundary measurements [NASA-CR-191584] p 2994 N94-26601

A comparison of Probability Of Detection (POD) data determined using different statistical methods [LTR-ST-1947] p 2835 N94-26644

Optical surface contouring for non-destructive inspection of turbomachinery [NASA-CR-195245] p 2835 N94-26691

Calculation of the electromagnetic critical state response of high T(sub c) superconductor tape [DE94-002894] p 3061 N94-26868

Space Shuttle main engine turbopump bearing assessment program [NASA-TM-108447] p 2833 N94-28265

NONEQUILIBRIUM CONDITIONS
Nonequilibrium radiation and chemistry models for aerocapture vehicle flowfields
[NASA-CR-195706] p 2648 N94-28071
NONEQUILIBRIUM FLOW
Chemical and vibrational nonequilibrium viscous flows: Modelling, internal and external flow applications
[ESA-TT-1274] p 2791 N94-26316
Approximate Riemann solvers: Improvement of the HLLEM scheme and its generalization for chemically reacting flows
[NAL-TR-1189] p 2795 N94-27205
TVD flux-difference split methods for high-speed thermochemical nonequilibrium flows with strong shocks
[UTIAS-350] p 2799 N94-27880
NONEQUILIBRIUM IONIZATION
Modelling of ionisation reactions and of the resulting electric fields in one-dimensional hypersonic shock waves with the direct simulation Monte Carlo method
[IC-AERO-92-01] p 2644 N94-26248
NONEQUILIBRIUM RADIATION
Nonequilibrium radiation and chemistry models for aerocapture vehicle flowfields
[NASA-CR-195706] p 2648 N94-28071
NONFLAMMABLE MATERIALS
Impact of improved materials and cabin water spray on commuter aircraft postcrash fire survivability
[AD-A274421] p 2660 N94-27081
NONLINEAR EQUATIONS
Selfsimilar solutions of a nonlinear transport equation
[REPT-93-42] p 2865 N94-25760
Predicting nonlinear time series
[AD-A274051] p 2990 N94-25834
Continuation and multi-grid for bifurcation problems
[AD-A274965] p 2992 N94-26302
A parametric sensitivity study for single-stage-to-orbit hypersonic vehicles using trajectory optimization
[NASA-CR-195703] p 2697 N94-27789
Nonlinear solvers p 2829 N94-28053
NONLINEAR FILTERS
White noise theory of robust nonlinear filtering with correlated state and observation noises
[PB94-126661] p 3004 N94-27211
NONLINEAR OPTICS
Extension of On-Surface Radiation Condition (OSRC) theory to full-vector electromagnetic wave scattering by three-dimensional conducting, dielectric, and coated targets
[AD-A274023] p 2766 N94-25757
Studies of non-linear optical effects for agile beam steering
[AD-A273998] p 3034 N94-25902
Microtubules for nonlinear optical limiting
[AD-A273940] p 3035 N94-25941
Three-wave nonlinear interactions in KTiOPO4 (KTP) and KTP isomorphs
[AD-A274079] p 3052 N94-25993
Instantaneous amplitude and frequency dynamics of coherent wave mixing in semiconductor quantum wells
[DE94-003262] p 3054 N94-26128
Peculiarities and application perspectives of metal-ion implants in glasses
[DE94-004671] p 3035 N94-26246
An x ray absorption fine structure study of ordering in polythiophene thin films
[AD-A274235] p 2753 N94-26822
Research and development within nonlinear optics for protection of optical sensors against laser irradiation on of optical sensors against laser irradiation. Quarterannual report 1 (april 1993))
[PB94-124245] p 3037 N94-27046
Polyimide/inorganic composite-interpenetrating polymer network for stable second-order nonlinear optics
[AD-A274646] p 2709 N94-27107
Accordion-like polymers for nonlinear applications
[AD-D016031] p 2755 N94-27148
Predoctoral training grant in the area of physical sciences
[DE94-004406] p 3039 N94-27603
Optical pattern recognition system utilizing resonator array
[AD-D016071] p 3040 N94-28224
NONLINEAR PROGRAMMING
Unifying investigation of interior-point methods for convex programming
[PB94-126463] p 2967 N94-27031
NONLINEAR SYSTEMS
Characterization of nonlinear effects in optically pumped vertical cavity surface emitting lasers
[AD-A273840] p 2815 N94-25744
Evaluation of moderate angle of attack roll of a dual engine, thrust vectoring aircraft using quantitative feedback theory
[AD-A274118] p 2667 N94-25905
Determination of the geomagnetic external contribution by nonlinear optimization methods
[DE94-600882] p 2878 N94-26365
On the phi(sub 0)-stability of perturbed nonlinear differential systems
[DE93-634304] p 2993 N94-26441
Asymptotically stable neural networks for identification of nonlinear dynamic systems
[ISBN-0-315-84328-4] p 2985 N94-26629
Computation of stress intensity factors by the mode enrichment technique with applications to geometrically nonlinear problems
[PB94-126513] p 2840 N94-26910
Some aspects of nonlinear discrete-time descriptor systems in economics
[PB94-126653] p 3101 N94-26918
Parallel mathematical software
[DE94-001587] p 2967 N94-27020
Development of K(1-x)Na(x)TiOPO4 crystals for nonlinear applications
[AD-A274336] p 3063 N94-27055
Control oriented system identification
[AD-A274162] p 2987 N94-27124
Center for nonlinear phenomena and magnetic materials
[AD-A274176] p 3009 N94-27126
Operator theoretic methods in the control of distributed and nonlinear systems
[AD-A274160] p 2988 N94-27139
The onset of chaos in a periodically forced nonlinear oscillator
[ISBN-0-315-84564-3] p 2842 N94-27272
The deterministic power-spectral-density method
[AD-B175894] p 2678 N94-27395
Control system for tracking nonlinear systems
[AD-D016057] p 2787 N94-27673
Super finite elements for nonlinear static and dynamic analysis of stiffened plate structures
[ISBN-0-315-63903-2] p 2844 N94-27808
Neural control of magnetic suspension systems
p 2682 N94-27905
The deterministic power-spectral-density-method for nonlinear systems
[AD-B179687] p 3001 N94-28353
NONLINEARITY
A comparison of three approximate mathematical models for the gravity gradient stabilized satellite
[AD-A273832] p 2694 N94-25615
Microtubules for nonlinear optical limiting
[AD-A273940] p 3035 N94-25941
Three-wave nonlinear interactions in KTiOPO4 (KTP) and KTP isomorphs
[AD-A274079] p 3052 N94-25993
Nonlinear ocean waves
[AD-A274651] p 2899 N94-26354
Determination of the geomagnetic external contribution by nonlinear optimization methods
[DE94-600882] p 2878 N94-26365
Nonlinear dynamics and pattern selection at the crystal-melt interface
[DE94-003112] p 3060 N94-26780
Nonlinear hysteresis in an endochronic solid
[AD-A274594] p 2880 N94-26855
Center for nonlinear phenomena and magnetic materials
[AD-A274176] p 3009 N94-27126
Optimal nonlinear estimation for aircraft flight control in wind shear p 2643 N94-27296
Transmittance fluctuations and non-linearity in random chains in the presence of applied electric fields
[DE94-603665] p 2787 N94-27628
Optical parametric oscillator modeling with diffraction, depletion, and double refraction
[DE94-001504] p 3040 N94-27999
NONPARAMETRIC STATISTICS
Introduction to bayesian nonparametric theory
[PB94-125002] p 3004 N94-26939
NONUNIFORM MAGNETIC FIELDS
Using ferro-magnetic fluids to lubricate non-conformal isothermal contacts
[INPE-5520-TAE/021] p 2827 N94-27665
NONUNIFORMITY
Radial basis function approximation: From gridded centers to scattered centers
[AD-A274184] p 2998 N94-27103
NOREPINEPHRINE
The role of beta-adrenoceptor stimulation in the progression of chronic heart failure
p 2932 N94-27541
NORMAL DENSITY FUNCTIONS
Simulating high-frequency wind for long durations
[DE94-002739] p 2682 N94-27997
NORMAL SHOCK WAVES
Modelling of ionisation reactions and of the resulting electric fields in one-dimensional hypersonic shock waves with the direct simulation Monte Carlo method
[IC-AERO-92-01] p 2644 N94-26248
NORMALITY
Size distribution of retrogradely labeled dorsal root ganglion cells: Test of normality p 2906 N94-27500
NORTH AMERICA
Propagation of cold air masses in East Asia and its associated planetary-scale function
[AD-A274304] p 2895 N94-26850
NORTH SEA
Macrobenthic fauna in the dutch sector of the north sea in 1991
[PB94-126414] p 2868 N94-27200
NORTHERN SKY
Sloan Digital Sky Survey
[DE94-004662] p 3103 N94-27750
NORWAY
Norwegian ionospheric satellite experiment: High latitude, low Earth orbit plasma measurements
[FFI-93/7025] p 2876 N94-25807
NOSES (FOREBODIES)
Controlled oscillation of forebody vortices by nozzle jet blowing
[ISBN-0-315-84134-6] p 2678 N94-27648
Pneumatic management of blunted-forebody flow asymmetry for high-angle-of-attack directional control
p 2679 N94-28028
NOTCH SENSITIVITY
Investigation of compressive behavior for metal matrix composites with a circular hole
[AD-A273835] p 2705 N94-25739
NOTCH STRENGTH
Structure and properties of intermetallic composites synthesized in situ using solid state displacement reactions
[DE94-004312] p 2705 N94-25805
NOTCH TESTS
Structure and properties of intermetallic composites synthesized in situ using solid state displacement reactions
[DE94-004312] p 2705 N94-25805
NOTCHES
Effects of crenulations on three dimensional losses in a linear compressor cascade
[AD-A273778] p 2790 N94-25862
NOZZLE DESIGN
Controlled oscillation of forebody vortices by nozzle jet blowing
[ISBN-0-315-84134-6] p 2678 N94-27648
The interaction region associated with twin jets and a normal crossflow p 2800 N94-28009
NOZZLE FLOW
Chemical and vibrational nonequilibrium viscous flows: Modelling, internal and external flow applications
[ESA-TT-1274] p 2791 N94-26316
Numerical investigation of thrust vectoring by injection of secondary air into nozzle flows p 2801 N94-28013
Experiments on interaction force of jets in hypervelocity cross-flow in a shock tunnel p 2659 N94-28022
A study of jet effect and ground effect interference on a STOL fighter p 2671 N94-28034
NOZZLE GEOMETRY
Computational prediction of isolated performance of an axisymmetric nozzle at Mach number 0.90
[NASA-TM-4506] p 2646 N94-26547
NOZZLES
Gas-turbine engine steady-state behavior
p 2828 N94-28044
NUCLEAR BINDING ENERGY
Binding of copper and nickel to cavities in silicon formed by helium ion implantation
[DE94-003769] p 3050 N94-25814
Three methods to measure RH bond energies
[DE94-003795] p 3013 N94-25816
The structural, chemical, and electrical properties of He-implantation-induced nanocavities in silicon
[DE94-002681] p 3052 N94-25971
NUCLEAR CHEMISTRY
Radiochemistry Division annual progress report : 1991
[DE94-600652] p 2715 N94-26392
TRIUMF scientific activities
[CTN-94-61062] p 3117 N94-26656
NUCLEAR ELECTRIC POWER GENERATION
Mars transportation system p 2833 N94-25689
The First Energy Conference: Israel and the Former USSR
[ISBN-965-229-098-X] p 2853 N94-26050
Present situation of the development of petroleum substitution energy (France)
[DE94-725201] p 2760 N94-26914
International bulletin on atomic and molecular data for fusion. No. 42-45, Mar. 1991 - Dec. 1992
[DE94-601817] p 3045 N94-26946

International bulletin on atomic and molecular data for fusion. No. 46 [DE94-601818] p 3023 N94-26947

NUCLEAR ELECTRIC PROPULSION

Characteristics and control response of the TOPAZ 2 reactor system real-time dynamic simulator [DE94-003788] p 2699 N94-25600

Risk perspectives for Topaz 2 flight mission [DE94-003229] p 2700 N94-25956

Nuclear electric propulsion for future NASA space science missions [DE93-019086] p 2700 N94-25969

NUCLEAR EXPLOSIONS

Research in pulsed power plasma physics [AD-A274323] p 3045 N94-27074

NUCLEAR FUEL ELEMENTS

Space-R thermionic space nuclear power system design and technology demonstration [DE94-002017] p 2700 N94-25930

NUCLEAR FUELS

Grain by grain study of the mechanisms of crack propagation during iodine SCC of Zry-4 [DE93-633765] p 2734 N94-26162

Nonswelling behavior of HT9 alloy irradiated to high exposure [DE94-003502] p 2736 N94-26522

Application of railgun principle to high-velocity hydrogen pellet injection for magnetic fusion reactor fueling [DE94-004411] p 3044 N94-26579

List of papers published by the members of Institute for Materials Research, Tohoku University 1992 [JTN-94-80608] p 3118 N94-27355

Fuel ion rotation measurement and its implications on H-mode theories [DE94-004860] p 3048 N94-27791

NUCLEAR FUSION

Fusion Energy Advisory Committee: Advice and recommendations to the US Department of Energy in response to the charge letter of September 1, 1992 [DE93-019842] p 3043 N94-26428

Researches of the Electrotechnical Laboratory. No. 51: Study of formation and sustainment of reversed field pinch by slow control of magnetic field [JTN-94-80548] p 3046 N94-27350

NUCLEAR INTERACTIONS

Energy concentration in high energy hadron-gamma families p 3113 N94-25632

A search for the production of direct leptons in nucleon-nucleus and nucleus-nucleus collisions [DE94-004640] p 3018 N94-26244

Stopping powers and cross sections due to two-photon processes in relativistic nucleus-nucleus collisions [NASA-CR-4574] p 3033 N94-27646

NUCLEAR MAGNETIC RESONANCE

Microscopic study of local structure and charge distribution in metallic La2CuO(4+delta) [DE94-003801] p 3050 N94-25817

Morphological analysis of ionomers [DE94-003660] p 2749 N94-26005

Use of oxygen-17 isotope in the characterization of zeolites and related structures by nuclear magnetic resonance spectroscopy [VTT-TIED-1448] p 2714 N94-26251

Technical report of ISSP. Ser. A, no. 2681: Orbital and spin susceptibilities of the plane copper sites in YBa2Cu3O(x) system [JTN-94-80567] p 3064 N94-27177

Technical report of ISSP. Ser. A, no. 2683: Itinerant character of 5f electrons in UNi2Ga [JTN-94-80569] p 3025 N94-27337

NMR study of quasicrystal Al(70)Pd(20)T(M10) alloy (T(M):Cr, Mn, Fe, and Co) p 2745 N94-28162

NUCLEAR MEDICINE

TRIUMF scientific activities [CTN-94-61062] p 3117 N94-26656

NUCLEAR MODELS

Hadron jets and nucleon clusters in the relativistic nuclear collisions [DE93-613434] p 3031 N94-25850

Nucleon-nucleon scattering lengths in QCD sum rules [DE93-520239] p 3015 N94-25922

NUCLEAR PHYSICS

Theoretical and computational studies in intermediate energy nuclear physics [DE94-004177] p 3012 N94-25800

Pion-nucleus interactions and the STAR experiment at RHIC [DE94-000658] p 3021 N94-26586

TRIUMF scientific activities [CTN-94-61062] p 3117 N94-26656

Nuclear Theory Group, University of Washington recent and planned research [DE94-002729] p 3022 N94-26809

Quantum chromodynamics and nuclear physics at extreme energy density [DE94-004418] p 3026 N94-27604

Electroweak and other interactions in medium-energy nuclear physics [DE94-004161] p 3027 N94-27689

Future directions in particle and nuclear physics at multi-GeV hadron beam facilities [DE94-002946] p 3027 N94-27711

Proceedings of the workshop on (pi), K, (eta)-nucleon interactions [DE94-701314] p 3027 N94-27733

NUCLEAR POWER PLANTS

Fire simulation based on convection calculation [VTT-TIED-1411] p 2762 N94-26259

Development of an automated fracture assessment system for nuclear structures (appendix 1/1) p 2841 N94-27187

NUCLEAR POWER REACTORS

Small low mass advanced PBR's for bi-modal operation [DE94-003201] p 2699 N94-25798

NUCLEAR PROPULSION

A review of carbide fuel corrosion for nuclear thermal propulsion applications [DE94-003938] p 2699 N94-25613

Mars transportation system p 2833 N94-25689

Small low mass advanced PBR's for bi-modal operation [DE94-003201] p 2699 N94-25798

An assessment of testing requirement impacts on nuclear thermal propulsion ground test facility design [DE94-002933] p 2702 N94-26560

NUCLEAR QUADRUPOLE RESONANCE

Microscopic study of local structure and charge distribution in metallic La2CuO(4+delta) [DE94-003801] p 3050 N94-25817

Technical report of ISSP. Ser. A, no. 2683: Itinerant character of 5f electrons in UNi2Ga [JTN-94-80569] p 3025 N94-27337

NUCLEAR REACTIONS

Data on parity violation in the compound nucleus and its interpretation [DE94-003965] p 3013 N94-25820

Hadron jets and nucleon clusters in the relativistic nuclear collisions [DE93-613434] p 3031 N94-25850

Index to BROND-2, CENDL-2, ENDF/B-6, JEF-2, JENDL-3 [DE93-634500] p 3016 N94-26034

Radiochemistry Division annual progress report : 1991 [DE94-600652] p 2715 N94-26392

Measurements of the p (mu)d-molecule formation rate at different hydrogen temperature [DE93-634636] p 3020 N94-26511

NUCLEAR REACTORS

A review of carbide fuel corrosion for nuclear thermal propulsion applications [DE94-003938] p 2699 N94-25613

HDR reactor containment fire modeling with BRI2 [VTT-PUBS-113] p 3031 N94-25621

Overall analysis of meteorological information in the Daeduk nuclear complex [DE93-632594] p 2894 N94-26469

Mesoscale meteorological measurements characterizing complex flows [DE94-002359] p 2895 N94-26761

Neutron-neutron scattering: Possibility of in-beam experiment [DE94-606459] p 3027 N94-27682

NUCLEAR ROCKET ENGINES

Project WISH: The Emerald City p 2703 N94-25690

NUCLEAR SCATTERING

A dependence of exclusive vector meson production in muon-nucleus scattering [DE94-003363] p 3016 N94-25957

Jet production in muon scattering at Fermilab E665 [DE94-004663] p 3028 N94-27752

NUCLEAR STRUCTURE

Nucleon-nucleon scattering lengths in QCD sum rules [DE93-520239] p 3015 N94-25922

Nuclear Theory Group, University of Washington recent and planned research [DE94-002729] p 3022 N94-26809

NUCLEAR WARHEADS

Propellants and explosives in ballistic missiles [UCRL-LR-113578] p 2760 N94-28222

NUCLEATION

Dissolution of secondary phases during extrusion [PB94-124583] p 2732 N94-25908

Study of precipitation and recrystallization in Al alloy 2519 by backscattered electron imaging methods [AD-A274919] p 2736 N94-26533

Pseudomorphic semiconducting heterostructures from combinations of AIN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device development [AD-A274247] p 3061 N94-26841

Controlled heterogeneous nucleation of melt-textured YBa2Cu3O(6+x) by addition of Al2O3 particles [AD-A274605] p 3062 N94-26892

Development of K(1-x)Na(x)TiOPO4 crystals for nonlinear applications [AD-A274336] p 3063 N94-27055

NUCLEI (NUCLEAR PHYSICS)

Correlations in inelastic collisions of relativistic nuclei with emulsion at (4.1 - 4.5) A GeV/c [DE93-634526] p 3030 N94-27994

NUCLEON-NUCLEON INTERACTIONS

Separable expansions of the NN t-matrix by way of exact half off the energy shell methods [DE94-601615] p 3015 N94-25890

Nucleon-nucleon scattering lengths in QCD sum rules [DE93-520239] p 3015 N94-25922

NUCLEON-NUCLEON SCATTERING

Theoretical and computational studies in intermediate energy nuclear physics [DE94-004177] p 3012 N94-25800

Nucleon-nucleon scattering lengths in QCD sum rules [DE93-520239] p 3015 N94-25922

NUCLEONS

Theoretical and computational studies in intermediate energy nuclear physics [DE94-004177] p 3012 N94-25800

Hadron jets and nucleon clusters in the relativistic nuclear collisions [DE93-613434] p 3031 N94-25850

Nucleon-nucleon scattering lengths in QCD sum rules [DE93-520239] p 3015 N94-25922

Theoretical and experimental studies of elementary physics [DE94-002310] p 3008 N94-25988

The STAR experiment at the Relativistic Heavy Ion Collider [DE94-003409] p 3017 N94-26083

Rescattering and energy loss of fast partons in nuclear matter [DE94-002918] p 3018 N94-26145

Proceedings of the workshop on (pi), K, (eta)-nucleon interactions [DE94-701314] p 3027 N94-27733

Study of invisible nucleon decay, N approaches nu nu nu bar, and a forbidden nuclear transition in the Kamiokande detector [ICRR-299-93-11] p 3028 N94-27759

NULL HYPOTHESIS

Wieand's theorem [PB94-126711] p 3004 N94-27223

NUMBER THEORY

Fast methods for computation with algebraic numbers [ISBN-0-315-57888-2] p 2998 N94-27269

NUMERICAL ANALYSIS

Studies in nonlinear numerical analysis [AD-A273911] p 2959 N94-25968

Analysis and computer tools for separation processes involving nonideal mixtures [DE94-004162] p 2960 N94-25986

A transient symmetrical method for the measurement of temperature dependent thermal diffusivity [VTT-TIED-1452] p 3008 N94-26256

Continuation and multi-grid for bifurcation problems [AD-A274965] p 2992 N94-26302

A robust upwind discretization method for advection, diffusion and source terms [CWI-NM-R9308] p 2868 N94-26774

Computer program for numerical evaluation of the performance of an overmoded TM01 circular to TE10 rectangular waveguide mode converter [AD-A274548] p 2771 N94-26844

Improved numerical methods for quantum field theory (Outstanding Junior Investigator Award) [DE94-001793] p 3073 N94-27002

Numerical and experimental analyses of the radiant heat flux produced by quartz heating systems [NASA-TP-3387] p 3011 N94-27659

The calculation for energy balance of heating plasmas by Alfven waves [DE94-604994] p 3049 N94-27855

A laboratory test on construction of ice domes and their load-carrying capacity p 2884 N94-27966

Numerical simulation of turbulent free jet by TFKE model p 2871 N94-28157

NUMERICAL CONTROL

Graphical programming at Sandia National Laboratories [DE94-003803] p 2958 N94-25818

A large high vacuum, high pumping speed space simulation chamber for electric propulsion [NASA-TM-106453] p 2690 N94-26142

New Thomson scattering laser control for D3-D [DE94-002890] p 3043 N94-26274

Automated system for gas detectors providing with binary mixtures [DE93-634192] p 2715 N94-26406

Low-cost photovoltaic inverters incorporating application-specific integrated circuits
[DE94-003270] p 2856 N94-26463
Distributed Nd:YAG laser welding and process control in inert glove boxes
[DE94-002629] p 2818 N94-26605
Virtual data
[DE94-002718] p 2986 N94-26807
Object-oriented software construction at ALS
[DE94-003418] p 2967 N94-27049
The universal robot p 2686 N94-27361
Inverted pendulum control apparatus using transputers
[DE94-701224] p 2973 N94-27732
Experimental apparatus for optimization of flap position for a three-element airfoil model p 2682 N94-27912

NUMERICAL FLOW VISUALIZATION
Numerical simulation of turbulent free jet by TFKE model p 2871 N94-28157

NUMERICAL INTEGRATION
Geoid determination: With help of the alternative scattering method
[ETN-94-95375] p 2847 N94-25746
Analysis and control of hourglass instabilities in underintegrated linear and nonlinear elasticity
[NASA-CR-195293] p 2846 N94-28266

NUMERICAL STABILITY
Parameter estimation for ARMA models with infinite variance innovations
[AD-A274654] p 3003 N94-26355
Analysis and control of hourglass instabilities in underintegrated linear and nonlinear elasticity
[NASA-CR-195293] p 2846 N94-28266

NUMERICAL WEATHER FORECASTING
Development and testing of the Coupled Ocean/Atmosphere Mesoscale Prediction System (COAMPS)
[AD-A273925] p 2892 N94-25793
Testbed model and data assimilation for ARM
[DE94-000432] p 2893 N94-26082
Simulation of the Indian and East-Asian summer monsoon in the ECMWF model: Sensitivity to horizontal resolution
[DE94-004276] p 2897 N94-27571

NUSSELT NUMBER
Validated heat-transfer and pressure-drop prediction methods based on the discrete-element method. Phase 2: Two-dimensional rib roughness
[DE94-002379] p 2794 N94-26763
Forced convection heat transfer in straight tubes. Part 2: Laminar and transitional flow
[ESDU-93018-PT-2] p 2807 N94-28139

NUTATION
Wobble-nutation modes of the Earth
[ISBN-0-315-84246-6] p 3102 N94-26669

NUTRITION
Visit to CERMA: Centre d'Etudes et de Recherches de Medecine Aerospatiale, Centre for Studies and Research in Aviation and Space Medicine, Bretigny sur Orge, France, November 16-18, 1992
[PB94-132990] p 2937 N94-28392

NYQUIST DIAGRAM
Parameter estimation of linear systems from frequency response measurements (computer program)
[ESDU-93016] p 2976 N94-28137

NYQUIST FREQUENCIES
Investigation of spectral analysis techniques for randomly sampled velocimetry data
p 3009 N94-27924

NYSTAGMUS
Vertical gaze direction during parabolic flight
p 2913 N94-27453
The mechanism of caloric nystagmus under microgravity. 1: Changes of endolymphatic pressure in the semicircular canal of pigeon by caloric stimulation
p 2914 N94-27457

O

O RING SEALS
Outgas and vacuum seal characteristics of irradiated polyimide O-ring
[DE94-701200] p 2757 N94-27812

OBJECT-ORIENTED PROGRAMMING
Proposed Object Oriented Programming (OOP) enhancements to the Very High Speed Integrated Circuits (VHSIC) Hardware Description Language (VHDL)
[AD-A274004] p 2957 N94-25661
Performance measurement of three commercial object-oriented database management systems
[AD-A274028] p 3096 N94-25765
Domain analysis and modeling of a model-based software executive
[AD-A274087] p 2958 N94-25783
Object-oriented design and implementation of a parallel Ada simulation system
[AD-A274119] p 2979 N94-25906
Object interaction in a parallel object-oriented discrete-event simulation
[AD-A274084] p 2959 N94-25942
Using database technology to support domain-oriented application composition systems
[AD-A274091] p 3096 N94-26024
Coordinated scheduling for dynamic real-time systems
[NASA-CR-195231] p 3093 N94-26206
MATRA Marconi Space: The Silex on-board processor and on-board software p 2950 N94-26726
Implementing hard real-time systems: A case study
p 2951 N94-26731
Developing with Ada using HOOD design methodology
p 2953 N94-26741
The CODE-TOP (COncurrent system DEvelopment using Transformations Of Predicate-transition nets) method: Examples of using it for system architecture specification, software specification, and code generation p 2953 N94-26744
A formalization of objects using equational dynamic logic
[PB94-125218] p 2965 N94-26852
Example of the EXPANSE signalling protocol
[PB94-125283] p 2771 N94-26872
Object-oriented software construction at ALS
[DE94-003418] p 2967 N94-27049
An object-oriented database interface for Ada
[AD-A274391] p 2968 N94-27075
Active database architectures and the design of sentinel for constraint management
[AD-A274205] p 3099 N94-27101
Parallel computers for advanced information processing p 2955 N94-27193
Schema integration in object-oriented databases
[CWI-CS-R9320] p 2970 N94-27548
An object model for multimedia programming
[CWI-CS-R9327] p 2971 N94-27552
Comparison of Object-Oriented Analysis and Design Methods: A Collection of Papers
[MEMO-INF-92-69] p 2975 N94-27936
A formal approach to the comparison of object-oriented analysis and design methodologies
p 2975 N94-27937
Object-oriented development methods
p 2975 N94-27938
CASE tools for the support of object-oriented analysis and design methods p 2975 N94-27939

OCEAN BOTTOM
Coupling of pelagic and benthic communities over a seamount in the Eastern North Pacific
[AD-A274750] p 2899 N94-26149
Topics in longshore currents
[AD-A274788] p 2899 N94-26361
Macrobenthic fauna in the dutch sector of the north sea in 1991
[PB94-126414] p 2868 N94-27200
An extraterrestrial event at the tertiary-quaternary boundary p 2890 N94-28309

OCEAN CURRENTS
A study on structure of benthic boundary layer in coastal waters
[REPT-4] p 2898 N94-25635
Hydrographic and Acoustic Doppler Current Profiler (ADCP) data from the ONR eastern boundary current accelerated research initiative, 9-16 June 1992
[AD-A274115] p 2898 N94-26076
Meeting of the Eighth Session of the Scientific Advisory Committee of the World Climate Impact Assessment and Response Strategies Programme
[DE93-633954] p 2866 N94-26163
An XCP user's guide and reference manual
[AD-A274519] p 2900 N94-27090
An oceanographical observation in the Western Pacific and international cooperations p 2872 N94-28272

OCEAN DATA ACQUISITIONS SYSTEMS
An oceanographical observation in the Western Pacific and international cooperations p 2872 N94-28272

OCEAN DYNAMICS
Meeting of the Eighth Session of the Scientific Advisory Committee of the World Climate Impact Assessment and Response Strategies Programme
[DE93-633954] p 2866 N94-26163
Topics in longshore currents
[AD-A274788] p 2899 N94-26361

OCEAN MODELS
Simulation of the carbon cycle in the oceans
[DE94-000780] p 2898 N94-25791
Development and testing of the Coupled Ocean/Atmosphere Mesoscale Prediction System (COAMPS)
[AD-A273925] p 2892 N94-25793
Conversion of the CLUSE model for applications over open ocean
[AD-A273750] p 2893 N94-26013
Topics in longshore currents
[AD-A274788] p 2899 N94-26361
Bathymetric data set extraction program. Users guide
[AD-A274761] p 2899 N94-26567

OCEAN SURFACE
Interpreting the implied meridional oceanic energy transport in AMIP
[DE94-001538] p 2898 N94-26072
A comparative evaluation of SAR and SLAR
[DE94-002922] p 2848 N94-26277
Nonlinear ocean waves
[AD-A274651] p 2899 N94-26354
The NOGAPS ten year AMIP integration
[AD-A274332] p 2900 N94-26887
Acoustic bubble sizing, using active and passive techniques to compare ambient and entrained populations
[ISVR-TR-229] p 2807 N94-28172

OCEAN TEMPERATURE
An XCP user's guide and reference manual
[AD-A274519] p 2900 N94-27090
The validation of ATSR measurements with in situ sea temperatures
[DE94-003195] p 2852 N94-27875

OCEANOGRAPHY
Naval Interactive Data Analysis System (NIDAS), software user's manual
[NASA-CR-195179] p 2956 N94-25606
Hydrographic and Acoustic Doppler Current Profiler (ADCP) data from the ONR eastern boundary current accelerated research initiative, 9-16 June 1992
[AD-A274115] p 2898 N94-26076
Coupling of pelagic and benthic communities over a seamount in the Eastern North Pacific
[AD-A274750] p 2899 N94-26149
Meeting of the Eighth Session of the Scientific Advisory Committee of the World Climate Impact Assessment and Response Strategies Programme
[DE93-633954] p 2866 N94-26163
A comparative evaluation of SAR and SLAR
[DE94-002922] p 2848 N94-26277
Bibliography of technical reports, 1992
[AD-A274849] p 3098 N94-26561
Effects of p-chlorophenol on sulfate reduction in marine sediments p 2870 N94-28150
Extraterrestrial accretion and glacial cycles
p 2890 N94-28308

OCEANS
Simulation of the carbon cycle in the oceans
[DE94-000780] p 2898 N94-25791
The biostratigraphy and paleogeography of Maastrichtian inoceramids p 2889 N94-28303

OCTANE NUMBER
CRC customer versus rater octane number requirement program (1990)
[AD-A273997] p 2758 N94-25901

OGIVES
Pneumatic management of blunted-forebody flow asymmetry for high-angle-of-attack directional control
p 2679 N94-28028

OIL SLICKS
A comparative evaluation of SAR and SLAR
[DE94-002922] p 2848 N94-26277

OILS
Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparison and verification of methods
[DE94-003664] p 2749 N94-26007
Oil production from buckwheat stillage by thermochemical liquefaction p 2871 N94-28154

OLIVINE
Electrical conductivity of perovskite-magnesiowuestite as a function of pressure and temperature
[DE94-002714] p 2880 N94-26806

OMEGA-MESONS
Omega omega and rho+ rho- production in two photon interactions at ARGUS
[ISBN-0-315-63748-X] p 3026 N94-27399

ON-LINE SYSTEMS
Module interconnection frameworks for a real-time spreadsheet
[AD-A273853] p 2956 N94-25588
The use of on-line ion chromatography for high temperature and high pressure reaction studies
[DE94-002525] p 2713 N94-26075
Federal Information Exchange (FEDIX) user's guide: Fall 1993, Version 5.0/Release 1.0
[DE94-003826] p 3097 N94-26350
The 12-channel flash-ADC FASTBUS module
[DE93-634229] p 2783 N94-26380
Design of an online help facility for ExSpect
[PB94-126687] p 2966 N94-26955

Electronic document distribution: Design of the anonymous FTP Langley Technical Report Server [NASA-TM-4567] p 2971 N94-27573

ONBOARD DATA PROCESSING
Real-Time Embedded Processing for Space Applications [ISBN-2-85428-335-X] p 2948 N94-26713
Computing in space: Issues and answers p 2948 N94-26714
Real time avionics constraints: Silicon solutions p 2949 N94-26717
MATRA Marconi Space: The Silex on-board processor and on-board software p 2950 N94-26726
On-board software for the JET-X telescope on the Spectrum-X mission p 2951 N94-26727
Implementing hard real-time systems: A case study p 2951 N94-26731
Early real-time performance measurements on the Columbus processor system p 2952 N94-26736
Test of onboard real time applications (LICE (tm)) p 2952 N94-26737
Verification and validation of the on-board software real time requirements p 2953 N94-26739
Ada reusable software for satellite on-board data handling p 2953 N94-26743
Specification performance optimization and executive generation for onboard multiprocessor real time application with SynDEx p 2954 N94-26745
Asynchronous and packetized systems engineering tools p 2954 N94-26746
Advanced End-to-end Simulation for On-board Processing (AESOP) p 2945 N94-28255

ONE DIMENSIONAL FLOW
Dynamic response of a compressor research facility [AD-A273836] p 2679 N94-25740
Integrated model development for liquid fueled rocket propulsion systems [NASA-CR-195253] p 2702 N94-27166

OORT CLOUD
Studies of extra-solar Oort Clouds and the Kuiper Disk [NASA-CR-195242] p 3103 N94-26789
Modulating terrestrial impacts from Oort cloud comets by the adiabatically changing galactic tides p 2890 N94-28305

OPERATING COSTS
Development of advanced high temperature in-cylinder components and tribological systems for low heat rejection diesel engines, phase 1 [NASA-CR-187158] p 2827 N94-27984
Development of the gas turbine. Part 2: Manufacturing, commissioning, and operation p 2831 N94-28081

OPERATING SYSTEMS (COMPUTERS)
Domain analysis and modeling of a model-based software executive [AD-A274087] p 2958 N94-25783
Achieving high performance on the Intel Paragon [DE94-003108] p 2979 N94-25953
Ada multiple-programming for hard real time applications in space systems p 2951 N94-26730
Implementing hard real-time systems: A case study p 2951 N94-26731

OPERATING TEMPERATURE
Silicon device performance measurements to support temperature range enhancement [NASA-CR-195265] p 2844 N94-27824
Development of advanced high temperature in-cylinder components and tribological systems for low heat rejection diesel engines, phase 1 [NASA-CR-187158] p 2827 N94-27984

OPERATIONS RESEARCH
The effectiveness of AMT investment in UK metal component manufacture [IND-MANU-SCI-TECH-REPT-3] p 2762 N94-25775
The general pickup and delivery problem [MEMO-COSOR-92-44] p 2992 N94-26226
Polyhedral characterization of the economic lot-sizing problem with start-up costs [MEMO-COSOR-92-46] p 2969 N94-27396
The molecular matching problem p 3030 N94-27910

OPERATOR PERFORMANCE
Task demand, workload, and performance [PB94-123627] p 2942 N94-27155

OPERATORS (MATHEMATICS)
Parallel matrix transpose algorithms on distributed memory concurrent computers [DE94-002424] p 2964 N94-26764
Q - difference intertwining operators for a Lorentz quantum algebra [DE94-602559] p 2997 N94-27023
A characterization of stable models using a non-monotonic operator [CWI-CS-R9315] p 2970 N94-27543
Joint essential maximal numerical range [DE94-603674] p 3000 N94-27637

OPTICAL COMMUNICATION
Design of a shared coherent cache for a multiple channel architecture [AD-A274026] p 3034 N94-25758
System design analysis of a lightweight laser satellite terminal [AD-A274033] p 2690 N94-25769
Study of the homogeneity of InP wafers [AD-A273658] p 3055 N94-26194
Laser-based communication link [FFI-93/7023] p 2817 N94-26203
A doubly logarithmic communication algorithm for the Completely Connected Optical Communication Parallel Computer [DE93-019408] p 2980 N94-26473
Accordion-like polymers for nonlinear applications [AD-D016031] p 2755 N94-27148
Investigation of air transportation technology at Princeton University, 1992-1993 p 2643 N94-27294
Optical communications for transport aircraft p 2643 N94-27298
Microprocessor chip incorporating optical signal coupling transceiver [AD-D016077] p 2788 N94-28186

OPTICAL COUPLING
A study of multiple guide optical couplers [ISBN-0-315-84633-X] p 3038 N94-27441

OPTICAL DATA PROCESSING
Optical pattern recognition system utilizing resonator array [AD-D016071] p 3040 N94-28224

OPTICAL DISKS
Spacecraft optical disk recorder memory buffer control p 2815 N94-27907

OPTICAL EMISSION SPECTROSCOPY
Researches of the Electrotechnical Laboratory. No. 53: Spectral emission from combustion gas containing scattering media [JTN-94-80603] p 2717 N94-27246

OPTICAL EQUIPMENT
The National Center for Advanced Information Components Manufacturing: Program update [DE94-002647] p 2960 N94-26118
Optoelectronic Technology Consortium [AD-A274909] p 2782 N94-26344
Optoelectronic technology consortium [AD-A274595] p 3036 N94-26857
Helmet head tracking mounting device [AD-D016048] p 2942 N94-27114
Binary optical elements: Studies in design, manufacture and performance [ISBN-0-315-60643-6] p 3039 N94-27643

OPTICAL FIBERS
Influence of embedded optical fibers on compressive strength of advanced composites [AD-A273775] p 2705 N94-25859
Development of surgical CW Nd:YAG laser with optical fiber delivery system [DE93-632902] p 2817 N94-26185
Inert strength of pristine silica glass fibers [DE94-004685] p 2750 N94-26247
Multichip module high speed testing [AD-A274873] p 2782 N94-26343
Calorimeter with WLS fibers and parallel to beam scintillators [DE93-634188] p 2810 N94-26378
Cad of GeO2-SiO2 double-layer core dispersion-shifted single-mode fibre [DE93-634325] p 3035 N94-26383
All-optical gain switching of erbium-doped fibre amplifiers [ISBN-0-315-84120-6] p 2784 N94-26704
Method of measuring liquid level [AD-D016049] p 3038 N94-27153
Evanescent field infrared spectroscopy using chalcogenide glass fiber [ITN-94-85233] p 3038 N94-27178
Ir-fibers in a laser threat warning system and robot shot warning system [PB94-124476] p 3038 N94-27209
Intelligent material systems and structures. Part 6: Measurements of adhesion between optical fibres and composite materials [PB94-123577] p 2756 N94-27215
Kinoform/lens system for injecting a high power laser beam into an optical fiber [DE94-003226] p 2819 N94-27262
Fiber optic Faraday flux transformer specification [AD-D016058] p 3039 N94-27674
Fiber optic true time-delay array antenna feed system [AD-D016063] p 2777 N94-27734

OPTICAL FILTERS
Calorimeter with WLS fibers and parallel to beam scintillators [DE93-634188] p 2810 N94-26378
Long Duration Exposure Facility space optics handbook [AD-A274831] p 3035 N94-26572

OPTICAL MATERIALS
Three-wave nonlinear interactions in KTiOPO4 (KTP) and KTP isomorphs [AD-A274079] p 3052 N94-25993
Long Duration Exposure Facility space optics handbook [AD-A274831] p 3035 N94-26572
An x ray absorption fine structure study of ordering in polythiophene thin films [AD-A274235] p 2753 N94-26822
Mechanistic studies of opto-electronic materials and syntheses using multiple laser and surface diagnostics [AD-A274528] p 3036 N94-26834
Polyimide/inorganic composite-interpenetrating polymer network for stable second-order nonlinear optics [AD-A274646] p 2709 N94-27107

OPTICAL MEASUREMENT
Surface physics with cold and thermal neutron reflectometry [DE94-001447] p 2733 N94-26070
Research and development within nonlinear optics for protection of optical sensors against laser irradiation on of optical sensors against laser irradiation. Quarterannual report 1 (april 1993)) [PB94-124245] p 3037 N94-27046
Time domain reflectometry for measuring bulk soil electrical conductivity and comparison with the Em38 instrument [PB94-125432] p 2881 N94-27052
Experimental verification of tomographic reconstruction of turbulent air flow structure using optical wavefront measurements [AD-A274392] p 2795 N94-27129
Development of a 2f optical performance measurement system [DE94-003489] p 3039 N94-27721
Detection of water on road surface by the polarized light p 2886 N94-27989

OPTICAL MEASURING INSTRUMENTS
Numerical simulation of tomographic reconstruction for the study of turbulence using optical wavefront sensor measurements [AD-A273851] p 2789 N94-25587
Development of a multi-sensor in situ fiber optic fluorometer [DE94-003399] p 3035 N94-26100
Optical surface contouring for non-destructive inspection of turbomachinery [NASA-CR-195245] p 2835 N94-26691
Research and development within nonlinear optics for protection of optical sensors against laser irradiation on of optical sensors against laser irradiation. Quarterannual report 1 (april 1993)) [PB94-124245] p 3037 N94-27046
Method of measuring liquid level [AD-D016049] p 3038 N94-27153
Reflectometer employing an integrating sphere and lens-mirror concentrator [AD-D016061] p 3039 N94-27676
Energy Dispersive X ray Diffraction (EDXD) apparatus for liquids at high temperature p 2721 N94-28159

OPTICAL MEMORY (DATA STORAGE)
High-speed, high-density, coherent time-domain optical memory [AD-A274249] p 3037 N94-27010
Spacecraft optical disk recorder memory buffer control p 2815 N94-27907

OPTICAL MICROSCOPES
Bulletin of the Institute for Chemical Reaction Science, Tohoku University, volume 2 [JTN-94-80602] p 2717 N94-27385
Variable temperature cold stage for microscope observation p 2718 N94-27389

OPTICAL PATHS
Laser phase induced intensity noise in fiber-optic signal processing and sensing systems [ITN-94-85234] p 2819 N94-27179
Spectral and temporal correlations of multifrequency waves in the turbulent atmosphere [ITN-94-85229] p 2774 N94-27233

OPTICAL POLARIZATION
Spin effects in hard interactions (interest in accelerated polarized beam) [DE93-634398] p 3031 N94-26044
Detection of water on road surface by the polarized light p 2886 N94-27989

OPTICAL PROPERTIES
Langmuir-Blodgett film of amylose-esters and chiral azo-dyes (structure and second order nonlinear optical behaviour) [ETN-94-95390] p 2747 N94-25749

Studies of non-linear optical effects for agile beam steering
[AD-A273998] p 3034 N94-25902
Lighter alkali hydride and deuteride 1: Electronic properties of pure solids
[DE93-616188] p 3051 N94-25914
Optical conductivity and resistivity in the two-band Emery model
[DE94-601943] p 3051 N94-25945
Physical characteristics of polymethylmethacrylate scintillator SOFG-120
[DE93-634184] p 2810 N94-26395
Research and development within nonlinear optics for protection of optical sensors against laser irradiation on of optical sensors against laser irradiation. Quarterannual report 1 (april 1993))
[PB94-124245] p 3037 N94-27046
Accordion-like polymers for nonlinear applications
[AD-D016031] p 2755 N94-27148
Ir-fibers in a laser threat warning system and robot shot warning system
[PB94-124476] p 3038 N94-27209
Molecular dynamics simulation and crystal-field theory: Predicting the optical spectra and structure of rare-earth doped inorganic glasses
[ISBN-0-315-84679-8] p 3025 N94-27310
Technical report of ISSP. Ser. A, no. 2685: ASE-free terawatt KrF/Ti : sapphire hybrid laser system
[JTN-94-80571] p 2820 N94-27339

OPTICAL PUMPING
Characterization of nonlinear effects in optically pumped vertical cavity surface emitting lasers
[AD-A273840] p 2815 N94-25744
Broad band tunable dye laser development
[DE93-632978] p 2816 N94-26157
Multiple exposure CCD detector for high-speed laser pump, x ray probe Laue scattering
[DE94-004618] p 2820 N94-27781
Optical parametric oscillator modeling with diffraction, depletion, and double refraction
[DE94-001504] p 3040 N94-27999

OPTICAL RADAR
Wind measurements with an incoherent lidar
[AD-A273756] p 2891 N94-25722
Design analysis of a combined optical/LADAR deep-space surveillance satellite
[AD-A274040] p 2694 N94-25832
An overview of the TNO contribution to VAST 92
[AD-A273751] p 2893 N94-26016
Elastic backscattering lidar for a MSTI satellite
[DE94-002701] p 2816 N94-26126
The development of Cr, Tm, Ho:YAG lasers for airborne lidar
[AD-A274895] p 2816 N94-26178
Compilation of corrections for postprocessing of laser bathymetry data
[PB94-123668] p 2900 N94-27156
Sum frequency generation using an optical parametric oscillator
[DE94-001827] p 3040 N94-28000

OPTICAL RESONANCE
Measurement of metastable population distribution in gadolinium atomic beam by laser resonance photoionization method
[DE94-701194] p 3029 N94-27820

OPTICAL RESONATORS
Optical pattern recognition system utilizing resonator array
[AD-D016071] p 3040 N94-28224

OPTICAL SCANNERS
Channel to energy calibration results for the BATSE large area detectors p 3115 N94-26690
Characterization and calibration of the Agema 880+ imaging radiometer
[AD-A274417] p 3036 N94-26981

OPTICAL SWITCHING
Low threshold all-optical crossbar switch on GaAs-GaAlAs channel waveguide arrays
[AD-A274971] p 2783 N94-26536
All-optical gain switching of erbium-doped fibre amplifiers
[ISBN-0-315-84120-6] p 2784 N94-26704

OPTICAL TRACKING
Image quality and the display modulation transfer function: Experimental findings
[AD-A274061] p 2679 N94-25773
Capture and location of blobs in digital images
[ISBN-0-315-84382-9] p 3036 N94-26666
Helmet head tracking mounting device
[AD-D016048] p 2942 N94-27114

OPTICAL TRANSFER FUNCTION
Performance impacts for actuator misalignments and failures in large-aperture adaptive-optic telescopes
[AD-A273838] p 3034 N94-25742

OPTICAL TRANSITION
On the estimation of matrix elements for optical transitions in semiconductors
[DE93-613550] p 3051 N94-25851

OPTICAL WAVEGUIDES
Microtubules for nonlinear optical limiting
[AD-A273940] p 3035 N94-25941
Optoelectronic Technology Consortium
[AD-A274909] p 2782 N94-26344
Low threshold all-optical crossbar switch on GaAs-GaAlAs channel waveguide arrays
[AD-A274971] p 2783 N94-26536
Optoelectronic technology consortium
[AD-A274595] p 3036 N94-26857
Optical characterization and guided wave loss measurements for end-capped 6F-polybenzoxazole
[AD-A274586] p 3036 N94-26982
Focal plane antenna array for millimeter waves
[AD-D016034] p 2774 N94-27202
A study of multiple guide optical couplers
[ISBN-0-315-84633-X] p 3038 N94-27441
Electro-optic materials by solid source MOCVD
[DE94-005120] p 2757 N94-27716

OPTIMAL CONTROL
Optimal control design advantages utilizing two-degree-of-freedom controllers
[AD-A273839] p 2984 N94-25743
Studies in nonlinear numerical analysis
[AD-A273911] p 2959 N94-25968
One machine scheduling with delayed precedence constraints
[PB93-237626] p 3094 N94-26314
Development of a performance evaluation tool (MMSOFE) for detection of failures with Multiple Model Adaptive Estimation (MMAE)
[AD-A274218] p 2665 N94-27071
Impulsive control and stabilization
[ISBN-0-315-84563-5] p 2988 N94-27271
Advanced control of a flexible spherical wrist
[ISBN-0-315-84424-8] p 2826 N94-27652
Pulse control method and its characteristics
[DE94-701187] p 2989 N94-27809
On identified predictive control p 2990 N94-27896
Topics in the design, analysis and implementation of feedback control systems
[ISBN-0-315-84934-7] p 2989 N94-27975
On the use of feedback to control sound radiation from a plate excited by a turbulent boundary layer
[ISVR-TR-227] p 2807 N94-28175

OPTIMIZATION
Adaptive optimization and control using neural networks
[DE94-003941] p 2985 N94-25983
Determination of the geomagnetic external contribution by nonlinear optimization methods
[DE94-600882] p 2878 N94-26365
A technique for integrating engine cycle and aircraft configuration optimization
[NASA-CR-191602] p 2668 N94-26606
Thermal/structural tailoring of engine blades (T/STAEBL). User's manual
[NASA-CR-194463] p 2839 N94-26692
Specification performance optimization and executive generation for onboard multiprocessor real time application with SynDEx p 2954 N94-26745
Nested Krylov methods based on GCR
[PB94-125317] p 2995 N94-26818
Query optimization strategies for browsing sessions
[CWI-CS-R9268] p 3100 N94-27394
A sensitivity equation approach to shape optimization in fluid flows
[NASA-CR-191598] p 2999 N94-27415
Fast parallel permutation algorithms
[CWI-CS-R9303] p 2982 N94-27579
Thermal/Structural Tailoring of Engine Blades (T/STAEBL): User's manual
[NASA-CR-194461] p 2843 N94-27776
Reliability-based structural optimization: A proposed analytical-experimental study
[NASA-TM-109055] p 2844 N94-27830
An optimization program based on the method of feasible directions: Theory and users guide
[NASA-TM-4552] p 2845 N94-27865
The molecular matching problem
p 3030 N94-27910
Examples of flight path optimisation using a multivariate gradient-search method
[ESDU-93021] p 2670 N94-28092

OPTOELECTRONIC DEVICES
Solid state research
[AD-A274063] p 3049 N94-25645
Optoelectronic technology consortium
[AD-A274595] p 3036 N94-26857
Research and development within nonlinear optics for protection of optical sensors against laser irradiation on of optical sensors against laser irradiation. Quarterannual report 1 (april 1993))
[PB94-124245] p 3037 N94-27046

ORBIT CALCULATION
Hill equations for satellite orbit determination
[ETN-94-95374] p 2690 N94-25787

ORBIT PERTURBATION
Hill equations for satellite orbit determination
[ETN-94-95374] p 2690 N94-25787

ORBIT TRANSFER VEHICLES
Orbit transfer rocket engine technology program enhanced heat transfer combustor technology
[NASA-CR-189236] p 2700 N94-26156
Test results of the RS-44 integrated component evaluator liquid oxygen/hydrogen rocket engine
[NASA-CR-194443] p 2701 N94-26231
Orbit transfer rocket engine technology program
[NASA-CR-189229] p 2702 N94-26542
Orbital transfer vehicle engine technology high velocity ratio diffusing crossover
[NASA-CR-194447] p 2703 N94-27212
Orbital transfer rocket engine technology 7.5K-LB thrust rocket engine preliminary design
[NASA-CR-190754] p 2703 N94-27213

ORBITAL ASSEMBLY
Space Habitat, assembly and repair facility
p 2691 N94-25696
Selected topics in robotics for space exploration
[NASA-CP-10131] p 2682 N94-26278
Performance measures from the explorer platform berthing experiment p 2683 N94-26283
Berthing of Space Station Freedom using the shuttle remote manipulator system p 2684 N94-26284
An analysis of the loads applied to a heavy Space Station rack during translation and rotation tasks
[NASA-TM-104790] p 2697 N94-28183

ORBITAL ELEMENTS
A virtual environment for satellite modeling and orbital analysis in a distributed interactive simulation
[AD-A274114] p 2694 N94-25904
An April 1991 outburst from 4U0115+63 observed by BATSE
[NASA-CR-195252] p 3116 N94-27440

ORBITAL LIFETIME
Lifetimes of lunar satellite orbits
[NASA-TP-3394] p 2690 N94-27771

ORBITAL MECHANICS
A virtual environment for satellite modeling and orbital analysis in a distributed interactive simulation
[AD-A274114] p 2694 N94-25904

ORBITAL RENDEZVOUS
Autonomous rendezvous and docking for Space Station Freedom p 2684 N94-26286
Nasa Langley Research Center seventy-fifth anniversary publications, 1992
[NASA-TM-109691] p 3118 N94-27431

ORBITAL SERVICING
Manned mission to Mars with periodic refueling from electrically propelled tankers p 2689 N94-25670

ORBITAL WORKERS
An analysis of the loads applied to a heavy Space Station rack during translation and rotation tasks
[NASA-TM-104790] p 2697 N94-28183

ORBITS
Towards a theory of growing surfaces: Mapping two-dimensional Laplacian growth onto Hamiltonian dynamics and statistics
[DE94-002636] p 2991 N94-26079

ORDER-DISORDER TRANSFORMATIONS
Fermi-liquid to non-Fermi-liquid transition in a dynamical generalization of the CPA in a disordered Hubbard model
[DE94-601875] p 2714 N94-26169
The origins of ordering in CuPt
[DE94-003864] p 2736 N94-26351
Ordering and phase separation in MOCVD InGaP alloys and unicompositional quantum wells
[DE94-004693] p 3056 N94-26352
Regrowth zones in laser annealed radiation damaged diamond
[DE94-600821] p 3056 N94-26364
Structure of ionic fluids in equilibrium with a microporous ionic matrix
[DE94-600563] p 2715 N94-26391
Transition metals in highly correlated discotic phases: Designing metallomesogens with selected intermolecular organizations
[AD-A274695] p 2736 N94-26452
Length-scale dependent ensemble-averaged conductance of a 1D disordered conductor: Conductance minimum
[DE94-602732] p 3062 N94-26902

ORDNANCE
Differential global positioning system for the surface-towed ordnance locating system: Testing, results, and user's guide
[DE94-002980] p 2664 N94-26309

ORGANIC COMPOUNDS
Computational studies of energetic organic molecules
[AD-A274726] p 3018 N94-26172
A materials compatibility study in FM-1, a liquid component of a paste extrudable explosive
[DE94-001166] p 2759 N94-26198
Numerical analysis of the photo-dissociation/radical oxidation of formaldehyde by ultraviolet light in a photolytic reactor
[AD-A274539] p 2868 N94-26843
Development of a sparging technique for volatile emissions from potato (Solanum tuberosum)
[NASA-TM-109199] p 2903 N94-27412
Trace organic chemical detection using an ultraviolet excitation molecular beam fluorometer
[DE94-002649] p 2704 N94-27708
Collaboration of chemical oxidation and biological treatment for removal of refractory organic substances
p 2870 N94-28149
Treatment of refractory organic substances with combined use of chemical oxidation and biological treatment. Part 2: Biodegradability of ozonation products of chlorophenol p 2870 N94-28151

ORGANIC MATERIALS
Research and development within nonlinear optics for protection of optical sensors against laser irradiation on of optical sensors against laser irradiation. Quarterannual report 1 (april 1993))
[PB94-124245] p 3037 N94-27046

ORGANIC SILICON COMPOUNDS
Sol-gel derived silica/siloxane composite materials: The effect of loading level and catalyst activity on silica domain formation
[DE94-002734] p 2712 N94-27710

ORGANISMS
Coupling of pelagic and benthic communities over a seamount in the Eastern North Pacific
[AD-A274750] p 2899 N94-26149
Macrobenthic fauna in the dutch sector of the north sea in 1991
[PB94-126414] p 2868 N94-27200

ORGANIZATIONS
Federal Information Exchange (FEDIX) user's guide: Fall 1993, Version 5.0/Release 1.0
[DE94-003826] p 3097 N94-26350
International energy: Research organizations, 1988-1992
[DE93-017267] p 3098 N94-26398
Pigs in cyberspace p 2689 N94-27376

ORGANOMETALLIC COMPOUNDS
Processing of LaCrO3 for solid oxide fuel cell applications
[DE94-002981] p 2857 N94-26747
Electro-optic materials by solid source MOCVD
[DE94-005120] p 2757 N94-27716

ORGANS
NCVS, volume 5
[AD-A274975] p 2902 N94-27165

OROGRAPHY
Investigation of mesoscale convective cloud clusters in South China
[AD-A274303] p 2895 N94-26678
An observational study of the extratropical anticyclones in the South American continent
[INPE-5387-TDI/476] p 2896 N94-27356

ORTHOGONALITY
Geometric correction of SPOT images with use of digital elevation models
[ETN-94-95033] p 2847 N94-26107

ORTHOSTATIC TOLERANCE
Intermittent gravity: How much, how often, how long?
[NASA-TM-108800] p 2944 N94-26098
Analysis on one minute wave in body fluid volume and muscle pumping referred to body parts generating the one minute wave during human active standing
p 2929 N94-27528
Treatment of orthostatic hypotension by nasal administration of vasopressin p 2930 N94-27533
Workshop on Countering Space Adaptation with Exercise: Current Issues
[NASA-CP-3252] p 2934 N94-28361
Aerobic fitness and orthostatic tolerance: Evidence against an association p 2934 N94-28365
Does training-induced orthostatic hypotension result from reduced carotid baroreflex responsiveness?
p 2935 N94-28366

ORTHOTROPIC CYLINDERS
Series solution for a cylindrical composite shell subject to axisymmetric loadings
[ISBN-0-315-60559-6] p 2844 N94-27810

ORTHOTROPIC PLATES
Flat rectangular orthotropic plates under uniformly distributed normal pressure. Elastic stresses and deflections for various forms of edge restraint
[ESDU-93011] p 2845 N94-28061

OSCILLATIONS
About possible types of neutrino oscillations
[DE93-634449] p 3020 N94-26508
Measuring the time dependence of B(sub s)(sup 0) meson - anti B(sub s)(sup 0) meson oscillations
[ISBN-0-315-84367-5] p 3021 N94-26665
Polar optical oscillation modes in GaAs-based double heterostructures: Long wavelength limit
[DE94-601874] p 3062 N94-26897
Pressure-gain combustion
[DE94-002975] p 2719 N94-27712
The status of the solar neutrino problem
[DE94-003934] p 3111 N94-27742

OSCILLATOR STRENGTHS
International bulletin on atomic and molecular data for fusion. No. 46
[DE94-601818] p 3023 N94-26947

OSCILLATORS
Wigner quantum oscillators
[DE94-601508] p 3073 N94-26758
HPm-tubes: Literature survey comprising 1992
[PB94-123643] p 2785 N94-27038
The onset of chaos in a periodically forced nonlinear oscillator
[ISBN-0-315-84564-3] p 2842 N94-27272
Optical parametric oscillator modeling with diffraction, depletion, and double refraction
[DE94-001504] p 3040 N94-27999
Sum frequency generation using an optical parametric oscillator
[DE94-001827] p 3040 N94-28000
Fiber laser amplifiers and oscillators
[AD-A274231] p 2820 N94-28068

OSTEOPOROSIS
Irreversibility of advanced osteoporosis: Limited role for pharmacologic intervention p 2935 N94-28369
Exercise and osteoporosis: Methodological and practical considerations p 2935 N94-28370

OTOLITH ORGANS
Study on posture control and adaption mechanism under weightlessness: Differences in weight and shape of utricular otolith of carp p 2912 N94-27448

OUTER SPACE TREATY
Contributions to CD Space Committee 1992
[PB94-124401] p 3101 N94-27218

OUTGASSING
Outgas and vacuum seal characteristics of irradiated polyimide O-ring
[DE94-701200] p 2757 N94-27812

OUTLET FLOW
Non-isoenergetic inviscid slot flow
p 2655 N94-28333

OVER-THE-HORIZON RADAR
Over-the-horizon propagation measurements at six radar-frequency bands at the Atlantic Ocean Coast
[AD-A274151] p 2773 N94-27136

OVERPRESSURE
Shock wave interaction with L-shaped structures
[AD-A273774] p 2790 N94-25858

OXIDATION
Studies of thin-film growth, adsorption, and oxidation by in situ, real-time, and ex situ ion beam analysis
[DE94-002907] p 3055 N94-26275
Stability of reference masses 2: The effect of environment and cleaning methods on the surfaces of stainless steel and allied materials
[NPL-DMM(A)-95] p 2738 N94-26653
Numerical analysis of the photo-dissociation/radical oxidation of formaldehyde by ultraviolet light in a photolytic reactor
[AD-A274539] p 2868 N94-26843
Engineering limitations of ceramic composites for high performance and high temperature applications
[DE94-001676] p 2754 N94-27021
Thermogravimetric study of oxidation of a PdCr alloy used for high-temperature sensors
[NASA-TM-106473] p 2741 N94-27426
Novel oxidizing reagents derived from elemental fluorine
[ITN-94-85231] p 2719 N94-27687
High temperature grain growth and oxidation of Fe-29Ni-17Co (Kovar (tm)) alloy leads
[DE94-004691] p 3069 N94-27753
Kinetic parameters from thermogravimetric analysis
p 2721 N94-27909
Collaboration of chemical oxidation and biological treatment for removal of refractory organic substances
p 2870 N94-28149
Treatment of refractory organic substances with combined use of chemical oxidation and biological treatment. Part 2: Biodegradability of ozonation products of chlorophenol p 2870 N94-28151

OXIDATION-REDUCTION REACTIONS
The coordination and atom transfer chemistry of titanium porphyrin complexes
[DE94-003091] p 2704 N94-26779

OXIDE FILMS
Stability of reference masses 2: The effect of environment and cleaning methods on the surfaces of stainless steel and allied materials
[NPL-DMM(A)-95] p 2738 N94-26653
Ion implantation and dynamic recovery of tin-doped indium oxide films
[DE94-001126] p 3062 N94-26932
The ZnO thin films with C-axis orientation prepared on the room temperature substrate by the ECR multipolar plasma sputtering method
[DE94-605039] p 2758 N94-27857

OXIDES
Study on measurement and evaluation methods for superconductive characteristics p 2725 N94-25560
Successive structural phase transitions in stoichiometric La2NiO4 observed by x ray diffraction
[REPT-A-2665] p 3051 N94-25921
Phase diagram of La2NiO(4+delta) (0 less than or equal to delta less than or equal to 0.18). 1: Phases at room temperature and phase transition above delta equal to 0.15
[REPT-A-2661] p 3053 N94-26089
In situ spectroscopic applications to the study of rechargeable lithium batteries
[DE94-003478] p 2782 N94-26328
Sealant research for solid oxide fuel cells
[DE94-000015] p 2857 N94-26584
Processing of LaCrO3 for solid oxide fuel cell applications
[DE94-002981] p 2857 N94-26747
Fibrous emissive burners selective and broad band
[PB94-128329] p 2859 N94-27225

OXIDIZERS
Novel oxidizing reagents derived from elemental fluorine
[ITN-94-85231] p 2719 N94-27687

OXIMETRY
Pulse waveform and transcranial Doppler analysis during lower body negative pressure
[AD-A274516] p 2911 N94-27088

OXYGEN
Isotopically labeled CO2 from stratosphere: A tracer of carbon biogeochemistry
[DE94-002777] p 2877 N94-26015
The role of hyperbaric oxygen as a prophylaxis for radiation enteritis
[AD-A274974] p 2901 N94-26517
Electronic structure of a single oxygen vacancy in rutile TiO2
[DE94-602717] p 3062 N94-26901
Numerical simulation of the reignition of detonation by reflected shocks
[AD-A274755] p 2795 N94-27252
Technical report of ISSP. Ser. A, no. 2669: Relations between oxygen deficiency and structures in the La-Sr-Cu-O system. 3: Oxygen contents and structure of (La, Sr)8Cu8O(16+delta) phase
[JTN-94-80555] p 3066 N94-27353
The addition of molecular oxygen to hydroperoxy-propyl radicals
[DE94-003662] p 2760 N94-27725

OXYGEN CONSUMPTION
Intermittent gravity: How much, how often, how long?
[NASA-TM-108800] p 2944 N94-26098

OXYGEN IONS
Ion implantation and dynamic recovery of tin-doped indium oxide films
[DE94-001126] p 3062 N94-26932
Energy parameters of the incident auroral electrons derived by the intensity ratio of auroral emissions
p 2779 N94-27964

OXYGEN MASKS
Creation of prototype aircrew protection equipment based on face anthropometry
[AD-A273865] p 2940 N94-25611

OXYGEN PLASMA
Plasma surface cleaning using microwave plasmas
[DE94-002754] p 2713 N94-26014

OXYGEN PRODUCTION
Extraterrestrial surface propulsion systems
p 2833 N94-25891
Space Station evolution study oxygen loop closure
[NASA-CR-193938] p 2941 N94-26788

OXYGEN 17
Use of oxygen-17 isotope in the characterization of zeolites and related structures by nuclear magnetic resonance spectroscopy
[VTT-TIED-1448] p 2714 N94-26251

OZONE
Reanalysis of Mariner 9 UV Spectrometer Data for Ozone, Cloud, and Dust Abundances, and Their Interaction Over Climate Timescales
[NASA-CR-195244] p 3107 N94-27885
Martian atmospheric radiation budget p 3107 N94-27887
Mars ozone: Mariner 9 revisited p 3107 N94-27888
Why is the north polar cap on Mars different than the south polar cap? p 3107 N94-27889
Probing the Martian atmosphere in the ultraviolet p 3108 N94-27890
How well was total ozone abundance inferred with Mariner 9? p 3108 N94-27891
In situ Mars ozone detector p 3108 N94-27892
Ozone control of biological activity during Earth's history, including the KT catastrophe p 2876 N94-28312

OZONE DEPLETION
A three-dimensional chemical transport model study of the 1991 Antarctic ozone hole using objectively analysed data
[ISBN-0-315-84250-4] p 2867 N94-26670
Mission to Planet Earth: A program to understand global environmental change
[NASA-PAM-556] p 2869 N94-27958

OZONOSPHERE
Initial ultraviolet-B intensity data at Lawrence Livermore National Laboratory
[DE94-004279] p 2869 N94-27267

P

P WAVES
Elastic scattering by a spherical inclusion
[AD-A274713] p 2878 N94-26433
Dynamic and kinematic P wave tracing for a three-dimensional elastic inhomogeneous media by the asymptotic ray theory and application
[ITN-94-85239] p 2775 N94-27244

P-I-N JUNCTIONS
Electric-field dependence of electroreflectance and photocurrent spectra at visible wavelengths in MOVPE-grown InAlGaP multiple strained quantum-well structures
[DE94-004692] p 2780 N94-25664
Recombination and metastability in amorphous silicon and silicon germanium alloys
[DE94-000237] p 2736 N94-26481

P-TYPE SEMICONDUCTORS
Atomic layer epitaxy of group 4 materials: Surface processes, thin films, devices and their characterization
[AD-A274325] p 3061 N94-26885
Visible light emitting materials and injection devices
[AD-A274418] p 2786 N94-27079

P-3 AIRCRAFT
Development and evaluation of a near infrared reflecting and low visibility paint scheme for RAAF P-3C Orion aircraft
[AD-A274881] p 2669 N94-26864

PACIFIC OCEAN
Propagation of cold air masses in East Asia and its associated planetary-scale function
[AD-A274304] p 2895 N94-26850
Tropical cyclone report, 1992
[AD-A274464] p 2896 N94-27025

PACKAGING
Package integrity measurement technology and quality assurance
[AD-A273881] p 2834 N94-25727

PACKET SWITCHING
Asynchronous and packetized systems engineering tools p 2954 N94-26746
Analysis of a multiaccess/switching technique for multibeam satellites in a prioritized ISDN environment
[ISBN-0-315-84632-1] p 2776 N94-27345

PACKET TRANSMISSION
Packet radio data link applications in the NASA Langley Research Center Transport Systems Research Vehicle
[NASA-TM-109071] p 2665 N94-27423

PAIN SENSITIVITY
Excitation of cutaneous polymodal receptor induced by sympathetic stimulation in adjuvant-induced arthritis rats p 2906 N94-27495
Influence of mechanical stimulation on inflammatory edema p 2906 N94-27497
The effect of naloxone on sleeping time in adjuvant arthritic rats p 2906 N94-27498
Changes in pain sensation induced by repetitive application of noxious heat pulses to the human skin p 2924 N94-27501
Hyperalgesia to cold in patients with Subacute Myelo-Optico-Neuropathy (SMON) p 2928 N94-27521
The polymodal receptor p 2908 N94-27539

PAINTS
Development and evaluation of a near infrared reflecting and low visibility paint scheme for RAAF P-3C Orion aircraft
[AD-A274881] p 2669 N94-26864

PAIR PRODUCTION
CP test in the W pair production by way of photon fusion at NLC
[DE94-601608] p 3014 N94-25889
Magnetic field induced contributions of supersymmetric particles to energy losses of neutron star
[DE93-634331] p 3104 N94-26269
Chance to use W-decay lepton channels for width determination
[DE93-634438] p 3020 N94-26507
Search for the top quark in the single lepton + jets channel at D0
[DE94-004660] p 3028 N94-27749

PALEOBIOLOGY
The end-Permian mass extinction: A complex, multicausal extinction p 2888 N94-28299
Mass extinctions: Persistent problems and new directions p 2889 N94-28302
Ozone control of biological activity during Earth's history, including the KT catastrophe p 2876 N94-28312

PALEOCLIMATOLOGY
Sensitivity of climate models: Comparison of simulated and observed patterns for past climates
[DE93-019934] p 2865 N94-25789

PALEOMAGNETISM
An extraterrestrial event at the tertiary-quaternary boundary p 2890 N94-28309

PALEONTOLOGY
The biostratigraphy and paleogeography of Maastrichtian inoceramids p 2889 N94-28303
An evaluation of criteria that may be used to identify species surviving a mass extinction p 2889 N94-28304
Ozone control of biological activity during Earth's history, including the KT catastrophe p 2876 N94-28312

PALEOZOIC ERA
The end-Permian mass extinction: A complex, multicausal extinction p 2888 N94-28299

PALLADIUM
Hydrogen trapping with Pd coated alloy films p 2723 N94-25551

PALLADIUM ALLOYS
Formation of three types of quasi-crystals in Al-Pd-Mg system
[REPT-A-2667] p 3053 N94-26071
Toward insulating quasicrystalline alloy in Al-Pd-Re icosahedral phase
[REPT-A-2666] p 2736 N94-26477
Thermogravimetric study of oxidation of a PdCr alloy used for high-temperature sensors
[NASA-TM-106473] p 2741 N94-27426
NMR study of quasicrystal Al(70)Pd(20)T(M10) alloy (T(M):Cr, Mn, Fe, and Co) p 2745 N94-28162
Formation of glassy Pd-Ni-P alloys by mechanical alloying and their structure and thermal stability p 2746 N94-28168

PANEL METHOD (FLUID DYNAMICS)
Computational investigation of the compressible dynamic stall characteristics of the Sikorsky SSC-A09 airfoil
[AD-A274867] p 2644 N94-26191
Calculation of unsteady incompressible inviscid flow about wings and bodies using CANAERO-T panel model p 2655 N94-28334

PANELS
Experimental and numerical vibration analyses of a stiffened panel
[VTT-PUBS-129] p 2836 N94-25650
Formulae for the buckling of simply-supported corrugated panels of orthotropic material under shear load
[PB94-126547] p 2840 N94-26911
Design and test of postbuckled stiffened curved plates: A literature survey
[PB94-126521] p 2840 N94-26961

PAPER (MATERIAL)
The chemical detector paper as a potential alarm
[FFI-93/6007] p 2712 N94-25745

PARABOLIC DIFFERENTIAL EQUATIONS
Arbitrary-order numerical schemes for model parabolic equations
[CRANFIELD-AERO-9210] p 3005 N94-25781
Computation of numerical solution of parabolic PDEs by monotone iterative methods
[ISBN-0-315-84553-8] p 2999 N94-27404
On the zeros of solutions of forced parabolic differential equations of neutral type
[DE93-613019] p 3001 N94-28228

PARABOLIC FLIGHT
The electrogastrogram during parabolic flight p 2913 N94-27452
Vertical gaze direction during parabolic flight p 2913 N94-27453
Heart rate change in normal and labyrinthectomized hamsters during parabolic flight p 2914 N94-27454

PARABOLIC REFLECTORS
Numerical and experimental analyses of the radiant heat flux produced by quartz heating systems
[NASA-TP-3387] p 3011 N94-27659
Development of a 2f optical performance measurement system
[DE94-003489] p 3039 N94-27721

PARAFFINS
The addition of molecular oxygen to hydroperoxy-propyl radicals
[DE94-003662] p 2760 N94-27725

PARALLAX
In search of Nemesis p 2888 N94-28297

PARALLEL COMPUTERS
Abstraction in, specification and proof of software for a 1D heat-transfer problem
[REPT-93-45] p 2790 N94-25763
Using a transfer function to describe the load-balancing problem
[DE94-004218] p 2979 N94-25802
A doubly logarithmic communication algorithm for the Completely Connected Optical Communication Parallel Computer
[DE93-019408] p 2980 N94-26473
Computational mechanics
[DE94-003015] p 2965 N94-26775
Parallel computers for advanced information processing p 2955 N94-27193

PARALLEL PROCESSING (COMPUTERS)
System software and tools for high performance computing environments: A report on the findings of the Pasadena Workshop
[DE94-003918] p 2956 N94-25602
Using a transfer function to describe the load-balancing problem
[DE94-004218] p 2979 N94-25802
A numerical study of high-speed missile configurations using a block-structured parallel algorithm
[AD-A273776] p 2979 N94-25860
Object-oriented design and implementation of a parallel Ada simulation system
[AD-A274119] p 2979 N94-25906
Use of parallel counters for triggering
[DE93-616656] p 2979 N94-25918
Out of core, out of mind: Practical parallel I/O
[DE94-003107] p 2979 N94-25952
Achieving high performance on the Intel Paragon
[DE94-003108] p 2979 N94-25953
Real-time tracking with a 3D-flow processor array
[DE94-003981] p 2980 N94-25984
Fast parallel algorithms for short-range molecular dynamics
[DE93-018519] p 3016 N94-26033
Run-time recognition of task parallelism within the P++ parallel array class library
[DE94-002707] p 2980 N94-26120
The Chaco user's guide
[DE94-003669] p 2962 N94-26370
Parallel grid generation algorithm for distributed memory computers
[NASA-TP-3429] p 2963 N94-26466
The High Performance Storage System
[DE94-004351] p 2948 N94-26578
Parallel computational geometry on analog Hopfield networks
[ISBN-0-315-84093-5] p 2980 N94-26635
Parallel matrix transpose algorithms on distributed memory concurrent computers
[DE94-002424] p 2964 N94-26764
Computational mechanics
[DE94-003015] p 2965 N94-26775
A Multitransputer Parallel Processing System (MTPPS)
[DE94-604652] p 2981 N94-26903
An optoelectronic graphics display processor
[AD-A274401] p 3037 N94-26990
Parallel mathematical software
[DE94-001587] p 2967 N94-27020
Interactive control of a parallel simulation from a remote graphics workstation
[AD-A274217] p 2981 N94-27070
Implementation and performance of a domain decomposition algorithm in Sisal
[DE94-002012] p 2981 N94-27092
Static task allocation for parallel processing systems during software development
[AD-A274204] p 2981 N94-27100
Automatic mapping of task and data parallel programs for efficient execution on multicomputers
[AD-A274125] p 2982 N94-27117

A parallel computational fluid dynamics unstructured grid generator
[AD-A274129] p 2795 N94-27119

Design of a parallel discrete event simulation coprocessor
[AD-A274135] p 2982 N94-27123

Virtual memory management and virtual bus overloading on multiple channel architectures
[AD-A274127] p 2954 N94-27152

Parallel string matching algorithms
[AD-A274502] p 3100 N94-27164

Proceedings of the Third Workshop Computersystems: Research Forum on Design, Realization and Use of Computersystems
[ISBN-90-6144-995-2] p 2954 N94-27191

Parallel computers for advanced information processing p 2955 N94-27193

Parallel discrete event simulation
p 2955 N94-27194

Sculpting in cyberspace: Parallel processing the development of new software p 2686 N94-27365

Shared virtual memory and generalized speedup
[NASA-CR-191592] p 2969 N94-27416

Parallel implicit unstructured grid Euler solvers
[NASA-CR-191594] p 2999 N94-27434

Efficient massively parallel simulation of dynamic channel assignment schemes for wireless cellular communications
[NASA-CR-191593] p 2971 N94-27558

Iterative methods for the WLS state estimation on RISC, vector, and parallel computers
[DE94-004260] p 3000 N94-27569

Center for space microelectronics technology
[NASA-CR-195282] p 2786 N94-27574

High performance computing in chemistry and massively parallel computers: A simple transition?
[DE94-004318] p 2982 N94-27600

MIMD parallel approaches to object labeling
[ISBN-0-315-60198-1] p 2982 N94-27644

A fast Fourier transform radix-2 complex butterfly with built-in self-test
[ISBN-0-315-84139-7] p 2982 N94-27649

Parallel computing for probabilistic response analysis of high temperature composites
[NASA-CR-194467] p 2843 N94-27656

Communication on the Paragon
[DE94-003103] p 2983 N94-27713

The PRISM project: Infrastructure and algorithms for parallel eigensolvers
[DE94-005125] p 2973 N94-27717

Review and analysis of dense linear system solver package for distributed memory machines
p 2978 N94-27916

PARALLEL PROGRAMMING

Abstraction in, specification and proof of software for a 1D heat-transfer problem
[REPT-93-45] p 2790 N94-25763

Parallel Assessment Window System (PAWS) enhancements
[AD-A274094] p 2979 N94-25786

Object interaction in a parallel object-oriented discrete-event simulation
[AD-A274084] p 2959 N94-25942

Out of core, out of mind: Practical parallel I/O
[DE94-003107] p 2979 N94-25952

Preconditioning in parallel Runge-Kutta methods for stiff initial value problems
[CWI-NM-R9310] p 2991 N94-26217

Programming in Fortran M
[DE94-002756] p 2963 N94-26407

Computational strategies for three-dimensional flow simulations on distributed computer systems
[NASA-CR-195249] p 2793 N94-26595

Efficient implementation of high-level parallel symbolic languages p 2955 N94-27196

Parallel algorithm for dominant points correspondences in robot binocular stereo vision p 2686 N94-27364

Semantics of MANIFOLD: Specification in ASF+SDF and extension
[CWI-CS-R9269] p 2971 N94-27575

Fast parallel permutation algorithms
[CWI-CS-R9303] p 2982 N94-27579

PARAMAGNETISM

Volume dependence of vanadium magnetism
[DE94-601838] p 3050 N94-25843

PARAMETER IDENTIFICATION

Grey-box modelling and identification topics
[PB94-126380] p 2986 N94-27029

Multiple model adaptive control of a large flexible space structure with purposeful dither for enhanced identifiability
[AD-A274132] p 2987 N94-27122

Multiple weight stepwise regression
[DE94-001602] p 3000 N94-27564

A parametric sensitivity study for single-stage-to-orbit hypersonic vehicles using trajectory optimization
[NASA-CR-195703] p 2697 N94-27789

PARAMETERIZATION

Parameter estimation of linear systems from frequency response measurements (computer program)
[ESDU-93016] p 2976 N94-28137

PARAMETRIC AMPLIFIERS

Optical parametric oscillator modeling with diffraction, depletion, and double refraction
[DE94-001504] p 3040 N94-27999

Sum frequency generation using an optical parametric oscillator
[DE94-001827] p 3040 N94-28000

PARITY

Data on parity violation in the compound nucleus and its interpretation
[DE94-003965] p 3013 N94-25820

Dynamic breaking of U(N) and appearance of Chern-Simons term in 4-fermion theories
[DE93-634342] p 3019 N94-26455

The Hamiltonian structures of the super KP hierarchy associated with an even parity superlax operator
[DE94-601506] p 2994 N94-26459

PARKING ORBITS

Lifetimes of lunar satellite orbits
[NASA-TP-3394] p 2690 N94-27771

PARKINSON DISEASE

Impaired associated movement in Parkinson's disease: An evaluation of Bell's phenomenon
p 2928 N94-27520

Effect of L-dopa on hemodynamic functions in humans p 2929 N94-27526

PARSING ALGORITHMS

Parsing schemata: A framework for parallel and sequential parsing
[PB94-125267] p 2981 N94-26998

PARTIAL DIFFERENTIAL EQUATIONS

Continuation and multi-grid for bifurcation problems
[AD-A274965] p 2992 N94-26302

VLUGR2: A vectorized local uniform grid refinement code for PDE's in 2D
[CWI-NM-R9306] p 2965 N94-26772

Local uniform grid refinement and systems of coupled partial differential equations
[CWI-NM-R9307] p 2995 N94-26773

Fields and potentials in general uniaxial bianisotropic media I. Axial sources
[PB94-132875] p 2778 N94-28379

PARTICLE ACCELERATION

Spin effects in hard interactions (interest in accelerated polarized beam)
[DE93-634398] p 3031 N94-26044

Ionosphere-magnetosphere coupling
[NASA-CR-195222] p 2881 N94-27237

Acceleration of electrons and ions by strong lower-hybrid turbulence in solar flares
[NASA-TM-109723] p 3111 N94-27953

PARTICLE ACCELERATOR TARGETS

JLC-1
[DE93-520380] p 3031 N94-26113

Study of the process (pi)(sup -)A(yields)(pi)(sup -)(eta)'(eta)A at the moment 36 GeV/c
[DE93-634530] p 3024 N94-27250

PARTICLE ACCELERATORS

Object-oriented software construction at ALS
[DE94-003418] p 2967 N94-27049

Space Experiments with Particle Accelerators (SEPAC)
[NASA-CR-193935] p 2761 N94-27664

Performance of a 14-MeV neutron generator as an in situ calibration source for TFTR
[DE94-004993] p 3048 N94-27825

PARTICLE BEAMS

Bundle Intensity and Beamgate Length recorder (BIBL)
[DIGEL-1993-7] p 3031 N94-25619

Advanced development of particle beam probe diagnostic system
[DE94-002316] p 3047 N94-27720

PARTICLE COLLISIONS

Production of (phi) mesons in central Si + Au collisions at 14.6 AGeV/c
[DE94-003196] p 3012 N94-25795

Convergent close-coupling calculation of electron-sodium scattering
[DE94-601815] p 3014 N94-25842

Hadron jets and nucleon clusters in the relativistic nuclear collisions
[DE93-613434] p 3031 N94-25850

The amplitude of the elastic hadron-hadron scattering in the coulombic range of transfer momenta
[DE93-613183] p 3014 N94-25869

Spectroscopic and vibrational energy transfer studies in molecular bromine
[AD-A273795] p 3014 N94-25875

Monte Carlo event generators for hadron-hadron collisions
[DE94-003212] p 3015 N94-25955

The Cherenkov hadronic like-jets
[DE93-634525] p 3016 N94-26010

Modeling defect production in high energy collision cascades
[DE94-003810] p 3017 N94-26049

The STAR experiment at the Relativistic Heavy Ion Collider
[DE94-003409] p 3017 N94-26083

Harvard University High Energy Physics
[DE94-002406] p 3032 N94-26119

Predictive modeling of particle-laden, turbulent flows
[DE94-003298] p 2792 N94-26319

Nuclear Theory Group, University of Washington recent and planned research
[DE94-002729] p 3022 N94-26809

D0 results on searches for the top quark
[DE94-003361] p 3023 N94-26938

Calculation of electron-potassium scattering
[DE94-601812] p 3023 N94-26942

Antiproton studies in penning traps
[AD-A274250] p 3024 N94-27011

An analysis of monojet data in p(bar-p) collisions at square root of s equal to 1.8 TEV
[DE94-001822] p 3026 N94-27565

Quantum chromodynamics and nuclear physics at extreme energy density
[DE94-004418] p 3026 N94-27604

Double excitation of He and H(-) by fast proton and anti-proton impact
[DE94-004581] p 3026 N94-27620

Stopping powers and cross sections due to two-photon processes in relativistic nucleus-nucleus collisions
[NASA-CR-4574] p 3033 N94-27646

Studies of heavy-ion reactions and transuranic nuclei
[DE94-004642] p 3029 N94-27783

PARTICLE DENSITY (CONCENTRATION)

Finite density effects in gauge theories
[ISBN-0-315-50637-7] p 3074 N94-27403

PARTICLE DIFFUSION

Bisexual branching diffusions
[AD-A274698] p 3008 N94-26374

PARTICLE ENERGY

Exploration of GaAs structures for solid-state detectors
[DE93-634191] p 3056 N94-26379

PARTICLE INTERACTIONS

Fermionic field theory and gauge interactions on random lattices
[DE94-601565] p 3051 N94-25885

CP test in the W pair production by way of photon fusion at NLC
[DE94-601608] p 3014 N94-25889

Principles of gauge theory of real hadrons
[DE93-616857] p 3015 N94-25920

PARTICLE MASS

C-periodicity and the physical mass in the 3-state Potts model
[DE94-601551] p 3019 N94-26423

Spectroscopy and strong decays of baryons
[ISBN-0-315-49073-X] p 3024 N94-27258

Finding the missing pieces of the standard model
[ISBN-0-315-57174-8] p 3024 N94-27259

On the model of the relativistic particle with curvature and torsion
[DE94-606330] p 3029 N94-27848

Cosmological constraints on very heavy stable neutrinos
[DE94-601669] p 3117 N94-28066

PARTICLE MOTION

Stochastic resonance in a periodic potential system under a constant force
[DE93-616817] p 3008 N94-25831

PARTICLE PRECIPITATION

Quiet-time intensifications along the poleward auroral boundary near midnight
[ATR-93(7248)-2] p 2877 N94-26201

PARTICLE PRODUCTION

Production of (phi) mesons in central Si + Au collisions at 14.6 AGeV/c
[DE94-003196] p 3012 N94-25795

Heavy quark production and spectroscopy
[DE94-003619] p 3015 N94-25935

Monte Carlo event generators for hadron-hadron collisions
[DE94-003212] p 3015 N94-25955

A dependence of exclusive vector meson production in muon-nucleus scattering
[DE94-003363] p 3016 N94-25957

The STAR experiment at the Relativistic Heavy Ion Collider
[DE94-003409] p 3017 N94-26083

Rescattering and energy loss of fast partons in nuclear matter
[DE94-002918] p 3018 N94-26145
A search for the production of direct leptons in nucleon-nucleus and nucleus-nucleus collisions
[DE94-004640] p 3018 N94-26244
Photon and hadron production of heavy flavors
[DE94-004655] p 3018 N94-26245
Strange Dibaryons
[DE94-003005] p 3022 N94-26769
D0 results on searches for the top quark
[DE94-003361] p 3023 N94-26938
Measurements of the B(sup 0)(bar B)(sup 0)CP asymmetry
[DE94-003379] p 3063 N94-27047
Study of the process (pi)(sup -)A(yields)(pi)(sup -)(eta)'(eta)A at the moment 36 GeV/c
[DE93-634530] p 3024 N94-27250
A jet calculus approach including coherence effects and the associated problem of moment inversion
[ISBN-0-315-51715-8] p 3025 N94-27266
Jet production in muon scattering at Fermilab E665
[DE94-004663] p 3028 N94-27752
Correlations in inelastic collisions of relativistic nuclei with emulsion at (4.1 - 4.5) A GeV/c
[DE93-634526] p 3030 N94-27994

PARTICLE SPIN
On the relativistic invariant representation of arbitrary bilinear combinations of Dirac spinors
[DE93-634343] p 3019 N94-26456
Correlated mean field Ansatz for the Kondo necklace
[DE94-603671] p 3067 N94-27634
On the model of the relativistic particle with curvature and torsion
[DE94-606330] p 3029 N94-27848
Axial anomaly in e(+)e(-) yields gamma gamma and anyon superconductivity
[DE94-606406] p 3070 N94-27859

PARTICLE TELESCOPES
CRRES high energy proton flux map
[AD-A274803] p 2878 N94-26338
The PROTEL contamination code
[RXR-93071] p 3040 N94-28202

PARTICLE THEORY
Cosmoparticle physics of family symmetry breaking
[DE94-601623] p 3013 N94-25837
Measurement of tau lepton branching fractions
[DE94-003423] p 3018 N94-26325
Construction of a new electroweak sphaleron
[NIKHEF-H/93-09] p 3020 N94-26540
On the model of the relativistic particle with curvature and torsion
[DE94-606330] p 3029 N94-27848

PARTICLE TRACKS
Fast vertex search (in plane)
[DE93-616655] p 2959 N94-25917
Algorithms of the vertex coordinate reconstruction for straight tracks of short-lived particles
[DE93-616661] p 3015 N94-25919

PARTICLE TRAJECTORIES
Structure functions of sea quarks, Kogut-Susskind pole and dynamics of pp- and pp-bar-interactions at high energies
[DE93-613184] p 3031 N94-25870
IRMA: A program for three-dimensional color display of data
[AD-A273811] p 2959 N94-25879
Ice accretion on aircraft wings p 2657 N94-28345

PARTICLES
Study on neutron activation analysis
[DE93-632191] p 3017 N94-26116

PARTICULATE REINFORCED COMPOSITES
Fracture behavior of 20% Nb particulate reinforced alumina composite
[DE94-002830] p 2706 N94-26019
Effects of post-fabrication processing on the tensile properties of centrifugally cast SiC particulate reinforced aluminum composites
[AD-A274865] p 2707 N94-26190

PARTICULATES
Study on neutron activation analysis
[DE93-632191] p 3017 N94-26116

PARTITIONS (MATHEMATICS)
The Chaco user's guide
[DE94-003669] p 2962 N94-26370
Statistical mechanical properties of Z(N)(sup n-1) broken model
[DE93-634344] p 2993 N94-26457
Computer code for controller partitioning with IFPC application: A user's manual
[NASA-CR-195291] p 2678 N94-27414

PARTONS
The STAR experiment at the Relativistic Heavy Ion Collider
[DE94-003409] p 3017 N94-26083
Rescattering and energy loss of fast partons in nuclear matter
[DE94-002918] p 3018 N94-26145
A jet calculus approach including coherence effects and the associated problem of moment inversion
[ISBN-0-315-51715-8] p 3025 N94-27266
High energy parton-parton elastic scattering in QCD
[DE94-003432] p 3028 N94-27736

PASSENGER AIRCRAFT
Design of the advanced regional aircraft, the DART-75
p 2671 N94-25708
The design of a long-range megatransport aircraft
p 2671 N94-25718
A symbol of reliability: Ju 52 p 2663 N94-28250

PASSENGERS
Powerful selling and sales strategy
p 2662 N94-28245
Lufthansa long range services: More simplicity
p 2663 N94-28246

PASSIVE SATELLITES
Ice surface temperature retrieval from AVHRR, ATSR, and passive microwave satellite data: Algorithm development and application
[NASA-CR-195276] p 2851 N94-27849

PASSIVITY
Electrochemical properties of passive films on 440C stainless steel
[ISBN-0-315-64248-3] p 2757 N94-27801

PASTES
A materials compatibility study in FM-1, a liquid component of a paste extrudable explosive
[DE94-001166] p 2759 N94-26198

PATHOGENS
Bakteriella toxiner-morgondagens hot (bacterial toxins-the threat of tomorrow)
[PB94-124229] p 2902 N94-27045

PATHOLOGY
Bakteriella toxiner-morgondagens hot (bacterial toxins-the threat of tomorrow)
[PB94-124229] p 2902 N94-27045

PATTERN RECOGNITION
Calculation of a 3-D pose of a known object in a single perspective view
[VTT-PUBS-122] p 2957 N94-25642
Solid estimation feature based correlation method for measuring control points required for correcting satellite images
[VTT-JULK-772] p 2848 N94-26253
Colour object recognition
[ISBN-0-315-83684-9] p 2994 N94-26614
A rough set approach to speech recognition
[ISBN-0-315-83894-9] p 2769 N94-26619
Three dimensional object recognition using a complex autoregressive model
[AD-A274388] p 2995 N94-26829
Interacting cortical filters for object recognition
[PB94-125374] p 2938 N94-26873
Orientation competition in cortical filters
[PB94-125366] p 2939 N94-27001
High-speed, high-density, coherent time-domain optical memory
[AD-A274249] p 3037 N94-27010
Combining shape and color information for 3D object recognition
[AD-A274123] p 2967 N94-27064
Translation and rotation invariant pattern recognition
[PB94-123676] p 2968 N94-27157
Parallel string matching algorithms
[AD-A274502] p 3100 N94-27164
Parallel algorithm for dominant points correspondences in robot binocular stereo vision p 2686 N94-27364
Saving comparisons in the Crochemore-Perrin string matching algorithm
[CWI-CS-R9322] p 2971 N94-27550
Thunderstorm Hypothesis Reasoner
[NASA-CR-195714] p 2897 N94-27884
Optical pattern recognition system utilizing resonator array
[AD-D016071] p 3040 N94-28224

PAYLOADS
Project Columbiad: Reestablishment of human presence on the Moon p 2689 N94-25687
STS-57 Space Shuttle mission report
[NASA-CR-195739] p 2693 N94-28220
STS-56 Space Shuttle mission report
[NASA-CR-195740] p 2693 N94-28221

PEBBLE BED REACTORS
Small low mass advanced PBR's for bi-modal operation
[DE94-003201] p 2699 N94-25798

PEEK
A study of graphite peek composite with central elliptical holes under tension
[AD-A273779] p 2705 N94-25863

PELLETS
High-speed repetitive pellet injector for plasma fueling of magnetic confinement fusion devices
[DE94-002792] p 3042 N94-26140

PENALTY FUNCTION
Quantum statistical inference for density estimation
[DE94-002625] p 3073 N94-26805
The numerical calculation of laminar and turbulent flows using penalty function finite volume methods
[ISBN-0-315-61377-7] p 2799 N94-27947

PENETRATION
Penetrating nature of very collimated high-energy shower-clusters of hadrons and gamma rays
p 3113 N94-25631
Users manual for CATNIP: A Computer Analysis Tool for Normal Impact Penetration
[DE94-003671] p 2962 N94-26371

PEPTIDES
Effect of PGE2 receptor agonists butaprost, M and B 28767 and an antagonist AH 6809 on the BK response of visceral polymodal receptors p 2906 N94-27494

PERCEPTION
CRC customer versus rater octane number requirement program (1990)
[AD-A273997] p 2758 N94-25901

PERCOLATION
The Fermi paradox: An approach based on percolation theory p 2687 N94-27370

PERCUSSION
Effects of slot on rock surface for percussive rock excavation: Water jet assisted percussive rock excavation p 2871 N94-28155

PERFORATED PLATES
Three-dimensional elastic stress concentration factors: Plain or countersunk hole in a wide plate subjected to tension, bending, or pin loading
[ESDU-93030] p 2845 N94-28143

PERFORMANCE PREDICTION
Predicting antenna parameters from antenna physical dimensions
[AD-A273893] p 3012 N94-25655
Program to develop a performance and heat load prediction system for multistage turbines
[NASA-CR-195223] p 2674 N94-26588
Early real-time performance measurements on the Columbus processor system p 2952 N94-26736
Integrated model development for liquid fueled rocket propulsion systems
[NASA-CR-195253] p 2702 N94-27166
Interdisciplinary technology p 2686 N94-27363
Rocket engine numerical simulation
p 2688 N94-27375
Transient model applications. 3: Transient engine simulation and analysis of an ice ingestion test
p 2829 N94-28050
Ejectors and jet pumps: Computer program for design and performance for liquid flow
[ESDU-93022] p 2832 N94-28093
Performance model of a recirculating stack nickel hydrogen cell p 2861 N94-28112
A340 testing p 2662 N94-28242

PERFORMANCE TESTS
A test of the theory of reasoned action at the group level of analysis
[AD-A273965] p 2937 N94-25897
Mitsubishi 3-5 micrometers IR imager for machine-vision/ATA applications
[AD-A273812] p 3034 N94-25940
Investigation of plasma etch induced damage in compound semiconductor devices
[DE94-002849] p 3052 N94-25989
Digital Altimeter Setting Indicator (DASI) Operational Test and Evaluation (OT/E) operational test procedures
[AD-A274100] p 2672 N94-26030
Rewarming methodologies in the field
[AD-A274744] p 2909 N94-26173
Differential global positioning system for the surface-towed ordnance locating system: Testing, results, and user's guide
[DE94-002980] p 2664 N94-26309
Hadron gas ionization calorimeters
[DE93-634186] p 2810 N94-26397
Study on the compensated lead hadron calorimeter characteristics by means of hadron and electron beams
[DE93-634176] p 2810 N94-26439
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 4: Laser velocimeter wake data, advance ratio of 0.037
[NASA-TM-109040-VOL-4] p 2645 N94-26483
Effects of repeating resistance testing on firing ability of igniter EP360-3
[AD-A274814] p 2759 N94-26486

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 1: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0081 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-1] p 2645 N94-26489

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 2: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 710 feet/second
[NASA-TM-109040-VOL-2] p 2645 N94-26492

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 3: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-3] p 2645 N94-26497

A comparison of sleep scored from electroencephalography to sleep scored by wrist actigraphy
[AD-A273739] p 2910 N94-26748

The PLVCR 500 and HCPC, tests and results
[DLR-MITT-93-04] p 2858 N94-26813

SP industry calorimeter for rate of heat release measurements up to 10MW
[PB94-124211] p 2811 N94-27044

Development of a performance evaluation tool (MMSOFE) for detection of failures with Multiple Model Adaptive Estimation (MMAE)
[AD-A274218] p 2665 N94-27071

Orbital transfer vehicle engine technology high velocity ratio diffusing crossover
[NASA-CR-194447] p 2703 N94-27212

The OPAL vertex detector
[ISBN-0-315-51152-4] p 2812 N94-27257

Design and implementation of a DBMS performance assessment tool
[CWI-CS-R9270] p 2972 N94-27576

Test and evaluation of the Litton (Canada) Canadian strapdown gyroscope (CSG-2) Performance Evaluation Unit (PEU)
[DREO-1010] p 2813 N94-27597

A fully integrated 16 channel digitally trimmed pulse shaping amplifier
[DE94-004555] p 2787 N94-27618

Communication on the Paragon
[DE94-003103] p 2983 N94-27713

Extra-Vehicular Activity (EVA) glove evaluation test protocol
[NASA-TM-108442] p 2943 N94-27952

Transient model applications. 3: Transient engine simulation and analysis of an ice ingestion test
p 2829 N94-28050

Cooling towers for combined cycles: Design philosophy, performance testing, and operating problems
p 2832 N94-28087

Ni-H2 cell characterization for INTELSAT programs
p 2861 N94-28109

Performance test results of ETS-6 Ni-Cd cells
p 2863 N94-28121

AF Ni-Cd cell qualification program
p 2863 N94-28122

Some observations on battery charge control
p 2863 N94-28125

Construction of temperature compensated constant voltage (VT) curves for super Ni-Cd (tm) cells
p 2863 N94-28126

A comparison of spectral decorrelation techniques and performance evaluation metrics for a wavelet-based, multispectral data compression algorithm
p 2946 N94-28258

Fibrous ceramic candle filter for particle removal in pressurized fluidized bed combustion
[PB94-133089] p 2876 N94-28383

PERIODIC VARIATIONS

Modal control of a satellite in an unstable periodic orbit about the Earth-Sun interior Lagrange point
[AD-A273707] p 2694 N94-25776

Modulating terrestrial impacts from Oort cloud comets by the adiabatically changing galactic tides
p 2890 N94-28305

PERIPHERAL CIRCULATION

Effect of prostaglandin E1 on the relationship between skin sympathetic nerve activity and reduction in skin blood flow p 2929 N94-27524

Difference in skin blood flow reduction depending on activating maneuver of skin sympathetic nerve activity
p 2929 N94-27525

Effect of L-dopa on hemodynamic functions in humans p 2929 N94-27526

PERIPHERAL EQUIPMENT (COMPUTERS)

Development of a MIL-STD-1750 microprocessor system for space applications p 2949 N94-26715

PERMANENT MAGNETS

First principle calculation for magneto-crystalline anisotropy
[DE93-634653] p 3052 N94-26012

Correlation of experimental data and three-dimensional finite element modeling of a spinning quadrupole
[DE93-041173] p 3008 N94-26421

PERMEABILITY

Study on alloy films for hydrogen separation
p 2726 N94-25565

Space-R thermionic space nuclear power system: Design and technology demonstration
[DE94-001890] p 2699 N94-25929

Application of the Positron Annihilation Technique to the study of vapor absorption process in polyethylene (LDPE) and in imide polymer (6FDA-TMPD PI)
[DE94-602737] p 2720 N94-27998

Plane wave propagation in an anisotropic chiral medium with isotropic permittivity and permeability
[PB94-133097] p 2778 N94-28384

Green dyadic and dipole fields for a medium with anisotropic chirality
[PB94-132933] p 2779 N94-28391

PERMEATING

Hydrogen uptake into silicon from an ECR plasma
[DE94-003771] p 3050 N94-25815

Ion-driven permeation of deuterium in metals
[DE94-701104] p 2744 N94-27876

PERMITTIVITY

A study of LPM suppression of bremsstrahlung at 25 GeV
[DE94-003457] p 3018 N94-26133

Refractive and dielectric properties of helium, argon and nitrogen gases
[PB94-123783] p 3008 N94-26851

Plane wave propagation in an anisotropic chiral medium with isotropic permittivity and permeability
[PB94-133097] p 2778 N94-28384

Green dyadic and dipole fields for a medium with anisotropic chirality
[PB94-132933] p 2779 N94-28391

Dielectric polarizability of sphere with arbitrary anisotropy
[PB94-133113] p 2779 N94-28397

PERMUTATIONS

Multi-channel Kondo necklace
[DE93-634754] p 3057 N94-26389

Fast parallel permutation algorithms
[CWI-CS-R9303] p 2982 N94-27579

PEROVSKITES

Polar and chemical domain structures of lead scandium tantalate (PST)
[DE94-600760] p 3056 N94-26363

Electrical conductivity of perovskite-magnesiowuestite as a function of pressure and temperature
[DE94-002714] p 2880 N94-26806

Ferroelectric thin film microstructure development and related property enhancement
[DE94-002741] p 3061 N94-26856

Perovskite solid electrolytes for SOFC
[DE94-001923] p 2859 N94-27005

PERSONAL COMPUTERS

Users guide for GRIKURV: A code for drawing graphs
[PB94-123593] p 2968 N94-27154

Development of an automatic fatigue-data acquisition system using commercial software
[NAL-TM-650] p 2842 N94-27207

Inverted pendulum control apparatus using transputers
[DE94-701224] p 2973 N94-27732

PERSONNEL

Evaluation and improvement of the inquest system on work accidents (TOT)
[VTT-TIED-1418] p 2762 N94-26261

Human dimensions research team, operation restore hope
[AD-A274340] p 2939 N94-27056

How to make good use of international research collaboration, with emphasis on the evolving situation in Europe
[PB94-119690] p 3101 N94-27323

Defense force management: Challenges facing DOD as it continues to downsize its civilian work force. Report to the Chairman, Subcommittee on Federal Services, Post Office, and Civil Service, Committee on Governmental Affairs, US Senate
[GAO/NSIAD-93-123] p 3095 N94-28177

PERSONNEL MANAGEMENT

Concepts and methods of measuring productivity at the organization level
[AD-A273126] p 3094 N94-27180

An investigation of integrated product development implementation issues: A case study of Bosma Machine and Tool Corp.
[AD-A273917] p 2942 N94-27320

Defense force management: Challenges facing DOD as it continues to downsize its civilian work force. Report to the Chairman, Subcommittee on Federal Services, Post Office, and Civil Service, Committee on Governmental Affairs, US Senate
[GAO/NSIAD-93-123] p 3095 N94-28177

PERSONNEL SELECTION

A comparison of two hardware implementations of a crew selection system
[AD-A274913] p 2937 N94-26346

Validation of the Federal Aviation Administration air traffic control specialist pre-training screen
[DOT/FAA/AM-94/4] p 2938 N94-26600

PERSPIRATION

Difference in skin blood flow reduction depending on activating maneuver of skin sympathetic nerve activity
p 2929 N94-27525

Enhancement of skin sympathetic nerve activity in amyotrophic lateral sclerosis p 2930 N94-27532

PERTURBATION

Mix induced by single shock passage through a material interface
[DE93-019505] p 2792 N94-26427

Delta f Algorithm
[DE94-003120] p 2963 N94-26521

Normal forms for perturbations of the euler top
[PB94-125390] p 3009 N94-26968

An enhanced global spectral model
[PL-TR-92-2011] p 2898 N94-28223

PERTURBATION THEORY

Experimental study of the near threshold pi(sup +)p yields (pi(sup +))(pi(sup +))(n) cross section and chiral symmetry
[DE94-601671] p 3014 N94-25840

On the estimation of matrix elements for optical transitions in semiconductors
[DE93-613550] p 3051 N94-25851

The modal solution to the Moon's orbit using canonical Floquet perturbation theory
[AD-A273732] p 2690 N94-26001

First principle calculation for magneto-crystalline anisotropy
[DE93-634653] p 3052 N94-26012

Generalized perturbation method expansions of the total energy of an alloy
[DE94-003865] p 3055 N94-26238

On the phi(sub 0)-stability of perturbed nonlinear differential systems
[DE93-634304] p 2993 N94-26441

Low-energy hadronic interactions beyond the current algebra approach
[DE94-602600] p 3022 N94-26900

Operator regularization and renormalization theory
[ISBN-0-315-49334-8] p 3007 N94-27264

PETRI NETS

A modular approach to evaluation cryptographic protocols using Petri nets
[ISBN-0-315-85354-9] p 2972 N94-27595

Sheaf semantics for Petri Nets
[PB94-132826] p 2983 N94-28354

PETROLEUM PRODUCTS

The First Energy Conference: Israel and the Former USSR
[ISBN-965-229-098-X] p 2853 N94-26050

Feasibility study on introduction of transportation-use petroleum substitution energy
[DE94-725205] p 2759 N94-26905

Present situation of the development of petroleum substitution energy (France)
[DE94-725201] p 2760 N94-26914

PH

Fiber optic sensors for corrosion detection
p 3040 N94-27923

PHASE CHANGE MATERIALS

Liquid metal MHD research and development in Israel
p 2854 N94-26055

PHASE CONJUGATION

Phase conjugation and pulse compression of high energy lasers: From nanoseconds to microseconds
[DE94-001061] p 2818 N94-26699

High-speed, high-density, coherent time-domain optical memory
[AD-A274249] p 3037 N94-27010

Phase conjugated lasers applied to commercial x ray lithography
[DE94-001529] p 2819 N94-27018

Predoctoral training grant in the area of physical sciences
[DE94-004406] p 3039 N94-27603

PHASE DIAGRAMS

Phase diagram of La2NiO(4+delta) (0 less than or equal to delta less than or equal to 0.18). 1: Phases at room temperature and phase transition above delta equal to 0.15
[REPT-A-2661] p 3053 N94-26089

Zr-rich corner of the Zr-Sn-O diagram
[DE93-633764] p 2734 N94-26161
Phase portraits of quadratic systems with finite multiplicity three and one critical point of infinity
[REPT-93-41] p 2991 N94-26215
Zr-Sn-Nb alloys: Preliminary studies
[DE93-633767] p 2734 N94-26263
Liquid and solid solubility of Ag in Bi2Sr2CaCu2O8
[DE94-002829] p 2735 N94-26273
Eutectic transformation L in equilibrium to Zr6Fe23 + Fe(tau) in the Fe-Zr system
[DE93-633766] p 2735 N94-26295
Experimental determination of the CU-IN-PB ternary phase diagram
[DE94-003765] p 2735 N94-26349
A new materials data compilation can help in actinide phase-diagram research
[DE94-000797] p 3058 N94-26514
Correlated mean field Ansatz for the Kondo necklace
[DE94-603671] p 3067 N94-27634
Phase stability in the Cd-Mg system
[DE94-004976] p 2743 N94-27792

PHASE ERROR
Numerical simulation of tomographic reconstruction for the study of turbulence using optical wavefront sensor measurements
[AD-A273851] p 2789 N94-25587
Feasibility study of a multiaperture telescope for deep-space Earth surveillance
[AD-A273903] p 3102 N94-25658

PHASE LOCK DEMODULATORS
Design and test of a regenerative satellite transmultiplexer
[ISBN-0-315-85280-1] p 2786 N94-27303

PHASE MATCHING
Three-wave nonlinear interactions in KTiOPO4 (KTP) and KTP isomorphs
[AD-A274079] p 3052 N94-25993
Laser phase induced intensity noise in fiber-optic signal processing and sensing systems
[ITN-94-85234] p 2819 N94-27179

PHASE MODULATION
Structure of the modulated magnetic phase of Mn3Sn
[DE94-002788] p 2733 N94-26092

PHASE SHIFT
Ferrite phase shifters using stress insensitive materials
[AD-A274639] p 2708 N94-26895
Bulletin of the Institute for Chemical Reaction Science, Tohoku University, volume 2
[JTN-94-80602] p 2717 N94-27385
Four phase microwave pulse generator for pulsed EPR spectrometer p 2718 N94-27388
Interhemispheric phase relationship of alpha waves and cerebral dominance p 2927 N94-27518

PHASE SHIFT KEYING
On the performance of trellis coded 8PSK with Reed Solomon codes
[ISBN-0-315-84289-X] p 2770 N94-26626
Short-block data detection techniques employing channel estimation for fading time-dispersive channels
[ISBN-0-315-58970-1] p 2777 N94-27806

PHASE STABILITY (MATERIALS)
Generalized perturbation method expansions of the total energy of an alloy
[DE94-003865] p 3055 N94-26238
Octahedral metallomesogens: Liquid crystallinity in low aspect ratio materials
[AD-A274830] p 3059 N94-26571
A tri-junction diffusion couple analysis of the Nb-Cr-Ti system at 950 C
[DE94-002637] p 2737 N94-26607

PHASE TRANSFORMATIONS
Study on computerized experiment of amorphous transformation process by solid phase reaction
p 2726 N94-25564
Coherent state approach for the (Phi)(sup 6)-lattice model and phase transitions
[DE93-613053] p 3050 N94-25825
Out of equilibrium phase transitions and a toy model for disoriented chiral condensates
[DE94-601642] p 3013 N94-25839
Successive structural phase transitions in stoichiometric La2NiO4 observed by x ray diffraction
[REPT-A-2665] p 3051 N94-25921
Structure and phase transformations in uranium metal
[DE94-003892] p 2732 N94-26004
Oriented lead zirconate titanate thin films: Characterization of film crystallization
[DE94-003104] p 3053 N94-26025
Phase diagram of La2NiO(4+delta) (0 less than or equal to delta less than or equal to 0.18). 1: Phases at room temperature and phase transition above delta equal to 0.15
[REPT-A-2661] p 3053 N94-26089
Se EXAFS study of the elevated wurtzite to rock salt structural phase transition in CdSe nanocrystals
[DE94-003247] p 3054 N94-26125
Diffusion of substitutional elements in Ti in its hcp phase
[DE93-633762] p 2733 N94-26160
Fermi-liquid to non-Fermi-liquid transition in a dynamical generalization of the CPA in a disordered Hubbard model
[DE94-601875] p 2714 N94-26169
Zr-Sn-Nb alloys: Preliminary studies
[DE93-633767] p 2734 N94-26263
Analysis of the effect on growth kinetics of gamma prima phase in Inconel 713C alloys
[DE93-633763] p 2735 N94-26294
Eutectic transformation L in equilibrium to Zr6Fe23 + Fe(tau) in the Fe-Zr system
[DE93-633766] p 2735 N94-26295
C-periodicity and the physical mass in the 3-state Potts model
[DE94-601551] p 3019 N94-26423
Electron microscopy of AlN-SiC interfaces and solid solutions
[DE94-002449] p 3059 N94-26765
Cosmological phase transitions
[DE94-003001] p 3104 N94-26786
Titanium 1992: Science and Technology, volume 1
[AD-A274798-VOL-1] p 2739 N94-26799
Ultrastructure processing of macromolecular materials
[AD-A274460] p 2754 N94-27086
Morphology transitions during non-equilibrium growth processes
[ITN-94-85236] p 3065 N94-27243
Localization properties of one-dimensional electrified chains
[DE94-603672] p 3067 N94-27635
Second-order phase transition in (g(phi)4)2 theory
[DE94-603677] p 3067 N94-27638
Construction and test of experiment hardware for a space experiment on Spacelab mission IML-2
[DLR-FB-93-23] p 2903 N94-27743
A numerical approach to Stefan problem
[IPPCZ-334] p 2844 N94-27841
The Science Reports of the Research Institutes, Tohoku University. Series A: Physics, Chemistry, and Metallurgy. Volume 38, No. 1: Amorphous Materials 14
[JTN-94-80610] p 2744 N94-28158
Differential scanning calorimetric study of solid state amorphization and crystallization in Zr/Co and Zr/Ni multilayers p 2745 N94-28161
Formation and crystallization of hydrogen-induced amorphous Ti3InH(4.5) alloy p 2745 N94-28163
Formation of glassy Pd-Ni-P alloys by mechanical alloying and their structure and thermal stability
p 2746 N94-28168
Production of an amorphous Fe(75)Si(10)B(15) sheet by a metallic mold casting method and its properties
p 2746 N94-28170

PHASED ARRAYS
Project PARAS: Phased array radio astronomy from space p 3081 N94-25703
Characterization of an LCD for use as a programmable phase shifter to produce a single-lobed far-field pattern in a phased array
[AD-A273883] p 3034 N94-25729
A current evaluation of the digital beamforming testbed at Rome Laboratory
[AD-A274311] p 3032 N94-26881
Design and control of phased ICRF antenna arrays
[DE94-002796] p 3046 N94-27261

PHENOLIC RESINS
Soft ground arresting system for airports
[DOT/FAA/CT-93/80] p 2680 N94-26202

PHENOLS
Effects of p-chlorophenol on sulfate reduction in marine sediments p 2870 N94-28150

PHENOMENOLOGY
Harvard University High Energy Physics
[DE94-002406] p 3032 N94-26119

PHILIPPINES
Philippine thrust on environmental research relating to global change p 2873 N94-28279

PHOBOS
Project APEX: Advanced manned exploration of the Martian moon Phobos p 3079 N94-25688

PHONEMES
Researches of the Electrotechnical Laboratory. No. 955: Speech recognition by description of acoustic characteristic variations
[JTN-94-80604] p 2775 N94-27249

PHONONS
Strongly interacting fermion systems
[DE94-002674] p 3021 N94-26677

PHOSPHATES
Zinc(2) oxide stability in alkaline sodium phosphate solutions at elevated temperatures
[DE94-003316] p 2715 N94-26320
Development of K(1-x)Na(x)TiOPO4 crystals for nonlinear applications
[AD-A274336] p 3063 N94-27055
Effect of different ions on the anodic behaviour of alloy 800 in chloride solutions at high temperature
[DE94-602982] p 2743 N94-27832

PHOSPHAZENE
Phosphazene-containing amine as curing agent for phthalonitrile-base polymer
[AD-D016029] p 2755 N94-27147

PHOSPHORESCENCE
Dynamics of metastable states in supersonic beams
[ITN-94-85232] p 3028 N94-27760

PHOSPHORIC ACID
Qualitative analysis of rare earth elements contained in the phosphogypsum
[DE93-614153] p 2716 N94-26518

PHOSPHORUS
Simplified high-efficiency silicon cell processing
[DE94-002683] p 2857 N94-26617
He(+) and H(+) microbeam damage, swelling and annealing in diamonds
[DE94-601912] p 3063 N94-26987
Electron microscopy studies of undoped and phosphorus doped Si:H and Si,C:H films
[DE94-004738] p 3069 N94-27757
Formation of glassy Pd-Ni-P alloys by mechanical alloying and their structure and thermal stability
p 2746 N94-28168

PHOSPHORYLATION
Activation by G protein beta gamma subunits of G protein-coupled receptor kinase p 2931 N94-27534

PHOTOACOUSTIC SPECTROSCOPY
Modern photoacoustic spectroscopy problems. Theory and experiment (a review)
[IFTR-41/1993] p 2716 N94-26823

PHOTOCHEMICAL REACTIONS
Translational-energy-resolved studies of photogenerated carrier-induced reactions on UHV semiconductor surfaces
[DE94-004169] p 3058 N94-26526
Mechanistic studies of opto-electronic materials and syntheses using multiple laser and surface diagnostics
[AD-A274528] p 3036 N94-26834
Numerical analysis of the photo-dissociation/radical oxidation of formaldehyde by ultraviolet light in a photolytic reactor
[AD-A274539] p 2868 N94-26843
Photochemical processes and the atmospheric airglow emissions of OH and Na in the mesospheric region
[INPE-5380-PUD/050] p 2882 N94-27334
How well was total ozone abundance inferred with Mariner 9? p 3108 N94-27891
The kinetics and dynamics of the coma of Halley's comet
[NASA-CR-194828] p 3105 N94-28184

PHOTOCONDUCTIVITY
Determination of surface recombination velocity and bulk lifetime in detector grade silicon and germanium crystals
[DE94-003886] p 3053 N94-26094
Fast photoconductor CdTe detectors for synchrotron x ray studies
[DE94-001334] p 3054 N94-26139
The optical properties of high-T(c) superconductors grown by pulsed laser deposition
[ISBN-0-315-84917-7] p 3039 N94-27962
Anisotropy in the electrical, magnetic and optical properties of Pb2Sr2RCu3O8
[ISBN-0-315-84930-4] p 3070 N94-27974

PHOTOCONDUCTORS
Fast photoconductor CdTe detectors for synchrotron x ray studies
[DE94-001334] p 3054 N94-26139

PHOTODIODES
Elastic backscattering lidar for a MSTI satellite
[DE94-002701] p 2816 N94-26126

PHOTODISSOCIATION
Theoretical determination of chemical rate constants using novel time-dependent methods
[NASA-CR-195221] p 2714 N94-26205
Numerical analysis of the photo-dissociation/radical oxidation of formaldehyde by ultraviolet light in a photolytic reactor
[AD-A274539] p 2868 N94-26843
The kinetics and dynamics of the coma of Halley's comet
[NASA-CR-194828] p 3105 N94-28184

PHOTOELECTRIC EMISSION
A study of LPM suppression of bremsstrahlung at 25 GeV
[DE94-003457] p 3018 N94-26133

PHOTOELECTROMAGNETIC EFFECTS
Technical report of ISSP. Ser. A, no. 2672: Magneto-optical effects of excitons in BiI3 crystals under pulsed high magnetic fields. 3: Excitons confined around a stacking disorder formed by a bending stress
[JTN-94-80558] p 3065 N94-27240
PHOTOELECTRON SPECTROSCOPY
Photoelectron spectroscopic studies of the electronic structure and bonding in TiC and TiN
[ATR-93(8361)-2] p 2746 N94-28185
PHOTOELECTRONS
The 1024 scintillation hodoscope
[DE93-634183] p 2810 N94-26394
Solar and airglow measurements aboard the two suborbital flights NASA 36.098 and 36.107
[NASA-CR-195279] p 2882 N94-27380
PHOTOEXCITATION
Technical report of ISSP. Ser. A, no. 2680: Determination of intervalley scattering time in germanium by subpicosecond time-resolved Raman spectroscopy
[JTN-94-80566] p 3064 N94-27176
PHOTOGRAPHIC RECORDING
Root gravitropism in maize and Arabidopsis
[NASA-CR-195710] p 2903 N94-27940
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle mission STS-60
[NASA-TM-109193] p 2692 N94-27956
PHOTOINTERPRETATION
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle mission STS-60
[NASA-TM-109193] p 2692 N94-27956
PHOTOIONIZATION
Three methods to measure RH bond energies
[DE94-003795] p 3013 N94-25816
Development of laser spectroscopic technology in nuclear industry
[DE93-633327] p 2714 N94-26158
Study on laser atomic spectroscopy
[DE93-633328] p 2817 N94-26402
Measurement of metastable population distribution in gadolinium atomic beam by laser resonance photoionization method
[DE94-701194] p 3029 N94-27820
PHOTOLITHOGRAPHY
Sum frequency generation using an optical parametric oscillator
[DE94-001827] p 3040 N94-28000
PHOTOLUMINESCENCE
Ordering and phase separation in MOCVD InGaP alloys and unicompositional quantum wells
[DE94-004693] p 3056 N94-26352
Light emitting porous silicon
[AD-A274152] p 3038 N94-27137
PHOTOLYSIS
Numerical analysis of the photo-dissociation/radical oxidation of formaldehyde by ultraviolet light in a photolytic reactor
[AD-A274539] p 2868 N94-26843
PHOTOMAPPING
Optical pattern recognition system utilizing resonator array
[AD-D016071] p 3040 N94-28224
PHOTOMETERS
Investigation of a normal incidence high-performance p-type strained layer In(0.3)Ga(0.7)As / In(0.52)Al(0.48) as quantum well infrared photodetector
[AD-A274854] p 3055 N94-26188
Multichip module high speed testing
[AD-A274873] p 2782 N94-26343
The growth and characterization of GaN as a photodetector
[AD-A274570] p 3063 N94-26965
PHOTOMULTIPL'ER TUBES
The 1024 scintillation hodoscope
[DE93-634183] p 2810 N94-26394
PHOTON BEAMS
Spectral and temporal correlations of multifrequency waves in the turbulent atmosphere
[ITN-94-85229] p 2774 N94-27233
PHOTON-ELECTRON INTERACTION
Theoretical and experimental studies of elementary physics
[DE94-002310] p 3008 N94-25988
Deciphering the quark-gluon structure of the photon in electron(gamma) collisions
[DE93-634386] p 3017 N94-26043
PHOTONICS
Component characterization and development 2
[AD-A274002] p 2765 N94-25660
Diagnostics and microelectronics
[DE94-003016] p 2784 N94-26777
Center for space microelectronics technology
[NASA-CR-195282] p 2786 N94-27574
PHOTONS
Biexciton formation by two-photon absorption in quantum wells
[DE93-613551] p 3071 N94-25852
Theoretical and experimental studies of elementary physics
[DE94-002310] p 3008 N94-25988
Deciphering the quark-gluon structure of the photon in electron(gamma) collisions
[DE93-634386] p 3017 N94-26043
Radiation-Induced Structural Changes, 2
[DE93-520314] p 3054 N94-26109
Fast photoconductor CdTe detectors for synchrotron x ray studies
[DE94-001334] p 3054 N94-26139
Photon and hadron production of heavy flavors
[DE94-004655] p 3018 N94-26245
Measurements of the p (mu)d-molecule formation rate at different hydrogen temperature
[DE93-634636] p 3020 N94-26511
Aspects of perturbative corrections in quantum chromodynamics
[ISBN-0-315-63607-6] p 3074 N94-27398
Omega omega and rho+ rho- production in two photon interactions at ARGUS
[ISBN-0-315-63748-X] p 3026 N94-27399
Nonlinear transverse propagation of photons in a ultrarelativistically hot and magnetized electron-positron plasma: Coupling of Langmuir and electromagnetic solitons
[DE94-603667] p 3046 N94-27630
Pi plus pi minus gamma and K+ K- production in two photon collisions at ARGUS
[ISBN-0-315-63598-3] p 3027 N94-27684
PHOTONUCLEAR REACTIONS
Proceedings of the workshop on (pi), K, (eta)-nucleon interactions
[DE94-701314] p 3027 N94-27733
PHOTOPRODUCTION
Electroweak and other interactions in medium-energy nuclear physics
[DE94-004161] p 3027 N94-27689
Proceedings of the workshop on (pi), K, (eta)-nucleon interactions
[DE94-701314] p 3027 N94-27733
PHOTORECONNAISSANCE
Objective image quality metrics: Applications for partially compensated images of space objects
[AD-A273837] p 2847 N94-25741
PHOTOSENSITIVITY
Calorimeter with WLS fibers and parallel to beam scintillators
[DE93-634188] p 2810 N94-26378
Physical characteristics of polymethylmethacrylate scintillator SOFG-120
[DE93-634184] p 2810 N94-26395
PHOTOSPHERE
Environmental conditions responsible for solar activity
[AD-A274191] p 3111 N94-27099
PHOTOTRANSISTORS
A tri-state optical switch for local area network communications p 2789 N94-27922
PHOTOVOLTAIC CELLS
Overview of the Photovoltaic Manufacturing Technology (PVMaT) project
[DE93-018234] p 2856 N94-26426
Low-cost photovoltaic inverters incorporating application-specific integrated circuits
[DE94-003270] p 2856 N94-26463
Handbook of photovoltaic power generating design for introduction
[DE94-725199] p 2858 N94-26913
Solar collector manufacturing activity, 1992
[DE94-003401] p 2859 N94-27048
PHOTOVOLTAIC CONVERSION
The state of the art of thin-film photovoltaics
[DE94-000224] p 2855 N94-26115
Hybrid power system for remote communications stations
[AD-A274963] p 2782 N94-26301
Solar resource-utility load matching assessment: NREL photovoltaic project summary
[DE94-000232] p 2856 N94-26480
Merging photovoltaic hardware development with hybrid applications in the USA
[DE94-002682] p 2857 N94-26612
Handbook of photovoltaic power generating design for introduction
[DE94-725199] p 2858 N94-26913
Fibrous emissive burners selective and broad band
[PB94-128329] p 2859 N94-27225
PHTHALOCYANIN
Fundamental study on new synthetic technology by phthalocyanine complexes p 2721 N94-25569
PHYSICAL CHEMISTRY
Crystal chemistry and self-lubricating properties of monochalcogenides gallium selenide and tin selenide
[DE93-041177] p 2751 N94-26422
Ultrastructure processing of macromolecular materials
[AD-A274460] p 2754 N94-27086
PHYSICAL EXAMINATIONS
Monograph of the aviation epidemiology data register for calendar year 1988
[AD-A274589] p 2911 N94-26985
PHYSICAL EXERCISE
The effect of platform motion on human energy expenditure during walking. An exploratory experiment
[AD-A273760] p 2940 N94-25724
Plasma volume shifts and exercise thermoregulation with water immersion and six-degree head-down tilt
[NASA-TM-108781] p 2901 N94-26093
Thermoregulatory effects of caffeine ingestion during rest and exercise in men
[NASA-TM-108783] p 2901 N94-26210
Sympathetic nerve activity during dynamic leg exercise
p 2929 N94-27527
Workshop on Countering Space Adaptation with Exercise: Current Issues
[NASA-CP-3252] p 2934 N94-28361
Muscular activity and its relationship to biomechanics and human performance p 2934 N94-28362
Eccentric exercise testing and training
p 2934 N94-28363
Exercise detraining: Applicability to microgravity
p 2934 N94-28364
Exercise and osteoporosis: Methodological and practical considerations p 2935 N94-28370
The value of electrical stimulation as an exercise training modality p 2936 N94-28372
The use of biomechanics in the study of movement in microgravity p 2936 N94-28373
Psychophysiology in microgravity and the role of exercise p 2936 N94-28374
PHYSICAL FACTORS
Mass extinctions: Persistent problems and new directions p 2889 N94-28302
PHYSICAL FITNESS
Aeromedical issues related to positive pressure breathing for +Gz protection
[AD-A274717] p 2910 N94-26435
Female combat helicopter pilot selection criteria
[AD-A273935] p 2938 N94-26749
PHYSIOCHEMISTRY
Proposed law of nature linking impacts, plume volcanism, and Milankovitch cycles to terrestrial vertebrate mass extinctions via greenhouse-embryo death coupling
p 2876 N94-28307
PHYSIOLOGICAL ACCELERATION
Evaluation of near-infrared spectrophotometric method for individual tolerance to +Gz acceleration
p 2933 N94-27944
PHYSIOLOGICAL EFFECTS
Annals of the Research Inst. of Environmental Medicine, Nagoya Univ., volume 44
[REPT-44-VOL-44] p 2911 N94-27442
Study on posture control and adaption mechanism under weightlessness: Results of second rehearsal for space experiment using carp p 2912 N94-27446
Study on posture control and adaption mechanism under weightlessness: Differences in weight and shape of utricular otolith of carp p 2912 N94-27448
Telescience testbedding for physiological experiments under hypobaric hypoxic conditions
p 2913 N94-27449
Telescience testbedding under hypobaric hypoxic conditions: Evaluation by operation ability and recognition ability p 2913 N94-27450
The electrogastrogram during parabolic flight
p 2913 N94-27452
Vertical gaze direction during parabolic flight
p 2913 N94-27453
Heart rate change in normal and labyrinthectomized hamsters during parabolic flight p 2914 N94-27454
Frequency analysis of body sway induced by optokinetic stimulation p 2914 N94-27455
Cardiovascular function during thermoneutral head-out water immersion in the elderly p 2915 N94-27458
Effects of 40 C hot water immersion for an hour on thermoregulatory functions in humans: Comparison with 34 C thermoneutral immersion p 2915 N94-27459
Effects of bathing at 40 C on cardiovascular system in humans: Comparison with 34 C thermoneutral bathing
p 2918 N94-27473
Effects of 41 C bathing for 20 minutes on cardiovascular and thermoregulatory functions in humans
p 2918 N94-27474
Monthly variation of physiological and psychological responses under unsteady thermal conditions
p 2918 N94-27475

Man's ability to adapt himself for the seasonal climatic changes: From viewpoint of anticipation and seasonable behavior p 2919 N94-27476

Symptoms of hypoxia at simulated altitude of 25,000 feet p 2933 N94-27945

The use of biomechanics in the study of movement in microgravity p 2936 N94-28373

PHYSIOLOGICAL RESPONSES

The effect of platform motion on human energy expenditure during walking. An exploratory experiment [AD-A273760] p 2940 N94-25724

Thermoregulatory effects of caffeine ingestion during rest and exercise in men [NASA-TM-108783] p 2901 N94-26210

Changes in circadian variations of urine excretion in tail-suspended rats p 2911 N94-27443

Endocrinological evaluations of muscle and bone atrophy in tail-suspended rats p 2903 N94-27444

Aerobic fitness and orthostatic tolerance: Evidence against an association p 2934 N94-28365

Exercise and osteoporosis: Methodological and practical considerations p 2935 N94-28370

Electrical stimulation in exercise training p 2935 N94-28371

PHYSIOLOGICAL TESTS

Effects of methamphetamine on vigilance and tracking during extended wakefulness [AD-A274896] p 2909 N94-26179

The use of EEG as a workload assessment tool in flight test [AD-A274568] p 2910 N94-26847

On the development of motor chunks and concurrent processing in a structured continuous keypressing task [AD-A274153] p 2939 N94-27138

Does training-induced orthostatic hypotension result from reduced carotid baroreflex responsiveness? p 2935 N94-28366

PHYSIOLOGY

Aeromedical issues related to positive pressure breathing for +Gz protection [AD-A274717] p 2910 N94-26435

Multivariate calibration applied to near-infrared spectroscopy for the quantitative analysis of dilute aqueous solutions [DE94-003231] p 2716 N94-26794

Eccentric exercise testing and training p 2934 N94-28363

PHYTOPLANKTON

Changes in phytoplankton population in the Chao Phraya estuary, Thailand, during the eutrophication mechanisms studies p 2875 N94-28287

PIEZOELECTRIC CERAMICS

A study on piezoelectric actuators and sensors for vibration control of flexible space structures [AD-A274925] p 2695 N94-26532

PIEZOELECTRICITY

Object imaging accomplished with an integrated circuit robotic tactile sensor incorporating a piezoelectric polyvinylidene fluoride thin film [AD-A274038] p 2780 N94-25845

Piezoelectric measurements on impact loaded PZT ceramics [NPL-DMM(A)-88] p 2752 N94-26652

High temperature sensor/microphone development for active noise control [NASA-CR-195214] p 2812 N94-27214

PIGMENTS

Polyurethane self-priming topcoats [AD-D016041] p 2755 N94-27111

PILOT ERROR

Aircraft accident report: Runway departure following landing American Airlines flight 102, McDonnell Douglas DC-10-30, N139AA, Dallas/Fort Worth International Airport, Texas, April 14, 1993 [PB94-910402] p 2660 N94-27766

PILOT PERFORMANCE

US Army aviation epidemiology data registry: Incidence and outcomes of aviator flying evaluation boards [AD-A274711] p 2910 N94-26432

Piloted simulation study of an ILS approach of a twin-pusher business/commuter turboprop aircraft configuration [NASA-TM-4516] p 2646 N94-26602

Task demand, workload, and performance [PB94-123627] p 2942 N94-27155

Brain wave correlates of attentional states: Event related potentials and quantitative EEG analysis during performance of cognitive and perceptual tasks p 2940 N94-27901

The Reports of Aeromedical Laboratory, volume 33, number 4 [JTN-94-80586] p 2933 N94-27942

Comparison of performance in simulator flight among subjects with different simulator experiences p 2933 N94-27943

Evaluation of near-infrared spectrophotometric method for individual tolerance to +Gz acceleration p 2933 N94-27944

Symptoms of hypoxia at simulated altitude of 25,000 feet p 2933 N94-27945

PILOT PLANTS

Liquid metal MHD research and development in Israel p 2854 N94-26055

PILOT SELECTION

Female combat helicopter pilot selection criteria [AD-A273935] p 2938 N94-26749

Comparison of performance in simulator flight among subjects with different simulator experiences p 2933 N94-27943

PILOT TRAINING

Symptoms of hypoxia at simulated altitude of 25,000 feet p 2933 N94-27945

PILOTLESS AIRCRAFT

An analysis of multiple sensor system payloads for unmanned aerial vehicles [AD-A274905] p 2667 N94-26182

PINNING

Microstructural development in low activation ferritic alloys irradiated to 200 dpa at 420 C [DE94-004269] p 2731 N94-25803

The potential for large critical currents in the high T(sub c) oxides p 2854 N94-26058

Evaluation of APC NbTi superconductor in a model dipole magnet [DE94-003258] p 3060 N94-26795

Processing, fabrication, and demonstration of HTS integrated microwave circuits, appendix A [AD-A274600] p 2785 N94-26890

PINS

Crystal chemistry and self-lubricating properties of monochalcogenides gallium selenide and tin selenide [DE93-041177] p 2751 N94-26422

Guidelines for unlubricated sliding wear tests. Part 2: Procedures for pin-on-disc testing [PB94-123270] p 2825 N94-27324

PION BEAMS

Study on the compensated lead hadron calorimeter characteristics by means of hadron and electron beams [DE93-634176] p 2810 N94-26439

PIONS

Theoretical and computational studies in intermediate energy nuclear physics [DE94-004177] p 3012 N94-25800

Experimental study of the near threshold pi(sup +)p yields (pi(sup +))(pi(sup +))(n) cross section and chiral symmetry [DE94-601671] p 3014 N94-25840

Meson X(1814) as a candidate for a hybrid state [DE93-634447] p 3017 N94-26045

Pion-nucleus interactions and the STAR experiment at RHIC [DE94-000658] p 3021 N94-26586

Low-energy hadronic interactions beyond the current algebra approach [DE94-602600] p 3022 N94-26900

Study of the process (pi)(sup -)A(yields)(pi)(sup -)(eta)'(eta)A at the moment 36 GeV/c [DE93-634530] p 3024 N94-27250

Pi plus pi minus gamma and K+ K- production in two photon collisions at ARGUS [ISBN-0-315-63598-3] p 3027 N94-27684

PIPE FLOW

Experimental contribution to the study of secondary flows in centrifugal turbopump stator components [ECL-92-35] p 2789 N94-25654

PIPELINING (COMPUTERS)

A fast Fourier transform radix-2 complex butterfly with built-in self-test [ISBN-0-315-84139-7] p 2982 N94-27649

PIPES (TUBES)

Testing composite-to-metal tubular lap joints [DE94-003225] p 2836 N94-26032

Growth of small fatigue cracks in Incoloy-908 [DE94-003406] p 2836 N94-26129

Development of detection technique for fatigue crack due to thermal stratification phenomena in RCS piping [DE93-632968] p 2838 N94-26400

Template synthesis of metal microtubule ensembles utilizing chemical, electrochemical, and vacuum deposition techniques [AD-A274676] p 2715 N94-26444

Dynamics of a flexible extendible beam [ISBN-0-315-84278-4] p 2838 N94-26639

PITCHING MOMENTS

A numerical study of high-speed missile configurations using a block-structured parallel algorithm [AD-A273776] p 2979 N94-25860

Reconfigurable aircraft stick control [AD-D016043] p 2681 N94-27113

Wind tunnel investigation of propfan slipstream/wing interactions on a De Havilland air motor powered semispan model at Mach numbers 0.6 and 0.7 p 2651 N94-28316

PITTING

The electrochemical behavior of the Al3Fe intermetallic compound and localized corrosion of impure 1100 Al [DE94-002037] p 2739 N94-26912

Effect of different ions on the anodic behaviour of alloy 800 in chloride solutions at high temperature [DE94-602982] p 2743 N94-27832

PIXELS

Analysis of the influence of weather on infrared imagery [FEL-92-A421] p 3036 N94-26649

An algorithm for stereo correspondence problems on the analogy of human vision [NAL-TR-1185] p 2940 N94-27584

Image quality measures and their performance p 2946 N94-28257

PLANE WAVES

Hydroacoustic wave-fields generated by different source types, a computational study [PB94-123536] p 3010 N94-27037

Mach reflection of spherical detonation waves [DE93-016604] p 2797 N94-27705

The propagation of spark-produced N waves through turbulence p 2650 N94-28193

Plane wave propagation and polarization properties in transversely bianisotropic uniaxial medium [PB94-132883] p 2778 N94-28380

Eigenwaves in the general uniaxial bianisotropic medium with symmetric parameter dyadics [PB94-132891] p 2778 N94-28381

Plane wave propagation in an anisotropic chiral medium with isotropic permittivity and permeability [PB94-133097] p 2778 N94-28384

Green dyadic and dipole fields for a medium with anisotropic chirality [PB94-132933] p 2779 N94-28391

PLANETARY BASES

Pax: A permanent base for human habitation of Mars p 2943 N94-25706

PLANETARY BOUNDARY LAYER

An evaluation of the utility of ground-based high resolution interferometer (GB-HIS) soundings of the planetary boundary layer [DE94-000960] p 3106 N94-25981

The Martian atmospheric planetary boundary layer stability, fluxes, spectra, and similarity [NASA-CR-195711] p 3108 N94-27935

PLANETARY CRATERS

Cratering rates from lunar xenospherules [DE94-003481] p 3106 N94-27007

PLANETARY EVOLUTION

Studies of extra-solar Oort Clouds and the Kuiper Disk [NASA-CR-195242] p 3103 N94-26789

New Developments Regarding the KT Event and Other Catastrophes in Earth History [NASA-CR-195169] p 2887 N94-28294

Some implications of large impact craters and basins on Venus for terrestrial ringed craters and planetary evolution p 2890 N94-28306

PLANETARY GEOLOGY

A geological and geophysical information system for Eurasia [AD-A274818] p 3098 N94-26490

Some implications of large impact craters and basins on Venus for terrestrial ringed craters and planetary evolution p 2890 N94-28306

An extraterrestrial event at the tertiary-quaternary boundary p 2890 N94-28309

Were all extinction events caused by impacts? p 2891 N94-28311

PLANETARY MAGNETIC FIELDS

Analysis of energetic proton and electron data in Neptune's magnetosphere [NASA-CR-195707] p 3107 N94-27784

PLANETARY MAGNETOSPHERES

Studies for Io's extended atmosphere and neutral clouds and their impact on the local satellite atmosphere and on the planetary magnetosphere [NASA-CR-195255] p 3106 N94-27406

Analysis of energetic proton and electron data in Neptune's magnetosphere [NASA-CR-195707] p 3107 N94-27784

PLANETARY MAPPING

Copernicus: Lunar surface mapper p 3081 N94-25702

PLANETARY STRUCTURE

Underground structure in the eastern part of Kanagawa Prefecture inferred from explosion seismic observations p 2886 N94-27987

PLANETARY SURFACES

Hardware design of a spherical mini-rover p 2833 N94-25669

Planetary surface exploration MESUR/autonomous lunar rover p 2833 N94-25683
PLANETARY SYSTEMS
Studies of extra-solar Oort Clouds and the Kuiper Disk
[NASA-CR-195242] p 3103 N94-26789
PLANETARY WAVES
Numerical procedure for planetary wave solution
[DE94-004280] p 2879 N94-26576
Global barotropic response to a tropical forcing
[NASA-CR-195256] p 2896 N94-27408
PLANKTON
Coupling of pelagic and benthic communities over a seamount in the Eastern North Pacific
[AD-A274750] p 2899 N94-26149
PLANNING
Environmental benefits of different types of heat pumps, available and expected
[DE94-002440] p 2866 N94-26123
PLANT ROOTS
Root gravitropism in maize and Arabidopsis
[NASA-CR-195710] p 2903 N94-27940
PLANTS (BOTANY)
Report of National Institute for Resources and Environment. No. 5: Study on direct liquefaction of woody biomass
[JTN-94-80551] p 2859 N94-27204
PLASMA ARC WELDING
UAH mathematical model of the variable polarity plasma ARC welding system calculation
[NASA-CR-193926] p 2824 N94-27221
PLASMA COMPOSITION
Study on development of chemical measurement method utilizing plasmas p 2728 N94-25576
International bulletin on atomic and molecular data for fusion. No. 42-45, Mar. 1991 - Dec. 1992
[DE94-601817] p 3045 N94-26946
Helium transport and exhaust studies of H-mode discharges in the D3-D tokamak
[DE94-004744] p 3048 N94-27785
PLASMA CONTROL
High-speed repetitive pellet injector for plasma fueling of magnetic confinement fusion devices
[DE94-002792] p 3042 N94-26140
Scaling of sustained ZT-40 M reversed field pinches
[DE94-003318] p 3043 N94-26321
Probability of accessing the multiple saturated states in the resistive interchange instability
[DE94-000478] p 3044 N94-26694
Potential of commercial tokamak reactors with improved physics
[DE94-002794] p 3044 N94-26860
Role of core toroidal rotation shear on turbulence and transport in the improved confinement regimes of the D3-D tokamak
[DE94-001215] p 3045 N94-26950
High gas-efficiency hydrogen negative ion sources
[PB93-232163] p 3025 N94-27348
Researches of the Electrotechnical Laboratory. No. 51: Study of formation and sustainment of reversed field pinch by slow control of magnetic field
[JTN-94-80548] p 3046 N94-27350
TFTR experimental data analysis collaboration
[DE94-004166] p 3047 N94-27690
Helium transport and exhaust studies of H-mode discharges in the D3-D tokamak
[DE94-004744] p 3048 N94-27785
Fuel ion rotation measurement and its implications on H-mode theories
[DE94-004860] p 3048 N94-27791
On radio frequency wave induced radial transport and wave helicity
[IPPCZ-326] p 2777 N94-27838
On helicon wave induced radial plasma transport
[IPPCZ-333] p 3048 N94-27840
Determination of the plasma column shape in the Tokamak Novillo cross section by magnetic probes
[DE94-604986] p 3048 N94-27844
Modelling and control of plasma position in the STOR-M tokamak
[ISBN-0-315-58891-8] p 3049 N94-27949
PLASMA CURRENTS
Numerical simulation of plasma vertical position stabilization in ITER
[DE93-634588] p 3044 N94-26510
Ionosphere-magnetosphere coupling
[NASA-CR-195222] p 2881 N94-27237
On radio frequency wave induced radial transport and wave helicity
[IPPCZ-326] p 2777 N94-27838
On helicon wave induced radial plasma transport
[IPPCZ-333] p 3048 N94-27840
PLASMA DENSITY
Upper atmosphere neutral and plasma density modeling
[AD-A274768] p 2879 N94-26569
Experiments and numerical simulations of electromagnetic wave propagation in plasma varying rapidly in space and time
[AD-A274376] p 2772 N94-26975
Shine through measurements with hydrogen beam in JT-60
[DE94-701113] p 3047 N94-27699
Laser blow-off lithium beam probing with high temporal resolution for edge plasma diagnostics
[DE94-701176] p 2820 N94-27701
PLASMA DIAGNOSTICS
Study on development of chemical measurement method utilizing plasmas p 2728 N94-25576
Heavy neutral beam probe for edge plasma analysis in tokamaks
[DE94-003391] p 3041 N94-25846
Development of fusion technology
[DE93-633444] p 3042 N94-26159
New Thomson scattering laser control for D3-D
[DE94-002890] p 3043 N94-26274
Laboratory plasma studies
[AD-A274655] p 3043 N94-26356
Proceedings of the 16th Symposium on Plasma Physics and Technology
[DE94-604181] p 3047 N94-27698
Laser blow-off lithium beam probing with high temporal resolution for edge plasma diagnostics
[DE94-701176] p 2820 N94-27701
Advanced development of particle beam probe diagnostic system
[DE94-002316] p 3047 N94-27720
Passive stabilization of MHD instabilities at high (beta)n in the HBT-EP tokamak
[DE94-003317] p 3047 N94-27735
Fuel ion rotation measurement and its implications on H-mode theories
[DE94-004860] p 3048 N94-27791
Determination of the plasma column shape in the Tokamak Novillo cross section by magnetic probes
[DE94-604986] p 3048 N94-27844
PLASMA DIODES
Research in pulsed power plasma physics
[AD-A274323] p 3045 N94-27074
PLASMA DRIFT
Shear flow generation from the interaction of neoclassical and drift wave transport processes
[DE94-003135] p 2791 N94-26096
Quiet-time intensifications along the poleward auroral boundary near midnight
[ATR-93(7248)-2] p 2877 N94-26201
Numerical simulation of plasma vertical position stabilization in ITER
[DE93-634588] p 3044 N94-26510
The dynamics of interacting nonlinearities governing long wavelength driftwave turbulence
[DE94-001785] p 2793 N94-26558
PLASMA DYNAMICS
Coherent HF radar system for the study of natural and heater induced ionospheric irregularities
[AD-A273804] p 2876 N94-25752
An investigation of magnetic field effects on plume density and temperature profiles of an applied-field MPD thruster
[NASA-TM-106416] p 2700 N94-26090
PLASMA ENGINES
Stationary plasma thruster plume emissions
[NASA-CR-194471] p 2701 N94-26209
PLASMA ETCHING
Dry etching process development for submicron and nanometer semiconductor devices
[PB94-133196] p 2788 N94-28357
PLASMA FOCUS
Flowing DPF design for propulsion experiments
[AD-A274973] p 2701 N94-26537
PLASMA FREQUENCIES
Ionospheric modification by high power, obliquely propagated HF radio wave transmissions. Part 1: Experimental
[AD-A273746] p 2878 N94-26224
PLASMA GENERATORS
Research in pulsed power plasma physics
[AD-A274323] p 3045 N94-27074
PLASMA HEATING
Review of tokamak experiments on direct electron heating and current drive with fast waves
[DE94-004185] p 3041 N94-25801
Design of folded waveguide antenna for Alcator C-Mod
[DE94-003584] p 2767 N94-25924
RF modeling and design of a folded waveguide launcher for the Alcator C-Mod tokamak
[DE94-003588] p 3041 N94-25933
Development of fusion technology
[DE93-633444] p 3042 N94-26159
Ionospheric modification by high power, obliquely propagated HF radio wave transmissions. Part 1: Experimental
[AD-A273746] p 2878 N94-26224
Design and control of phased ICRF antenna arrays
[DE94-002796] p 3046 N94-27261
High gas-efficiency hydrogen negative ion sources
[PB93-232163] p 3025 N94-27348
Fast wave current drive technology development at ORNL
[DE94-004243] p 3046 N94-27568
Proceedings of the 16th Symposium on Plasma Physics and Technology
[DE94-604181] p 3047 N94-27698
Shine through measurements with hydrogen beam in JT-60
[DE94-701113] p 3047 N94-27699
The calculation for energy balance of heating plasmas by Alfven waves
[DE94-604994] p 3049 N94-27855
Analysis of density limit and efficiency in lower hybrid current drive
[DE94-604995] p 3049 N94-27856
Modelling and control of plasma position in the STOR-M tokamak
[ISBN-0-315-58891-8] p 3049 N94-27949
PLASMA JETS
Synthesis of diamond film assisted by an arcjet plasma source, part 2
[INPE-5527-PRP/178-PT-2] p 3066 N94-27329
PLASMA LAYERS
Configuration of the near-Earth plasma sheet
[NASA-CR-195271] p 2883 N94-27438
Laser blow-off lithium beam probing with high temporal resolution for edge plasma diagnostics
[DE94-701176] p 2820 N94-27701
PLASMA OSCILLATIONS
Shear flow generation from the interaction of neoclassical and drift wave transport processes
[DE94-003135] p 2791 N94-26096
Asymptotics for Kummer functions, Bose plasmas, and related special functions
[DE94-601853] p 3007 N94-26928
Discrete vacuum ultra violet reflective interference filter
[AD-D016059] p 2756 N94-27675
PLASMA PHYSICS
Maryland controlled fusion research program
[DE94-003533] p 3044 N94-26523
Auroral Tomography Workshop Proceedings
[PB94-123718] p 2881 N94-27040
Research in pulsed power plasma physics
[AD-A274323] p 3045 N94-27074
Proceedings of the 16th Symposium on Plasma Physics and Technology
[DE94-604181] p 3047 N94-27698
Passive stabilization of MHD instabilities at high (beta)n in the HBT-EP tokamak
[DE94-003317] p 3047 N94-27735
PLASMA PINCH
Researches of the Electrotechnical Laboratory. No. 51: Study of formation and sustainment of reversed field pinch by slow control of magnetic field
[JTN-94-80548] p 3046 N94-27350
PLASMA PROPULSION
The Lightcraft project: Flight technology for a hypersonic mass transit system p 2670 N94-25695
An investigation of magnetic field effects on plume density and temperature profiles of an applied-field MPD thruster
[NASA-TM-106416] p 2700 N94-26090
Flowing DPF design for propulsion experiments
[AD-A274973] p 2701 N94-26537
PLASMA RADIATION
Experiment and research on materials irradiated by plasma radiation
[DE94-605011] p 2758 N94-27845
PLASMA SPRAYING
Study on film generation phenomena by particle deposition p 2728 N94-25575
PLASMA TURBULENCE
Shear flow generation from the interaction of neoclassical and drift wave transport processes
[DE94-003135] p 2791 N94-26096
Maryland controlled fusion research program
[DE94-003533] p 3044 N94-26523
Role of core toroidal rotation shear on turbulence and transport in the improved confinement regimes of the D3-D tokamak
[DE94-001215] p 3045 N94-26950
Fast H-alpha line broadening during the 100 ns REB injection into a plasma
[IPPCZ-322] p 3048 N94-27836
Acceleration of electrons and ions by strong lower-hybrid turbulence in solar flares
[NASA-TM-109723] p 3111 N94-27953

PLASMA WAVES

Review of tokamak experiments on direct electron heating and current drive with fast waves
[DE94-004185] p 3041 N94-25801

Collisionless shock structures of Earth and other planets
[NASA-CR-195257] p 3104 N94-27407

Space Experiments with Particle Accelerators (SEPAC)
[NASA-CR-193935] p 2761 N94-27664

On radio frequency wave induced radial transport and wave helicity
[IPPCZ-326] p 2777 N94-27838

On helicon wave induced radial plasma transport
[IPPCZ-333] p 3048 N94-27840

Preliminary considerations on the diffraction (quasi-optical) grill in CASTOR tokamak
[IPPCZ-335] p 3048 N94-27842

Acceleration of electrons and ions by strong lower-hybrid turbulence in solar flares
[NASA-TM-109723] p 3111 N94-27953

PLASMA-PARTICLE INTERACTIONS

Fast H-alpha line broadening during the 100 ns REB injection into a plasma
[IPPCZ-322] p 3048 N94-27836

PLASMAGUIDES

On a theory of two-beam mechanisms of charged particle acceleration in electrodynamic structures
[DE94-003482] p 3032 N94-26330

PLASMAS (PHYSICS)

Design of folded waveguide antenna for Alcator C-Mod
[DE94-003584] p 2767 N94-25924

Investigation of plasma etch induced damage in compound semiconductor devices
[DE94-002849] p 3052 N94-25989

New Thomson scattering laser control for D3-D
[DE94-002890] p 3043 N94-26274

Microwave and pulsed power
[DE94-003019] p 2782 N94-26312

Laboratory plasma studies
[AD-A274655] p 3043 N94-26356

Kinetic equation identification from measurement of a particular solution
[DE93-634585] p 2995 N94-26768

Equivalent performance in different helical resonator plasma polymerization coater platforms
[DE94-001517] p 2753 N94-26933

Experimental investigations of strong interaction in the non-perturbative QCD region
[DE94-001178] p 3024 N94-26949

HPm-tubes: Literature survey comprising 1992
[PB94-123643] p 2785 N94-27038

Experimental and theoretical investigation of RF absorption and reflection from preformed plasmas
[AD-A274189] p 3046 N94-27098

Researches of the Electrotechnical Laboratory. No. 51: Study of formation and sustainment of reversed field pinch by slow control of magnetic field
[JTN-94-80548] p 3046 N94-27350

Numerical experiment on finite element method for matching data
[DE94-701208] p 3000 N94-27731

PLASMONS

Fragmentation of Ge(1-x) Sn(x) Se2 glasses
[DE94-603009] p 2758 N94-27837

PLASTIC DEFORMATION

Study on variation of damage generation mechanism by fatigue on TiAl compounds due to different slip systems p 2729 N94-25579

Nanoscale plasticity in silica glass
[DE94-004212] p 2751 N94-26554

On experimental studies of yield surfaces of metals: A more general approach
[IFTR-42/1993] p 2739 N94-26824

Geometry changes in the elastic-plastic analysis of steel spatial skeletal structures
[IFTR-37/1993] p 2839 N94-26825

On the Lagrangian and updated Lagrangian nonlinear finite element formulations
[ISBN-0-315-61111-1] p 3001 N94-27948

PLASTIC PROPERTIES

Deviatoric stresses and plastic strain rates in strong shock waves for six metals
[DE94-002964] p 2733 N94-26022

Grain by grain study of the mechanisms of crack propagation during iodine SCC of Zry-4
[DE93-633765] p 2734 N94-26162

A study on the development of high-T(c) superconducting wire
[DE93-632438] p 2783 N94-26546

Nanoscale plasticity in silica glass
[DE94-004212] p 2751 N94-26554

A constitutive model for layered wire mesh and aramid cloth fabric
[DE94-003275] p 2708 N94-26796

On experimental studies of yield surfaces of metals: A more general approach
[IFTR-42/1993] p 2739 N94-26824

Geometry changes in the elastic-plastic analysis of steel spatial skeletal structures
[IFTR-37/1993] p 2839 N94-26825

Deformation, constitutive behavior, and damage of advanced structural materials under multiaxial loading
[AD-A274165] p 2709 N94-27142

PLASTICS

Technique to predict the curing behaviour of unsaturated polyester materials
[PB94-124856] p 2748 N94-25892

Modelling the inhibition cure behaviour of unsaturated polyester moulding materials
[PB94-124864] p 2748 N94-25893

Stress relaxation in dough moulding compounds
[PB94-124872] p 2748 N94-25894

Resonant holographic measurements of laser ablation plume expansion in vacuum and argon gas backgrounds
[DE94-001407] p 2813 N94-27615

Compatibility of refrigerants and lubricants with engineering plastics
[DE94-004959] p 2756 N94-27692

PLATES (STRUCTURAL MEMBERS)

The free vibration of plates, shallow shells and solids
[ISBN-0-315-83931-7] p 2838 N94-26622

Response of structures to impact loads using elastic and plastic analysis
[ISBN-0-315-84647-X] p 2842 N94-27309

The experimental behavior of spinning pretwisted laminated composite plates
[NASA-CR-195220] p 2711 N94-27352

Finite element analysis of damped vibrations of laminated composite plates
[ISBN-0-315-84928-2] p 2843 N94-27585

On the Lagrangian and updated Lagrangian nonlinear finite element formulations
[ISBN-0-315-61111-1] p 3001 N94-27948

PLATINUM

A mimic model of Pt-Rh catalyst prepared by electrochemical deposition of Rh on Pt (100) surface
[REPT-A-2664] p 2715 N94-26476

PLATINUM ALLOYS

The origins of ordering in CuPt
[DE94-003864] p 2736 N94-26351

A mimic model of Pt-Rh catalyst prepared by electrochemical deposition of Rh on Pt (100) surface
[REPT-A-2664] p 2715 N94-26476

The electrocatalytic oxidation of ethylene and methane, and reduction of oxygen on gas-diffusion electrodes made of amorphous nickel-valve metal-platinum group metal alloys p 2722 N94-28165

PLOTTERS

IRMA: A program for three-dimensional color display of data
[AD-A273811] p 2959 N94-25879

PLOTTING

IRMA: A program for three-dimensional color display of data
[AD-A273811] p 2959 N94-25879

PLUMES

An investigation of magnetic field effects on plume density and temperature profiles of an applied-field MPD thruster
[NASA-TM-106416] p 2700 N94-26090

A large high vacuum, high pumping speed space simulation chamber for electric propulsion
[NASA-TM-106453] p 2690 N94-26142

Enhanced tracking of airborne targets using forward looking infrared and laser return measurements
[AD-A274181] p 3037 N94-27102

Uncertainties in the characterization of the thermal environment of a solid rocket propellant fire
[DE94-002023] p 2760 N94-27719

First experimental assessment of RCS plume-flow field interaction on Hermes leading edge thruster configuration p 2703 N94-28032

PLUTONIUM

Effect of nitrocarburizing on shape of titanium alloy parts
[DE94-004040] p 2732 N94-25822

PNEUMATIC CONTROL

Pneumatic management of blunted-forebody flow asymmetry for high-angle-of-attack directional control
p 2679 N94-28028

PNEUMATIC PROBES

Laser Doppler velocimetry in a low speed multistage compressor
[AD-A274836] p 2818 N94-26498

PNEUMATICS

Laser Doppler velocimetry in a low speed multistage compressor
[AD-A274836] p 2818 N94-26498

Pneumatic management of blunted-forebody flow asymmetry for high-angle-of-attack directional control
p 2679 N94-28028

POINT DEFECTS

Modeling defect production in high energy collision cascades
[DE94-003810] p 3017 N94-26049

Influence of point defects on grain boundary diffusion in oxides
[DE94-003164] p 3060 N94-26782

POINT SOURCES

Characterization and calibration of the Agema 880+ imaging radiometer
[AD-A274417] p 3036 N94-26981

Hydroacoustic wave-fields generated by different source types, a computational study
[PB94-123536] p 3010 N94-27037

Thermal conductivity of liquid carboxylic acids
[ESDU-93017] p 2721 N94-28138

Image theory for DC problems involving a conducting half space bounded by the general anisotropic impedance surface
[PB94-132917] p 2779 N94-28390

POINT TO POINT COMMUNICATION

Laser-based communication link
[FFI-93/7023] p 2817 N94-26203

POISSON EQUATION

On Poisson brackets and symplectic structures for the classical and quantum Zitterbewegung
[DE93-634305] p 2992 N94-26267

Grid-independent convergence based on preconditioning techniques
[PB94-125358] p 2997 N94-27000

Recent advances in the spectral element method
p 2657 N94-28348

POISSON RATIO

An ultrasonic testing technique for monitoring the cure and mechanical properties of polymeric materials
[AD-A274536] p 2753 N94-26842

POLAR CAPS

Why is the north polar cap on Mars different than the south polar cap? p 3107 N94-27889

POLAR REGIONS

Norwegian ionospheric satellite experiment: High latitude, low Earth orbit plasma measurements
[FFI-93/7025] p 2876 N94-25807

Comparative investigation of high-latitude ionospheric structure and effects near solar maximum
[AD-A273799] p 2877 N94-25877

Upper atmosphere neutral and plasma density modeling
[AD-A274768] p 2879 N94-26569

Kiruna geophysical data. Data summary 93/4-6, April-June 1993
[PB94-123700] p 2881 N94-27039

Kiruna geophysical data. Data summary 93/1-3, January-March, 1993
[PB94-123791] p 2881 N94-27043

Cooling the Martian atmosphere: The spectral overlap of the C02 15 micrometers band and dust
p 3107 N94-27886

Why is the north polar cap on Mars different than the south polar cap? p 3107 N94-27889

POLARIMETRY

Polarimetric investigation of edge scattering by mono- and bistatic microwave imaging
[ESA-TT-1284] p 2768 N94-26317

Processing of wide-angle synthetic aperture radar signals for target detection
[AD-A274225] p 2773 N94-27073

POLARITONS

Decay of non-equilibrium polariton condensate in semiconductors
[DE94-604016] p 3068 N94-27678

POLARITY

Correlation of experimental data and three-dimensional finite element modeling of a spinning quadrupole
[DE93-041173] p 3008 N94-26421

UAH mathematical model of the variable polarity plasma ARC welding system calculation
[NASA-CR-193926] p 2824 N94-27221

POLARIZATION (CHARGE SEPARATION)

Effects of Class 3 antiarrhythmic agents, E-4031 and MS-551 on ventricular repolarization in isolated rabbit hearts p 2907 N94-27508

POLARIZATION (SPIN ALIGNMENT)

Spin-polarized atomic hydrogen: Devices and phenomena
[ETN-94-95342] p 3016 N94-26002

Calculation of electron-potassium scattering
[DE94-601812] p 3023 N94-26942

POLARIZATION (WAVES)

Laser manipulation of metastable neon atoms
[ETN-94-95344] p 2817 N94-26225

Refractive and dielectric properties of helium, argon and nitrogen gases
[PB94-123783] p 3008 N94-26851

POLARIZATION CHARACTERISTICS
Spin-polarized atomic hydrogen: Devices and phenomena
[ETN-94-95342] p 3016 N94-26002
Calculation of total cross sections for electron and positron scattering on sodium and potassium
[DE94-601814] p 3023 N94-26944
International bulletin on atomic and molecular data for fusion. No. 42-45, Mar. 1991 - Dec. 1992
[DE94-601817] p 3045 N94-26946
Polarizability matrix of layered chiral sphere
[PB94-132834] p 2778 N94-28355
Electromagnetic modeling of bi-isotropic media
[PB94-132909] p 2778 N94-28382

POLARIZED LIGHT
Technical report of ISSP. Ser. A, no. 2684: Wavelength dependence of nonsequential double ionization in He
[JTN-94-80570] p 3025 N94-27338
Report of the National Research Institute for Earth Science and Disaster Prevention, No. 51
[JTN-94-80509] p 2886 N94-27985
Detection of water on road surface by the polarized light p 2886 N94-27989

POLARONS
Holes in a two-dimensional quantum antiferromagnet
[DE93-634753] p 3057 N94-26388
All-coupling polaron ground state energy in D-dimension
[DE94-603666] p 3027 N94-27629

POLICIES
How to make good use of international research collaboration, with emphasis on the evolving situation in Europe
[PB94-119690] p 3101 N94-27323
The 1993 Federal Aviation Administration plan for research, engineering and development
p 2643 N94-27960

POLISHING
Calculations of material removal, removal rate, and Preston coefficient in continuous lapping/polishing machines
[DE94-002619] p 2763 N94-26804

POLLUTION CONTROL
Analysis and development of an F-5 pollution prevention management program with recommendations for creation of similar programs for other aircraft
[AD-A274016] p 2865 N94-25755
SIHTI 2: Energy and environmental technology
[DE94-702061] p 2867 N94-26241
Compilation of air pollutant emission factors. Volume 1: Stationary point and area sources. Supplement F
[PB94-121431] p 2867 N94-26757
Numerical analysis of the photo-dissociation/radical oxidation of formaldehyde by ultraviolet light in a photolytic reactor
[AD-A274539] p 2868 N94-26843
Optimising BMW four-cylinder two-valve engines
[PB94-125101] p 2824 N94-27254
Gas turbine combustion and emission control
p 2831 N94-28082

POLLUTION MONITORING
An observational study of air pollution transport over a large urban complex
[REPT-6] p 2867 N94-26474
Advances in passive-remote and extractive Fourier transform infrared spectroscopic systems
[DE94-001424] p 2868 N94-26952
Determination of lead isotope ratios in seawater by purge and trap GC/MS after ethylation p 2870 N94-28152
Environmental management and audit
p 2870 N94-28153

POLLUTION TRANSPORT
Air pollution transport modeling
[AD-A273863] p 2865 N94-25609
A positive finite-difference advection scheme applied on locally refined grids
[CWI-NM-R9309] p 2867 N94-26216
An observational study of air pollution transport over a large urban complex
[REPT-6] p 2867 N94-26474

POLYACRYLONITRILE
Advances in preparing and characterizing low density pan-carbon microcellular foam
[DE94-002278] p 2748 N94-25932

POLYATOMIC MOLECULES
Three methods to measure RH bond energies
[DE94-003795] p 3013 N94-25816

POLYBUTADIENE
Cryogenic size reduction of solid propellant
[AD-A274844] p 2759 N94-26800

POLYCRYSTALS
Study on elucidation of damage generation process by electron beam lithography p 2729 N94-25581
The reactivity of lithium toward non-aqueous solvents of relevance to energy storage applications as studied by surface analytical techniques
[DE94-003483] p 2856 N94-26464
A model of electric breakdown in polycrystalline semiconductors with highly nonlinear I - V characteristics
[DE94-601537] p 3063 N94-27017
Deformation, constitutive behavior, and damage of advanced structural materials under multiaxial loading
[AD-A274165] p 2709 N94-27142

POLYESTER RESINS
Ultrasonic measurement technique to determine the state of cure in thermosetting materials
[PB94-124328] p 2756 N94-27217

POLYESTERS
Technique to predict the curing behaviour of unsaturated polyester materials
[PB94-124856] p 2748 N94-25892
Modelling the inhibition cure behaviour of unsaturated polyester moulding materials
[PB94-124864] p 2748 N94-25893
Stress relaxation in dough moulding compounds
[PB94-124872] p 2748 N94-25894
Trifluoromethyl-substituted polymers
[NASA-CR-195217] p 2751 N94-26641

POLYETHYLENES
In situ spectroscopic applications to the study of rechargeable lithium batteries
[DE94-003478] p 2782 N94-26328
Failure behaviour of high density polyethylene with an embrittled surface layer due to weathering
[PB94-126406] p 2840 N94-26960
Application of the Positron Annihilation Technique to the study of vapor absorption process in polyethylene (LDPE) and in imide polymer (6FDA-TMPD PI)
[DE94-602737] p 2720 N94-27998

POLYGONS
An algorithm to find the intersection of two convex polygons
[AD-A274722] p 2961 N94-26148

POLYHEDRONS
Polyhedral characterization of the economic lot-sizing problem with start-up costs
[MEMO-COSOR-92-46] p 2969 N94-27396

POLYIMIDE RESINS
Property enchancement of polyimide films by way of the incorporation of lanthanide metal ions
p 2758 N94-27926

POLYIMIDES
Polyimide/inorganic composite-interpenetrating polymer network for stable second-order nonlinear optics
[AD-A274646] p 2709 N94-27107
Outgas and vacuum seal characteristics of irradiated polyimide O-ring
[DE94-701200] p 2757 N94-27812
New monomers for high performance polymers
p 2758 N94-27904
Property enchancement of polyimide films by way of the incorporation of lanthanide metal ions
p 2758 N94-27926
Application of the Positron Annihilation Technique to the study of vapor absorption process in polyethylene (LDPE) and in imide polymer (6FDA-TMPD PI)
[DE94-602737] p 2720 N94-27998

POLYMER BLENDS
Ultrastructure processing of macromolecular materials
[AD-A274460] p 2754 N94-27086

POLYMER CHEMISTRY
The x ray holographic microscopy using the atomic-force microscope
[DE94-004003] p 2814 N94-27779

POLYMER MATRIX COMPOSITES
Design and test of postbuckled stiffened curved plates: A literature survey
[PB94-126521] p 2840 N94-26961
Polyimide/inorganic composite-interpenetrating polymer network for stable second-order nonlinear optics
[AD-A274646] p 2709 N94-27107
Finite element analysis of damped vibrations of laminated composite plates
[ISBN-0-315-84928-2] p 2843 N94-27585
Effects of physical aging on long-term behavior of composites p 2712 N94-27897

POLYMER PHYSICS
Modelling and predicting properties of polymers in the amorphous glassy state
[ETN-94-95345] p 2752 N94-26645

POLYMERIC FILMS
Micropyrolysis of polymer thin films for ceramics
[ECL-92-62] p 2750 N94-26088
Mechanical properties of polyaniline prepared by polymerization in an organized monolayer
[AD-A274350] p 2753 N94-26925
Ferroelectricity in a Langmuir-Blodgett multilayer film of a liquid crystalline side-chain polymer
[AD-A274477] p 2754 N94-27033
Liquid crystalline side-chain polysiloxanes with 4-amino-4'-stilbene-carboxylic ester mesogens
[AD-A274510] p 2754 N94-27036
Research and development within nonlinear optics for protection of optical sensors against laser irradiation on of optical sensors against laser irradiation. Quarterannual report 1 (april 1993))
[PB94-124245] p 3037 N94-27046
Langmuir-Blodgett and STM investigations of conducting polymer thin films
[AD-A274512] p 2755 N94-27087
Chemical polymerization and Langmuir-Blodgett techniques. 2: The polymerization of monolayers of 3-substituted pyrroles
[AD-A274478] p 2755 N94-27163

POLYMERIZATION
Controlled synthesis of polyenes by catalytic methods
[DE94-004168] p 2749 N94-25973
Trifluoromethyl-substituted polymers
[NASA-CR-195217] p 2751 N94-26641
Mechanical properties of polyaniline prepared by polymerization in an organized monolayer
[AD-A274350] p 2753 N94-26925
Equivalent performance in different helical resonator plasma polymerization coater platforms
[DE94-001517] p 2753 N94-26933
Kinetics of 2-pentadecylaniline polymerizations in monolayers: Relationships between experimental data and a new theoretical model
[AD-A274419] p 2754 N94-27080
Chemical polymerization and Langmuir-Blodgett techniques. 2: The polymerization of monolayers of 3-substituted pyrroles
[AD-A274478] p 2755 N94-27163

POLYMERS
Reference electrodes for solid polymer electrolytes
[DE94-004583] p 2780 N94-25806
Morphological analysis of ionomers
[DE94-003660] p 2749 N94-26005

POLYMETHYL METHACRYLATE
Physical characteristics of polymethylmethacrylate scintillator SOFG-120
[DE93-634184] p 2810 N94-26395

POLYNOMIALS
Approximate solution of the fourth order initial value problem using deficient spline polynomials
[DE93-613023] p 2991 N94-25880
Classification of linear differential operators with an invariant subspace in monomials
[PB94-126620] p 2996 N94-26915
Fast methods for computation with algebraic numbers
[ISBN-0-315-57888-2] p 2998 N94-27269
Polyhedral characterization of the economic lot-sizing problem with start-up costs
[MEMO-COSOR-92-46] p 2969 N94-27396
Thermal conductivity of liquid carboxylic acids
[ESDU-93017] p 2721 N94-28138

POLYPEPTIDES
The molecular matching problem
p 3030 N94-27910

POLYSILOXANES
Ferroelectricity in a Langmuir-Blodgett multilayer film of a liquid crystalline side-chain polymer
[AD-A274477] p 2754 N94-27033
Liquid crystalline side-chain polysiloxanes with 4-amino-4'-stilbene-carboxylic ester mesogens
[AD-A274510] p 2754 N94-27036

POLYSTYRENE
Morphological analysis of ionomers
[DE94-003660] p 2749 N94-26005
Study on the compensated lead hadron calorimeter characteristics by means of hadron and electron beams
[DE93-634176] p 2810 N94-26439
Microspheres for laser velocimetry in high temperature wind tunnel p 2682 N94-27903

POLYTOPES
A simplicial approach to integer programming, part 2
[REPT-93-47-PT-2] p 2958 N94-25764

POLYURETHANE RESINS
Morphological analysis of ionomers
[DE94-003660] p 2749 N94-26005
Biomedical polyurethane networks
[ETN-94-95391] p 2750 N94-26211
Polyurethane self-priming topcoats
[AD-D016041] p 2755 N94-27111
Corrosion resistant coatings from conducting polymers
[DE94-003959] p 2757 N94-27747

POMERONS
High energy parton-parton elastic scattering in QCD
[DE94-003432] p 3028 N94-27736

POPULATIONS
Methane emissions from natural wetlands
[DE93-040796] p 2865 N94-25790

Calculations of population transfer during intense laser pulses
[DE94-001060] p 2818 N94-26698

POROSITY

Advances in preparing and characterizing low density pan-carbon microcellular foam
[DE94-002278] p 2748 N94-25932

Double layer capacitance of carbon foam electrodes
[DE94-002651] p 2780 N94-25975

CEN-VAMAS round robin on grain size measurement for advanced technical ceramics
[VAMAS-TR-12] p 2752 N94-26654

POROUS MATERIALS

Structure of ionic fluids in equilibrium with a microporous ionic matrix
[DE94-600563] p 2715 N94-26391

A thermodynamically consistent constitutive theory for a rigid solid-stokesian fluid mixture
[DE93-633202] p 2792 N94-26401

Low cost, radial flow, solid oxide fuel cell
[DE94-002982] p 2858 N94-26785

Light emitting porous silicon
[AD-A274152] p 3038 N94-27137

Researches of the Electrotechnical Laboratory. No. 52: Studies of externally pressurized porous gas bearings
[JTN-94-80549] p 2825 N94-27351

Porous vycor glass tube joined to borosilicate glass
p 2718 N94-27392

PORPHYRINS

The coordination and atom transfer chemistry of titanium porphyrin complexes
[DE94-003091] p 2704 N94-26779

PORTABLE EQUIPMENT

Portable Habitat for Antarctic Scientific Research (PHASR) p 2943 N94-25681

System design analysis of a lightweight laser satellite terminal
[AD-A274033] p 2690 N94-25769

Status report for the development of the Antarctic penetrator: 1990-year program p 2885 N94-27973

POSEIDON SATELLITE

TOPEX/Poseidon battery performance during the first year of operation p 2862 N94-28119

POSITION (LOCATION)

Differential global positioning system for the surface-towed ordnance locating system: Testing, results, and user's guide
[DE94-002980] p 2664 N94-26309

Short-range cloud amount forecasting with model output statistics
[AD-A274769] p 2895 N94-26798

Technical report of ISSP. Ser. A, no. 2671: Quasi-localization of light waves in Fibonacci dielectric multilayers
[JTN-94-80557] p 3064 N94-27231

Technical report of ISSP. Ser. A, no. 2675: High-field cyclotron resonance and valence-band structure in semiconducting diamond
[JTN-94-80561] p 3065 N94-27245

BATSE burst location accuracy and constraints on the fraction of repeating GRB sources
[DE94-004981] p 3116 N94-27714

An integrated approach to seismic event location: 1. Evaluating how method of location affects the volume of groups of hypocenters
[PL-TR-92-2323] p 2887 N94-28214

POSITION ERRORS

Accuracy analysis of multi-axis machines
[ETN-94-95341] p 3002 N94-26000

Ground station siting considerations for DGPS
p 2642 N94-27293

Differential GPS methods and performance for marine applications
[DREP-93-09] p 2665 N94-27667

A simulation of GPS and differential GPS sensors
p 2666 N94-27918

POSITION INDICATORS

Interchangeable end effector tools utilized on the PFMA
[NASA-CR-193925] p 2823 N94-27149

POSITION SENSING

Interchangeable end effector tools utilized on the PFMA
[NASA-CR-193925] p 2823 N94-27149

POSITIONING

Modelling and stability of a shape memory alloy position control system
[ISBN-0-315-84467-1] p 2740 N94-27304

Status report for the development of the Antarctic penetrator: 1990-year program p 2885 N94-27973

POSITIVE FEEDBACK

A study on piezoelectric actuators and sensors for vibration control of flexible space structures
[AD-A274925] p 2695 N94-26532

POSITIVE IONS

Ion implantation of diamond: Damage, doping, and lift-off
[DE94-001133] p 3054 N94-26137

Structure of ionic fluids in equilibrium with a microporous ionic matrix
[DE94-600563] p 2715 N94-26391

POSITRON ANNIHILATION

Window least squares method applied to statistical noise smoothing of positron annihilation data
[DE93-634665] p 3003 N94-26385

A jet calculus approach including coherence effects and the associated problem of moment inversion
[ISBN-0-315-51715-8] p 3025 N94-27266

Axial anomaly in e(+)e(-) yields gamma gamma and anyon superconductivity
[DE94-606406] p 3070 N94-27859

Fermi surface ridge at second and third Umklapp positron annihilations in Y Ba2Cu3O(7-delta)
[DE93-634760] p 3070 N94-27995

Application of the Positron Annihilation Technique to the study of vapor absorption process in polyethylene (LDPE) and in imide polymer (6FDA-TMPD PI)
[DE94-602737] p 2720 N94-27998

POSITRONIUM

Hyperfine structure of positronium energy levels in a crystal
[DE94-603898] p 3068 N94-27729

POSITRONS

Harvard University High Energy Physics
[DE94-002406] p 3032 N94-26119

Fast photoconductor CdTe detectors for synchrotron x ray studies
[DE94-001334] p 3054 N94-26139

Calculation of total cross sections for electron and positron scattering on sodium and potassium
[DE94-601814] p 3023 N94-26944

POSTURE

The effect of body orientation on the perception of vertical and horizontal distance in an outdoor setting
p 2915 N94-27461

POTASSIUM

Calculation of electron-potassium scattering
[DE94-601812] p 3023 N94-26942

Calculation of total cross sections for electron and positron scattering on sodium and potassium
[DE94-601814] p 3023 N94-26944

POTASSIUM COMPOUNDS

Development of K(1-x)Na(x)TiOPO4 crystals for nonlinear applications
[AD-A274336] p 3063 N94-27055

POTASSIUM HYDROXIDES

Freon recovery from nitrogen tetroxide and freon solutions
[PL-TR-92-3051] p 2721 N94-28215

POTASSIUM PHOSPHATES

Three-wave nonlinear interactions in KTiOPO4 (KTP) and KTP isomorphs
[AD-A274079] p 3052 N94-25993

POTASSIUM 40

Geological Dating by Ar-40 - Ar-39 method
[DE94-601975] p 2880 N94-26874

POTATOES

Studies on the application of radiation for genetic transformation in higher plants
[DE93-632656] p 2901 N94-26470

Development of a sparging technique for volatile emissions from potato (Solanum tuberosum)
[NASA-TM-109199] p 2903 N94-27412

POTENTIAL FLOW

Calculation of unsteady incompressible inviscid flow about wings and bodies using CANAERO-T panel model
p 2655 N94-28334

POURING

Solidification modeling of a spiral casting to determine material fluidity
[DE94-002212] p 2739 N94-26935

POWDER (PARTICLES)

Debye-Waller factors of the light actinide metals
[DE94-000685] p 2733 N94-26069

Liquid and solid solubility of Ag in Bi2Sr2CaCu2O8
[DE94-002829] p 2735 N94-26273

Processing of LaCrO3 for solid oxide fuel cell applications
[DE94-002981] p 2857 N94-26747

Electro-optic materials by solid source MOCVD
[DE94-005120] p 2757 N94-27716

Bench-scale synthesis of nanoscale materials
[DE94-004787] p 2742 N94-27786

Characterization of ZnS-GaP naon-composites
[DE94-004888] p 2712 N94-27813

POWDER METALLURGY

Crystallization and microstructural control of ferroelectric thin-films and glass-ceramics
[AD-A273767] p 2748 N94-25854

The processing of powder metallurgically produced near gamma-titanium aluminide
[ISBN-0-315-84018-8] p 2738 N94-26633

Powder synthesis, fabrication, and transport properties of long-length Ag clad Bi-2223 conductors
[DE94-002376] p 2740 N94-26957

Material optimization and manufacturing development of reduced cost powder metal titanium alloy components for gas turbine engine application, phase 2
[AD-A274410] p 2709 N94-26978

Characterization of ZnS-GaP naon-composites
[DE94-004888] p 2712 N94-27813

Study on the production of flaky amorphous alloy powders by impact flattening of atomized liquid droplets on a rapidly rotating wheel p 2746 N94-28169

POWER AMPLIFIERS

Phase conjugation and pulse compression of high energy lasers: From nanoseconds to microseconds
[DE94-001061] p 2818 N94-26699

Design and control of phased ICRF antenna arrays
[DE94-002796] p 3046 N94-27261

NASA satellite communications application research. Phase 2: Efficient high power, solid state amplifier for EFH communications
[NASA-CR-195713] p 2776 N94-27669

Micro-electron deflector
[AD-D016055] p 2787 N94-27672

NASA satellite communications application research, phase 2 addendum. Efficient high power, solid state amplifier for EHF communications
[NASA-CR-195712] p 2777 N94-27946

POWER CONVERTERS

AC to DC power converter with regulated bi-polar outputs
[AD-D016032] p 2786 N94-27145

POWER PLANTS

Knowledge organization in intelligent tutoring systems for diagnostic problem solving in complex dynamic domains
[AD-A273986] p 2984 N94-25899

Parametric analysis of the space power plants on the base of criterion of specific mass in generalized design variants
[DE93-634153] p 2701 N94-26166

POWER SPECTRA

The deterministic power-spectral-density method
[AD-B175894] p 2678 N94-27395

The deterministic power-spectral-density-method for nonlinear systems
[AD-B179687] p 3001 N94-28353

PRECAMBRIAN PERIOD

Ozone control of biological activity during Earth's history, including the KT catastrophe p 2876 N94-28312

PRECIPITATES

An atom probe investigation of the influence of trace impurities on the mechanical behavior of NiAl
[DE94-002797] p 2734 N94-26272

Study of precipitation and recrystallization in Al alloy 2519 by backscattered electron imaging methods
[AD-A274919] p 2736 N94-26533

Effect of precipitate structure on hot deformation of Al-Mg-Mn alloys
[DE94-004596] p 2741 N94-27622

A transmission electron microscope study of Ni4W precipitates in a Ni-37 wt. percent W alloy
[ISBN-0-315-59932-4] p 2743 N94-27803

PRECIPITATION (METEOROLOGY)

Numerical modelling of precipitation over complex terrain
[ISBN-0-315-84327-6] p 2894 N94-26628

Meteorological data at the Nagaoka Institute of Snow and Ice Studies
[REPT-158] p 2896 N94-27169

Examination of micro- and macro-physical structures and processes in hailstorms with respect to their modification
[DLR-FB-93-25] p 2897 N94-27751

PRECIPITATION HARDENING

Study on the mechanism of titanium alloy toughness and the improvement of properties
p 2726 N94-25566

PRECONDITIONING

Preconditioning in parallel Runge-Kutta methods for stiff initial value problems
[CWI-NM-R9310] p 2991 N94-26217

Semantics, orderings and recursion in the weakest precondition calculus
[CWI-CS-R9267] p 2995 N94-26776

Grid-independent convergence based on preconditioning techniques
[PB94-125358] p 2997 N94-27000

PREDICTION ANALYSIS TECHNIQUES

Development and testing of the Coupled Ocean/Atmosphere Mesoscale Prediction System (COAMPS)
[AD-A273925] p 2892 N94-25793

Image segmentation by a combination of edge detection and region growing
[ETN-94-95032] p 2960 N94-26106

Predictive modeling of particle-laden, turbulent flows
[DE94-003298] p 2792 N94-26319

Proceedings of the Non-Linear Aero Prediction Requirements Workshop
[NASA-CP-10138] p 2670 N94-27439

Uncertainties in the characterization of the thermal environment of a solid rocket propellant fire
[DE94-002023] p 2760 N94-27719

Methodology development of forecasting inter-regional air transport demand in China
[DLR-FB-93-24] p 2660 N94-27746

Understanding and development of a prediction method of transonic limit cycle oscillation characteristics of fighter aircraft
[NLR-TP-92210-U] p 2679 N94-27798

Predictions of momentum and scalar fields in a jet in cross-flow using first and second order turbulence closures p 2803 N94-28025

Landscape dynamics of northeastern forests
[NASA-CR-195272] p 2852 N94-28070

Calculation methods for steadily loaded central circumferential groove hydrodynamic journal bearings (guide to use of computer program A9304)
[ESDU-93004] p 2830 N94-28073

Calculation methods for steadily loaded axial groove hydrodynamic journal bearings (guide to use of computer program A9305)
[ESDU-93005] p 2830 N94-28074

Variability of measured sonic boom signatures
p 2651 N94-28197

A general theory of impacts and mass extinctions, and the consequences of large-body impact on the Earth
p 2891 N94-28310

PREDICTIONS

Parameter estimation by genetic algorithms
[DE94-002924] p 2961 N94-26146

Effects of historical and predictive information on ability of transport pilot to predict an alert
[NASA-TM-4547] p 2673 N94-27864

Experimental studies of loudness and annoyance response to sonic booms p 2651 N94-28195

Comparison of methods of predicting community response to impulsive and nonimpulsive noise
p 2651 N94-28196

PREDICTOR-CORRECTOR METHODS

Research on primal-dual interior point algorithms for mathematical programming
[DE94-003982] p 2959 N94-25821

PREFLIGHT OPERATIONS

STS-56, RSRM-031, 360L031 KSC processing configuration and data report
[NASA-CR-193922] p 2691 N94-26135

STS-51, RSRM-033, 360T033 KSC processing configuration and data report
[NASA-CR-193923] p 2691 N94-26153

Report of the Shuttle Processing Review Team
[NASA-TM-109728] p 2692 N94-28178

PREFORMS

Lunar preform manufacturing p 2765 N94-25677

PREMIXING

Focused Schlieren flow visualization studies of multiple venturi fuel injectors in a high pressure combustor
[NASA-TM-106479] p 2674 N94-26573

PREPROCESSING

Color image segmentation
[AD-A274027] p 2984 N94-25759

PRESSURE

Computational prediction of isolated performance of an axisymmetric nozzle at Mach number 0.90
[NASA-TM-4506] p 2646 N94-26547

PRESSURE BREATHING

Aeromedical issues related to positive pressure breathing for +Gz protection
[AD-A274717] p 2910 N94-26435

PRESSURE DEPENDENCE

Grain boundary degradation of YBCO superconductors sintered in CO2-containing atmospheres
[DE94-003206] p 3053 N94-26029

Iron: What is melt?
[DE94-003373] p 2735 N94-26322

Influence of point defects on grain boundary diffusion in oxides
[DE94-003164] p 3060 N94-26782

Electrical conductivity of perovskite-magnesiowuestite as a function of pressure and temperature
[DE94-002714] p 2880 N94-26806

An improvement in the modified finite element procedure for underwater shock analysis
[DE94-004451] p 2797 N94-27617

PRESSURE DISTRIBUTION

Low-speed pressure distribution measurements over the aft-fuselage, fins, and stabilators of a 1/9th scale F/A-18 wind-tunnel model
[AD-A274870] p 2644 N94-26342

Pressure distributions on a 0.02-scale Space Shuttle orbiter nose at Mach 21.5 in helium
[NASA-TM-4495] p 2646 N94-26592

Numerical studies on the dynamics of bubble, turbulent, free shear flows: Effect of the inter-phase coupling on the global flow evolution
[AD-A274521] p 2794 N94-26832

New variational techniques for acoustic radiation and scattering from elastic shell structures
[AD-A274599] p 3010 N94-26889

Aircraft wheel life assessment
[AD-A274378] p 2823 N94-26976

Verification of thermal analysis codes for modeling solid rocket nozzles
[NASA-CR-195248] p 2702 N94-27150

Streamwise vorticity in a turbine rotor with conical endwalls
[DLR-FB-93-13] p 2826 N94-27591

Experimental and theoretical investigations of the influence of the jet on the flow around a bypass-engine
[DLR-FB-93-17] p 2675 N94-27593

An improvement in the modified finite element procedure for underwater shock analysis
[DE94-004451] p 2797 N94-27617

Flat rectangular orthotropic plates under uniformly distributed normal pressure. Elastic stresses and deflections for various forms of edge restraint
[ESDU-93011] p 2845 N94-28061

Simulation: A tool for steam plant dynamic analysis
p 2831 N94-28084

Examples of excrescence drag prediction for typical wing components of a subsonic transport aircraft at the cruise condition
[ESDU-93032] p 2649 N94-28144

Effect of surface finish on turbine airfoil cascade losses p 2652 N94-28320

The effect of axial velocity ratio, turbulence intensity, incidence, and leading edge geometry on the midspan performance of a turbine cascade p 2652 N94-28321

Measurements of steady and dynamic pressure on an F/A-18 wind tunnel model at high angles of attack
p 2653 N94-28323

PRESSURE DRAG

Computational prediction of isolated performance of an axisymmetric nozzle at Mach number 0.90
[NASA-TM-4506] p 2646 N94-26547

PRESSURE DROP

Design of a refueling tanker delivering liquid hydrogen
p 2671 N94-25717

PRESSURE EFFECTS

Squeeze casting: A literature review
[PB94-124575] p 2741 N94-27326

Technical report of ISSP. Ser. A, no. 2682: Pressure dependence of Sm:YAG fluorescence to 50 GPa: A new calibration as a high pressure scale
[JTN-94-80568] p 3066 N94-27354

A rapid-pressure correlation representation consistent with the Taylor-Proudman theorem materially-frame-indifferent in the 2D limit
[NASA-CR-191591] p 2796 N94-27435

Examples of excrescence drag prediction for typical wing components of a subsonic transport aircraft at the cruise condition
[ESDU-93032] p 2649 N94-28144

PRESSURE GRADIENTS

An enhanced global spectral model
[PL-TR-92-2011] p 2898 N94-28223

PRESSURE MEASUREMENT

Theoretical and experimental investigation of converging cylindrical shock waves propagating in narrow cylindrical chambers
[ISBN-0-315-84694-1] p 2795 N94-27313

The cryogenic tunnel Cologne at DLR
[DLR-MITT-93-10] p 2681 N94-27587

PRESSURE OSCILLATIONS

Compressibility effects on rotor forces in the leakage path between a shrouded pump impeller and its housing
p 2796 N94-27379

Flowfield dynamics in blunt fin-induced shock wave/turbulent boundary layer interactions
[NASA-CR-195170] p 2798 N94-27802

PRESSURE RATIO

Wake passage effects on the losses in a linear turbine cascade
[AD-A273794] p 2790 N94-25874

Influence of headwind on hot gas reingestion and consideration of pressure ratio scaling
p 2675 N94-28018

Transitional flight characteristics of a geometrically simplified STOVL model p 2672 N94-28035

PRESSURE REDUCTION

Effects of crenulations on three dimensional losses in a linear compressor cascade
[AD-A273778] p 2790 N94-25882

Gravity dependence or pressure drop and heat transfer in straight two-phase heat transport system condenser ducts
[NLR-TP-92167-U] p 2798 N94-27853

PRESSURE SENSORS

Digital Altimeter Setting Indicator (DASI) Operational Test and Evaluation (OT/E) operational test procedures
[AD-A274100] p 2672 N94-26030

PRESSURE SUITS

Aeromedical issues related to positive pressure breathing for +Gz protection
[AD-A274717] p 2910 N94-26435

PRESSURE VESSELS

Fracture Toughness Round Robin Test International in pressure tube materials
[DE93-634140] p 2837 N94-26265

The role of point defect clusters in reactor pressure vessel embrittlement
[DE94-001122] p 2739 N94-26931

A laboratory test on construction of ice domes and their load-carrying capacity p 2884 N94-27966

PRESSURIZED CABINS

Pressurized Lunar Rover (PLR) p 2833 N94-25704

Impact tests on fibre metal laminates under a tensile load
[PB94-126570] p 2710 N94-27201

PRINTED CIRCUITS

Aspects of the circuit board thermal design
[VTT-PUBS-132] p 2779 N94-25644

Test methods and custom hardware for functional testing of a high speed GaAs DRAM
[AD-A274859] p 2781 N94-26175

Phase conjugated lasers applied to commercial x ray lithography
[DE94-001529] p 2819 N94-27018

Baseline for a Nordtest method. Reliability stress screening of components. A guide for component users
[PB94-123775] p 2835 N94-27042

PRINTING

Development of an industrial CO2 laser for mask marking
[DE93-632901] p 2816 N94-26184

PRIORITIES

A real-time executive implementing priority inheritance protocols p 2952 N94-26733

PROBABILITY DENSITY FUNCTIONS

The deterministic power-spectral-density method
[AD-B175894] p 2678 N94-27395

Estimators for the Cauchy distribution
[DE94-004990] p 3005 N94-27816

PROBABILITY DISTRIBUTION FUNCTIONS

Simulation approaches for calculations in directed graphical models
[AD-A274825] p 3003 N94-26494

A comparison of Probability Of Detection (POD) data determined using different statistical methods
[LTR-ST-1947] p 2835 N94-26644

PROBABILITY THEORY

Proficiency scaling based on conditional probability functions for attributes
[AD-A273816] p 3002 N94-25962

Multiple model adaptive estimation applied to the LAMBDA URV for failure detection and identification
[AD-A274078] p 3002 N94-25992

A doubly logarithmic communication algorithm for the Completely Connected Optical Communication Parallel Computer
[DE93-019408] p 2980 N94-26473

Probabilistic methods for image generation and encoding
[AD-A274294] p 2964 N94-26682

Probability of accessing the multiple saturated states in the resistive interchange instability
[DE94-000478] p 3044 N94-26694

Short-range cloud amount forecasting with model output statistics
[AD-A274769] p 2895 N94-26798

Topological conditions for the existence of invariant measures for unimodal maps
[PB94-123296] p 2849 N94-26866

Modeling systems by probabilistic process algebra: An event structures approach
[PB94-125259] p 3004 N94-26867

Recursive bundle event structures
[PB94-125275] p 3004 N94-26870

Blurred focal elements generalization of dempster's rule
[PB94-124278] p 2986 N94-26992

A superprocess with a disappearing self-interaction
[AD-A274647] p 3009 N94-27108

Interdisciplinary technology p 2686 N94-27363

The Fermi paradox: An approach based on percolation theory p 2687 N94-27370
Is probability of frequency too narrow?
[DE94-000687] p 3004 N94-27612
Estimators for the Cauchy distribution
[DE94-004990] p 3005 N94-27816

PROBLEM SOLVING
Knowledge organization in intelligent tutoring systems for diagnostic problem solving in complex dynamic domains
[AD-A273986] p 2984 N94-25899
Long term learning: Integration of knowledge acquisition and knowledge compilation
[AD-A274775] p 3098 N94-26570
Parallel computational geometry on analog Hopfield networks
[ISBN-0-315-84093-5] p 2980 N94-26635
Design and evaluation of fault tolerance in opto-electronic computing
[AD-A274281] p 2954 N94-27016

PROCEDURES
Digital Altimeter Setting Indicator (DASI) Operational Test and Evaluation (OT/E) operational test procedures
[AD-A274100] p 2672 N94-26030

PROCESS CONTROL (INDUSTRY)
Safety analysis in conceptual design of process control
[VTT-PUBS-117] p 2762 N94-25641
Advances in preparing and characterizing low density pan-carbon microcellular foam
[DE94-002278] p 2748 N94-25932
Statistical quality management
[MEMO-COSOR-92-43] p 2834 N94-26008
Distributed Nd:YAG laser welding and process control in inert glove boxes
[DE94-002629] p 2818 N94-26605
Simplified high-efficiency silicon cell processing
[DE94-002683] p 2857 N94-26617
Multiple weight stepwise regression
[DE94-001602] p 3000 N94-27564
Dry etching process development for submicron and nanometer semiconductor devices
[PB94-133196] p 2788 N94-28357

PROCESS HEAT
Calculation of the thermoneutral potential of NiCd and NiH2 cells p 2861 N94-28111

PROCUREMENT POLICY
Small business innovation research program solicitation
[NASA-TM-109695] p 3094 N94-27661

PRODUCT DEVELOPMENT
The MUSA design methodology
[CWI-CS-R9265] p 3097 N94-26220
Business process redesign: Design the improved process
[AD-A274947] p 3093 N94-26299
Flash unit for high speed photography
[PML-1992-91] p 2811 N94-26647
Future of aerospace
[PB94-120185] p 2669 N94-26906
An investigation of integrated product development implementation issues: A case study of Bosma Machine and Tool Corp.
[AD-A273917] p 2942 N94-27320
The 1993 Federal Aviation Administration plan for research, engineering and development
p 2643 N94-27960
Software assurance standard
[NASA-TM-109705] p 2975 N94-27992
Development of the gas turbine. Part 1: Design philosophy and performance p 2831 N94-28080
Development of the gas turbine. Part 2: Manufacturing, commissioning, and operation p 2831 N94-28081

PRODUCTION ENGINEERING
Continuous fiber reinforced thermoplastic composites: Literature survey
[VTT-TIED-1422] p 2704 N94-25651
Concepts and methods of measuring productivity at the organization level
[AD-A273126] p 3094 N94-27180

PRODUCTION MANAGEMENT
Open communication in manufacturing automation
[PB94-132479] p 2976 N94-28377

PRODUCTIVITY
The effectiveness of AMT investment in UK metal component manufacture
[IND-MANU-SCI-TECH-REPT-3] p 2762 N94-25775
Concepts and methods of measuring productivity at the organization level
[AD-A273126] p 3094 N94-27180

PROFILOMETERS
The determination of surface roughness from reflected step edges
[AD-A273987] p 2984 N94-25900

PROGRAM VERIFICATION (COMPUTERS)
Software Error Estimation Program (SWEEP), version 02.00.00 user manual
[AD-A274697] p 2962 N94-26373
Verification and validation of the on-board software real time requirements p 2953 N94-26739
Formal methods for dependable real-time systems
p 2953 N94-26740
Vcalc: A 3-space vector calculator
[AD-A274520] p 2965 N94-26831
Freeness analysis for logic programs-and correctness
[PB94-126703] p 2966 N94-26956
Memory subsystem performance of programs with intensive heap allocation
[AD-A274122] p 2967 N94-27063
Deferred compilation: The automation of run-time code generation
[AD-A274124] p 2967 N94-27065
Alternative architectures for domain-oriented application composition and generation systems
[AD-A274180] p 2968 N94-27128
Research in improved assessment of software reliability
[AD-A274161] p 2968 N94-27140
Validation tests of TOPSIM 4
[ESA-STM-249] p 2972 N94-27582
Software assurance standard
[NASA-TM-109705] p 2975 N94-27992
Using formal specification in the Guidance and Control Software (GCS) experiment. Formal design and verification technology for life critical systems
[NASA-CR-194884] p 2956 N94-28267

PROGRAMMING ENVIRONMENTS
Using database technology to support domain-oriented application composition systems
[AD-A274091] p 3096 N94-26024
Software redesign for usability: A case study
[DE94-003704] p 2960 N94-26048
Multimedia in Views
[CWI-CS-R9263] p 2961 N94-26218
Development of a MIL-STD-1750 microprocessor system for space applications p 2949 N94-26715
An object model for multimedia programming
[CWI-CS-R9327] p 2971 N94-27552

PROGRAMMING LANGUAGES
Software redesign for usability: A case study
[DE94-003704] p 2960 N94-26048
Development of a MIL-STD-1750 microprocessor system for space applications p 2949 N94-26715
A formalization of objects using equational dynamic logic
[PB94-125218] p 2965 N94-26852
Implementation and performance of a domain decomposition algorithm in Sisal
[DE94-002012] p 2981 N94-27092
Users guide for GRIKURV: A code for drawing graphs
[PB94-123593] p 2968 N94-27154
Proceedings of the Third Workshop Computersystems: Research Forum on Design, Realization and Use of Computersystems
[ISBN-90-6144-995-2] p 2954 N94-27191
DALIA: A language for the description and analysis of digital systems p 2954 N94-27192
Efficient implementation of high-level parallel symbolic languages p 2955 N94-27196
Semantics of MANIFOLD: Specification in ASF+SDF and extension
[CWI-CS-R9269] p 2971 N94-27575
ARM: Abstract Rewriting Machine
[CWI-CS-R9330] p 2974 N94-27794

PROJECT MANAGEMENT
Feasibility study on introduction of the bio-fuel power generation in tropical regions
[DE94-725203] p 2858 N94-26838
Aerospace safety advisory panel
[NASA-TM-109692] p 3118 N94-27381
Space projects: Astrophysics facility program contains cost and technical risks. Report to Congressional Requesters
[GAO/NSIAD-94-80] p 2696 N94-27382
Training on assessment and mapping of deforestation: WFW conference, Brazil
[INPE-5482-PRE/1781] p 2850 N94-27384
University program management information system, FY 1993
[NASA-TM-109719] p 3100 N94-27413
NASA: Major challenges for management. Testimony before the Legislation and National Security Subcommittee, Committee on Government Operations, House of Representatives
[GAO/T-NSIAD-94-18] p 3095 N94-28176
Activities of Remote Sensing Technology Center of Japan (RESTEC) p 2853 N94-28274

PROJECT PLANNING
Component characterization and development 2
[AD-A274002] p 2765 N94-25660
The 1993 Federal Aviation Administration plan for research, engineering and development
p 2643 N94-27960
Asia-Pacific Seminar on Global Change Research Cooperation
[JTN-94-80517] p 2871 N94-28268
NASDA contribution plan to Asian countries
p 2853 N94-28273
The Environmental Research and Training Centre
p 2873 N94-28280
Global Change and Terrestrial Ecosystems (GCTE): Progress report and prospects for Asian contributions
p 2874 N94-28281
Global change: A research strategy for Australia 1992-1996 p 2874 N94-28282
A progress report on global change studies in China
p 2874 N94-28283

PROJECTILES
Users manual for CATNIP: A Computer Analysis Tool for Normal Impact Penetration
[DE94-003671] p 2962 N94-26371

PROLATE SPHEROIDS
Electrostatic image solution for the conducting prolate spheroid
[PB94-133154] p 2778 N94-28387

PROLOG (PROGRAMMING LANGUAGE)
Automatic test case generation using PROLOG
[NPL-DITC-215/93] p 2964 N94-26655
Modular termination proofs for logic and pure PROLOG programs
[CWI-CS-R9316] p 2970 N94-27544

PROP-FAN TECHNOLOGY
A review of recent aeroelastic analysis methods for propulsion at NASA Lewis Research Center
[NASA-TP-3406] p 2846 N94-28227

PROPELLANT MASS RATIO
Proceedings of the High Energy Density Matter (HEDM) Contractor's Conference
[AD-A274452] p 3033 N94-27083

PROPELLANT SENSITIVITY
Cryogenic size reduction of solid propellant
[AD-A274844] p 2759 N94-26800

PROPELLANTS
Inertial electrostatic confinement as a power source for electric propulsion p 2688 N94-27373

PROPELLER BLADES
The experimental behavior of spinning pretwisted laminated composite plates
[NASA-CR-195220] p 2711 N94-27352

PROPELLER FANS
A review of recent aeroelastic analysis methods for propulsion at NASA Lewis Research Center
[NASA-TP-3406] p 2846 N94-28227

PROPELLER SLIPSTREAMS
Wind tunnel investigation of propfan slipstream/wing interactions on a De Havilland air motor powered semispan model at Mach numbers 0.6 and 0.7
p 2651 N94-28316
Flow field investigation in the near slipstream of an 8-bladed propfan on the De Havilland WTEJ half-model at Mach numbers 0.6 and 0.7 p 2651 N94-28317

PROPELLERS
Propeller off-axis loads due to thrust axis incidence and nacelle magnus force p 2652 N94-28319

PROPHYLAXIS
The role of hyperbaric oxygen as a prophylaxis for radiation enteritis
[AD-A274974] p 2901 N94-26517

PROPORTIONAL CONTROL
A study on piezoelectric actuators and sensors for vibration control of flexible space structures
[AD-A274925] p 2695 N94-26532
Advanced control of a flexible spherical wrist
[ISBN-0-315-84424-8] p 2826 N94-27652

PROPORTIONAL COUNTERS
Cosmic x ray physics
[NASA-CR-195225] p 3115 N94-27236
Cosmic x ray physics
[NASA-CR-195218] p 3115 N94-27419

PROPRIOCEPTION
Proprioceptive isokinetic exercise test
[NASA-TM-104015] p 2902 N94-27227

PROPRIOCEPTORS
Proprioceptive isokinetic exercise test
[NASA-TM-104015] p 2902 N94-27227

PROPULSION
Design and flight test of the Propulsion Controlled Aircraft (PCA) flight control system on the NASA F-15 test aircraft
[NASA-CR-186028] p 2674 N94-27432

PROPULSION SYSTEM CONFIGURATIONS
Proceedings of the 8th Annual Summer Conference: NASA/USRA Advanced Design Program
[NASA-CR-195118] p 3075 N94-25665
Systematic Propulsion Optimization Tools (SPOT)
p 2976 N94-25666

Extraterrestrial surface propulsion systems
p 2833 N94-25691
Eagle RTS: A design of a regional transport
p 2671 N94-25709
Project Ares 3 p 2671 N94-25712
Tesseract supersonic business transport
p 2671 N94-25713
The design of four hypersonic reconnaissance aircraft
p 2671 N94-25716
Nuclear electric propulsion for future NASA space science missions
[DE93-019086] p 2700 N94-25969
Interdisciplinary technology p 2686 N94-27363
A parametric sensitivity study for single-stage-to-orbit hypersonic vehicles using trajectory optimization
[NASA-CR-195703] p 2697 N94-27789
A numerical study of mixing and combustion in hypervelocity flows through a scramjet combustor model
p 2808 N94-27911
A review of recent aeroelastic analysis methods for propulsion at NASA Lewis Research Center
[NASA-TP-3406] p 2846 N94-28227

PROPULSION SYSTEM PERFORMANCE
Extraterrestrial surface propulsion systems
p 2833 N94-25691
Asteroid exploration and utilization
p 3080 N94-25697
Nuclear electric propulsion for future NASA space science missions
[DE93-019086] p 2700 N94-25969
Interdisciplinary technology p 2686 N94-27363
Inertial electrostatic confinement as a power source for electric propulsion p 2688 N94-27373
Rocket engine numerical simulation
p 2688 N94-27375
A parametric sensitivity study for single-stage-to-orbit hypersonic vehicles using trajectory optimization
[NASA-CR-195703] p 2697 N94-27789
A numerical study of mixing and combustion in hypervelocity flows through a scramjet combustor model
p 2808 N94-27911
A review of recent aeroelastic analysis methods for propulsion at NASA Lewis Research Center
[NASA-TP-3406] p 2846 N94-28227

PROSTAGLANDINS
Effect of PGE2 receptor agonists butaprost, M and B 28767 and an antagonist AH 6809 on the BK response of visceral polymodal receptors p 2906 N94-27494
Effect of prostaglandin E1 on the relationship between skin sympathetic nerve activity and reduction in skin blood flow p 2929 N94-27524
The polymodal receptor p 2908 N94-27539

PROTECTIVE CLOTHING
Control panel dimensions for gloved operation study 2: Toggle switches minimum spacing required between toggle
[AD-A274518] p 2942 N94-27089
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 386)
[NASA-SP-7011(386)] p 2933 N94-28208
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 387)
[NASA-SP-7011(387)] p 2933 N94-28213

PROTECTIVE COATINGS
R and D for creation, measurement, application of ultra-high vacuum p 2723 N94-25549
Hydrogen trapping with Pd coated alloy films
p 2723 N94-25551
Issues for conversion coating of aluminum alloys with hydrotalcite
[DE94-003804] p 2732 N94-25819
Cracking of textured zinc coating during forming process
[DE94-003414] p 2750 N94-26085
Ceramic technology project
[DE94-003782] p 2750 N94-26332
Titanium 1992: Volume 3: Science and technology
[AD-A274800] p 2735 N94-26337
Polyurethane self-priming topcoats
[AD-D016041] p 2755 N94-27111
Corrosion resistant coatings from conducting polymers
[DE94-003959] p 2757 N94-27747

PROTEINS
Molecular biological studies on the human radioresistance and drug resistance
[DE93-632682] p 2910 N94-26549
Neutron and x ray scattering studies of the interactions between Ca(2+)-binding proteins and their regulatory targets: Comparisons of troponin C and calmodulin
[DE94-002706] p 2901 N94-26623
Cloning of rat RXR alpha cDNA and the expression of its mRNA in regenerating liver and primary cultured hepatocytes p 2905 N94-27479
Cloning of a novel POU family gene by RT-PCR method p 2905 N94-27480
Expression analysis of Thyroxine-Binding Globulin Complete Deficiency in Japanese (TBG-CDJ)
p 2905 N94-27482
Activation by G protein beta gamma subunits of G protein-coupled receptor kinase p 2931 N94-27534
The molecular matching problem
p 3030 N94-27910

PROTOCOL (COMPUTERS)
Interface technical specification of the V.25 bis emulator
[AD-A273754] p 2948 N94-25720
Weapon system integration for the AFIT virtual cockpit
[AD-A274058] p 2667 N94-25772
Object-oriented design and implementation of a parallel Ada simulation system
[AD-A274119] p 2979 N94-25906
A VHDL register transfer level model of the linear token passing multiplex data bus protocol for the high speed data bus
[AD-A273734] p 2980 N94-26009
Design and specification of the Xpress transfer high-speed protocol
[AD-A274941] p 3097 N94-26297
Modeling and simulation of a fiber distributed data interface local area network
[AD-A274838] p 3098 N94-26500
Automatic test case generation using PROLOG
[NPL-DITC-215/93] p 2964 N94-26655
A real-time executive implementing priority inheritance protocols p 2952 N94-26733
Example of the EXPANSE signalling protocol
[PB94-125283] p 2771 N94-26872
Hard real-time reliable multicast in the DEDOS system
[PB94-126745] p 2966 N94-26920
Binary snapshots
[CWI-CS-R9319] p 2955 N94-27547
An efficient off-line electronic cash system based on the representation problem
[CWI-CS-R9323] p 2776 N94-27551
A modular approach to evaluation cryptographic protocols using Petri nets
[ISBN-0-315-85354-9] p 2972 N94-27595
Simulating fail-stop in asynchronous distributed systems
[NASA-CR-195698] p 2974 N94-27767
Refinement for fault-tolerance: An aircraft hand-off protocol
[NASA-CR-195697] p 2666 N94-27768

PROTON BEAMS
On radiation defects in strip detectors
[DE93-616646] p 3015 N94-25916
Spin effects in hard interactions (interest in accelerated polarized beam)
[DE93-634398] p 3031 N94-26044
Regrouping of the beam in the IHEP PS for the UNK p-p programs
[DE93-634021] p 3032 N94-26164
Longitudinal diffusion of a proton bunch under external noise
[DE93-634022] p 3032 N94-26165

PROTON ENERGY
CRRES high energy proton flux map
[AD-A274803] p 2878 N94-26338
Modeling the DMSP and CRRES dosimeters using the path length distribution method
[RXR-93051] p 2698 N94-28200
The PROTEL contamination code
[RXR-93071] p 3040 N94-28202

PROTON IMPACT
Double excitation of He and H(-) by fast proton and anti-proton impact
[DE94-004581] p 3026 N94-27620

PROTON IRRADIATION
Radiation hardening effects on localized deformation and stress corrosion cracking of stainless steels
[DE94-004308] p 2731 N94-25804
Proton irradiation on materials p 3030 N94-27898

PROTON PRECIPITATION
Proton aurora and substorm intensifications
[ATR-93(7248)-1] p 2887 N94-28218

PROTON SCATTERING
An antiproton-proton partial-wave analysis
[DE94-002690] p 3021 N94-26620
First observation of neutral current proton electron scattering at the square root of s = 300 GeV
[DE94-701107] p 3030 N94-27877

PROTON-PROTON REACTIONS
Research on elementary particle physics, part 2
[DE94-004956] p 3029 N94-27815

PROTONS
Spin effects in hard interactions (interest in accelerated polarized beam)
[DE93-634398] p 3031 N94-26044
CRRES high energy proton flux map
[AD-A274803] p 2878 N94-26338
An antiproton-proton partial-wave analysis
[DE94-002690] p 3021 N94-26620
Double excitation of He and H(-) by fast proton and anti-proton impact
[DE94-004581] p 3026 N94-27620
Proton electromagnetic form factor near the proton-antiproton threshold and quasinuclear bound state
[DE94-606458] p 3027 N94-27681
Analysis of energetic proton and electron data in Neptune's magnetosphere
[NASA-CR-195707] p 3107 N94-27784
Modeling the DMSP and CRRES dosimeters using the path length distribution method
[RXR-93051] p 2698 N94-28200
The PROTEL contamination code
[RXR-93071] p 3040 N94-28202

PROTOPLANETS
Investigations of the dynamical evolution of protoplanetary nebulae
[NASA-CR-195278] p 3105 N94-27428

PROTOTYPES
Software redesign for usability: A case study
[DE94-003704] p 2960 N94-26048
Rapid prototyping of application specific signal processors (RASSP)
[AD-A274324] p 2772 N94-26884
An optoelectronic graphics display processor
[AD-A274401] p 3037 N94-26990
The OPAL vertex detector
[ISBN-0-315-51152-4] p 2812 N94-27257

PROVING
Trace-based compositional proof theory for fault tolerant distributed systems
[PB94-126737] p 2966 N94-26971

PSYCHIATRY
Practice patterns of US Army medical department psychiatrists and psychologists
[AD-A274787] p 2909 N94-26360

PSYCHOLOGICAL EFFECTS
Monthly variation of physiological and psychological responses under unsteady thermal conditions
p 2918 N94-27475
Man's ability to adapt himself for the seasonal climatic changes: From viewpoint of anticipation and seasonable behavior p 2919 N94-27476
A study of psychological factors affecting an extremely isolated environment p 2927 N94-27517

PSYCHOLOGICAL FACTORS
Development of stimulus-seeking scale for expecting individual differences against confinement stress
p 2915 N94-27460
The effect of body orientation on the perception of vertical and horizontal distance in an outdoor setting
p 2915 N94-27461
Eye-head coordination and swinging of the visual scene when wearing visually up-down reversing mirror for 14 days p 2915 N94-27462
Comparative measurement of visual stability in cosmic space: Onboard experiment and pre-flight activities
p 2916 N94-27463
A study of psychological factors affecting an extremely isolated environment p 2927 N94-27517

PSYCHOLOGICAL TESTS
Practice patterns of US Army medical department psychiatrists and psychologists
[AD-A274787] p 2909 N94-26360
Validation of the Federal Aviation Administration air traffic control specialist pre-training screen
[DOT/FAA/AM-94/4] p 2938 N94-26600
A study of psychological factors affecting an extremely isolated environment p 2927 N94-27517

PSYCHOLOGY
Proficiency scaling based on conditional probability functions for attributes
[AD-A273816] p 3002 N94-25962
Pacing visual attention: Temporal structure effects
[AD-A273859] p 2937 N94-25965

PSYCHOMETRICS
Extending the rule space model to a semantically-rich domain: Diagnostic assessment in architecture
[AD-A273789] p 2948 N94-25864
A diagnostic classification model for document processing skills
[AD-A273790] p 3096 N94-25925

PSYCHOPHYSICS
Top down influences on bottom-up processing
[AD-A274220] p 2939 N94-27072

PSYCHOPHYSIOLOGY
Top down influences on bottom-up processing
[AD-A274220] p 2939 N94-27072
Psychophysiology in microgravity and the role of exercise p 2936 N94-28374

PUBLIC LAW
Report of the defense science board task force on aircraft assessment
[AD-A274531] p 2669 N94-26835
PULSARS
An April 1991 outburst from 4U0115+63 observed by BATSE
[NASA-CR-195252] p 3116 N94-27440
Fusion reactor systems studies
[DE94-003162] p 3046 N94-27686
PULSE AMPLITUDE
Pulse waveform and transcranial Doppler analysis during lower body negative pressure
[AD-A274516] p 2911 N94-27088
PULSE COMMUNICATION
Improved performance of hybrid error control techniques for real-time digital communications over noisy channels
[ISBN-0-315-84281-4] p 2770 N94-26625
Short-block data detection techniques employing channel estimation for fading time-dispersive channels
[ISBN-0-315-58970-1] p 2777 N94-27806
Receiving antennas for electromagnetic pulses and transients
[ISBN-0-315-62312-8] p 2777 N94-27871
PULSE COMPRESSION
Direct-conversion-to-baseband for a nonlinear FM signal
[AD-A274861] p 2768 N94-26189
Phase conjugation and pulse compression of high energy lasers: From nanoseconds to microseconds
[DE94-001061] p 2818 N94-26699
PULSE DURATION
Bundle Intensity and Beamgate Length recorder (BIBL)
[DIGEL-1993-7] p 3031 N94-25619
Development of surgical CW Nd:YAG laser with optical fiber delivery system
[DE93-632902] p 2817 N94-26185
Development of high average power industrial Nd:YAG laser with peak power of 10 kW class
[DE93-633201] p 2818 N94-26520
Calculations of population transfer during intense laser pulses
[DE94-001060] p 2818 N94-26698
Pulse control method and its characteristics
[DE94-701187] p 2989 N94-27809
PULSE DURATION MODULATION
Development of real-time pulse shaping technology in solid-state lasers
[DE93-633438] p 2817 N94-26403
PULSE GENERATORS
Development of an industrial CO2 laser for mask marking
[DE93-632901] p 2816 N94-26184
Microwave and pulsed power
[DE94-003019] p 2782 N94-26312
Development of real-time pulse shaping technology in solid-state lasers
[DE93-633438] p 2817 N94-26403
Pulse transformer characterization
[PML-1992-73] p 2784 N94-26646
Research in pulsed power plasma physics
[AD-A274323] p 3045 N94-27074
Bulletin of the Institute for Chemical Reaction Science, Tohoku University, volume 2
[JTN-94-80602] p 2717 N94-27385
Four phase microwave pulse generator for pulsed EPR spectrometer p 2718 N94-27388
High repetition rate, mode locked, figure eight laser with extracavity feedback
[AD-D016053] p 2820 N94-27670
PULSE REPETITION RATE
Development of an industrial CO2 laser for mask marking
[DE93-632901] p 2816 N94-26184
PULSED LASERS
Imaging with x ray lasers
[DE94-002844] p 2816 N94-26020
Fast photoconductor CdTe detectors for synchrotron x ray studies
[DE94-001334] p 3054 N94-26139
Laser altimetry simulator. Version 3.0: User's guide
[NASA-TM-104588] p 2877 N94-26152
Development of an industrial CO2 laser for mask marking
[DE93-632901] p 2816 N94-26184
Development of surgical CW Nd:YAG laser with optical fiber delivery system
[DE93-632902] p 2817 N94-26185
Theoretical determination of chemical rate constants using novel time-dependent methods
[NASA-CR-195221] p 2714 N94-26205
Compact, solid-state femtosecond source
[AD-A273932] p 2817 N94-26271
New Thomson scattering laser control for D3-D
[DE94-002890] p 3043 N94-26274
Development of real-time pulse shaping technology in solid-state lasers
[DE93-633438] p 2817 N94-26403
Development of high average power industrial Nd:YAG laser with peak power of 10 kW class
[DE93-633201] p 2818 N94-26520
Calculations of population transfer during intense laser pulses
[DE94-001060] p 2818 N94-26698
Development of lasers optimized for pumping Ti:Al2O3 lasers
[NASA-CR-4573] p 2818 N94-26705
High repetition rate, mode locked, figure eight laser with extracavity feedback
[AD-D016053] p 2820 N94-27670
PULTRUSION
Lunar preform manufacturing p 2765 N94-25677
PUMP IMPELLERS
The high Reynolds number flow through an axial-flow pump
[AD-A273844] p 2789 N94-25604
Pump CFD code validation tests
[NASA-CR-193939] p 2822 N94-26597
Bulk-Flow Analysis, part A
[NASA-CR-193911-PT-A] p 2796 N94-27377
Compressibility effects on rotor forces in the leakage path between a shrouded pump impeller and its housing
p 2796 N94-27379
PURIFICATION
Study on utilization of super clean, high vacuum space
p 2682 N94-25586
Development of liquid membrane separation processes p 2717 N94-27386
PYROLYSIS
Double layer capacitance of carbon foam electrodes
[DE94-002651] p 2780 N94-25975
Micropyrolysis of polymer thin films for ceramics
[ECL-92-62] p 2750 N94-26088
Emissions of nitrogen oxides (NO(x) and N2O) in pressurized fluidized bed combustion
[PB94-133071] p 2876 N94-28395
PYROTECHNICS
Structural analysis of a frangible nut used on the NASA Space Shuttle
[DE94-003672] p 2821 N94-25811
Radiometric, spectral, and effectiveness equipment
[AD-A274208] p 3037 N94-27066
PYRROLES
LB-Deposited, side-chain substituted polyaniline, polypyrrole and the corresponding monomers, studied by STM
[AD-A274405] p 2754 N94-26977
Langmuir-Blodgett and STM investigations of conducting polymer thin films
[AD-A274512] p 2755 N94-27087
Chemical polymerization and Langmuir-Blodgett techniques. 2: The polymerization of monolayers of 3-substituted pyrroles
[AD-A274478] p 2755 N94-27163
PYRUVATES
Preparation, characterization, and thermal behaviour study of lanthanides (3) and yttrium (3) 4-methoxy benzylidene pyruvate in solid state
[DE94-604079] p 3068 N94-27697

Q

Q FACTORS
Effective conductivity of wire mesh reflectors for space deployable antenna systems
[NASA-CR-191605] p 2788 N94-27770
Q SWITCHED LASERS
The development of Cr, Tm, Ho:YAG lasers for airborne lidar
[AD-A274895] p 2816 N94-26178
Development of lasers optimized for pumping Ti:Al2O3 lasers
[NASA-CR-4573] p 2818 N94-26705
QUADRATIC EQUATIONS
Phase portraits of quadratic systems with finite multiplicity three and one critical point of infinity
[REPT-93-41] p 2991 N94-26215
QUADRATURES
A current evaluation of the digital beamforming testbed at Rome Laboratory
[AD-A274311] p 3032 N94-26881
QUADRUPOLES
Focusing properties of a three-element quadrupole lens system and its stigmatic focusing behaviour
[DE93-616534] p 2766 N94-25915
Correlation of experimental data and three-dimensional finite element modeling of a spinning quadrupole
[DE93-041173] p 3008 N94-26421
Hyperfine structure of positronium energy levels in a crystal
[DE94-603898] p 3068 N94-27729
Image theory for DC problems involving a conducting half space bounded by the general anisotropic impedance surface
[PB94-132917] p 2779 N94-28390
QUALIFICATIONS
Advanced qualification techniques
[DE94-003709] p 2780 N94-25812
QUALITATIVE ANALYSIS
Molecular surface electrostatic potentials in the analysis of non-hydrogen-bonding noncovalent interactions
[AD-A274612] p 3022 N94-26894
QUALITY
Measurement of laboratory quality
[VTT-TIED-1427] p 2679 N94-25652
QUALITY CONTROL
Package integrity measurement technology and quality assurance
[AD-A273881] p 2834 N94-25727
Objective image quality metrics: Applications for partially compensated images of space objects
[AD-A273837] p 2847 N94-25741
An exploratory survey of methods used to develop measures of performance
[AD-A273945] p 2834 N94-25896
Digital control and data acquisition for high-value GTA welding
[DE94-000885] p 2821 N94-25980
The use of on-line ion chromatography for high temperature and high pressure reaction studies
[DE94-002525] p 2713 N94-26075
Business process redesign: Design the improved process
[AD-A274947] p 3093 N94-26299
Analytical study of beam handling and emittance control
[AD-A274412] p 3033 N94-27078
Quality assurance for fracture mechanical finite element analyses (appendix 3/1) p 2841 N94-27189
An investigation of integrated product development implementation issues: A case study of Bosma Machine and Tool Corp.
[AD-A273917] p 2942 N94-27320
Development of a 2f optical performance measurement system
[DE94-003489] p 3039 N94-27721
Software assurance standard
[NASA-TM-109705] p 2975 N94-27992
Report of the Shuttle Processing Review Team
[NASA-TM-109728] p 2692 N94-28178
QUANTITATIVE ANALYSIS
Study on analyzing method establishment for metallic material development p 2729 N94-25578
Hydrogen uptake into silicon from an ECR plasma
[DE94-003771] p 3050 N94-25815
Analytical method for estimation of the total amount of aromatic and poly aromatic compounds in diesel fuel
[PB94-123692] p 2759 N94-25907
Radiochemistry Division annual progress report : 1991
[DE94-600652] p 2715 N94-26392
New FORTRAN computer programs to acquire and process isotopic mass spectrometric data: Operator's manual
[DE94-003174] p 2965 N94-26784
Multivariate calibration applied to near-infrared spectroscopy for the quantitative analysis of dilute aqueous solutions
[DE94-003231] p 2716 N94-26794
Gordon Research Conference on the Physics and Chemistry of Laser Diagnostics in Combustion
[AD-A274609] p 2716 N94-26893
Preparation, characterization, and thermal behaviour study of lanthanides (3) and yttrium (3) 4-methoxy benzylidene pyruvate in solid state
[DE94-604079] p 3068 N94-27697
QUANTUM CHEMISTRY
International journal of quantum chemistry. Quantum Chemistry Symposium Number 27: Proceedings of the International Symposium on Atomic, Molecular, and Condensed Matter Theory and Computational Methods
[AD-A274352] p 3023 N94-26926
QUANTUM CHROMODYNAMICS
Out of equilibrium phase transitions and a toy model for disoriented chiral condensates
[DE94-601642] p 3013 N94-25839
Unravelling the structure of matter on high-performance computers
[DE94-601620] p 3015 N94-25891
Nucleon-nucleon scattering lengths in QCD sum rules
[DE93-520239] p 3015 N94-25922
Heavy quark production and spectroscopy
[DE94-003619] p 3015 N94-25935

Monte Carlo event generators for hadron-hadron collisions
[DE94-003212] p 3015 N94-25955
A dependence of exclusive vector meson production in muon-nucleus scattering
[DE94-003363] p 3016 N94-25957
Deciphering the quark-gluon structure of the photon in electron(gamma) collisions
[DE93-634386] p 3017 N94-26043
Spin effects in hard interactions (interest in accelerated polarized beam)
[DE93-634398] p 3031 N94-26044
The STAR experiment at the Relativistic Heavy Ion Collider
[DE94-003409] p 3017 N94-26083
The delta (1232) resonance transition form factor
[DE94-003442] p 3017 N94-26101
Photon and hadron production of heavy flavors
[DE94-004655] p 3018 N94-26245
Nuclear Theory Group, University of Washington recent and planned research
[DE94-002729] p 3022 N94-26809
Experimental investigations of strong interaction in the non-perturbative QCD region
[DE94-001178] p 3024 N94-26949
The challenges of exclusive processes in QCD
[DE94-003429] p 3024 N94-27050
Charmonium physics at a tau-charm factory
[PB94-124344] p 3024 N94-27199
QCD corrections to inclusive B - S processes in the standard model
[ISBN-0-315-54572-0] p 3073 N94-27263
A relativistic quark model
[ISBN-0-315-60926-5] p 3025 N94-27333
Aspects of perturbative corrections in quantum chromodynamics
[ISBN-0-315-63607-6] p 3074 N94-27398
Quantum chromodynamics and nuclear physics at extreme energy density
[DE94-004418] p 3026 N94-27604
Electroweak and other interactions in medium-energy nuclear physics
[DE94-004161] p 3027 N94-27689
High energy parton-parton elastic scattering in QCD
[DE94-003432] p 3028 N94-27736

QUANTUM ELECTRODYNAMICS
Back-reaction beyond the mean field approximation
[DE94-003936] p 3012 N94-25612
Theoretical and experimental studies of elementary physics
[DE94-002310] p 3008 N94-25988
Spinor and isospinor structure of relativistic particle propagators
[DE94-601552] p 3019 N94-26424
A variational approach to the quantum field theoretic bound-state problem
[ISBN-0-315-60960-5] p 3074 N94-27401
Relativistic two-body system in 1+1-dimensional QED. 1: On the circle S1
[DE94-603716] p 3067 N94-27647
Excited Landau levels, orbital angular momentum and axial anomaly
[DE94-606407] p 3068 N94-27679
Enhancement of the rate of radiative processes in the field of a magnetic monopole
[DE94-603717] p 3074 N94-27696

QUANTUM ELECTRONICS
Solid state research
[AD-A274063] p 3049 N94-25645
Frontiers of science and measurement: Report on a seminar jointly organized by the National Physical Laboratory and the Institute of Physics
[PB94-124310] p 3009 N94-27131
An electronic switch based on quantum interference
[ISBN-0-315-84609-7] p 2787 N94-27650

QUANTUM MECHANICS
Coherent state approach for the (Phi)(sup 6)-lattice model and phase transitions
[DE93-613053] p 3050 N94-25825
Quantizable configurations of the relativistic string
[DE93-634346] p 3072 N94-26036
Holes in a two-dimensional quantum antiferromagnet
[DE93-634753] p 3057 N94-26388
Finite dimensional representations of the quantum superalgebra U(sub q)(gl(3/2))
[DE93-634303] p 2993 N94-26440
Quantum Hamiltonian differential geometry: How does quantization affect space?
[DE93-634306] p 2993 N94-26442
Quantum group and Manin plane related to a colored braid group representation
[DE94-601509] p 3072 N94-26461
How to build analogues of the Bessel-Clifford expansions for the sum of the repulsive Coulomb potential and central potential decreasing more rapidly than the centrifugal one?
[DE93-634308] p 3007 N94-26472
Stochastic solution to quantum dynamics
[NASA-TP-3408] p 3114 N94-26550
Wigner quantum oscillators
[DE94-601508] p 3073 N94-26758
Quantum statistical inference for density estimation
[DE94-002625] p 3073 N94-26805
Length-scale dependent ensemble-averaged conductance of a 1D disordered conductor: Conductance minimum
[DE94-602732] p 3062 N94-26902
Pigs in cyberspace p 2689 N94-27376
Decay of non-equilibrium polariton condensate in semiconductors
[DE94-604016] p 3068 N94-27678
The gl(n/m) and related q-identitiesematics and computer science ends in nuclear and related q-identities
[DE94-603653] p 3001 N94-27839

QUANTUM NUMBERS
Proton electromagnetic form factor near the proton-antiproton threshold and quasinuclear bound state
[DE94-606458] p 3027 N94-27681

QUANTUM THEORY
Duality for multiparametric quantum GL(n) and for a Lorentz quantum group
[DE93-613048] p 3005 N94-25868
Topological amplitudes in string theory
[DE94-601561] p 3071 N94-25882
On string theory interacting with two-dimensional gravity
[DE94-601562] p 3071 N94-25883
The algebra of non-local charges in non-linear sigma models
[DE94-601563] p 2991 N94-25884
A research program in experimental and theoretical high energy physics
[DE94-002156] p 3031 N94-25931
Studies in nonlinear numerical analysis
[AD-A273911] p 2959 N94-25968
The massless representations of the conformal quantum algebra
[DE94-601555] p 3006 N94-26413
Affine algebras on the torus
[DE94-601556] p 3006 N94-26414
Higher spin extensions of the Virasoro algebra, area-preserving algebras and the matrix algebra a-bar(sub (infinity))
[DE94-601557] p 3006 N94-26415
Differential regularization of a non-relativistic anyon model
[DE94-601558] p 3019 N94-26416
Vortices in curved spacetime
[DE94-601559] p 3072 N94-26417
Orthodox gravity
[DE94-601560] p 2878 N94-26418
Gauging of Chern-Simons p-Barnes
[DE94-601553] p 2993 N94-26425
Quantum subgroups and quantum co-set spaces and differential calculi on them
[DE94-602520] p 3073 N94-26876
Improved numerical methods for quantum field theory (Outstanding Junior Investigator Award)
[DE94-001793] p 3073 N94-27002
Operator regularization and renormalization theory
[ISBN-0-315-49334-8] p 3007 N94-27264
Quantum chromodynamics and nuclear physics at extreme energy density
[DE94-004418] p 3026 N94-27604
Second-order phase transition in (g(phi)4)2 theory
[DE94-603677] p 3067 N94-27638
Stochastic space-time, confinement potential and particle propagator
[DE94-606415] p 3074 N94-27680
A method for obtaining quantum doubles from the Yang-Baxter R-matrices
[DE94-606300] p 3001 N94-27846

QUANTUM WELL LASERS
Development of intermetallic compounds for high performance luminescence elements
p 2722 N94-25545

QUANTUM WELLS
Characterization of nonlinear effects in optically pumped vertical cavity surface emitting lasers
[AD-A273840] p 2815 N94-25744
Biexciton formation by two-photon absorption in quantum wells
[DE93-613551] p 3071 N94-25852
Instantaneous amplitude and frequency dynamics of coherent wave mixing in semiconductor quantum wells
[DE94-003262] p 3054 N94-26128
Investigation of a normal incidence high-performance p-type strained layer In(0.3)Ga(0.7)As / In(0.52)Al(0.48) as quantum well infrared photodetector
[AD-A274854] p 3055 N94-26188
Ordering and phase separation in MOCVD InGaP alloys and unicompositional quantum wells
[DE94-004693] p 3056 N94-26352

QUARK MODELS
Lepton masses in an SU(3)(sub L) x U(1)(sub N) gauge model
[DE93-634366] p 3016 N94-26040
Spin effects in hard interactions (interest in accelerated polarized beam)
[DE93-634398] p 3031 N94-26044
Dibaryon-induced instability of neutron stars
[DE93-634453] p 3103 N94-26046
Measuring the time dependence of B(sub s)(sup 0) meson - anti B(sub s)(sup 0) meson oscillations
[ISBN-0-315-84367-5] p 3021 N94-26665
Low-energy hadronic interactions beyond the current algebra approach
[DE94-602600] p 3022 N94-26900
Spectroscopy and strong decays of baryons
[ISBN-0-315-49073-X] p 3024 N94-27258
Finding the missing pieces of the standard model
[ISBN-0-315-57174-8] p 3024 N94-27259
QCD corrections to inclusive B - S processes in the standard model
[ISBN-0-315-54572-0] p 3073 N94-27263
A relativistic quark model
[ISBN-0-315-60926-5] p 3025 N94-27333
Aspects of perturbative corrections in quantum chromodynamics
[ISBN-0-315-63607-6] p 3074 N94-27398

QUARK PARTON MODEL
High energy parton-parton elastic scattering in QCD
[DE94-003432] p 3028 N94-27736

QUARKS
Quark-antiquark bound states
[DE93-613054] p 3013 N94-25826
A possible way of connecting the Grassmann variables and the number of generation
[DE94-601624] p 2990 N94-25838
Out of equilibrium phase transitions and a toy model for disoriented chiral condensates
[DE94-601642] p 3013 N94-25839
Structure functions of sea quarks, Kogut-Susskind pole and dynamics of pp- and pp-bar-interactions at high energies
[DE93-613184] p 3031 N94-25870
Heavy quark production and spectroscopy
[DE94-003619] p 3015 N94-25935
Pseudoscalar glueball in the composite interpolating fields approach
[DE93-634374] p 3016 N94-26042
Deciphering the quark-gluon structure of the photon in electron(gamma) collisions
[DE93-634386] p 3017 N94-26043
The STAR experiment at the Relativistic Heavy Ion Collider
[DE94-003409] p 3017 N94-26083
JLC-1
[DE93-520380] p 3031 N94-26113
Why is the Higgs doublet light?
[DE94-601711] p 3018 N94-26333
Mesons and diquarks in a NJL-model at finite temperature and chemical potential
[DE93-634375] p 3020 N94-26505
Measuring the time dependence of B(sub s)(sup 0) meson - anti B(sub s)(sup 0) meson oscillations
[ISBN-0-315-84367-5] p 3021 N94-26665
Light-quark, heavy-quark systems: An update
[DE94-002298] p 3021 N94-26759
Strange Dibaryons
[DE94-003005] p 3022 N94-26769
Low-energy hadronic interactions beyond the current algebra approach
[DE94-602600] p 3022 N94-26900
D0 results on searches for the top quark
[DE94-003361] p 3023 N94-26938
Experimental investigations of strong interaction in the non-perturbative QCD region
[DE94-001178] p 3024 N94-26949
Finding the missing pieces of the standard model
[ISBN-0-315-57174-8] p 3024 N94-27259
A relativistic quark model
[ISBN-0-315-60926-5] p 3025 N94-27333
Quantum chromodynamics and nuclear physics at extreme energy density
[DE94-004418] p 3026 N94-27604
Search for the top quark in the single lepton + jets channel at D0
[DE94-004660] p 3028 N94-27749

QUASARS
Sloan Digital Sky Survey
[DE94-004662] p 3103 N94-27750

Weak bump quasars
[NASA-CR-195267] p 3103 N94-27933

QUASI-STEADY STATES
Scaling of sustained ZT-40 M reversed field pinches
[DE94-003318] p 3043 N94-26321

QUENCHING (ATOMIC PHYSICS)
Vibrational energy transfer within the B 3Pi (O(+) sub u) state of 79BR2 upon collision with N2, O2, NO, and SF6
[AD-A273905] p 3011 N94-25589

QUENCHING (COOLING)
Study on the production of flaky amorphous alloy powders by impact flattening of atomized liquid droplets on a rapidly rotating wheel p 2746 N94-28169
Formation and high mechanical strength of Al-based alloys containing a nanoscale icosahedral phase as a main constituent p 2746 N94-28171

QUERY LANGUAGES
Design and implementation of a query editor for the Amadeus system
[AD-A274955] p 3097 N94-26300

QUEUEING THEORY
Single-server queues with spatially distributed arrivals
[PB94-126638] p 2986 N94-26916

R

RADAR ANTENNAS
Cloud liquid water content measurement tests using dual-wavelength radar
[PB94-125960] p 2896 N94-26959

RADAR ATTENUATION
Cloud liquid water content measurement tests using dual-wavelength radar
[PB94-125960] p 2896 N94-26959

RADAR BEAMS
Theoretical aspects of the agile mirror
[AD-A274890] p 2767 N94-26177

RADAR CROSS SECTIONS
Extension of On-Surface Radiation Condition (OSRC) theory to full-vector electromagnetic wave scattering by three-dimensional conducting, dielectric, and coated targets
[AD-A274023] p 2766 N94-25757
A study of two dimensional tapered periodic edge treatments to reduce wideband edge diffraction
[AD-A274054] p 2766 N94-25824
Radar cross section visualization using sample buffer progressive refinement volume rendering
[AD-A274179] p 2773 N94-27127

RADAR DATA
Radar detection of low-altitude targets in a maritime environment. Volume 2: Meteorological and radar data
[AD-A274658] p 2768 N94-26335
Leadex environmental phenomena and effects observed by DMSP, NOAA, and ERS-1 satellites
[AD-A274596] p 2868 N94-26888

RADAR DETECTION
Machine intelligent gust front algorithm
[AD-A273695] p 2680 N94-26196
Radar detection of low-altitude targets in a maritime environment. Volume 2: Meteorological and radar data
[AD-A274658] p 2768 N94-26335
Processing of wide-angle synthetic aperture radar signals for target detection
[AD-A274225] p 2773 N94-27073

RADAR ECHOES
Analyzing adaptive beamformer performance in a stable multipath environment
[AD-A274029] p 2766 N94-25766
Investigation of a normal incidence high-performance p-type strained layer In(0.3)Ga(0.7)As / In(0.52)Al(0.48) as quantum well infrared photodetector
[AD-A274854] p 3055 N94-26188

RADAR IMAGERY
Response of an airborne synthetic aperture radar to sea ice in the marginal ice zone
[ISBN-0-315-84243-1] p 2849 N94-26668
Encoding approaches for data link transmission of weather graphics
[AD-A274497] p 2772 N94-26963
Processing of wide-angle synthetic aperture radar signals for target detection
[AD-A274225] p 2773 N94-27073
Method of correcting rotational motion error in SAR and ISAR imagery
[AD-D016033] p 2773 N94-27146
Image quality analysis of compressed synthetic aperture radar imagery
[AD-A273399] p 2774 N94-27170
Non-adaptive robust filters for speckle noise reduction
[INPE-5519-PRE/1794] p 2776 N94-27335
Perceptual compression of magnitude-detected synthetic aperture radar imagery p 2946 N94-28260

Some implications of large impact craters and basins on Venus for terrestrial ringed craters and planetary evolution p 2890 N94-28306

RADAR MEASUREMENT
Cloud liquid water content measurement tests using dual-wavelength radar
[PB94-125960] p 2896 N94-26959

RADAR NETWORKS
A feasibility study on bird classification with neural network
[AD-A273753] p 2659 N94-25780

RADAR RANGE
New binary integration strategies and corresponding R90 calculations
[AD-A274786] p 2769 N94-26359

RADAR SCANNING
The development of an in-motion radiography system for large area aircraft scanning
[DREP-TM-93-53] p 2670 N94-27666

RADAR TARGETS
Radar detection of low-altitude targets in a maritime environment. Volume 2: Meteorological and radar data
[AD-A274658] p 2768 N94-26335
New binary integration strategies and corresponding R90 calculations
[AD-A274786] p 2769 N94-26359
Processing of wide-angle synthetic aperture radar signals for target detection
[AD-A274225] p 2773 N94-27073

RADAR TRACKING
Methods for improving low-angle, low-altitude radar tracking accuracy
[AD-A274914] p 2768 N94-26347
Combatting inherent vulnerabilities of CFAR algorithms and a new robust CFAR design
[AD-A274918] p 2770 N94-26751
Processing of wide-angle synthetic aperture radar signals for target detection
[AD-A274225] p 2773 N94-27073

RADAR TRANSMISSION
Over-the-horizon propagation measurements at six radar-frequency bands at the Atlantic Ocean Coast
[AD-A274151] p 2773 N94-27136

RADAR TRANSMITTERS
S-76 high intensity radiated fields, volume 3
[AD-A274416] p 2772 N94-26980

RADIAL FLOW
Low cost, radial flow, solid oxide fuel cell
[DE94-002982] p 2858 N94-26785
On helicon wave induced radial plasma transport
[IPPCZ-333] p 3048 N94-27840

RADIANCE
MODIS airborne simulator visible and near-infrared calibration, 1992 ASTEX field experiment. Calibration version: ASTEX King 1.0
[NASA-TM-104599] p 2897 N94-28179

RADIANT HEATING
Numerical and experimental analyses of the radiant heat flux produced by quartz heating systems
[NASA-TP-3387] p 3011 N94-27659

RADIATION ABSORPTION
Radiation applications of physical chemistry
p 2854 N94-26054
Evanescent field infrared spectroscopy using chalcogenide glass fiber
[ITN-94-85233] p 3038 N94-27178

RADIATION BELTS
Analysis of energetic proton and electron data in Neptune's magnetosphere
[NASA-CR-195707] p 3107 N94-27784

RADIATION CHEMISTRY
The First Energy Conference: Israel and the Former USSR
[ISBN-965-229-098-X] p 2853 N94-26050
Radiation applications of physical chemistry
p 2854 N94-26054

RADIATION COUNTERS
Use of parallel counters for triggering
[DE93-616656] p 2979 N94-25918
Harvard University High Energy Physics
[DE94-002406] p 3032 N94-26119
Hadron gas ionization calorimeters
[DE93-634186] p 2810 N94-26397
Measuring the time dependence of B(sub s)(sup 0) meson - anti B(sub s)(sup 0) meson oscillations
[ISBN-0-315-84367-5] p 3021 N94-26665
The OPAL vertex detector
[ISBN-0-315-51152-4] p 2812 N94-27257

RADIATION DAMAGE
Temperature dependence of the radiation induced change of depletion voltage in silicon PIN detectors
[DE94-002705] p 3052 N94-25972
Temperature dependence of static RAM volatility
[DE93-040345] p 2948 N94-26111

Experimental and numerical investigation of shock wave propagation through complex geometry, gas continuous, two-phase media
[DE94-001408] p 2791 N94-26121
Disturbed neuronal migration in the cerebral cortex of mice by low-dose gamma radiation
p 2904 N94-27470
Distribution of GABA immunoreactive neurons in the brain of rolling mouse Nagoya and gamma-irradiated mouse p 2904 N94-27471
Effects of gamma ray radiation on the developing mouse cerebellum: Apoptotic cell death and induction of tissue transglutaminase p 2904 N94-27472
Influence of lattice damage on retention and transport of deuterium in beta silicon carbide
[DE94-005206] p 3068 N94-27693
Damage growth in MgAl2O4 crystals by Xe ion irradiations
[DE94-005009] p 3069 N94-27828

RADIATION DETECTORS
JLC-1
[DE93-520380] p 3031 N94-26113
Auxiliary controller for time-to-digital converter module readout
[DE93-634172] p 2948 N94-26266
Exploration of GaAs structures for solid-state detectors
[DE93-634191] p 3056 N94-26379
The 12-channel flash-ADC FASTBUS module
[DE93-634229] p 2783 N94-26380
Separation and reconstruction of electron neutrino interaction in the IHEP-JINR neutrino detector and BARS detector
[DE93-634182] p 3019 N94-26393
Proceedings of the Second EGS4 User's Meeting in Japan
[DE93-520383] p 3032 N94-26543
The response of an hyperpure Ge detector to ionizing radiation
[ISBN-0-315-83968-6] p 2811 N94-26662
Channel to energy calibration results for the BATSE large area detectors p 3115 N94-26690
Advances in gamma ray field instrumentation at Los Alamos
[DE93-040264] p 2813 N94-27624
The status of the solar neutrino problem
[DE94-003934] p 3111 N94-27742
Performance of a 14-MeV neutron generator as an in situ calibration source for TFTR
[DE94-004993] p 3048 N94-27825

RADIATION DOSAGE
Microstructural development in low activation ferritic alloys irradiated to 200 dpa at 420 C
[DE94-004269] p 2731 N94-25803
Advanced qualification techniques
[DE94-003709] p 2780 N94-25812
Window least squares method applied to statistical noise smoothing of positron annihilation data
[DE93-634665] p 3003 N94-26385
Studies on the application of radiation for genetic transformation in higher plants
[DE93-632656] p 2901 N94-26470
The role of hyperbaric oxygen as a prophylaxis for radiation enteritis
[AD-A274974] p 2901 N94-26517
Conceptual design of the tokamak radiation shielding for the Tokamak Physics Experiment (TPX)
[DE94-002791] p 3044 N94-26858
Effect of temperature and recoil-energy spectra on irradiation-induced amorphization in Ca2La8(SiO4)6O2
[DE94-004371] p 3067 N94-27602
Modeling the DMSP and CRRES dosimeters using the path length distribution method
[RXR-93051] p 2698 N94-28200
Develop and fabricate a radiation dose measurement system for satellites
[PL-TR-93-2161] p 2698 N94-28210
Develop and fabricate a radiation dose measurement system for satellites
[PL-TR-93-2099] p 2698 N94-28217

RADIATION EFFECTS
A review of carbide fuel corrosion for nuclear thermal propulsion applications
[DE94-003938] p 2699 N94-25613
Microstructural development in low activation ferritic alloys irradiated to 200 dpa at 420 C
[DE94-004269] p 2731 N94-25803
Advanced qualification techniques
[DE94-003709] p 2780 N94-25812
Electrical properties of p-type GaInP2
[AD-A273771] p 3051 N94-25856
On radiation defects in strip detectors
[DE93-616646] p 3015 N94-25916
Temperature dependence of the radiation induced change of depletion voltage in silicon PIN detectors
[DE94-002705] p 3052 N94-25972

Radiation-Induced Structural Changes, 2
[DE93-520314] p 3054 N94-26109
Temperature dependence of static RAM volatility
[DE93-040345] p 2948 N94-26111
Regrowth zones in laser annealed radiation damaged diamond
[DE94-600821] p 3056 N94-26364
Radiochemistry Division annual progress report : 1991
[DE94-600652] p 2715 N94-26392
Studies on the application of radiation for genetic transformation in higher plants
[DE93-632656] p 2901 N94-26470
The role of hyperbaric oxygen as a prophylaxis for radiation enteritis
[AD-A274974] p 2901 N94-26517
Molecular biological studies on the human radioresistance and drug resistance
[DE93-632682] p 2910 N94-26549
Microstructural development in irradiated vanadium alloys
[DE94-004307] p 2737 N94-26556
Influence of helium generation rate and temperature history on mechanical properties of model Fe-Cr-Ni alloys irradiated in FFTF at relatively low displacement rates
[DE94-004264] p 2737 N94-26575
Suppression of thermal grain growth in nickel by prior electron irradiation
[DE94-004602] p 2737 N94-26587
Disintegration of (C60) by Xe ion irradiation
[DE94-601913] p 3023 N94-26929
The role of point defect clusters in reactor pressure vessel embrittlement
[DE94-001122] p 2739 N94-26931
Initial ultraviolet-B intensity data at Lawrence Livermore National Laboratory
[DE94-004279] p 2869 N94-27267
The radiation design handbook
[ESA-PSS-01-609-ISSUE-1] p 2696 N94-27397
Annals of the Research Inst. of Environmental Medicine, Nagoya Univ., volume 44
[REPT-44-VOL-44] p 2911 N94-27442
Disturbed neuronal migration in the cerebral cortex of mice by low-dose gamma radiation
p 2904 N94-27470
Distribution of GABA immunoreactive neurons in the brain of rolling mouse Nagoya and gamma-irradiated mouse p 2904 N94-27471
Effects of gamma ray radiation on the developing mouse cerebellum: Apoptotic cell death and induction of tissue transglutaminase p 2904 N94-27472
Grain boundary chromium concentration effects on the IGSCC and IASCC of austenitic stainless steels
[DE94-004268] p 2741 N94-27570
Effect of temperature and recoil-energy spectra on irradiation-induced amorphization in Ca2La8(SiO4)6O2
[DE94-004371] p 3067 N94-27602
Fusion reactor systems studies
[DE94-003162] p 3046 N94-27686
Ion implantation in silicate glasses
[DE94-003785] p 2757 N94-27726
Outgas and vacuum seal characteristics of irradiated polyimide O-ring
[DE94-701200] p 2757 N94-27812
Damage growth in MgAl2O4 crystals by Xe ion irradiations
[DE94-005009] p 3069 N94-27828
Experiment and research on materials irradiated by plasma radiation
[DE94-605011] p 2758 N94-27845
Proton irradiation on materials p 3030 N94-27898
Sonic booms and marine mammals: Informational status and recommendations p 2651 N94-28198

RADIATION HARDENING
Microstructural development in low activation ferritic alloys irradiated to 200 dpa at 420 C
[DE94-004269] p 2731 N94-25803
Radiation hardening effects on localized deformation and stress corrosion cracking of stainless steels
[DE94-004308] p 2731 N94-25804
Advanced qualification techniques
[DE94-003709] p 2780 N94-25812

RADIATION HAZARDS
Risk perspectives for Topaz 2 flight mission
[DE94-003229] p 2700 N94-25956
Vacuum-UV-effects on E. coli plasmid pUC19: Inactivation, strand break induction and mutation induction
[DLR-FB-93-26] p 2903 N94-27754

RADIATION INJURIES
Disturbed neuronal migration in the cerebral cortex of mice by low-dose gamma radiation
p 2904 N94-27470
Distribution of GABA immunoreactive neurons in the brain of rolling mouse Nagoya and gamma-irradiated mouse p 2904 N94-27471
Effects of gamma ray radiation on the developing mouse cerebellum: Apoptotic cell death and induction of tissue transglutaminase p 2904 N94-27472

RADIATION MEASUREMENT
Testbed model and data assimilation for ARM
[DE94-000432] p 2893 N94-26082
Develop and fabricate a radiation dose measurement system for satellites
[PL-TR-93-2161] p 2698 N94-28210
Develop and fabricate a radiation dose measurement system for satellites
[PL-TR-93-2099] p 2698 N94-28217

RADIATION MEASURING INSTRUMENTS
Contributions to the 23rd ICRC from emulsion chamber experiments at Mt. Chacaltaya and Pamirs
[ICRR-REPT-295-93-7] p 3112 N94-25624
Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 1 p 3112 N94-25628
Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 2 p 3113 N94-25629

RADIATION PROTECTION
Proceedings of the Second EGS4 User's Meeting in Japan
[DE93-520383] p 3032 N94-26543
Conceptual design of the tokamak radiation shielding for the Tokamak Physics Experiment (TPX)
[DE94-002791] p 3044 N94-26858
Research and development within nonlinear optics for protection of optical sensors against laser irradiation on of optical sensors against laser irradiation. Quarterannual report 1 (april 1993))
[PB94-124245] p 3037 N94-27046

RADIATION SHIELDING
The 1991-1992 project summaries
p 2943 N94-25698
Experimental and numerical investigation of shock wave propagation through complex geometry, gas continuous, two-phase media
[DE94-001408] p 2791 N94-26121
A robust helium-cooled shield/blanket design for ITER
[DE94-003402] p 3043 N94-26323
Conceptual design of the tokamak radiation shielding for the Tokamak Physics Experiment (TPX)
[DE94-002791] p 3044 N94-26858
A widely adaptable habitat construction system utilizing space resources p 2688 N94-27374
Monte Carlo calculations of low background detector response
[DE94-004593] p 3116 N94-27621
Fusion reactor systems studies
[DE94-003162] p 3046 N94-27686

RADIATION SOURCES
Electrical analysis of wideband and distributed windows using time-dependent field codes
[DE94-002987] p 2768 N94-26310
Monte Carlo calculations of low background detector response
[DE94-004593] p 3116 N94-27621

RADIATION SPECTRA
A double arm time-of-flight spectrometer based on position-sensitive parallel-grid avalanche counters
[DE93-616665] p 3012 N94-25750

RADIATION THERAPY
The role of hyperbaric oxygen as a prophylaxis for radiation enteritis
[AD-A274974] p 2901 N94-26517

RADIATION TOLERANCE
Molecular biological studies on the human radioresistance and drug resistance
[DE93-632682] p 2910 N94-26549
The radiation design handbook
[ESA-PSS-01-609-ISSUE-1] p 2696 N94-27397

RADIATION TRANSPORT
Proton irradiation on materials p 3030 N94-27898

RADIATIVE HEAT TRANSFER
ARM Fourier transform spectrometer data analysis tools
[DE94-000865] p 2895 N94-26697
Researches of the Electrotechnical Laboratory. No. 53: Spectral emission from combustion gas containing scattering media
[JTN-94-80603] p 2717 N94-27246
Numerical and experimental analyses of the radiant heat flux produced by quartz heating systems
[NASA-TP-3387] p 3011 N94-27659

RADIATIVE TRANSFER
A research program on radiative transfer model development in support of the ARM program
[DE94-001146] p 2767 N94-25950
Interactions between a tropical mixed boundary layer and cumulus convection in a radiative-convective model
[DE94-000848] p 2877 N94-25979
A numerical solution to the one and two dimensional line radiative transfer equation
[ISBN-0-315-84258-X] p 2994 N94-26640
Cooling the Martian atmosphere: The spectral overlap of the C02 15 micrometers band and dust
p 3107 N94-27886
Martian atmospheric radiation budget
p 3107 N94-27887
How well was total ozone abundance inferred with Mariner 9? p 3108 N94-27891

RADICALS
Three methods to measure RH bond energies
[DE94-003795] p 3013 N94-25816
Bulletin of the Institute for Chemical Reaction Science, Tohoku University, volume 2
[JTN-94-80602] p 2717 N94-27385
Reactivity of nitrate radical (NO3) toward organic compounds p 2704 N94-27387
The addition of molecular oxygen to hydroperoxy-propyl radicals
[DE94-003662] p 2760 N94-27725

RADIO ALTIMETERS
Ionospheric calibration for single frequency altimeter measurements
[NASA-CR-195709] p 2883 N94-27883

RADIO ANTENNAS
Fast wave current drive technology development at ORNL
[DE94-004243] p 3046 N94-27568

RADIO BURSTS
An April 1991 outburst from 4U0115+63 observed by BATSE
[NASA-CR-195252] p 3116 N94-27440

RADIO COMMUNICATION
Meteor Burst Communications (MBC) throughput improvement tests
[AD-A273941] p 2767 N94-25990
Technical description of the Vulcano software library
[FFI-93/7024] p 2767 N94-26105
Packet radio data link applications in the NASA Langley Research Center Transport Systems Research Vehicle
[NASA-TM-109071] p 2665 N94-27423

RADIO FILTERS
Direct-conversion-to-baseband for a nonlinear FM signal
[AD-A274861] p 2768 N94-26189

RADIO FREQUENCIES
Two dimensional self-consistent fluid simulation of RF inductive sources
[DE94-003635] p 2767 N94-25937
Low noise measurements in an RF environment
[AD-A273813] p 2767 N94-25960
MIMO recursive least squares control algorithm for the AN/FPN-44A Loran-C transmitter
[AD-A274820] p 2664 N94-26493
Investigation of ACC/CCI tunnel diodes
[AD-A274549] p 2785 N94-26845
Ferrite phase shifters using stress insensitive materials
[AD-A274639] p 2708 N94-26895
An analysis of FM jamming and noise quality measures
[AD-A274349] p 2772 N94-26924
Technical report of ISSP. Ser. A, no. 2688: Suppression of higher-order modes in an RF cavity by resistive material
[JTN-94-80574] p 2787 N94-27606
On radio frequency wave induced radial transport and wave helicity
[IPPCZ-326] p 2777 N94-27838

RADIO FREQUENCY HEATING
Design of folded waveguide antenna for Alcator C-Mod
[DE94-003584] p 2767 N94-25924
RF modeling and design of a folded waveguide launcher for the Alcator C-Mod tokamak
[DE94-003588] p 3041 N94-25933
Excitation of Earth-ionosphere waveguide in the ELF and lower VLF bands by modulated ionospheric current
[AD-A274969] p 2878 N94-26304
Critical survey of plasma processing
[AD-A274233] p 3044 N94-26820
Design and control of phased ICRF antenna arrays
[DE94-002796] p 3046 N94-27261
Fast wave current drive technology development at ORNL
[DE94-004243] p 3046 N94-27568
The calculation for energy balance of heating plasmas by Alfven waves
[DE94-604994] p 3049 N94-27855

RADIO FREQUENCY INTERFERENCE
Evaluation of an Acoustic Charge Transport (ACT) device for adaptive interference suppression in spread spectrum communications systems
[AD-A274073] p 2765 N94-25647

Characteristics of 30-MHz interference noises observed by riometers p 2884 N94-27965
RADIO HORIZONS
Radar detection of low-altitude targets in a maritime environment. Volume 2: Meteorological and radar data
[AD-A274658] p 2768 N94-26335
RADIO OBSERVATION
Solar-geophysical data number 590, October 1993. Part 1: (Prompt reports). Data for September, August 1993, and late data
[PB94-125903] p 3110 N94-27053
RADIO RECEIVERS
Analysis and simulation of a GPS receiver design using combined delay-lock and modified tanlock loops
[AD-A274037] p 2664 N94-25810
RADIO RELAY SYSTEMS
Hybrid power system for remote communications stations
[AD-A274963] p 2782 N94-26301
Annex report FEL-92-A163: Description of the LInk and BER Test Analysis System (LIBERTAS) for the frequency band V (14.5 - 15.3 GHz)
[FEL-92-A442] p 2770 N94-26650
RADIO SIGNALS
Direct-conversion-to-baseband for a nonlinear FM signal
[AD-A274861] p 2768 N94-26189
Enhanced adaptive statistical filter providing improved performance for target motion analysis noise discrimination statement of government interest
[AD-D016039] p 2786 N94-27109
RADIO TELESCOPES
Project PARAS: Phased array radio astronomy from space p 3081 N94-25703
RADIO TRANSMISSION
Ionospheric modification by high power, obliquely propagated HF radio wave transmissions. Part 1: Experimental
[AD-A273746] p 2878 N94-26224
Optical communications for transport aircraft
p 2643 N94-27298
The Sixteenth Symposium on Coordinated Observations of the Ionosphere and the Magnetosphere in the Polar Regions: Program and abstracts
[JTN-94-80601] p 2882 N94-27300
Antarctic Record, Vol. 36, No. 2
[REPT-107] p 2883 N94-27963
Characteristics of 30-MHz interference noises observed by riometers p 2884 N94-27965
RADIO TRANSMITTERS
MIMO recursive least squares control algorithm for the AN/FPN-44A Loran-C transmitter
[AD-A274820] p 2664 N94-26493
RADIO WAVES
Ionospheric modification by high power, obliquely propagated HF radio wave transmissions. Part 1: Experimental
[AD-A273746] p 2878 N94-26224
RADIOACTIVE DECAY
Vector meson exchanges and CP asymmetry in K(sup +/-) yields pi(sup +/-)pi(sup 0)
[DE94-601605] p 3014 N94-25887
CP violation in Higgs decays
[DE94-601607] p 3014 N94-25888
Unravelling the structure of matter on high-performance computers
[DE94-601620] p 3015 N94-25891
Fast vertex search (in plane)
[DE93-616655] p 2959 N94-25917
Algorithms of the vertex coordinate reconstruction for straight tracks of short-lived particles
[DE93-616661] p 3015 N94-25919
Pseudoscalar glueball in the composite interpolating fields approach
[DE93-634374] p 3016 N94-26042
Meson X(1814) as a candidate for a hybrid state
[DE93-634447] p 3017 N94-26045
Measurement of tau lepton branching fractions
[DE94-003423] p 3018 N94-26325
Chance to use W-decay lepton channels for width determination
[DE93-634438] p 3020 N94-26507
Light-quark, heavy-quark systems: An update
[DE94-002298] p 3021 N94-26759
Leptonic decay constants of heavy mesons in QCD
[DE93-634426] p 3022 N94-26767
Low-energy hadronic interactions beyond the current algebra approach
[DE94-602600] p 3022 N94-26900
Study of the process (pi)(sup -)A(yields)(pi)(sup -)(eta)'(eta)A at the moment 36 GeV/c
[DE93-634530] p 3024 N94-27250
Spectroscopy and strong decays of baryons
[ISBN-0-315-49073-X] p 3024 N94-27258
QCD corrections to inclusive B - S processes in the standard model
[ISBN-0-315-54572-0] p 3073 N94-27263
An analysis of monojet data in p(bar-p) collisions at square root of s equal to 1.8 TEV
[DE94-001822] p 3026 N94-27565
Decay of non-equilibrium polariton condensate in semiconductors
[DE94-604016] p 3068 N94-27678
Research on elementary particle physics, part 2
[DE94-004956] p 3029 N94-27815
Decay constants of heavy mesons in the relativistic potential model with velocity dependent corrections
[DE94-606495] p 3030 N94-27860
RADIOACTIVE ISOTOPES
A double arm time-of-flight spectrometer based on position-sensitive parallel-grid avalanche counters
[DE93-616665] p 3012 N94-25750
Simulations of terrestrial in-situ cosmogenic-nuclide production
[DE94-004999] p 3117 N94-27826
RADIOACTIVE MATERIALS
Monte Carlo calculations of low background detector response
[DE94-004593] p 3116 N94-27621
RADIOACTIVE WASTES
Development of laser spectroscopic technology in nuclear industry
[DE93-633327] p 2714 N94-26158
Recent ASCOT experiments in multi-layered flows
[DE94-002360] p 2880 N94-26762
RADIOBIOLOGY
Molecular biological studies on the human radioresistance and drug resistance
[DE93-632682] p 2910 N94-26549
RADIOCHEMISTRY
Radiochemistry Division annual progress report : 1991
[DE94-600652] p 2715 N94-26392
RADIOGONIOMETERS
Energy Dispersive X ray Diffraction (EDXD) apparatus for liquids at high temperature p 2721 N94-28159
RADIOGRAPHY
The development of an in-motion radiography system for large area aircraft scanning
[DREP-TM-93-53] p 2670 N94-27666
Upset welding process for 21-6-9 spherical vessels
[DE93-018194] p 2832 N94-28229
RADIOISOTOPE BATTERIES
Preliminary reentry safety assessment of the General Purpose Heat Source module for the Cassini mission: Aerospace Nuclear Safety Program
[DE94-001646] p 2699 N94-25926
RADIOLYSIS
Radiation-Induced Structural Changes, 2
[DE93-520314] p 3054 N94-26109
RADIOMETERS
Hyperspectral analysis of space objects: Signal to noise evaluation
[AD-A273882] p 2765 N94-25728
Characterization and calibration of the Agema 880+ imaging radiometer
[AD-A274417] p 3036 N94-26981
Radiometric, spectral, and effectiveness equipment
[AD-A274208] p 3037 N94-27066
Initial ultraviolet-B intensity data at Lawrence Livermore National Laboratory
[DE94-004279] p 2869 N94-27267
The validation of ATSR measurements with in situ sea temperatures
[DE94-003195] p 2852 N94-27875
RADIOMETRIC RESOLUTION
Calibration of SAR systems
[DLR-FB-93-18] p 2777 N94-27738
RADOMES
Analyzing adaptive beamformer performance in a stable multipath environment
[AD-A274029] p 2766 N94-25766
A study of two dimensional tapered periodic edge treatments to reduce wideband edge diffraction
[AD-A274054] p 2766 N94-25824
RAILGUN ACCELERATORS
Interaction between a high density-low temperature plasma and a frozen hydrogen pellet in a railgun injector
[DE94-000846] p 3041 N94-25949
Application of railgun principle to high-velocity hydrogen pellet injection for magnetic fusion reactor fueling
[DE94-004411] p 3044 N94-26579
RAILS
The railway track response function
[REPT-93-40] p 2837 N94-26214
A non-linear mathematical model or finite, periodic rail corrugations
[REPT-93-49] p 2996 N94-26967
RAIN
A synoptic study on periods of deficiency over Rio Grande do Sul/Brazil
[INPE-5456-TDI/498] p 2896 N94-27422
RAIN FORESTS
Assessment of tropical forests using satellite data
[SILVA-CARELICA-21] p 2850 N94-27182
Global tropical forest cover assessments using satellite imagery p 2850 N94-27183
Mapping closed tropical forest cover in West Africa using NOAA/AVHRR-LAC data p 2850 N94-27184
Training on assessment and mapping of deforestation: WFW conference, Brazil
[INPE-5482-PRE/1781] p 2850 N94-27384
RAMAN LASERS
Theory and modeling of stimulated Raman scattering
[AD-A273755] p 3033 N94-25721
RAMAN SPECTRA
Theory and modeling of stimulated Raman scattering
[AD-A273755] p 3033 N94-25721
Gaseous hydrogen/oxygen injector performance characterization
[NASA-CR-194464] p 2701 N94-26208
High definition Raman microscopic imaging
[DE94-003158] p 2716 N94-26781
Technical report of ISSP. Ser. A, no. 2680: Determination of intervalley scattering time in germanium by subpicosecond time-resolved Raman spectroscopy
[JTN-94-80566] p 3064 N94-27176
RAMAN SPECTROSCOPY
Study of the homogeneity of InP wafers
[AD-A273658] p 3055 N94-26194
High definition Raman microscopic imaging
[DE94-003158] p 2716 N94-26781
Spectroscopy Division
[DE94-604074] p 2717 N94-26988
RAMJET ENGINES
Development of hypersonic engine seals: Flow effects of preload and engine pressures
[NASA-TM-106333] p 2826 N94-27599
RANDOM ACCESS MEMORY
Temperature dependence of static RAM volatility
[DE93-040345] p 2948 N94-26111
Test methods and custom hardware for functional testing of a high speed GaAs DRAM
[AD-A274859] p 2781 N94-26175
Ferroelectric fluoride memory FET development
[AD-A274341] p 2785 N94-27057
RANDOM NOISE
White noise theory of robust nonlinear filtering with correlated state and observation noises
[PB94-126661] p 3004 N94-27211
RANDOM PROCESSES
Data on parity violation in the compound nucleus and its interpretation
[DE94-003965] p 3013 N94-25820
RANDOM SAMPLING
Aspects of goodness-of-fit
[AD-A274826] p 3003 N94-26495
RANDOM VARIABLES
Simulation approaches for calculations in directed graphical models
[AD-A274825] p 3003 N94-26494
Central dynamic share scheduling in distributed systems
[REPT-93-48] p 2966 N94-26966
RANDOM VIBRATION
Space Station Freedom NiH2 cell testing program
p 2861 N94-28108
RANGE AND RANGE RATE TRACKING
Real-time 3-D pose estimation using a high-speed range sensor
[AD-A273873] p 2809 N94-25967
RANGE ERRORS
A simulation of GPS and differential GPS sensors
p 2666 N94-27918
RANGE FINDERS
Flexible range finding applied to 3D surface synthesis: A pseudo-trinocular approach
[ISBN-0-315-84616-X] p 2813 N94-27651
RANGE SAFETY
Advanced silver zinc battery development for the SRB and ET range safety subsystems p 2865 N94-28136
RANGEFINDING
A simulation of GPS and differential GPS sensors
p 2666 N94-27918
RANKINE CYCLE
Limitations of power conversion systems under transient loads and impact on the pulsed tokamak power reactor
[DE94-003404] p 3043 N94-26324
RANKING
Ranking alternatives using fuzzy numbers: A computational approach short communication
[INPE-5483-PRE/1782] p 2974 N94-27835

RAPID QUENCHING (METALLURGY)
Study on solidification of non-homogeneous melting/solidification materials p 2728 N94-25573
RARE EARTH ALLOYS
Magnetostriction and magnetostrictive materials
[VTT-TIED-1434] p 3058 N94-26545
Formation and high mechanical strength of Al-based alloys containing a nanoscale icosahedral phase as a main constituent p 2746 N94-28171
RARE EARTH COMPOUNDS
Preparation, characterization, and thermal behaviour study of lanthanides (3) and yttrium (3) 4-methoxy benzylidene pyruvate in solid state
[DE94-604079] p 3068 N94-27697
Hypersensitive transition spectrum of f-element and coordination structure
[DE94-604133] p 3070 N94-27843
The optical properties of high-T(c) superconductors grown by pulsed laser deposition
[ISBN-0-315-84917-7] p 3039 N94-27962
Anisotropy in the electrical, magnetic and optical properties of Pb2Sr2RCu3O8
[ISBN-0-315-84930-4] p 3070 N94-27974
RARE EARTH ELEMENTS
Qualitative analysis of rare earth elements contained in the phosphogypsum
[DE93-614153] p 2716 N94-26518
Property enchancement of polyimide films by way of the incorporation of lanthanide metal ions
p 2758 N94-27926
RARE GASES
Spectroscopic and vibrational energy transfer studies in molecular bromine
[AD-A273795] p 3014 N94-25875
RAREFACTION
Control jets in interaction with hypersonic rarefied flow
p 2698 N94-28020
RAREFIED GAS DYNAMICS
Modelling of ionisation reactions and of the resulting electric fields in one-dimensional hypersonic shock waves with the direct simulation Monte Carlo method
[IC-AERO-92-01] p 2644 N94-26248
Control jets in interaction with hypersonic rarefied flow
p 2698 N94-28020
RAREFIED GASES
Mix induced by single shock passage through a material interface
[DE93-019505] p 2792 N94-26427
RATINGS
A critical analysis of workload predictions generated by multiple resource theory during early crewstation design
[AD-A274804] p 2941 N94-26339
RATIONAL FUNCTIONS
Chebyshev-Markov rational functions over several intervals
[PB94-125333] p 2998 N94-27116
RATS
Cortical mechanisms of attention, discrimination, and motor response to somesthetic stimuli
[AD-A274163] p 2940 N94-27141
Development of inbred strains from Japanese wild rats (Rattus norvegicus) p 2906 N94-27492
RAWINSONDES
A preliminary method for atmospheric soundings in real time using satellite and ground-based remotely sensed data
[AD-A274381] p 2880 N94-26828
RAY TRACING
Efficient modeling in transversely isotropic inhomogeneous media
[DE94-003394] p 2877 N94-25847
Ionospheric modification by high power, obliquely propagated HF radio wave transmissions. Part 1: Experimental
[AD-A273746] p 2878 N94-26224
Dynamic and kinematic P wave tracing for a three-dimensional elastic inhomogeneous media by the asymptotic ray theory and application
[ITN-94-85239] p 2775 N94-27244
RAYLEIGH SCATTERING
Polarizability matrix of layered chiral sphere
[PB94-132834] p 2778 N94-28355
RAYLEIGH WAVES
A preliminary shear velocity model for Central Asia
[AD-A274972] p 2880 N94-26752
Problems in nonlinear acoustics: Rayleigh waves, pulsed sound beams, and waveguides
[AD-A274587] p 3010 N94-26983
RAYLEIGH-RITZ METHOD
Response of structures to impact loads using elastic and plastic analysis
[ISBN-0-315-84647-X] p 2842 N94-27309
REACTING FLOW
Modelling of ionisation reactions and of the resulting electric fields in one-dimensional hypersonic shock waves with the direct simulation Monte Carlo method
[IC-AERO-92-01] p 2644 N94-26248
High resolution measurements of mixing and reaction processes in turbulent flows
[AD-A274970] p 2793 N94-26534
Direct simulation Monte-Carlo of near continuum hypersonic flow with chemical reactions
[DLR-FB-93-01] p 2797 N94-27588
TVD flux-difference split methods for high-speed thermochemical nonequilibrium flows with strong shocks
[UTIAS-350] p 2799 N94-27880
REACTION CONTROL
First experimental assessment of RCS plume-flow field interaction on Hermes leading edge thruster configuration p 2703 N94-28032
REACTION KINETICS
Development and implementation of a scramjet cycle analysis code with a finite-rate-chemistry combustion model for use on a personal computer
[AD-A273834] p 2673 N94-25617
Three methods to measure RH bond energies
[DE94-003795] p 3013 N94-25816
Technique to predict the curing behaviour of unsaturated polyester materials
[PB94-124856] p 2748 N94-25892
Oxygen reduction at a YSZ interface with cathode materials La(1-x)(Ca or Sr)(x)MnO3(1-x)CaMnO3
[DE94-002954] p 3054 N94-26147
The importance of vibrationally excited nitrogen in silicon nitride deposition systems
[AD-A274874] p 2750 N94-26167
Theoretical determination of chemical rate constants using novel time-dependent methods
[NASA-CR-195221] p 2714 N94-26205
Chemical and vibrational nonequilibrium viscous flows: Modelling, internal and external flow applications
[ESA-TT-1274] p 2791 N94-26316
In situ spectroscopic applications to the study of rechargeable lithium batteries
[DE94-003478] p 2782 N94-26328
High resolution measurements of mixing and reaction processes in turbulent flows
[AD-A274970] p 2793 N94-26534
A semiclassical reactive flux method for the calculation of condensed phase activated rate constants
[AD-A274850] p 3020 N94-26562
Design of gasifiers to optimize fuel cell systems
[DE94-000010] p 2856 N94-26581
An investigation of the effect of surface impurities on the adsorption kinetics of hydrogen chemisorbed onto iron
[NASA-CR-195213] p 2716 N94-26643
Mechanistic studies of opto-electronic materials and syntheses using multiple laser and surface diagnostics
[AD-A274528] p 3036 N94-26834
Kinetics of 2-pentadecylaniline polymerizations in monolayers: Relationships between experimental data and a new theoretical model
[AD-A274419] p 2754 N94-27080
Laser probes of natural gas ignition chemistry
[PB94-128345] p 2717 N94-27226
Basic research on natural gas combustion phenomena
[PB94-129046] p 2717 N94-27256
Reactivity of nitrate radical (NO3) toward organic compounds p 2704 N94-27387
Thermogravimetric study of oxidation of a PdCr alloy used for high-temperature sensors
[NASA-TM-106473] p 2741 N94-27426
High temperature grain growth and oxidation of Fe-29Ni-17Co (Kovar (tm)) alloy leads
[DE94-004691] p 3069 N94-27753
Kinetic parameters from thermogravimetric analysis
p 2721 N94-27909
CO2 methanation catalysts prepared from amorphous Ni-valve metal alloys containing platinum group elements
p 2745 N94-28166
REACTION TIME
Endogeneous and exogenous control of visual selection: A review of the literature
[AD-A273761] p 2908 N94-25871
On the development of motor chunks and concurrent processing in a structured continuous keypressing task
[AD-A274153] p 2939 N94-27138
REACTIVITY
In situ spectroscopic applications to the study of rechargeable lithium batteries
[DE94-003478] p 2782 N94-26328
The reactivity of lithium toward non-aqueous solvents of relevance to energy storage applications as studied by surface analytical techniques
[DE94-003483] p 2856 N94-26464
A semiclassical reactive flux method for the calculation of condensed phase activated rate constants
[AD-A274850] p 3020 N94-26562
The coordination and atom transfer chemistry of titanium porphyrin complexes
[DE94-003091] p 2704 N94-26779
Reactivity of nitrate radical (NO3) toward organic compounds p 2704 N94-27387
Observation of stimulated emission from an MBE grown GaN film on sapphire
[DE94-003638] p 3068 N94-27724
REACTOR CORES
A review of carbide fuel corrosion for nuclear thermal propulsion applications
[DE94-003938] p 2699 N94-25613
REACTOR DESIGN
Small low mass advanced PBR's for bi-modal operation
[DE94-003201] p 2699 N94-25798
A robust helium-cooled shield/blanket design for ITER
[DE94-003402] p 3043 N94-26323
Limitations of power conversion systems under transient loads and impact on the pulsed tokamak power reactor
[DE94-003404] p 3043 N94-26324
REACTOR MATERIALS
A review of carbide fuel corrosion for nuclear thermal propulsion applications
[DE94-003938] p 2699 N94-25613
Toroidal plasma beta-FLR limit in a toroidally linked mirror system
[DE94-003119] p 3041 N94-25792
Space-R thermionic space nuclear power system: Design and technology demonstration
[DE94-001890] p 2699 N94-25929
Effect of loading mode on the fracture toughness of a reduced activation ferritic/martensitic stainless steel
[DE94-004290] p 2732 N94-25987
Fusion Energy Advisory Committee: Advice and recommendations to the US Department of Energy in response to the charge letter of September 1, 1992
[DE93-019842] p 3043 N94-26428
Microstructural development in irradiated vanadium alloys
[DE94-004307] p 2737 N94-26556
The effect of Ti conduit on the critical current in (Nb, Ti)3Sn cable-in-conduit conductors
[DE94-701204] p 2788 N94-27817
Experiment and research on materials irradiated by plasma radiation
[DE94-605011] p 2758 N94-27845
REACTOR PHYSICS
Pre-orbital criticality safety for the NEPSTP mission
[DE94-002600] p 3005 N94-26802
REACTOR SAFETY
HDR reactor containment fire modeling with BRI2
[VTT-PUBS-113] p 3031 N94-25621
Preliminary reentry safety assessment of the General Purpose Heat Source module for the Cassini mission: Aerospace Nuclear Safety Program
[DE94-001646] p 2699 N94-25926
Risk perspectives for Topaz 2 flight mission
[DE94-003229] p 2700 N94-25956
Fusion Energy Advisory Committee: Advice and recommendations to the US Department of Energy in response to the charge letter of September 1, 1992
[DE93-019842] p 3043 N94-26428
Mesoscale meteorological measurements characterizing complex flows
[DE94-002359] p 2895 N94-26761
Pre-orbital criticality safety for the NEPSTP mission
[DE94-002600] p 3005 N94-26802
REACTOR TECHNOLOGY
Small low mass advanced PBR's for bi-modal operation
[DE94-003201] p 2699 N94-25798
Experimental and numerical investigation of shock wave propagation through complex geometry, gas continuous, two-phase media
[DE94-001408] p 2791 N94-26121
REAL NUMBERS
Winding numbers in homotopy theory from integers to reals
[DE94-601510] p 2992 N94-26367
REAL TIME OPERATION
Module interconnection frameworks for a real-time spreadsheet
[AD-A273853] p 2956 N94-25588
Distributing functionality in the drift scan camera system
[DE94-003640] p 2809 N94-25599
Characteristics and control response of the TOPAZ 2 reactor system real-time dynamic simulator
[DE94-003788] p 2699 N94-25600
Design of dynamically reconfigurable real-time software using port-based objects
[NASA-CR-195178] p 2958 N94-25777

The use of ASN.1 and XDR for data representation in real-time distributed systems
[AD-A273769] p 2959 N94-25855
Real-time 3-D pose estimation using a high-speed range sensor
[AD-A273873] p 2809 N94-25967
Real-time tracking with a 3D-flow processor array
[DE94-003981] p 2980 N94-25984
Coordinated scheduling for dynamic real-time systems
[NASA-CR-195231] p 3093 N94-26206
Studies of thin-film growth, adsorption, and oxidation by in situ, real-time, and ex situ ion beam analysis
[DE94-002907] p 3055 N94-26275
A multitasking behavioral control system for the Robotic All-Terrain Lunar Exploration Rover (RATLER)
p 2685 N94-26292
NPSNET-4: A real-time, 3D distributed interactive virtual world
[AD-A274942] p 2961 N94-26298
Differential global positioning system for the surface-towed ordnance locating system: Testing, results, and user's guide
[DE94-002980] p 2664 N94-26309
Development of real-time pulse shaping technology in solid-state lasers
[DE93-633438] p 2817 N94-26403
Automated system for gas detectors providing with binary mixtures
[DE93-634192] p 2715 N94-26406
Adaptive path planning in changing environments
[DE94-003269] p 2985 N94-26462
Real-Time Embedded Processing for Space Applications
[ISBN-2-85428-335-X] p 2948 N94-26713
Real time avionics constraints: Silicon solutions
p 2949 N94-26717
Fault tolerant real-time processing system for space use p 2949 N94-26720
A complete version of the Ada tasking coprocessor
p 2950 N94-26721
The Ariane 5 data management system
p 2950 N94-26724
PRONAOS flight software: A real-time application for a balloonborne scientific gondola p 2950 N94-26725
MATRA Marconi Space: The Silex on-board processor and on-board software p 2950 N94-26726
Scheduling tasks with unpredictable timing parameters in hard real-time systems p 2951 N94-26728
Standardize Ada hard real-time services?
p 2951 N94-26729
Ada multiple-programming for hard real time applications in space systems p 2951 N94-26730
Implementing hard real-time systems: A case study
p 2951 N94-26731
Tool for performance analysis and off-line prediction of timing behaviour p 2952 N94-26732
A real-time executive implementing priority inheritance protocols p 2952 N94-26733
Scheduling approaches with Ada
p 2952 N94-26734
Fault-tolerant scheduling in distributed critical real-time systems p 2952 N94-26735
Early real-time performance measurements on the Columbus processor system p 2952 N94-26736
Test of onboard real time applications (LICE (tm))
p 2952 N94-26737
Verification and validation of the on-board software real time requirements p 2953 N94-26739
Formal methods for dependable real-time systems
p 2953 N94-26740
Developing with Ada using HOOD design methodology
p 2953 N94-26741
Use of HOOD coupled to real time monitors
p 2953 N94-26742
Specification performance optimization and executive generation for onboard multiprocessor real time application with SynDEx p 2954 N94-26745
A preliminary method for atmospheric soundings in real time using satellite and ground-based remotely sensed data
[AD-A274381] p 2880 N94-26828
Hard real-time reliable multicast in the DEDOS system
[PB94-126745] p 2966 N94-26920
Interactive control of a parallel simulation from a remote graphics workstation
[AD-A274217] p 2981 N94-27070

RECEIVERS
A current evaluation of the digital beamforming testbed at Rome Laboratory
[AD-A274311] p 3032 N94-26881
A compact 150 GHz SIS receiver cooled by 4 K GM refrigerator
[REPT-36] p 2776 N94-27340
A simulation of GPS and differential GPS sensors
p 2666 N94-27918

RECEPTORS (PHYSIOLOGY)
Annals of the Research Inst. of Environmental Medicine, Nagoya Univ., volume 44
[REPT-44-VOL-44] p 2911 N94-27442
Effect of PGE2 receptor agonists butaprost, M and B 28767 and an antagonist AH 6809 on the BK response of visceral polymodal receptors p 2906 N94-27494
Excitation of cutaneous polymodal receptor induced by sympathetic stimulation in adjuvant-induced arthritis rats
p 2906 N94-27495
Influence of mechanical stimulation on inflammatory edema p 2906 N94-27497
The effect of naloxone on sleeping time in adjuvant arthritic rats p 2906 N94-27498
Effects of capsaicin on freshly dissociated rat dorsal root ganglion cells p 2906 N94-27499
Contribution of muscle spindle afferent activity to transient pause in EMG during voluntary tonic contraction p 2928 N94-27522
Activation by G protein beta gamma subunits of G protein-coupled receptor kinase p 2931 N94-27534
Mechanism for regulation of myocardial contractility by autonomic drugs: Pathophysiological relevance in congestive heart failure p 2931 N94-27536
The polymodal receptor p 2908 N94-27539
The role of beta-adrenoceptor stimulation in the progression of chronic heart failure
p 2932 N94-27541

RECESSION
Air traffic in recession p 2662 N94-28240

RECIRCULATIVE FLUID FLOW
Experiments into the scaling parameters required for exhaust gas ingestion testing of vertical landing aircraft
p 2671 N94-28017
Influence of headwind on hot gas reingestion and consideration of pressure ratio scaling
p 2675 N94-28018
Unsteady aspects of hot gas reingestion and statistical analysis p 2676 N94-28019

RECLAMATION
Freon recovery from nitrogen tetroxide and freon solutions
[PL-TR-92-3051] p 2721 N94-28215

RECONNAISSANCE AIRCRAFT
The design of four hypersonic reconnaissance aircraft
p 2671 N94-25716

RECONSTRUCTION
The renewing of the test section of the NAL transonic wind tunnel. Part 1: Reconstruction of the 1st corner turning vanes and aerodynamic stress measurement
[NAL-TM-651] p 2681 N94-27247

RECRYSTALLIZATION
Influence of grain structure and solute composition on the work hardening behavior of aluminium at cryogenic temperatures
[DE94-003415] p 2733 N94-26087
Study of precipitation and recrystallization in Al alloy 2519 by backscattered electron imaging methods
[AD-A274919] p 2736 N94-26533
Effect of precipitate structure on hot deformation of Al-Mg-Mn alloys
[DE94-004596] p 2741 N94-27622

RECTANGULAR WAVEGUIDES
Computer program for numerical evaluation of the performance of an overmoded TM01 circular to TE10 rectangular waveguide mode converter
[AD-A274548] p 2771 N94-26844

RECTIFICATION
A direct current rectification scheme for microwave space power conversion using traveling wave electron acceleration p 2687 N94-27371

RECURSIVE FUNCTIONS
MIMO recursive least squares control algorithm for the AN/FPN-44A Loran-C transmitter
[AD-A274820] p 2664 N94-26493
Simulation dynamics of a multibody chain: Recursion based on chain modal coordinates
[ISBN-0-315-83555-9] p 2994 N94-26659
Congruence theorem for structured operational semantics with predicates and negative premises
[PB94-126729] p 2966 N94-26970

RED DWARF STARS
In search of Nemesis p 2888 N94-28297

REDUCTION (CHEMISTRY)
Journal of NIRE, volume 2, number 4
[JTN-94-80554] p 2869 N94-28147
Effects of p-chlorophenol on sulfate reduction in marine sediments p 2870 N94-28150
The electrocatalytic oxidation of ethylene and methane, and reduction of oxygen on gas-diffusion electrodes made of amorphous nickel-valve metal-platinum group metal alloys p 2722 N94-28165

REDUNDANCY
New mixed integer algorithm for classification and placement of measurements in process flow networks
[PB94-126752] p 2966 N94-26921
Local performance optimization for a class of redundant eight-degree-of-freedom manipulators
[NASA-TP-3417] p 2989 N94-27773

REDUNDANCY ENCODING
A partitioning and redundancy model for wafer-scale integrated circuits p 2955 N94-27195

REED-SOLOMON CODES
Improved performance of hybrid error control techniques for real-time digital communications over noisy channels
[ISBN-0-315-84281-4] p 2770 N94-26625
On the performance of trellis coded 8PSK with Reed Solomon codes
[ISBN-0-315-84289-X] p 2770 N94-26626
Coded communications with nonideal interleaving
[ITN-94-85235] p 2774 N94-27242

REENTRY
First experimental assessment of RCS plume-flow field interaction on Hermes leading edge thruster configuration p 2703 N94-28032

REENTRY PHYSICS
A survey of uncontrolled satellite reentry and impact prediction
[AD-A274903] p 2695 N94-26750

REENTRY TRAJECTORIES
A survey of uncontrolled satellite reentry and impact prediction
[AD-A274903] p 2695 N94-26750

REENTRY VEHICLES
Chemical and vibrational nonequilibrium viscous flows: Modelling, internal and external flow applications
[ESA-TT-1274] p 2791 N94-26316

REFINING
Bulletin of the Institute for Chemical Reaction Science, Tohoku University, volume 2
[JTN-94-80602] p 2717 N94-27385
Development of liquid membrane separation processes p 2717 N94-27386

REFLECTANCE
Neutron reflection interferometry
[DE94-601876] p 2714 N94-26170
Sulfur dioxide in the atmosphere of Venus 1 sounding rocket observations
[NASA-CR-195224] p 3106 N94-26237
Sound, speed, reflectivity, absorption, and thermal diffusivity measurements in Arctic ice in 1990
[AD-A274326] p 2899 N94-26886
Discrete vacuum ultra violet reflective interference filter
[AD-D016059] p 2756 N94-27675
Reflectometer employing an integrating sphere and lens-mirror concentrator
[AD-D016061] p 3039 N94-27676

REFLECTED WAVES
Neutron reflection interferometry
[DE94-601876] p 2714 N94-26170
Mix induced by single shock passage through a material interface
[DE93-019505] p 2792 N94-26427

REFLECTION
Development and evaluation of a near infrared reflecting and low visibility paint scheme for RAAF P-3C Orion aircraft
[AD-A274881] p 2669 N94-26864
Experimental and theoretical investigation of RF absorption and reflection from preformed plasmas
[AD-A274189] p 3046 N94-27098
Discrete vacuum ultra violet reflective interference filter
[AD-D016059] p 2756 N94-27675

REFLECTOMETERS
In situ x ray reflectivity measurements of thin film structural evolution
[DE94-002289] p 3051 N94-25944
Surface physics with cold and thermal neutron reflectometry
[DE94-001447] p 2733 N94-26070
Time domain reflectometry for measuring bulk soil electrical conductivity and comparison with the Em38 instrument
[PB94-125432] p 2881 N94-27052
Reflectometer employing an integrating sphere and lens-mirror concentrator
[AD-D016061] p 3039 N94-27676

REFLECTOR ANTENNAS
Effective conductivity of wire mesh reflectors for space deployable antenna systems
[NASA-CR-191605] p 2788 N94-27770

REFLECTORS
Surface physics with cold and thermal neutron reflectometry
[DE94-001447] p 2733 N94-26070
Joint services electronics program
[AD-A274643] p 2785 N94-27027

REFLEXES
Muscle sympathetic nerve activity in humans
p 2932 N94-27538

REFORESTATION
Woody biomass density in the Tendelti area of the central Sudan p 2850 N94-27185
REFRACTION
Long Duration Exposure Facility space optics handbook
[AD-A274831] p 3035 N94-26572
Wave propagation in the shallow regions of the earth's crust and the borehole vicinity
[ITN-94-85237] p 2882 N94-27330
Optical parametric oscillator modeling with diffraction, depletion, and double refraction
[DE94-001504] p 3040 N94-27999
REFRACTIVITY
Microtubules for nonlinear optical limiting
[AD-A273940] p 3035 N94-25941
Peculiarities and application perspectives of metal-ion implants in glasses
[DE94-004671] p 3035 N94-26246
Radar detection of low-altitude targets in a maritime environment. Volume 2: Meteorological and radar data
[AD-A274658] p 2768 N94-26335
Modelling atmospheric turbulence effects on ground-based telescope systems
[DE94-004211] p 3102 N94-26528
Refractive and dielectric properties of helium, argon and nitrogen gases
[PB94-123783] p 3008 N94-26851
Optical characterization and guided wave loss measurements for end-capped 6F-polybenzoxazole
[AD-A274586] p 3036 N94-26982
Research and development within nonlinear optics for protection of optical sensors against laser irradiation on of optical sensors against laser irradiation. Quarterannual report 1 (april 1993))
[PB94-124245] p 3037 N94-27046
Theoretical and experimental analysis of the spatial and temporal behaviour of the intensity of an electro-magnetic wave reflected from a diffuse target after passing through a turbulent atmosphere
[ITN-94-85230] p 2774 N94-27234
Ion implantation in silicate glasses
[DE94-003785] p 2757 N94-27726
REFRACTORY MATERIALS
Computer modelling of cyclic deformation of high-temperature materials
[AD-A273852] p 2704 N94-25608
Optical characterization and guided wave loss measurements for end-capped 6F-polybenzoxazole
[AD-A274586] p 3036 N94-26982
Computer modelling of cyclic deformation of high-temperature materials
[AD-A274504] p 2840 N94-27034
High temperature sensor/microphone development for active noise control
[NASA-CR-195214] p 2812 N94-27214
Fibrous emissive burners selective and broad band
[PB94-128329] p 2859 N94-27225
REFRACTORY METALS
Growth, characterization and device development in monocrystalline diamond films
[AD-A274245] p 3060 N94-26839
List of papers published by the members of Institute for Materials Research, Tohoku University 1992
[JTN-94-80608] p 3118 N94-27355
REFRIGERANTS
Measurement of viscosity, density, and gas solubility of refrigerant blends in selected synthetic lubricants
[DE94-003609] p 2713 N94-25934
Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparison and verification of methods
[DE94-003664] p 2749 N94-26007
Thermophysical properties of HFC-143a and HFC-152a
[DE94-004236] p 2719 N94-27567
Compatibility of refrigerants and lubricants with engineering plastics
[DE94-004959] p 2756 N94-27692
Thermophysical properties of refrigerant R-134a (1,1,1,2-tetrafluoroethane)
[ESDU-93001] p 2720 N94-27959
Solubility, viscosity, and density of refrigerant/lubricant mixtures
[DE94-004237] p 2721 N94-28069
REFRIGERATING
Evaluation of high temperature superconductive thermal bridges for space-borne cryogenic infrared detectors
p 2815 N94-27921
REFRIGERATORS
A compact 150 GHz SIS receiver cooled by 4 K GM refrigerator
[REPT-36] p 2776 N94-27340
REFUELING
High-speed repetitive pellet injector for plasma fueling of magnetic confinement fusion devices
[DE94-002792] p 3042 N94-26140
Application of railgun principle to high-velocity hydrogen pellet injection for magnetic fusion reactor fueling
[DE94-004411] p 3044 N94-26579
REGENERATION (PHYSIOLOGY)
Bioregenerative system components for microgravity
p 2903 N94-25673
REGENERATIVE COOLING
Experimental analysis of heat transfer characteristics and pressure drop through screen regenerative heat exchangers
[AD-A273902] p 2790 N94-25657
REGIONAL PLANNING
The advantages of the location Germany must not be jeopardized in air traffic p 2661 N94-28236
REGIONS
Image segmentation by a combination of edge detection and region growing
[ETN-94-95032] p 2960 N94-26106
REGRESSION ANALYSIS
Parameter estimation for ARMA models with infinite variance innovations
[AD-A274654] p 3003 N94-26355
Three dimensional object recognition using a complex autoregressive model
[AD-A274388] p 2995 N94-26829
The Hough transform algorithm for sea ice lead analysis: An evaluation
[AD-A274535] p 2899 N94-26853
Multiple weight stepwise regression
[DE94-001602] p 3000 N94-27564
REGULATIONS
Coastal Zone Management Act and related legislation, revision 3
[DE94-004180] p 2869 N94-27691
Technical Report of National Research Institute of Fisheries Engineering: Fishing Boat and Instrument, No. 12
[JTN-94-80595] p 2764 N94-27976
Recent trend of domestic and international regulations on intact stability of ships for safety
p 2764 N94-27977
Journal of NIRE, volume 2, number 4
[JTN-94-80554] p 2869 N94-28147
Recent legal movement on water quality regulation in Japan p 2869 N94-28148
Lufthansa Yearbook 1992
[DSK-9734-H-92] p 2660 N94-28230
The single European market and air traffic chances and risks p 2660 N94-28231
Air traffic of the European Community with European neighbors p 2661 N94-28233
Air traffic administration enroute to Europe
p 2661 N94-28238
REGULATORY MECHANISMS (BIOLOGY)
Thyroid hormone action in cultured human skin fibroblasts: Evaluation using spheroid culture
p 2919 N94-27478
REINFORCED PLASTICS
Continuous fiber reinforced thermoplastic composites: Literature survey
[VTT-TIED-1422] p 2704 N94-25651
Design and life-time of polymer matrix composite structures: Summary
[VTT-TIED-1415] p 2707 N94-26260
REINFORCED PLATES
Super finite elements for nonlinear static and dynamic analysis of stiffened plate structures
[ISBN-0-315-63903-2] p 2844 N94-27808
REINFORCEMENT (STRUCTURES)
Investigation of the bond strength of a discrete skin-stiffener interface
[NLR-TP-92183-U] p 2670 N94-27796
REINFORCING FIBERS
Inner fiber observation for metal matrix composites under the stress load condition utilizing Synchrotron Orbital Radiation (SR) by X-ray CT p 2724 N94-25553
Continuous fiber reinforced thermoplastic composites: Literature survey
[VTT-TIED-1422] p 2704 N94-25651
Characterization of fatigue damage in a metal matrix composite (SCS-6/Ti-15-3) at elevated temperature
[AD-A273797] p 2706 N94-25876
High performance fibers
[AD-A274693] p 2707 N94-26450
Investigation of forced and isothermal chemical vapor infiltrated SiC/SiC ceramic matrix composites
[DE94-004544] p 2708 N94-26557
RELATIVISTIC EFFECTS
Rydberg states in multiply charged ions
[DE94-002335] p 3021 N94-26760
Decay constants of heavy mesons in the relativistic potential model with velocity dependent corrections
[DE94-606495] p 3030 N94-27860
RELATIVISTIC ELECTRON BEAMS
On a theory of two-beam mechanisms of charged particle acceleration in electrodynamic structures
[DE94-003482] p 3032 N94-26330
Implementation of a compact magnetic electron energy spectrometer for intense relativistic electron beams
[AD-A274451] p 3033 N94-27082
Computer simulations of radiation generation from relativistic electron beams
[AD-A274139] p 3024 N94-27133
Fast H-alpha line broadening during the 100 ns REB injection into a plasma
[IPPCZ-322] p 3048 N94-27836
RELATIVISTIC PARTICLES
Weak interactions in a bilocal chiral theory
[DE93-613097] p 3013 N94-25836
Relativistic heavy ion physics
[DE94-003161] p 3031 N94-26097
Spinor and isospinor structure of relativistic particle propagators
[DE94-601552] p 3019 N94-26424
Spin from isospin: The model of superparticle in a non-Grassmannian approach
[DE93-634341] p 3019 N94-26454
Investigation of plasma instabilities in the polar cusp
[NASA-CR-195212] p 2879 N94-26599
Computer simulations of radiation generation from relativistic electron beams
[AD-A274139] p 3024 N94-27133
Stopping powers and cross sections due to two-photon processes in relativistic nucleus-nucleus collisions
[NASA-CR-4574] p 3033 N94-27646
On the model of the relativistic particle with curvature and torsion
[DE94-606330] p 3029 N94-27848
Correlations in inelastic collisions of relativistic nuclei with emulsion at (4.1 - 4.5) A GeV/c
[DE93-634526] p 3030 N94-27994
RELATIVISTIC PLASMAS
Back-reaction beyond the mean field approximation
[DE94-003936] p 3012 N94-25612
Nonlinear transverse propagation of photons in a ultrarelativistically hot and magnetized electron-positron plasma: Coupling of Langmuir and electromagnetic solitons
[DE94-603667] p 3046 N94-27630
RELATIVISTIC THEORY
Dynamical group of relativistic straight-line string
[DE93-634347] p 3072 N94-26037
Gravitational field of a point mass in the Lobachevskij space
[DE93-634333] p 3072 N94-26503
RELATIVITY
Quark-antiquark bound states
[DE93-613054] p 3013 N94-25826
The gravity equations in the Lobachevskij space
[DE93-634334] p 2879 N94-26504
A relativistic quark model
[ISBN-0-315-60926-5] p 3025 N94-27333
RELAXATION METHOD (MATHEMATICS)
One machine scheduling with delayed precedence constraints
[PB93-237626] p 3094 N94-26314
RELIABILITY
On the reliability of a window least squares algorithm
[DE93-634666] p 2962 N94-26386
Practical problems in aggregating expert opinions
[DE94-002623] p 3094 N94-27707
Silicon device performance measurements to support temperature range enhancement
[NASA-CR-195265] p 2844 N94-27824
Comparative analysis of different configurations of PLC-based safety systems from reliability point of view
p 2836 N94-27925
Controls, monitoring and performance measurements
p 2831 N94-28086
Summary of NASA Aerospace Flight Battery Systems Program activities p 2860 N94-28101
SAFT nickel hydrogen cell cycling status
p 2861 N94-28110
RELIABILITY ANALYSIS
Calculation of a 3-D pose of a known object in a single perspective view
[VTT-PUBS-122] p 2957 N94-25642
An approach to studying the reliability of microgravity experiments
[NASA-TM-106489] p 2834 N94-26199
Simulation modeling for long duration spacecraft control systems p 2684 N94-26288
Modeling systems by probabilistic process algebra: An event structures approach
[PB94-125259] p 3004 N94-26867

Baseline for a Nordtest method. Reliability stress screening of components. A guide for component users [PB94-123775] p 2835 N94-27042
Access to space study [NASA-TM-109693] p 2685 N94-27151
Hardware and software reliability estimation using simulations [NASA-CR-187588] p 2973 N94-27663

RELIABILITY ENGINEERING
The 1991-1992 walking robot design p 2833 N94-25686
Hierarchical test development and design-for-testability for (a)synchronous semi-custom ASIC's [ISBN-9-09-005928-8] p 2834 N94-26003
Development of a MIL-STD-1750 microprocessor system for space applications p 2949 N94-26715

RELIEF MAPS
Geometric correction of SPOT images with use of digital elevation models [ETN-94-95033] p 2847 N94-26107
Optimization of Vector Product Format (VPF) data for map background display in army tactical systems [AD-A274687] p 2848 N94-26446
Multivariate spectral analysis to extract materials from multispectral data [AD-A274142] p 2709 N94-27135

REMOTE CONTROL
An artificial reality environment for remote factory control and monitoring p 2687 N94-27369
Telescience testbedding for physiological experiments under hypobaric hypoxic conditions p 2913 N94-27449
Telescience testbedding under hypobaric hypoxic conditions: Evaluation by operation ability and recognition ability p 2913 N94-27450
Telescience testbedding for physiological experiments under hypobaric hypoxic conditions: Development and evaluation in CNV measuring p 2913 N94-27451
Telecommand decoder specification [ESA-PSS-04-151-ISSUE-1] p 2693 N94-27583

REMOTE HANDLING
Telescience testbedding under hypobaric hypoxic conditions: Evaluation by operation ability and recognition ability p 2913 N94-27450
Telescience testbedding for physiological experiments under hypobaric hypoxic conditions: Development and evaluation in CNV measuring p 2913 N94-27451

REMOTE MANIPULATOR SYSTEM
Direct model reference adaptive control of robotic arms p 2683 N94-26282
Berthing of Space Station Freedom using the shuttle remote manipulator system p 2684 N94-26284
Status report of RMS active damping augmentation p 2684 N94-26285

REMOTE SENSING
The potential for the Department of Defense to use space-based remote sensing to support DOD and other government agencies' environmental programs [AD-A273895] p 2847 N94-25656
Real-time 3-D pose estimation using a high-speed range sensor [AD-A273873] p 2809 N94-25967
Zernike moments and rotation invariant object recognition. A neural network oriented case study [AD-A273749] p 2767 N94-26011
Remote sensing and GIS for the management and investigation of the Wadden Sea [BCRS-92-20] p 2847 N94-26228
Remote Earth Sciences data collection using ACTS [NASA-CR-195227] p 2848 N94-26236
Application of Space Shuttle Project Hercules imagery in the investigation of ship cloud tracks [AD-A274923] p 2692 N94-26529
Mapping coastal habitats using an imaging spectrometer [ISBN-0-315-84362-4] p 2848 N94-26664
An evaluation of an airborne remote sensing system used to determine ice thickness and geometry of a first year sea ice ridge located in the Beaufort Sea [ISBN-0-315-84383-7] p 2849 N94-26667
ARM Fourier transform spectrometer data analysis tools [DE94-000865] p 2895 N94-26697
Digital filter design for sensor simulation: Application to the Brazilian remote sensing satellite [INPE-5523-RPQ/665] p 2849 N94-26827
A preliminary method for atmospheric soundings in real time using satellite and ground-based remotely sensed data [AD-A274381] p 2880 N94-26828
The Hough transform algorithm for sea ice lead analysis: An evaluation [AD-A274535] p 2899 N94-26853
Leadex environmental phenomena and effects observed by DMSP, NOAA, and ERS-1 satellites [AD-A274596] p 2868 N94-26888
Assessment of tropical forests using satellite data [SILVA-CARELICA-21] p 2850 N94-27182
Global tropical forest cover assessments using satellite imagery p 2850 N94-27183
Training on assessment and mapping of deforestation: WFW conference, Brazil [INPE-5482-PRE/1781] p 2850 N94-27384
Global change research related to the Earth's energy and hydrologic cycle [NASA-CR-195270] p 2869 N94-27430
Calibration of SAR systems [DLR-FB-93-18] p 2777 N94-27738
Remote sensing of global snowpack energy and mass balance: In-situ measurements on the snow of interior and Arctic Alaska [NASA-CR-195704] p 2851 N94-27787
Multispectral and textural classifications of a SPOT HRV-1 image, region of Sherbrooke, Quebec, Canada [ISBN-0-315-84978-9] p 2851 N94-27863
Fractals and their applications to remote sensing and digital mapping [ISBN-0-315-59469-1] p 2852 N94-27870
Mapping of soil humidity using C-band radar images [ISBN-0-315-85076-0] p 2852 N94-27878
In situ Mars ozone detector p 3108 N94-27892
Role of remote sensing in energy, water, and carbon cycle studies over the Amazon [INPE-5486-PRE/1786] p 2852 N94-27957
Landscape dynamics of northeastern forests [NASA-CR-195272] p 2852 N94-28070
MODIS airborne simulator visible and near-infrared calibration, 1991 FIRE-Cirrus field experiment. Calibration version: FIRE King 1.1 [NASA-TM-104600] p 2897 N94-28182
Persistence of auroral electron flux events from DMSP/F9 electron measurements [RXR-92012] p 2887 N94-28206
A comparative study of SAR data compression schemes p 2946 N94-28259
Asia-Pacific Seminar on Global Change Research Cooperation [JTN-94-80517] p 2871 N94-28268
Role and activity of STA on Asian Pacific regional cooperation p 2853 N94-28269
Cooperative research projects on satellite remote sensing for the hydrological subjects p 2853 N94-28270
Research activities on the meteorology over the Asia-Pacific region p 2853 N94-28271
An oceanographical observation in the Western Pacific and international cooperations p 2872 N94-28272
NASDA contribution plan to Asian countries p 2853 N94-28273
Activities of Remote Sensing Technology Center of Japan (RESTEC) p 2853 N94-28274
Global concern on research cooperation for environment p 2872 N94-28275
Progress in the study of global change in China p 2873 N94-28276
Research and observation programmes on global changes in Indonesia p 2873 N94-28277
Country report on global change research for the Republic of Korea p 2873 N94-28278
Philippine thrust on environmental research relating to global change p 2873 N94-28279
Study on environment monitoring over whole China using NDVI from AVHRR data and future project p 2875 N94-28289
Utilization of remote sensing data for global climate change research in Malaysia p 2875 N94-28290
Thailand satellite ground receiving station in global change research cooperation p 2875 N94-28291
Utilization of remote sensing data for global change research p 2875 N94-28292
Contribution of satellite observation to global change research p 2876 N94-28293
Laboratory of Space Technology [PB94-133204] p 2689 N94-28358

REMOTE SENSORS
An analysis of multiple sensor system payloads for unmanned aerial vehicles [AD-A274905] p 2667 N94-26182

REMOTELY PILOTED VEHICLES
Design study to simulate the development of a commercial freight transportation system p 2671 N94-25715
Solar powered multipurpose remotely powered aircraft p 2671 N94-25719
An analysis of multiple sensor system payloads for unmanned aerial vehicles [AD-A274905] p 2667 N94-26182

RENORMALIZATION GROUP METHODS
Performance of renormalization group algebraic turbulence model on boundary layer transition simulation [NASA-CR-194466] p 2644 N94-26131
Differential regularization of a non-relativistic anyon model [DE94-601558] p 3019 N94-26416
On kinetic expansion in scalar field theory [DE93-634338] p 3072 N94-26553
Limit theorems for functionals of Markov processes and renormalizable stable fields [AD-A274645] p 3004 N94-27106
Operator regularization and renormalization theory [ISBN-0-315-49334-8] p 3007 N94-27264

REPETITION
Effects of repeating resistance testing on firing ability of igniter EP360-3 [AD-A274814] p 2759 N94-26486

REPRODUCTION (BIOLOGY)
Cloning of rat RXR alpha cDNA and the expression of its mRNA in regenerating liver and primary cultured hepatocytes p 2905 N94-27479
Cloning of a novel POU family gene by RT-PCR method p 2905 N94-27480
Expression analysis of Thyroxine-Binding Globulin Complete Deficiency in Japanese (TBG-CDJ) p 2905 N94-27482
Electron microscopic analysis of meiotic chromosome pairing in male house musk shrew, Suncus murinus p 2906 N94-27493

REQUIREMENTS
CRC customer versus rater octane number requirement program (1990) [AD-A273997] p 2758 N94-25901
Computing in space: Issues and answers p 2948 N94-26714
High performance flight computer developed for deep space applications p 2949 N94-26718
MATRA Marconi Space: The Silex on-board processor and on-board software p 2950 N94-26726
Verification and validation of the on-board software real time requirements p 2953 N94-26739
Steam plant: Steam turbines for combined cycles p 2831 N94-28085

RESEARCH
Proceedings of the symposium on current concepts and approaches on animal test alternatives [AD-A273926] p 2900 N94-25593
Highlights 1993 --- Lawrence Berkeley Laboratory [DE94-002270] p 3118 N94-26937
Microbiology research at some research institutes in the former Soviet Union: A survey of scientific publications [PB94-123320] p 2902 N94-27171
Data analysis and data fusion for intelligence analysis and decision support. Research plan 1993-2000 [PB94-123569] p 3005 N94-27173
The 1993 NASA-ODU American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program [NASA-CR-191544] p 3085 N94-27893
Science beyond the atmosphere: The history of space research in Europe [ESA-HSR-SPECIAL] p 2689 N94-28207
Atmospheric science research in Malaysia: Perspectives on international cooperation p 2874 N94-28285
Laboratory of Space Technology [PB94-133204] p 2689 N94-28358

RESEARCH AIRCRAFT
Multiple model adaptive estimation applied to the LAMBDA URV for failure detection and identification [AD-A274078] p 3002 N94-25992
Description of the Experimental Avionics Systems Integration Laboratory (EASILY) [NASA-TM-109072] p 2681 N94-27425

RESEARCH AND DEVELOPMENT
Technical and scientific research for aeronautics and astronautics [ETN-94-95392] p 2641 N94-26212
Technology development in space projects [VTT-TIED-1438] p 2682 N94-26249
Preparation and characterization of high temperature superconductor film surfaces [AD-A274293] p 3059 N94-26681
Ferrite phase shifters using stress insensitive materials [AD-A274639] p 2708 N94-26895
Frontiers of science and measurement: Report on a seminar jointly organized by the National Physical Laboratory and the Institute of Physics [PB94-124310] p 3009 N94-27131
Robotics handbook. Version 1: For the interested party and professional [NASA-TM-109690] p 2824 N94-27238
Basic research on natural gas combustion phenomena [PB94-129046] p 2717 N94-27256
How to make good use of international research collaboration, with emphasis on the evolving situation in Europe [PB94-119690] p 3101 N94-27323

Vision 21: Interdisciplinary Science and Engineering in the Era of Cyberspace
[NASA-CP-10129] p 2685 N94-27358
Small business innovation research program solicitation
[NASA-TM-109695] p 3094 N94-27661
NASA SBIR abstracts of 1992, phase 1 projects
[NASA-TM-109694] p 3094 N94-27772
The 1993 Federal Aviation Administration plan for research, engineering and development
p 2643 N94-27960
Research and Development Annual Report, 1992
[NASA-TM-104777] p 3119 N94-27993
Development of the gas turbine. Part 1: Design philosophy and performance p 2831 N94-28080
Development of the gas turbine. Part 2: Manufacturing, commissioning, and operation p 2831 N94-28081
Selected data on Federal support to universities and colleges: FY 1991
[NSF-93-320] p 3101 N94-28201
Visit to CERMA: Centre d'Etudes et de Recherches de Medecine Aerospatiale, Centre for Studies and Research in Aviation and Space Medicine, Bretigny sur Orge, France, November 16-18, 1992
[PB94-132990] p 2937 N94-28392

RESEARCH FACILITIES
Technical and scientific research for aeronautics and astronautics
[ETN-94-95392] p 2641 N94-26212
Research and test facilities
[NASA-TM-109685] p 2681 N94-26684
Selected data on Federal support to universities and colleges: FY 1991
[NSF-93-320] p 3101 N94-28201
JSC almanac
[NASA-TM-109702] p 3119 N94-28204

RESEARCH MANAGEMENT
Joint services electronics program
[AD-A274692] p 2783 N94-26449
Joint services electronics program
[AD-A274643] p 2785 N94-27027
Frontiers of science and measurement: Report on a seminar jointly organized by the National Physical Laboratory and the Institute of Physics
[PB94-124310] p 3009 N94-27131
NCVS, volume 5
[AD-A274975] p 2902 N94-27165
How to make good use of international research collaboration, with emphasis on the evolving situation in Europe
[PB94-119690] p 3101 N94-27323

RESEARCH PROJECTS
FAA/NASA Joint University Program for Air Transportation Research, 1992-1993
[NASA-CP-3246] p 2641 N94-27284
University program management information system, FY 1993
[NASA-TM-109719] p 3100 N94-27413
NASA SBIR abstracts of 1992, phase 1 projects
[NASA-TM-109694] p 3094 N94-27772
Global concern on research cooperation for environment p 2872 N94-28275

RESEARCH VEHICLES
Design of a flight controller for an unmanned research vehicle with control surface failures using quantitative feedback theory
[AD-A274049] p 2677 N94-25833
Multiple model adaptive estimation applied to the LAMBDA URV for failure detection and identification
[AD-A274078] p 3002 N94-25992
Prediction of leading-edge transition and relaminarization phenomena on a subsonic multi-element high-lift system p 2659 N94-27929

RESIDUAL STRESS
Study on film generation phenomena by particle deposition p 2728 N94-25575
The fracture behavior of a CVD crystalline Si3N4/amorphous Si3N4 composite
[DE94-002646] p 2750 N94-26124
Grain by grain study of the mechanisms of crack propagation during iodine SCC of Zry-4
[DE93-633765] p 2734 N94-26162
High intensity x ray instrumentation for residual strain measurements in composites and textured materials
[ISBN-0-315-85169-4] p 2842 N94-27278
Implementation of thermal residual stresses in the analysis of fiber bridged matrix crack growth in titanium matrix composites
[NASA-TM-109082] p 2711 N94-27658

RESIN MATRIX COMPOSITES
A study of graphite peek composite with central elliptical holes under tension
[AD-A273779] p 2705 N94-25863
Thermoplastic or thermosetting composites in aircrafts
[PB94-123809] p 2710 N94-27253

RESISTANCE HEATING
Modelling and control of plasma position in the STOR-M tokamak
[ISBN-0-315-58891-8] p 3049 N94-27949

RESONANCE
Stochastic resonance in a periodic potential system under a constant force
[DE93-616817] p 3008 N94-25831
Kinetic resonance damping rate of the toroidal ion temperature gradient mode
[DE94-003511] p 3041 N94-25923
Meson X(1814) as a candidate for a hybrid state
[DE93-634447] p 3017 N94-26045
Signatures for hybrids
[DE94-004244] p 3020 N94-26574
Pion-nucleus interactions and the STAR experiment at RHIC
[DE94-000658] p 3021 N94-26586
Bifurcation sequences at 1:4 resonance: An inventory
[PB94-125408] p 2997 N94-27028
Geometrical resonances in the nyquist noise spectrum for ballistic conductors
[DE94-603668] p 3027 N94-27631

RESONANT FREQUENCIES
Characterization of acoustic effects on flame structures by beam deflection technique
[DE94-003240] p 2714 N94-26122
Parameter estimation by genetic algorithms
[DE94-002924] p 2961 N94-26146
Shake test results of the MDHC test stand in the 40- by 80-foot wind tunnel
[NASA-TM-108801] p 2641 N94-26596
Practical design of resonant cavity for a RF free electron laser
[AD-A274306] p 2819 N94-26941
Extraction of modal parameters from an operating HAWT using the Natural Excitation Technique (NExT)
[DE94-001831] p 2859 N94-27004
Influence of impeller shroud forces on turbopump rotor dynamics p 2796 N94-27378
Effective conductivity of wire mesh reflectors for space deployable antenna systems
[NASA-CR-191605] p 2788 N94-27770
Parameter estimation of linear systems from frequency response measurements (computer program)
[ESDU-93016] p 2976 N94-28137
Acoustic bubble sizing, using active and passive techniques to compare ambient and entrained populations
[ISVR-TR-229] p 2807 N94-28172

RESONATORS
Effective conductivity of wire mesh reflectors for space deployable antenna systems
[NASA-CR-191605] p 2788 N94-27770

RESOURCES MANAGEMENT
Environmental benefits of different types of heat pumps, available and expected
[DE94-002440] p 2866 N94-26123
Coordinated scheduling for dynamic real-time systems
[NASA-CR-195231] p 3093 N94-26206
ADP Analysis project for the Human Resources Management Division p 2978 N94-27927
HDGEC activity in Asia Pacific region
p 2874 N94-28286

RESPIRATION
Interaction between endogenous opioid and Cholecystokinin (CCK) in modulating respiratory responses induced by thin-fiber muscular afferents
p 2906 N94-27502

RESPIRATORY RATE
Interaction between endogenous opioid and Cholecystokinin (CCK) in modulating respiratory responses induced by thin-fiber muscular afferents
p 2906 N94-27502

RESPIRATORY SYSTEM
Aeromedical issues related to positive pressure breathing for +Gz protection
[AD-A274717] p 2910 N94-26435

RESPONSE TIME (COMPUTERS)
Query optimization strategies for browsing sessions
[CWI-CS-R9268] p 3100 N94-27394

REST
Thermoregulatory effects of caffeine ingestion during rest and exercise in men
[NASA-TM-108783] p 2901 N94-26210

RETINENE
Inductive differentiation of nerve cells in mouse embryonic ectoderm at early primitive streak stage by retinoic acid p 2905 N94-27488
Anorectal malformations induced by intraperitoneal injection of all-trans retinoic acid in suncus
p 2905 N94-27489

RETURN TO EARTH SPACE FLIGHT
Assured crew return vehicle post landing configuration design and test p 2697 N94-25671

REVERSE ENGINEERING
Information systems criteria for applying software reengineering: Guidelines for identifying information systems for software reengineering
[AD-A274699] p 3097 N94-26375
Spiral Survey Expedition: A proposal to organize for the Survey, exploration and eventual colonization of the Milky Way Galaxy p 2686 N94-27366

REVERSE FIELD PINCH
Measurement of magnetic fluctuation induced energy transport
[DE94-003846] p 3042 N94-26132
Scaling of sustained ZT-40 M reversed field pinches
[DE94-003318] p 3043 N94-26321
Researches of the Electrotechnical Laboratory. No. 51: Study of formation and sustainment of reversed field pinch by slow control of magnetic field
[JTN-94-80548] p 3046 N94-27350

REVERSING
Eye-head coordination and swinging of the visual scene when wearing visually up-down reversing mirror for 14 days p 2915 N94-27462

REYNOLDS NUMBER
Wake passage effects on the losses in a linear turbine cascade
[AD-A273794] p 2790 N94-25874
Nominally 2-dimensional flow about a normal flat plate
[AD-A274472] p 2794 N94-27026
The cryogenic tunnel Cologne at DLR
[DLR-MITT-93-10] p 2681 N94-27587
A parallel multigrid algorithm for solving the Navier-Stokes equations on a transputer system
[PREPRINT-699] p 2807 N94-28099
Forced convection heat transfer in straight tubes. Part 2: Laminar and transitional flow
[ESDU-93018-PT-2] p 2807 N94-28139

REYNOLDS STRESS
Shear flow generation from the interaction of neoclassical and drift wave transport processes
[DE94-003135] p 2791 N94-26096
Potential capabilities of Reynolds stress turbulence model in the COMMIX-RSM code
[DE94-003716] p 2792 N94-26331
On prediction of equilibrium states in homogeneous compressible turbulence
[NASA-CR-4570] p 2792 N94-26467
A rapid-pressure correlation representation consistent with the Taylor-Proudman theorem materially-frame-indifferent in the 2D limit
[NASA-CR-191591] p 2796 N94-27435
Calculation of single and multiple jets in cross-flow with and without impingement using Reynolds-stress-transport closure p 2803 N94-28024

RHENIUM ALLOYS
Toward insulating quasicrystalline alloy in Al-Pd-Re icosahedral phase
[REPT-A-2666] p 2736 N94-26477

RHEOLOGY
Nonlinear hysteresis in an endochronic solid
[AD-A274594] p 2880 N94-26855
Synthesis, rheology, and forming of Y-Ba-Cu-O ceramics
[DE94-005558] p 2757 N94-27695

RHO-MESONS
Omega omega and rho+ rho- production in two photon interactions at ARGUS
[ISBN-0-315-63748-X] p 3026 N94-27399

RHODIUM
Polymer-bound rhodium hydroformylation catalysts
[ETN-94-95388] p 2712 N94-25747
A mimic model of Pt-Rh catalyst prepared by electrochemical deposition of Rh on Pt (100) surface
[REPT-A-2664] p 2715 N94-26476

RIBONUCLEIC ACIDS
Molecular biological studies on the human radioresistance and drug resistance
[DE93-632682] p 2910 N94-26549
Cloning of a novel POU family gene by RT-PCR method p 2905 N94-27480
Effect of sera from patients treated with long-term hemodialysis on mRNA's for collagenase, stromelysin, and tissue inhibitor of metalloprotease in cultured human synovial cells p 2920 N94-27481

RIBS (SUPPORTS)
Orbit transfer rocket engine technology program enhanced heat transfer combustor technology
[NASA-CR-189236] p 2700 N94-26156

RICCATI EQUATION
Necessary and sufficient conditions for the existence of the stabilizing solution of the Riccati equation in a Hilbert space: A Popov function approach
[PB94-125341] p 2997 N94-26999

RICHARDSON NUMBER
Nominally 2-dimensional flow about a normal flat plate
[AD-A274472] p 2794 N94-27026

RIDING QUALITY
Examples of flight path optimisation using a multivariate gradient-search method
[ESDU-93021] p 2670 N94-28092
Lufthansa long range services: More simplicity
p 2663 N94-28246

RIEMANN MANIFOLD
On the first integrals of geodesics
[DE93-612974] p 3007 N94-25603
A note on Riemannian 2-space
[DE94-602560] p 3073 N94-27024
Approximate Riemann solvers: Improvement of the HLLEM scheme and its generalization for chemically reacting flows
[NAL-TR-1189] p 2795 N94-27205
The Einstein tensor characterizing some Riemann spaces
[DE94-603663] p 3074 N94-27626
The super Weierstrass (zeta)-function and operator product expansions in 2D-induced supergravity on the supertorus
[DE94-603664] p 3074 N94-27627
Proton electromagnetic form factor near the proton-antiproton threshold and quasinuclear bound state
[DE94-606458] p 3027 N94-27681

RIEMANN WAVES
Approximate Riemann solvers: Improvement of the HLLEM scheme and its generalization for chemically reacting flows
[NAL-TR-1189] p 2795 N94-27205

RIGID STRUCTURES
A comparison of three approximate mathematical models for the gravity gradient stabilized satellite
[AD-A273832] p 2694 N94-25615
Balancing of a planar bouncing object
[AD-A273805] p 2821 N94-25878
Normal forms for perturbations of the euler top
[PB94-125390] p 3009 N94-26968

RING CURRENTS
Dynamics explorer interdisciplinary scientist investigations
[NASA-CR-195226] p 2878 N94-26204

RING LASERS
On the application of Allan variance method for Ring Laser Gyro performance characterization
[DE94-003880] p 2810 N94-26525
High-speed, high-density, coherent time-domain optical memory
[AD-A274249] p 3037 N94-27010
Fiber laser amplifiers and oscillators
[AD-A274231] p 2820 N94-28068

RINGS
Matrix near rings and pseudo distributivity
[DE94-601505] p 2992 N94-26366

RIOMETERS
Development of imaging riometers
p 2884 N94-27967
Quick-look system of auroral absorption images by imaging riometer p 2884 N94-27968

RISK
Risk perspectives for Topaz 2 flight mission
[DE94-003229] p 2700 N94-25956
Space projects: Astrophysics facility program contains cost and technical risks. Report to Congressional Requesters
[GAO/NSIAD-94-80] p 2696 N94-27382
Space radiation health research, 1991-1992
[NASA-TM-109721] p 2932 N94-27556
Is probability of frequency too narrow?
[DE94-000687] p 3004 N94-27612
Practical problems in aggregating expert opinions
[DE94-002623] p 3094 N94-27707

RIVETS
Mechanically fastened composite laminates subjected to combined bearing-bypass and shear loading
p 2712 N94-27914

ROADS
Unscreened low tension cables scrape abrasion testing
[PB94-123767] p 2823 N94-26849
Report of the National Research Institute for Earth Science and Disaster Prevention, No. 51
[JTN-94-80509] p 2886 N94-27985
Detection of water on road surface by the polarized light p 2886 N94-27989
Development of a method for predicting snowfall intensity and compacted snow on roads
p 2853 N94-27990
Conception of snow information network system in Yamagata Prefecture p 2853 N94-27991

ROBOT ARMS
Autonomous space processor for orbital debris advanced design project in support of solar system exploration p 2697 N94-25667
Inertial-space disturbance rejection for space-based manipulators p 2683 N94-26281
Direct model reference adaptive control of robotic arms p 2683 N94-26282
Motion planning for serial manipulators with many degrees of freedom: Implementation of a sequential search strategy
[ISBN-0-315-83682-2] p 2822 N94-26642
Generalized finite element dynamic modelling and simulation for flexible robot manipulators
[ISBN-0-315-84623-2] p 2825 N94-27343
Dynamic control of kinematically redundant manipulators
[ISBN-0-315-84627-5] p 2825 N94-27344

ROBOT CONTROL
The 1991-1992 walking robot design
p 2833 N94-25686
Graphical programming at Sandia National Laboratories
[DE94-003803] p 2958 N94-25818
Application of the CIRSSE cooperating robot path planner to the NASA Langley truss assembly problem
p 2683 N94-26280
Performance measures from the explorer platform berthing experiment p 2683 N94-26283
Computer visualizations in engineering applications
[DE94-003589] p 2822 N94-26465
On-board computer for control subsystem of satellite
p 2949 N94-26716
Sensor-based navigation of a mobile robot using automatically constructed fuzzy rules
[DE94-001137] p 2986 N94-26948
Robotics handbook. Version 1: For the interested party and professional
[NASA-TM-109690] p 2824 N94-27238
The universal robot p 2686 N94-27361
Design, implementation and experimental results of robotic environment input into the Robot Controller Test Station (RCTS)
[ISBN-0-315-85355-7] p 2826 N94-27596

ROBOT DYNAMICS
A biologically-inspired autonomous robot
[AD-A273909] p 2821 N94-25782
Robotics handbook. Version 1: For the interested party and professional
[NASA-TM-109690] p 2824 N94-27238
Generalized finite element dynamic modelling and simulation for flexible robot manipulators
[ISBN-0-315-84623-2] p 2825 N94-27343
Dynamic control of kinematically redundant manipulators
[ISBN-0-315-84627-5] p 2825 N94-27344

ROBOT SENSORS
Object imaging accomplished with an integrated circuit robotic tactile sensor incorporating a piezoelectric polyvinylidene fluoride thin film
[AD-A274038] p 2780 N94-25845

ROBOTICS
The 1991-1992 walking robot design
p 2833 N94-25686
Design of dynamically reconfigurable real-time software using port-based objects
[NASA-CR-195178] p 2958 N94-25777
Graphical programming at Sandia National Laboratories
[DE94-003803] p 2958 N94-25818
Balancing of a planar bouncing object
[AD-A273805] p 2821 N94-25878
Recent developments in the Robotic All Terrain Lunar Exploration Rover (RATLER) program
[DE93-040342] p 2821 N94-26110
Modeling and experimental verification of single event upsets p 2684 N94-26287
Early lunar rover mission studies
p 2684 N94-26290
The Robotic All-Terrain Lunar Exploration Rover (RATLER): Increased mobility through simplicity
p 2685 N94-26291
A multitasking behavioral control system for the Robotic All-Terrain Lunar Exploration Rover (RATLER)
p 2685 N94-26292
Computer visualizations in engineering applications
[DE94-003589] p 2822 N94-26465
Automated in-situ inspection systems for underground storage tanks
[AD-A274644] p 2764 N94-27144
Robotics handbook. Version 1: For the interested party and professional
[NASA-TM-109690] p 2824 N94-27238
Dynamic control of kinematically redundant manipulators
[ISBN-0-315-84627-5] p 2825 N94-27344
Vision 21: Interdisciplinary Science and Engineering in the Era of Cyberspace
[NASA-CP-10129] p 2685 N94-27358
Utility fog: A universal physical substance
p 2687 N94-27367
Design, implementation and experimental results of robotic environment input into the Robot Controller Test Station (RCTS)
[ISBN-0-315-85355-7] p 2826 N94-27596
Local performance optimization for a class of redundant eight-degree-of-freedom manipulators
[NASA-TP-3417] p 2989 N94-27773
Comparison of dynamic analysis of a Schilling hydraulic manipulator with experimental results
[DE94-004597] p 2827 N94-27780
Automation life-cycle cost model
[NASA-CR-195695] p 3095 N94-27866
Artemis common lunar lander. Phase 2: Study results for external review
[NASA-TM-109699] p 2692 N94-28205

ROBOTS
The 1991-1992 walking robot design
p 2833 N94-25686
A biologically-inspired autonomous robot
[AD-A273909] p 2821 N94-25782
Balancing of a planar bouncing object
[AD-A273805] p 2821 N94-25878
The television as robot servant
[AD-A273985] p 2984 N94-25898
The determination of surface roughness from reflected step edges
[AD-A273987] p 2984 N94-25900
Rational handling of multiple goals for mobile robots
[NASA-CR-195177] p 2985 N94-26006
A global approach to kinematic path planning to robots with holonomic and nonholonomic constraints
p 2683 N94-26279
Application of the CIRSSE cooperating robot path planner to the NASA Langley truss assembly problem
p 2683 N94-26280
Adaptive path planning in changing environments
[DE94-003269] p 2985 N94-26462
Computer visualizations in engineering applications
[DE94-003589] p 2822 N94-26465
Implementation of integral manifold control on a two degree of freedom flexible joint manipulator: Theory and experiments
[ISBN-0-315-83572-9] p 2823 N94-26658
Sensor-based navigation of a mobile robot using automatically constructed fuzzy rules
[DE94-001137] p 2986 N94-26948
Automated in-situ inspection systems for underground storage tanks
[AD-A274644] p 2764 N94-27144
Ir-fibers in a laser threat warning system and robot shot warning system
[PB94-124476] p 3038 N94-27209
The universal robot p 2686 N94-27361
Parallel algorithm for dominant points correspondences in robot binocular stereo vision p 2686 N94-27364
Utility fog: A universal physical substance
p 2687 N94-27367
Pigs in cyberspace p 2689 N94-27376
Design, implementation and experimental results of robotic environment input into the Robot Controller Test Station (RCTS)
[ISBN-0-315-85355-7] p 2826 N94-27596
Advanced control of a flexible spherical wrist
[ISBN-0-315-84424-8] p 2826 N94-27652

ROBUSTNESS (MATHEMATICS)
Distributing functionality in the drift scan camera system
[DE94-003640] p 2809 N94-25599
On the robustness of a multiple semi-coarsened grid method
[REPT-93-51] p 2992 N94-26252
Fuzzy robust statistics for application to the fuzzy c-means clustering algorithm
[AD-A274719] p 3003 N94-26436
Designing robust control laws using genetic algorithms
p 2643 N94-27295
Dynamics and robust control for uncertain flexible space systems
[INPE-5510-TAE/020] p 2696 N94-27357
Tools for quantitative stability robustness analysis
[ISBN-0-315-59950-2] p 2988 N94-27641

ROCK MECHANICS
Nonlinear hysteresis in an endochronic solid
[AD-A274594] p 2880 N94-26855

ROCKET ENGINE DESIGN
Rocket engine numerical simulation
p 2688 N94-27375

ROCKET ENGINES
Evaluation of moderate angle of attack roll of a dual engine, thrust vectoring aircraft using quantitative feedback theory
[AD-A274118] p 2667 N94-25905

Orbit transfer rocket engine technology program enhanced heat transfer combustor technology
[NASA-CR-189236] p 2700 N94-26156
An ultrasonic testing technique for monitoring the cure and mechanical properties of polymeric materials
[AD-A274536] p 2753 N94-26842
Rocket engine numerical simulation
p 2688 N94-27375
ROCKET EXHAUST
Stationary plasma thruster plume emissions
[NASA-CR-194471] p 2701 N94-26209
ROCKET NOZZLES
Ablation of solid-propellant rocket-motor nozzle materials
[ESA-TT-1289] p 2699 N94-25638
Verification of thermal analysis codes for modeling solid rocket nozzles
[NASA-CR-195248] p 2702 N94-27150
Materials characterization on efforts for ablative materials
[NASA-CR-193929] p 2756 N94-27230
ROCKS
Nonlinear hysteresis in an endochronic solid
[AD-A274594] p 2880 N94-26855
RODENTS
Cross-sectional anatomy of day 30 suncus fetuses
p 2905 N94-27490
RODS
Lunar preform manufacturing p 2765 N94-25677
ROLL
Evaluation of moderate angle of attack roll of a dual engine, thrust vectoring aircraft using quantitative feedback theory
[AD-A274118] p 2667 N94-25905
ROLLERS
Contact stress in disc cams with roller followers
[ESDU-93001] p 2829 N94-28055
Blending profiles of disc cams with radial translating roller followers. Part 2: To incorporate an intermediate precision point or a constant velocity component
[ESDU-93002-PT-2] p 2830 N94-28056
ROLLING MOMENTS
Contribution of body-mounted fins and tailplanes to lateral derivatives due to sideslip at subsonic speeds for general body width to height ratio
[ESDU-93007] p 2648 N94-28057
ROOM TEMPERATURE
Failure mechanisms of high temperature semiconductor lasers
[AD-A273833] p 2815 N94-25616
Investigation of tension-compression fatigue behavior of a cross-ply metal matrix composite at room and elevated temperatures
[AD-A273731] p 2706 N94-25999
Deformation, constitutive behavior, and damage of advanced structural materials under multiaxial loading
[AD-A274165] p 2709 N94-27142
Observation of stimulated emission from an MBE grown GaN film on sapphire
[DE94-003638] p 3068 N94-27724
ROOT-MEAN-SQUARE ERRORS
Estimators for the Cauchy distribution
[DE94-004990] p 3005 N94-27816
ROSSBY REGIMES
Global barotropic response to a tropical forcing
[NASA-CR-195256] p 2896 N94-27408
ROTARY WING AIRCRAFT
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 4: Laser velocimeter wake data, advance ratio of 0.037
[NASA-TM-109040-VOL-4] p 2645 N94-26483
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 1: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0081 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-1] p 2645 N94-26489
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 2: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 710 feet/second
[NASA-TM-109040-VOL-2] p 2645 N94-26492
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 3: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-3] p 2645 N94-26497
S-76 high intensity radiated fields, volume 2
[AD-A274572] p 2771 N94-26836
S-76 high intensity radiated fields, volume 1
[AD-A274571] p 2771 N94-26854
Future of aerospace
[PB94-120185] p 2669 N94-26906
ROTARY WINGS
Correlation of airloads on a two-bladed helicopter rotor
[NASA-TM-103982] p 2644 N94-26143
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 4: Laser velocimeter wake data, advance ratio of 0.037
[NASA-TM-109040-VOL-4] p 2645 N94-26483
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 1: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0081 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-1] p 2645 N94-26489
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 2: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 710 feet/second
[NASA-TM-109040-VOL-2] p 2645 N94-26492
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 3: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-3] p 2645 N94-26497
Computer code for interactive rotorcraft preliminary design using a harmonic balance method for rotor trim
[AD-A274924] p 2668 N94-26531
A finite wake theory for two-dimensional rotary wing unsteady aerodynamics
[AD-A274921] p 2645 N94-26535
ROTATING BODIES
Normal forms for perturbations of the euler top
[PB94-125390] p 3009 N94-26968
Trajectories of ballistic impact ejecta on a rotating Earth p 2887 N94-28295
ROTATING FLUIDS
Numerical simulation of turbulent free jet by TFKE model p 2871 N94-28157
ROTATING SHAFTS
A new method for torsional critical speed calculation of practical industrial rotors
[IMR-T&M-TR-001] p 2828 N94-28041
Propeller off-axis loads due to thrust axis incidence and nacelle magnus force p 2652 N94-28319
ROTATING STALLS
An investigation of the surge behavior of a high-speed ten-stage axial flow compressor
[AD-A274910] p 2674 N94-26345
ROTATION
Satellite attitude determination using linear combination of models
[AD-A274082] p 2694 N94-25996
Method of correcting rotational motion error in SAR and ISAR imagery
[AD-D016033] p 2773 N94-27146
Translation and rotation invariant pattern recognition
[PB94-123676] p 2968 N94-27157
Fuel ion rotation measurement and its implications on H-mode theories
[DE94-004860] p 3048 N94-27791
ROTOR DYNAMICS
Computer code for interactive rotorcraft preliminary design using a harmonic balance method for rotor trim
[AD-A274924] p 2668 N94-26531
Bulk-Flow Analysis, part A
[NASA-CR-193911-PT-A] p 2796 N94-27377
Influence of impeller shroud forces on turbopump rotor dynamics p 2796 N94-27378
Enhanced simulation software for rocket turbopump, turbulent, annular liquid seals
[NASA-CR-195239] p 2825 N94-27383
ROTOR SPEED
A new method for torsional critical speed calculation of practical industrial rotors
[IMR-T&M-TR-001] p 2828 N94-28041
ROTORS
Laser Doppler velocimetry in a low speed multistage compressor
[AD-A274836] p 2818 N94-26498
A finite wake theory for two-dimensional rotary wing unsteady aerodynamics
[AD-A274921] p 2645 N94-26535
Gas fired advanced turbine system
[DE94-003193] p 2827 N94-27874
A new method for torsional critical speed calculation of practical industrial rotors
[IMR-T&M-TR-001] p 2828 N94-28041
ROUTES
Genetic algorithms applied to a mission routing problem
[AD-A274130] p 2968 N94-27120
ROVING VEHICLES
Hardware design of a spherical mini-rover
p 2833 N94-25669
The 1991-1992 project summaries
p 2943 N94-25698
Project Ares 3 p 2671 N94-25712
RUBBER
New rubber qualification for the igniter adapter
[NASA-CR-193936] p 2752 N94-26708
SAG compensated vibration isolation mount
[AD-D016040] p 2841 N94-27110
RUBIDIUM
Diode-laser-pumped, gas-cell atomic clocks
[AD-A274812] p 3008 N94-26484
RUN TIME (COMPUTERS)
Tool for performance analysis and off-line prediction of timing behaviour p 2952 N94-26732
Efficient rebalancing of tree-type main memory dictionaries
[PB94-133105] p 3100 N94-28396
RUNGE-KUTTA METHOD
Preconditioning in parallel Runge-Kutta methods for stiff initial value problems
[CWI-NM-R9310] p 2991 N94-26217
On the error committed by stopping the Newton iteration in implicit Runge-Kutta methods
[TW-93-02] p 2992 N94-26229
Parallel implicit unstructured grid Euler solvers
[NASA-CR-191594] p 2999 N94-27434
High-lift system analysis method using unstructured meshes
[NLR-TP-92351-U] p 2647 N94-27554
Time-step enlargement and optimal smoothing in Runge-Kutta time-integration algorithms by implicit and explicit smoothing
[NLR-TP-92221-U] p 2798 N94-27799
RUNWAYS
Soft ground arresting system for airports
[DOT/FAA/CT-93/80] p 2680 N94-26202
Tests of highly loaded skids on a concrete runway
[NASA-TP-3435] p 2669 N94-26608
Methods for experimentally determining commercial jet aircraft landing parameters from video image data
[AD-A274207] p 2669 N94-27105
Aircraft accident report: Runway departure following landing American Airlines flight 102, McDonnell Douglas DC-10-30, N139AA, Dallas/Fort Worth International Airport, Texas, April 14, 1993
[PB94-910402] p 2660 N94-27766
RUTILE
Electronic structure of a single oxygen vacancy in rutile TiO2
[DE94-602717] p 3062 N94-26901
RYDBERG SERIES
Rydberg states in multiply charged ions
[DE94-002335] p 3021 N94-26760

S

S MATRIX THEORY
Mapping between the Sinh-Gordon and Ising models
[DE94-601535] p 2998 N94-27162
S WAVES
Elastic scattering by a spherical inclusion
[AD-A274713] p 2878 N94-26433
A preliminary shear velocity model for Central Asia
[AD-A274972] p 2880 N94-26752
Analysis of S-wave seismogram envelope of deep earthquakes and estimation of random inhomogeneities in the Kanto-Tokai area p 2886 N94-27988
SACCADIC EYE MOVEMENTS
Comparative measurement of visual stability in cosmic space: Onboard experiment and pre-flight activities
p 2916 N94-27463
Function of selective attention intrinsic to the saccade system: Does the voluntary control override the stimulus driven control? p 2928 N94-27523
SADDLE POINTS
Phase portraits of quadratic systems with finite multiplicity three and one critical point of infinity
[REPT-93-41] p 2991 N94-26215
SAFETY
Project Columbiad: Reestablishment of human presence on the Moon p 2689 N94-25687
The structural behaviour of the steel or composite concrete and steel frames and the connections of frame members during the fire: A literature review
[VTT-TIED-1437] p 2837 N94-26307
Comparative analysis of different configurations of PLC-based safety systems from reliability point of view
p 2836 N94-27925
Technical Report of National Research Institute of Fisheries Engineering: Fishing Boat and Instrument, No. 12
[JTN-94-80595] p 2764 N94-27976
Recent trend of domestic and international regulations on intact stability of ships for safety
p 2764 N94-27977

Propellants and explosives in ballistic missiles
[UCRL-LR-113578] p 2760 N94-28222

SAFETY DEVICES
The 1991-1992 project summaries
p 2943 N94-25698
Annual conference on fire research, 1993: Book of abstracts
[PB94-121324] p 2717 N94-26907

SAFETY FACTORS
Safety analysis in conceptual design of process control
[VTT-PUBS-117] p 2762 N94-25641
Technology drivers for flight telerobotic system software p 2684 N94-26289
Structural design feasibility study of Space Station long spacer truss
[NASA-TM-106346] p 2843 N94-27559
Technical Report of National Research Institute of Fisheries Engineering: Fishing Boat and Instrument, No. 12
[JTN-94-80595] p 2764 N94-27976
Recent trend of domestic and international regulations on intact stability of ships for safety
p 2764 N94-27977

SAFETY MANAGEMENT
Evaluation and improvement of the inquest system on work accidents (TOT)
[VTT-TIED-1418] p 2762 N94-26261
Proceedings of the Second EGS4 User's Meeting in Japan
[DE93-520383] p 3032 N94-26543
Aerospace safety advisory panel
[NASA-TM-109692] p 3118 N94-27381
Report of the Shuttle Processing Review Team
[NASA-TM-109728] p 2692 N94-28178

SAMARIUM
Technical report of ISSP. Ser. A, no. 2682: Pressure dependence of Sm:YAG fluorescence to 50 GPa: A new calibration as a high pressure scale
[JTN-94-80568] p 3066 N94-27354

SAMPLED DATA SYSTEMS
Operator theoretic methods in the control of distributed and nonlinear systems
[AD-A274160] p 2988 N94-27139
Investigation of spectral analysis techniques for randomly sampled velocimetry data
p 3009 N94-27924

SAMPLERS
Comet nucleus and asteroid sample return missions
p 2689 N94-25692
Simulation approaches for calculations in directed graphical models
[AD-A274825] p 3003 N94-26494

SAMPLING
The use of on-line ion chromatography for high temperature and high pressure reaction studies
[DE94-002525] p 2713 N94-26075
Macrobenthic fauna in the dutch sector of the north sea in 1991
[PB94-126414] p 2868 N94-27200

SANDS
The microstructural response of granular soil under uniaxial strain
[AD-A274808] p 2763 N94-26341

SANDSTONES
The estimation of pre-stress by deformation rate analysis and suggestion of a mechanism from the elast-plastical theory p 2871 N94-28156

SANDWICH STRUCTURES
Effect of impact face damage on strength of sandwich composites
[VTT-PUBS-128] p 2704 N94-25734

SAPPHIRE
Collaborative research on ion implantation of ceramics
[DE93-019177] p 2749 N94-26080
Demonstration of monolithic co-fabrication of Y1Ba2Cu3O7-Sigma and CMOS devices on the same sapphire substrate
[AD-A274757] p 3059 N94-26566
Technical report of ISSP. Ser. A, no. 2685: ASE-free terawatt KrF/Ti : sapphire hybrid laser system
[JTN-94-80571] p 2820 N94-27339
Adsorption and desorption studies of cesium on sapphire surfaces
[DE94-003798] p 3070 N94-28067

SATELLITE ALTIMETRY
Laser altimetry simulator. Version 3.0: User's guide
[NASA-TM-104588] p 2877 N94-26152

SATELLITE ATMOSPHERES
Studies for Io's extended atmosphere and neutral clouds and their impact on the local satellite atmosphere and on the planetary magnetosphere
[NASA-CR-195255] p 3106 N94-27406
Studies for the loss of atomic and molecular species from Io
[NASA-CR-195702] p 3108 N94-27941

SATELLITE ATTITUDE CONTROL
High temperature superconducting infrared imaging satellite p 2698 N94-25700
On-board computer for control subsystem of satellite
p 2949 N94-26716

SATELLITE COMMUNICATION
Development of satellite telecommunications during the period 1990 - 2005
[CRANFIELD-AERO-9301] p 2765 N94-25639
Low Earth orbit communications satellite
p 2698 N94-25701
System design analysis of a lightweight laser satellite terminal
[AD-A274033] p 2690 N94-25769
Remote Earth Sciences data collection using ACTS
[NASA-CR-195227] p 2848 N94-26236
Analysis of linear combining and its application to frequency-hopped signals
[ISBN-0-315-84007-2] p 2770 N94-26624
The Communication Link and Error ANalysis (CLEAN) simulator
[NASA-CR-195243] p 2968 N94-27168
Equalization and cancellation of nonlinear intersymbol interference in a dispersive satellite communication channel
[ISBN-0-315-85147-3] p 2775 N94-27274
A GPS coverage model p 2642 N94-27292
Design and test of a regenerative satellite transmultiplexer
[ISBN-0-315-85280-1] p 2786 N94-27303
Analysis of a multiaccess/switching technique for multibeam satellites in a prioritized ISDN environment
[ISBN-0-315-84632-1] p 2776 N94-27345
The telemedicine spacebridge project: A joint US/Russian venture in long distance medicine via satellite
[NASA-TM-106523] p 2693 N94-27427
NASA satellite communications application research. Phase 2: Efficient high power, solid state amplifier for EFH communications
[NASA-CR-195713] p 2776 N94-27669

SATELLITE CONSTELLATIONS
Low Earth orbit communications satellite
p 2698 N94-25701
A virtual environment for satellite modeling and orbital analysis in a distributed interactive simulation
[AD-A274114] p 2694 N94-25904

SATELLITE CONTROL
A comparison of three approximate mathematical models for the gravity gradient stabilized satellite
[AD-A273832] p 2694 N94-25615

SATELLITE DESIGN
High temperature superconducting infrared imaging satellite p 2698 N94-25700
Copernicus: Lunar surface mapper
p 3081 N94-25702
A simple satellite system to locate gamma ray bursters using scintillating fiber technology
[DE94-601287] p 3117 N94-27996
NSWC Crane Aerospace Cell Test History Database
p 2860 N94-28102

SATELLITE IMAGERY
Human visual system enhancement of reconstructed satellite images
[AD-A273867] p 2693 N94-25595
Objective image quality metrics: Applications for partially compensated images of space objects
[AD-A273837] p 2847 N94-25741
Geometric correction of SPOT images with use of digital elevation models
[ETN-94-95033] p 2847 N94-26107
Solid estimation feature based correlation method for measuring control points required for correcting satellite images
[VTT-JULK-772] p 2848 N94-26253
A geological and geophysical information system for Eurasia
[AD-A274818] p 3098 N94-26490
Application of Space Shuttle Project Hercules imagery in the investigation of ship cloud tracks
[AD-A274923] p 2692 N94-26529
The Hough transform algorithm for sea ice lead analysis: An evaluation
[AD-A274535] p 2899 N94-26853
Assessment of tropical forests using satellite data
[SILVA-CARELICA-21] p 2850 N94-27182
Global tropical forest cover assessments using satellite imagery p 2850 N94-27183
Woody biomass density in the Tendelti area of the central Sudan p 2850 N94-27185
Morphodynamics of inter-tidal areas: The Wadden Sea
[NLR-TP-92356-U] p 2851 N94-27555
Role of remote sensing in energy, water, and carbon cycle studies over the Amazon
[INPE-5486-PRE/1786] p 2852 N94-27957
An image assessment study of image acceptability of the Galileo low gain antenna mission
p 2945 N94-28252
Image compression software for the SOHO LASCO and EIT experiments p 2945 N94-28253
Compression of multispectral Landsat imagery using the Embedded Zerotree Wavelet (EZW) algorithm
p 2947 N94-28261
Vector quantizer designs for joint compression and terrain categorization of multispectral imagery
p 2947 N94-28262
Study on environment monitoring over whole China using NDVI from AVHRR data and future project
p 2875 N94-28289
Utilization of remote sensing data for global climate change research in Malaysia p 2875 N94-28290

SATELLITE INSTRUMENTS
A space fiber-optic x ray burst detector
[DE94-002722] p 2696 N94-26808
Nimbus-7 Earth radiation budget calibration history. Part 2: The Earth flux channels
[NASA-RP-1335-PT-2] p 2814 N94-27981
A simple satellite system to locate gamma ray bursters using scintillating fiber technology
[DE94-601287] p 3117 N94-27996
Develop and fabricate a radiation dose measurement system for satellites
[PL-TR-93-2161] p 2698 N94-28210
Develop and fabricate a radiation dose measurement system for satellites
[PL-TR-93-2099] p 2698 N94-28217

SATELLITE NAVIGATION SYSTEMS
Satellite navigation system GPS: A review of principles and performance and developments in general
[PB94-124534] p 2665 N94-27210
Differential GPS methods and performance for marine applications
[DREP-93-09] p 2665 N94-27667

SATELLITE OBSERVATION
High temperature superconducting infrared imaging satellite p 2698 N94-25700
Digital filter design for sensor simulation: Application to the Brazilian remote sensing satellite
[INPE-5523-RPQ/665] p 2849 N94-26827
A preliminary method for atmospheric soundings in real time using satellite and ground-based remotely sensed data
[AD-A274381] p 2880 N94-26828
Nimbus-7 Earth radiation budget calibration history. Part 2: The Earth flux channels
[NASA-RP-1335-PT-2] p 2814 N94-27981
MODIS airborne simulator visible and near-infrared calibration, 1991 FIRE-Cirrus field experiment. Calibration version: FIRE King 1.1
[NASA-TM-104600] p 2897 N94-28182
Asia-Pacific Seminar on Global Change Research Cooperation
[JTN-94-80517] p 2871 N94-28268
Role and activity of STA on Asian Pacific regional cooperation p 2853 N94-28269
Cooperative research projects on satellite remote sensing for the hydrological subjects
p 2853 N94-28270
Research activities on the meteorology over the Asia-Pacific region p 2853 N94-28271
NASDA contribution plan to Asian countries
p 2853 N94-28273
Thailand satellite ground receiving station in global change research cooperation p 2875 N94-28291
Utilization of remote sensing data for global change research p 2875 N94-28292
Contribution of satellite observation to global change research p 2876 N94-28293

SATELLITE ORBITS
Low Earth orbit communications satellite
p 2698 N94-25701
Modal control of a satellite in an unstable periodic orbit about the Earth-Sun interior Lagrange point
[AD-A273707] p 2694 N94-25776
Hill equations for satellite orbit determination
[ETN-94-95374] p 2690 N94-25787
A virtual environment for satellite modeling and orbital analysis in a distributed interactive simulation
[AD-A274114] p 2694 N94-25904
A GPS coverage model p 2642 N94-27292

SATELLITE ORIENTATION
Satellite attitude determination using linear combination of models
[AD-A274082] p 2694 N94-25996

SATELLITE SOLAR ENERGY CONVERSION
A direct current rectification scheme for microwave space power conversion using traveling wave electron acceleration p 2687 N94-27371

SATELLITE-BORNE INSTRUMENTS
CRRES high energy proton flux map
[AD-A274803] p 2878 N94-26338

SATURATION (CHEMISTRY)

Probability of accessing the multiple saturated states in the resistive interchange instability [DE94-000478] p 3044 N94-26694

SCALARS

On kinetic expansion in scalar field theory [DE93-634338] p 3072 N94-26553

Predictions of momentum and scalar fields in a jet in cross-flow using first and second order turbulence closures p 2803 N94-28025

Fields and potentials in general uniaxial bianisotropic media I. Axial sources [PB94-132875] p 2778 N94-28379

SCALE MODELS

Experimental investigation of advanced hub and pylon fairing configurations to reduce helicopter drag [NASA-TM-4540] p 2668 N94-26604

SCALING LAWS

Hydrodynamics, acoustics and scaling of traveling bubble cavitation [AD-A273846] p 2789 N94-25605

Violation of Feynman scaling law in the forward region p 3113 N94-25633

Scaling of sustained ZT-40 M reversed field pinches [DE94-003318] p 3043 N94-26321

On the aging of sonic booms p 2650 N94-28194

SCANDIUM COMPOUNDS

NNN-Ising model simulation of nanodomain textures in relaxor-type lead scandium tantalate [DE94-601884] p 2748 N94-25844

Polar and chemical domain structures of lead scandium tantalate (PST) [DE94-600760] p 3056 N94-26363

Technical report of ISSP. Ser. A, no. 2670: Electronic structure of light transition metal compounds studied by photoemission [JTN-94-80556] p 3065 N94-27239

Study of the hyperfine magnetic field at Ta-181 site in the Heusler Co2ScSn, Co2ScGa, and Co2HfSn alloys [DE94-603989] p 3067 N94-27623

SCANNERS

Distributing functionality in the drift scan camera system [DE94-003640] p 2809 N94-25599

Color head down display program [AD-A274807] p 2672 N94-26340

The Hough transform algorithm for sea ice lead analysis: An evaluation [AD-A274535] p 2899 N94-26853

The development of an in-motion radiography system for large area aircraft scanning [DREP-TM-93-53] p 2670 N94-27666

SCANNING

Unsteady wake structures in transverse jets p 2800 N94-28006

SCANNING ELECTRON MICROSCOPY

Analysis of the effect on growth kinetics of gamma prima phase in Inconel 713C alloys [DE93-633763] p 2735 N94-26294

Developments in crystallographic phase analysis in the SEM: Backscattered electron Kikuchi patterns [DE93-040755] p 3057 N94-26420

The 27th Annual Meeting of the Israel Society for Microscopy and the 12th Annual Meeting of the Israel Society for Histochemistry and Cytochemistry [DE93-632416] p 2716 N94-26519

SCANNING TUNNELING MICROSCOPY

Observation on metal surface in aqueous solution using an electrochemical Scanning Tunneling Microscope (STM) p 2724 N94-25554

SCATTER PROPAGATION

Performance statistics bulletin: High altitude meteor scatter propagation, August, September, October 1989 [AD-A274455] p 2773 N94-27085

SCATTERING

Back-reaction beyond the mean field approximation [DE94-003936] p 3012 N94-25612

Two dimensional self-consistent fluid simulation of RF inductive sources [DE94-003635] p 2767 N94-25937

Harvard University High Energy Physics [DE94-002406] p 3032 N94-26119

Rescattering and energy loss of fast partons in nuclear matter [DE94-002918] p 3018 N94-26145

Experimental measurement of local displacement and chemical pair correlations in crystalline solid solutions [DE94-001124] p 3065 N94-27251

Decay of non-equilibrium polariton condensate in semiconductors [DE94-604016] p 3068 N94-27678

Neutron-neutron scattering: Possibility of in-beam experiment [DE94-606459] p 3027 N94-27682

SCATTERING AMPLITUDE

The amplitude of the elastic hadron-hadron scattering in the coulombic range of transfer momenta [DE93-613183] p 3014 N94-25869

The challenges of exclusive processes in QCD [DE94-003429] p 3024 N94-27050

Proton electromagnetic form factor near the proton-antiproton threshold and quasinuclear bound state [DE94-606458] p 3027 N94-27681

SCATTERING CROSS SECTIONS

The delta (1232) resonance transition form factor [DE94-003442] p 3017 N94-26101

Elastic scattering by a spherical inclusion [AD-A274713] p 2878 N94-26433

Relativistic collision rate calculations for electron-air interactions [DE94-004204] p 3020 N94-26527

Calculation of electron-potassium scattering [DE94-601812] p 3023 N94-26942

Spin asymmetry in resonant electron-hydrogen elastic scattering [DE94-601813] p 3023 N94-26943

Calculation of total cross sections for electron and positron scattering on sodium and potassium [DE94-601814] p 3023 N94-26944

Jet production in muon scattering at Fermilab E665 [DE94-004663] p 3028 N94-27752

Muon transfer rates in collisions of hydrogen isotope mesic atoms on bare nuclei: Multichannel adiabatic approach [DE94-606752] p 3030 N94-27861

SCATTERING FUNCTIONS

Elastic scattering by a spherical inclusion [AD-A274713] p 2878 N94-26433

SCENE ANALYSIS

Science support for the Earth radiation budget experiment [NASA-CR-191600] p 2894 N94-26506

SCHEDULES

Analysis of cost and schedule growth on sole source and competitive Air Force contracts [AD-A273920] p 3094 N94-26814

SCHEDULING

Automating satellite range scheduling [AD-A273829] p 2694 N94-25738

Coordinated scheduling for dynamic real-time systems [NASA-CR-195231] p 3093 N94-26206

The general pickup and delivery problem [MEMO-COSOR-92-44] p 2992 N94-26226

A linear description of the discrete lot-sizing and scheduling problem [MEMO-COSOR-92-47] p 2992 N94-26227

One machine scheduling with delayed precedence constraints [PB93-237626] p 3094 N94-26314

Real-Time Embedded Processing for Space Applications [ISBN-2-85428-335-X] p 2948 N94-26713

Scheduling tasks with unpredictable timing parameters in hard real-time systems p 2951 N94-26728

Ada multiple-programming for hard real time applications in space systems p 2951 N94-26730

Implementing hard real-time systems: A case study p 2951 N94-26731

A real-time executive implementing priority inheritance protocols p 2952 N94-26733

Scheduling approaches with Ada p 2952 N94-26734

Fault-tolerant scheduling in distributed critical real-time systems p 2952 N94-26735

Central dynamic share scheduling in distributed systems [REPT-93-48] p 2966 N94-26966

Artificial Intelligence Research Branch future plans [NASA-TM-109733] p 2989 N94-28065

SCHLIEREN PHOTOGRAPHY

Focused Schlieren flow visualization studies of multiple venturi fuel injectors in a high pressure combustor [NASA-TM-106479] p 2674 N94-26573

Effects of free-stream turbulence on a jet in a cross flow p 2805 N94-28036

SCHROEDINGER EQUATION

Calculations of population transfer during intense laser pulses [DE94-001060] p 2818 N94-26698

The three-dimensional hydrogen atom in crossed magnetic and electric fields [DE94-606301] p 3029 N94-27847

SCIENCE

Selected data on Federal support to universities and colleges: FY 1991 [NSF-93-320] p 3101 N94-28201

SCIENTIFIC VISUALIZATION

IRMA: A program for three-dimensional color display of data [AD-A273811] p 2959 N94-25879

Center for computation and visualization of geometric structures [DE94-001882] p 2991 N94-25928

Radar cross section visualization using sample buffer progressive refinement volume rendering [AD-A274179] p 2773 N94-27127

Sculpting in cyberspace: Parallel processing the development of new software p 2686 N94-27365

Thirteen ways to say nothing with scientific visualization [NASA-CR-195280] p 2970 N94-27542

RIAD visual imaging branch assessment p 2815 N94-27895

Visualization techniques to aid in the analysis of multispectral astrophysical data sets [NASA-CR-195268] p 3105 N94-27932

SCIENTISTS

General Motors Corporation and Pacific Northwest Laboratory staff exchange: Inspection of case hardened steels and metal-matrix composites [DE94-003470] p 2706 N94-25982

Predoctoral training grant in the area of physical sciences [DE94-004406] p 3039 N94-27603

Science observed: The mass-extinction debates p 2888 N94-28300

SCINTILLATING FIBERS

A space fiber-optic x ray burst detector [DE94-002722] p 2696 N94-26808

A simple satellite system to locate gamma ray bursters using scintillating fiber technology [DE94-601287] p 3117 N94-27996

SCINTILLATION

Calorimeter with WLS fibers and parallel to beam scintillators [DE93-634188] p 2810 N94-26378

The 1024 scintillation hodoscope [DE93-634183] p 2810 N94-26394

Physical characteristics of polymethylmethacrylate scintillator SOFG-120 [DE93-634184] p 2810 N94-26395

SCINTILLATION COUNTERS

An electromagnetic calorimeter with wavelength shifting fiber readout [DE93-616664] p 2809 N94-25735

Calorimeter with WLS fibers and parallel to beam scintillators [DE93-634188] p 2810 N94-26378

The 1024 scintillation hodoscope [DE93-634183] p 2810 N94-26394

Physical characteristics of polymethylmethacrylate scintillator SOFG-120 [DE93-634184] p 2810 N94-26395

Unsegmented electromagnetic calorimeter prototype. Energy and coordinate resolution [DE93-634185] p 2810 N94-26396

Study on the compensated lead hadron calorimeter characteristics by means of hadron and electron beams [DE93-634176] p 2810 N94-26439

A space fiber-optic x ray burst detector [DE94-002722] p 2696 N94-26808

First observation of neutral current proton electron scattering at the square root of s = 300 GeV [DE94-701107] p 3030 N94-27877

A prototype presampler for the uranium-scintillator calorimeter in Zeus [NIKHEF-H/93-11] p 2814 N94-28098

SCOUT LAUNCH VEHICLE

Nasa Langley Research Center seventy-fifth anniversary publications, 1992 [NASA-TM-109691] p 3118 N94-27431

SEA ICE

An evaluation of an airborne remote sensing system used to determine ice thickness and geometry of a first year sea ice ridge located in the Beaufort Sea [ISBN-0-315-84383-7] p 2849 N94-26667

Response of an airborne synthetic aperture radar to sea ice in the marginal ice zone [ISBN-0-315-84243-1] p 2849 N94-26668

The Hough transform algorithm for sea ice lead analysis: An evaluation [AD-A274535] p 2899 N94-26853

Sound, speed, reflectivity, absorption, and thermal diffusivity measurements in Arctic ice in 1990 [AD-A274326] p 2899 N94-26886

The NOGAPS ten year AMIP integration [AD-A274332] p 2900 N94-26887

Leadex environmental phenomena and effects observed by DMSP, NOAA, and ERS-1 satellites [AD-A274596] p 2868 N94-26888

Ice surface temperature retrieval from AVHRR, ATSR, and passive microwave satellite data: Algorithm development and application
[NASA-CR-195276] p 2851 N94-27849
Extraterrestrial accretion and glacial cycles
p 2890 N94-28308
Studies in ice mechanics
[PB94-133055] p 2900 N94-28393

SEA SURFACE TEMPERATURE
Development and testing of the Coupled Ocean/Atmosphere Mesoscale Prediction System (COAMPS)
[AD-A273925] p 2892 N94-25793
The NOGAPS ten year AMIP integration
[AD-A274332] p 2900 N94-26887
Ice surface temperature retrieval from AVHRR, ATSR, and passive microwave satellite data: Algorithm development and application
[NASA-CR-195276] p 2851 N94-27849
The validation of ATSR measurements with in situ sea temperatures
[DE94-003195] p 2852 N94-27875

SEA WATER
Mapping of seawater intrusion into the coastal aquifer of Israel (the seawater-freshwater interface) by TDEM (Time Domain Electromagnetic) method
[ITN-94-85238] p 2850 N94-27331
Determination of lead isotope ratios in seawater by purge and trap GC/MS after ethylation p 2870 N94-28152

SEALERS
Sealant research for solid oxide fuel cells
[DE94-000015] p 2857 N94-26584

SEALING
Sealant research for solid oxide fuel cells
[DE94-000015] p 2857 N94-26584
Development of a new seal for use on large openings of pressurized spacecraft
[NASA-TM-108444] p 2825 N94-27560

SEALS (STOPPERS)
Enhanced simulation software for rocket turbopump, turbulent, annular liquid seals
[NASA-CR-195239] p 2825 N94-27383
Development of a new seal for use on large openings of pressurized spacecraft
[NASA-TM-108444] p 2825 N94-27560
Development of hypersonic engine seals: Flow effects of preload and engine pressures
[NASA-TM-106333] p 2826 N94-27599

SEAMOUNTS
Coupling of pelagic and benthic communities over a seamount in the Eastern North Pacific
[AD-A274750] p 2899 N94-26149

SEARCH PROFILES
What can we learn from genetic algorithms: A new perspective for search methods
[PB94-125234] p 2967 N94-26997

SEAS
Interpreting the implied meridional oceanic energy transport in AMIP
[DE94-001538] p 2898 N94-26072

SEASONS
Monthly variation of physiological and psychological responses under unsteady thermal conditions
p 2918 N94-27475
Man's ability to adapt himself for the seasonal climatic changes: From viewpoint of anticipation and seasonable behavior p 2919 N94-27476

SECONDARY EMISSION
Secondary electron emission from copper surface due to neodymium and gadolinium ion bombardment
[DE94-701115] p 3027 N94-27718

SECONDARY FLOW
Experimental contribution to the study of secondary flows in centrifugal turbopump stator components
[ECL-92-35] p 2789 N94-25654

SECONDARY ION MASS SPECTROMETRY
Electric-field dependence of electroreflectance and photocurrent spectra at visible wavelengths in MOVPE-grown InAlGaP multiple strained quantum-well structures
[DE94-004692] p 2780 N94-25664

SEDIMENTS
Macrobenthic fauna in the dutch sector of the north sea in 1991
[PB94-126414] p 2868 N94-27200
Journal of NIRE, volume 2, number 4
[JTN-94-80554] p 2869 N94-28147
Effects of p-chlorophenol on sulfate reduction in marine sediments p 2870 N94-28150
An evaluation of criteria that may be used to identify species surviving a mass extinction
p 2889 N94-28304
Extraterrestrial accretion and glacial cycles
p 2890 N94-28308
An extraterrestrial event at the tertiary-quaternary boundary p 2890 N94-28309

SEGMENTS
Image segmentation by a combination of edge detection and region growing
[ETN-94-95032] p 2960 N94-26106

SEISMIC ENERGY
A geological and geophysical information system for Eurasia
[AD-A274818] p 3098 N94-26490
Axial focusing of impact energy in the Earth's interior: Proof-of-principle tests of a new hypothesis
p 2888 N94-28296

SEISMIC WAVES
Efficient modeling in transversely isotropic inhomogeneous media
[DE94-003394] p 2877 N94-25847
Emerging technologies
[DE94-003022] p 3102 N94-26023
Elastic scattering by a spherical inclusion
[AD-A274713] p 2878 N94-26433
A geological and geophysical information system for Eurasia
[AD-A274818] p 3098 N94-26490
Nonlinear hysteresis in an endochronic solid
[AD-A274594] p 2880 N94-26855
Elastic wave up/down decomposition in inhomogeneous and anisotropic media: An operator approach and its approximations
[PB94-126497] p 2881 N94-26880
Wave propagation in the shallow regions of the earth's crust and the borehole vicinity
[ITN-94-85237] p 2882 N94-27330
Underground structure in the eastern part of Kanagawa Prefecture inferred from explosion seismic observations
p 2886 N94-27987
Analysis of S-wave seismogram envelope of deep earthquakes and estimation of random inhomogeneities in the Kanto-Tokai area p 2886 N94-27988
Axial focusing of impact energy in the Earth's interior: Proof-of-principle tests of a new hypothesis
p 2888 N94-28296

SEISMOGRAPHS
Antarctic Record, Vol. 36, No. 2
[REPT-107] p 2883 N94-27963
Status report for the development of the Antarctic penetrator: 1990-year program p 2885 N94-27973
Report of the National Research Institute for Earth Science and Disaster Prevention, No. 51
[JTN-94-80509] p 2886 N94-27985
Observation with STS seismometer at Nakaizu, central Japan: Observation system and comparison with tiltmeter p 2886 N94-27986

SEISMOLOGY
A geological and geophysical information system for Eurasia
[AD-A274818] p 3098 N94-26490
A preliminary shear velocity model for Central Asia
[AD-A274972] p 2880 N94-26752
An integrated approach to seismic event location: 1. Evaluating how method of location affects the volume of groups of hypocenters
[PL-TR-92-2323] p 2887 N94-28214

SELECTION
Cooling towers for combined cycles: Design philosophy, performance testing, and operating problems
p 2832 N94-28087

SELECTIVE SURFACES
Solar energy utilization in the USSR
p 2853 N94-26052

SELENIDES
The state of the art of thin-film photovoltaics
[DE94-000224] p 2855 N94-26115
Fragmentation of Ge(1-x) Sn(x) Se2 glasses
[DE94-603009] p 2758 N94-27837

SELF CONSISTENT FIELDS
On kinetic expansion in scalar field theory
[DE93-634338] p 3072 N94-26553
Molecular surface electrostatic potentials in the analysis of non-hydrogen-bonding noncovalent interactions
[AD-A274612] p 3022 N94-26894

SEMANTICS
Semantics, orderings and recursion in the weakest precondition calculus
[CWI-CS-R9267] p 2995 N94-26776
Modeling systems by probabilistic process algebra: An event structures approach
[PB94-125259] p 3004 N94-26867
Combining logics
[PB94-125242] p 2965 N94-26908
Congruence theorem for structured operational semantics with predicates and negative premises
[PB94-126729] p 2966 N94-26970
Trace-based compositional proof theory for fault tolerant distributed systems
[PB94-126737] p 2966 N94-26971
Alternative architectures for domain-oriented application composition and generation systems
[AD-A274180] p 2968 N94-27128
A strategy for dynamic interpretation: A fragment and an implementation
[CWI-CS-R9317] p 2970 N94-27545
Semantics of MANIFOLD: Specification in ASF+SDF and extension
[CWI-CS-R9269] p 2971 N94-27575
Expressiveness results for process algebras
[CWI-CS-R9301] p 3000 N94-27577
A theory for simulator tools
[CWI-CS-R9302] p 2972 N94-27578
Sheaf semantics for Petri Nets
[PB94-132826] p 2983 N94-28354

SEMICONDUCTING FILMS
Atomic layer epitaxy of group 4 materials: Surface processes, thin films, devices and their characterization
[AD-A274325] p 3061 N94-26885

SEMICONDUCTOR DEVICES
Advanced qualification techniques
[DE94-003709] p 2780 N94-25812
Temperature dependence of the radiation induced change of depletion voltage in silicon PIN detectors
[DE94-002705] p 3052 N94-25972
Investigation of plasma etch induced damage in compound semiconductor devices
[DE94-002849] p 3052 N94-25989
Lithium drifted silicon detector fabrication on gettered floating-zone silicon
[DE94-003890] p 3054 N94-26095
Temperature dependence of static RAM volatility
[DE93-040345] p 2948 N94-26111
Fast generator of program waveforms signals
[DE93-634230] p 2948 N94-26381
Modeling Group 4 elements with new transferable tight-binding models
[DE94-000770] p 3059 N94-26695
Diagnostics and microelectronics
[DE94-003016] p 2784 N94-26777
Bulletin of Precision and Intelligence Laboratory, No. 68
[JTN-94-80609] p 3010 N94-27282
Multiple weight stepwise regression
[DE94-001602] p 3000 N94-27564
Dry etching process development for submicron and nanometer semiconductor devices
[PB94-133196] p 2788 N94-28357

SEMICONDUCTOR DIODES
Ultra-high aggregate bandwidth two-dimensional multiple-wavelength diode laser arrays
[AD-A274018] p 2815 N94-25756

SEMICONDUCTOR LASERS
Characterization of an LCD for use as a programmable phase shifter to produce a single-lobed far-field pattern in a phased array
[AD-A273883] p 3034 N94-25729
Ultra-high aggregate bandwidth two-dimensional multiple-wavelength diode laser arrays
[AD-A274018] p 2815 N94-25756
System design analysis of a lightweight laser satellite terminal
[AD-A274033] p 2690 N94-25769
Design analysis of a combined optical/LADAR deep-space surveillance satellite
[AD-A274040] p 2694 N94-25832
Instantaneous amplitude and frequency dynamics of coherent wave mixing in semiconductor quantum wells
[DE94-003262] p 3054 N94-26128
Laser-based communication link
[FFI-93/7023] p 2817 N94-26203
Diode-laser-pumped, gas-cell atomic clocks
[AD-A274812] p 3008 N94-26484

SEMICONDUCTORS (MATERIALS)
Bulletin of National Research Institute for Metals in Fiscal Year 1993, no. 14
[REPT-14] p 2722 N94-25544
Failure mechanisms of high temperature semiconductor lasers
[AD-A273833] p 2815 N94-25616
Hydrogen uptake into silicon from an ECR plasma
[DE94-003771] p 3050 N94-25815
On the estimation of matrix elements for optical transitions in semiconductors
[DE93-613550] p 3051 N94-25851
On radiation defects in strip detectors
[DE93-616646] p 3015 N94-25916
The AFIT multielectrode array for neural recording and simulation: Design, testing, and encapsulation
[AD-A274086] p 2909 N94-25943
Determination of surface recombination velocity and bulk lifetime in detector grade silicon and germanium crystals
[DE94-003886] p 3053 N94-26094
Lithium drifted silicon detector fabrication on gettered floating-zone silicon
[DE94-003890] p 3054 N94-26095

Se EXAFS study of the elevated wurtzite to rock salt structural phase transition in CdSe nanocrystals [DE94-003247] p 3054 N94-26125

Instantaneous amplitude and frequency dynamics of coherent wave mixing in semiconductor quantum wells [DE94-003262] p 3054 N94-26128

Studies of thin-film growth, adsorption, and oxidation by in situ, real-time, and ex situ ion beam analysis [DE94-002907] p 3055 N94-26275

Exploration of GaAs structures for solid-state detectors [DE93-634191] p 3056 N94-26379

On the electron mobility in slightly compensated heavily doped gallium arsenide at low temperatures [DE93-634712] p 3057 N94-26387

Translational-energy-resolved studies of photogenerated carrier-induced reactions on UHV semiconductor surfaces [DE94-004169] p 3058 N94-26526

Diagnostics and microelectronics [DE94-003016] p 2784 N94-26777

Mechanistic studies of opto-electronic materials and syntheses using multiple laser and surface diagnostics [AD-A274528] p 3036 N94-26834

Nitride semiconductors for ultraviolet detection [AD-A274246] p 3060 N94-26840

Effect of impurity correlation on the density of states in slightly compensated heavily doped semiconductors [DE94-602539] p 3061 N94-26879

A model of electric breakdown in polycrystalline semiconductors with highly nonlinear I - V characteristics [DE94-601537] p 3063 N94-27017

AC to DC power converter with regulated bi-polar outputs [AD-D016032] p 2786 N94-27145

Technical report of ISSP. Ser. A, no. 2674: High-field cyclotron resonance and impurity transition in n- and p-3C-SiC at magnetic fields up to 175 T [JTN-94-80560] p 3064 N94-27232

Technical report of ISSP. Ser. A, no. 2675: High-field cyclotron resonance and valence-band structure in semiconducting diamond [JTN-94-80561] p 3065 N94-27245

Optimising BMW four-cylinder two-valve engines [PB94-125101] p 2824 N94-27254

Decay of non-equilibrium polariton condensate in semiconductors [DE94-604016] p 3068 N94-27678

SENSITIVITY

A sensitivity equation approach to shape optimization in fluid flows [NASA-CR-191598] p 2999 N94-27415

SENSORIMOTOR PERFORMANCE

On the development of motor chunks and concurrent processing in a structured continuous keypressing task [AD-A274153] p 2939 N94-27138

Pigs in cyberspace p 2689 N94-27376

SENSORY PERCEPTION

Cortical mechanisms of attention, discrimination, and motor response to somesthetic stimuli [AD-A274163] p 2940 N94-27141

Annals of the Research Inst. of Environmental Medicine, Nagoya Univ., volume 44 [REPT-44-VOL-44] p 2911 N94-27442

SENSORY STIMULATION

Changes in pain sensation induced by repetitive application of noxious heat pulses to the human skin p 2924 N94-27501

SEPAC (PAYLOAD)

Space Experiments with Particle Accelerators (SEPAC) [NASA-CR-193935] p 2761 N94-27664

SEPARATED FLOW

Flow past a circular cylinder with a permeable wake splitter plate [AD-A273765] p 2790 N94-25872

Behaviour of separation bubbles in sharp-edged gaps of finite dimensions [ISBN-0-315-84113-3] p 2793 N94-26637

Control of leading-edge separation on an airfoil by localized excitation [DLR-FB-93-16] p 2647 N94-27592

Flowfield dynamics in blunt fin-induced shock wave/turbulent boundary layer interactions [NASA-CR-195170] p 2798 N94-27802

Investigation of aerodynamic design issues with regions of separated flow p 2658 N94-27902

Separated flow generated by a vectored jet in a crossflow p 2800 N94-28007

A numerical investigation of a subsonic jet in a crossflow p 2803 N94-28023

Theoretical and experimental investigation of a delta wing with turbulent leading-edge jets p 2659 N94-28029

Potential flow modelling of airfoil stall p 2654 N94-28332

Attached and separated trailing edge flow measurements with a triple-split hot-film probe p 2656 N94-28339

A study of blunt trailing edge airfoils using the Navier Stokes code: ARC2D p 2656 N94-28340

Thin-layer Navier-Stokes computations for multi-element airfoils p 2656 N94-28341

SEPARATION

Vortex generators for control of shock-induced separation. Part 1: Introduction and aerodynamics [ESDU-93024-PT-1] p 2806 N94-28095

Vortex generators for control of shock-induced separation. Part 3: Examples of applications of vortex generators to aircraft [ESDU-93026-PT-3] p 2807 N94-28096

SEPARATORS

A Shuttle mechanism for molten-electrolyte lithium batteries [DE94-002914] p 2781 N94-26144

Development of laser spectroscopic technology in nuclear industry [DE93-633327] p 2714 N94-26158

Performance model of a recirculating stack nickel hydrogen cell p 2861 N94-28112

SEQUENCING

One machine scheduling with delayed precedence constraints [PB93-237626] p 3094 N94-26314

SERIES EXPANSION

Asymptotics for Kummer functions, Bose plasmas, and related special functions [DE94-601853] p 3007 N94-26928

SEROTONIN

Abnormal development of serotonin nerve fibers in the cerebral cortex of young rats with methylazoxymethanol induced microcephaly p 2905 N94-27485

SERVICE LIFE

Computer modelling of cyclic deformation of high-temperature materials [AD-A273852] p 2704 N94-25608

Stress relaxation in dough moulding compounds [PB94-124872] p 2748 N94-25894

Aircraft wheel life assessment [AD-A274378] p 2823 N94-26976

The development of stress intensity factors [DRA-TR-93057] p 2845 N94-27954

Software assurance standard [NASA-TM-109705] p 2975 N94-27992

SAFT nickel hydrogen cell cycling status p 2861 N94-28110

Cycle life versus depth of discharge update on modeling studies — Nickel-Hydrogen Batteries p 2862 N94-28115

Orbital management and design considerations for NiCd satellite power systems p 2862 N94-28118

AF Ni-Cd cell qualification program p 2863 N94-28122

Discriminating performance parameters for 50 amp-hour and 60 amp-hour nickel-cadmium plates and battery cells p 2863 N94-28123

Ni-MH storage test and cycle life test p 2864 N94-28131

SET THEORY

Set based analysis of arithmetic [AD-A274112] p 3002 N94-25903

Some properties of graphs with local Ore conditions [PB94-126612] p 2996 N94-26962

Graphs satisfying a local ore-type condition [PB94-126679] p 3007 N94-27222

Ranking alternatives using fuzzy numbers: A computational approach short communication [INPE-5483-PRE/1782] p 2974 N94-27835

SEWING

Variable speed controller p 2943 N94-25678

SHADOWS

Direct evidence of the interplanetary magnetic field effect on the cosmic-ray shadow by the sun [ICRR-296-93-8] p 3116 N94-27607

SHAKING

Shake test results of the MDHC test stand in the 40- by 80-foot wind tunnel [NASA-TM-108801] p 2641 N94-26596

SHALLOW SHELLS

The free vibration of plates, shallow shells and solids [ISBN-0-315-83931-7] p 2838 N94-26622

Refined triangular plate and shell elements [PB94-126356] p 2839 N94-26875

SHALLOW WATER

Remote sensing and GIS for the management and investigation of the Wadden Sea [BCRS-92-20] p 2847 N94-26228

Nonlinear ocean waves [AD-A274651] p 2899 N94-26354

SHAPE CONTROL

MIMO recursive least squares control algorithm for the AN/FPN-44A Loran-C transmitter [AD-A274820] p 2664 N94-26493

SHAPE FUNCTIONS

The identification of inflow fluid dynamics parameters that can be used to scale fatigue loading spectra of wind turbine structural components [DE94-000231] p 2791 N94-26117

SHAPE MEMORY ALLOYS

SAG compensated vibration isolation mount [AD-D016040] p 2841 N94-27110

Modelling and stability of a shape memory alloy position control system [ISBN-0-315-84467-1] p 2740 N94-27304

SHAPES

Effect of nitrocarburizing on shape of titanium alloy parts [DE94-004040] p 2732 N94-25822

Endogeneous and exogenous control of visual selection: A review of the literature [AD-A273761] p 2908 N94-25871

Morphology transitions during non-equilibrium growth processes [ITN-94-85236] p 3065 N94-27243

Interactive shape metamorphosis [NASA-CR-191597] p 2970 N94-27417

Mach reflection of spherical detonation waves [DE93-016604] p 2797 N94-27705

SHEAR FLOW

Shear flow generation from the interaction of neoclassical and drift wave transport processes [DE94-003135] p 2791 N94-26096

The effects of three-dimensional imposed 3-d disturbances on bluff-body near wake flows [AD-A274845] p 2791 N94-26187

On prediction of equilibrium states in homogeneous compressible turbulence [NASA-CR-4570] p 2792 N94-26467

Numerical studies on the dynamics of bubble, turbulent, free shear flows: Effect of the inter-phase coupling on the global flow evolution [AD-A274521] p 2794 N94-26832

Surface roughness lengths [AD-A274550] p 2895 N94-26846

Numerical simulation of turbulent free jet by TFKE model p 2871 N94-28157

SHEAR LAYERS

Numerical studies on the dynamics of bubble, turbulent, free shear flows: Effect of the inter-phase coupling on the global flow evolution [AD-A274521] p 2794 N94-26832

Recent developments in the simulation of steady and transient transverse jet interactions for missile, rotorcraft, and propulsive applications p 2804 N94-28030

SHEAR PROPERTIES

Aluminum alloy 8090-T8771 thick plate material characterization [AD-A274146] p 2987 N94-27077

SHEAR STRESS

Formulae for the buckling of simply-supported corrugated panels of orthotropic material under shear load [PB94-126547] p 2840 N94-26911

Experimental verification of tomographic reconstruction of turbulent air flow structure using optical wavefront measurements [AD-A274392] p 2795 N94-27129

Implementation of thermal residual stresses in the analysis of fiber bridged matrix crack growth in titanium matrix composites [NASA-TM-109082] p 2711 N94-27658

SHELL THEORY

Electron energy loss spectroscopy in a crystalline environment using inner shell ionization [DE94-601820] p 3018 N94-26334

SHELTERS

Portable Habitat for Antarctic Scientific Research (PHASR) p 2943 N94-25681

Pax: A permanent base for human habitation of Mars p 2943 N94-25706

Safety standards for aircraft shelter [FFI-92/4003] p 2680 N94-26305

SHIP HULLS

Weldability aspects in the design and fabrication of aluminium structures subjected to fatigue loads. Part 1: Effect of welding on the structural integrity of joint types designed for repairing aluminium ship sections [PB94-132487] p 2833 N94-28378

SHIPS

Application of Space Shuttle Project Hercules imagery in the investigation of ship cloud tracks [AD-A274923] p 2692 N94-26529

Technical Report of National Research Institute of Fisheries Engineering: Fishing Boat and Instrument, No. 12
[JTN-94-80595] p 2764 N94-27976
Recent trend of domestic and international regulations on intact stability of ships for safety
p 2764 N94-27977
E. H. P. estimation of high speed fishing boats by some existing methods p 2764 N94-27978

SHOCK DISCONTINUITY
A second-order shock-adaptive Godunov scheme based on the generalized Lagrangian formulation
[ISBN-0-315-84549-X] p 2795 N94-27307
Techniques for accurately solving unsteady shock waves and contact discontinuities p 2656 N94-28342

SHOCK LAYERS
Nonequilibrium radiation and chemistry models for aerocapture vehicle flowfields
[NASA-CR-195706] p 2648 N94-28071

SHOCK LOADS
Bibliographic Retrieval System (BARS) Sandia Shock Compression (SSC) database Shock Physics Index (SPHINX) database, volume 3
[DE94-001705] p 3099 N94-27022

SHOCK RESISTANCE
Method for improving electromagnetic shielding performance of composite materials by electropulsing
[AD-D016050] p 2709 N94-27076

SHOCK TESTS
Deviatoric stresses and plastic strain rates in strong shock waves for six metals
[DE94-002964] p 2733 N94-26022

SHOCK TUBES
Basic research on natural gas combustion phenomena
[PB94-129046] p 2717 N94-27256

SHOCK TUNNELS
A numerical study of mixing and combustion in hypervelocity flows through a scramjet combustor model
p 2808 N94-27911
Experiments on interaction force of jets in hypervelocity cross-flow in a shock tunnel p 2659 N94-28022

SHOCK WAVE INTERACTION
Shock wave interaction with L-shaped structures
[AD-A273774] p 2790 N94-25858
Flowfield dynamics in blunt fin-induced shock wave/turbulent boundary layer interactions
[NASA-CR-195170] p 2798 N94-27802
Vortex generators for control of shock-induced separation. Part 1: Introduction and aerodynamics
[ESDU-93024-PT-1] p 2806 N94-28095
Vortex generators for control of shock-induced separation. Part 3: Examples of applications of vortex generators to aircraft
[ESDU-93026-PT-3] p 2807 N94-28096
Interaction of the sonic boom with atmospheric turbulence p 2650 N94-28191
Experimental study on the shock wave interaction with a hypersonic boundary layer near a convex corner
p 2654 N94-28328

SHOCK WAVE PROFILES
A new flux vector splitting scheme
p 2657 N94-28343

SHOCK WAVE PROPAGATION
Experimental and numerical investigation of shock wave propagation through complex geometry, gas continuous, two-phase media
[DE94-001408] p 2791 N94-26121
Approximate Riemann solvers: Improvement of the HLLEM scheme and its generalization for chemically reacting flows
[NAL-TR-1189] p 2795 N94-27205
Theoretical and experimental investigation of converging cylindrical shock waves propagating in narrow cylindrical chambers
[ISBN-0-315-84694-1] p 2795 N94-27313
High-Speed Research: Sonic Boom, Volume 1
[NASA-CP-10132] p 2649 N94-28188
Progress in modeling atmospheric propagation of sonic booms p 2650 N94-28189
Techniques for accurately solving unsteady shock waves and contact discontinuities p 2656 N94-28342

SHOCK WAVES
Deviatoric stresses and plastic strain rates in strong shock waves for six metals
[DE94-002964] p 2733 N94-26022
Iron: What is melt?
[DE94-003373] p 2735 N94-26322
Mix induced by single shock passage through a material interface
[DE93-019505] p 2792 N94-26427
Numerical simulation of the reignition of detonation by reflected shocks
[AD-A274755] p 2795 N94-27252
A second-order shock-adaptive Godunov scheme based on the generalized Lagrangian formulation
[ISBN-0-315-84549-X] p 2795 N94-27307
Theoretical and experimental investigation of converging cylindrical shock waves propagating in narrow cylindrical chambers
[ISBN-0-315-84694-1] p 2795 N94-27313
Collisionless shock structures of Earth and other planets
[NASA-CR-195257] p 3104 N94-27407
An improvement in the modified finite element procedure for underwater shock analysis
[DE94-004451] p 2797 N94-27617
TVD flux-difference split methods for high-speed thermochemical nonequilibrium flows with strong shocks
[UTIAS-350] p 2799 N94-27880
Inclined air-jets used as vortex generators to suppress shock-induced separation p 2659 N94-28040
Nonequilibrium radiation and chemistry models for aerocapture vehicle flowfields
[NASA-CR-195706] p 2648 N94-28071
Computation of static pressure downstream of a normal shock for hypersonic flight (ambient temperature known)
[ESDU-93020] p 2649 N94-28091

SHORELINES
Mapping coastal habitats using an imaging spectrometer
[ISBN-0-315-84362-4] p 2848 N94-26664

SHORT CRACKS
Early stages in the development of stress corrosion cracks
[DE94-003867] p 2838 N94-26524
Fatigue propagation behaviour of short cracks (1-2 mm) in steels
[ESDU-93033] p 2845 N94-28145

SHORT TAKEOFF AIRCRAFT
Wind tunnel investigation of an STOL aircraft model: An effect of engine nacelle shape
[NAL-TM-653] p 2647 N94-27235
A study of jet effect and ground effect interference on a STOL fighter p 2671 N94-28034

SHRINKAGE
Stress relaxation in dough moulding compounds
[PB94-124872] p 2748 N94-25894

SHROUDED TURBINES
Bulk-Flow Analysis, part A
[NASA-CR-193911-PT-A] p 2796 N94-27377
Influence of impeller shroud forces on turbopump rotor dynamics p 2796 N94-27378
Compressibility effects on rotor forces in the leakage path between a shrouded pump impeller and its housing
p 2796 N94-27379

SHUTDOWNS
Aircraft turbine engine reliability and inspection investigations
[AD-A274860] p 2673 N94-26176

SHUTTLE ENGINEERING SIMULATOR
Status report of RMS active damping augmentation
p 2684 N94-26285

SIDE-LOOKING RADAR
A comparative evaluation of SAR and SLAR
[DE94-002922] p 2848 N94-26277

SIDELOBES
Analyzing adaptive beamformer performance in a stable multipath environment
[AD-A274029] p 2766 N94-25766

SIDESLIP
Pressure distributions on a 0.02-scale Space Shuttle orbiter nose at Mach 21.5 in helium
[NASA-TM-4495] p 2646 N94-26592
Contribution of body-mounted fins and tailplanes to lateral derivatives due to sideslip at subsonic speeds for general body width to height ratio
[ESDU-93007] p 2648 N94-28057

SIGNAL ANALYSIS
Parametric time-scale methods in signal analysis
[AD-A274212] p 2773 N94-27068
Trace organic chemical detection using an ultraviolet excitation molecular beam fluorometer
[DE94-002649] p 2704 N94-27708
MUSIC for localization of thunderstorm cells
[DE94-004985] p 2897 N94-28146

SIGNAL ANALYZERS
Rapid prototyping of application specific signal processors (RASSP)
[AD-A274324] p 2772 N94-26884

SIGNAL DETECTION
Detection of transient vector-fields in additive noise
[FFI-93/7028] p 2768 N94-26232
Prewhitening of colored noise fields for detection of threshold sources
[AD-A274346] p 3010 N94-26923
Short-block data detection techniques employing channel estimation for fading time-dispersive channels
[ISBN-0-315-58970-1] p 2777 N94-27806

SIGNAL DETECTORS
Signal amplifier-shapers for multiwire detectors
[DE93-634171] p 2783 N94-26438
High temperature sensor/microphone development for active noise control
[NASA-CR-195214] p 2812 N94-27214

SIGNAL ENCODING
Speech coding at low to medium bit rates
[ISBN-0-315-84012-9] p 2770 N94-26630
Coded communications with nonideal interleaving
[ITN-94-85235] p 2774 N94-27242

SIGNAL FLOW GRAPHS
A real-time convolution algorithm and architecture with applications in SAR processing
[AD-A273817] p 2959 N94-25963

SIGNAL PROCESSING
Digital input module
[DIGEL-1993-6] p 2779 N94-25620
Analysis and simulation of a GPS receiver design using combined delay-lock and modified tanlock loops
[AD-A274037] p 2664 N94-25810
A real-time convolution algorithm and architecture with applications in SAR processing
[AD-A273817] p 2959 N94-25963
Developing a graphical user interface to support a real-time digital signal processing system
[AD-A274032] p 2960 N94-26018
Emerging technologies
[DE94-003022] p 3102 N94-26023
Code division multiple access local area network communications employing fiber optic signal processing techniques
[AD-A274897] p 3096 N94-26180
Direct-conversion-to-baseband for a nonlinear FM signal
[AD-A274861] p 2768 N94-26189
Machine intelligent gust front algorithm
[AD-A273695] p 2680 N94-26196
The 12-channel flash-ADC FASTBUS module
[DE93-634229] p 2783 N94-26380
Low threshold all-optical crossbar switch on GaAs-GaAlAs channel waveguide arrays
[AD-A274971] p 2783 N94-26536
An integrated delta-sigma based IIR filter
[ISBN-0-315-83593-1] p 2784 N94-26631
Design and implementation of a multiprocessor for DSP and communications systems algorithm evaluation
[ISBN-0-315-84128-1] p 2980 N94-26674
Development of GaAs charge-coupled devices
[ISBN-0-315-84116-8] p 3059 N94-26703
Combatting inherent vulnerabilities of CFAR algorithms and a new robust CFAR design
[AD-A274918] p 2770 N94-26751
Automated fabric inspection system
[AD-A274522] p 2835 N94-26833
A current evaluation of the digital beamforming testbed at Rome Laboratory
[AD-A274311] p 3032 N94-26881
Rapid prototyping of application specific signal processors (RASSP)
[AD-A274324] p 2772 N94-26884
Causal fir matrices with anticausal fir inverses, and application in characterization of biorthonormal filter banks
[AD-A274509] p 2998 N94-27035
Monaural and binaural processing of complex waveforms
[AD-A274209] p 3010 N94-27067
Parametric time-scale methods in signal analysis
[AD-A274212] p 2773 N94-27068
Enhanced adaptive statistical filter providing improved performance for target motion analysis noise discrimination statement of government interest
[AD-D016039] p 2786 N94-27109
CCD-Camera images of BEST-TWO and processing results
[AD-A274140] p 2811 N94-27134
Focal plane antenna array for millimeter waves
[AD-D016034] p 2774 N94-27202
Beamforming/null-steering adaptive array
[CA-PATENT-1325260] p 2775 N94-27270
Acousto-optical post-processor time-integrating correlator calibration updates
[DSIS-94-00053] p 2813 N94-27317
Development of digital resampling and pulse compression computer software
[DREP-92-32] p 2969 N94-27318
Fiber optic true time-delay array antenna feed system
[AD-D016063] p 2777 N94-27734
Thunderstorm Hypothesis Reasoner
[NASA-CR-195714] p 2897 N94-27884
The 1994 Space and Earth Science Data Compression Workshop
[NASA-CP-3255] p 2945 N94-28251

SIGNAL REFLECTION
Binaural room simulation
[AD-A273823] p 3009 N94-25737

SIGNAL TO NOISE RATIOS
Hyperspectral analysis of space objects: Signal to noise evaluation
[AD-A273882] p 2765 N94-25728
Performance impacts for actuator misalignments and failures in large-aperture adaptive-optic telescopes
[AD-A273838] p 3034 N94-25742
Primary standards laboratory report 1st half 1993
[DE94-003138] p 2762 N94-26027
SIGNAL TRANSMISSION
Interference analysis of multichannel transmission lines: A system's analysis
[PB94-126505] p 2772 N94-26909
Monaural and binaural processing of complex waveforms
[AD-A274209] p 3010 N94-27067
SIGNATURES
The STAR experiment at the Relativistic Heavy Ion Collider
[DE94-003409] p 3017 N94-26083
Window least squares method applied to statistical noise smoothing of positron annihilation data
[DE93-634665] p 3003 N94-26385
Application of Space Shuttle Project Hercules imagery in the investigation of ship cloud tracks
[AD-A274923] p 2692 N94-26529
Signatures for hybrids
[DE94-004244] p 3020 N94-26574
Experimental studies of loudness and annoyance response to sonic booms p 2651 N94-28195
Variability of measured sonic boom signatures
p 2651 N94-28197
Were all extinction events caused by impacts?
p 2891 N94-28311
SIGNIFICANCE
Example of statistical techniques applied to analysis of effects of small changes
[ESDU-93023] p 2670 N94-28094
SIGNS AND SYMPTOMS
Symptoms of hypoxia at simulated altitude of 25,000 feet p 2933 N94-27945
SIKORSKY AIRCRAFT
S-76 high intensity radiated fields, volume 1
[AD-A274571] p 2771 N94-26854
S-76 high intensity radiated fields, volume 3
[AD-A274416] p 2772 N94-26980
SILANES
The importance of vibrationally excited nitrogen in silicon nitride deposition systems
[AD-A274874] p 2750 N94-26167
SILICA GLASS
Inert strength of pristine silica glass fibers
[DE94-004685] p 2750 N94-26247
Nanoscale plasticity in silica glass
[DE94-004212] p 2751 N94-26554
The deposition of boron nitride and carbon films on silica glass fibers
[DE94-004684] p 2751 N94-26564
Mechanism of mechanical fatigue of silica glass
[DE94-003165] p 2753 N94-26783
SILICATES
Optimization of experimental conditions in IR reflectance determination of BPSG properties
[DE94-002742] p 2713 N94-25978
Ion implantation in silicate glasses
[DE94-003785] p 2757 N94-27726
SILICIDES
Binding of copper and nickel to cavities in silicon formed by helium ion implantation
[DE94-003769] p 3050 N94-25814
Dissolution of secondary phases during extrusion
[PB94-124583] p 2732 N94-25908
Stress relaxation in sputtered W films and W/GeSi/Si heterostructures
[DE94-004007] p 3055 N94-26239
Microstructures of Si surface layers implanted with Cu
[DE94-004690] p 3058 N94-26565
SILICON
Binding of copper and nickel to cavities in silicon formed by helium ion implantation
[DE94-003769] p 3050 N94-25814
Hydrogen uptake into silicon from an ECR plasma
[DE94-003771] p 3050 N94-25815
The structural, chemical, and electrical properties of He-implantation-induced nanocavities in silicon
[DE94-002681] p 3052 N94-25971
Determination of surface recombination velocity and bulk lifetime in detector grade silicon and germanium crystals
[DE94-003886] p 3053 N94-26094
Lithium drifted silicon detector fabrication on gettered floating-zone silicon
[DE94-003890] p 3054 N94-26095
Light emitting porous silicon
[AD-A274152] p 3038 N94-27137
Simulations of terrestrial in-situ cosmogenic-nuclide production
[DE94-004999] p 3117 N94-27826
Dry etching process development for submicron and nanometer semiconductor devices
[PB94-133196] p 2788 N94-28357
SILICON ALLOYS
Study on production of materials with one direction solidification texture p 2727 N94-25572
Recombination and metastability in amorphous silicon and silicon germanium alloys
[DE94-000237] p 2736 N94-26481
Hot deformation behaviour of Si(p)/Al composites and their matrices and an Al-Mg-Si alloy
[ISBN-0-315-84699-2] p 2711 N94-27314
Continuous roll-to-roll a-Si photovoltaic manufacturing technology
[DE94-000260] p 2859 N94-27610
Production of an amorphous Fe(75)Si(10)B(15) sheet by a metallic mold casting method and its properties
p 2746 N94-28170
SILICON CARBIDES
An investigation of cavitation in a mechanically alloyed 15 volume percent SiCp/IN9021 aluminum composite
[DE94-003371] p 2748 N94-25959
Investigation of tension-compression fatigue behavior of a cross-ply metal matrix composite at room and elevated temperatures
[AD-A273731] p 2706 N94-25999
Effects of post-fabrication processing on the tensile properties of centrifugally cast SiC particulate reinforced aluminum composites
[AD-A274865] p 2707 N94-26190
Deposition of a-SiC:H using organosilanes in an argon/hydrogen plasma
[DE94-004428] p 2751 N94-26580
Electron microscopy of AlN-SiC interfaces and solid solutions
[DE94-002449] p 3059 N94-26765
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device development
[AD-A274247] p 3061 N94-26841
Atomic layer epitaxy of group 4 materials: Surface processes, thin films, devices and their characterization
[AD-A274325] p 3061 N94-26885
Low temperature deposition and characterization of N- and p-type silicon carbide thin films and associated ohmic and Schottky contacts
[AD-A274345] p 2754 N94-26974
Interface properties of wide bandgap semiconductor structures
[AD-A274356] p 3063 N94-27058
Technical report of ISSP. Ser. A, no. 2674: High-field cyclotron resonance and impurity transition in n- and p-3C-SiC at magnetic fields up to 175 T
[JTN-94-80560] p 3064 N94-27232
Hot deformation behaviour of Si(p)/Al composites and their matrices and an Al-Mg-Si alloy
[ISBN-0-315-84699-2] p 2711 N94-27314
Influence of lattice damage on retention and transport of deuterium in beta silicon carbide
[DE94-005206] p 3068 N94-27693
Experiment and research on materials irradiated by plasma radiation
[DE94-605011] p 2758 N94-27845
Low strain behaviour of a particulate reinforced aluminum alloy
[ISBN-0-315-84906-1] p 2744 N94-27961
SILICON DIOXIDE
Study on reactions between molten metal and oxide by magnetic flotation dissolution method
p 2725 N94-25558
Study on synthesis and characteristics of intermetallic compound with strong electron correlation
p 2726 N94-25563
The microstructural response of granular soil under uniaxial strain
[AD-A274808] p 2763 N94-26341
A space fiber-optic x ray burst detector
[DE94-002722] p 2696 N94-26808
Technical report of ISSP. Ser. A, no. 2671: Quasi-localization of light waves in Fibonacci dielectric multilayers
[JTN-94-80557] p 3064 N94-27231
Simulations of terrestrial in-situ cosmogenic-nuclide production
[DE94-004999] p 3117 N94-27826
SILICON FILMS
Electron microscopy studies of undoped and phosphorus doped Si:H and Si,C:H films
[DE94-004738] p 3069 N94-27757
SILICON ISOTOPES
Production of (phi) mesons in central Si + Au collisions at 14.6 AGeV/c
[DE94-003196] p 3012 N94-25795
On radiation defects in strip detectors
[DE93-616646] p 3015 N94-25916
The Cherenkov hadronic like-jets
[DE93-634525] p 3016 N94-26010
Sol-gel derived silica/siloxane composite materials: The effect of loading level and catalyst activity on silica domain formation
[DE94-002734] p 2712 N94-27710
SILICON NITRIDES
The fracture behavior of a CVD crystalline Si3N4/amorphous Si3N4 composite
[DE94-002646] p 2750 N94-26124
The importance of vibrationally excited nitrogen in silicon nitride deposition systems
[AD-A274874] p 2750 N94-26167
SILICON OXIDES
Sol-gel derived silica/siloxane composite materials: The effect of loading level and catalyst activity on silica domain formation
[DE94-002734] p 2712 N94-27710
SILICON POLYMERS
Color head down display program
[AD-A274807] p 2672 N94-26340
SILICON RADIATION DETECTORS
Lithium drifted silicon detector fabrication on gettered floating-zone silicon
[DE94-003890] p 3054 N94-26095
Gamma Large Area Silicon Telescope (GLAST): Applying silicon strip detector technology to the detection of gamma rays in space
[DE94-003451] p 3116 N94-27740
SILICON TRANSISTORS
Silicon device performance measurements to support temperature range enhancement
[NASA-CR-195265] p 2844 N94-27824
SILOXANES
Sol-gel derived silica/siloxane composite materials: The effect of loading level and catalyst activity on silica domain formation
[DE94-002734] p 2712 N94-27710
SILVER ALLOYS
Liquid and solid solubility of Ag in Bi2Sr2CaCu2O8
[DE94-002829] p 2735 N94-26273
SILVER BROMIDES
The Cherenkov hadronic like-jets
[DE93-634525] p 3016 N94-26010
SILVER OXIDES
Atomic-scale chemistry of metal surfaces
[REPT-A-2657] p 3012 N94-25636
SILVER ZINC BATTERIES
Battery study for the Mars Environmental Survey (MESUR) Pathfinder p 2860 N94-28105
Bipolar Ag-Zn battery p 2864 N94-28135
Advanced silver zinc battery development for the SRB and ET range safety subsystems p 2865 N94-28136
SILVICULTURE
SIMA: A model for forest succession based on the carbon and nitrogen cycles with application to silvicultural management of the forest ecosystem
[SILVA-CARELICA-22] p 2848 N94-26258
SIMPLEX METHOD
A simplicial approach to integer programming, part 2
[REPT-93-47-PT-2] p 2958 N94-25764
SIMULATED ANNEALING
The application of simulated annealing to stochastic systems
[AD-A273850] p 3001 N94-25607
SIMULATION
Zr-rich corner of the Zr-Sn-O diagram
[DE93-633764] p 2734 N94-26161
Fire simulation based on convection calculation
[VTT-TIED-1411] p 2762 N94-26259
Numerical simulation of plasma vertical position stabilization in ITER
[DE93-634588] p 3044 N94-26510
Feasibility study on introduction of transportation-use petroleum substitution energy
[DE94-725205] p 2759 N94-26905
Modal logic, transition systems and processes
[CWI-CS-R9321] p 2970 N94-27549
Forward and backward simulations. Part 1: Untimed systems
[CWI-CS-R9313-PT-1] p 2972 N94-27580
Forward and backward simulations. Part 2: Timing-based systems
[CWI-CS-R9314-PT-2] p 2972 N94-27581
Simulations of terrestrial in-situ cosmogenic-nuclide production
[DE94-004999] p 3117 N94-27826
Transient model applications. 1: Compressor heat soak/clearance effects modeling p 2828 N94-28048

SIMULATORS
Knowledge organization in intelligent tutoring systems for diagnostic problem solving in complex dynamic domains
[AD-A273986] p 2984 N94-25899
Rocket engine numerical simulation
p 2688 N94-27375
The design of a counter rotating ultra-high-bypass fan simulator for windtunnel investigation
[DLR-FB-93-20] p 2675 N94-27739
Simulating high-frequency wind for long durations
[DE94-002739] p 2682 N94-27997
Experimental studies of loudness and annoyance response to sonic booms p 2651 N94-28195
SINE WAVES
Multiple model adaptive control of a large flexible space structure with purposeful dither for enhanced identifiability
[AD-A274132] p 2987 N94-27122
SINGLE CRYSTALS
Study on synthesis and characteristics of intermetallic compound with strong electron correlation
p 2726 N94-25563
Study on computerized experiment of amorphous transformation process by solid phase reaction
p 2726 N94-25564
Ion implantation of diamond: Damage, doping, and lift-off
[DE94-001133] p 3054 N94-26137
Window least squares method applied to statistical noise smoothing of positron annihilation data
[DE93-634665] p 3003 N94-26385
Growth, characterization and device development in monocrystalline diamond films
[AD-A274245] p 3060 N94-26839
Atomic layer epitaxy of group 4 materials: Surface processes, thin films, devices and their characterization
[AD-A274325] p 3061 N94-26885
Indium donor complexes with cation vacancies in CdTe and ZnSe
[DE94-002731] p 3063 N94-26958
Deformation, constitutive behavior, and damage of advanced structural materials under multiaxial loading
[AD-A274165] p 2709 N94-27142
Float zone crystal growth using laser radiation
[DLR-FB-93-10] p 3066 N94-27590
Effect of temperature and recoil-energy spectra on irradiation-induced amorphization in Ca2La8(SiO4)6O2
[DE94-004371] p 3067 N94-27602
SINGLE EVENT UPSETS
Modeling and experimental verification of single event upsets p 2684 N94-26287
SINGLE STAGE TO ORBIT VEHICLES
Access to space study
[NASA-TM-109693] p 2685 N94-27151
A parametric sensitivity study for single-stage-to-orbit hypersonic vehicles using trajectory optimization
[NASA-CR-195703] p 2697 N94-27789
SINGULARITY (MATHEMATICS)
Towards a theory of growing surfaces: Mapping two-dimensional Laplacian growth onto Hamiltonian dynamics and statistics
[DE94-002636] p 2991 N94-26079
Numerical solution of singularity-perturbed two-point boundary-value problems
[DE94-601542] p 2993 N94-26410
SINKS
Simulation of the carbon cycle in the oceans
[DE94-000780] p 2898 N94-25791
SINTERING
Study on high temperature damage control and life improvement p 2729 N94-25580
Grain boundary degradation of YBCO superconductors sintered in CO2-containing atmospheres
[DE94-003206] p 3053 N94-26029
Alternative materials for solid oxide fuel cells: Processing and interactions of materials
[DE94-000016] p 2855 N94-26114
Processing of LaCrO3 for solid oxide fuel cell applications
[DE94-002981] p 2857 N94-26747
Examination of hardness, fracture toughness and microstructure in Al2O3-B4C binary ceramics
[PB94-124237] p 2755 N94-27158
Transparent polycrystalline body with high ultraviolet transmittance, process for making and applications thereof
[CA-PATENT-1325511] p 3066 N94-27276
SIS (SUPERCONDUCTORS)
A compact 150 GHz SIS receiver cooled by 4 K GM refrigerator
[REPT-36] p 2776 N94-27340
SIZE DISTRIBUTION
Study of precipitation and recrystallization in Al alloy 2519 by backscattered electron imaging methods
[AD-A274919] p 2736 N94-26533
Size distribution of retrogradely labeled dorsal root ganglion cells: Test of normality p 2906 N94-27500
Effect of precipitate structure on hot deformation of Al-Mg-Mn alloys
[DE94-004596] p 2741 N94-27622
SKIDDING
Tests of highly loaded skids on a concrete runway
[NASA-TP-3435] p 2669 N94-26608
SKIN (ANATOMY)
Thyroid hormone action in cultured human skin fibroblasts: Evaluation using spheroid culture
p 2919 N94-27478
Changes in pain sensation induced by repetitive application of noxious heat pulses to the human skin
p 2924 N94-27501
Hyperalgesia to cold in patients with Subacute Myelo-Optico-Neuropathy (SMON) p 2928 N94-27521
Effect of prostaglandin E1 on the relationship between skin sympathetic nerve activity and reduction in skin blood flow p 2929 N94-27524
Difference in skin blood flow reduction depending on activating maneuver of skin sympathetic nerve activity
p 2929 N94-27525
An attempt of intraneural stimulation by microelectrode inserted in skin sympathetic nerve fascicle
p 2930 N94-27529
SKIN (STRUCTURAL MEMBER)
Impact tests on fibre metal laminates under a tensile load
[PB94-126570] p 2710 N94-27201
Investigation of the bond strength of a discrete skin-stiffener interface
[NLR-TP-92183-U] p 2670 N94-27796
SKIN FRICTION
Computational prediction of isolated performance of an axisymmetric nozzle at Mach number 0.90
[NASA-TM-4506] p 2646 N94-26547
SKY SURVEYS (ASTRONOMY)
BATSE burst location accuracy and constraints on the fraction of repeating GRB sources
[DE94-004981] p 3116 N94-27714
Sloan Digital Sky Survey
[DE94-004662] p 3103 N94-27750
In search of Nemesis p 2888 N94-28297
SLABS
Optical characterization and guided wave loss measurements for end-capped 6F-polybenzoxazole
[AD-A274586] p 3036 N94-26982
SLAGS
Study on reactions between molten metal and oxide by magnetic flotation dissolution method
p 2725 N94-25558
SLEDS
The development of a horizontal impact sled facility and subsequent crashworthiness experiments
[NIAR-93-15] p 2680 N94-26200
SLEEP
A comparison of sleep scored from electroencephalography to sleep scored by wrist actigraphy
[AD-A273739] p 2910 N94-26748
Workload transition: Implications for individual and team performance
[AD-A274538] p 2941 N94-26964
SLEEP DEPRIVATION
Effects of methamphetamine on vigilance and tracking during extended wakefulness
[AD-A274896] p 2909 N94-26179
Performance assessment in sustained operations using a computer-based synthetic work task
[AD-A274707] p 2937 N94-26430
SLENDER BODIES
Vibrations in engineering structures: A review of model and full-scale test of a cable-stayed bridge and a traffic sign gantry
[NLR-TP-92321-U] p 2843 N94-27553
SLENDER CONES
Pneumatic management of blunted-forebody flow asymmetry for high-angle-of-attack directional control
p 2679 N94-28028
SLIDING
Study on variation of damage generation mechanism by fatigue on TiAl compounds due to different slip systems p 2729 N94-25579
SLIDING FRICTION
Crystal chemistry and self-lubricating properties of monochalcogenides gallium selenide and tin selenide
[DE93-041177] p 2751 N94-26422
Guidelines for unlubricated sliding wear tests. Part 1: General approach
[PB94-119666] p 2825 N94-27322
Guidelines for unlubricated sliding wear tests. Part 2: Procedures for pin-on-disc testing
[PB94-123270] p 2825 N94-27324
SLOPES
Seasonal snow of arctic Alaska R4D investigations
[DE93-040082] p 2892 N94-25939
Improved measurement accuracy in a Long Trace Profiler: Compensation for laser pointing instability
[DE94-003408] p 2816 N94-26130
Wing lift increment at zero angle of attack due to deployment of single-slotted flaps at low speeds
[ESDU-93019] p 2649 N94-28140
SLOTS
Effects of slot on rock surface for percussive rock excavation: Water jet assisted percussive rock excavation p 2871 N94-28155
SLOTTED WIND TUNNELS
Evaluation of the buoyancy drag on automobile models in low speed wind tunnels p 2658 N94-28352
SMALL SCIENTIFIC SATELLITES
Copernicus: Lunar surface mapper .
p 3081 N94-25702
Norwegian ionospheric satellite experiment: High latitude, low Earth orbit plasma measurements
[FFI-93/7025] p 2876 N94-25807
A simple satellite system to locate gamma ray bursters using scintillating fiber technology
[DE94-601287] p 3117 N94-27996
SMART STRUCTURES
Influence of embedded optical fibers on compressive strength of advanced composites
[AD-A273775] p 2705 N94-25859
Proceedings of Damping 1993, volume 3
[AD-A274228] p 2840 N94-27008
Smart structures, an overview
[AD-A274147] p 2987 N94-27093
Intelligent material systems and structures. Part 6: Measurements of adhesion between optical fibres and composite materials
[PB94-123577] p 2756 N94-27215
SMOKE
Engineering Technical Letter (ETL) 93-5: Fire protection engineering criteria, electronic equipment installations
[AD-A274835] p 2762 N94-26084
SP industry calorimeter for rate of heat release measurements up to 10MW
[PB94-124211] p 2811 N94-27044
SMOOTHING
Time-step enlargement and optimal smoothing in Runge-Kutta time-integration algorithms by implicit and explicit smoothing
[NLR-TP-92221-U] p 2798 N94-27799
SNOW
Seasonal snow of arctic Alaska R4D investigations
[DE93-040082] p 2892 N94-25939
Development of a method for predicting snowfall intensity and compacted snow on roads
p 2853 N94-27990
Conception of snow information network system in Yamagata Prefecture p 2853 N94-27991
SNOW COVER
Remote sensing of global snowpack energy and mass balance: In-situ measurements on the snow of interior and Arctic Alaska
[NASA-CR-195704] p 2851 N94-27787
Report of the National Research Institute for Earth Science and Disaster Prevention, No. 51
[JTN-94-80509] p 2886 N94-27985
Development of a method for predicting snowfall intensity and compacted snow on roads
p 2853 N94-27990
Conception of snow information network system in Yamagata Prefecture p 2853 N94-27991
SOCIAL FACTORS
HDGEC activity in Asia Pacific region
p 2874 N94-28286
SOCIAL ISOLATION
A study of psychological factors affecting an extremely isolated environment p 2927 N94-27517
SODIUM
Convergent close-coupling calculation of electron-sodium scattering
[DE94-601815] p 3014 N94-25842
Zinc(2) oxide stability in alkaline sodium phosphate solutions at elevated temperatures
[DE94-003316] p 2715 N94-26320
Calculation of total cross sections for electron and positron scattering on sodium and potassium
[DE94-601814] p 3023 N94-26944
Fast and slow onsets of Na channel blocking actions due to lidocaine and disopyramide using concentration-clamp method p 2907 N94-27504
A study on tissue excitation of cardiac muscle under electrical field stimulation p 2907 N94-27510
Block of cardiac sodium channels by Ro 22-9194 (R), a new antiarrhythmic agent: Effects on the maximum upstroke velocity (Vmax) of single guinea pig ventricular myocytes p 2907 N94-27511

Electrophysiological effects of an antiarrhythmic drug, moricizine on isolated guinea pig ventricular muscles
p 2907 N94-27512

SODIUM IODIDES
Monte Carlo calculations of low background detector response
[DE94-004593] p 3116 N94-27621

SODIUM VAPOR
Studies for the loss of atomic and molecular species from Io
[NASA-CR-195702] p 3108 N94-27941

SOFTWARE ENGINEERING
System software and tools for high performance computing environments: A report on the findings of the Pasadena Workshop
[DE94-003918] p 2956 N94-25602
IGES 4.0 to LCAD translator for CSG models
[AD-A274013] p 2957 N94-25753
Abstraction in, specification and proof of software for a 1D heat-transfer problem
[REPT-93-45] p 2790 N94-25763
ObjectSim: A reusable object oriented DIS visual simulation
[AD-A274030] p 2958 N94-25767
Design of dynamically reconfigurable real-time software using port-based objects
[NASA-CR-195178] p 2958 N94-25777
Domain analysis and modeling of a model-based software executive
[AD-A274087] p 2958 N94-25783
Parallel Assessment Window System (PAWS) enhancements
[AD-A274094] p 2979 N94-25786
A method for populating the knowledge base of APTAS, a domain-oriented application composition system
[AD-A274034] p 2766 N94-25797
The television as robot servant
[AD-A273985] p 2984 N94-25898
Object interaction in a parallel object-oriented discrete-event simulation
[AD-A274084] p 2959 N94-25942
Developing a graphical user interface to support a real-time digital signal processing system
[AD-A274032] p 2960 N94-26018
Using database technology to support domain-oriented application composition systems
[AD-A274091] p 3096 N94-26024
Software redesign for usability: A case study
[DE94-003704] p 2960 N94-26048
Multimedia in Views
[CWI-CS-R9263] p 2961 N94-26218
The MUSA design methodology
[CWI-CS-R9265] p 3097 N94-26220
Development and analysis of secure embedded software
[VTT-TIED-1430] p 2961 N94-26254
Deductive computer programming
[AD-A274966] p 2962 N94-26303
Software Error Estimation Program (SWEEP), version 02.00.00 user manual
[AD-A274697] p 2962 N94-26373
Information systems criteria for applying software reengineering: Guidelines for identifying information systems for software reengineering
[AD-A274699] p 3097 N94-26375
Programming in Fortran M
[DE94-002756] p 2963 N94-26407
Bathymetric data set extraction program. Users guide
[AD-A274761] p 2899 N94-26567
Institute for Information Technology
[NRC-37061] p 3118 N94-26709
Fault tolerant real-time processing system for space use p 2949 N94-26720
On-board software for the JET-X telescope on the Spectrum-X mission p 2951 N94-26727
Tool for performance analysis and off-line prediction of timing behaviour p 2952 N94-26732
Developing with Ada using HOOD design methodology
p 2953 N94-26741
Use of HOOD coupled to real time monitors
p 2953 N94-26742
Ada reusable software for satellite on-board data handling p 2953 N94-26743
The CODE-TOP (COncurrent system DEvelopment using Transformations Of Predicate-transition nets) method: Examples of using it for system architecture specification, software specification, and code generation p 2953 N94-26744
Parallel mathematical software
[DE94-001587] p 2967 N94-27020
Static task allocation for parallel processing systems during software development
[AD-A274204] p 2981 N94-27100
A method for populating the knowledge base of AFIT's domain-oriented application composition system
[AD-A274128] p 3099 N94-27118
Alternative architectures for domain-oriented application composition and generation systems
[AD-A274180] p 2968 N94-27128
Research in improved assessment of software reliability
[AD-A274161] p 2968 N94-27140
Sculpting in cyberspace: Parallel processing the development of new software p 2686 N94-27365
Human computer interface guide, revision A
[NASA-TM-109708] p 2955 N94-27769
A proposed software engineering environment for systems life cycle management
[ISBN-0-315-60634-7] p 2974 N94-27869
A formal approach to the comparison of object-oriented analysis and design methodologies
p 2975 N94-27937
CASE tools for the support of object-oriented analysis and design methods p 2975 N94-27939
Software assurance standard
[NASA-TM-109705] p 2975 N94-27992
Advanced End-to-end Simulation for On-board Processing (AESOP) p 2945 N94-28255
Using formal specification in the Guidance and Control Software (GCS) experiment. Formal design and verification technology for life critical systems
[NASA-CR-194884] p 2956 N94-28267

SOFTWARE RELIABILITY
Domain analysis and modeling of a model-based software executive
[AD-A274087] p 2958 N94-25783
Software Error Estimation Program (SWEEP), version 02.00.00 user manual
[AD-A274697] p 2962 N94-26373
Developing with Ada using HOOD design methodology
p 2953 N94-26741
Specification performance optimization and executive generation for onboard multiprocessor real time application with SynDEx p 2954 N94-26745
Modeling systems by probabilistic process algebra: An event structures approach
[PB94-125259] p 3004 N94-26867
Research in improved assessment of software reliability
[AD-A274161] p 2968 N94-27140
Validation tests of TOPSIM 4
[ESA-STM-249] p 2972 N94-27582
Hardware and software reliability estimation using simulations
[NASA-CR-187588] p 2973 N94-27663
Software assurance standard
[NASA-TM-109705] p 2975 N94-27992
Engine simulation systems p 2829 N94-28054

SOFTWARE REUSE
ObjectSim: A reusable object oriented DIS visual simulation
[AD-A274030] p 2958 N94-25767
Domain analysis and modeling of a model-based software executive
[AD-A274087] p 2958 N94-25783
Using database technology to support domain-oriented application composition systems
[AD-A274091] p 3096 N94-26024
The ergonomics of software porting: Automatically configuring software to the runtime environment or everything you wanted to know about your C compiler but didn't know who to ask
[CWI-CS-R9266] p 2961 N94-26221
Ada reusable software for satellite on-board data handling p 2953 N94-26743

SOFTWARE TOOLS
Parallel Assessment Window System (PAWS) enhancements
[AD-A274094] p 2979 N94-25786
Analysis and computer tools for separation processes involving nonideal mixtures
[DE94-004162] p 2960 N94-25986
The National Center for Advanced Information Components Manufacturing: Program update
[DE94-002647] p 2960 N94-26118
Survey of visualization and analysis tools
[NASA-TM-108436] p 2809 N94-26150
Implementing a multiple criteria model base in co-op with a graphical user interface generator
[AD-A274901] p 3093 N94-26181
Parallel grid generation algorithm for distributed memory computers
[NASA-TP-3429] p 2963 N94-26466
Verification and validation of the on-board software real time requirements p 2953 N94-26739
Asynchronous and packetized systems engineering tools p 2954 N94-26746
Diagnostics and microelectronics
[DE94-003016] p 2784 N94-26777
DUSOL: Improved software for analysis of ultrasonic velocity data on anisotropic materials
[NPL-DMM(A)-104] p 2965 N94-26816
Rapid prototyping of application specific signal processors (RASSP)
[AD-A274324] p 2772 N94-26884
Design of an online help facility for ExSpect
[PB94-126687] p 2966 N94-26955
Thirteen ways to say nothing with scientific visualization
[NASA-CR-195280] p 2970 N94-27542
A theory for simulator tools
[CWI-CS-R9302] p 2972 N94-27578
Smalltalk: A tool for development of an Ada implementation of EWCAC
[SKL-1600-46-003-01-0] p 2974 N94-27823
Visualization techniques to aid in the analysis of multispectral astrophysical data sets
[NASA-CR-195268] p 3105 N94-27932
Comparison of Object-Oriented Analysis and Design Methods: A Collection of Papers
[MEMO-INF-92-69] p 2975 N94-27936
CASE tools for the support of object-oriented analysis and design methods p 2975 N94-27939

SOHO MISSION
Mounting of SSM's
[VTT-TIED-1442] p 2695 N94-26250

SOIL MAPPING
Mapping of soil humidity using C-band radar images
[ISBN-0-315-85076-0] p 2852 N94-27878

SOIL MECHANICS
The microstructural response of granular soil under uniaxial strain
[AD-A274808] p 2763 N94-26341

SOIL MOISTURE
Mapping of soil humidity using C-band radar images
[ISBN-0-315-85076-0] p 2852 N94-27878

SOIL SCIENCE
Time domain reflectometry for measuring bulk soil electrical conductivity and comparison with the Em38 instrument
[PB94-125432] p 2881 N94-27052

SOILS
The microstructural response of granular soil under uniaxial strain
[AD-A274808] p 2763 N94-26341
Time domain reflectometry for measuring bulk soil electrical conductivity and comparison with the Em38 instrument
[PB94-125432] p 2881 N94-27052

SOL-GEL PROCESSES
Sol-gel derived silica/siloxane composite materials: The effect of loading level and catalyst activity on silica domain formation
[DE94-002734] p 2712 N94-27710

SOLAR ACTIVITY
Photospheric origins of chromospheric and coronal activity
[NASA-CR-195215] p 3110 N94-26590
Chaotic dynamics of the solar cycle
[AD-A274315] p 3110 N94-26883
Solar-geophysical data number 590, October 1993. Part 1: (Prompt reports). Data for September, August 1993, and late data
[PB94-125903] p 3110 N94-27053
Solar-geophysical data number 590, October 1993. Part 2: (Comprehensive reports). Data for April 1993, and miscellaneous
[PB94-125911] p 3110 N94-27054
Environmental conditions responsible for solar activity
[AD-A274191] p 3111 N94-27099

SOLAR ACTIVITY EFFECTS
Comparative investigation of high-latitude ionospheric structure and effects near solar maximum
[AD-A273799] p 2877 N94-25877
The Sixteenth Symposium on Coordinated Observations of the Ionosphere and the Magnetosphere in the Polar Regions: Program and abstracts
[JTN-94-80601] p 2882 N94-27300
Antarctic Record, Vol. 36, No. 2
[REPT-107] p 2883 N94-27963
Characteristics of 30-MHz interference noises observed by riometers p 2884 N94-27965

SOLAR ARRAYS
Low-cost photovoltaic inverters incorporating application-specific integrated circuits
[DE94-003270] p 2856 N94-26463
Charge efficiency of Ni/H2 cells during transfer orbit of Telstar 4 satellites p 2862 N94-28117
Battery charge control: Which approach is best?
p 2863 N94-28124

SOLAR ATMOSPHERE
High resolution studies of sunspots and flux tubes
[NASA-CR-195216] p 3111 N94-27321

SOLAR CELLS
Electrical properties of p-type GaInP2
[AD-A273771] p 3051 N94-25856
The state of the art of thin-film photovoltaics
[DE94-000224] p 2855 N94-26115

Recombination and metastability in amorphous silicon and silicon germanium alloys
[DE94-000237] p 2736 N94-26481
Simplified high-efficiency silicon cell processing
[DE94-002683] p 2857 N94-26617
A direct current rectification scheme for microwave space power conversion using traveling wave electron acceleration p 2687 N94-27371
Research on high-efficiency, large-area, CuInSe2 based thin-film modules
[DE94-000259] p 3067 N94-27609
Continuous roll-to-roll a-Si photovoltaic manufacturing technology
[DE94-000260] p 2859 N94-27610
High-efficiency, thin-film solar cells
[DE94-000250] p 2860 N94-27625
Charge efficiency of Ni/H2 cells during transfer orbit of Telstar 4 satellites p 2862 N94-28117

SOLAR COLLECTORS
Solar energy in Israel: Utilization and research
p 2853 N94-26051
Solar energy utilization in the USSR
p 2853 N94-26052
The PLVCR 500 and HCPC, tests and results
[DLR-MITT-93-04] p 2858 N94-26813
Solar collector manufacturing activity, 1992
[DE94-003401] p 2859 N94-27048
Isothermal corrosion testing of steels in molten nitrate salts
[DE94-004695] p 2742 N94-27755

SOLAR CONVECTION (ASTRONOMY)
Observation of impulsive acoustic events and the excitation of solar oscillations
[AD-A274159] p 3111 N94-27096

SOLAR COOLING
Absorption technology for solar and waste heat utilization p 2854 N94-26053

SOLAR CORONA
Photospheric origins of chromospheric and coronal activity
[NASA-CR-195215] p 3110 N94-26590
Coronal heating via nanoflares
[DE94-000773] p 3110 N94-26696

SOLAR CYCLES
Chaotic dynamics of the solar cycle
[AD-A274315] p 3110 N94-26883

SOLAR DYNAMIC POWER SYSTEMS
Structural evaluation of concepts for a solar energy concentrator for Space Station advanced development program
[NASA-TP-3375] p 2695 N94-26609

SOLAR ENERGY
Renewable energy systems in Mexico: Installation of a hybrid system
[DE93-013716] p 2853 N94-25946
The First Energy Conference: Israel and the Former USSR
[ISBN-965-229-098-X] p 2853 N94-26050
Solar energy in Israel: Utilization and research
p 2853 N94-26051
Solar energy utilization in the USSR
p 2853 N94-26052
Absorption technology for solar and waste heat utilization p 2854 N94-26053
NEMO 2: New energy systems and technologies
[DE94-702060] p 2855 N94-26240
Solar resource-utility load matching assessment: NREL photovoltaic project summary
[DE94-000232] p 2856 N94-26480

SOLAR ENERGY CONVERSION
Solar energy in Israel: Utilization and research
p 2853 N94-26051
Solar energy utilization in the USSR
p 2853 N94-26052

SOLAR FLARES
Coronal heating via nanoflares
[DE94-000773] p 3110 N94-26696
Region 5395 of March 1989 --- solar activity, geomagnetic disturbances, and terrestrial effects
[PB94-120714] p 3110 N94-26755
Solar-geophysical data number 590, October 1993. Part 1: (Prompt reports). Data for September, August 1993, and late data
[PB94-125903] p 3110 N94-27053
Acceleration of electrons and ions by strong lower-hybrid turbulence in solar flares
[NASA-TM-109723] p 3111 N94-27953
Solar-geophysical data number 591, November 1993. Part 2: (Comprehensive reports). Data for May 1993 and miscellaneous
[PB94-134830] p 3111 N94-28360

SOLAR FLUX
The status of the solar neutrino problem
[DE94-003934] p 3111 N94-27742

SOLAR GENERATORS
Handbook of photovoltaic power generating design for introduction
[DE94-725199] p 2858 N94-26913

SOLAR GRANULATION
Photospheric origins of chromospheric and coronal activity
[NASA-CR-195215] p 3110 N94-26590

SOLAR HEATING
Solar energy utilization in the USSR
p 2853 N94-26052
Martian atmospheric radiation budget
p 3107 N94-27887

SOLAR MAGNETIC FIELD
Solar-geophysical data number 590, October 1993. Part 1: (Prompt reports). Data for September, August 1993, and late data
[PB94-125903] p 3110 N94-27053
Environmental conditions responsible for solar activity
[AD-A274191] p 3111 N94-27099
Direct evidence of the interplanetary magnetic field effect on the cosmic-ray shadow by the sun
[ICRR-296-93-8] p 3116 N94-27607

SOLAR NEUTRINOS
The status of the solar neutrino problem
[DE94-003934] p 3111 N94-27742

SOLAR OSCILLATIONS
Observation of impulsive acoustic events and the excitation of solar oscillations
[AD-A274159] p 3111 N94-27096

SOLAR PHYSICS
Solar-geophysical data number 590, October 1993. Part 1: (Prompt reports). Data for September, August 1993, and late data
[PB94-125903] p 3110 N94-27053
Solar-geophysical data number 590, October 1993. Part 2: (Comprehensive reports). Data for April 1993, and miscellaneous
[PB94-125911] p 3110 N94-27054
Observation of impulsive acoustic events and the excitation of solar oscillations
[AD-A274159] p 3111 N94-27096
Environmental conditions responsible for solar activity
[AD-A274191] p 3111 N94-27099
High resolution studies of sunspots and flux tubes
[NASA-CR-195216] p 3111 N94-27321

SOLAR PLANETARY INTERACTIONS
The Sixteenth Symposium on Coordinated Observations of the Ionosphere and the Magnetosphere in the Polar Regions: Program and abstracts
[JTN-94-80601] p 2882 N94-27300

SOLAR PONDS (HEAT STORAGE)
Solar energy in Israel: Utilization and research
p 2853 N94-26051

SOLAR POSITION
Initial ultraviolet-B intensity data at Lawrence Livermore National Laboratory
[DE94-004279] p 2869 N94-27267

SOLAR POWERED AIRCRAFT
Solar powered multipurpose remotely powered aircraft
p 2671 N94-25719

SOLAR PROMINENCES
Solar-geophysical data number 590, October 1993. Part 2: (Comprehensive reports). Data for April 1993, and miscellaneous
[PB94-125911] p 3110 N94-27054
Solar-geophysical data number 591, November 1993. Part 2: (Comprehensive reports). Data for May 1993 and miscellaneous
[PB94-134830] p 3111 N94-28360

SOLAR PROTONS
Solar-geophysical data number 591, November 1993. Part 2: (Comprehensive reports). Data for May 1993 and miscellaneous
[PB94-134830] p 3111 N94-28360

SOLAR RADIATION
Seasonal snow of arctic Alaska R4D investigations
[DE93-040082] p 2892 N94-25939
Initial ultraviolet-B intensity data at Lawrence Livermore National Laboratory
[DE94-004279] p 2869 N94-27267
Solar and airglow measurements aboard the two suborbital flights NASA 36.098 and 36.107
[NASA-CR-195279] p 2882 N94-27380

SOLAR RADIO BURSTS
Solar-geophysical data number 591, November 1993. Part 2: (Comprehensive reports). Data for May 1993 and miscellaneous
[PB94-134830] p 3111 N94-28360

SOLAR RADIO EMISSION
Region 5395 of March 1989 --- solar activity, geomagnetic disturbances, and terrestrial effects
[PB94-120714] p 3110 N94-26755
Solar-geophysical data number 590, October 1993. Part 1: (Prompt reports). Data for September, August 1993, and late data
[PB94-125903] p 3110 N94-27053

SOLAR REFLECTORS
Mounting of SSM's
[VTT-TIED-1442] p 2695 N94-26250
Charge efficiency of Ni/H2 cells during transfer orbit of Telstar 4 satellites p 2862 N94-28117

SOLAR SPECTRA
Solar and airglow measurements aboard the two suborbital flights NASA 36.098 and 36.107
[NASA-CR-195279] p 2882 N94-27380

SOLAR SYSTEM
Spiral Survey Expedition: A proposal to organize for the Survey, exploration and eventual colonization of the Milky Way Galaxy p 2686 N94-27366

SOLAR TERRESTRIAL INTERACTIONS
Region 5395 of March 1989 --- solar activity, geomagnetic disturbances, and terrestrial effects
[PB94-120714] p 3110 N94-26755
Solar-geophysical data number 590, October 1993. Part 1: (Prompt reports). Data for September, August 1993, and late data
[PB94-125903] p 3110 N94-27053
Solar-geophysical data number 590, October 1993. Part 2: (Comprehensive reports). Data for April 1993, and miscellaneous
[PB94-125911] p 3110 N94-27054
Direct evidence of the interplanetary magnetic field effect on the cosmic-ray shadow by the sun
[ICRR-296-93-8] p 3116 N94-27607

SOLAR THERMAL ELECTRIC POWER PLANTS
Solar energy in Israel: Utilization and research
p 2853 N94-26051
Solar energy utilization in the USSR
p 2853 N94-26052

SOLAR X-RAYS
Region 5395 of March 1989 --- solar activity, geomagnetic disturbances, and terrestrial effects
[PB94-120714] p 3110 N94-26755
Solar-geophysical data number 590, October 1993. Part 2: (Comprehensive reports). Data for April 1993, and miscellaneous
[PB94-125911] p 3110 N94-27054
Solar-geophysical data number 591, November 1993. Part 2: (Comprehensive reports). Data for May 1993 and miscellaneous
[PB94-134830] p 3111 N94-28360

SOLDERING
Experimental determination of the CU-IN-PB ternary phase diagram
[DE94-003765] p 2735 N94-26349
Joining of fibre reinforced metal matrix composite materials
[PB94-132453] p 2712 N94-28376

SOLDERS
Experimental determination of the CU-IN-PB ternary phase diagram
[DE94-003765] p 2735 N94-26349
Research into the microstructure and mechanical behavior of eutectic Bi-Sn and In-Sn
[DE94-004558] p 2741 N94-27619

SOLENOIDS
Electromagnetic properties of a toroidal solenoid
[DE93-613032] p 2766 N94-25866

SOLID CRYOGENS
Trapped electrons in solid hydrogen
[DE93-018628] p 3052 N94-25947
Spectroscopy and dynamics of molecular and ionic impurities embedded in solid hydrogen
[AD-A274149] p 3064 N94-27095

SOLID ELECTROLYTES
Development of SO(x) and NO(x) solid electrolyte sensors p 2725 N94-25562
Reference electrodes for solid polymer electrolytes
[DE94-004583] p 2780 N94-25806
Alternative materials for solid oxide fuel cells: Processing and interactions of materials
[DE94-000016] p 2855 N94-26114
Oxygen reduction at a YSZ interface with cathode materials La(1-x)(Ca or Sr)(x)MnO3(1-x)CaMnO3
[DE94-002954] p 3054 N94-26147
Processing of LaCrO3 for solid oxide fuel cell applications
[DE94-002981] p 2857 N94-26747
Low cost, radial flow, solid oxide fuel cell
[DE94-002982] p 2858 N94-26785
MSOFC development status
[DE94-003192] p 2858 N94-26792
High temperature solid oxide fuel cell: Customer test units
[DE94-002961] p 2858 N94-26869
High temperature solid oxide fuel development activities
[DE94-002973] p 2858 N94-26871

Perovskite solid electrolytes for SOFC
[DE94-001923] p 2859 N94-27005

SOLID MECHANICS
Computational mechanics
[DE94-003015] p 2965 N94-26775

SOLID PHASES
Predictive modeling of particle-laden, turbulent flows
[DE94-003298] p 2792 N94-26319

SOLID PROPELLANT ROCKET ENGINES
An ultrasonic testing technique for monitoring the cure and mechanical properties of polymeric materials
[AD-A274536] p 2753 N94-26842
Development and application of contamination technology for MSFC managed space systems
[NASA-CR-193934] p 2697 N94-27421

SOLID PROPELLANTS
Propellants and explosives in ballistic missiles
[UCRL-LR-113578] p 2760 N94-28222

SOLID ROCKET PROPELLANTS
Cryogenic size reduction of solid propellant
[AD-A274844] p 2759 N94-26800
An ultrasonic testing technique for monitoring the cure and mechanical properties of polymeric materials
[AD-A274536] p 2753 N94-26842
Uncertainties in the characterization of the thermal environment of a solid rocket propellant fire
[DE94-002023] p 2760 N94-27719

SOLID SOLUTIONS
An atom probe investigation of the influence of trace impurities on the mechanical behavior of NiAl
[DE94-002797] p 2734 N94-26272
Electron microscopy of AlN-SiC interfaces and solid solutions
[DE94-002449] p 3059 N94-26765
Experimental measurement of local displacement and chemical pair correlations in crystalline solid solutions
[DE94-001124] p 3065 N94-27251

SOLID STATE
Structure and properties of intermetallic composites synthesized in situ using solid state displacement reactions
[DE94-004312] p 2705 N94-25805
Powder synthesis, fabrication, and transport properties of long-length Ag clad Bi-2223 conductors
[DE94-002376] p 2740 N94-26957
Phase stability in the Cd-Mg system
[DE94-004976] p 2743 N94-27792

SOLID STATE DEVICES
Solid state research
[AD-A274063] p 3049 N94-25645
Exploration of GaAs structures for solid-state detectors
[DE93-634191] p 3056 N94-26379
Center for space microelectronics technology
[NASA-CR-195282] p 2786 N94-27574

SOLID STATE LASERS
Compact, solid-state femtosecond source
[AD-A273932] p 2817 N94-26271
Phase conjugation and pulse compression of high energy lasers: From nanoseconds to microseconds
[DE94-001061] p 2818 N94-26699
Phase conjugated lasers applied to commercial x ray lithography
[DE94-001529] p 2819 N94-27018
Kinoform/lens system for injecting a high power laser beam into an optical fiber
[DE94-003226] p 2819 N94-27262
Technical report of ISSP. Ser. A, no. 2686: High-order harmonic generation and ionization using ultrashort KrF and Ti:Sapphire lasers
[JTN-94-80572] p 2820 N94-27605
Optical parametric oscillator modeling with diffraction, depletion, and double refraction
[DE94-001504] p 3040 N94-27999

SOLID SURFACES
Surface physics with cold and thermal neutron reflectometry
[DE94-001447] p 2733 N94-26070

SOLID WASTES
Oil production from buckwheat stillage by thermochemical liquefaction p 2871 N94-28154

SOLID-SOLID INTERFACES
Electron microscopy of AlN-SiC interfaces and solid solutions
[DE94-002449] p 3059 N94-26765
A transmission electron microscope study of Ni4W precipitates in a Ni-37 wt. percent W alloy
[ISBN-0-315-59932-4] p 2743 N94-27803

SOLIDIFICATION
Study on the mechanism of titanium alloy toughness and the improvement of properties
p 2726 N94-25566
Study on solidification of non-homogeneous melting/solidification materials p 2728 N94-25573
Solidification modeling of a spiral casting to determine material fluidity
[DE94-002212] p 2739 N94-26935
Morphology transitions during non-equilibrium growth processes
[ITN-94-85236] p 3065 N94-27243
Differential scanning calorimetric study of solid state amorphization and crystallization in Zr/Co and Zr/Ni multilayers p 2745 N94-28161
The corrosion behavior of sputter-deposited magnesium-valve metal alloys p 2745 N94-28164
Production of an amorphous Fe(75)Si(10)B(15) sheet by a metallic mold casting method and its properties
p 2746 N94-28170
Formation and high mechanical strength of Al-based alloys containing a nanoscale icosahedral phase as a main constituent p 2746 N94-28171

SOLIDS
Predictive modeling of particle-laden, turbulent flows
[DE94-003298] p 2792 N94-26319
The free vibration of plates, shallow shells and solids
[ISBN-0-315-83931-7] p 2838 N94-26622
Lisp interface to geometric modelling operations
[PB94-133121] p 3001 N94-28398

SOLITARY WAVES
Coherent state approach for the (Phi)(sup 6)-lattice model and phase transitions
[DE93-613053] p 3050 N94-25825
Chaotic dynamics of the solar cycle
[AD-A274315] p 3110 N94-26883

SOLUBILITY
Measurement of viscosity, density, and gas solubility of refrigerant blends in selected synthetic lubricants
[DE94-003609] p 2713 N94-25934
A Shuttle mechanism for molten-electrolyte lithium batteries
[DE94-002914] p 2781 N94-26144
Liquid and solid solubility of Ag in Bi2Sr2CaCu2O8
[DE94-002829] p 2735 N94-26273
Influence of lattice damage on retention and transport of deuterium in beta silicon carbide
[DE94-005206] p 3068 N94-27693
Solubility, viscosity, and density of refrigerant/lubricant mixtures
[DE94-004237] p 2721 N94-28069

SOLUTES
Influence of grain structure and solute composition on the work hardening behavior of aluminium at cryogenic temperatures
[DE94-003415] p 2733 N94-26087

SOLVENTS
The reactivity of lithium toward non-aqueous solvents of relevance to energy storage applications as studied by surface analytical techniques
[DE94-003483] p 2856 N94-26464
Effects of plastic media blasting on aircraft skin
[AD-A274817] p 2668 N94-26488
Evaluating non-chlorinated solvents for welding applications
[DE94-003332] p 2824 N94-27181

SOMALIA
Human dimensions research team, operation restore hope
[AD-A274340] p 2939 N94-27056

SONAR
Enhanced adaptive statistical filter providing improved performance for target motion analysis noise discrimination statement of government interest
[AD-D016039] p 2786 N94-27109

SONIC BOOMS
Preliminary design of nine high speed civil transports
p 2671 N94-25710
High-Speed Research: Sonic Boom, Volume 1
[NASA-CP-10132] p 2649 N94-28188
Progress in modeling atmospheric propagation of sonic booms p 2650 N94-28189
Implications for high speed research: The relationship between sonic boom signature distortion and atmospheric turbulence p 2650 N94-28190
Interaction of the sonic boom with atmospheric turbulence p 2650 N94-28191
Sonic boom propagation through turbulence: A ray theory approach p 2650 N94-28192
The propagation of spark-produced N waves through turbulence p 2650 N94-28193
On the aging of sonic booms p 2650 N94-28194
Experimental studies of loudness and annoyance response to sonic booms p 2651 N94-28195
Comparison of methods of predicting community response to impulsive and nonimpulsive noise
p 2651 N94-28196
Variability of measured sonic boom signatures
p 2651 N94-28197
Sonic booms and marine mammals: Informational status and recommendations p 2651 N94-28198

SONIC NOZZLES
Control jets in interaction with hypersonic rarefied flow
p 2698 N94-28020

SORPTION
Application of the Positron Annihilation Technique to the study of vapor absorption process in polyethylene (LDPE) and in imide polymer (6FDA-TMPD PI)
[DE94-602737] p 2720 N94-27998

SOUND DETECTING AND RANGING
Prewhitening of colored noise fields for detection of threshold sources
[AD-A274346] p 3010 N94-26923
Enhanced adaptive statistical filter providing improved performance for target motion analysis noise discrimination statement of government interest
[AD-D016039] p 2786 N94-27109

SOUND GENERATORS
Modern photoacoustic spectroscopy problems. Theory and experiment (a review)
[IFTR-41/1993] p 2716 N94-26823
Hydroacoustic wave-fields generated by different source types, a computational study
[PB94-123536] p 3010 N94-27037

SOUND PROPAGATION
Progress in modeling atmospheric propagation of sonic booms p 2650 N94-28189

SOUND TRANSMISSION
Hydroacoustic wave-fields generated by different source types, a computational study
[PB94-123536] p 3010 N94-27037
Monaural and binaural processing of complex waveforms
[AD-A274209] p 3010 N94-27067

SOUND WAVES
Binaural room simulation
[AD-A273823] p 3009 N94-25737
The effect of high frequency electric field on hypersound amplification in superlattice
[DE93-634326] p 3057 N94-26384
New variational techniques for acoustic radiation and scattering from elastic shell structures
[AD-A274599] p 3010 N94-26889
Problems in nonlinear acoustics: Rayleigh waves, pulsed sound beams, and waveguides
[AD-A274587] p 3010 N94-26983
Hydroacoustic wave-fields generated by different source types, a computational study
[PB94-123536] p 3010 N94-27037
Monaural and binaural processing of complex waveforms
[AD-A274209] p 3010 N94-27067
Observation of impulsive acoustic events and the excitation of solar oscillations
[AD-A274159] p 3111 N94-27096
On the use of feedback to control sound radiation from a plate excited by a turbulent boundary layer
[ISVR-TR-227] p 2807 N94-28175

SOUNDING ROCKETS
Sulfur dioxide in the atmosphere of Venus 1 sounding rocket observations
[NASA-CR-195224] p 3106 N94-26237
Cosmic x ray physics
[NASA-CR-195225] p 3115 N94-27236
Cosmic x ray physics
[NASA-CR-195218] p 3115 N94-27419
Cosmic x ray physics
[NASA-CR-195219] p 3115 N94-27420

SOURCE PROGRAMS
Source code for the OO1 benchmark and the AFIT simulation benchmark
[AD-A274035] p 2958 N94-25799

SOUTH KOREA
Country report on global change research for the Republic of Korea p 2873 N94-28278

SOUTHERN OSCILLATION
A synoptic study on periods of deficiency over Rio Grande do Sul/Brazil
[INPE-5456-TDI/498] p 2896 N94-27422

SPACE BASED RADAR
Experimental evaluation of battery cells for space-based radar application p 2860 N94-28104

SPACE CHARGE
First principle calculation for magneto-crystalline anisotropy
[DE93-634653] p 3052 N94-26012

SPACE COLONIES
Vision 21: Interdisciplinary Science and Engineering in the Era of Cyberspace
[NASA-CP-10129] p 2685 N94-27358
The Fermi paradox: An approach based on percolation theory p 2687 N94-27370

SPACE COMMERCIALIZATION
MINOTAUR (Maryland's innovative orbital technologically advanced University rocket)
p 2703 N94-25685

Future of aerospace
[PB94-120185] p 2669 N94-26906
Access to space study
[NASA-TM-109693] p 2685 N94-27151

SPACE DEBRIS
Autonomous space processor for orbital debris advanced design project in support of solar system exploration p 2697 N94-25667

SPACE ENVIRONMENT SIMULATION
A large high vacuum, high pumping speed space simulation chamber for electric propulsion
[NASA-TM-106453] p 2690 N94-26142
Telescience testbedding for physiological experiments under hypobaric hypoxic conditions
p 2913 N94-27449
Telescience testbedding under hypobaric hypoxic conditions: Evaluation by operation ability and recognition ability p 2913 N94-27450
Telescience testbedding for physiological experiments under hypobaric hypoxic conditions: Development and evaluation in CNV measuring p 2913 N94-27451

SPACE ERECTABLE STRUCTURES
Space Habitat, assembly and repair facility
p 2691 N94-25696
Selected topics in robotics for space exploration
[NASA-CP-10131] p 2682 N94-26278

SPACE EXPLORATION
Proceedings of the 8th Annual Summer Conference: NASA/USRA Advanced Design Program
[NASA-CR-195118] p 3075 N94-25665
Planetary surface exploration MESUR/autonomous lunar rover p 2833 N94-25683
Project APEX: Advanced manned exploration of the Martian moon Phobos p 3079 N94-25688
Mars transportation system p 2833 N94-25689
Asteroid exploration and utilization
p 3080 N94-25697
Selected topics in robotics for space exploration
[NASA-CP-10131] p 2682 N94-26278
Early lunar rover mission studies
p 2684 N94-26290
Vision 21: Interdisciplinary Science and Engineering in the Era of Cyberspace
[NASA-CP-10129] p 2685 N94-27358
Telepresence in the human exploration of Mars: Field studies in analog environments p 2685 N94-27360
Spiral Survey Expedition: A proposal to organize for the Survey, exploration and eventual colonization of the Milky Way Galaxy p 2686 N94-27366
A direct current rectification scheme for microwave space power conversion using traveling wave electron acceleration p 2687 N94-27371
Comparison of the lossy image data compressions for the MESUR Pathfinder and for the Huygens Titan Probe
p 2945 N94-28254

SPACE FLIGHT
NASA's spacecraft data system p 2950 N94-26723
Future of aerospace
[PB94-120185] p 2669 N94-26906
Nasa Langley Research Center seventy-fifth anniversary publications, 1992
[NASA-TM-109691] p 3118 N94-27431

SPACE FLIGHT STRESS
Workshop on Countering Space Adaptation with Exercise: Current Issues
[NASA-CP-3252] p 2934 N94-28361
Muscular activity and its relationship to biomechanics and human performance p 2934 N94-28362

SPACE HABITATS
Automation of closed environments in space for human comfort and safety p 2943 N94-25684
A widely adaptable habitat construction system utilizing space resources p 2688 N94-27374
Designing for human presence in space: An introduction to environmental control and life support systems
[NASA-RP-1324] p 2942 N94-27437

SPACE LAW
Contributions to CD Space Committee 1992
[PB94-124401] p 3101 N94-27218

SPACE LOGISTICS
Space Station technology testbed: 2010 deep space transport p 2687 N94-27368

SPACE MAINTENANCE
Space Habitat, assembly and repair facility
p 2691 N94-25696

SPACE MANUFACTURING
Study on melted solution stirring under microgravity
p 2730 N94-25585
Prototype space fabrication platform
[AD-A273904] p 2694 N94-25659
Space Station technology testbed: 2010 deep space transport p 2687 N94-27368
A widely adaptable habitat construction system utilizing space resources p 2688 N94-27374
Prometheus in space: Research Committee on Functional New Material
[JTN-94-80580] p 2761 N94-28002

SPACE MISSIONS
Access to space study
[NASA-TM-109693] p 2685 N94-27151
STS-57 Space Shuttle mission report
[NASA-CR-195739] p 2693 N94-28220
STS-56 Space Shuttle mission report
[NASA-CR-195740] p 2693 N94-28221
Comparison of the lossy image data compressions for the MESUR Pathfinder and for the Huygens Titan Probe
p 2945 N94-28254

SPACE OBSERVATIONS (FROM EARTH)
Contributions to the 23rd ICRC from emulsion chamber experiments at Mt. Chacaltaya and Pamirs
[ICRR-REPT-295-93-7] p 3112 N94-25624
A study of very high energy hadron interactions through observation of cosmic-ray families with visible energy not less than 500 TeV, 3 p 3112 N94-25627
Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 1 p 3112 N94-25628
Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 2 p 3113 N94-25629
Observation of characteristics of cosmic-ray hadron interactions in uniform-type thick lead chambers at Pamir, 3 p 3113 N94-25630
Violation of Feynman scaling law in the forward region
p 3113 N94-25633
Simultaneous observation of families and air showers at Mt. Chacaltaya p 3114 N94-25634

SPACE PERCEPTION
The effect of body orientation on the perception of vertical and horizontal distance in an outdoor setting
p 2915 N94-27461
An investigation of methods for determining depth from focus
[ISBN-0-315-64015-4] p 2988 N94-27645

SPACE PLASMAS
Norwegian ionospheric satellite experiment: High latitude, low Earth orbit plasma measurements
[FFI-93/7025] p 2876 N94-25807
Investigation of plasma instabilities in the polar cusp
[NASA-CR-195212] p 2879 N94-26599
Spectroscopy and dynamics of molecular and ionic impurities embedded in solid hydrogen
[AD-A274149] p 3064 N94-27095
Studies for Io's extended atmosphere and neutral clouds and their impact on the local satellite atmosphere and on the planetary magnetosphere
[NASA-CR-195255] p 3106 N94-27406
Collisionless shock structures of Earth and other planets
[NASA-CR-195257] p 3104 N94-27407
Configuration of the near-Earth plasma sheet
[NASA-CR-195271] p 2883 N94-27438
Acceleration of electrons and ions by strong lower-hybrid turbulence in solar flares
[NASA-TM-109723] p 3111 N94-27953

SPACE PLATFORMS
Prototype space fabrication platform
[AD-A273904] p 2694 N94-25659

SPACE POWER REACTORS
Preliminary reentry safety assessment of the General Purpose Heat Source module for the Cassini mission: Aerospace Nuclear Safety Program
[DE94-001646] p 2699 N94-25926
Space-R thermionic space nuclear power system: Design and technology demonstration
[DE94-001890] p 2699 N94-25929
Space-R thermionic space nuclear power system design and technology demonstration
[DE94-002017] p 2700 N94-25930
Risk perspectives for Topaz 2 flight mission
[DE94-003229] p 2700 N94-25956
Pre-orbital criticality safety for the NEPSTP mission
[DE94-002600] p 3005 N94-26802

SPACE PROBES
Comparison of the lossy image data compressions for the MESUR Pathfinder and for the Huygens Titan Probe
p 2945 N94-28254

SPACE PROCESSING
Design for producing fiberglass fabric in a lunar environment p 2765 N94-25676
Lunar preform manufacturing p 2765 N94-25677
Modelling of the MEA float zone using accelerometer data
[NASA-CR-193933] p 2761 N94-27220
Prometheus in space: Research Committee on Functional New Material
[JTN-94-80580] p 2761 N94-28002

SPACE PROGRAMS
Project Columbiad: Reestablishment of human presence on the Moon p 2689 N94-25687

SPACE SHUTTLE BOOSTERS
Structural analysis of a frangible nut used on the NASA Space Shuttle
[DE94-003672] p 2821 N94-25811
STS-56, RSRM-031, 360L031 KSC processing configuration and data report
[NASA-CR-193922] p 2691 N94-26135
STS-51, RSRM-033, 360T033 KSC processing configuration and data report
[NASA-CR-193923] p 2691 N94-26153
Advanced silver zinc battery development for the SRB and ET range safety subsystems p 2865 N94-28136
STS-55 Space Shuttle mission report
[NASA-CR-195741] p 2692 N94-28199

SPACE SHUTTLE MAIN ENGINE
STS-51 pad abort. OV103-engine 2033 (ME-2) fuel flowmeter sensor open circuit
[NASA-CR-193924] p 2701 N94-26230
Space Shuttle main engine turbopump bearing assessment program
[NASA-TM-108447] p 2833 N94-28265

SPACE SHUTTLE MISSIONS
Prototype space fabrication platform
[AD-A273904] p 2694 N94-25659
STS-55 Space Shuttle mission report
[NASA-CR-195741] p 2692 N94-28199

SPACE SHUTTLE ORBITERS
Berthing of Space Station Freedom using the shuttle remote manipulator system p 2684 N94-26284
Pressure distributions on a 0.02-scale Space Shuttle orbiter nose at Mach 21.5 in helium
[NASA-TM-4495] p 2646 N94-26592
Report of the Shuttle Processing Review Team
[NASA-TM-109728] p 2692 N94-28178

SPACE SHUTTLE PAYLOADS
An approach to studying the reliability of microgravity experiments
[NASA-TM-106489] p 2834 N94-26199
STS-55 Space Shuttle mission report
[NASA-CR-195741] p 2692 N94-28199

SPACE SHUTTLES
Application of Space Shuttle Project Hercules imagery in the investigation of ship cloud tracks
[AD-A274923] p 2692 N94-26529
Access to space study
[NASA-TM-109693] p 2685 N94-27151
STS-55 Space Shuttle mission report
[NASA-CR-195741] p 2692 N94-28199
STS-57 Space Shuttle mission report
[NASA-CR-195739] p 2693 N94-28220
STS-56 Space Shuttle mission report
[NASA-CR-195740] p 2693 N94-28221

SPACE STATION FREEDOM
Assured crew return vehicle post landing configuration design and test p 2697 N94-25671
Automation of closed environments in space for human comfort and safety p 2943 N94-25684
Berthing of Space Station Freedom using the shuttle remote manipulator system p 2684 N94-26284
Autonomous rendezvous and docking for Space Station Freedom p 2684 N94-26286
Structural evaluation of concepts for a solar energy concentrator for Space Station advanced development program
[NASA-TP-3375] p 2695 N94-26609
Space Station evolution study oxygen loop closure
[NASA-CR-193938] p 2941 N94-26788
Designing for human presence in space: An introduction to environmental control and life support systems
[NASA-RP-1324] p 2942 N94-27437

SPACE STATION POWER SUPPLIES
Structural evaluation of concepts for a solar energy concentrator for Space Station advanced development program
[NASA-TP-3375] p 2695 N94-26609
Space Station Freedom NiH2 cell testing program
p 2861 N94-28108
Advanced nickel-hydrogen spacecraft battery development p 2863 N94-28129

SPACE STATION STRUCTURES
Structural design feasibility study of Space Station long spacer truss
[NASA-TM-106346] p 2843 N94-27559

SPACE STATIONS
Space Station technology testbed: 2010 deep space transport p 2687 N94-27368
Risks and issues in fire safety on the Space Station
[NASA-TM-106430] p 2692 N94-27436
An analysis of the loads applied to a heavy Space Station rack during translation and rotation tasks
[NASA-TM-104790] p 2697 N94-28183

SPACE STORAGE
Handbook for handling and storage of nickel-cadmium batteries: Lessons learned
[NASA-RP-1326] p 2702 N94-26613

SPACE SUITS
Extra-Vehicular Activity (EVA) glove evaluation test protocol
[NASA-TM-108442] p 2943 N94-27952

SPACE SURVEILLANCE (GROUND BASED)
Hyperspectral analysis of space objects: Signal to noise evaluation
[AD-A273882] p 2765 N94-25728

SPACE TRANSPORTATION
A comparison of users' and providers' perceptions of critical spacelift vehicle characteristics and capabilities
[AD-A273907] p 2691 N94-26017
Access to space study
[NASA-TM-109693] p 2685 N94-27151
Space Station technology testbed: 2010 deep space transport p 2687 N94-27368
Space transportation vehicle design evaluation using saturated designs p 2693 N94-27928
Lunar Transportation Facilities and Operations Study, option 1
[NASA-CR-195700] p 3109 N94-27982
Lunar Transportation Facilities and Operations Study, option 2
[NASA-CR-195701] p 3109 N94-27983

SPACE TRANSPORTATION SYSTEM FLIGHTS
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle mission STS-60
[NASA-TM-109193] p 2692 N94-27956
STS-55 Space Shuttle mission report
[NASA-CR-195741] p 2692 N94-28199
JSC almanac
[NASA-TM-109702] p 3119 N94-28204
STS-57 Space Shuttle mission report
[NASA-CR-195739] p 2693 N94-28220
STS-56 Space Shuttle mission report
[NASA-CR-195740] p 2693 N94-28221

SPACE TUGS
Hardware design of a grappling/docking device accommodating large lateral and angular misalignments
p 2833 N94-25668

SPACE-TIME FUNCTIONS
The Dirac equation in Kerr spacetime, spheroidal coordinates and the M.I.T. bag model of hadrons
[DE94-601566] p 3006 N94-25886
Dimensional crossover from non-renormalizability to renormalizability
[DE93-613052] p 3006 N94-26193
Vortices in curved spacetime
[DE94-601559] p 3072 N94-26417
The extensions of space-time. Physics in the 8-dimensional homogeneous space D is equal to SU(2,2)/K
[DE93-634336] p 3072 N94-26551
Stochastic space-time, confinement potential and particle propagator
[DE94-606415] p 3074 N94-27680

SPACEBORNE EXPERIMENTS
Proceedings of the 8th Annual Summer Conference: NASA/USRA Advanced Design Program
[NASA-CR-195118] p 3075 N94-25665
Autonomous support for microorganism research in space p 2903 N94-25672
Microgravity ignition experiment p 2761 N94-25707
An approach to studying the reliability of microgravity experiments
[NASA-TM-106489] p 2834 N94-26199
Long Duration Exposure Facility space optics handbook
[AD-A274831] p 3035 N94-26572
Spacelab life sciences 2 post mission report
[NASA-CR-195544] p 2942 N94-27410
Study on posture control and adaptation mechanism under weightlessness: Summary report of ground operations performed for carp experiment (FMPT/L-2) in Space Shuttle mission p 2912 N94-27447
Study on posture control and adaption mechanism under weightlessness: Differences in weight and shape of utricular otolith of carp p 2912 N94-27448
Gamma Large Area Silicon Telescope (GLAST): Applying silicon strip detector technology to the detection of gamma rays in space
[DE94-003451] p 3116 N94-27740
Construction and test of experiment hardware for a space experiment on Spacelab mission IML-2
[DLR-FB-93-23] p 2903 N94-27743

SPACEBORNE TELESCOPES
Feasibility study of a multiaperture telescope for deep-space Earth surveillance
[AD-A273903] p 3102 N94-25658
Project PARAS: Phased array radio astronomy from space p 3081 N94-25703
The PROTEL contamination code
[RXR-93071] p 3040 N94-28202

SPACECRAFT ANTENNAS
Effective conductivity of wire mesh reflectors for space deployable antenna systems
[NASA-CR-191605] p 2788 N94-27770

SPACECRAFT CABINS
First lunar outpost p 2943 N94-25694
Risks and issues in fire safety on the Space Station
[NASA-TM-106430] p 2692 N94-27436

SPACECRAFT CHARGING
IRMA: A program for three-dimensional color display of data
[AD-A273811] p 2959 N94-25879

SPACECRAFT COMMUNICATION
Low-cost unmanned lunar lander
p 2697 N94-25699

SPACECRAFT CONSTRUCTION MATERIALS
X ray computed tomography for emerging aerospace materials and processes development
[AD-A273721] p 2705 N94-25779
NASA Lewis Research Center lean-, rich-burn materials test burner rig
[NASA-CR-194437] p 2680 N94-26141
Development and application of contamination technology for MSFC managed space systems
[NASA-CR-193934] p 2697 N94-27421
Proton irradiation on materials p 3030 N94-27898
Development of methodologies for the estimation of thermal properties associated with aerospace vehicles
p 2846 N94-27920

SPACECRAFT CONTROL
High performance flight computer developed for deep space applications p 2949 N94-26718
Implementing hard real-time systems: A case study
p 2951 N94-26731
Test of onboard real time applications (LICE (tm))
p 2952 N94-26737
Dynamics and robust control for uncertain flexible space systems
[INPE-5510-TAE/020] p 2696 N94-27357
Superfluid helium sloshing dynamics induced oscillations and fluctuations of angular momentum, force and moment actuated on spacecraft driven by gravity gradient or jitter acceleration associated with slew motion
[NASA-CR-193928] p 2799 N94-27931
First experimental assessment of RCS plume-flow field interaction on Hermes leading edge thruster configuration p 2703 N94-28032
Using formal specification in the Guidance and Control Software (GCS) experiment. Formal design and verification technology for life critical systems
[NASA-CR-194884] p 2956 N94-28267

SPACECRAFT DESIGN
MINOTAUR (Maryland's innovative orbital technologically advanced University rocket)
p 2703 N94-25685
Asteroid exploration and utilization
p 3080 N94-25697
Low-cost unmanned lunar lander
p 2697 N94-25699
Low Earth orbit communications satellite
p 2698 N94-25701
Project PARAS: Phased array radio astronomy from space p 3081 N94-25703
Project Minerva: A low-cost manned Mars mission based on indigenous propellant production
p 2760 N94-25705
Project Ares 3 p 2671 N94-25712
Minimum accommodation for aerobrake assembly, phase 2
[NASA-TM-107608] p 2692 N94-27774
Space transportation vehicle design evaluation using saturated designs p 2693 N94-27928
A pressure based charge control system for the DSPSE NiH2 CPV battery p 2863 N94-28127
Artemis common lunar lander. Phase 2: Study results for external review
[NASA-TM-109699] p 2692 N94-28205

SPACECRAFT DOCKING
Hardware design of a grappling/docking device accommodating large lateral and angular misalignments
p 2833 N94-25668
Autonomous rendezvous and docking for Space Station Freedom p 2684 N94-26286

SPACECRAFT DOCKING MODULES
Hardware design of a grappling/docking device accommodating large lateral and angular misalignments
p 2833 N94-25668

SPACECRAFT ELECTRONIC EQUIPMENT
Aspects of the circuit board thermal design
[VTT-PUBS-132] p 2779 N94-25644

SPACECRAFT ENVIRONMENTS
The radiation design handbook
[ESA-PSS-01-609-ISSUE-1] p 2696 N94-27397
Annals of the Research Inst. of Environmental Medicine, Nagoya Univ., volume 44
[REPT-44-VOL-44] p 2911 N94-27442
Comparative measurement of visual stability in cosmic space: Onboard experiment and pre-flight activities
p 2916 N94-27463

SPACECRAFT GUIDANCE
Hardware design of a grappling/docking device accommodating large lateral and angular misalignments
p 2833 N94-25668
High performance flight computer developed for deep space applications p 2949 N94-26718
Using formal specification in the Guidance and Control Software (GCS) experiment. Formal design and verification technology for life critical systems
[NASA-CR-194884] p 2956 N94-28267

SPACECRAFT INSTRUMENTS
Technology development in space projects
[VTT-TIED-1438] p 2682 N94-26249
The radiation design handbook
[ESA-PSS-01-609-ISSUE-1] p 2696 N94-27397

SPACECRAFT LAUNCHING
Project Columbiad: Reestablishment of human presence on the Moon p 2689 N94-25687
Comet nucleus and asteroid sample return missions
p 2689 N94-25692
Access to space study
[NASA-TM-109693] p 2685 N94-27151
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle mission STS-60
[NASA-TM-109193] p 2692 N94-27956
Lunar Transportation Facilities and Operations Study, option 2
[NASA-CR-195701] p 3109 N94-27983

SPACECRAFT MAINTENANCE
Space Habitat, assembly and repair facility
p 2691 N94-25696
Orbit transfer rocket engine technology program
[NASA-CR-189229] p 2702 N94-26542

SPACECRAFT MODELS
A virtual environment for satellite modeling and orbital analysis in a distributed interactive simulation
[AD-A274114] p 2694 N94-25904

SPACECRAFT MODULES
Assured crew return vehicle post landing configuration design and test p 2697 N94-25671
First lunar outpost p 2943 N94-25694

SPACECRAFT MOTION
Superfluid helium sloshing dynamics induced oscillations and fluctuations of angular momentum, force and moment actuated on spacecraft driven by gravity gradient or jitter acceleration associated with slew motion
[NASA-CR-193928] p 2799 N94-27931

SPACECRAFT PERFORMANCE
Nickel cadmium battery operations on-orbit: Trials, tribulations, and success on the Upper Atmosphere Research Satellite p 2862 N94-28120

SPACECRAFT POWER SUPPLIES
Manned mission to Mars with periodic refueling from electrically propelled tankers p 2689 N94-25670
Low-cost unmanned lunar lander
p 2697 N94-25699
Small low mass advanced PBR's for bi-modal operation
[DE94-003201] p 2699 N94-25798
Parametric analysis of the space power plants on the base of criterion of specific mass in generalized design variants
[DE93-634153] p 2701 N94-26166
NSWC Crane Aerospace Cell Test History Database
p 2860 N94-28102
Advanced energy storage for space applications: A follow-up p 2860 N94-28103
Battery study for the Mars Environmental Survey (MESUR) Pathfinder p 2860 N94-28105
Ni-H2 cell characterization for INTELSAT programs
p 2861 N94-28109
Cycle life versus depth of discharge update on modeling studies — Nickel-Hydrogen Batteries
p 2862 N94-28115
Charge efficiency of Ni/H2 cells during transfer orbit of Telstar 4 satellites p 2862 N94-28117
Orbital management and design considerations for NiCd satellite power systems p 2862 N94-28118
TOPEX/Poseidon battery performance during the first year of operation p 2862 N94-28119
Nickel cadmium battery operations on-orbit: Trials, tribulations, and success on the Upper Atmosphere Research Satellite p 2862 N94-28120
Performance test results of ETS-6 Ni-Cd cells
p 2863 N94-28121
Discriminating performance parameters for 50 amp-hour and 60 amp-hour nickel-cadmium plates and battery cells p 2863 N94-28123
Some observations on battery charge control
p 2863 N94-28125
Construction of temperature compensated constant voltage (VT) curves for super Ni-Cd (tm) cells
p 2863 N94-28126

A pressure based charge control system for the DSPSE NiH2 CPV battery p 2863 N94-28127
Advanced nickel-hydrogen spacecraft battery development p 2863 N94-28129
Development of nickel-metal hydride cell: An update p 2864 N94-28130
Determination of thermal properties of commercial Ni-MH cells p 2864 N94-28132

SPACECRAFT PROPULSION
Systematic Propulsion Optimization Tools (SPOT) p 2976 N94-25666
Small low mass advanced PBR's for bi-modal operation [DE94-003201] p 2699 N94-25798
Parametric analysis of the space power plants on the base of criterion of specific mass in generalized design variants [DE93-634153] p 2701 N94-26166
Space Station technology testbed: 2010 deep space transport p 2687 N94-27368
Inertial electrostatic confinement as a power source for electric propulsion p 2688 N94-27373
Rocket engine numerical simulation p 2688 N94-27375

SPACECRAFT SHIELDING
Mounting of SSM's [VTT-TIED-1442] p 2695 N94-26250
Physics of debris clouds from hypervelocity impacts [NASA-CR-193932] p 2696 N94-26791

SPACECRAFT STABILITY
An approximate solution for the spinup dynamics of near axisymmetric axial gyrostats using the method of multiple scales [AD-A273723] p 2698 N94-26223
Superfluid helium sloshing dynamics induced oscillations and fluctuations of angular momentum, force and moment actuated on spacecraft driven by gravity gradient or jitter acceleration associated with slew motion [NASA-CR-193928] p 2799 N94-27931

SPACECRAFT STRUCTURES
Project PARAS: Phased array radio astronomy from space p 3081 N94-25703
Proceedings of Damping 1993, volume 2 [AD-A274227] p 2840 N94-26953
Proceedings of Damping 1993, volume 3 [AD-A274228] p 2840 N94-27008

SPACECRAFT TEMPERATURE
User's guide for the thermal analyst's help desk expert system [NASA-CR-194885] p 2695 N94-26103

SPACECRAFT TRAJECTORIES
Manned mission to Mars with periodic refueling from electrically propelled tankers p 2689 N94-25670
An approximate solution for the spinup dynamics of near axisymmetric axial gyrostats using the method of multiple scales [AD-A273723] p 2698 N94-26223
Arithmetic performances of onboard computers p 2952 N94-26738
A survey of uncontrolled satellite reentry and impact prediction [AD-A274903] p 2695 N94-26750

SPACECREWS
Design and development of the second generation Mars Habitat p 2943 N94-25693
First lunar outpost p 2943 N94-25694
Psychophysiology in microgravity and the role of exercise p 2936 N94-28374

SPACELAB
Spacelab life sciences 2 post mission report [NASA-CR-195544] p 2942 N94-27410
Construction and test of experiment hardware for a space experiment on Spacelab mission IML-2 [DLR-FB-93-23] p 2903 N94-27743

SPACERS
Structural design feasibility study of Space Station long spacer truss [NASA-TM-106346] p 2843 N94-27559

SPALLATION
Simulations of terrestrial in-situ cosmogenic-nuclide production [DE94-004999] p 3117 N94-27826

SPANWISE BLOWING
Effects, limits, and limitations of spanwise blowing p 2659 N94-28027

SPATIAL DISTRIBUTION
Spatial symmetry, local integrability and tetrahedron equations in the Baxter-Bazhanov model [DE93-634348] p 3002 N94-26038
Characterization of the energy deposition produced by the primary electron beam on the EXCEDE 3 program [AD-A274453] p 3033 N94-27084
Effect of precipitate structure on hot deformation of Al-Mg-Mn alloys [DE94-004596] p 2741 N94-27622

SPATIAL RESOLUTION
Unsegmented electromagnetic calorimeter prototype. Energy and coordinate resolution [DE93-634185] p 2810 N94-26396
The OPAL vertex detector [ISBN-0-315-51152-4] p 2812 N94-27257
Simulation of the Indian and East-Asian summer monsoon in the ECMWF model: Sensitivity to horizontal resolution [DE94-004276] p 2897 N94-27571

SPECIFIC HEAT
Bulletin of the Institute for Chemical Reaction Science, Tohoku University, volume 2 [JTN-94-80602] p 2717 N94-27385
High-temperature and high-pressure flow calorimeter p 2718 N94-27390

SPECIFIC IMPULSE
Inertial electrostatic confinement as a power source for electric propulsion p 2688 N94-27373

SPECIFICATIONS
Primary standards laboratory report 1st half 1993 [DE94-003138] p 2762 N94-26027
The CODE-TOP (COncurrent system DEvelopment using Transformations Of Predicate-transition nets) method: Examples of using it for system architecture specification, software specification, and code generation p 2953 N94-26744
Specification performance optimization and executive generation for onboard multiprocessor real time application with SynDEx p 2954 N94-26745
Semantics of MANIFOLD: Specification in ASF+SDF and extension [CWI-CS-R9269] p 2971 N94-27575
Telecommand decoder specification [ESA-PSS-04-151-ISSUE-1] p 2693 N94-27583
ARM: Abstract Rewriting Machine [CWI-CS-R9330] p 2974 N94-27794
Using formal specification in the Guidance and Control Software (GCS) experiment. Formal design and verification technology for life critical systems [NASA-CR-194884] p 2956 N94-28267

SPECKLE INTERFEROMETRY
Properties of the near-axis bispectrum applied to high-resolution astronomical imaging [ISBN-0-315-85247-X] p 3103 N94-27302

SPECKLE PATTERNS
Response of an airborne synthetic aperture radar to sea ice in the marginal ice zone [ISBN-0-315-84243-1] p 2849 N94-26668
Theoretical and experimental analysis of the spatial and temporal behaviour of the intensity of an electro-magnetic wave reflected from a diffuse target after passing through a turbulent atmosphere [ITN-94-85230] p 2774 N94-27234

SPECTRA
Multivariate spectral analysis to extract materials from multispectral data [AD-A274142] p 2709 N94-27135
A comparison of spectral decorrelation techniques and performance evaluation metrics for a wavelet-based, multispectral data compression algorithm p 2946 N94-28258

SPECTRAL BANDS
Zodiacal light data investigation. Interim results for the Earthlimb Clutter Experiment [AD-A274461] p 3104 N94-27265
Cooling the Martian atmosphere: The spectral overlap of the C02 15 micrometers band and dust p 3107 N94-27886
Wavelet compression techniques for hyperspectral data p 2947 N94-28263

SPECTRAL CORRELATION
A comparison of spectral decorrelation techniques and performance evaluation metrics for a wavelet-based, multispectral data compression algorithm p 2946 N94-28258

SPECTRAL EMISSION
A numerical solution to the one and two dimensional line radiative transfer equation [ISBN-0-315-84258-X] p 2994 N94-26640

SPECTRAL ENERGY DISTRIBUTION
Energy concentration in high energy hadron-gamma families p 3113 N94-25632
Catalog of absolutely calibrated, range normalized, wideband, electric field waveforms from triggered lightning flashes in Florida [AD-A273793] p 2892 N94-25873
Characterization of the energy deposition produced by the primary electron beam on the EXCEDE 3 program [AD-A274453] p 3033 N94-27084
Investigations of the dynamical evolution of protoplanetary nebulae [NASA-CR-195278] p 3105 N94-27428

SPECTRAL METHODS
Rendering of three-dimensional data sets derived from finite-difference and spectral methods [AD-A273724] p 3096 N94-25997
Recent advances in the spectral element method p 2657 N94-28348

SPECTRAL REFLECTANCE
In situ x ray reflectivity measurements of thin film structural evolution [DE94-002289] p 3051 N94-25944
The optical properties of high-T(c) superconductors grown by pulsed laser deposition [ISBN-0-315-84917-7] p 3039 N94-27962

SPECTRAL RESOLUTION
How well was total ozone abundance inferred with Mariner 9? p 3108 N94-27891

SPECTRAL SIGNATURES
Mapping coastal habitats using an imaging spectrometer [ISBN-0-315-84362-4] p 2848 N94-26664

SPECTRAL THEORY
Short-range cloud amount forecasting with model output statistics [AD-A274769] p 2895 N94-26798
An enhanced global spectral model [PL-TR-92-2011] p 2898 N94-28223

SPECTROMETERS
Study on neutron activation analysis [DE93-632191] p 3017 N94-26116

SPECTROPHOTOMETERS
Reflectometer employing an integrating sphere and lens-mirror concentrator [AD-D016061] p 3039 N94-27676

SPECTRORADIOMETERS
Radiometric, spectral, and effectiveness equipment [AD-A274208] p 3037 N94-27066

SPECTROSCOPIC ANALYSIS
Study on analyzing method establishment for metallic material development p 2729 N94-25578
Hook spectroscopy as an atomic number density diagnostic applied to laser-ablated copper plasmas [DE94-002645] p 3042 N94-26081
Gordon Research Conference on the Physics and Chemistry of Laser Diagnostics in Combustion [AD-A274609] p 2716 N94-26893
Determination of lead isotope ratios in seawater by purge and trap GC/MS after ethylation p 2870 N94-28152

SPECTROSCOPY
Spectroscopic and vibrational energy transfer studies in molecular bromine [AD-A273795] p 3014 N94-25875
Heavy quark production and spectroscopy [DE94-003619] p 3015 N94-25935
Optimization of experimental conditions in IR reflectance determination of BPSG properties [DE94-002742] p 2713 N94-25978
Multivariate calibration applied to near-infrared spectroscopy for the quantitative analysis of dilute aqueous solutions [DE94-003231] p 2716 N94-26794
Meson spectroscopy and particle astrophysics [DE94-001799] p 3115 N94-27003
Charmonium physics at a tau-charm factory [PB94-124344] p 3024 N94-27199

SPECTRUM ANALYSIS
Hyperspectral analysis of space objects: Signal to noise evaluation [AD-A273882] p 2765 N94-25728
The Latin American conference on the applications of the Moessbaer effect [DE93-615942] p 3051 N94-25912
Buckyball microwave plasmas: Fragmentation and diamond-film growth [DE94-003209] p 3053 N94-26031
BATSE Data Analysis [NASA-CR-195545] p 3114 N94-26685
The continuum spectral characteristics of gamma ray bursts observed by BATSE p 3114 N94-26686
ARM Fourier transform spectrometer data analysis tools [DE94-000865] p 2895 N94-26697
A current evaluation of the digital beamforming testbed at Rome Laboratory [AD-A274311] p 3032 N94-26881
Multivariate spectral analysis to extract materials from multispectral data [AD-A274142] p 2709 N94-27135
Spectral and temporal correlations of multifrequency waves in the turbulent atmosphere [ITN-94-85229] p 2774 N94-27233
Trace organic chemical detection using an ultraviolet excitation molecular beam fluorometer [DE94-002649] p 2704 N94-27708
SPECTRUM analysis of multispectral imagery in conjunction with wavelet/KLT data compression [DE94-003961] p 2851 N94-27727

ACES spectral display software: User manual
[SKL-1600-99-002] p 2973 N94-27762

Multispectral and textural classifications of a SPOT HRV-1 image, region of Sherbrooke, Quebec, Canada
[ISBN-0-315-84978-9] p 2851 N94-27863

Cooling the Martian atmosphere: The spectral overlap of the C02 15 micrometers band and dust
p 3107 N94-27886

Investigation of spectral analysis techniques for randomly sampled velocimetry data
p 3009 N94-27924

NMR study of quasicrystal Al(70)Pd(20)T(M10) alloy (T(M):Cr, Mn, Fe, and Co) p 2745 N94-28162

SPECULAR REFLECTION

Illumination in diverse codimensions
[NASA-CR-191596] p 2971 N94-27572

SPEECH

Researches of the Electrotechnical Laboratory. No. 955: Speech recognition by description of acoustic characteristic variations
[JTN-94-80604] p 2775 N94-27249

SPEECH RECOGNITION

A rough set approach to speech recognition
[ISBN-0-315-83894-9] p 2769 N94-26619

Signal- and listener-based factors in complex auditory pattern perception
[AD-A274148] p 2939 N94-27094

Researches of the Electrotechnical Laboratory. No. 955: Speech recognition by description of acoustic characteristic variations
[JTN-94-80604] p 2775 N94-27249

SPEED CONTROL

Variable speed controller p 2943 N94-25678

SPHERES

Hardware design of a spherical mini-rover
p 2833 N94-25669

Design and development of the second generation Mars Habitat p 2943 N94-25693

Dielectric polarizability of sphere with arbitrary anisotropy
[PB94-133113] p 2779 N94-28397

SPHERICAL WAVES

Mach reflection of spherical detonation waves
[DE93-016604] p 2797 N94-27705

SPIN

Spin-polarized atomic hydrogen: Devices and phenomena
[ETN-94-95342] p 3016 N94-26002

SPIN DYNAMICS

Optical conductivity and resistivity in the two-band Emery model
[DE94-601943] p 3051 N94-25945

Crossover between BCS and performed-Boson theories with increasing interactions
[DE93-019018] p 3017 N94-26078

SPIN GLASS

Technical report of ISSP. Ser. A, no. 2673: Two successive spin glass transitions in non-diluted Heisenberg-like spin glass Ni(0.42)Mn(0.58) TiO3
[JTN-94-80559] p 2756 N94-27241

SPIN TESTS

The experimental behavior of spinning pretwisted laminated composite plates
[NASA-CR-195220] p 2711 N94-27352

SPINEL

Transparent polycrystalline body with high ultraviolet transmittance, process for making and applications thereof
[CA-PATENT-1325511] p 3066 N94-27276

Damage growth in MgAl2O4 crystals by Xe ion irradiations
[DE94-005009] p 3069 N94-27828

SPINOR GROUPS

On the relativistic invariant representation of arbitrary bilinear combinations of Dirac spinors
[DE93-634343] p 3019 N94-26456

Relativistic two-body system in 1+1-dimensional QED. 1: On the circle S1
[DE94-603716] p 3067 N94-27647

SPLINE FUNCTIONS

Approximate solution of the fourth order initial value problem using deficient spline polynomials
[DE93-613023] p 2991 N94-25880

On a spline-approximation method for solving ordinary differential equations
[DE93-634290] p 2994 N94-26471

Unified approach for direct and inverse boundary layer prediction using cubic spline collocation
p 2653 N94-28326

SPLINES

Radial basis function approximation: From gridded centers to scattered centers
[AD-A274184] p 2998 N94-27103

SPONTANEOUS EMISSION

Enhancement of the rate of radiative processes in the field of a magnetic monopole
[DE94-603717] p 3074 N94-27696

SPOT (FRENCH SATELLITE)

Design principles of onboard management of a Sun synchronous satellite p 2950 N94-26722

SPOT WELDS

Study on interfacial reaction analysis at interfacial joining p 2728 N94-25574

SPRAYED COATINGS

Study on film generation phenomena by particle deposition p 2728 N94-25575

Attachment techniques for high temperature strain
[AD-A274766] p 2811 N94-26568

SPRAYERS

Impact of improved materials and cabin water spray on commuter aircraft postcrash fire survivability
[AD-A274421] p 2660 N94-27081

SPRAYING

Cryogenic insulation studies
[NASA-CR-195266] p 2756 N94-27429

SPREAD SPECTRUM TRANSMISSION

Evaluation of an Acoustic Charge Transport (ACT) device for adaptive interference suppression in spread spectrum communications systems
[AD-A274073] p 2765 N94-25647

Analysis and simulation of a GPS receiver design using combined delay-lock and modified tanlock loops
[AD-A274037] p 2664 N94-25810

Code division multiple access local area network communications employing fiber optic signal processing techniques
[AD-A274897] p 3096 N94-26180

Kalman filtering of narrowband interference from direct sequence spread spectrum communications systems
[ISBN-0-315-84011-0] p 2784 N94-26627

The performance of nonorthogonal noncoherent frequency hopped M-ary FSK in additive white Gaussian noise, fading and jamming
[ISBN-0-315-85243-7] p 2775 N94-27301

SPUTTERING

Aluminum-ion sputtering from Al surfaces with very-low-energy ions
[REPT-A-2668] p 2733 N94-26073

Studies of thin-film growth, adsorption, and oxidation by in situ, real-time, and ex situ ion beam analysis
[DE94-002907] p 3055 N94-26275

The ZnO thin films with C-axis orientation prepared on the room temperature substrate by the ECR multipolar plasma sputtering method
[DE94-605039] p 2758 N94-27857

SQUARE WAVES

Multiple model adaptive control of a large flexible space structure with purposeful dither for enhanced identifiability
[AD-A274132] p 2987 N94-27122

SQUEEZE CASTING

Squeeze casting: A literature review
[PB94-124575] p 2741 N94-27326

SQUIBS

Effects of repeating resistance testing on firing ability of igniter EP360-3
[AD-A274814] p 2759 N94-26486

SQUID (DETECTORS)

Demonstration of monolithic co-fabrication of Y1Ba2Cu3O7-Sigma and CMOS devices on the same sapphire substrate
[AD-A274757] p 3059 N94-26566

STABILITY

Zinc(2) oxide stability in alkaline sodium phosphate solutions at elevated temperatures
[DE94-003316] p 2715 N94-26320

On the (Phi)(sub 0)-stability of functional differential equations
[DE94-601507] p 3006 N94-26460

A characterization of stable models using a non-monotonic operator
[CWI-CS-R9315] p 2970 N94-27543

Unsteady aspects of hot gas reingestion and statistical analysis p 2676 N94-28019

STABILITY DERIVATIVES

Linear modeling of rotorcraft for stability analysis and preliminary design
[AD-A274869] p 2677 N94-26192

A finite wake theory for two-dimensional rotary wing unsteady aerodynamics
[AD-A274921] p 2645 N94-26535

STABILITY TESTS

Numerical experiment on finite element method for matching data
[DE94-701208] p 3000 N94-27731

Multidisciplinary aeroelastic analysis of a generic hypersonic vehicle
[NASA-TM-4544] p 2691 N94-27868

STABILIZATION

Numerical simulation of plasma vertical position stabilization in ITER
[DE93-634588] p 3044 N94-26510

The addition of molecular oxygen to hydroperoxy-propyl radicals
[DE94-003662] p 2760 N94-27725

Passive stabilization of MHD instabilities at high (beta)n in the HBT-EP tokamak
[DE94-003317] p 3047 N94-27735

Stabilization of polyaniline solutions
[DE94-003958] p 2704 N94-27745

STABLE OSCILLATIONS

Regrouping of the beam in the IHEP PS for the UNK p-p programs
[DE93-634021] p 3032 N94-26164

STAGNATION PRESSURE

Pressure-gain combustion
[DE94-002975] p 2719 N94-27712

STAINLESS STEELS

R and D for creation, measurement, application of ultra-high vacuum p 2723 N94-25549

Study on high temperature damage control and life improvement p 2729 N94-25580

Study on evaluation of crack generation and crack growth behaviors under static loading at high temperature and under combined loading p 2730 N94-25583

Reference electrodes for solid polymer electrolytes
[DE94-004583] p 2780 N94-25806

New equation of state for stainless steel 347
[DE94-004189] p 2732 N94-25974

Effect of loading mode on the fracture toughness of a reduced activation ferritic/martensitic stainless steel
[DE94-004290] p 2732 N94-25987

Guidelines for controlling stress corrosion cracking and corrosion fatigue of stainless steels: A literature review
[VTT-TIED-1420] p 2837 N94-26262

Stability of reference masses 2: The effect of environment and cleaning methods on the surfaces of stainless steel and allied materials
[NPL-DMM(A)-95] p 2738 N94-26653

Vapor deposition of copper on stainless steel 304L
[DE94-001945] p 2740 N94-27006

Modification of a model for fatigue life predictions based on level-crossing
[PB94-123395] p 2842 N94-27198

Isothermal corrosion testing of steels in molten nitrate salts
[DE94-004695] p 2742 N94-27755

Upset welding process for 21-6-9 spherical vessels
[DE93-018194] p 2832 N94-28229

STANDARD DEVIATION

Example of statistical techniques applied to analysis of effects of small changes
[ESDU-93023] p 2670 N94-28094

STANDARDIZATION

The question of standards for digital interactive television
[AD-A273872] p 2765 N94-25725

Standardizing exchange formats
[DE93-616798] p 3095 N94-25751

Development of the Air Force contingency contracting course framework
[AD-A273921] p 3093 N94-25895

International energy: Research organizations, 1988-1992
[DE93-017267] p 3098 N94-26398

Standardize Ada hard real-time services?
p 2951 N94-26729

MILCOM 92 and standardization for HF-communication. A study tour to the USA in October 1992
[PB94-124427] p 2774 N94-27219

Software assurance standard
[NASA-TM-109705] p 2975 N94-27992

Air Force standards for nickel hydrogen battery
p 2862 N94-28116

Open communication in manufacturing automation
[PB94-132479] p 2976 N94-28377

STANDARDS

Primary standards laboratory report 1st half 1993
[DE94-003138] p 2762 N94-26027

CEN-VAMAS round robin on grain size measurement for advanced technical ceramics
[VAMAS-TR-12] p 2752 N94-26654

Standardize Ada hard real-time services?
p 2951 N94-26729

Guidelines for unlubricated sliding wear tests. Part 1: General approach
[PB94-119666] p 2825 N94-27322

Technical Report of National Research Institute of Fisheries Engineering: Fishing Boat and Instrument, No. 12
[JTN-94-80595] p 2764 N94-27976

Software assurance standard
[NASA-TM-109705] p 2975 N94-27992

Controls, monitoring and performance measurements
p 2831 N94-28086
Air Force standards for nickel hydrogen battery
p 2862 N94-28116
Air traffic administration enroute to Europe
p 2661 N94-28238
Comparison of the lossy image data compressions for the MESUR Pathfinder and for the Huygens Titan Probe
p 2945 N94-28254

STANDING WAVE RATIOS
ADC test support program
[AD-A274819] p 2783 N94-26491

STAR FORMATION
Investigations of the dynamical evolution of protoplanetary nebulae
[NASA-CR-195278] p 3105 N94-27428

STARBURST GALAXIES
Weak bump quasars
[NASA-CR-195267] p 3103 N94-27933

STARTING
Engine starting and stopping p 2828 N94-28047

STATE ESTIMATION
Iterative methods for the WLS state estimation on RISC, vector, and parallel computers
[DE94-004260] p 3000 N94-27569

STATE VECTORS
Symbolic model checking for sequential circuit verification
[AD-A274375] p 2786 N94-27061

STATIC LOADS
Investigation of compressive behavior for metal matrix composites with a circular hole
[AD-A273835] p 2705 N94-25739

STATIC PRESSURE
Computation of static pressure downstream of a normal shock for hypersonic flight (ambient temperature known)
[ESDU-93020] p 2649 N94-28091

STATISTICAL ANALYSIS
Study on knowledge extraction and systematization for material design p 2727 N94-25568
Vulnerability assessment using a fuzzy logic based method
[AD-A274075] p 2957 N94-25649
Improved quality of reconstructed images through sifting of data in statistical image reconstruction
[AD-A273884] p 3034 N94-25730
Developing prediction regions for a time series model for hurricane forecasting
[AD-A273777] p 2892 N94-25861
Surfaces allowing for fractional statistics
[DE93-614526] p 3002 N94-25910
An evaluation of the utility of ground-based high resolution interferometer (GB-HIS) soundings of the planetary boundary layer
[DE94-000960] p 3106 N94-25981
Statistical quality management
[MEMO-COSOR-92-43] p 2834 N94-26008
Towards a theory of growing surfaces: Mapping two-dimensional Laplacian growth onto Hamiltonian dynamics and statistics
[DE94-002636] p 2991 N94-26079
Quantum statistical inference for density estimation
[DE94-002625] p 3073 N94-26805
The use of EEG as a workload assessment tool in flight test
[AD-A274568] p 2910 N94-26847
Some contributions to the theory of monotone dependence
[PB94-124922] p 3004 N94-27051
Enhanced tracking of airborne targets using forward looking infrared and laser return measurements
[AD-A274181] p 3037 N94-27102
Limit theorems for functionals of Markov processes and renormalizable stable fields
[AD-A274645] p 3004 N94-27106
Research in improved assessment of software reliability
[AD-A274161] p 2968 N94-27140
Is probability of frequency too narrow?
[DE94-000687] p 3004 N94-27612
Analysis of S-wave seismogram envelope of deep earthquakes and estimation of random inhomogeneities in the Kanto-Tokai area p 2886 N94-27988
Unsteady aspects of hot gas reingestion and statistical analysis p 2676 N94-28019
Weak coupling in statistical energy analysis ion Research, Univ. of Southampton, Southampton SO9 5NH, England)
[ISVR-TR-228] p 2832 N94-28174

STATISTICAL CORRELATION
Aspects of goodness-of-fit
[AD-A274826] p 3003 N94-26495
Correlation between electrical activity and the size of single sinoatrial node cells p 2907 N94-27513

STATISTICAL DISTRIBUTIONS
Bisexual branching diffusions
[AD-A274698] p 3008 N94-26374
Fuzzy robust statistics for application to the fuzzy c-means clustering algorithm
[AD-A274719] p 3003 N94-26436
Statistical mechanical properties of Z(N)(sup n-1) broken model
[DE93-634344] p 2993 N94-26457
Some contributions to the theory of monotone dependence
[PB94-124922] p 3004 N94-27051
Variability of measured sonic boom signatures
p 2651 N94-28197

STATISTICAL MECHANICS
Quantum statistical inference for density estimation
[DE94-002625] p 3073 N94-26805
Refractive and dielectric properties of helium, argon and nitrogen gases
[PB94-123783] p 3008 N94-26851

STATISTICAL TESTS
Aspects of goodness-of-fit
[AD-A274826] p 3003 N94-26495
Estimation and tests-of-fit for the three parameter Weibull distribution
[AD-A274827] p 3004 N94-26496
Wieand's theorem
[PB94-126711] p 3004 N94-27223
Example of statistical techniques applied to analysis of effects of small changes
[ESDU-93023] p 2670 N94-28094

STATISTICAL WEATHER FORECASTING
Developing prediction regions for a time series model for hurricane forecasting
[AD-A273777] p 2892 N94-25861

STATISTICS
Monograph of the Aviation Epidemiology Data Register for CY 1992
[AD-A274400] p 2911 N94-27130

STATORS
Experimental contribution to the study of secondary flows in centrifugal turbopump stator components
[ECL-92-35] p 2789 N94-25654
Wake passage effects on the losses in a linear turbine cascade
[AD-A273794] p 2790 N94-25874
Laser Doppler velocimetry in a low speed multistage compressor
[AD-A274836] p 2818 N94-26498

STEADY FLOW
Evaluation of a concentration probe for application in a supersonic flow field
[AD-A273915] p 2643 N94-25592

STEADY STATE
Decay of non-equilibrium polariton condensate in semiconductors
[DE94-604016] p 3068 N94-27678
Ion-driven permeation of deuterium in metals
[DE94-701104] p 2744 N94-27876
Gas-turbine engine steady-state behavior
p 2828 N94-28044
Transient performance p 2828 N94-28045

STEAM FLOW
Simulation: A tool for steam plant dynamic analysis
p 2831 N94-28084
Steam plant: Steam turbines for combined cycles
p 2831 N94-28085

STEAM TURBINES
Knowledge organization in intelligent tutoring systems for diagnostic problem solving in complex dynamic domains
[AD-A273986] p 2984 N94-25899
Combined Cycles for Power Plants
[VKI-LS-1993-08] p 2830 N94-28077
Introduction to combined cycles p 2789 N94-28078
Thermodynamics of combined cycle plant
p 2831 N94-28079
Steam plant for combined cycles: Heat recovery steam generators, design principles, and construction details
p 2831 N94-28083
Simulation: A tool for steam plant dynamic analysis
p 2831 N94-28084
Steam plant: Steam turbines for combined cycles
p 2831 N94-28085

STEEL STRUCTURES
Study on fatigue crack propagation characteristics around welded joint interface in complexed conditions
p 2730 N94-25584
The structural behaviour of the steel or composite concrete and steel frames and the connections of frame members during the fire: A literature review
[VTT-TIED-1437] p 2837 N94-26307
Geometry changes in the elastic-plastic analysis of steel spatial skeletal structures
[IFTR-37/1993] p 2839 N94-26825
Modification of a model for fatigue life predictions based on level-crossing
[PB94-123395] p 2842 N94-27198

STEELS
Interactions between corrosion fatigue and stress corrosion crack on steel for light water reactors
p 2722 N94-25547
Preparation of creep data sheet: Material strength data sheet p 2723 N94-25548
Knowledge base systems for chemical compounds designing support p 2723 N94-25550
Fundamental study on monitoring technology on local surface damages p 2724 N94-25555
Microstructural development in low activation ferritic alloys irradiated to 200 dpa at 420 C
[DE94-004269] p 2731 N94-25803
General Motors Corporation and Pacific Northwest Laboratory staff exchange: Inspection of case hardened steels and metal-matrix composites
[DE94-003470] p 2706 N94-25982
Cracking of textured zinc coating during forming process
[DE94-003414] p 2750 N94-26085
An experimental study on the effects of compressive stress on the fatigue crack growth of low-alloy steel
[DE94-004447] p 2737 N94-26582
The influence of weld metal alloying additions to extend the heat input range for the submerged arc welding of high strength steels
[AD-A274284] p 2738 N94-26679
Evaluation of crack arrest fracture toughness of parent plate, weld metal and heat affected zone of BIS 812 EMA ship plate steel
[AD-A274871] p 2839 N94-26859
The role of point defect clusters in reactor pressure vessel embrittlement
[DE94-001122] p 2739 N94-26931
Development and application of contamination technology for MSFC managed space systems
[NASA-CR-193934] p 2697 N94-27421
Fatigue propagation behaviour of short cracks (1-2 mm) in steels
[ESDU-93033] p 2845 N94-28145
Method of bonding molybdenum to steel
[AD-D016079] p 2747 N94-28187

STEERABLE ANTENNAS
Flight testing of GPS and GPS-aided systems
[NLR-TP-92151-U] p 2666 N94-27831

STEERING
Studies of non-linear optical effects for agile beam steering
[AD-A273998] p 3034 N94-25902
Theoretical aspects of the agile mirror
[AD-A274890] p 2767 N94-26177

STELLAR ENVELOPES
Investigations of the dynamical evolution of protoplanetary nebulae
[NASA-CR-195278] p 3105 N94-27428

STELLAR MASS EJECTION
Solar-geophysical data number 590, October 1993. Part 2: (Comprehensive reports). Data for April 1993, and miscellaneous
[PB94-125911] p 3110 N94-27054
Solar-geophysical data number 591, November 1993. Part 2: (Comprehensive reports). Data for May 1993 and miscellaneous
[PB94-134830] p 3111 N94-28360

STELLAR MODELS
Chaotic dynamics of the solar cycle
[AD-A274315] p 3110 N94-26883
Investigations of the dynamical evolution of protoplanetary nebulae
[NASA-CR-195278] p 3105 N94-27428

STELLAR RADIATION
An April 1991 outburst from 4U0115+63 observed by BATSE
[NASA-CR-195252] p 3116 N94-27440

STELLAR ROTATION
Chaotic dynamics of the solar cycle
[AD-A274315] p 3110 N94-26883

STELLAR SPECTRA
BATSE Data Analysis
[NASA-CR-195545] p 3114 N94-26685
Solar-geophysical data number 590, October 1993. Part 1: (Prompt reports). Data for September, August 1993, and late data
[PB94-125903] p 3110 N94-27053

STELLAR SPECTROPHOTOMETRY
In search of Nemesis p 2888 N94-28297

STELLARATORS
Fusion reactor systems studies
[DE94-003162] p 3046 N94-27686

STEREOPHOTOGRAPHY
On line quantification of crystal surfaces by stereo imaging
[NASA-CR-195277] p 3066 N94-27561

STEREOSCOPIC VISION

Parallel algorithm for dominant points correspondences in robot binocular stereo vision p 2686 N94-27364

An algorithm for stereo correspondence problems on the analogy of human vision [NAL-TR-1185] p 2940 N94-27584

Visual surface perception: Surface reconstruction from shading and stereo [ISBN-0-315-60974-5] p 2975 N94-27872

STIFFENING

Investigation of the bond strength of a discrete skin-stiffener interface [NLR-TP-92183-U] p 2670 N94-27796

STIFFNESS

Experimental and numerical vibration analyses of a stiffened panel [VTT-PUBS-129] p 2836 N94-25650

Formulae for the buckling of simply-supported corrugated panels of orthotropic material under shear load [PB94-126547] p 2840 N94-26911

STIFFNESS MATRIX

On the error committed by stopping the Newton iteration in implicit Runge-Kutta methods [TW-93-02] p 2992 N94-26229

STIMULATED EMISSION

Light emitting porous silicon [AD-A274152] p 3038 N94-27137

Observation of stimulated emission from an MBE grown GaN film on sapphire [DE94-003638] p 3068 N94-27724

STIMULATION

Endogeneous and exogenous control of visual selection: A review of the literature [AD-A273761] p 2908 N94-25871

Development of stimulus-seeking scale for expecting individual differences against confinement stress p 2915 N94-27460

Effect of PGE2 receptor agonists butaprost, M and B 28767 and an antagonist AH 6809 on the BK response of visceral polymodal receptors p 2906 N94-27494

Analysis of the Electrically Evoked Response (EER) of the cat p 2908 N94-27519

Electrical stimulation in exercise training p 2935 N94-28371

The value of electrical stimulation as an exercise training modality p 2936 N94-28372

STIRRING

Study on melted solution stirring under microgravity p 2730 N94-25585

STOCHASTIC PROCESSES

The application of simulated annealing to stochastic systems [AD-A273850] p 3001 N94-25607

Stochastic resonance in a periodic potential system under a constant force [DE93-616817] p 3008 N94-25831

Modeling defect production in high energy collision cascades [DE94-003810] p 3017 N94-26049

Towards a theory of growing surfaces: Mapping two-dimensional Laplacian growth onto Hamiltonian dynamics and statistics [DE94-002636] p 2991 N94-26079

Eleventh Symposium on Energy Engineering Sciences: Proceedings [DE93-019930] p 2763 N94-26429

Cone-valued Lyapunov functions and the stability of stochastic differential equations [DE94-601504] p 2994 N94-26458

About stochastization of motion of charged particles in geomagnetic field and in the field of a wave packet [DE93-634309] p 2879 N94-26502

Stochastic solution to quantum dynamics [NASA-TP-3408] p 3114 N94-26550

Modeling systems by probabilistic process algebra: An event structures approach [PB94-125259] p 3004 N94-26867

Recursive bundle event structures [PB94-125275] p 3004 N94-26870

Single-server queues with spatially distributed arrivals [PB94-126638] p 2986 N94-26916

A superprocess with a disappearing self-interaction [AD-A274647] p 3009 N94-27108

White noise theory of robust nonlinear filtering with correlated state and observation noises [PB94-126661] p 3004 N94-27211

Stochastic space-time, confinement potential and particle propagator [DE94-606415] p 3074 N94-27680

Temporal stochasticity leads to nondeterministic chaos in a model for blood cell production [DE94-003943] p 2933 N94-27744

Modulating terrestrial impacts from Oort cloud comets by the adiabatically changing galactic tides p 2890 N94-28305

STOICHIOMETRY

Ferroelectric thin film microstructure development and related property enhancement [DE94-002741] p 3061 N94-26856

Numerical simulation of the reignition of detonation by reflected shocks [AD-A274755] p 2795 N94-27252

STOKES FLOW

A thermodynamically consistent constitutive theory for a rigid solid-stokesian fluid mixture [DE93-633202] p 2792 N94-26401

STOKES THEOREM (VECTOR CALCULUS)

Geoid determination: With help of the alternative scattering method [ETN-94-95375] p 2847 N94-25746

STOMACH

The electrogastrogram during parabolic flight p 2913 N94-27452

STOPPING

Modular termination proofs for logic and pure PROLOG programs [CWI-CS-R9316] p 2970 N94-27544

STOPPING POWER

Stopping powers and cross sections due to two-photon processes in relativistic nucleus-nucleus collisions [NASA-CR-4574] p 3033 N94-27646

STORAGE BATTERIES

Method of optimizing the charging of a battery of storage cells, and apparatus for performing the method [AD-D016066] p 2781 N94-26102

Development of nickel-metal hydride cell: An update p 2864 N94-28130

Ni-MH storage test and cycle life test p 2864 N94-28131

Determination of thermal properties of commercial Ni-MH cells p 2864 N94-28132

STORAGE RINGS (PARTICLE ACCELERATORS)

RF-station control crate [DIGEL-1992-9] p 2779 N94-25618

Alignment of the Amsterdam Pulse Stretcher (AmPS) [MTG-93-02] p 2809 N94-25637

Technical report of ISSP. Ser. A, no. 2688: Suppression of higher-order modes in an RF cavity by resistive material [JTN-94-80574] p 2787 N94-27606

STORAGE STABILITY

Ni-MH storage test and cycle life test p 2864 N94-28131

STORAGE TANKS

Automated in-situ inspection systems for underground storage tanks [AD-A274644] p 2764 N94-27144

STORM DAMAGE

Examination of micro- and macro-physical structures and processes in hailstorms with respect to their modification [DLR-FB-93-25] p 2897 N94-27751

STORMS

Thunderstorm Hypothesis Reasoner [NASA-CR-195714] p 2897 N94-27884

STOVL AIRCRAFT

Experiments into the scaling parameters required for exhaust gas ingestion testing of vertical landing aircraft p 2671 N94-28017

Transitional flight characteristics of a geometrically simplified STOVL model p 2672 N94-28035

STRAIN DISTRIBUTION

Study on elucidation of damage generation process by electron beam lithography p 2729 N94-25581

STRAIN GAGES

Attachment techniques for high temperature strain [AD-A274766] p 2811 N94-26568

STRAIN HARDENING

Influence of grain structure and solute composition on the work hardening behavior of aluminium at cryogenic temperatures [DE94-003415] p 2733 N94-26087

Low strain behaviour of a particulate reinforced aluminum alloy [ISBN-0-315-84906-1] p 2744 N94-27961

Mechanical properties and microstructure of thermomechanically processed, high manganese steel [ARL-TR-146] p 2747 N94-28212

STRAIN MEASUREMENT

Studies on the measurement of subsurface fractures and geostress using acoustic emission technique for deep coalbed development [REPT-7] p 2879 N94-26475

Attachment techniques for high temperature strain [AD-A274766] p 2811 N94-26568

Aircraft wheel life assessment [AD-A274378] p 2823 N94-26976

High intensity x ray instrumentation for residual strain measurements in composites and textured materials [ISBN-0-315-85169-4] p 2842 N94-27278

A laboratory test on construction of ice domes and their load-carrying capacity p 2884 N94-27966

The estimation of pre-stress by deformation rate analysis and suggestion of a mechanism from the elast-plastical theory p 2871 N94-28156

STRAIN RATE

Deviatoric stresses and plastic strain rates in strong shock waves for six metals [DE94-002964] p 2733 N94-26022

Deformation twinning: Influence of strain rate [DE94-002693] p 2738 N94-26621

The high strain rate behaviour of tantalum [ISBN-0-315-84472-8] p 2740 N94-27305

Research into the microstructure and mechanical behavior of eutectic Bi-Sn and In-Sn [DE94-004558] p 2741 N94-27619

STRANGENESS

Strange Dibaryons [DE94-003005] p 3022 N94-26769

STRATA

The biostratigraphy and paleogeography of Maastrichtian inoceramids p 2889 N94-28303

STRATEGY

Powerful selling and sales strategy p 2662 N94-28245

STRATOCUMULUS CLOUDS

The numerical simulation of marine boundary layer clouds [AD-A273669] p 2894 N94-26195

STRATOSPHERE

Isotopically labeled CO2 from stratosphere: A tracer of carbon biogeochemistry [DE94-002777] p 2877 N94-26015

Auroral Tomography Workshop Proceedings [PB94-123718] p 2881 N94-27040

In situ Mars ozone detector p 3108 N94-27892

Observation of the upper atmosphere physics at Asuka Station by the 30th Japanese Antarctic Research Expedition in 1989 p 2885 N94-27972

STRATUS CLOUDS

The numerical simulation of marine boundary layer clouds [AD-A273669] p 2894 N94-26195

STREAMS

Measuring variation in ecosystem sensitivity to stress [AD-A274232] p 2868 N94-26817

STRESS (PHYSIOLOGY)

Changes in fluid and electrolyte metabolism during water immersion at high or thermoneutral temperature p 2912 N94-27445

STRESS (PSYCHOLOGY)

Performance assessment in sustained operations using a computer-based synthetic work task [AD-A274707] p 2937 N94-26430

Human dimensions research team, operation restore hope [AD-A274340] p 2939 N94-27056

Task demand, workload, and performance [PB94-123627] p 2942 N94-27155

Development of stimulus-seeking scale for expecting individual differences against confinement stress p 2915 N94-27460

STRESS ANALYSIS

Determination of fracture stress and effective crack tip radius from toughness (Klc) and yield strength (Y) [AD-A274014] p 2836 N94-25754

A nonlinear three-dimensional micromechanics model for fiber-reinforced laminated composites [AD-A273772] p 2705 N94-25857

Evaluation of helium cooling for fusion divertors [DE94-002680] p 3042 N94-25976

Deviatoric stresses and plastic strain rates in strong shock waves for six metals [DE94-002964] p 2733 N94-26022

Development of detection technique for fatigue crack due to thermal stratification phenomena in RCS piping [DE93-632968] p 2838 N94-26400

Studies on the measurement of subsurface fractures and geostress using acoustic emission technique for deep coalbed development [REPT-7] p 2879 N94-26475

Stress analysis of a secondary-bending specimen [AD-A274842] p 2838 N94-26501

User's guide for the frequency domain algorithms in the LIFE2 fatigue analysis code [DE94-004678] p 2838 N94-26563

Nonlinear hysteresis in an endochronic solid [AD-A274594] p 2880 N94-26855

Refined triangular plate and shell elements [PB94-126356] p 2839 N94-26875

Computation of stress intensity factors by the mode enrichment technique with applications to geometrically nonlinear problems [PB94-126513] p 2840 N94-26910

Formulae for the buckling of simply-supported corrugated panels of orthotropic material under shear load [PB94-126547] p 2840 N94-26911

Baseline for a Nordtest method. Reliability stress screening of components. A guide for component users
[PB94-123775] p 2835 N94-27042

Series solution for a cylindrical composite shell subject to axisymmetric loadings
[ISBN-0-315-60559-6] p 2844 N94-27810

Mechanically fastened composite laminates subjected to combined bearing-bypass and shear loading
p 2712 N94-27914

Development of methodologies for the estimation of thermal properties associated with aerospace vehicles
p 2846 N94-27920

On the Lagrangian and updated Lagrangian nonlinear finite element formulations
[ISBN-0-315-61111-1] p 3001 N94-27948

Contact stress in disc cams with roller followers
[ESDU-93001] p 2829 N94-28055

Flat rectangular orthotropic plates under uniformly distributed normal pressure. Elastic stresses and deflections for various forms of edge restraint
[ESDU-93011] p 2845 N94-28061

Three-dimensional elastic stress concentration factors: Plain or countersunk hole in a wide plate subjected to tension, bending, or pin loading
[ESDU-93030] p 2845 N94-28143

Journal of NIRE, volume 2, number 4
[JTN-94-80554] p 2869 N94-28147

The estimation of pre-stress by deformation rate analysis and suggestion of a mechanism from the elast-plastical theory p 2871 N94-28156

STRESS CONCENTRATION

Mechanically fastened composite laminates subjected to combined bearing-bypass and shear loading
p 2712 N94-27914

Three-dimensional elastic stress concentration factors: Plain or countersunk hole in a wide plate subjected to tension, bending, or pin loading
[ESDU-93030] p 2845 N94-28143

STRESS CORROSION

Inner fiber observation for metal matrix composites under the stress load condition utilizing Synchrotron Orbital Radiation (SR) by X-ray CT p 2724 N94-25553

Study on improvements in fretting fatigue characteristics of high strength structural member p 2726 N94-25567

Radiation hardening effects on localized deformation and stress corrosion cracking of stainless steels
[DE94-004308] p 2731 N94-25804

STRESS CORROSION CRACKING

Bulletin of National Research Institute for Metals in Fiscal Year 1993, no. 14
[REPT-14] p 2722 N94-25544

Interactions between corrosion fatigue and stress corrosion crack on steel for light water reactors
p 2722 N94-25547

Study on performance evaluation of pressure vessel steel in corrosion environments with sulfide
p 2730 N94-25582

Radiation hardening effects on localized deformation and stress corrosion cracking of stainless steels
[DE94-004308] p 2731 N94-25804

Grain by grain study of the mechanisms of crack propagation during iodine SCC of Zry-4
[DE93-633765] p 2734 N94-26162

Guidelines for controlling stress corrosion cracking and corrosion fatigue of stainless steels: A literature review
[VTT-TIED-1420] p 2837 N94-26262

Stress corrosion cracking and dealloying of copper-gold alloy in iodine vapor
[DE93-633790] p 2734 N94-26264

Development of non-destructive testing technology for the crack of steam generator tubes
[DE93-632953] p 2835 N94-26399

Early stages in the development of stress corrosion cracks
[DE94-003867] p 2838 N94-26524

Grain boundary chromium concentration effects on the IGSCC and IASCC of austenitic stainless steels
[DE94-004268] p 2741 N94-27570

An anodic dissolution-based mechanism for the rapid cracking, pre-exposure phenomenon demonstrated by Al-Li-Cu alloys
[DE94-004798] p 2742 N94-27788

The transition from stress corrosion cracking to corrosion fatigue in AA-7075 and AA-8090
[ISBN-0-315-59526-4] p 2744 N94-27950

STRESS DISTRIBUTION

Development of detection technique for fatigue crack due to thermal stratification phenomena in RCS piping
[DE93-632968] p 2838 N94-26400

An experimental study on the effects of compressive stress on the fatigue crack growth of low-alloy steel
[DE94-004447] p 2737 N94-26582

Deformation, constitutive behavior, and damage of advanced structural materials under multiaxial loading
[AD-A274165] p 2709 N94-27142

Behaviour modification of space trusses
[ISBN-0-315-84701-8] p 2842 N94-27315

Flat rectangular orthotropic plates under uniformly distributed normal pressure. Elastic stresses and deflections for various forms of edge restraint
[ESDU-93011] p 2845 N94-28061

STRESS INTENSITY FACTORS

Computation of stress intensity factors by the mode enrichment technique with applications to geometrically nonlinear problems
[PB94-126513] p 2840 N94-26910

Method for calculating stress intensity factors for surface cracks (appendix 2/1) p 2841 N94-27188

Implementation of thermal residual stresses in the analysis of fiber bridged matrix crack growth in titanium matrix composites
[NASA-TM-109082] p 2711 N94-27658

The development of stress intensity factors
[DRA-TR-93057] p 2845 N94-27954

Fatigue propagation behaviour of short cracks (1-2 mm) in steels
[ESDU-93033] p 2845 N94-28145

STRESS MEASUREMENT

Dynamic response of S-2 glass reinforced plastic structural armor
[AD-A273868] p 2747 N94-25596

Studies on the measurement of subsurface fractures and geostress using acoustic emission technique for deep coalbed development
[REPT-7] p 2879 N94-26475

Stress analysis of a secondary-bending specimen
[AD-A274842] p 2838 N94-26501

The renewing of the test section of the NAL transonic wind tunnel. Part 1: Reconstruction of the 1st corner turning vanes and aerodynamic stress measurement
[NAL-TM-651] p 2681 N94-27247

High intensity x ray instrumentation for residual strain measurements in composites and textured materials
[ISBN-0-315-85169-4] p 2842 N94-27278

A hydrostatic stress-dependent anisotropic model of viscoplasticity
[NASA-TM-106525] p 2711 N94-27640

AF Ni-Cd cell qualification program
p 2863 N94-28122

STRESS PROPAGATION

Bulletin of National Research Institute for Metals in Fiscal Year 1993, no. 14
[REPT-14] p 2722 N94-25544

Interactions between corrosion fatigue and stress corrosion crack on steel for light water reactors
p 2722 N94-25547

STRESS RATIO

Fatigue propagation behaviour of short cracks (1-2 mm) in steels
[ESDU-93033] p 2845 N94-28145

STRESS RELAXATION

Stress relaxation in dough moulding compounds
[PB94-124872] p 2748 N94-25894

Stress relaxation in sputtered W films and W/GeSi/Si heterostructures
[DE94-004007] p 3055 N94-26239

Mechanical behavior of amorphous alloys at elevated temperatures p 2746 N94-28167

STRESS TENSORS

The nonlinear Galerkin method: A multi-scale method applied to the simulation of homogeneous turbulent flows
[NASA-CR-191581] p 2792 N94-26499

STRESS-STRAIN RELATIONSHIPS

Inner fiber observation for metal matrix composites under the stress load condition utilizing Synchrotron Orbital Radiation (SR) by X-ray CT p 2724 N94-25553

A study of graphite peek composite with central elliptical holes under tension
[AD-A273779] p 2705 N94-25863

Investigation of tension-compression fatigue behavior of a cross-ply metal matrix composite at room and elevated temperatures
[AD-A273731] p 2706 N94-25999

The microstructural response of granular soil under uniaxial strain
[AD-A274808] p 2763 N94-26341

Studies on the measurement of subsurface fractures and geostress using acoustic emission technique for deep coalbed development
[REPT-7] p 2879 N94-26475

Aircraft wheel life assessment
[AD-A274378] p 2823 N94-26976

Interface phenomena in metal-ceramic composites
[AD-A274167] p 2709 N94-27125

The high strain rate behaviour of tantalum
[ISBN-0-315-84472-8] p 2740 N94-27305

Research into the microstructure and mechanical behavior of eutectic Bi-Sn and In-Sn
[DE94-004558] p 2741 N94-27619

The deformation of copper-tungsten composites
[ISBN-0-315-84939-8] p 2712 N94-27688

Use of photostress and strain gages to analyze behavior of weldments
[NASA-CR-195269] p 2843 N94-27765

The Science Reports of the Research Institutes, Tohoku University. Series A: Physics, Chemistry, and Metallurgy. Volume 38, No. 1: Amorphous Materials 14
[JTN-94-80610] p 2744 N94-28158

STRESSES

A laboratory test on construction of ice domes and their load-carrying capacity p 2884 N94-27966

STRING THEORY

Topological amplitudes in string theory
[DE94-601561] p 3071 N94-25882

On string theory interacting with two-dimensional gravity
[DE94-601562] p 3071 N94-25883

Aspects of nonrenormalizable terms in a superstring standard-like models
[DE93-614530] p 3071 N94-25911

A research program in experimental and theoretical high energy physics
[DE94-002156] p 3031 N94-25931

Dynamical group of relativistic straight-line string
[DE93-634347] p 3072 N94-26037

Affine algebras on the torus
[DE94-601556] p 3006 N94-26414

Higher spin extensions of the Virasoro algebra, area-preserving algebras and the matrix algebra a-bar(sub (infinity))
[DE94-601557] p 3006 N94-26415

Gauging of Chern-Simons p-Barnes
[DE94-601553] p 2993 N94-26425

Statistical mechanical properties of Z(N)(sup n-1) broken model
[DE93-634344] p 2993 N94-26457

String hypothesis and characters of coset CFTs
[DE93-634337] p 3007 N94-26552

Stochastic space-time, confinement potential and particle propagator
[DE94-606415] p 3074 N94-27680

STRINGS

Quantizable configurations of the relativistic string
[DE93-634346] p 3072 N94-26036

Dynamical group of relativistic straight-line string
[DE93-634347] p 3072 N94-26037

STRONG INTERACTIONS (FIELD THEORY)

QCD corrections to inclusive B - S processes in the standard model
[ISBN-0-315-54572-0] p 3073 N94-27263

A jet calculus approach including coherence effects and the associated problem of moment inversion
[ISBN-0-315-51715-8] p 3025 N94-27266

STRONTIUM COMPOUNDS

Technical report of ISSP. Ser. A, no. 2669: Relations between oxygen deficiency and structures in the La-Sr-Cu-O system. 3: Oxygen contents and structure of (La, Sr)8Cu8O(16+delta) phase
[JTN-94-80555] p 3066 N94-27353

STRONTIUM OXIDES

Preparation and characterization of high temperature superconductor film surfaces
[AD-A274293] p 3059 N94-26681

STRUCTURAL ANALYSIS

Structural analysis of a frangible nut used on the NASA Space Shuttle
[DE94-003672] p 2821 N94-25811

The Latin American conference on the applications of the Moessbaer effect
[DE93-615942] p 3051 N94-25912

Polar and chemical domain structures of lead scandium tantalate (PST)
[DE94-600760] p 3056 N94-26363

Regrowth zones in laser annealed radiation damaged diamond
[DE94-600821] p 3056 N94-26364

User's guide for the frequency domain algorithms in the LIFE2 fatigue analysis code
[DE94-004678] p 2838 N94-26563

Geometry changes in the elastic-plastic analysis of steel spatial skeletal structures
[IFTR-37/1993] p 2839 N94-26825

An automatic contact algorithm in DYNA3D for impact problems
[DE94-002856] p 2965 N94-26862

Refined triangular plate and shell elements
[PB94-126356] p 2839 N94-26875

Proceedings of Damping 1993, volume 2
[AD-A274227] p 2840 N94-26953

Proceedings of Damping 1993, volume 3
[AD-A274228] p 2840 N94-27008

Modification of a model for fatigue life predictions based on level-crossing
[PB94-123395] p 2842 N94-27198

Behaviour modification of space trusses [ISBN-0-315-84701-8] p 2842 N94-27315

Structural design feasibility study of Space Station long spacer truss [NASA-TM-106346] p 2843 N94-27559

Thermal/Structural Tailoring of Engine Blades (T/STAEBL): User's manual [NASA-CR-194461] p 2843 N94-27776

Wing design for a civil tiltrotor transport aircraft: A preliminary study p 2671 N94-27917

STRUCTURAL BASINS

Role of remote sensing in energy, water, and carbon cycle studies over the Amazon [INPE-5486-PRE/1786] p 2852 N94-27957

Some implications of large impact craters and basins on Venus for terrestrial ringed craters and planetary evolution p 2890 N94-28306

STRUCTURAL DESIGN

Project WISH: The Emerald City p 2703 N94-25690

Low-cost unmanned lunar lander p 2697 N94-25699

The identification of inflow fluid dynamics parameters that can be used to scale fatigue loading spectra of wind turbine structural components [DE94-000231] p 2791 N94-26117

Design and life-time of polymer matrix composite structures: Summary [VTT-TIED-1415] p 2707 N94-26260

The structural behaviour of the steel or composite concrete and steel frames and the connections of frame members during the fire: A literature review [VTT-TIED-1437] p 2837 N94-26307

Thermoplastic or thermosetting composites in aircrafts [PB94-123809] p 2710 N94-27253

Structural design feasibility study of Space Station long spacer truss [NASA-TM-106346] p 2843 N94-27559

Reliability-based structural optimization: A proposed analytical-experimental study [NASA-TM-109055] p 2844 N94-27830

Advanced metallic exhaust impinged structural concepts demonstration p 2832 N94-28209

STRUCTURAL DESIGN CRITERIA

Design of cold-formed HSS channels for bending and eccentric compression: Bending in the plane of symmetry [VTT-TIED-1403] p 2762 N94-25622

Applications of the weight function method (appendix 4/1) p 2842 N94-27190

STRUCTURAL FAILURE

Mechanically fastened composite laminates subjected to combined bearing-bypass and shear loading p 2712 N94-27914

The development of stress intensity factors [DRA-TR-93057] p 2845 N94-27954

STRUCTURAL MEMBERS

Wing design for a civil tiltrotor transport aircraft: A preliminary study p 2671 N94-27917

STRUCTURAL PROPERTIES (GEOLOGY)

Studies on the measurement of subsurface fractures and geostress using acoustic emission technique for deep coalbed development [REPT-7] p 2879 N94-26475

Report of the National Research Institute for Earth Science and Disaster Preventi [illegible] No. 51 [JTN-94-80509] p 2886 N94-27985

Underground structure in the eastern part of Kanagawa Prefecture inferred from explosion seismic observations p 2886 N94-27987

Analysis of S-wave seismogram envelope of deep earthquakes and estimation of random inhomogeneities in the Kanto-Tokai area p 2886 N94-27988

STRUCTURAL RELIABILITY

Reliability-based structural optimization: A proposed analytical-experimental study [NASA-TM-109055] p 2844 N94-27830

STRUCTURAL VIBRATION

Identification and H(infinity)/(mu)-synthesis control of the Sandia truss [DE94-002735] p 2839 N94-26810

New variational techniques for acoustic radiation and scattering from elastic shell structures [AD-A274599] p 3010 N94-26889

Proceedings of Damping 1993, volume 1 [AD-A274226] p 2840 N94-26922

Report of three microgravity experiments by the drop shaft [JTN-94-80579] p 2761 N94-27341

Vibrations in engineering structures: A review of model and full-scale test of a cable-stayed bridge and a traffic sign gantry [NLR-TP-92321-U] p 2843 N94-27553

Methods of testing for endurance of structural elements using simulated acoustic loading [ESDU-93027] p 3011 N94-28141

Weak coupling in statistical energy analysis ion Research, Univ. of Southampton, Southampton SO9 5NH, England) [ISVR-TR-228] p 2832 N94-28174

STRUCTURAL WEIGHT

Wing design for a civil tiltrotor transport aircraft: A preliminary study p 2671 N94-27917

STRUCTURED PROGRAMMING

Editing tree structures [CWI-CS-R9264] p 2961 N94-26219

CMSC-130 introductory computer science, lecture notes [AD-A274369] p 2967 N94-27060

STUDENTS

Predoctoral training grant in the area of physical sciences [DE94-004406] p 3039 N94-27603

SUBGROUPS

Simple currents versus orbifolds with discrete torsion: A complete classification [NIKHEF-H/93-13] p 2995 N94-26812

Quantum subgroups and quantum co-set spaces and differential calculi on them [DE94-602520] p 3073 N94-26876

SUBLIMATION

Why is the north polar cap on Mars different than the south polar cap? p 3107 N94-27889

SUBMARINES

Evaluation of crack arrest fracture toughness of parent plate, weld metal and heat affected zone of BIS 812 EMA ship plate steel [AD-A274871] p 2839 N94-26859

Propellants and explosives in ballistic missiles [UCRL-LR-113578] p 2760 N94-28222

SUBMILLIMETER WAVES

Submillimeter residual losses in high-(Tc) superconductors [DE94-003241] p 3058 N94-26516

SUBROUTINE LIBRARIES (COMPUTERS)

Ma42: A new frontal code for solving sparse unsymmetric systems [PB94-124302] p 2998 N94-27115

Development of Calcomp compatible interface library 'piflib' on X Window System [DE94-701190] p 2973 N94-27702

SUBROUTINES

Review and analysis of dense linear system solver package for distributed memory machines p 2978 N94-27916

Lisp interface to geometric modelling operations [PB94-133121] p 3001 N94-28398

SUBSONIC AIRCRAFT

Examples of excrescence drag prediction for typical wing components of a subsonic transport aircraft at the cruise condition [ESDU-93032] p 2649 N94-28144

SUBSONIC FLOW

A numerical determination of bifurcation points for low Reynolds number conical flows [AD-A273984] p 2791 N94-25991

Influence of the transonic doublet in the farfield of a lifting airfoil [IAR-AN-78] p 2647 N94-26702

A comprehensive comparison of turbulence models in the far wake p 2808 N94-27899

Separated flow generated by a vectored jet in a crossflow p 2800 N94-28007

Scalar mixing in the subsonic jet in crossflow p 2800 N94-28008

Experimental investigation of the interaction of a thrust reverser jet with an external subsonic flow p 2801 N94-28011

A numerical investigation of a subsonic jet in a crossflow p 2803 N94-28023

Navier-Stokes simulation of two and three dimensional jets in crossflow, effects of grid, and boundary conditions p 2804 N94-28026

Measurements of steady and dynamic pressure on an F/A-18 wind tunnel model at high angles of attack p 2653 N94-28323

SUBSONIC SPEED

Normal force of low aspect ratio cropped-delta wings at pre-stall angles of attack and subsonic speeds [ESDU-93034] p 2648 N94-27955

Program for calculation of maximum lift coefficient of plain aerofoils and wings at subsonic speeds [ESDU-93015] p 2649 N94-28076

Examples of flight path optimisation using a multivariate gradient-search method [ESDU-93021] p 2670 N94-28092

SUBSONIC WIND TUNNELS

Fiber-optic-based laser vapor screen flow visualization system for aerodynamic research in larger scale subsonic and transonic wind tunnels [NASA-TM-4514] p 2647 N94-26706

Experimental investigation of the flow quality in the GLT20 subsonic-transonic boundary layer wind tunnel [PB94-126539] p 2681 N94-26815

SUBSTRATES

Study of the homogeneity of InP wafers [AD-A273658] p 3055 N94-26194

Comparison of technology for high-power laser mirrors and synchrotron radiation mirrors [DE94-002913] p 3035 N94-26276

Demonstration of monolithic co-fabrication of Y1Ba2Cu3O7-Sigma and CMOS devices on the same sapphire substrate [AD-A274757] p 3059 N94-26566

Growth, characterization and device development in monocrystalline diamond films [AD-A274245] p 3060 N94-26839

The growth and characterization of GaN as a photodetector [AD-A274570] p 3063 N94-26965

Electro-optic materials by solid source MOCVD [DE94-005120] p 2757 N94-27716

Bipolar lead-acid batteries for electrical actuation applications p 2864 N94-28134

SUBSTRUCTURES

Substructure synthesis methods for viscoelastic structures [UTIAS-349] p 2695 N94-26712

SUCTION

Numerical simulation of receptivity and transition in a boundary layer on a flat plate with a suction hole [NASA-CR-195708] p 2798 N94-27782

Localized and distributed boundary-layer receptivity to convected unsteady wake in free stream [NASA-CR-4578] p 2808 N94-28180

SUDAN

Assessment of tropical forests using satellite data [SILVA-CARELICA-21] p 2850 N94-27182

Woody biomass density in the Tendelti area of the central Sudan p 2850 N94-27185

SUDDEN IONOSPHERIC DISTURBANCES

Solar-geophysical data number 590, October 1993. Part 1: (Prompt reports). Data for September, August 1993, and late data [PB94-125903] p 3110 N94-27053

SULFATES

Development of SO(x) and NO(x) solid electrolyte sensors p 2725 N94-25562

Journal of NIRE, volume 2, number 4 [JTN-94-80554] p 2869 N94-28147

Effects of p-chlorophenol on sulfate reduction in marine sediments p 2870 N94-28150

SULFIDES

Voltammetric studies of poly(carbon disulfide) [DE94-001385] p 2717 N94-26951

SULFUR COMPOUNDS

Reactivity of nitrate radical (NO3) toward organic compounds p 2704 N94-27387

SULFUR DIOXIDES

Sulfur dioxide in the atmosphere of Venus 1 sounding rocket observations [NASA-CR-195224] p 3106 N94-26237

SULFUR OXIDES

Development of SO(x) and NO(x) solid electrolyte sensors p 2725 N94-25562

Study on performance evaluation of pressure vessel steel in corrosion environments with sulfide p 2730 N94-25582

SULFURIC ACID

Measuring variation in ecosystem sensitivity to stress [AD-A274232] p 2868 N94-26817

SUM RULES

Nucleon-nucleon scattering lengths in QCD sum rules [DE93-520239] p 3015 N94-25922

Nuclear Theory Group, University of Washington recent and planned research [DE94-002729] p 3022 N94-26809

SUN

Direct evidence of the interplanetary magnetic field effect on the cosmic-ray shadow by the sun [ICRR-296-93-8] p 3116 N94-27607

SUNSPOTS

Region 5395 of March 1989 --- solar activity, geomagnetic disturbances, and terrestrial effects [PB94-120714] p 3110 N94-26755

High resolution studies of sunspots and flux tubes [NASA-CR-195216] p 3111 N94-27321

Characteristics of 30-MHz interference noises observed by riometers p 2884 N94-27965

SUPERCHARGERS

Development of advanced high temperature in-cylinder components and tribological systems for low heat rejection diesel engines, phase 1 [NASA-CR-187158] p 2827 N94-27984

SUPERCOMPUTERS

Achieving high performance on the Intel Paragon [DE94-003108] p 2979 N94-25953

High performance computing in chemistry and massively parallel computers: A simple transition?
[DE94-004318] p 2982 N94-27600

Communication on the Paragon
[DE94-003103] p 2983 N94-27713

SUPERCONDUCTING DEVICES

Prospects for utilization of superconductors in the power industry p 2854 N94-26057

Demonstration of monolithic co-fabrication of Y1Ba2Cu3O7-Sigma and CMOS devices on the same sapphire substrate
[AD-A274757] p 3059 N94-26566

SUPERCONDUCTING FILMS

Flux flow, pinning, and resistive behavior in superconducting networks
[DE94-003400] p 3050 N94-25848

Submillimeter residual losses in high-(Tc) superconductors
[DE94-003241] p 3058 N94-26516

Processing and properties of Ag-clad Bi-2223 tapes
[DE94-004603] p 2783 N94-26589

Preparation and characterization of high temperature superconductor film surfaces
[AD-A274293] p 3059 N94-26681

SUPERCONDUCTING MAGNETS

Prospects for utilization of superconductors in the power industry p 2854 N94-26057

A study on the development of high T(sub c) superconducting materials
[DE93-633529] p 3057 N94-26404

Evaluation of APC NbTi superconductor in a model dipole magnet
[DE94-003258] p 3060 N94-26795

The TPX Cryostat Conceptual Design
[DE94-002857] p 3045 N94-26863

Calculation of the electromagnetic critical state response of high T(sub c) superconductor tape
[DE94-002894] p 3061 N94-26868

SUPERCONDUCTING POWER TRANSMISSION

The effect of Ti conduit on the critical current in (Nb, Ti)3Sn cable-in-conduit conductors
[DE94-701204] p 2788 N94-27817

SUPERCONDUCTING SUPER COLLIDER

Secondary particle in background levels and effects on detectors at future hadron colliders
[DE94-003378] p 3011 N94-25598

Temperature dependence of the radiation induced change of depletion voltage in silicon PIN detectors
[DE94-002705] p 3052 N94-25972

Indiana University high energy physics, task A
[DE94-000961] p 3033 N94-27614

SUPERCONDUCTIVITY

Study on measurement and evaluation methods for superconductive characteristics p 2725 N94-25560

Growth of small fatigue cracks in Incoloy-908
[DE94-003406] p 2836 N94-26129

Strongly interacting fermion systems
[DE94-002674] p 3021 N94-26677

A mechanism for resistive dissipation in Ag sheathed Bi2Sr2CaCu2O8 and Bi2Sr2Ca2Cu3O10
[DE94-003009] p 3060 N94-26771

Powder synthesis, fabrication, and transport properties of long-length Ag clad Bi-2223 conductors
[DE94-002376] p 2740 N94-26957

Tokamak Physics Experiment poloidal field design
[DE94-001542] p 3045 N94-27019

Excited Landau levels, orbital angular momentum and axial anomaly
[DE94-606407] p 3068 N94-27679

Axial anomaly in e(+)e(-) yields gamma gamma and anyon superconductivity
[DE94-606406] p 3070 N94-27859

SUPERCONDUCTORS

Bulletin of National Research Institute for Metals in Fiscal Year 1993, no. 14
[REPT-14] p 2722 N94-25544

Study on characteristics and electronic structures of materials with strong electronic correlations by ferromagnetic fields p 2724 N94-25557

Study on measurement and evaluation methods for superconductive characteristics p 2725 N94-25560

Prospects for utilization of superconductors in the power industry p 2854 N94-26057

Growth of small fatigue cracks in Incoloy-908
[DE94-003406] p 2836 N94-26129

Multi-channel Kondo necklace
[DE93-634754] p 3057 N94-26389

The influence of energy losses with time in NbTi superconductors in pulsed magnetic fields
[DE93-634761] p 3058 N94-26512

Evaluation of APC NbTi superconductor in a model dipole magnet
[DE94-003258] p 3060 N94-26795

List of papers published by the members of Institute for Materials Research, Tohoku University 1992
[JTN-94-80608] p 3118 N94-27355

Experimental results of 40-kA Nb3Al conductor
[DE94-701207] p 2788 N94-27821

SUPERCOOLING

Study on the production of flaky amorphous alloy powders by impact flattening of atomized liquid droplets on a rapidly rotating wheel p 2746 N94-28169

SUPERCRITICAL AIRFOILS

Calculation of viscous drag of two low angle of attack supercritical profiles
[FFA-TN-1984-22] p 2644 N94-26104

Computational investigation of the compressible dynamic stall characteristics of the Sikorsky SSC-A09 airfoil
[AD-A274867] p 2644 N94-26191

Experimental investigations into the wall interference and sidewall boundary layer effects in the National Research Council/Inst. for Aerospace Research High Reynolds Number 2-D Test Facility
p 2658 N94-28350

SUPERCRITICAL WINGS

Wind tunnel investigation of propfan slipstream/wing interactions on a De Havilland air motor powered semispan model at Mach numbers 0.6 and 0.7
p 2651 N94-28316

SUPERFLUIDITY

Crossover between BCS and performed-Boson theories with increasing interactions
[DE93-019018] p 3017 N94-26078

A numerical study of quantized vortices in HeII
[ISBN-9-03-860232-4] p 2792 N94-26479

Superfluid helium sloshing dynamics induced oscillations and fluctuations of angular momentum, force and moment actuated on spacecraft driven by gravity gradient or jitter acceleration associated with slew motion
[NASA-CR-193928] p 2799 N94-27931

SUPERGRAVITY

Topological amplitudes in string theory
[DE94-601561] p 3071 N94-25882

Anomaly candidates and invariants of D 4, N 1 supergravity theories
[NIKHEF-H/93-12] p 3072 N94-26541

The super Weierstrass (zeta)-function and operator product expansions in 2D-induced supergravity on the supertorus
[DE94-603664] p 3074 N94-27627

SUPERHIGH FREQUENCIES

Analyzing adaptive beamformer performance in a stable multipath environment
[AD-A274029] p 2766 N94-25766

Annex report FEL-92-A163: Description of the LInk and BER Test Analysis System (LIBERTAS) for the frequency band V (14.5 - 15.3 GHz)
[FEL-92-A442] p 2770 N94-26650

SUPERLATTICES

MBE grown 3 to 5 strain relaxed buffer layers and superlattices characterized by atomic force microscopy
[DE94-002931] p 3056 N94-26308

The effect of high frequency electric field on hypersound amplification in superlattice
[DE93-634326] p 3057 N94-26384

Modulation wavelength dependence of ion mixing in metallic superlattices
[DE94-004608] p 3059 N94-26591

AB-Initio calculation of the valence-band offset at strained GaAs/InAs (001) heterojunction
[DE94-602538] p 3061 N94-26878

SUPERNOVA REMNANTS

Supernovae and mass extinctions
p 2891 N94-28314

SUPERNOVA 1987A

Balloon-borne measurements of the SN1987A hard x ray continuum p 3115 N94-26689

SUPERNOVAE

Supernovae and mass extinctions
p 2891 N94-28314

SUPERPLASTICITY

An investigation of cavitation in a mechanically alloyed 15 volume percent SiCp/IN9021 aluminum composite
[DE94-003371] p 2748 N94-25959

Study of precipitation and recrystallization in Al alloy 2519 by backscattered electron imaging methods
[AD-A274919] p 2736 N94-26533

SUPERSONIC AIRCRAFT

Report of the defense science board task force on aircraft assessment
[AD-A274531] p 2669 N94-26835

SUPERSONIC BOUNDARY LAYERS

Theoretical and experimental investigation of converging cylindrical shock waves propagating in narrow cylindrical chambers
[ISBN-0-315-84694-1] p 2795 N94-27313

SUPERSONIC COMBUSTION

A numerical study of mixing and combustion in hypervelocity flows through a scramjet combustor model
p 2808 N94-27911

SUPERSONIC COMBUSTION RAMJET ENGINES

Development and implementation of a scramjet cycle analysis code with a finite-rate-chemistry combustion model for use on a personal computer
[AD-A273834] p 2673 N94-25617

A study on heat transfer in a scramjet leading edge model
[NAL-TR-1187T] p 2675 N94-27608

A numerical study of mixing and combustion in hypervelocity flows through a scramjet combustor model
p 2808 N94-27911

SUPERSONIC COMMERCIAL AIR TRANSPORT

The evolution of the high-speed civil transport
[NASA-TM-109089] p 3117 N94-26155

SUPERSONIC FLOW

Evaluation of a concentration probe for application in a supersonic flow field
[AD-A273915] p 2643 N94-25592

A numerical determination of bifurcation points for low Reynolds number conical flows
[AD-A273984] p 2791 N94-25991

A sensitivity equation approach to shape optimization in fluid flows
[NASA-CR-191598] p 2999 N94-27415

Experimental study on the interactions between a transverse heated supersonic jet and an external supersonic flow p 2659 N94-28039

Solution of the Euler equations using unstructured grids p 2656 N94-28338

SUPERSONIC JET FLOW

The growth and characterization of GaN as a photodetector
[AD-A274570] p 3063 N94-26965

Transient flow features of a supersonic jet in a low speed cross flow p 2800 N94-28005

Experimental study on the interactions between a transverse heated supersonic jet and an external supersonic flow p 2659 N94-28039

SUPERSONIC SPEED

A numerical study of high-speed missile configurations using a block-structured parallel algorithm
[AD-A273776] p 2979 N94-25860

SUPERSONIC TRANSPORTS

Preliminary design of nine high speed civil transports
p 2671 N94-25710

Supercruiser Arrow HS-8 p 2671 N94-25711

Tesseract supersonic business transport
p 2671 N94-25713

SUPERSYMMETRY

(2,0) superconformal anomaly
[DE93-613046] p 2991 N94-25867

Aspects of nonrenormalizable terms in a superstring standard-like models
[DE93-614530] p 3071 N94-25911

Higher spin extensions of the Virasoro algebra, area-preserving algebras and the matrix algebra a-bar(sub (infinity))
[DE94-601557] p 3006 N94-26415

The Hamiltonian structures of the super KP hierarchy associated with an even parity superlax operator
[DE94-601506] p 2994 N94-26459

Construction of a new electroweak sphaleron
[NIKHEF-H/93-09] p 3020 N94-26540

Anomaly candidates and invariants of D 4, N 1 supergravity theories
[NIKHEF-H/93-12] p 3072 N94-26541

Progress in SSC Higgs physics: Report of the Higgs working group
[DE94-003224] p 3022 N94-26793

Thermodynamics and form factors of supersymmetric integrable field theories
[DE94-602557] p 3073 N94-26896

Excited Landau levels, orbital angular momentum and axial anomaly
[DE94-606407] p 3068 N94-27679

SUPPORT SYSTEMS

Space Station technology testbed: 2010 deep space transport p 2687 N94-27368

SUPPORTS

SAG compensated vibration isolation mount
[AD-D016040] p 2841 N94-27110

Installation of models in the 2 m x 3 m low speed wind tunnel
[LTR-LA-286] p 2681 N94-27594

SURFACE ACOUSTIC WAVE DEVICES

Ultralinear wideband integrated circuit design
[ISBN-0-315-84130-3] p 2784 N94-26675

SURFACE CRACKS

Fundamental study on monitoring technology on local surface damages p 2724 N94-25555

Study on high temperature damage control and life improvement p 2729 N94-25580

Optical surface contouring for non-destructive inspection of turbomachinery
[NASA-CR-195245] p 2835 N94-26691

SURFACE DEFECTS
Effect of nitrocarburizing on shape of titanium alloy parts
[DE94-004040] p 2732 N94-25822
Optical surface contouring for non-destructive inspection of turbomachinery
[NASA-CR-195245] p 2835 N94-26691
SURFACE DIFFUSION
Influence of lattice damage on retention and transport of deuterium in beta silicon carbide
[DE94-005206] p 3068 N94-27693
SURFACE EMITTING LASERS
Characterization of nonlinear effects in optically pumped vertical cavity surface emitting lasers
[AD-A273840] p 2815 N94-25744
Ultra-high aggregate bandwidth two-dimensional multiple-wavelength diode laser arrays
[AD-A274018] p 2815 N94-25756
Bulletin of Precision and Intelligence Laboratory, No. 68
[JTN-94-80609] p 3010 N94-27282
SURFACE ENERGY
Se EXAFS study of the elevated wurtzite to rock salt structural phase transition in CdSe nanocrystals
[DE94-003247] p 3054 N94-26125
Differentiating the role of land surface variability and cloudiness variability on global energy transport within the atmosphere and oceans
[NASA-CR-195229] p 2847 N94-26222
Surface roughness lengths
[AD-A274550] p 2895 N94-26846
SURFACE FINISHING
Corrosion resistance at welded zones of nuclear fuel reprocessing system p 2722 N94-25546
R and D for creation, measurement, application of ultra-high vacuum p 2723 N94-25549
Modelling the inhibition cure behaviour of unsaturated polyester moulding materials
[PB94-124864] p 2748 N94-25893
Calculations of material removal, removal rate, and Preston coefficient in continuous lapping/polishing machines
[DE94-002619] p 2763 N94-26804
Laser surface modification of intermetallic compounds
[DREA-CR-92-416] p 2820 N94-27668
Effect of surface finish on turbine airfoil cascade losses p 2652 N94-28320
SURFACE LAYERS
Effect of nitrocarburizing on shape of titanium alloy parts
[DE94-004040] p 2732 N94-25822
Neutron reflection interferometry
[DE94-601876] p 2714 N94-26170
Studies of thin-film growth, adsorption, and oxidation by in situ, real-time, and ex situ ion beam analysis
[DE94-002907] p 3055 N94-26275
Radar detection of low-altitude targets in a maritime environment. Volume 2: Meteorological and radar data
[AD-A274658] p 2768 N94-26335
Microstructures of Si surface layers implanted with Cu
[DE94-004690] p 3058 N94-26565
Failure behaviour of high density polyethylene with an embrittled surface layer due to weathering
[PB94-126406] p 2840 N94-26960
The Martian atmospheric planetary boundary layer stability, fluxes, spectra, and similarity
[NASA-CR-195711] p 3108 N94-27935
SURFACE PROPERTIES
Observation on metal surface in aqueous solution using an electrochemical Scanning Tunneling Microscope (STM) p 2724 N94-25554
Study on substance diffusion in thin films with controlled structures p 2727 N94-25570
Study on production of materials with one direction solidification texture p 2727 N94-25572
Study on interfacial reaction analysis at interfacial joining p 2728 N94-25574
Hydrogen uptake into silicon from an ECR plasma
[DE94-003771] p 3050 N94-25815
Determination of surface recombination velocity and bulk lifetime in detector grade silicon and germanium crystals
[DE94-003886] p 3053 N94-26094
Studies of thin-film growth, adsorption, and oxidation by in situ, real-time, and ex situ ion beam analysis
[DE94-002907] p 3055 N94-26275
Eleventh Symposium on Energy Engineering Sciences: Proceedings
[DE93-019930] p 2763 N94-26429
Interfacial area and interfacial transfer in two-phase flow
[DE93-041226] p 2792 N94-26468
Translational-energy-resolved studies of photogenerated carrier-induced reactions on UHV semiconductor surfaces
[DE94-004169] p 3058 N94-26526
Calculating the surface properties for the liquid-vapour interface: Illustrating the thermodynamic stability of the spherical microstructures
[DE94-601992] p 3073 N94-26837
Interface properties of wide bandgap semiconductor structures
[AD-A274356] p 3063 N94-27058
Laser surface modification of intermetallic compounds
[DREA-CR-92-416] p 2820 N94-27668
SURFACE REACTIONS
Observation on metal surface in aqueous solution using an electrochemical Scanning Tunneling Microscope (STM) p 2724 N94-25554
Study on interfacial reaction analysis at interfacial joining p 2728 N94-25574
Atomic-scale chemistry of metal surfaces
[REPT-A-2657] p 3012 N94-25636
The reactivity of lithium toward non-aqueous solvents of relevance to energy storage applications as studied by surface analytical techniques
[DE94-003483] p 2856 N94-26464
A mimic model of Pt-Rh catalyst prepared by electrochemical deposition of Rh on Pt (100) surface
[REPT-A-2664] p 2715 N94-26476
Mechanistic studies of opto-electronic materials and syntheses using multiple laser and surface diagnostics
[AD-A274528] p 3036 N94-26834
Atomic layer epitaxy of group 4 materials: Surface processes, thin films, devices and their characterization
[AD-A274325] p 3061 N94-26885
International bulletin on atomic and molecular data for fusion. No. 42-45, Mar. 1991 - Dec. 1992
[DE94-601817] p 3045 N94-26946
International bulletin on atomic and molecular data for fusion. No. 46
[DE94-601818] p 3023 N94-26947
SURFACE ROUGHNESS
The determination of surface roughness from reflected step edges
[AD-A273987] p 2984 N94-25900
In situ x ray reflectivity measurements of thin film structural evolution
[DE94-002289] p 3051 N94-25944
MBE grown 3 to 5 strain relaxed buffer layers and superlattices characterized by atomic force microscopy
[DE94-002931] p 3056 N94-26308
Validated heat-transfer and pressure-drop prediction methods based on the discrete-element method. Phase 2: Two-dimensional rib roughness
[DE94-002379] p 2794 N94-26763
Surface roughness lengths
[AD-A274550] p 2895 N94-26846
Equivalent performance in different helical resonator plasma polymerization coater platforms
[DE94-001517] p 2753 N94-26933
Turbulent boundary layer inner-outer interactions
[AD-A274357] p 2794 N94-27059
Mapping of soil humidity using C-band radar images
[ISBN-0-315-85076-0] p 2852 N94-27878
Localized and distributed boundary-layer receptivity to convected unsteady wake in free stream
[NASA-CR-4578] p 2808 N94-28180
SURFACE TEMPERATURE
Aerodynamic heating in hypersonic flows
p 2658 N94-27919
Adsorption and desorption studies of cesium on sapphire surfaces
[DE94-003798] p 3070 N94-28067
SURFACE TREATMENT
Effect of nitrocarburizing on shape of titanium alloy parts
[DE94-004040] p 2732 N94-25822
Plasma surface cleaning using microwave plasmas
[DE94-002754] p 2713 N94-26014
Determination of surface recombination velocity and bulk lifetime in detector grade silicon and germanium crystals
[DE94-003886] p 3053 N94-26094
Stability of reference masses 2: The effect of environment and cleaning methods on the surfaces of stainless steel and allied materials
[NPL-DMM(A)-95] p 2738 N94-26653
Low temperature deposition and characterization of N- and p-type silicon carbide thin films and associated ohmic and Schottky contacts
[AD-A274345] p 2754 N94-26974
Evaluating non-chlorinated solvents for welding applications
[DE94-003332] p 2824 N94-27181
SURFACE VEHICLES
Test Operations Procedure (TOP) 2-2-800 wheeled vehicle center of gravity
[AD-A273937] p 2821 N94-25794
SURFACE WATER
Detection of water on road surface by the polarized light p 2886 N94-27989
SURFACES
Response surface design comparisons
[AD-A274690] p 2838 N94-26448
An automatic contact algorithm in DYNA3D for impact problems
[DE94-002856] p 2965 N94-26862
SURFACTANTS
The epitaxial growth of Ge on Si(100) using Te as a surfactant
[DE94-003437] p 3056 N94-26326
SURGERY
Development of surgical CW Nd:YAG laser with optical fiber delivery system
[DE93-632902] p 2817 N94-26185
SURGES
Properties of the Central American cold surge
[NASA-CR-194849] p 2893 N94-26138
Detection of transient vector-fields in additive noise
[FFI-93/7028] p 2768 N94-26232
An investigation of the surge behavior of a high-speed ten-stage axial flow compressor
[AD-A274910] p 2674 N94-26345
SURVEILLANCE
Feasibility study of a multiaperture telescope for deep-space Earth surveillance
[AD-A273903] p 3102 N94-25658
Design analysis of a combined optical/LADAR deep-space surveillance satellite
[AD-A274040] p 2694 N94-25832
Emerging technologies
[DE94-003022] p 3102 N94-26023
An unavailability model for errors made during surveillance testing
[DE94-000816] p 2835 N94-27613
SURVEILLANCE RADAR
Machine intelligent gust front algorithm
[AD-A273695] p 2680 N94-26196
SURVEYS
A comparison of users' and providers' perceptions of critical spacelift vehicle characteristics and capabilities
[AD-A273907] p 2691 N94-26017
Hydrographic and Acoustic Doppler Current Profiler (ADCP) data from the ONR eastern boundary current accelerated research initiative, 9-16 June 1992
[AD-A274115] p 2898 N94-26076
Survey of visualization and analysis tools
[NASA-TM-108436] p 2809 N94-26150
HPm-tubes: Literature survey comprising 1992
[PB94-123643] p 2785 N94-27038
Solar collector manufacturing activity, 1992
[DE94-003401] p 2859 N94-27048
Microbiology research at some research institutes in the former Soviet Union: A survey of scientific publications
[PB94-123320] p 2902 N94-27171
Macrobenthic fauna in the dutch sector of the north sea in 1991
[PB94-126414] p 2868 N94-27200
COMPETENCE 2000: Study on training requirements of the Norwegian metallurgical industry
[PB94-124609] p 2741 N94-27328
Spiral Survey Expedition: A proposal to organize for the Survey, exploration and eventual colonization of the Milky Way Galaxy p 2686 N94-27366
SUSPENSION SYSTEMS (VEHICLES)
The Enabler: A concept for a lunar work vehicle
p 2833 N94-25675
SWEAT COOLING
Advanced metallic exhaust impinged structural concepts demonstration p 2832 N94-28209
SWEEP EFFECT
Wing lift increment at zero angle of attack due to deployment of single-slotted flaps at low speeds
[ESDU-93019] p 2649 N94-28140
SWELLING
Microstructural development in irradiated vanadium alloys
[DE94-004307] p 2737 N94-26556
He(+) and H(+) microbeam damage, swelling and annealing in diamonds
[DE94-601912] p 3063 N94-26987
SWEPT WINGS
Prediction of leading-edge transition and relaminarization phenomena on a subsonic multi-element high-lift system p 2659 N94-27929
SWINE
Skeletal development and ossification of the swine fetuses p 2905 N94-27491
SWING WINGS
Supercruiser Arrow HS-8 p 2671 N94-25711
SWINGBY TECHNIQUE
Project APEX: Advanced manned exploration of the Martian moon Phobos p 3079 N94-25688
SWIRLING
Navier-Stokes analysis of a swirling jet in crossflow
p 2806 N94-28038

SWITCHES
Control panel dimensions for gloved operation study 2: Toggle switches minimum spacing required between toggle
[AD-A274518] p 2942 N94-27089
A tri-state optical switch for local area network communications p 2789 N94-27922
SWITCHING CIRCUITS
Low threshold all-optical crossbar switch on GaAs-GaAlAs channel waveguide arrays
[AD-A274971] p 2783 N94-26536
An electronic switch based on quantum interference
[ISBN-0-315-84609-7] p 2787 N94-27650
SYMBOLIC PROGRAMMING
Efficient implementation of high-level parallel symbolic languages p 2955 N94-27196
SYMBOLS
Saving comparisons in the Crochemore-Perrin string matching algorithm
[CWI-CS-R9322] p 2971 N94-27550
SYMMETRY
Experimental study of the near threshold pi(sup +)p yields (pi(sup +))(pi(sup +))(n) cross section and chiral symmetry
[DE94-601671] p 3014 N94-25840
The algebra of non-local charges in non-linear sigma models
[DE94-601563] p 2991 N94-25884
Principles of gauge theory of real hadrons
[DE93-616857] p 3015 N94-25920
Spatial symmetry, local integrability and tetrahedron equations in the Baxter-Bazhanov model
[DE93-634348] p 3002 N94-26038
Simple currents versus orbifolds with discrete torsion: A complete classification
[NIKHEF-H/93-13] p 2995 N94-26812
Normal forms for perturbations of the euler top
[PB94-125390] p 3009 N94-26968
Some remarks on the symmetry of self-conjugate minimal surfaces in R3
[DE94-603670] p 3007 N94-27633
Surface modes and chiral symmetry (Wilson fermions in a box)
[DE94-004946] p 3029 N94-27814
Polarizability matrix of layered chiral sphere
[PB94-132834] p 2778 N94-28355
Plane wave propagation and polarization properties in transversely bianisotropic uniaxial medium
[PB94-132883] p 2778 N94-28380
Electromagnetic modeling of bi-isotropic media
[PB94-132909] p 2778 N94-28382
SYMPATHETIC NERVOUS SYSTEM
Excitation of cutaneous polymodal receptor induced by sympathetic stimulation in adjuvant-induced arthritis rats
p 2906 N94-27495
Effect of prostaglandin E1 on the relationship between skin sympathetic nerve activity and reduction in skin blood flow p 2929 N94-27524
Difference in skin blood flow reduction depending on activating maneuver of skin sympathetic nerve activity
p 2929 N94-27525
Sympathetic nerve activity during dynamic leg exercise
p 2929 N94-27527
An attempt of intraneural stimulation by microelectrode inserted in skin sympathetic nerve fascicle
p 2930 N94-27529
Muscle sympathetic nerve activity in patients with hyper-and hypothyroidism: A microneurographic study
p 2930 N94-27531
Enhancement of skin sympathetic nerve activity in amyotrophic lateral sclerosis p 2930 N94-27532
Mechanism for regulation of myocardial contractility by autonomic drugs: Pathophysiological relevance in congestive heart failure p 2931 N94-27536
Muscle sympathetic nerve activity in humans
p 2932 N94-27538
The role of beta-adrenoceptor stimulation in the progression of chronic heart failure
p 2932 N94-27541
SYNCHRONISM
Specification performance optimization and executive generation for onboard multiprocessor real time application with SynDEx p 2954 N94-26745
Asynchronous and packetized systems engineering tools p 2954 N94-26746
Design of a parallel discrete event simulation coprocessor
[AD-A274135] p 2982 N94-27123
SYNCHROTRON RADIATION
Fast photoconductor CdTe detectors for synchrotron x ray studies
[DE94-001334] p 3054 N94-26139
Comparison of technology for high-power laser mirrors and synchrotron radiation mirrors
[DE94-002913] p 3035 N94-26276
SYNCHROTRONS
Fast photoconductor CdTe detectors for synchrotron x ray studies
[DE94-001334] p 3054 N94-26139
Regrouping of the beam in the IHEP PS for the UNK p-p programs
[DE93-634021] p 3032 N94-26164
Longitudinal diffusion of a proton bunch under external noise
[DE93-634022] p 3032 N94-26165
Comparison of technology for high-power laser mirrors and synchrotron radiation mirrors
[DE94-002913] p 3035 N94-26276
Experimental measurement of local displacement and chemical pair correlations in crystalline solid solutions
[DE94-001124] p 3065 N94-27251
SYNCOPE
Pulse waveform and transcranial Doppler analysis during lower body negative pressure
[AD-A274516] p 2911 N94-27088
SYNOPTIC METEOROLOGY
Propagation of cold air masses in East Asia and its associated planetary-scale function
[AD-A274304] p 2895 N94-26850
A synoptic study on periods of deficiency over Rio Grande do Sul/Brazil
[INPE-5456-TDI/498] p 2896 N94-27422
SYNTHESIS (CHEMISTRY)
Development of SO(x) and NO(x) solid electrolyte sensors p 2725 N94-25562
Fundamental study on new synthetic technology by phthalocyanine complexes p 2721 N94-25569
Template synthesis of metal microtubule ensembles utilizing chemical, electrochemical, and vacuum deposition techniques
[AD-A274676] p 2715 N94-26444
Structure and properties of composites synthesized in situ using solid state displacement reactions
[DE94-004589] p 2737 N94-26585
Molecular surface electrostatic potentials in the analysis of non-hydrogen-bonding noncovalent interactions
[AD-A274612] p 3022 N94-26894
Synthesis, rheology, and forming of Y-Ba-Cu-O ceramics
[DE94-005558] p 2757 N94-27695
Preparation, characterization, and thermal behaviour study of lanthanides (3) and yttrium (3) 4-methoxy benzylidene pyruvate in solid state
[DE94-604079] p 3068 N94-27697
SYNTHETIC APERTURE RADAR
A real-time convolution algorithm and architecture with applications in SAR processing
[AD-A273817] p 2959 N94-25963
Weapon system sensor integration for a DIS-compatible virtual cockpit
[AD-A274088] p 2672 N94-26021
A comparative evaluation of SAR and SLAR
[DE94-002922] p 2848 N94-26277
Response of an airborne synthetic aperture radar to sea ice in the marginal ice zone
[ISBN-0-315-84243-1] p 2849 N94-26668
Leadex environmental phenomena and effects observed by DMSP, NOAA, and ERS-1 satellites
[AD-A274596] p 2868 N94-26888
Processing of wide-angle synthetic aperture radar signals for target detection
[AD-A274225] p 2773 N94-27073
Method of correcting rotational motion error in SAR and ISAR imagery
[AD-D016033] p 2773 N94-27146
Image quality analysis of compressed synthetic aperture radar imagery
[AD-A273399] p 2774 N94-27170
Non-adaptive robust filters for speckle noise reduction
[INPE-5519-PRE/1794] p 2776 N94-27335
Calibration of SAR systems
[DLR-FB-93-18] p 2777 N94-27738
Mapping of soil humidity using C-band radar images
[ISBN-0-315-85076-0] p 2852 N94-27878
A comparative study of SAR data compression schemes p 2946 N94-28259
Perceptual compression of magnitude-detected synthetic aperture radar imagery p 2946 N94-28260
SYSTEM EFFECTIVENESS
Aircraft wheel life assessment
[AD-A274378] p 2823 N94-26976
SYSTEM FAILURES
Fast incremental compiler transformations for multiple instruction retry
[NASA-CR-195209] p 2964 N94-26680
Hardware and software reliability estimation using simulations
[NASA-CR-187588] p 2973 N94-27663
Simulating fail-stop in asynchronous distributed systems
[NASA-CR-195698] p 2974 N94-27767
SYSTEM IDENTIFICATION
Asymptotically stable neural networks for identification of nonlinear dynamic systems
[ISBN-0-315-84328-4] p 2985 N94-26629
Grey-box modelling and identification topics
[PB94-126380] p 2986 N94-27029
Control oriented system identification
[AD-A274162] p 2987 N94-27124
Improved modeling of GPS selective availability
p 2642 N94-27290
On modeling and controlling intelligent systems
[DE94-002446] p 2988 N94-27706
System identification of the Large-Angle Magnetic Suspension Test Facility (LAMSTF)
p 2682 N94-27908
SYSTEMS ANALYSIS
Vulnerability assessment using a fuzzy logic based method
[AD-A274075] p 2957 N94-25649
Performance measurement of three commercial object-oriented database management systems
[AD-A274028] p 3096 N94-25765
Technical description of the Vulcano software library
[FFI-93/7024] p 2767 N94-26105
A linear description of the discrete lot-sizing and scheduling problem
[MEMO-COSOR-92-47] p 2992 N94-26227
On the phi(sub 0)-stability of perturbed nonlinear differential systems
[DE93-634304] p 2993 N94-26441
Tool for performance analysis and off-line prediction of timing behaviour p 2952 N94-26732
Formal methods for dependable real-time systems
p 2953 N94-26740
Asynchronous and packetized systems engineering tools p 2954 N94-26746
Interference analysis of multichannel transmission lines: A system's analysis
[PB94-126505] p 2772 N94-26909
Freeness analysis for logic programs-and correctness
[PB94-126703] p 2966 N94-26956
DALIA: A language for the description and analysis of digital systems p 2954 N94-27192
Parallel discrete event simulation
p 2955 N94-27194
On modeling and controlling intelligent systems
[DE94-002446] p 2988 N94-27706
Object-oriented development methods
p 2975 N94-27938
Artificial Intelligence Research Branch future plans
[NASA-TM-109733] p 2989 N94-28065
SYSTEMS ENGINEERING
Safety analysis in conceptual design of process control
[VTT-PUBS-117] p 2762 N94-25641
Copernicus: Lunar surface mapper
p 3081 N94-25702
Technology drivers for flight telerobotic system software p 2684 N94-26289
Information systems criteria for applying software reengineering: Guidelines for identifying information systems for software reengineering
[AD-A274699] p 3097 N94-26375
Merging photovoltaic hardware development with hybrid applications in the USA
[DE94-002682] p 2857 N94-26612
Asynchronous and packetized systems engineering tools p 2954 N94-26746
Automated information management for designers: Functional requirements for computer based associates that support access and use of technical information in design
[AD-A274603] p 3099 N94-26891
Interdisciplinary technology p 2686 N94-27363
Space Station technology testbed: 2010 deep space transport p 2687 N94-27368
The radiation design handbook
[ESA-PSS-01-609-ISSUE-1] p 2696 N94-27397
Test and evaluation of the Litton (Canada) Canadian strapdown gyroscope (CSG-2) Performance Evaluation Unit (PEU)
[DREO-1010] p 2813 N94-27597
Compressor stability p 2828 N94-28046
Transient model applications. 1: Compressor heat soak/clearance effects modeling p 2828 N94-28048
Combined Cycles for Power Plants
[VKI-LS-1993-08] p 2830 N94-28077
Development of the gas turbine. Part 1: Design philosophy and performance p 2831 N94-28080
Development of the gas turbine. Part 2: Manufacturing, commissioning, and operation p 2831 N94-28081
Steam plant for combined cycles: Heat recovery steam generators, design principles, and construction details
p 2831 N94-28083
Simulation: A tool for steam plant dynamic analysis
p 2831 N94-28084

Steam plant: Steam turbines for combined cycles p 2831 N94-28085

Controls, monitoring and performance measurements p 2831 N94-28086

Advanced End-to-end Simulation for On-board Processing (AESOP) p 2945 N94-28255

SYSTEMS INTEGRATION

Weapon system integration for the AFIT virtual cockpit [AD-A274058] p 2667 N94-25772

Microwave and pulsed power [DE94-003019] p 2782 N94-26312

Merging photovoltaic hardware development with hybrid applications in the USA [DE94-002682] p 2857 N94-26612

Institute for Information Technology [NRC-37061] p 3118 N94-26709

Test of onboard real time applications (LICE (tm)) p 2952 N94-26737

Interdisciplinary technology p 2686 N94-27363

Minimum accommodation for aerobrake assembly, phase 2 [NASA-TM-107608] p 2692 N94-27774

Integrated coal gasification combined cycle p 2832 N94-28090

SYSTEMS MANAGEMENT

Planning for the future of the DREnet: The way ahead [NRNS-002-00-001-01] p 2983 N94-28042

SYSTEMS SIMULATION

Asynchronous and packetized systems engineering tools p 2954 N94-26746

SYSTEMS STABILITY

Limit theorems for functionals of Markov processes and renormalizable stable fields [AD-A274645] p 3004 N94-27106

SYSTOLE

Mechanism for regulation of myocardial contractility by autonomic drugs: Pathophysiological relevance in congestive heart failure p 2931 N94-27536

T

T TAIL SURFACES

Experimental and theoretical studies of T-tail configurations for commuter aircraft applications p 2653 N94-28322

T TAURI STARS

Investigations of the dynamical evolution of protoplanetary nebulae [NASA-CR-195278] p 3105 N94-27428

TABLES (DATA)

Module interconnection frameworks for a real-time spreadsheet [AD-A273853] p 2956 N94-25588

Kiruna geophysical data. Data summary 93/4-6, April-June 1993 [PB94-123700] p 2881 N94-27039

Kiruna geophysical data. Data summary 93/1-3, January-March, 1993 [PB94-123791] p 2881 N94-27043

JARE data reports. No. 186: Upper atmosphere physics data. Syowa and Asuka Stations, 1990 [JTN-94-80594] p 2881 N94-27299

TAIL ASSEMBLIES

Experimental and theoretical studies of T-tail configurations for commuter aircraft applications p 2653 N94-28322

TAKEOFF

Influence of headwind on hot gas reingestion and consideration of pressure ratio scaling p 2675 N94-28018

TAKEOFF RUNS

System for generating, aboard an aircraft, during takeoff, of a signal capable of producing an alert or an alarm, in case of malfunction [CA-PATENT-APPL-SN-2,018,94] p 2659 N94-26293

TANTALUM

Deviatoric stresses and plastic strain rates in strong shock waves for six metals [DE94-002964] p 2733 N94-26022

The high strain rate behaviour of tantalum [ISBN-0-315-84472-8] p 2740 N94-27305

TANTALUM ALLOYS

The high strain rate behaviour of tantalum [ISBN-0-315-84472-8] p 2740 N94-27305

The corrosion behavior of sputter-deposited magnesium-valve metal alloys p 2745 N94-28164

CO2 methanation catalysts prepared from amorphous Ni-valve metal alloys containing platinum group elements p 2745 N94-28166

TANTALUM COMPOUNDS

NNN-Ising model simulation of nanodomain textures in relaxor-type lead scandium tantalate [DE94-601884] p 2748 N94-25844

Polar and chemical domain structures of lead scandium tantalate (PST) [DE94-600760] p 3056 N94-26363

TAPERING

A study of two dimensional tapered periodic edge treatments to reduce wideband edge diffraction [AD-A274054] p 2766 N94-25824

TARGET ACQUISITION

Mitsubishi 3-5 micrometers IR imager for machine-vision/ATA applications [AD-A273812] p 3034 N94-25940

Radar detection of low-altitude targets in a maritime environment. Volume 2: Meteorological and radar data [AD-A274658] p 2768 N94-26335

Capture and location of blobs in digital images [ISBN-0-315-84382-9] p 3036 N94-26666

Processing of wide-angle synthetic aperture radar signals for target detection [AD-A274225] p 2773 N94-27073

TARGET RECOGNITION

Hyperspectral analysis of space objects: Signal to noise evaluation [AD-A273882] p 2765 N94-25728

Color image segmentation [AD-A274027] p 2984 N94-25759

Zernike moments and rotation invariant object recognition. A neural network oriented case study [AD-A273749] p 2767 N94-26011

New binary integration strategies and corresponding R90 calculations [AD-A274786] p 2769 N94-26359

Combatting inherent vulnerabilities of CFAR algorithms and a new robust CFAR design [AD-A274918] p 2770 N94-26751

The morphological processing of binary images [AD-A274310] p 2996 N94-26972

Joint services electronics program [AD-A274643] p 2785 N94-27027

Processing of wide-angle synthetic aperture radar signals for target detection [AD-A274225] p 2773 N94-27073

Image quality analysis of compressed synthetic aperture radar imagery [AD-A273399] p 2774 N94-27170

TARGETS

An algorithm to find the intersection of two convex polygons [AD-A274722] p 2961 N94-26148

TASK COMPLEXITY

The central executive component of working memory [AD-A274295] p 2938 N94-26683

TASK PLANNING (ROBOTICS)

Graphical programming at Sandia National Laboratories [DE94-003803] p 2958 N94-25818

A multitasking behavioral control system for the Robotic All-Terrain Lunar Exploration Rover (RATLER) p 2685 N94-26292

TASKS

Long term learning: Integration of knowledge acquisition and knowledge compilation [AD-A274775] p 3098 N94-26570

Scheduling tasks with unpredictable timing parameters in hard real-time systems p 2951 N94-26728

Fault-tolerant scheduling in distributed critical real-time systems p 2952 N94-26735

TAXONOMY

The biostratigraphy and paleogeography of Maastrichtian inoceramids p 2889 N94-28303

TEA LASERS

Development of an industrial CO2 laser for mask marking [DE93-632901] p 2816 N94-26184

TEAMS

Workload transition: Implications for individual and team performance [AD-A274538] p 2941 N94-26964

An investigation of integrated product development implementation issues: A case study of Bosma Machine and Tool Corp. [AD-A273917] p 2942 N94-27320

TEARING MODES (PLASMAS)

Nonlinear growth of strongly unstable tearing modes [DE94-003366] p 3042 N94-25958

TFTR experimental data analysis collaboration [DE94-004166] p 3047 N94-27690

Numerical experiment on finite element method for matching data [DE94-701208] p 3000 N94-27731

TECHNETIUM COMPOUNDS

The potential for large critical currents in the high T(sub c) oxides p 2854 N94-26058

TECHNICAL WRITING

The MUSA design methodology [CWI-CS-R9265] p 3097 N94-26220

TECHNOLOGIES

Emerging technologies [DE94-003022] p 3102 N94-26023

Vision 21: Interdisciplinary Science and Engineering in the Era of Cyberspace [NASA-CP-10129] p 2685 N94-27358

TECHNOLOGY ASSESSMENT

Nuclear electric propulsion for future NASA space science missions [DE93-019086] p 2700 N94-25969

Prospects for utilization of superconductors in the power industry p 2854 N94-26057

The National Center for Advanced Information Components Manufacturing: Program update [DE94-002647] p 2960 N94-26118

Scientific and Technical Information (STI)....what's the status? [DE94-003731] p 3097 N94-26348

Computing in space: Issues and answers p 2948 N94-26714

Advanced nickel-hydrogen spacecraft battery development p 2863 N94-28129

TECHNOLOGY TRANSFER

UV absorption technique for monitoring mobile source NO emissions [AD-A273858] p 2713 N94-25964

General Motors Corporation and Pacific Northwest Laboratory staff exchange: Inspection of case hardened steels and metal-matrix composites [DE94-003470] p 2706 N94-25982

The National Center for Advanced Information Components Manufacturing: Program update [DE94-002647] p 2960 N94-26118

Overview of the Photovoltaic Manufacturing Technology (PVMaT) project [DE93-018234] p 2856 N94-26426

Computing in space: Issues and answers p 2948 N94-26714

Computational mechanics [DE94-003015] p 2965 N94-26775

Feasibility study on construction of a global environment research and development information network [DE94-725198] p 2868 N94-26904

Retrieval using plausible inference [AD-A274252] p 3099 N94-27013

Joint services electronics program [AD-A274643] p 2785 N94-27027

Opportunities for High Aspect Ratio Micro-Electro-Magnetic-Mechanical Systems (HAR-MEMMS) at Lawrence Berkeley Laboratory [DE94-003499] p 2827 N94-27722

TECHNOLOGY UTILIZATION

The potential for the Department of Defense to use space-based remote sensing to support DOD and other government agencies' environmental programs [AD-A273895] p 2847 N94-25656

Radiation applications of physical chemistry p 2854 N94-26054

Prospects for utilization of superconductors in the power industry p 2854 N94-26057

Frontiers of science and measurement: Report on a seminar jointly organized by the National Physical Laboratory and the Institute of Physics [PB94-124310] p 3009 N94-27131

Robotics handbook. Version 1: For the interested party and professional [NASA-TM-109690] p 2824 N94-27238

Research and Development Annual Report, 1992 [NASA-TM-104777] p 3119 N94-27993

Advanced energy storage for space applications: A follow-up p 2860 N94-28103

TECTONICS

Impacts, extinctions, volcanism, glaciations, and tectonics: Matches and mismatches p 2888 N94-28298

TEFLON (TRADEMARK)

Characterization of physically vapor deposited AF2400 thin films [DE94-004019] p 2749 N94-25985

TEKTITES

An extraterrestrial event at the tertiary-quaternary boundary p 2890 N94-28309

TELECOMMUNICATION

Standardize Ada hard real-time services? p 2951 N94-26729

MILCOM 92 and standardization for HF-communication. A study tour to the USA in October 1992 [PB94-124427] p 2774 N94-27219

Coded communications with nonideal interleaving [ITN-94-85235] p 2774 N94-27242

Emerging computer technologies and the news media of the future p 2688 N94-27372

Telescience testbedding for physiological experiments under hypobaric hypoxic conditions p 2913 N94-27449

Telescience testbedding under hypobaric hypoxic conditions: Evaluation by operation ability and recognition ability p 2913 N94-27450

Telescience testbedding for physiological experiments under hypobaric hypoxic conditions: Development and evaluation in CNV measuring p 2913 N94-27451

Single term off-line coins [CWI-CS-R9318] p 2776 N94-27546

Validation tests of TOPSIM 4 [ESA-STM-249] p 2972 N94-27582

A comparative study of SAR data compression schemes p 2946 N94-28259

TELEMETRY

Telecommand decoder specification [ESA-PSS-04-151-ISSUE-1] p 2693 N94-27583

TELEOPERATORS

Graphical programming at Sandia National Laboratories [DE94-003803] p 2958 N94-25818

Performance measures from the explorer platform berthing experiment p 2683 N94-26283

Early lunar rover mission studies p 2684 N94-26290

Telepresence in the human exploration of Mars: Field studies in analog environments p 2685 N94-27360

Telescience testbedding under hypobaric hypoxic conditions: Evaluation by operation ability and recognition ability p 2913 N94-27450

Telescience testbedding for physiological experiments under hypobaric hypoxic conditions: Development and evaluation in CNV measuring p 2913 N94-27451

TELEROBOTICS

Selected topics in robotics for space exploration [NASA-CP-10131] p 2682 N94-26278

Technology drivers for flight telerobotic system software p 2684 N94-26289

Utility fog: A universal physical substance p 2687 N94-27367

TELESCOPES

Distributing functionality in the drift scan camera system [DE94-003640] p 2809 N94-25599

Performance impacts for actuator misalignments and failures in large-aperture adaptive-optic telescopes [AD-A273838] p 3034 N94-25742

TELEVISION CAMERAS

Development of a 2f optical performance measurement system [DE94-003489] p 3039 N94-27721

TELEVISION SYSTEMS

The television as robot servant [AD-A273985] p 2984 N94-25898

VENI, video, VICI: The merging of computer and video technologies p 2686 N94-27362

TELLURIUM

The epitaxial growth of Ge on Si(100) using Te as a surfactant [DE94-003437] p 3056 N94-26326

TELSTAR SATELLITES

Charge efficiency of Ni/H2 cells during transfer orbit of Telstar 4 satellites p 2862 N94-28117

TEMPERATE REGIONS

Short-range cloud amount forecasting with model output statistics [AD-A274769] p 2895 N94-26798

TEMPERATURE CONTROL

Project WISH: The Emerald City p 2703 N94-25690

The 1991-1992 project summaries p 2943 N94-25698

Physical modelling and adaptive predictive control of diffusion/LPCVD reactors [PB94-126398] p 2763 N94-26819

Variable temperature cold stage for microscope observation p 2718 N94-27389

TEMPERATURE DEPENDENCE

On the thermal ignition with variable pre-exponential factor [DE93-616009] p 2713 N94-25913

Optical conductivity and resistivity in the two-band Emery model [DE94-601943] p 3051 N94-25945

Debye-Waller factors of the light actinide metals [DE94-000685] p 2733 N94-26069

The formation of conducting gold films by thermal decomposition and direct patterning using electron beam lithography of the gold cluster Au55P(C6H5)312C16 [AD-A273720] p 2749 N94-26074

Temperature dependence of static RAM volatility [DE93-040345] p 2948 N94-26111

Toward insulating quasicrystalline alloy in Al-Pd-Re icosahedral phase [REPT-A-2666] p 2736 N94-26477

Measurements of the p (mu)d-molecule formation rate at different hydrogen temperature [DE93-634636] p 3020 N94-26511

Ion beam mixing of marker layers into amorphous aluminum oxide [DE94-000901] p 2752 N94-26676

Electrical conductivity of perovskite-magnesiowuestite as a function of pressure and temperature [DE94-002714] p 2880 N94-26806

TEMPERATURE DISTRIBUTION

Ultra-high aggregate bandwidth two-dimensional multiple-wavelength diode laser arrays [AD-A274018] p 2815 N94-25756

Verification of thermal analysis codes for modeling solid rocket nozzles [NASA-CR-195248] p 2702 N94-27150

Ice surface temperature retrieval from AVHRR, ATSR, and passive microwave satellite data: Algorithm development and application [NASA-CR-195276] p 2851 N94-27849

The validation of ATSR measurements with in situ sea temperatures [DE94-003195] p 2852 N94-27875

TEMPERATURE EFFECTS

Bulletin of National Research Institute for Metals in Fiscal Year 1993, no. 14 [REPT-14] p 2722 N94-25544

Preparation of creep data sheet: Material strength data sheet p 2723 N94-25548

Study on variation of damage generation mechanism by fatigue on TiAl compounds due to different slip systems p 2729 N94-25579

Radiation hardening effects on localized deformation and stress corrosion cracking of stainless steels [DE94-004308] p 2731 N94-25804

Microscopic study of local structure and charge distribution in metallic La2CuO(4+delta) [DE94-003801] p 3050 N94-25817

Formation of three types of quasi-crystals in Al-Pd-Mg system [REPT-A-2667] p 3053 N94-26071

Comparison of technology for high-power laser mirrors and synchrotron radiation mirrors [DE94-002913] p 3035 N94-26276

MBE grown 3 to 5 strain relaxed buffer layers and superlattices characterized by atomic force microscopy [DE94-002931] p 3056 N94-26308

On the electron mobility in slightly compensated heavily doped gallium arsenide at low temperatures [DE93-634712] p 3057 N94-26387

Study of precipitation and recrystallization in Al alloy 2519 by backscattered electron imaging methods [AD-A274919] p 2736 N94-26533

Methodology for first wall design [DE94-002795] p 3045 N94-26861

Interface phenomena in metal-ceramic composites [AD-A274167] p 2709 N94-27125

Process modelling of aluminium alloys. Modelling of the quench sensitivity of alloy AA6082 [PB94-124567] p 2741 N94-27325

Annals of the Research Inst. of Environmental Medicine, Nagoya Univ., volume 44 [REPT-44-VOL-44] p 2911 N94-27442

Changes in fluid and electrolyte metabolism during water immersion at high or thermoneutral temperature p 2912 N94-27445

The mechanism of caloric nystagmus under microgravity. 1: Changes of endolymphatic pressure in the semicircular canal of pigeon by caloric stimulation p 2914 N94-27457

Cardiovascular function during thermoneutral head-out water immersion in the elderly p 2915 N94-27458

Effects of 40 C hot water immersion for an hour on thermoregulatory functions in humans: Comparison with 34 C thermoneutral immersion p 2915 N94-27459

Effects of bathing at 40 C on cardiovascular system in humans: Comparison with 34 C thermoneutral bathing p 2918 N94-27473

Effects of 41 C bathing for 20 minutes on cardiovascular and thermoregulatory functions in humans p 2918 N94-27474

Monthly variation of physiological and psychological responses under unsteady thermal conditions p 2918 N94-27475

Man's ability to adapt himself for the seasonal climatic changes: From viewpoint of anticipation and seasonable behavior p 2919 N94-27476

Effect of temperature and recoil-energy spectra on irradiation-induced amorphization in Ca2La8(SiO4)6O2 [DE94-004371] p 3067 N94-27602

Creep rupture properties of a nickel-base heat-resistant alloy Hastelloy XR under varying temperature/stress condition [DE94-701175] p 2743 N94-27807

Silicon device performance measurements to support temperature range enhancement [NASA-CR-195265] p 2844 N94-27824

Damage growth in MgAl2O4 crystals by Xe ion irradiations [DE94-005009] p 3069 N94-27828

NASA-UVA light aerospace alloy and structures technology program (LA2ST) [NASA-CR-195275] p 2844 N94-27851

Kinetic parameters from thermogravimetric analysis p 2721 N94-27909

Evaluation of high temperature superconductive thermal bridges for space-borne cryogenic infrared detectors p 2815 N94-27921

Experimental study on the interactions between a transverse heated supersonic jet and an external supersonic flow p 2659 N94-28039

Orthobaric densities and molar volumes of liquids: Aliphatic and cyclic ketones [ESDU-93010] p 2720 N94-28060

Viscosity of liquids: Halogenated ethanes [ESDU-93012] p 2720 N94-28062

Thermal modeling of NiH2 batteries p 2862 N94-28113

Determination of thermal properties of commercial Ni-MH cells p 2864 N94-28132

Mechanical behavior of amorphous alloys at elevated temperatures p 2746 N94-28167

MODIS airborne simulator visible and near-infrared calibration, 1991 FIRE-Cirrus field experiment. Calibration version: FIRE King 1.1 [NASA-TM-104600] p 2897 N94-28182

Proposed law of nature linking impacts, plume volcanism, and Milankovitch cycles to terrestrial vertebrate mass extinctions via greenhouse-embryo death coupling p 2876 N94-28307

TEMPERATURE GRADIENTS

Kinetic resonance damping rate of the toroidal ion temperature gradient mode [DE94-003511] p 3041 N94-25923

A transient symmetrical method for the measurement of temperature dependent thermal diffusivity [VTT-TIED-1452] p 3008 N94-26256

Development of detection technique for fatigue crack due to thermal stratification phenomena in RCS piping [DE93-632968] p 2838 N94-26400

NASA-UVA light aerospace alloy and structures technology program (LA2ST) [NASA-CR-195275] p 2844 N94-27851

TEMPERATURE MEASUREMENT

Interpreting the implied meridional oceanic energy transport in AMIP [DE94-001538] p 2898 N94-26072

Gordon Research Conference on the Physics and Chemistry of Laser Diagnostics in Combustion [AD-A274609] p 2716 N94-26893

Shine through measurements with hydrogen beam in JT-60 [DE94-701113] p 3047 N94-27699

Uncertainties in the characterization of the thermal environment of a solid rocket propellant fire [DE94-002023] p 2760 N94-27719

Ice surface temperature retrieval from AVHRR, ATSR, and passive microwave satellite data: Algorithm development and application [NASA-CR-195276] p 2851 N94-27849

The validation of ATSR measurements with in situ sea temperatures [DE94-003195] p 2852 N94-27875

TEMPERATURE PROFILES

Piecewise least squares fitting technique using finite interval method with Hermite polynomials [VTT-PUBS-135] p 2990 N94-25733

Modelling the mass migration phenomena in partially frozen heat pipes [DE94-002716] p 2797 N94-27709

Predictions of momentum and scalar fields in a jet in cross-flow using first and second order turbulence closures p 2803 N94-28025

TEMPLATES

Template synthesis of metal microtubule ensembles utilizing chemical, electrochemical, and vacuum deposition techniques [AD-A274676] p 2715 N94-26444

Three dimensional object recognition using a complex autoregressive model [AD-A274388] p 2995 N94-26829

An algorithm for stereo correspondence problems on the analogy of human vision [NAL-TR-1185] p 2940 N94-27584

TEMPORAL RESOLUTION

Morphodynamics of inter-tidal areas: The Wadden Sea [NLR-TP-92356-U] p 2851 N94-27555

TENSILE PROPERTIES

Structural analysis of a frangible nut used on the NASA Space Shuttle [DE94-003672] p 2821 N94-25811

Effects of post-fabrication processing on the tensile properties of centrifugally cast SiC particulate reinforced aluminum composites
[AD-A274865] p 2707 N94-26190
Titanium 1992: Science and Technology, volume 1
[AD-A274798-VOL-1] p 2739 N94-26799
Aluminum alloy 8090-T8771 thick plate material characterization
[AD-A274146] p 2987 N94-27077

TENSILE STRENGTH
Study on ferromagnetic field magnet using strong and highly conductive material p 2725 N94-25559
Study on alloy films for hydrogen separation
p 2726 N94-25565
Inert strength of pristine silica glass fibers
[DE94-004685] p 2750 N94-26247
Fatigue resistance under tension-compression of laminates IM6/5245C and AS4/3501-6
[IAR-CR-25] p 2708 N94-26711
Processing and mechanical properties of laminated metal composites of Al 6090-25 volume percent SiC(sub p) and Al 5182
[DE94-001070] p 2708 N94-26930
High temperature tension test equipment of heat resistant composite materials
[NAL-TM-652] p 2710 N94-27255
Formation and high mechanical strength of Al-based alloys containing a nanoscale icosahedral phase as a main constituent p 2746 N94-28171

TENSILE STRESS
Determination of fracture stress and effective crack tip radius from toughness (KIc) and yield strength (Y)
[AD-A274014] p 2836 N94-25754
Investigation of tension-compression fatigue behavior of a cross-ply metal matrix composite at room and elevated temperatures
[AD-A273731] p 2706 N94-25999
Grain by grain study of the mechanisms of crack propagation during iodine SCC of Zry-4
[DE93-633765] p 2734 N94-26162

TENSILE TESTS
Structural analysis of a frangible nut used on the NASA Space Shuttle
[DE94-003672] p 2821 N94-25811
A study of graphite peek composite with central elliptical holes under tension
[AD-A273779] p 2705 N94-25863
An investigation of cavitation in a mechanically alloyed 15 volume percent SiCp/IN9021 aluminum composite
[DE94-003371] p 2748 N94-25959
SP/MSP tests for the evaluation of FGM
[NAL-SP-17] p 2710 N94-27279
SP/MSP tests for the evaluation of FGM
p 2710 N94-27280
Research on the development of fracture characteristics evaluation system for ceramics and metal composite materials p 2710 N94-27281
Development of a new seal for use on large openings of pressurized spacecraft
[NASA-TM-108444] p 2825 N94-27560
Use of photostress and strain gages to analyze behavior of weldments
[NASA-CR-195269] p 2843 N94-27765
Investigation of the bond strength of a discrete skin-stiffener interface
[NLR-TP-92183-U] p 2670 N94-27796
Mechanical properties and microstructure of thermomechanically processed, high manganese steel
[ARL-TR-146] p 2747 N94-28212

TENSORS
A note on Riemannian 2-space
[DE94-602560] p 3073 N94-27024
The Einstein tensor characterizing some Riemann spaces
[DE94-603663] p 3074 N94-27626

TERBIUM COMPOUNDS
Laser surface modification of intermetallic compounds
[DREA-CR-92-416] p 2820 N94-27668

TERCOM
Flight testing of GPS and GPS-aided systems
[NLR-TP-92151-U] p 2666 N94-27831

TERMINAL BALLISTICS
Dynamic response of S-2 glass reinforced plastic structural armor
[AD-A273868] p 2747 N94-25596
Design study of fiber-composite penetrator cases
[DE94-003203] p 2707 N94-26099
Trajectories of ballistic impact ejecta on a rotating Earth p 2887 N94-28295

TERMINAL FACILITIES
The design of a long-range megatransport aircraft
p 2671 N94-25718

TERMINOLOGY
Correspondence dictionary from free English term to INIS descriptors
[DE94-701173] p 3100 N94-27700

TERMS
Correspondence dictionary from free English term to INIS descriptors
[DE94-701173] p 3100 N94-27700

TERNARY ALLOYS
Study on improvement in physical analysis method of metallic materials p 2728 N94-25577
Zr-rich corner of the Zr-Sn-O diagram
[DE93-633764] p 2734 N94-26161
A tri-junction diffusion couple analysis of the Nb-Cr-Ti system at 950 C
[DE94-002637] p 2737 N94-26607
NMR study of quasicrystal Al(70)Pd(20)T(M10) alloy (T(M):Cr, Mn, Fe, and Co) p 2745 N94-28162

TERNARY SYSTEMS
Zr-rich corner of the Zr-Sn-O diagram
[DE93-633764] p 2734 N94-26161

TERRAIN
Recent ASCOT experiments in multi-layered flows
[DE94-002360] p 2880 N94-26762
Conifer tree influence on Digital Terrain Elevation Data (DTED): A case study at Dulles International Airport
[AD-A274213] p 2849 N94-27069
An overview of the ASCOT program
[DE94-004356] p 2869 N94-27601
Landscape dynamics of northeastern forests
[NASA-CR-195272] p 2852 N94-28070

TERRAIN ANALYSIS
Construction and applications of the two dimensional Delaunay triangulated irregular network and the three dimensional Delaunay tetrahedron model
[ETN-94-95034] p 2848 N94-26651

TERTIARY PERIOD
An extraterrestrial event at the tertiary-quaternary boundary p 2890 N94-28309

TEST CHAMBERS
Program for calculation of maximum lift coefficient of plain aerofoils and wings at subsonic speeds
[ESDU-93015] p 2649 N94-28076

TEST EQUIPMENT
High temperature solid oxide fuel cell: Customer test units
[DE94-002961] p 2858 N94-26869

TEST FACILITIES
Primary standards laboratory report 1st half 1993
[DE94-003138] p 2762 N94-26027
NASA Lewis Research Center lean-, rich-burn materials test burner rig
[NASA-CR-194437] p 2680 N94-26141
The development of a horizontal impact sled facility and subsequent crashworthiness experiments
[NIAR-93-15] p 2680 N94-26200
A method for testing of HVAC automation equipment using the emulator and the application of the method
[VTT-TIED-1435] p 2822 N94-26306
Fusion Energy Advisory Committee: Advice and recommendations to the US Department of Energy in response to the charge letter of September 1, 1992
[DE93-019842] p 3043 N94-26428
An assessment of testing requirement impacts on nuclear thermal propulsion ground test facility design
[DE94-002933] p 2702 N94-26560
Research and test facilities
[NASA-TM-109685] p 2681 N94-26684
Calibrating/testing meters in hot water test bench VM7
[PB94-124294] p 2812 N94-27160
Description of the Experimental Avionics Systems Integration Laboratory (EASILY)
[NASA-TM-109072] p 2681 N94-27425
Design, implementation and experimental results of robotic environment input into the Robot Controller Test Station (RCTS)
[ISBN-0-315-85355-7] p 2826 N94-27596
Experimental data for CFD validation of impinging jets in crossflow with application to ASTOVL flow problems
p 2801 N94-28010

TEST PATTERN GENERATORS
Automatic test case generation using PROLOG
[NPL-DITC-215/93] p 2964 N94-26655

TEST STANDS
Shake test results of the MDHC test stand in the 40- by 80-foot wind tunnel
[NASA-TM-108801] p 2641 N94-26596
Space Station technology testbed: 2010 deep space transport p 2687 N94-27368
Advanced development of particle beam probe diagnostic system
[DE94-002316] p 3047 N94-27720

TEST VEHICLES
Ferroelectric fluoride memory FET development
[AD-A274341] p 2785 N94-27057

TETHERLINES
The 1991-1992 project summaries
p 2943 N94-25698

TETRAETHYL ORTHOSILICATE
Sol-gel derived silica/siloxane composite materials: The effect of loading level and catalyst activity on silica domain formation
[DE94-002734] p 2712 N94-27710

TETRAHEDRONS
Spatial symmetry, local integrability and tetrahedron equations in the Baxter-Bazhanov model
[DE93-634348] p 3002 N94-26038

TETRAHYDROFURAN
The reactivity of lithium toward non-aqueous solvents of relevance to energy storage applications as studied by surface analytical techniques
[DE94-003483] p 2856 N94-26464

TEXTS
Full-text information services at the desktop
[DE94-003728] p 3096 N94-25813

THAILAND
The Environmental Research and Training Centre
p 2873 N94-28280
Changes in phytoplankton population in the Chao Phraya estuary, Thailand, during the eutrophication mechanisms studies p 2875 N94-28287
Land use change in Thailand and its impact on environmental change: Joint Thai-Japanese research project (1993-1995) p 2875 N94-28288

THALAMUS
Cortical mechanisms of attention, discrimination, and motor response to somesthetic stimuli
[AD-A274163] p 2940 N94-27141

THEOREMS
Chebyshev-Markov rational functions over several intervals
[PB94-125333] p 2998 N94-27116
Wieand's theorem
[PB94-126711] p 3004 N94-27223
The Einstein tensor characterizing some Riemann spaces
[DE94-603663] p 3074 N94-27626

THEORETICAL PHYSICS
Duality for multiparametric quantum GL(n) and for a Lorentz quantum group
[DE93-613048] p 3005 N94-25868
Theoretical and experimental studies of elementary physics
[DE94-002310] p 3008 N94-25988
Z(sub N)(sup n-1) broken model
[DE93-634357] p 3072 N94-26039
Lepton masses in an SU(3)(sub L) x U(1)(sub N) gauge model
[DE93-634366] p 3016 N94-26040
Dimensional crossover from non-renormalizability to renormalizability
[DE93-613052] p 3006 N94-26193
Stability of large scale interconnected dynamical systems
[DE94-601536] p 2993 N94-26408
Characterization of self-conjugate minimal surfaces in R(sup 3)
[DE94-601538] p 2993 N94-26409
Enumeration of n-fold tangent hyperplanes to a surface
[DE94-601544] p 2993 N94-26412
On the phi(sub 0)-stability of perturbed nonlinear differential systems
[DE93-634304] p 2993 N94-26441
Anomaly candidates and invariants of D 4, N 1 supergravity theories
[NIKHEF-H/93-12] p 3072 N94-26541
Strange Dibaryons
[DE94-003005] p 3022 N94-26769
Flavor changing neutral currents in SU(3) x U(1) models
[DE94-602576] p 3022 N94-26899

THERAPY
Rewarming methodologies in the field
[AD-A274744] p 2909 N94-26173
Development of surgical CW Nd:YAG laser with optical fiber delivery system
[DE93-632902] p 2817 N94-26185
Bakteriella toxiner-morgondagens hot (bacterial toxins-the threat of tomorrow)
[PB94-124229] p 2902 N94-27045

THERMAL ANALYSIS
Aspects of the circuit board thermal design
[VTT-PUBS-132] p 2779 N94-25644
Modelling the inhibition cure behaviour of unsaturated polyester moulding materials
[PB94-124864] p 2748 N94-25893
Evaluation of helium cooling for fusion divertors
[DE94-002680] p 3042 N94-25976
User's guide for the thermal analyst's help desk expert system
[NASA-CR-194885] p 2695 N94-26103
Design of gasifiers to optimize fuel cell systems
[DE94-000010] p 2856 N94-26581

Thermal/structural tailoring of engine blades (T/STAEBL). User's manual
[NASA-CR-194463] p 2839 N94-26692
Verification of thermal analysis codes for modeling solid rocket nozzles
[NASA-CR-195248] p 2702 N94-27150
Thermal/Structural Tailoring of Engine Blades (T/STAEBL): User's manual
[NASA-CR-194461] p 2843 N94-27776
Evaluation of high temperature superconductive thermal bridges for space-borne cryogenic infrared detectors
p 2815 N94-27921
Thermal modeling of NiH2 batteries
p 2862 N94-28113
Use of calorimetry for end of charge determination
p 2863 N94-28128

THERMAL BATTERIES
Effects of repeating resistance testing on firing ability of igniter EP360-3
[AD-A274814] p 2759 N94-26486

THERMAL CONDUCTIVITY
Thermal conductivity of PAX 2A explosive by DSC
[AD-A274721] p 2759 N94-26437
Sound, speed, reflectivity, absorption, and thermal diffusivity measurements in Arctic ice in 1990
[AD-A274326] p 2899 N94-26886
Thermal conductivity of liquid aliphatic alcohols
[ESDU-93008] p 2720 N94-28058
Thermal conductivity of liquid carboxylic acids
[ESDU-93017] p 2721 N94-28138

THERMAL DECOMPOSITION
The formation of conducting gold films by thermal decomposition and direct patterning using electron beam lithography of the gold cluster Au55P(C6H5)312C16
[AD-A273720] p 2749 N94-26074
Mechanistic studies of opto-electronic materials and syntheses using multiple laser and surface diagnostics
[AD-A274528] p 3036 N94-26834
Bench-scale synthesis of nanoscale materials
[DE94-004787] p 2742 N94-27786

THERMAL DEGRADATION
Kinetic parameters from thermogravimetric analysis
p 2721 N94-27909

THERMAL DIFFUSIVITY
Sound, speed, reflectivity, absorption, and thermal diffusivity measurements in Arctic ice in 1990
[AD-A274326] p 2899 N94-26886
TFTR experimental data analysis collaboration
[DE94-004166] p 3047 N94-27690

THERMAL EMISSION
Martian atmospheric radiation budget
p 3107 N94-27887

THERMAL ENVIRONMENTS
Uncertainties in the characterization of the thermal environment of a solid rocket propellant fire
[DE94-002023] p 2760 N94-27719

THERMAL FATIGUE
Characterization of fatigue damage in a metal matrix composite (SCS-6/Ti-15-3) at elevated temperature
[AD-A273797] p 2706 N94-25876
Investigation of tension-compression fatigue behavior of a cross-ply metal matrix composite at room and elevated temperatures
[AD-A273731] p 2706 N94-25999
Development of detection technique for fatigue crack due to thermal stratification phenomena in RCS piping
[DE93-632968] p 2838 N94-26400

THERMAL INSULATION
Cryogenic insulation studies
[NASA-CR-195266] p 2756 N94-27429

THERMAL MAPPING
An apparatus for measurement of ignition and burning characteristics of metallic particles
[AD-A274815] p 2716 N94-26487

THERMAL NEUTRONS
Surface physics with cold and thermal neutron reflectometry
[DE94-001447] p 2733 N94-26070
Neutron-neutron scattering: Possibility of in-beam experiment
[DE94-606459] p 3027 N94-27682

THERMAL NOISE
Geometrical resonances in the nyquist noise spectrum for ballistic conductors
[DE94-603668] p 3027 N94-27631

THERMAL PLASMAS
Theoretical aspects of the agile mirror
[AD-A274890] p 2767 N94-26177

THERMAL PROTECTION
Minimum accommodation for aerobrake assembly, phase 2
[NASA-TM-107608] p 2692 N94-27774
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle mission STS-60
[NASA-TM-109193] p 2692 N94-27956

THERMAL RADIATION
User's guide for the thermal analyst's help desk expert system
[NASA-CR-194885] p 2695 N94-26103
Computer model for generation of infrared images
[PB94-123551] p 3005 N94-27172
Researches of the Electrotechnical Laboratory. No. 53: Spectral emission from combustion gas containing scattering media
[JTN-94-80603] p 2717 N94-27246

THERMAL REACTORS
A review of carbide fuel corrosion for nuclear thermal propulsion applications
[DE94-003938] p 2699 N94-25613

THERMAL RESISTANCE
Study on high temperature damage control and life improvement p 2729 N94-25580
Method for improving electromagnetic shielding performance of composite materials by electropulsing
[AD-D016050] p 2709 N94-27076

THERMAL SHOCK
Collaborative research on ion implantation of ceramics
[DE93-019177] p 2749 N94-26080

THERMAL STABILITY
Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparison and verification of methods
[DE94-003664] p 2749 N94-26007
The influence of weld metal alloying additions to extend the heat input range for the submerged arc welding of high strength steels
[AD-A274284] p 2738 N94-26679
Thermally stable oxygen and nitrogen implant isolation of C-doped Al(0.35)Ga(0.65)As
[DE94-004799] p 3069 N94-27790
Broad specification fuels combustion technology program, phase 2
[NASA-CR-191066] p 2719 N94-27854
New monomers for high performance polymers
p 2758 N94-27904
Kinetic parameters from thermogravimetric analysis
p 2721 N94-27909

THERMAL STRESSES
A review of carbide fuel corrosion for nuclear thermal propulsion applications
[DE94-003938] p 2699 N94-25613
The fracture behavior of a CVD crystalline Si3N4/amorphous Si3N4 composite
[DE94-002646] p 2750 N94-26124
Electrical analysis of wideband and distributed windows using time-dependent field codes
[DE94-002987] p 2768 N94-26310
Baseline for a Nordtest method. Reliability stress screening of components. A guide for component users
[PB94-123775] p 2835 N94-27042
Implementation of thermal residual stresses in the analysis of fiber bridged matrix crack growth in titanium matrix composites
[NASA-TM-109082] p 2711 N94-27658
Development of methodologies for the estimation of thermal properties associated with aerospace vehicles
p 2846 N94-27920

THERMIONIC EMISSION
Channel model for AC electric arc
[PB94-124591] p 2786 N94-27327

THERMIONIC POWER GENERATION
Space-R thermionic space nuclear power system design and technology demonstration
[DE94-002017] p 2700 N94-25930

THERMOCHEMISTRY
The addition of molecular oxygen to hydroperoxy-propyl radicals
[DE94-003662] p 2760 N94-27725

THERMOCOUPLES
Verification of thermal analysis codes for modeling solid rocket nozzles
[NASA-CR-195248] p 2702 N94-27150
Effects of free-stream turbulence on a jet in a cross flow p 2805 N94-28036

THERMODYNAMIC CYCLES
A technique for integrating engine cycle and aircraft configuration optimization
[NASA-CR-191602] p 2668 N94-26606
Gas fired advanced turbine system
[DE94-003193] p 2827 N94-27874
Combined Cycles for Power Plants
[VKI-LS-1993-08] p 2830 N94-28077

THERMODYNAMIC EFFICIENCY
Pressure-gain combustion
[DE94-002975] p 2719 N94-27712
Gas fired advanced turbine system
[DE94-003193] p 2827 N94-27874

THERMODYNAMIC EQUILIBRIUM
Antiproton studies in penning traps
[AD-A274250] p 3024 N94-27011
Phase stability in the Cd-Mg system
[DE94-004976] p 2743 N94-27792

THERMODYNAMIC PROPERTIES
Zr-rich corner of the Zr-Sn-O diagram
[DE93-633764] p 2734 N94-26161
Microwave and pulsed power
[DE94-003019] p 2782 N94-26312
Titanium 1992: Volume 3: Science and technology
[AD-A274800] p 2735 N94-26337
How reliable is the HMSA integral equation for the pair structure of supercooled and amorphous mixtures?
[DE94-601543] p 3006 N94-26411
New rubber qualification for the igniter adapter
[NASA-CR-193936] p 2752 N94-26708
Thermophysical properties of HFC-143a and HFC-152a
[DE94-004236] p 2719 N94-27567
Phase stability in the Cd-Mg system
[DE94-004976] p 2743 N94-27792
Development of methodologies for the estimation of thermal properties associated with aerospace vehicles
p 2846 N94-27920

THERMODYNAMICS
A thermodynamically consistent constitutive theory for a rigid solid-stokesian fluid mixture
[DE93-633202] p 2792 N94-26401
Calculating the surface properties for the liquid-vapour interface: Illustrating the thermodynamic stability of the spherical microstructures
[DE94-601992] p 3073 N94-26837
Thermodynamics and form factors of supersymmetric integrable field theories
[DE94-602557] p 3073 N94-26896
Integrated model development for liquid fueled rocket propulsion systems
[NASA-CR-195253] p 2702 N94-27166
Process modelling of aluminium alloys. Modelling of the quench sensitivity of alloy AA6082
[PB94-124567] p 2741 N94-27325
Thermodynamics of combined cycle plant
p 2831 N94-28079

THERMOELASTICITY
Stress analysis of a secondary-bending specimen
[AD-A274842] p 2838 N94-26501

THERMOELECTRIC GENERATORS
Preliminary reentry safety assessment of the General Purpose Heat Source module for the Cassini mission: Aerospace Nuclear Safety Program
[DE94-001646] p 2699 N94-25926
Digital control and data acquisition for high-value GTA welding
[DE94-000885] p 2821 N94-25980

THERMOELECTRIC POWER GENERATION
Hybrid power system for remote communications stations
[AD-A274963] p 2782 N94-26301

THERMOGRAVIMETRY
Thermogravimetric study of oxidation of a PdCr alloy used for high-temperature sensors
[NASA-TM-106473] p 2741 N94-27426
Kinetic parameters from thermogravimetric analysis
p 2721 N94-27909

THERMOMECHANICAL TREATMENT
Effects of post-fabrication processing on the tensile properties of centrifugally cast SiC particulate reinforced aluminum composites
[AD-A274865] p 2707 N94-26190
Study of precipitation and recrystallization in Al alloy 2519 by backscattered electron imaging methods
[AD-A274919] p 2736 N94-26533
Mechanical properties and microstructure of thermomechanically processed, high manganese steel
[ARL-TR-146] p 2747 N94-28212

THERMONUCLEAR POWER GENERATION
Methodology for first wall design
[DE94-002795] p 3045 N94-26861

THERMOPHYSICAL PROPERTIES
Zr-rich corner of the Zr-Sn-O diagram
[DE93-633764] p 2734 N94-26161
Eleventh Symposium on Energy Engineering Sciences: Proceedings
[DE93-019930] p 2763 N94-26429
Thermophysical properties of HFC-143a and HFC-152a
[DE94-004236] p 2719 N94-27567
Thermophysical properties of refrigerant R-134a (1,1,1,2-tetrafluoroethane)
[ESDU-93001] p 2720 N94-27959
Thermal modeling of NiH2 batteries
p 2862 N94-28113

THERMOPLASTIC RESINS
Continuous fiber reinforced thermoplastic composites: Literature survey
[VTT-TIED-1422] p 2704 N94-25651
Design for producing fiberglass fabric in a lunar environment p 2765 N94-25676

Thermoplastic elastomers having alternate crystalline structure for us as high energy binders
[AD-D016035] p 2755 N94-27203
Thermoplastic or thermosetting composites in aircrafts
[PB94-123809] p 2710 N94-27253

THERMOPLASTICITY
Lunar preform manufacturing p 2765 N94-25677
Impact tests on fibre metal laminates under a tensile load
[PB94-126570] p 2710 N94-27201
Thermoplastic or thermosetting composites in aircrafts
[PB94-123809] p 2710 N94-27253

THERMOREGULATION
Plasma volume shifts and exercise thermoregulation with water immersion and six-degree head-down tilt
[NASA-TM-108781] p 2901 N94-26093
Thermoregulatory effects of caffeine ingestion during rest and exercise in men
[NASA-TM-108783] p 2901 N94-26210
Effects of 40 C hot water immersion for an hour on thermoregulatory functions in humans: Comparison with 34 C thermoneutral immersion p 2915 N94-27459
Effects of 41 C bathing for 20 minutes on cardiovascular and thermoregulatory functions in humans
p 2918 N94-27474

THERMOSETTING RESINS
Ultrasonic measurement technique to determine the state of cure in thermosetting materials
[PB94-124328] p 2756 N94-27217
Thermoplastic or thermosetting composites in aircrafts
[PB94-123809] p 2710 N94-27253

THERMOSPHERE
Upper atmosphere neutral and plasma density modeling
[AD-A274768] p 2879 N94-26569
Solar and airglow measurements aboard the two suborbital flights NASA 36.098 and 36.107
[NASA-CR-195279] p 2882 N94-27380

THERMOSTATS
Stress relaxation in dough moulding compounds
[PB94-124872] p 2748 N94-25894

THESAURI
Correspondence dictionary from free English term to INIS descriptors
[DE94-701173] p 3100 N94-27700

THESES
Automation of formation flight control
[AD-A274137] p 2678 N94-27132

THICK FILMS
Electro-optic materials by solid source MOCVD
[DE94-005120] p 2757 N94-27716

THICKNESS
Automated in-situ inspection systems for underground storage tanks
[AD-A274644] p 2764 N94-27144

THIN FILMS
Development of intermetallic compounds for high performance luminescence elements
p 2722 N94-25545
Hydrogen trapping with Pd coated alloy films
p 2723 N94-25551
Study on synthesis and characteristics of intermetallic compound with strong electron correlation
p 2726 N94-25563
Study on alloy films for hydrogen separation
p 2726 N94-25565
Fundamental study on new synthetic technology by phthalocyanine complexes p 2721 N94-25569
Study on substance diffusion in thin films with controlled structures p 2727 N94-25570
Object imaging accomplished with an integrated circuit robotic tactile sensor incorporating a piezoelectric polyvinylidene fluoride thin film
[AD-A274038] p 2780 N94-25845
Crystallization and microstructural control of ferroelectric thin-films and glass-ceramics
[AD-A273767] p 2748 N94-25854
In situ x ray reflectivity measurements of thin film structural evolution
[DE94-002289] p 3051 N94-25944
Optimization of experimental conditions in IR reflectance determination of BPSG properties
[DE94-002742] p 2713 N94-25978
Characterization of physically vapor deposited AF2400 thin films
[DE94-004019] p 2749 N94-25985
Plasma surface cleaning using microwave plasmas
[DE94-002754] p 2713 N94-26014
Buckyball microwave plasmas: Fragmentation and diamond-film growth
[DE94-003209] p 3053 N94-26031
Micropyrolysis of polymer thin films for ceramics
[ECL-92-62] p 2750 N94-26088
The state of the art of thin-film photovoltaics
[DE94-000224] p 2855 N94-26115
Stress relaxation in sputtered W films and W/GeSi/Si heterostructures
[DE94-004007] p 3055 N94-26239
Studies of thin-film growth, adsorption, and oxidation by in situ, real-time, and ex situ ion beam analysis
[DE94-002907] p 3055 N94-26275
The epitaxial growth of Ge on Si(100) using Te as a surfactant
[DE94-003437] p 3056 N94-26326
The deposition of boron nitride and carbon films on silica glass fibers
[DE94-004684] p 2751 N94-26564
An x ray absorption fine structure study of ordering in polythiophene thin films
[AD-A274235] p 2753 N94-26822
Nitride semiconductors for ultraviolet detection
[AD-A274246] p 3060 N94-26840
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device development
[AD-A274247] p 3061 N94-26841
Ferroelectric thin film microstructure development and related property enhancement
[DE94-002741] p 3061 N94-26856
Atomic layer epitaxy of group 4 materials: Surface processes, thin films, devices and their characterization
[AD-A274325] p 3061 N94-26885
Processing, fabrication, and demonstration of HTS integrated microwave circuits, appendix A
[AD-A274600] p 2785 N94-26890
Ion implantation and dynamic recovery of tin-doped indium oxide films
[DE94-001126] p 3062 N94-26932
The growth and characterization of GaN as a photodetector
[AD-A274570] p 3063 N94-26965
Low temperature deposition and characterization of N- and p-type silicon carbide thin films and associated ohmic and Schottky contacts
[AD-A274345] p 2754 N94-26974
Ferroelectric fluoride memory FET development
[AD-A274341] p 2785 N94-27057
High intensity x ray instrumentation for residual strain measurements in composites and textured materials
[ISBN-0-315-85169-4] p 2842 N94-27278
Synthesis of diamond film assisted by an arcjet plasma source, part 2
[INPE-5527-PRP/178-PT-2] p 3066 N94-27329
List of papers published by the members of Institute for Materials Research, Tohoku University 1992
[JTN-94-80608] p 3118 N94-27355
Research on high-efficiency, large-area, CuInSe2 based thin-film modules
[DE94-000259] p 3067 N94-27609
High-efficiency, thin-film solar cells
[DE94-000250] p 2860 N94-27625
Electro-optic materials by solid source MOCVD
[DE94-005120] p 2757 N94-27716
The ZnO thin films with C-axis orientation prepared on the room temperature substrate by the ECR multipolar plasma sputtering method
[DE94-605039] p 2758 N94-27857
Aerodynamic heating in hypersonic flows
p 2658 N94-27919
Prometheus in space: Research Committee on Functional New Material
[JTN-94-80580] p 2761 N94-28002
The Science Reports of the Research Institutes, Tohoku University. Series A: Physics, Chemistry, and Metallurgy. Volume 38, No. 1: Amorphous Materials 14
[JTN-94-80610] p 2744 N94-28158
Differential scanning calorimetric study of solid state amorphization and crystallization in Zr/Co and Zr/Ni multilayers p 2745 N94-28161

THIN PLATES
Radial basis function approximation: From gridded centers to scattered centers
[AD-A274184] p 2998 N94-27103
A numerical approach to Stefan problem
[IPPCZ-334] p 2844 N94-27841

THIN WALLS
Growth of small fatigue cracks in Incoloy-908
[DE94-003406] p 2836 N94-26129

THOMSON SCATTERING
New Thomson scattering laser control for D3-D
[DE94-002890] p 3043 N94-26274

THREE BODY PROBLEM
Muon transfer rates in collisions of hydrogen isotope mesic atoms on bare nuclei: Multichannel adiabatic approach
[DE94-606752] p 3030 N94-27861

THREE DIMENSIONAL BODIES
Combining shape and color information for 3D object recognition
[AD-A274123] p 2967 N94-27064

THREE DIMENSIONAL BOUNDARY LAYER
Transition for three-dimensional, compressible boundary layers p 2653 N94-28327
Euler and Navier-Stokes wing/fuselage computations of the De Havilland Dash 8 aircraft p 2654 N94-28329

THREE DIMENSIONAL COMPOSITES
Fatigue resistance of unnotched and post impact(+/-30 deg/0 deg) 3-D braided composites
[NASA-CR-191590] p 2711 N94-27433

THREE DIMENSIONAL FLOW
The high Reynolds number flow through an axial-flow pump
[AD-A273844] p 2789 N94-25604
Effects of crenulations on three dimensional losses in a linear compressor cascade
[AD-A273778] p 2790 N94-25862
The effects of three-dimensional imposed 3-d disturbances on bluff-body near wake flows
[AD-A274845] p 2791 N94-26187
Program to develop a performance and heat load prediction system for multistage turbines
[NASA-CR-195223] p 2674 N94-26588
Computational strategies for three-dimensional flow simulations on distributed computer systems
[NASA-CR-195249] p 2793 N94-26595
Research on bluff body vortex wakes
[AD-A273780] p 2796 N94-27319
Agglomeration multigrid for the three-dimensional Euler equations
[NASA-CR-191595] p 2999 N94-27557
Navier-Stokes simulation of two and three dimensional jets in crossflow, effects of grid, and boundary conditions p 2804 N94-28026
An initial investigation into methods of computing transonic aerodynamic sensitivity coefficients
[NASA-CR-195705] p 2648 N94-28072

THREE DIMENSIONAL MODELS
Calculation of a 3-D pose of a known object in a single perspective view
[VTT-PUBS-122] p 2957 N94-25642
A nonlinear three-dimensional micromechanics model for fiber-reinforced laminated composites
[AD-A273772] p 2705 N94-25857
Satellite attitude determination using linear combination of models
[AD-A274082] p 2694 N94-25996
Correlation of experimental data and three-dimensional finite element modeling of a spinning quadrupole
[DE93-041173] p 3008 N94-26421
Extracting complete 3-dimensional boundary representation from multiple range images
[ISBN-0-315-83776-4] p 2963 N94-26615
A preliminary shear velocity model for Central Asia
[AD-A274972] p 2880 N94-26752
Building 3-D models from unregistered range images
[AD-A274126] p 2986 N94-27032
Dynamic and kinematic P wave tracing for a three-dimensional elastic inhomogeneous media by the asymptotic ray theory and application
[ITN-94-85239] p 2775 N94-27244
The three-dimensional hydrogen atom in crossed magnetic and electric fields
[DE94-606301] p 3029 N94-27847
Lisp interface to geometric modelling operations
[PB94-133121] p 3001 N94-28398

THRUST MEASUREMENT
Simulating indirect thrust measurement methods as used on modern high-bypass turbofans
[ISBN-0-315-84123-0] p 2674 N94-26673

THRUST REVERSAL
Experimental investigation of the interaction of a thrust reverser jet with an external subsonic flow
p 2801 N94-28011
A study of jet effect and ground effect interference on a STOL fighter p 2671 N94-28034

THRUST VECTOR CONTROL
Evaluation of moderate angle of attack roll of a dual engine, thrust vectoring aircraft using quantitative feedback theory
[AD-A274118] p 2667 N94-25905
Vectored jets-induced interference on aircraft, prediction and verification p 2801 N94-28012
Numerical investigation of thrust vectoring by injection of secondary air into nozzle flows p 2801 N94-28013
A study of jet effect and ground effect interference on a STOL fighter p 2671 N94-28034

THULIUM
The development of Cr, Tm, Ho:YAG lasers for airborne lidar
[AD-A274895] p 2816 N94-26178

THUNDERSTORMS
A modeling study of the mesocyclone
[AD-A274889] p 2893 N94-26168
Examination of micro- and macro-physical structures and processes in hailstorms with respect to their modification
[DLR-FB-93-25] p 2897 N94-27751
Thunderstorm Hypothesis Reasoner
[NASA-CR-195714] p 2897 N94-27884
MUSIC for localization of thunderstorm cells
[DE94-004985] p 2897 N94-28146

THYRISTORS
A study of DC-DC converters with MCT's for arcjet power supplies
[NASA-CR-191204] p 2703 N94-27662
Silicon device performance measurements to support temperature range enhancement
[NASA-CR-195265] p 2844 N94-27824

THYROID GLAND
Muscle sympathetic nerve activity in patients with hyper-and hypothyroidism: A microneurographic study
p 2930 N94-27531

THYROXINE
Expression analysis of Thyroxine-Binding Globulin Complete Deficiency in Japanese (TBG-CDJ)
p 2905 N94-27482

TIDAL FLATS
Morphodynamics of inter-tidal areas: The Wadden Sea
[NLR-TP-92356-U] p 2851 N94-27555

TIDES
Upper atmosphere neutral and plasma density modeling
[AD-A274768] p 2879 N94-26569
Macrobenthic fauna in the dutch sector of the north sea in 1991
[PB94-126414] p 2868 N94-27200
Modulating terrestrial impacts from Oort cloud comets by the adiabatically changing galactic tides
p 2890 N94-28305

TILES
Design and evaluation of an electromagnetic beam waveguide for measuring electrical properties of materials
[NASA-TP-3418] p 2769 N94-26611

TILT ROTOR AIRCRAFT
Design optimization of high-speed proprotor aircraft
[NASA-TM-103988] p 2667 N94-26151
Wing design for a civil tiltrotor transport aircraft: A preliminary study p 2671 N94-27917

TILT WING AIRCRAFT
Design optimization of high-speed proprotor aircraft
[NASA-TM-103988] p 2667 N94-26151

TILTING ROTORS
Design optimization of high-speed proprotor aircraft
[NASA-TM-103988] p 2667 N94-26151

TILTMETERS
Evaluation of the prototype dual-axis wall attitude measurement sensor
[NASA-TM-109056] p 2811 N94-26707
Observation with STS seismometer at Nakaizu, central Japan: Observation system and comparison with tiltmeter p 2886 N94-27986

TIME CONSTANT
Automation of formation flight control
[AD-A274137] p 2678 N94-27132

TIME DEPENDENCE
The effect of the time restrictions on information search and information integration in a dynamic task environment
[AD-A273759] p 3095 N94-25723
Theoretical determination of chemical rate constants using novel time-dependent methods
[NASA-CR-195221] p 2714 N94-26205
Electrical analysis of wideband and distributed windows using time-dependent field codes
[DE94-002987] p 2768 N94-26310
Analytical solution of Mori's equation with secant hyperbolic memory
[DE94-601541] p 3006 N94-26368
Local uniform grid refinement and systems of coupled partial differential equations
[CWI-NM-R9307] p 2995 N94-26773
Mechanism of mechanical fatigue of silica glass
[DE94-003165] p 2753 N94-26783
Experiments and numerical simulations of electromagnetic wave propagation in plasma varying rapidly in space and time
[AD-A274376] p 2772 N94-26975
The effect of naloxone on sleeping time in adjuvant arthritic rats p 2906 N94-27498
Forward and backward simulations. Part 2: Timing-based systems
[CWI-CS-R9314-PT-2] p 2972 N94-27581

TIME DIVISION MULTIPLE ACCESS
Analysis of a multiaccess/switching technique for multibeam satellites in a prioritized ISDN environment
[ISBN-0-315-84632-1] p 2776 N94-27345

TIME DIVISION MULTIPLEXING
Design of a shared coherent cache for a multiple channel architecture
[AD-A274026] p 3034 N94-25758
Improved performance of hybrid error control techniques for real-time digital communications over noisy channels
[ISBN-0-315-84281-4] p 2770 N94-26625
Design and test of a regenerative satellite transmultiplexer
[ISBN-0-315-85280-1] p 2786 N94-27303

TIME LAG
Predicting nonlinear time series
[AD-A274051] p 2990 N94-25834
Hook spectroscopy as an atomic number density diagnostic applied to laser-ablated copper plasmas
[DE94-002645] p 3042 N94-26081
Fiber optic true time-delay array antenna feed system
[AD-D016063] p 2777 N94-27734

TIME MEASUREMENT
Tool for performance analysis and off-line prediction of timing behaviour p 2952 N94-26732
A real-time executive implementing priority inheritance protocols p 2952 N94-26733
Fault-tolerant scheduling in distributed critical real-time systems p 2952 N94-26735
Geological Dating by Ar-40 - Ar-39 method
[DE94-601975] p 2880 N94-26874
Coherence and satisfiability of waveform timing specifications
[ISBN-0-315-57769-X] p 3009 N94-27268

TIME OF FLIGHT SPECTROMETERS
A double arm time-of-flight spectrometer based on position-sensitive parallel-grid avalanche counters
[DE93-616665] p 3012 N94-25750

TIME SERIES ANALYSIS
Predicting nonlinear time series
[AD-A274051] p 2990 N94-25834
Developing prediction regions for a time series model for hurricane forecasting
[AD-A273777] p 2892 N94-25861
MIMO recursive least squares control algorithm for the AN/FPN-44A Loran-C transmitter
[AD-A274820] p 2664 N94-26493
Feasibility study on introduction of transportation-use petroleum substitution energy
[DE94-725205] p 2759 N94-26905
Limit theorems for functionals of Markov processes and renormalizable stable fields
[AD-A274645] p 3004 N94-27106

TIME SHARING
Scheduling tasks with unpredictable timing parameters in hard real-time systems p 2951 N94-26728
Ada multiple-programming for hard real time applications in space systems p 2951 N94-26730

TIN
Reference electrodes for solid polymer electrolytes
[DE94-004583] p 2780 N94-25806
Crystal chemistry and self-lubricating properties of monochalcogenides gallium selenide and tin selenide
[DE93-041177] p 2751 N94-26422

TIN ALLOYS
Structure of the modulated magnetic phase of Mn3Sn
[DE94-002788] p 2733 N94-26092
Grain by grain study of the mechanisms of crack propagation during iodine SCC of Zry-4
[DE93-633765] p 2734 N94-26162
Zr-Sn-Nb alloys: Preliminary studies
[DE93-633767] p 2734 N94-26263
Research into the microstructure and mechanical behavior of eutectic Bi-Sn and In-Sn
[DE94-004558] p 2741 N94-27619
Study of the hyperfine magnetic field at Ta-181 site in the Heusler Co2ScSn, Co2ScGa, and Co2HfSn alloys
[DE94-603989] p 3067 N94-27623
The effect of Ti conduit on the critical current in (Nb, Ti)3Sn cable-in-conduit conductors
[DE94-701204] p 2788 N94-27817

TIN OXIDES
Reference electrodes for solid polymer electrolytes
[DE94-004583] p 2780 N94-25806
Zr-rich corner of the Zr-Sn-O diagram
[DE93-633764] p 2734 N94-26161

TISSUES (BIOLOGY)
Autonomous support for microorganism research in space p 2903 N94-25672

TITANIUM
Combustion synthesis method p 2721 N94-25561
Characterization of fatigue damage in a metal matrix composite (SCS-6/Ti-15-3) at elevated temperature
[AD-A273797] p 2706 N94-25876
Investigation of tension-compression fatigue behavior of a cross-ply metal matrix composite at room and elevated temperatures
[AD-A273731] p 2706 N94-25999
Diffusion of substitutional elements in Ti in its hcp phase
[DE93-633762] p 2733 N94-26160
Titanium 1992: Volume 3: Science and technology
[AD-A274800] p 2735 N94-26337
Titanium 1992: Science and technology, volume 2 rence (7th) in san diego, california on june 29-july 2, 1992. Volume 2
[AD-A274799] p 2736 N94-26362
X ray absorption studies of Ti/polymer and Cr/polymer interfaces
[DE94-003008] p 2753 N94-26770
The coordination and atom transfer chemistry of titanium porphyrin complexes
[DE94-003091] p 2704 N94-26779
Technical report of ISSP. Ser. A, no. 2685: ASE-free terawatt KrF/Ti : sapphire hybrid laser system
[JTN-94-80571] p 2820 N94-27339
The effect of Ti conduit on the critical current in (Nb, Ti)3Sn cable-in-conduit conductors
[DE94-701204] p 2788 N94-27817

TITANIUM ALLOYS
Study on the mechanism of titanium alloy toughness and the improvement of properties
p 2726 N94-25566
Study on improvements in fretting fatigue characteristics of high strength structural member p 2726 N94-25567
Study on knowledge extraction and systematization for material design p 2727 N94-25568
Study on improvement in physical analysis method of metallic materials p 2728 N94-25577
Effect of nitrocarburizing on shape of titanium alloy parts
[DE94-004040] p 2732 N94-25822
Titanium 1992: Volume 3: Science and technology
[AD-A274800] p 2735 N94-26337
Titanium 1992: Science and technology, volume 2 rence (7th) in san diego, california on june 29-july 2, 1992. Volume 2
[AD-A274799] p 2736 N94-26362
The influence of energy losses with time in NbTi superconductors in pulsed magnetic fields
[DE93-634761] p 3058 N94-26512
Deformation twinning: Influence of strain rate
[DE94-002693] p 2738 N94-26621
The processing of powder metallurgically produced near gamma-titanium aluminide
[ISBN-0-315-84018-8] p 2738 N94-26633
Evaluation of APC NbTi superconductor in a model dipole magnet
[DE94-003258] p 3060 N94-26795
Titanium 1992: Science and Technology, volume 1
[AD-A274798-VOL-1] p 2739 N94-26799
Material optimization and manufacturing development of reduced cost powder metal titanium alloy components for gas turbine engine application, phase 2
[AD-A274410] p 2709 N94-26978
Formation and crystallization of hydrogen-induced amorphous Ti3InH(4.5) alloy p 2745 N94-28163
The corrosion behavior of sputter-deposited magnesium-valve metal alloys p 2745 N94-28164
CO2 methanation catalysts prepared from amorphous Ni-valve metal alloys containing platinum group elements
p 2745 N94-28166

TITANIUM CARBIDES
Experiment and research on materials irradiated by plasma radiation
[DE94-605011] p 2758 N94-27845
Photoelectron spectroscopic studies of the electronic structure and bonding in TiC and TiN
[ATR-93(8361)-2] p 2746 N94-28185

TITANIUM COMPOUNDS
Study on variation of damage generation mechanism by fatigue on TiAl compounds due to different slip systems p 2729 N94-25579
Development of K(1-x)Na(x)TiOPO4 crystals for nonlinear applications
[AD-A274336] p 3063 N94-27055
Technical report of ISSP. Ser. A, no. 2673: Two successive spin glass transitions in non-diluted Heisenberg-like spin glass Ni(0.42)Mn(0.58) TiO3
[JTN-94-80559] p 2756 N94-27241
Microstructure and mechanical behaviour of L1(2) titanium trialuminides
[ISBN-0-315-84488-4] p 2740 N94-27306

TITANIUM NITRIDES
Combustion synthesis method p 2721 N94-25561
Photoelectron spectroscopic studies of the electronic structure and bonding in TiC and TiN
[ATR-93(8361)-2] p 2746 N94-28185

TITANIUM OXIDES
Electronic structure of a single oxygen vacancy in rutile TiO2
[DE94-602717] p 3062 N94-26901

Technical report of ISSP. Ser. A, no. 2671: Quasi-localization of light waves in Fibonacci dielectric multilayers
[JTN-94-80557] p 3064 N94-27231
Technical report of ISSP. Ser. A, no. 2670: Electronic structure of light transition metal compounds studied by photoemission
[JTN-94-80556] p 3065 N94-27239

TOKAMAK DEVICES
Review of tokamak experiments on direct electron heating and current drive with fast waves
[DE94-004185] p 3041 N94-25801
Heavy neutral beam probe for edge plasma analysis in tokamaks
[DE94-003391] p 3041 N94-25846
Design of folded waveguide antenna for Alcator C-Mod
[DE94-003584] p 2767 N94-25924
RF modeling and design of a folded waveguide launcher for the Alcator C-Mod tokamak
[DE94-003588] p 3041 N94-25933
Evaluation of helium cooling for fusion divertors
[DE94-002680] p 3042 N94-25976
High-speed repetitive pellet injector for plasma fueling of magnetic confinement fusion devices
[DE94-002792] p 3042 N94-26140
Development of fusion technology
[DE93-633444] p 3042 N94-26159
Limitations of power conversion systems under transient loads and impact on the pulsed tokamak power reactor
[DE94-003404] p 3043 N94-26324
Fusion Energy Advisory Committee: Advice and recommendations to the US Department of Energy in response to the charge letter of September 1, 1992
[DE93-019842] p 3043 N94-26428
Numerical simulation of plasma vertical position stabilization in ITER
[DE93-634588] p 3044 N94-26510
Maryland controlled fusion research program
[DE94-003533] p 3044 N94-26523
The dynamics of interacting nonlinearities governing long wavelength driftwave turbulence
[DE94-001785] p 2793 N94-26558
Probability of accessing the multiple saturated states in the resistive interchange instability
[DE94-000478] p 3044 N94-26694
Conceptual design of the tokamak radiation shielding for the Tokamak Physics Experiment (TPX)
[DE94-002791] p 3044 N94-26858
Potential of commercial tokamak reactors with improved physics
[DE94-002794] p 3044 N94-26860
Methodology for first wall design
[DE94-002795] p 3045 N94-26861
The TPX Cryostat Conceptual Design
[DE94-002857] p 3045 N94-26863
New conditioning procedure derived from operating experience with the Common Long-Pulse Ion Source
[DE94-002891] p 3045 N94-26865
Role of core toroidal rotation shear on turbulence and transport in the improved confinement regimes of the D3-D tokamak
[DE94-001215] p 3045 N94-26950
Tokamak Physics Experiment poloidal field design
[DE94-001542] p 3045 N94-27019
Design and control of phased ICRF antenna arrays
[DE94-002796] p 3046 N94-27261
High gas-efficiency hydrogen negative ion sources
[PB93-232163] p 3025 N94-27348
Fast wave current drive technology development at ORNL
[DE94-004243] p 3046 N94-27568
Fusion reactor systems studies
[DE94-003162] p 3046 N94-27686
Cryogenic fracture behavior of 316LN in magnetic fields up to 14.6 T
[DE94-005215] p 2742 N94-27694
Shine through measurements with hydrogen beam in JT-60
[DE94-701113] p 3047 N94-27699
Passive stabilization of MHD instabilities at high (beta)n in the HBT-EP tokamak
[DE94-003317] p 3047 N94-27735
Helium transport and exhaust studies of H-mode discharges in the D3-D tokamak
[DE94-004744] p 3048 N94-27785
Fuel ion rotation measurement and its implications on H-mode theories
[DE94-004860] p 3048 N94-27791
Performance of a 14-MeV neutron generator as an in situ calibration source for TFTR
[DE94-004993] p 3048 N94-27825
Preliminary considerations on the diffraction (quasi-optical) grill in CASTOR tokamak
[IPPCZ-335] p 3048 N94-27842
Determination of the plasma column shape in the Tokamak Novillo cross section by magnetic probes
[DE94-604986] p 3048 N94-27844
Modelling and control of plasma position in the STOR-M tokamak
[ISBN-0-315-58891-8] p 3049 N94-27949

TOLERANCES (MECHANICS)
Damage tolerance assessment handbook. Volume 1: Introduction fracture mechanics fatigue crack propagation
[AD-A274777] p 2836 N94-26186
Damage tolerance assessment handbook. Volume 2: Aircraft damage tolerance evaluation
[AD-A274778] p 2837 N94-26357
Thermoplastic or thermosetting composites in aircrafts
[PB94-123809] p 2710 N94-27253
NASA-UVA light aerospace alloy and structures technology program (LA2ST)
[NASA-CR-195275] p 2844 N94-27851

TOLUENE
Reactivity of nitrate radical (NO3) toward organic compounds p 2704 N94-27387

TOMOGRAPHY
Reconstruction of multiple cracks from experimental electrostatic boundary measurements
[NASA-CR-191584] p 2994 N94-26601
Auroral Tomography Workshop Proceedings
[PB94-123718] p 2881 N94-27040
Experimental verification of tomographic reconstruction of turbulent air flow structure using optical wavefront measurements
[AD-A274392] p 2795 N94-27129
Atomic processes in Inertial Electrostatic Confinement (IEC) devices
[DE94-005015] p 3047 N94-27715

TONGUE
NCVS, volume 5
[AD-A274975] p 2902 N94-27165

TOOLING
Material optimization and manufacturing development of reduced cost powder metal titanium alloy components for gas turbine engine application, phase 2
[AD-A274410] p 2709 N94-26978

TOPEX
TOPEX/Poseidon battery performance during the first year of operation p 2862 N94-28119

TOPOGRAPHY
Correlation between the gravity field and the bathymetry in the North Atlantic Ocean
[ETN-94-95036] p 2899 N94-26108
A preliminary analysis of the US west climatology
[DE94-003028] p 2894 N94-26313
Conifer tree influence on Digital Terrain Elevation Data (DTED): A case study at Dulles International Airport
[AD-A274213] p 2849 N94-27069
Landscape dynamics of northeastern forests
[NASA-CR-195272] p 2852 N94-28070

TOPOLOGY
Surfaces allowing for fractional statistics
[DE93-614526] p 3002 N94-25910
Characterization of self-conjugate minimal surfaces in R(sup 3)
[DE94-601538] p 2993 N94-26409
Topological conditions for the existence of invariant measures for unimodal maps
[PB94-123296] p 2849 N94-26866
Graphs satisfying a local ore-type condition
[PB94-126679] p 3007 N94-27222

TORCHES
Hydrogen-oxygen torch ignitor
[NASA-TM-106493] p 2691 N94-27424

TOROIDAL PLASMAS
Toroidal plasma beta-FLR limit in a toroidally linked mirror system
[DE94-003119] p 3041 N94-25792
Kinetic resonance damping rate of the toroidal ion temperature gradient mode
[DE94-003511] p 3041 N94-25923
Development of fusion technology
[DE93-633444] p 3042 N94-26159
Scaling of sustained ZT-40 M reversed field pinches
[DE94-003318] p 3043 N94-26321
The TPX Cryostat Conceptual Design
[DE94-002857] p 3045 N94-26863
Role of core toroidal rotation shear on turbulence and transport in the improved confinement regimes of the D3-D tokamak
[DE94-001215] p 3045 N94-26950
Tokamak Physics Experiment poloidal field design
[DE94-001542] p 3045 N94-27019
TFTR experimental data analysis collaboration
[DE94-004166] p 3047 N94-27690
Passive stabilization of MHD instabilities at high (beta)n in the HBT-EP tokamak
[DE94-003317] p 3047 N94-27735
Preliminary considerations on the diffraction (quasi-optical) grill in CASTOR tokamak
[IPPCZ-335] p 3048 N94-27842
Determination of the plasma column shape in the Tokamak Novillo cross section by magnetic probes
[DE94-604986] p 3048 N94-27844
Analysis of density limit and efficiency in lower hybrid current drive
[DE94-604995] p 3049 N94-27856

TOROIDS
Electromagnetic properties of a toroidal solenoid
[DE93-613032] p 2766 N94-25866
Experimental results of 40-kA Nb3Al conductor
[DE94-701207] p 2788 N94-27821

TORQUE MOTORS
Reconfigurable aircraft stick control
[AD-D016043] p 2681 N94-27113

TORSION
Simple currents versus orbifolds with discrete torsion: A complete classification
[NIKHEF-H/93-13] p 2995 N94-26812

TORSIONAL VIBRATION
A new method for torsional critical speed calculation of practical industrial rotors
[IMR-T&M-TR-001] p 2828 N94-28041

TORUSES
Affine algebras on the torus
[DE94-601556] p 3006 N94-26414
Higher spin extensions of the Virasoro algebra, area-preserving algebras and the matrix algebra a-bar(sub (infinity))
[DE94-601557] p 3006 N94-26415
The super Weierstrass (zeta)-function and operator product expansions in 2D-induced supergravity on the supertorus
[DE94-603664] p 3074 N94-27627

TOTAL QUALITY MANAGEMENT
Statistical quality management
[MEMO-COSOR-92-43] p 2834 N94-26008
Qualified manufacturing and interoperability for space applications p 2949 N94-26719

TOUGHNESS
Determination of fracture stress and effective crack tip radius from toughness (KIc) and yield strength (Y)
[AD-A274014] p 2836 N94-25754
Numerical simulations of interfacial debonding in ductile-phase reinforced intermetallic matrix composites
[DE94-003639] p 2706 N94-25938
Interface phenomena in metal-ceramic composites
[AD-A274167] p 2709 N94-27125
Testing procedure for toughness characterisation of ceramic matrix composites
[REPT-932-430-101] p 2711 N94-27586

TOWERS
Cooling towers for combined cycles: Design philosophy, performance testing, and operating problems
p 2832 N94-28087

TOWING
Unscreened low tension cables scrape abrasion testing
[PB94-123767] p 2823 N94-26849

TOXIC HAZARDS
Automated in-situ inspection systems for underground storage tanks
[AD-A274644] p 2764 N94-27144

TOXICOLOGY
Proceedings of the symposium on current concepts and approaches on animal test alternatives
[AD-A273926] p 2900 N94-25593
Bakteriella toxiner-morgondagens hot (bacterial toxins-the threat of tomorrow)
[PB94-124229] p 2902 N94-27045

TOXINS AND ANTITOXINS
Bakteriella toxiner-morgondagens hot (bacterial toxins-the threat of tomorrow)
[PB94-124229] p 2902 N94-27045

TRACE CONTAMINANTS
Evaluation of a Canadian minitube air sampling system
[FOA-C-40307-4.6] p 2866 N94-25809
Assessing the climatic effect of carbon dioxide and other trace gases using an interactive two-dimensional climate-chemistry model
[DE94-001741] p 2866 N94-25927

TRACE ELEMENTS
Study on neutron activation analysis
[DE93-632191] p 3017 N94-26116

TRACKING NETWORKS
Real-time tracking with a 3D-flow processor array
[DE94-003981] p 2980 N94-25984

TRACKING STATIONS
Automating satellite range scheduling
[AD-A273829] p 2694 N94-25738

TRADEOFFS
Lunar base habitat designs: Characterizing the environment, and selecting habitat designs for future trade-offs
[NASA-CR-195687] p 2943 N94-27934
TRAFFIC CONTROL
Emerging technologies
[DE94-003022] p 3102 N94-26023
Conception of snow information network system in Yamagata Prefecture p 2853 N94-27991
TRAILERS
Pressurized Lunar Rover (PLR) p 2833 N94-25704
TRAILING EDGES
Effects of crenulations on three dimensional losses in a linear compressor cascade
[AD-A273778] p 2790 N94-25862
Control jets in interaction with hypersonic rarefied flow
p 2698 N94-28020
Program for calculation of maximum lift coefficient of plain aerofoils and wings at subsonic speeds
[ESDU-93015] p 2649 N94-28076
Wing lift increment at zero angle of attack due to deployment of single-slotted flaps at low speeds
[ESDU-93019] p 2649 N94-28140
Potential flow modelling of airfoil stall
p 2654 N94-28332
Attached and separated trailing edge flow measurements with a triple-split hot-film probe
p 2656 N94-28339
TRAINING EVALUATION
Benefits estimation for simulation systems used for aircrew training in a multiship environment
[AD-A274313] p 2938 N94-26882
TRAINING SIMULATORS
Benefits estimation for simulation systems used for aircrew training in a multiship environment
[AD-A274313] p 2938 N94-26882
TRAJECTORIES
On the first integrals of geodesics
[DE93-612974] p 3007 N94-25603
Breakwire technique for hypervelocity measurement
[AD-A274779] p 2809 N94-26358
TRAJECTORY ANALYSIS
A survey of uncontrolled satellite reentry and impact prediction
[AD-A274903] p 2695 N94-26750
TRAJECTORY OPTIMIZATION
Optimal nonlinear estimation for aircraft flight control in wind shear p 2643 N94-27296
Local performance optimization for a class of redundant eight-degree-of-freedom manipulators
[NASA-TP-3417] p 2989 N94-27773
A parametric sensitivity study for single-stage-to-orbit hypersonic vehicles using trajectory optimization
[NASA-CR-195703] p 2697 N94-27789
TRAJECTORY PLANNING
A global approach to kinematic path planning to robots with holonomic and nonholonomic constraints
p 2683 N94-26279
Application of the CIRSSE cooperating robot path planner to the NASA Langley truss assembly problem
p 2683 N94-26280
Adaptive path planning in changing environments
[DE94-003269] p 2985 N94-26462
Dynamic control of kinematically redundant manipulators
[ISBN-0-315-84627-5] p 2825 N94-27344
Local performance optimization for a class of redundant eight-degree-of-freedom manipulators
[NASA-TP-3417] p 2989 N94-27773
A parametric sensitivity study for single-stage-to-orbit hypersonic vehicles using trajectory optimization
[NASA-CR-195703] p 2697 N94-27789
TRANSFER FUNCTIONS
Human visual system enhancement of reconstructed satellite images
[AD-A273867] p 2693 N94-25595
Binaural room simulation
[AD-A273823] p 3009 N94-25737
Using a transfer function to describe the load-balancing problem
[DE94-004218] p 2979 N94-25802
TRANSFER ORBITS
Charge efficiency of Ni/H2 cells during transfer orbit of Telstar 4 satellites p 2862 N94-28117
TRANSFORMATIONS (MATHEMATICS)
Filtering, coding, and compression with Malvar wavelets
[AD-A274055] p 2780 N94-25770
Satellite attitude determination using linear combination of models
[AD-A274082] p 2694 N94-25996
The modal solution to the Moon's orbit using canonical Floquet perturbation theory
[AD-A273732] p 2690 N94-26001
Semantics, orderings and recursion in the weakest precondition calculus
[CWI-CS-R9267] p 2995 N94-26776
The Hough transform algorithm for sea ice lead analysis: An evaluation
[AD-A274535] p 2899 N94-26853
Topological conditions for the existence of invariant measures for unimodal maps
[PB94-123296] p 2849 N94-26866
The morphological processing of binary images
[AD-A274310] p 2996 N94-26972
TRANSFORMERS
Development of fusion technology
[DE93-633444] p 3042 N94-26159
Fiber optic Faraday flux transformer specification
[AD-D016058] p 3039 N94-27674
Plane wave propagation and polarization properties in transversely bianisotropic uniaxial medium
[PB94-132883] p 2778 N94-28380
Eigenwaves in the general uniaxial bianisotropic medium with symmetric parameter dyadics
[PB94-132891] p 2778 N94-28381
Plane wave propagation in an anisotropic chiral medium with isotropic permittivity and permeability
[PB94-133097] p 2778 N94-28384
TRANSIENT LOADS
Structural design feasibility study of Space Station long spacer truss
[NASA-TM-106346] p 2843 N94-27559
TRANSIENT RESPONSE
A transient symmetrical method for the measurement of temperature dependent thermal diffusivity
[VTT-TIED-1452] p 3008 N94-26256
Response of structures to impact loads using elastic and plastic analysis
[ISBN-0-315-84647-X] p 2842 N94-27309
Influence of impeller shroud forces on turbopump rotor dynamics p 2796 N94-27378
Gas Turbine Engine Transient Behaviour
[VKI-LS-1993-06] p 2828 N94-28043
Transient performance p 2828 N94-28045
Transient engine simulation p 2829 N94-28052
TRANSISTOR AMPLIFIERS
Signal amplifier-shapers for multiwire detectors
[DE93-634171] p 2783 N94-26438
NASA satellite communications application research, phase 2 addendum. Efficient high power, solid state amplifier for EHF communications
[NASA-CR-195712] p 2777 N94-27946
TRANSISTOR CIRCUITS
A physics-based heterojunction bipolar transistor model for integrated circuit simulation
[AD-A274081] p 2781 N94-25995
Silicon device performance measurements to support temperature range enhancement
[NASA-CR-195265] p 2844 N94-27824
TRANSISTORS
Advanced qualification techniques
[DE94-003709] p 2780 N94-25812
Demonstration of monolithic co-fabrication of Y1Ba2Cu3O7-Sigma and CMOS devices on the same sapphire substrate
[AD-A274757] p 3059 N94-26566
Processing, fabrication, and demonstration of HTS integrated microwave circuits, appendix A
[AD-A274600] p 2785 N94-26890
TRANSITION
Modal logic, transition systems and processes
[CWI-CS-R9321] p 2970 N94-27549
TRANSITION FLIGHT
Transitional flight characteristics of a geometrically simplified STOVL model p 2672 N94-28035
TRANSITION FLOW
Prediction of leading-edge transition and relaminarization phenomena on a subsonic multi-element high-lift system p 2659 N94-27929
Forced convection heat transfer in straight tubes. Part 2: Laminar and transitional flow
[ESDU-93018-PT-2] p 2807 N94-28139
TRANSITION METALS
Transition metal activation and functionalization of carbon-hydrogen bonds
[DE94-003650] p 2715 N94-26369
Transition metals in highly correlated discotic phases: Designing metallomesogens with selected intermolecular organizations
[AD-A274695] p 2736 N94-26452
TRANSITION POINTS
Transition for three-dimensional, compressible boundary layers p 2653 N94-28327
TRANSITION TEMPERATURE
Microscopic study of local structure and charge distribution in metallic La2CuO(4+delta)
[DE94-003801] p 3050 N94-25817
The effect of processing on the microstructure of Ag-sheathed Bi-2223 wires
[DE94-004627] p 3055 N94-26243
Strongly interacting fermion systems
[DE94-002674] p 3021 N94-26677
TRANSLATING
Satellite attitude determination using linear combination of models
[AD-A274082] p 2694 N94-25996
A strategy for dynamic interpretation: A fragment and an implementation
[CWI-CS-R9317] p 2970 N94-27545
TRANSLATIONAL MOTION
Translation and rotation invariant pattern recognition
[PB94-123676] p 2968 N94-27157
TRANSMISSION ELECTRON MICROSCOPY
Crystal potential retrieval in HRTEM
[DE94-601883] p 3055 N94-26171
An atom probe investigation of the influence of trace impurities on the mechanical behavior of NiAl
[DE94-002797] p 2734 N94-26272
Electron microscopy studies of undoped and phosphorus doped Si:H and Si,C:H films
[DE94-004738] p 3069 N94-27757
TRANSMISSION LINES
Interference analysis of multichannel transmission lines: A system's analysis
[PB94-126505] p 2772 N94-26909
TRANSMISSIONS (MACHINE ELEMENTS)
Study of the kinematic and dynamic characteristics of a wormgear transmission for helicopter applications
[NASA-CR-195287] p 2826 N94-27657
TRANSMITTANCE
Transmittance fluctuations and non-linearity in random chains in the presence of applied electric fields
[DE94-603665] p 2787 N94-27628
TRANSMITTER RECEIVERS
Optoelectronic technology consortium
[AD-A274595] p 3036 N94-26857
Microprocessor chip incorporating optical signal coupling transceiver
[AD-D016077] p 2788 N94-28186
TRANSMITTERS
S-76 high intensity radiated fields, volume 2
[AD-A274572] p 2771 N94-26836
A tri-state optical switch for local area network communications p 2789 N94-27922
TRANSONIC FLIGHT
Numerical investigation of thrust vectoring by injection of secondary air into nozzle flows p 2801 N94-28013
Vortex generators for control of shock-induced separation. Part 3: Examples of applications of vortex generators to aircraft
[ESDU-93026-PT-3] p 2807 N94-28096
TRANSONIC FLOW
An investigation of the effects of the high maximum-thickness-to-chord ratio on the performance of nozzle guide vanes in a transonic planar cascade
[ISBN-0-315-84107-9] p 2793 N94-26671
Influence of the transonic doublet in the farfield of a lifting airfoil
[IAR-AN-78] p 2647 N94-26702
Prediction of undsteady flows in turbomachinery using the linearized Euler equations on deforming grids
[NASA-CR-195285] p 2675 N94-27654
Computation of transonic viscous flow past the NTF 65-degree Delta Wing p 2659 N94-27930
An initial investigation into methods of computing transonic aerodynamic sensitivity coefficients
[NASA-CR-195705] p 2648 N94-28072
Interaction of the sonic boom with atmospheric turbulence p 2650 N94-28191
Measurements of steady and dynamic pressure on an F/A-18 wind tunnel model at high angles of attack
p 2653 N94-28323
Solution-adaptive simulation of transonic cascade flows p 2657 N94-28344
TRANSONIC FLUTTER
Understanding and development of a prediction method of transonic limit cycle oscillation characteristics of fighter aircraft
[NLR-TP-92210-U] p 2679 N94-27798
TRANSONIC SPEED
Investigation of aerodynamic design issues with regions of separated flow p 2658 N94-27902
TRANSONIC WIND TUNNELS
Fiber-optic-based laser vapor screen flow visualization system for aerodynamic research in larger scale subsonic and transonic wind tunnels
[NASA-TM-4514] p 2647 N94-26706
Experimental investigation of the flow quality in the GLT20 subsonic-transonic boundary layer wind tunnel
[PB94-126539] p 2681 N94-26815

The renewing of the test section of the NAL transonic wind tunnel. Part 1: Reconstruction of the 1st corner turning vanes and aerodynamic stress measurement
[NAL-TM-651] p 2681 N94-27247

TRANSPORT AIRCRAFT
The application of a C(star) flight control law to large civil transport aircraft
[CRANFIELD-AERO-9303] p 2676 N94-25640
Supercruiser Arrow HS-8 p 2671 N94-25711
The evolution of the high-speed civil transport
[NASA-TM-109089] p 3117 N94-26155
Optical communications for transport aircraft
p 2643 N94-27298
Techniques to improve maneuver stability characteristics of a nonlinear wide-body transport airplane in cruise flight
[NASA-TM-4521] p 2679 N94-27660
Wing design for a civil tiltrotor transport aircraft: A preliminary study p 2671 N94-27917
Examples of flight path optimisation using a multivariate gradient-search method
[ESDU-93021] p 2670 N94-28092
Examples of excrescence drag prediction for typical wing components of a subsonic transport aircraft at the cruise condition
[ESDU-93032] p 2649 N94-28144

TRANSPORT PROPERTIES
Selfsimilar solutions of a nonlinear transport equation
[REPT-93-42] p 2865 N94-25760
A positive finite-difference advection scheme applied on locally refined grids
[CWI-NM-R9309] p 2867 N94-26216
Recombination and metastability in amorphous silicon and silicon germanium alloys
[DE94-000237] p 2736 N94-26481
A concurrent, multigroup, discrete ordinates model of neutron transport
[DE94-004334] p 3020 N94-26577
Powder synthesis, fabrication, and transport properties of long-length Ag clad Bi-2223 conductors
[DE94-002376] p 2740 N94-26957
Computer simulation and experiments on the quasi-static mechanics and transport properties of granular materials
[AD-A274192] p 2823 N94-27104
Gauge invariance and transport properties in superconductors above T(c)
[DE94-604013] p 3068 N94-27677
On radio frequency wave induced radial transport and wave helicity
[IPPCZ-326] p 2777 N94-27838
On helicon wave induced radial plasma transport
[IPPCZ-333] p 3048 N94-27840

TRANSPORT THEORY
Shear flow generation from the interaction of neoclassical and drift wave transport processes
[DE94-003135] p 2791 N94-26096
Analytical solution of Mori's equation with secant hyperbolic memory
[DE94-601541] p 3006 N94-26368
Pre-orbital criticality safety for the NEPSTP mission
[DE94-002600] p 3005 N94-26802
Refractive and dielectric properties of helium, argon and nitrogen gases
[PB94-123783] p 3008 N94-26851

TRANSPORTATION
The general pickup and delivery problem
[MEMO-COSOR-92-44] p 2992 N94-26226

TRANSPUTERS
A Multitransputer Parallel Processing System (MTPPS)
[DE94-604652] p 2981 N94-26903
Inverted pendulum control apparatus using transputers
[DE94-701224] p 2973 N94-27732

TRANSURANIUM ELEMENTS
Studies of heavy-ion reactions and transuranic nuclei
[DE94-004642] p 3029 N94-27783

TRAPEZOIDS
Trapezoid-oriented compression of run length coded map data
[PB94-123312] p 2849 N94-26848

TRAPPED PARTICLES
Trapped electrons in solid hydrogen
[DE93-018628] p 3052 N94-25947
Antiproton studies in penning traps
[AD-A274250] p 3024 N94-27011

TRAPPING
Hydrogen trapping with Pd coated alloy films
p 2723 N94-25551
Calculations of population transfer during intense laser pulses
[DE94-001060] p 2818 N94-26698

TRAVELING WAVE TUBES
A direct current rectification scheme for microwave space power conversion using traveling wave electron acceleration p 2687 N94-27371

TREES (MATHEMATICS)
Detecting actin fibers in cell images using minimal spanning trees
[AD-A273914] p 2984 N94-25591
Editing tree structures
[CWI-CS-R9264] p 2961 N94-26219
Efficient rebalancing of tree-type main memory dictionaries
[PB94-133105] p 3100 N94-28396

TREES (PLANTS)
SIMA: A model for forest succession based on the carbon and nitrogen cycles with application to silvicultural management of the forest ecosystem
[SILVA-CARELICA-22] p 2848 N94-26258

TRIANGULATION
Construction and applications of the two dimensional Delaunay triangulated irregular network and the three dimensional Delaunay tetrahedron model
[ETN-94-95034] p 2848 N94-26651
A parallel computational fluid dynamics unstructured grid generator
[AD-A274129] p 2795 N94-27119

TRIAXIAL STRESSES
Grain by grain study of the mechanisms of crack propagation during iodine SCC of Zry-4
[DE93-633765] p 2734 N94-26162
Computer simulation and experiments on the quasi-static mechanics and transport properties of granular materials
[AD-A274192] p 2823 N94-27104

TRIGGER CIRCUITS
Use of parallel counters for triggering
[DE93-616656] p 2979 N94-25918
Relativistic heavy ion physics
[DE94-003161] p 3031 N94-26097
Development of fusion technology
[DE93-633444] p 3042 N94-26159

TRITIUM
Spectroscopy and dynamics of molecular and ionic impurities embedded in solid hydrogen
[AD-A274149] p 3064 N94-27095

TROPICAL REGIONS
Interactions between a tropical mixed boundary layer and cumulus convection in a radiative-convective model
[DE94-000848] p 2877 N94-25979
Short-range cloud amount forecasting with model output statistics
[AD-A274769] p 2895 N94-26798
Global barotropic response to a tropical forcing
[NASA-CR-195256] p 2896 N94-27408

TROPICAL STORMS
Development and testing of the Coupled Ocean/Atmosphere Mesoscale Prediction System (COAMPS)
[AD-A273925] p 2892 N94-25793
Tropical cyclone report, 1992
[AD-A274464] p 2896 N94-27025

TRUCKS
UV absorption technique for monitoring mobile source NO emissions
[AD-A273858] p 2713 N94-25964
Processing of wide-angle synthetic aperture radar signals for target detection
[AD-A274225] p 2773 N94-27073

TRUSSES
Identification and H(infinity)/(mu)-synthesis control of the Sandia truss
[DE94-002735] p 2839 N94-26810
Behaviour modification of space trusses
[ISBN-0-315-84701-8] p 2842 N94-27315
Report of three microgravity experiments by the drop shaft
[JTN-94-80579] p 2761 N94-27341
Structural design feasibility study of Space Station long spacer truss
[NASA-TM-106346] p 2843 N94-27559
Reliability-based structural optimization: A proposed analytical-experimental study
[NASA-TM-109055] p 2844 N94-27830

TUBES
Porous vycor glass tube joined to borosilicate glass
p 2718 N94-27392

TUNABLE LASERS
Broad band tunable dye laser development
[DE93-632978] p 2816 N94-26157
Fiber laser amplifiers and oscillators
[AD-A274231] p 2820 N94-28068

TUNGSTEN
Stress relaxation in sputtered W films and W/GeSi/Si heterostructures
[DE94-004007] p 3055 N94-26239
The deformation of copper-tungsten composites
[ISBN-0-315-84939-8] p 2712 N94-27688

TUNGSTEN ALLOYS
Chemical vapor deposition and characterization of tungsten boron alloy films
[DE94-002648] p 2738 N94-26810

A transmission electron microscope study of Ni4W precipitates in a Ni-37 wt. percent W alloy
[ISBN-0-315-59932-4] p 2743 N94-27803

TUNING
Sum frequency generation using an optical parametric oscillator
[DE94-001827] p 3040 N94-28000

TUNNEL DIODES
Investigation of ACC/CCI tunnel diodes
[AD-A274549] p 2785 N94-26845

TURBINE BLADES
Wake passage effects on the losses in a linear turbine cascade
[AD-A273794] p 2790 N94-25874
An investigation of the effects of the high maximum-thickness-to-chord ratio on the performance of nozzle guide vanes in a transonic planar cascade
[ISBN-0-315-84107-9] p 2793 N94-26671
Thermal/structural tailoring of engine blades (T/STAEBL). User's manual
[NASA-CR-194463] p 2839 N94-26692
Thermal/Structural Tailoring of Engine Blades (T/STAEBL): User's manual
[NASA-CR-194461] p 2843 N94-27776
Analysis of cooling jets near the leading edge of turbine blades p 2676 N94-28037
Effect of surface finish on turbine airfoil cascade losses p 2652 N94-28320
The effect of axial velocity ratio, turbulence intensity, incidence, and leading edge geometry on the midspan performance of a turbine cascade p 2652 N94-28321

TURBINE ENGINES
Aircraft turbine engine reliability and inspection investigations
[AD-A274860] p 2673 N94-26176

TURBINE PUMPS
Experimental contribution to the study of secondary flows in centrifugal turbopump stator components
[ECL-92-35] p 2789 N94-25654
Test results of the RS-44 integrated component evaluator liquid oxygen/hydrogen rocket engine
[NASA-CR-194443] p 2701 N94-26231
Pump CFD code validation tests
[NASA-CR-193939] p 2822 N94-26597
Orbital transfer vehicle engine technology high velocity ratio diffusing crossover
[NASA-CR-194447] p 2703 N94-27212
Enhanced simulation software for rocket turbopump, turbulent, annular liquid seals
[NASA-CR-195239] p 2825 N94-27383
Space Shuttle main engine turbopump bearing assessment program
[NASA-TM-108447] p 2833 N94-28265

TURBINE WHEELS
Streamwise vorticity in a turbine rotor with conical endwalls
[DLR-FB-93-13] p 2826 N94-27591

TURBINES
Wake passage effects on the losses in a linear turbine cascade
[AD-A273794] p 2790 N94-25874
Program to develop a performance and heat load prediction system for multistage turbines
[NASA-CR-195223] p 2674 N94-26588

TURBOCOMPRESSORS
Effects of crenulations on three dimensional losses in a linear compressor cascade
[AD-A273778] p 2790 N94-25862
An investigation of the surge behavior of a high-speed ten-stage axial flow compressor
[AD-A274910] p 2674 N94-26345
Laser Doppler velocimetry in a low speed multistage compressor
[AD-A274836] p 2818 N94-26498
Development of advanced high temperature in-cylinder components and tribological systems for low heat rejection diesel engines, phase 1
[NASA-CR-187158] p 2827 N94-27984
Gas-turbine engine steady-state behavior
p 2828 N94-28044

TURBOFAN AIRCRAFT
Design of the advanced regional aircraft, the DART-75
p 2671 N94-25708

TURBOFAN ENGINES
The design of a long-range megatransport aircraft
p 2671 N94-25718
Simulating indirect thrust measurement methods as used on modern high-bypass turbofans
[ISBN-0-315-84123-0] p 2674 N94-26673
Experimental and theoretical investigations of the influence of the jet on the flow around a bypass-engine
[DLR-FB-93-17] p 2675 N94-27593
Broad specification fuels combustion technology program, phase 2
[NASA-CR-191066] p 2719 N94-27854

TURBOFANS

Experimental and theoretical investigations of the influence of the jet on the flow around a bypass-engine [DLR-FB-93-17] p 2675 N94-27593

Coupled 2-dimensional cascade theory for noise an d unsteady aerodynamics of blade row interaction in turbofans. Volume 2: Documentation for computer code CUP2D [NASA-CR-4506-VOL-2] p 2675 N94-27778

Gas-turbine engine steady-state behavior p 2828 N94-28044

TURBOMACHINE BLADES

Streamwise vorticity in a turbine rotor with conical endwalls [DLR-FB-93-13] p 2826 N94-27591

Development of the gas turbine. Part 2: Manufacturing, commissioning, and operation p 2831 N94-28081

TURBOMACHINERY

Optical surface contouring for non-destructive inspection of turbomachinery [NASA-CR-195245] p 2835 N94-26691

Orbital transfer rocket engine technology 7.5K-LB thrust rocket engine preliminary design [NASA-CR-190754] p 2703 N94-27213

Prediction of undsteady flows in turbomachinery using the linearized Euler equations on deforming grids [NASA-CR-195285] p 2675 N94-27654

TURBOPROP AIRCRAFT

Piloted simulation study of an ILS approach of a twin-pusher business/commuter turboprop aircraft configuration [NASA-TM-4516] p 2646 N94-26602

TURBOPROP ENGINES

Eagle RTS: A design of a regional transport p 2671 N94-25709

TURBULENCE

Numerical simulation of tomographic reconstruction for the study of turbulence using optical wavefront sensor measurements [AD-A273851] p 2789 N94-25587

The identification of inflow fluid dynamics parameters that can be used to scale fatigue loading spectra of wind turbine structural components [DE94-000231] p 2791 N94-26117

Feature isolation and quantification of evolving datasets [NASA-CR-195230] p 2961 N94-26207

Predictive modeling of particle-laden, turbulent flows [DE94-003298] p 2792 N94-26319

Potential capabilities of Reynolds stress turbulence model in the COMMIX-RSM code [DE94-003716] p 2792 N94-26331

Experimental verification of tomographic reconstruction of turbulent air flow structure using optical wavefront measurements [AD-A274392] p 2795 N94-27129

Orbital transfer vehicle engine technology high velocity ratio diffusing crossover [NASA-CR-194447] p 2703 N94-27212

Simulating high-frequency wind for long durations [DE94-002739] p 2682 N94-27997

Unsteady aspects of hot gas reingestion and statistical analysis p 2676 N94-28019

Calculation of single and multiple jets in cross-flow with and without impingement using Reynolds-stress-transport closure p 2803 N94-28024

Predictions of momentum and scalar fields in a jet in cross-flow using first and second order turbulence closures p 2803 N94-28025

Effects of free-stream turbulence on a jet in a cross flow p 2805 N94-28036

Analysis of cooling jets near the leading edge of turbine blades p 2676 N94-28037

Lift-curve slope for structural response calculations [ESDU-93013] p 2648 N94-28063

A modelling of the noise from simple coaxial jets. Part 3: With hot primary flow [ISVR-TR-230-PT-3] p 2807 N94-28173

Sonic boom propagation through turbulence: A ray theory approach p 2650 N94-28192

TURBULENCE EFFECTS

Shear flow generation from the interaction of neoclassical and drift wave transport processes [DE94-003135] p 2791 N94-26096

Topics in longshore currents [AD-A274788] p 2899 N94-26361

Modelling atmospheric turbulence effects on ground-based telescope systems [DE94-004211] p 3102 N94-26528

Experimental verification of tomographic reconstruction of turbulent air flow structure using optical wavefront measurements [AD-A274392] p 2795 N94-27129

Effects of free-stream turbulence on a jet in a cross flow p 2805 N94-28036

TURBULENCE MODELS

Performance of renormalization group algebraic turbulence model on boundary layer transition simulation [NASA-CR-194466] p 2644 N94-26131

Potential capabilities of Reynolds stress turbulence model in the COMMIX-RSM code [DE94-003716] p 2792 N94-26331

The nonlinear Galerkin method: A multi-scale method applied to the simulation of homogeneous turbulent flows [NASA-CR-191581] p 2792 N94-26499

A rapid-pressure correlation representation consistent with the Taylor-Proudman theorem materially-frame-indifferent in the 2D limit [NASA-CR-191591] p 2796 N94-27435

A comprehensive comparison of turbulence models in the far wake p 2808 N94-27899

Computational and Experimental Assessment of Jets in Cross Flow [AGARD-CP-534] p 2799 N94-28003

A numerical investigation of a subsonic jet in a crossflow p 2803 N94-28023

Theoretical and experimental investigation of a delta wing with turbulent leading-edge jets p 2659 N94-28029

Navier-Stokes analysis of a swirling jet in crossflow p 2806 N94-28038

Sonic boom propagation through turbulence: A ray theory approach p 2650 N94-28192

TURBULENT BOUNDARY LAYER

A study on structure of benthic boundary layer in coastal waters [REPT-4] p 2898 N94-25635

Experimental investigation of the flow quality in the GLT20 subsonic-transonic boundary layer wind tunnel [PB94-126539] p 2681 N94-26815

Turbulent boundary layer inner-outer interactions [AD-A274357] p 2794 N94-27059

Flowfield dynamics in blunt fin-induced shock wave/turbulent boundary layer interactions [NASA-CR-195170] p 2798 N94-27802

An experimental study of siphonal jets in a turbulent boundary layer crossflow p 2802 N94-28015

Pneumatic management of blunted-forebody flow asymmetry for high-angle-of-attack directional control p 2679 N94-28028

On the use of feedback to control sound radiation from a plate excited by a turbulent boundary layer [ISVR-TR-227] p 2807 N94-28175

TURBULENT COMBUSTION

High resolution measurements of mixing and reaction processes in turbulent flows [AD-A274970] p 2793 N94-26534

TURBULENT FLOW

Numerical simulation of tomographic reconstruction for the study of turbulence using optical wavefront sensor measurements [AD-A273851] p 2789 N94-25587

The high Reynolds number flow through an axial-flow pump [AD-A273844] p 2789 N94-25604

The identification of inflow fluid dynamics parameters that can be used to scale fatigue loading spectra of wind turbine structural components [DE94-000231] p 2791 N94-26117

Predictive modeling of particle-laden, turbulent flows [DE94-003298] p 2792 N94-26319

Potential capabilities of Reynolds stress turbulence model in the COMMIX-RSM code [DE94-003716] p 2792 N94-26331

On prediction of equilibrium states in homogeneous compressible turbulence [NASA-CR-4570] p 2792 N94-26467

The nonlinear Galerkin method: A multi-scale method applied to the simulation of homogeneous turbulent flows [NASA-CR-191581] p 2792 N94-26499

High resolution measurements of mixing and reaction processes in turbulent flows [AD-A274970] p 2793 N94-26534

Validated heat-transfer and pressure-drop prediction methods based on the discrete-element method. Phase 2: Two-dimensional rib roughness [DE94-002379] p 2794 N94-26763

Numerical studies on the dynamics of bubble, turbulent, free shear flows: Effect of the inter-phase coupling on the global flow evolution [AD-A274521] p 2794 N94-26832

Experimental verification of tomographic reconstruction of turbulent air flow structure using optical wavefront measurements [AD-A274392] p 2795 N94-27129

A rapid-pressure correlation representation consistent with the Taylor-Proudman theorem materially-frame-indifferent in the 2D limit [NASA-CR-191591] p 2796 N94-27435

The numerical calculation of laminar and turbulent flows using penalty function finite volume methods [ISBN-0-315-61377-7] p 2799 N94-27947

Predictions of momentum and scalar fields in a jet in cross-flow using first and second order turbulence closures p 2803 N94-28025

Recent developments in the simulation of steady and transient transverse jet interactions for missile, rotorcraft, and propulsive applications p 2804 N94-28030

Numerical assessment of aerodynamic interactions on missiles with transverse jets control p 2659 N94-28031

Analysis of cooling jets near the leading edge of turbine blades p 2676 N94-28037

Navier-Stokes analysis of a swirling jet in crossflow p 2806 N94-28038

Experimental study on the interactions between a transverse heated supersonic jet and an external supersonic flow p 2659 N94-28039

Calculation methods for steadily loaded axial groove hydrodynamic journal bearings (guide to use of computer program A9305) [ESDU-93005] p 2830 N94-28074

Calculation methods for steadily loaded axial groove hydrodynamic journal bearings. Low viscosity process fluid lubrication (guide to use of computer program A9306) [ESDU-93006] p 2830 N94-28075

Forced convection heat transfer in straight tubes. Part 2: Laminar and transitional flow [ESDU-93018-PT-2] p 2807 N94-28139

Journal of NIRE, volume 2, number 4 [JTN-94-80554] p 2869 N94-28147

Numerical simulation of turbulent free jet by TFKE model p 2871 N94-28157

Attached and separated trailing edge flow measurements with a triple-split hot-film probe p 2656 N94-28339

A study of blunt trailing edge airfoils using the Navier Stokes code: ARC2D p 2656 N94-28340

Multigrid solutions of the 2D Euler/Navier-Stokes equations on unstructured meshes p 2658 N94-28349

TURBULENT JETS

Theoretical and experimental investigation of a delta wing with turbulent leading-edge jets p 2659 N94-28029

Experimental study on the interactions between a transverse heated supersonic jet and an external supersonic flow p 2659 N94-28039

TURBULENT MIXING

Topics in longshore currents [AD-A274788] p 2899 N94-26361

High resolution measurements of mixing and reaction processes in turbulent flows [AD-A274970] p 2793 N94-26534

TURBULENT WAKES

A comprehensive comparison of turbulence models in the far wake p 2808 N94-27899

TVD SCHEMES

Arbitrary-order high resolution schemes for model hyperbolic conservation laws [CRANFIELD-AERO-9209] p 3005 N94-25823

TVD flux-difference split methods for high-speed thermochemical nonequilibrium flows with strong shocks [UTIAS-350] p 2799 N94-27880

TWINNING

Radiation hardening effects on localized deformation and stress corrosion cracking of stainless steels [DE94-004308] p 2731 N94-25804

Cracking of textured zinc coating during forming process [DE94-003414] p 2750 N94-26085

TWO BODY PROBLEM

Relativistic two-body system in 1+1-dimensional QED. 1: On the circle S1 [DE94-603716] p 3067 N94-27647

TWO DIMENSIONAL BODIES

Surfaces allowing for fractional statistics [DE93-614526] p 3002 N94-25910

Research on bluff body vortex wakes [AD-A273780] p 2796 N94-27319

TWO DIMENSIONAL FLOW

Nominally 2-dimensional flow about a normal flat plate [AD-A274472] p 2794 N94-27026

Parallel implicit unstructured grid Euler solvers [NASA-CR-191594] p 2999 N94-27434

High-lift system analysis method using unstructured meshes [NLR-TP-92351-U] p 2647 N94-27554

A study on heat transfer in a scramjet leading edge model [NAL-TR-1187T] p 2675 N94-27608

A comprehensive comparison of turbulence models in the far wake p 2808 N94-27899

Comparison of the interactions of two and three dimensional transverse jets with a hypersonic free stream p 2659 N94-28021

Navier-Stokes simulation of two and three dimensional jets in crossflow, effects of grid, and boundary conditions p 2804 N94-28026

Experimental investigations into the wall interference and sidewall boundary layer effects in the National Research Council/Inst. for Aerospace Research High Reynolds Number 2-D Test Facility p 2658 N94-28350

Computation of wind-tunnel side-wall interference using 3D Navier-Stokes code p 2658 N94-28351

TWO DIMENSIONAL MODELS

Assessing the climatic effect of carbon dioxide and other trace gases using an interactive two-dimensional climate-chemistry model
[DE94-001741] p 2866 N94-25927

Two dimensional self-consistent fluid simulation of RF inductive sources
[DE94-003635] p 2767 N94-25937

Crossover between BCS and performed-Boson theories with increasing interactions
[DE93-019018] p 3017 N94-26078

Ising critical behaviour in the one-dimensional frustrated quantum XY model
[DE93-634755] p 3057 N94-26390

Interacting cortical filters for object recognition
[PB94-125374] p 2938 N94-26873

Orientation competition in cortical filters
[PB94-125366] p 2939 N94-27001

A note on Riemannian 2-space
[DE94-602560] p 3073 N94-27024

TWO FLUID MODELS

Predictive modeling of particle-laden, turbulent flows
[DE94-003298] p 2792 N94-26319

An experimental study of plunging liquid jet induced air carryunder and dispersion
[AD-A274414] p 2794 N94-26979

Numerical simulation of turbulent free jet by TFKE model p 2871 N94-28157

TWO PHASE FLOW

Interfacial area and interfacial transfer in two-phase flow
[DE93-041226] p 2792 N94-26468

Gravity dependence or pressure drop and heat transfer in straight two-phase heat transport system condenser ducts
[NLR-TP-92167-U] p 2798 N94-27853

TWO STAGE TURBINES

Design and experimental performance of a two stage partial admission turbine. Task B.1/B.4
[NASA-CR-179548] p 2824 N94-27228

U

U.S.S.R.

Microbiology research at some research institutes in the former Soviet Union: A survey of scientific publications
[PB94-123320] p 2902 N94-27171

ULTRAHIGH FREQUENCIES

Extension of On-Surface Radiation Condition (OSRC) theory to full-vector electromagnetic wave scattering by three-dimensional conducting, dielectric, and coated targets
[AD-A274023] p 2766 N94-25757

Comparative investigation of high-latitude ionospheric structure and effects near solar maximum
[AD-A273799] p 2877 N94-25877

VHF-UHF noise surveys at Gulkana, Elmensdorf AFB, Galena AFB, Kotzebue and Cape Lisburne, Alaska and NRL, Pomonkey, Maryland
[PL-TR-93-2136] p 2777 N94-28211

ULTRAHIGH VACUUM

R and D for creation, measurement, application of ultra-high vacuum p 2723 N94-25549

Study on utilization of super clean, high vacuum space p 2682 N94-25586

Inert strength of pristine silica glass fibers
[DE94-004685] p 2750 N94-26247

The reactivity of lithium toward non-aqueous solvents of relevance to energy storage applications as studied by surface analytical techniques
[DE94-003483] p 2856 N94-26464

ULTRASONIC RADIATION

DUSOL: Improved software for analysis of ultrasonic velocity data on anisotropic materials
[NPL-DMM(A)-104] p 2965 N94-26816

ULTRASONIC TESTS

Non-contact ultrasonic inspection
[VTT-TIED-1454] p 2835 N94-26257

An ultrasonic testing technique for monitoring the cure and mechanical properties of polymeric materials
[AD-A274536] p 2753 N94-26842

Automated in-situ inspection systems for underground storage tanks
[AD-A274644] p 2764 N94-27144

Ultrasonic measurement technique to determine the state of cure in thermosetting materials
[PB94-124328] p 2756 N94-27217

ULTRASONICS

An ultrasonic testing technique for monitoring the cure and mechanical properties of polymeric materials
[AD-A274536] p 2753 N94-26842

ULTRAVIOLET ABSORPTION

UV absorption technique for monitoring mobile source NO emissions
[AD-A273858] p 2713 N94-25964

In situ Mars ozone detector p 3108 N94-27892

ULTRAVIOLET ASTRONOMY

Ultraviolet observations of astronomical sources
[NASA-CR-195232] p 3102 N94-26234

ULTRAVIOLET EMISSION

Weak bump quasars
[NASA-CR-195267] p 3103 N94-27933

ULTRAVIOLET FILTERS

Discrete vacuum ultra violet reflective interference filter
[AD-D016059] p 2756 N94-27675

ULTRAVIOLET PHOTOMETRY

Characterization of the energy deposition produced by the primary electron beam on the EXCEDE 3 program
[AD-A274453] p 3033 N94-27084

In situ Mars ozone detector p 3108 N94-27892

ULTRAVIOLET RADIATION

Numerical analysis of the photo-dissociation/radical oxidation of formaldehyde by ultraviolet light in a photolytic reactor
[AD-A274539] p 2868 N94-26843

Initial ultraviolet-B intensity data at Lawrence Livermore National Laboratory
[DE94-004279] p 2869 N94-27267

Sum frequency generation using an optical parametric oscillator
[DE94-001827] p 3040 N94-28000

ULTRAVIOLET SPECTRA

Sulfur dioxide in the atmosphere of Venus 1 sounding rocket observations
[NASA-CR-195224] p 3106 N94-26237

Solar and airglow measurements aboard the two suborbital flights NASA 36.098 and 36.107
[NASA-CR-195279] p 2882 N94-27380

Analysis of EUV/FUV dayglow and auroral measurements
[NASA-CR-195237] p 2883 N94-27393

Probing the Martian atmosphere in the ultraviolet p 3108 N94-27890

How well was total ozone abundance inferred with Mariner 9? p 3108 N94-27891

ULTRAVIOLET SPECTROMETERS

Reanalysis of Mariner 9 UV Spectrometer Data for Ozone, Cloud, and Dust Abundances, and Their Interaction Over Climate Timescales
[NASA-CR-195244] p 3107 N94-27885

Probing the Martian atmosphere in the ultraviolet p 3108 N94-27890

How well was total ozone abundance inferred with Mariner 9? p 3108 N94-27891

ULTRAVIOLET SPECTROSCOPY

Reanalysis of Mariner 9 UV Spectrometer Data for Ozone, Cloud, and Dust Abundances, and Their Interaction Over Climate Timescales
[NASA-CR-195244] p 3107 N94-27885

Mars ozone: Mariner 9 revisited p 3107 N94-27888

UMKLAPP PROCESS

Window least squares method applied to statistical noise smoothing of positron annihilation data
[DE93-634665] p 3003 N94-26385

Fermi surface ridge at second and third Umklapp positron annihilations in Y Ba2Cu3O(7-delta)
[DE93-634760] p 3070 N94-27995

UNCAMBERED WINGS

Normal force of low aspect ratio cropped-delta wings at pre-stall angles of attack and subsonic speeds
[ESDU-93034] p 2648 N94-27955

UNCONSCIOUSNESS

Performance recovery in the baboon following (+)G sub z-induced loss of consciousness
[AD-A274411] p 2902 N94-26991

UNCONTROLLED REENTRY (SPACECRAFT)

A survey of uncontrolled satellite reentry and impact prediction
[AD-A274903] p 2695 N94-26750

UNDERGROUND STORAGE

Automated in-situ inspection systems for underground storage tanks
[AD-A274644] p 2764 N94-27144

UNDERWATER ACOUSTICS

Problems in nonlinear acoustics: Rayleigh waves, pulsed sound beams, and waveguides
[AD-A274587] p 3010 N94-26983

Hydroacoustic wave-fields generated by different source types, a computational study
[PB94-123536] p 3010 N94-27037

UNDERWATER EXPLOSIONS

An improvement in the modified finite element procedure for underwater shock analysis
[DE94-004451] p 2797 N94-27617

UNDERWATER VEHICLES

Telepresence in the human exploration of Mars: Field studies in analog environments p 2685 N94-27360

UNIFORM FLOW

Flow past a circular cylinder with a permeable wake splitter plate
[AD-A273765] p 2790 N94-25872

UNIQUENESS

Approximate solution of the fourth order initial value problem using deficient spline polynomials
[DE93-613023] p 2991 N94-25880

UNITED NATIONS

Contributions to CD Space Committee 1992
[PB94-124401] p 3101 N94-27218

UNIVERSE

The meaning of EROS/MACHO
[DE94-003003] p 3104 N94-26311

A cosmological field theory
[ISBN-0-315-84271-7] p 3104 N94-26638

Cosmological phase transitions
[DE94-003001] p 3104 N94-26786

Pigs in cyberspace p 2689 N94-27376

Cosmic no-hair in Brans-Dicke theory
[DE94-603673] p 3074 N94-27636

UNIVERSITIES

Federal Information Exchange (FEDIX) user's guide: Fall 1993, Version 5.0/Release 1.0
[DE94-003826] p 3097 N94-26350

Selected data on Federal support to universities and colleges: FY 1991
[NSF-93-320] p 3101 N94-28201

UNIVERSITY PROGRAM

MINOTAUR (Maryland's innovative orbital technologically advanced University rocket) p 2703 N94-25685

The 1991-1992 walking robot design p 2833 N94-25686

FAA/NASA Joint University Program for Air Transportation Research, 1992-1993
[NASA-CP-3246] p 2641 N94-27284

An investigation of air transportation technology at the Massachusetts Institute of Technology, 1992-1993 p 2641 N94-27285

Investigation of air transportation technology at Ohio University, 1992-1993 p 2642 N94-27288

Investigation of air transportation technology at Princeton University, 1992-1993 p 2643 N94-27294

University program management information system, FY 1993
[NASA-TM-109719] p 3100 N94-27413

The 1993 NASA-ODU American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program
[NASA-CR-191544] p 3085 N94-27893

Selected data on Federal support to universities and colleges: FY 1991
[NSF-93-320] p 3101 N94-28201

UNMANNED SPACECRAFT

Low-cost unmanned lunar lander p 2697 N94-25699

UNSTEADY AERODYNAMICS

A finite wake theory for two-dimensional rotary wing unsteady aerodynamics
[AD-A274921] p 2645 N94-26535

Methods in unsteady aerodynamics
[DLR-FB-93-21] p 2648 N94-27741

Coupled 2-dimensional cascade theory for noise an d unsteady aerodynamics of blade row interaction in turbofans. Volume 2: Documentation for computer code CUP2D
[NASA-CR-4506-VOL-2] p 2675 N94-27778

Understanding and development of a prediction method of transonic limit cycle oscillation characteristics of fighter aircraft
[NLR-TP-92210-U] p 2679 N94-27798

Multidisciplinary aeroelastic analysis of a generic hypersonic vehicle
[NASA-TM-4544] p 2691 N94-27868

Interaction of the sonic boom with atmospheric turbulence p 2650 N94-28191

UNSTEADY FLOW

Dynamic response of a compressor research facility
[AD-A273836] p 2679 N94-25740

Laser Doppler velocimetry in a low speed multistage compressor
[AD-A274836] p 2818 N94-26498

Program to develop a performance and heat load prediction system for multistage turbines
[NASA-CR-195223] p 2674 N94-26588

Prediction of undsteady flows in turbomachinery using the linearized Euler equations on deforming grids
[NASA-CR-195285] p 2675 N94-27654

Flowfield dynamics in blunt fin-induced shock wave/turbulent boundary layer interactions
[NASA-CR-195170] p 2798 N94-27802

Unsteady wake structures in transverse jets
p 2800 N94-28006

Localized and distributed boundary-layer receptivity to convected unsteady wake in free stream
[NASA-CR-4578] p 2808 N94-28180

Calculation of unsteady incompressible inviscid flow about wings and bodies using CANAERO-T panel model
p 2655 N94-28334

Techniques for accurately solving unsteady shock waves and contact discontinuities p 2656 N94-28342

Unsteady three dimensional Euler solutions on moving grids p 2657 N94-28347

Recent advances in the spectral element method
p 2657 N94-28348

UPPER ATMOSPHERE

Properties of the Central American cold surge
[NASA-CR-194849] p 2893 N94-26138

Upper atmosphere neutral and plasma density modeling
[AD-A274768] p 2879 N94-26569

Kiruna geophysical data. Data summary 93/4-6, April-June 1993
[PB94-123700] p 2881 N94-27039

Kiruna geophysical data. Data summary 93/1-3, January-March, 1993
[PB94-123791] p 2881 N94-27043

JARE data reports. No. 186: Upper atmosphere physics data. Syowa and Asuka Stations, 1990
[JTN-94-80594] p 2881 N94-27299

UPPER ATMOSPHERE RESEARCH SATELLITE (UARS)

Nickel cadmium battery operations on-orbit: Trials, tribulations, and success on the Upper Atmosphere Research Satellite p 2862 N94-28120

UPSTREAM

Wake passage effects on the losses in a linear turbine cascade
[AD-A273794] p 2790 N94-25874

UPWIND SCHEMES (MATHEMATICS)

A robust upwind discretization method for advection, diffusion and source terms
[CWI-NM-R9308] p 2868 N94-26774

URANIUM

Structure and phase transformations in uranium metal
[DE94-003892] p 2732 N94-26004

Deviatoric stresses and plastic strain rates in strong shock waves for six metals
[DE94-002964] p 2733 N94-26022

Unsegmented electromagnetic calorimeter prototype. Energy and coordinate resolution
[DE93-634185] p 2810 N94-26396

URANIUM COMPOUNDS

Study on synthesis and characteristics of intermetallic compound with strong electron correlation
p 2726 N94-25563

Heavy-electron behavior in large coordination compounds CeZn11 and UZn12
[REPT-A-2663] p 3049 N94-25614

Technical report of ISSP. Ser. A, no. 2683: Itinerant character of 5f electrons in UNi2Ga
[JTN-94-80569] p 3025 N94-27337

URETHANES

Dual cure low-VOC coating process
[DE94-000365] p 2756 N94-27611

URINALYSIS

Changes in fluid and electrolyte metabolism during water immersion at high or thermoneutral temperature
p 2912 N94-27445

URINE

Changes in circadian variations of urine excretion in tail-suspended rats p 2911 N94-27443

USER MANUALS (COMPUTER PROGRAMS)

Naval Interactive Data Analysis System (NIDAS), software user's manual
[NASA-CR-195179] p 2956 N94-25606

INM, Integrated Noise Model. Version 4.11: User's guide, supplement
[AD-A273885] p 3009 N94-25731

EcarHeart2 version 1.0: Programmers documentation
[PB94-124633] p 2909 N94-25909

EGADS: A microcomputer program for estimating the aerodynamic performance of general aviation aircraft
[NASA-TM-104013] p 2667 N94-26091

Laser altimetry simulator. Version 3.0: User's guide
[NASA-TM-104588] p 2877 N94-26152

Red's natural editor: A program designed to edit FORTRAN programs
[DE94-003271] p 2962 N94-26318

OPM Scheme Editor 2: A graphical editor for specifying object-protocol structures
[DE94-003477] p 2962 N94-26327

Federal Information Exchange (FEDIX) user's guide: Fall 1993, Version 5.0/Release 1.0
[DE94-003826] p 3097 N94-26350

The Chaco user's guide
[DE94-003669] p 2962 N94-26370

Users manual for CATNIP: A Computer Analysis Tool for Normal Impact Penetration
[DE94-003671] p 2962 N94-26371

Software Error Estimation Program (SWEEP), version 02.00.00 user manual
[AD-A274697] p 2962 N94-26373

User's guide for the frequency domain algorithms in the LIFE2 fatigue analysis code
[DE94-004678] p 2838 N94-26563

Bathymetric data set extraction program. Users guide
[AD-A274761] p 2899 N94-26567

Thermal/structural tailoring of engine blades (T/STAEBL). User's manual
[NASA-CR-194463] p 2839 N94-26692

New FORTRAN computer programs to acquire and process isotopic mass spectrometric data: Operator's manual
[DE94-003174] p 2965 N94-26784

The NOGAPS ten year AMIP integration
[AD-A274332] p 2900 N94-26887

An XCP user's guide and reference manual
[AD-A274519] p 2900 N94-27090

Ma42: A new frontal code for solving sparse unsymmetric systems
[PB94-124302] p 2998 N94-27115

Radar cross section visualization using sample buffer progressive refinement volume rendering
[AD-A274179] p 2773 N94-27127

Users guide for GRIKURV: A code for drawing graphs
[PB94-123593] p 2968 N94-27154

Computer code for controller partitioning with IFPC application: A user's manual
[NASA-CR-195291] p 2678 N94-27414

Modulation Simulation Program: Programmer's manual, version 1.00
[DREO-16] p 2973 N94-27761

ACES spectral display software: User manual
[SKL-1600-99-002] p 2973 N94-27762

Thermal/Structural Tailoring of Engine Blades (T/STAEBL): User's manual
[NASA-CR-194461] p 2843 N94-27776

Coupled 2-dimensional cascade theory for noise an d unsteady aerodynamics of blade row interaction in turbofans. Volume 2: Documentation for computer code CUP2D
[NASA-CR-4506-VOL-2] p 2675 N94-27778

Modulation Simulation Program: Operator's manual, version 1.00
[DREO-16] p 2975 N94-27951

USER REQUIREMENTS

A comparison of users' and providers' perceptions of critical spacelift vehicle characteristics and capabilities
[AD-A273907] p 2691 N94-26017

Design of an online help facility for ExSpect
[PB94-126687] p 2966 N94-26955

Interactive control of a parallel simulation from a remote graphics workstation
[AD-A274217] p 2981 N94-27070

Reinventing information services to increase customer satisfaction
[DE94-003718] p 3100 N94-27563

Human computer interface guide, revision A
[NASA-TM-109708] p 2955 N94-27769

UTILITIES

Solar resource-utility load matching assessment: NREL photovoltaic project summary
[DE94-000232] p 2856 N94-26480

High temperature solid oxide fuel cell: Customer test units
[DE94-002961] p 2858 N94-26869

UTILIZATION

Biomedical polyurethane networks
[ETN-94-95391] p 2750 N94-26211

V

V/STOL AIRCRAFT

Optimal control of helicopters following power failure
[NAL-TR-1190] p 2678 N94-27206

Vectored jets-induced interference on aircraft, prediction and verification p 2801 N94-28012

Influence of headwind on hot gas reingestion and consideration of pressure ratio scaling
p 2675 N94-28018

Unsteady aspects of hot gas reingestion and statistical analysis p 2676 N94-28019

VACANCIES (CRYSTAL DEFECTS)

The role of point defect clusters in reactor pressure vessel embrittlement
[DE94-001122] p 2739 N94-26931

VACCINES

Bakteriella toxiner-morgondagens hot (bacterial toxins-the threat of tomorrow)
[PB94-124229] p 2902 N94-27045

VACUUM APPARATUS

Study on utilization of super clean, high vacuum space
p 2682 N94-25586

Micro-electron deflector
[AD-D016055] p 2787 N94-27672

VACUUM CHAMBERS

Study on utilization of super clean, high vacuum space
p 2682 N94-25586

A large high vacuum, high pumping speed space simulation chamber for electric propulsion
[NASA-TM-106453] p 2690 N94-26142

VACUUM DEPOSITION

Template synthesis of metal microtubule ensembles utilizing chemical, electrochemical, and vacuum deposition techniques
[AD-A274676] p 2715 N94-26444

The optical properties of high-T(c) superconductors grown by pulsed laser deposition
[ISBN-0-315-84917-7] p 3039 N94-27962

VACUUM SYSTEMS

Development of fusion technology
[DE93-633444] p 3042 N94-26159

Electrical analysis of wideband and distributed windows using time-dependent field codes
[DE94-002987] p 2768 N94-26310

Outgas and vacuum seal characteristics of irradiated polyimide O-ring
[DE94-701200] p 2757 N94-27812

VALENCE

AB-Initio calculation of the valence-band offset at strained GaAs/InAs (001) heterojunction
[DE94-602538] p 3061 N94-26878

VALVES

Accelerated screening methods for determining chemical and thermal stability of refrigerant-lubricant mixtures. Part 2: Experimental comparison and verification of methods
[DE94-003664] p 2749 N94-26007

VANADIUM

Volume dependence of vanadium magnetism
[DE94-601838] p 3050 N94-25843

VANADIUM ALLOYS

Hydrogen trapping with Pd coated alloy films
p 2723 N94-25551

Study on alloy films for hydrogen separation
p 2726 N94-25565

Microstructural development in irradiated vanadium alloys
[DE94-004307] p 2737 N94-26556

Deformation twinning: Influence of strain rate
[DE94-002693] p 2738 N94-26621

VANADIUM OXIDES

Technical report of ISSP. Ser. A, no. 2670: Electronic structure of light transition metal compounds studied by photoemission
[JTN-94-80556] p 3065 N94-27239

VANES

Thermal/structural tailoring of engine blades (T/STAEBL). User's manual
[NASA-CR-194463] p 2839 N94-26692

Thermal/Structural Tailoring of Engine Blades (T/STAEBL): User's manual
[NASA-CR-194461] p 2843 N94-27776

Vortex generators for control of shock-induced separation. Part 1: Introduction and aerodynamics
[ESDU-93024-PT-1] p 2806 N94-28095

VAPOR DEPOSITION

Molecular beam mass spectrometry studies of the chemical vapor deposition of diamond
[DE94-003802] p 3049 N94-25601

Characterization of physically vapor deposited AF2400 thin films
[DE94-004019] p 2749 N94-25985

Buckyball microwave plasmas: Fragmentation and diamond-film growth
[DE94-003209] p 3053 N94-26031

The fracture behavior of a CVD crystalline Si3N4/amorphous Si3N4 composite
[DE94-002646] p 2750 N94-26124

The importance of vibrationally excited nitrogen in silicon nitride deposition systems
[AD-A274874] p 2750 N94-26167

The reactivity of lithium toward non-aqueous solvents of relevance to energy storage applications as studied by surface analytical techniques
[DE94-003483] p 2856 N94-26464

The deposition of boron nitride and carbon films on silica glass fibers
[DE94-004684] p 2751 N94-26564
Deposition of a-SiC:H using organosilanes in an argon/hydrogen plasma
[DE94-004428] p 2751 N94-26580
Chemical vapor deposition and characterization of tungsten boron alloy films
[DE94-002648] p 2738 N94-26610
Physical modelling and adaptive predictive control of diffusion/LPCVD reactors
[PB94-126398] p 2763 N94-26819
Growth, characterization and device development in monocrystalline diamond films
[AD-A274245] p 3060 N94-26839
Atomic layer epitaxy of group 4 materials: Surface processes, thin films, devices and their characterization
[AD-A274325] p 3061 N94-26885
Fabrication and characterization of nano-crystalline diamond films
[DE94-002202] p 3062 N94-26934
Vapor deposition of copper on stainless steel 304L
[DE94-001945] p 2740 N94-27006
Visible light emitting materials and injection devices
[AD-A274418] p 2786 N94-27079
Observation of stimulated emission from an MBE grown GaN film on sapphire
[DE94-003638] p 3068 N94-27724

VAPOR PHASE EPITAXY
Electric-field dependence of electroreflectance and photocurrent spectra at visible wavelengths in MOVPE-grown InAlGaP multiple strained quantum-well structures
[DE94-004692] p 2780 N94-25664
Observation of stimulated emission from an MBE grown GaN film on sapphire
[DE94-003638] p 3068 N94-27724

VAPOR PHASES
Molecular beam mass spectrometry studies of the chemical vapor deposition of diamond
[DE94-003802] p 3049 N94-25601
Three methods to measure RH bond energies
[DE94-003795] p 3013 N94-25816

VAPOR PRESSURE
Vapour pressures and critical points of liquids: Aliphatic and cyclic ketones
[ESDU-93009] p 2720 N94-28059
Condensation inside tubes: Computer program for pressure drop in straight tubes (horizontal and vertical with downflow)
[ESDU-93014] p 2806 N94-28064
Vapour pressures and critical points of liquids: Fused ring compounds
[ESDU-93028] p 2721 N94-28142

VAPORS
Stress corrosion cracking and dealloying of copper-gold alloy in iodine vapor
[DE93-633790] p 2734 N94-26264
Application of the Positron Annihilation Technique to the study of vapor absorption process in polyethylene (LDPE) and in imide polymer (6FDA-TMPD PI)
[DE94-602737] p 2720 N94-27998

VARIABILITY
Transmittance fluctuations and non-linearity in random chains in the presence of applied electric fields
[DE94-603665] p 2787 N94-27628
Variability of measured sonic boom signatures
p 2651 N94-28197

VARIABLE CYCLE ENGINES
Supercruiser Arrow HS-8 p 2671 N94-25711
Tesseract supersonic business transport
p 2671 N94-25713
Transient model applications. 2: Compressor stall modeling methods p 2829 N94-28049

VARIATIONAL PRINCIPLES
Cad of GeO2-SiO2 double-layer core dispersion-shifted single-mode fibre
[DE93-634325] p 3035 N94-26383
On the application of Allan variance method for Ring Laser Gyro performance characterization
[DE94-003880] p 2810 N94-26525
A relativistic quark model
[ISBN-0-315-60926-5] p 3025 N94-27333
Correlated mean field Ansatz for the Kondo necklace
[DE94-603671] p 3067 N94-27634

VARIATIONS
Autonomic nervous system and cardiovascular control: Clinical implications of the 1/f fluctuations of heart rate
p 2932 N94-27540

VASOCONSTRICTION
Difference in skin blood flow reduction depending on activating maneuver of skin sympathetic nerve activity
p 2929 N94-27525

VASODILATION
Effect of prostaglandin E1 on the relationship between skin sympathetic nerve activity and reduction in skin blood flow p 2929 N94-27524
Effect of L-dopa on hemodynamic functions in humans p 2929 N94-27526

VECTOR ANALYSIS
Vcalc: A 3-space vector calculator
[AD-A274520] p 2965 N94-26831

VECTOR DOMINANCE MODEL
Heavy charged leptons in an SU(3)(sub L) x U(1)(sub N) model
[DE93-634367] p 3016 N94-26041

VECTOR MESONS
Production of (phi) mesons in central Si + Au collisions at 14.6 AGeV/c
[DE94-003196] p 3012 N94-25795
Vector meson exchanges and CP asymmetry in K(sup +/-) yields pi(sup +/-)pi(sup 0)
[DE94-601605] p 3014 N94-25887
A dependence of exclusive vector meson production in muon-nucleus scattering
[DE94-003363] p 3016 N94-25957
Pi plus pi minus gamma and K+ K- production in two photon collisions at ARGUS
[ISBN-0-315-63598-3] p 3027 N94-27684

VECTOR PROCESSING (COMPUTERS)
Iterative methods for the WLS state estimation on RISC, vector, and parallel computers
[DE94-004260] p 3000 N94-27569

VECTOR QUANTIZATION
Speech coding at low to medium bit rates
[ISBN-0-315-84012-9] p 2770 N94-26630
Vector quantizer designs for joint compression and terrain categorization of multispectral imagery
p 2947 N94-28262

VECTOR SPACES
Deformation of the exterior algebra and the GL(sub q) (r, included in) algebra
[DE94-602558] p 2996 N94-26898
Illumination in diverse codimensions
[NASA-CR-191596] p 2971 N94-27572

VECTORS (MATHEMATICS)
VLUGR2: A vectorized local uniform grid refinement code for PDE's in 2D
[CWI-NM-R9306] p 2965 N94-26772

VEGETATION
Landscape dynamics of northeastern forests
[NASA-CR-195272] p 2852 N94-28070

VEGETATION GROWTH
Bioregenerative system components for microgravity
p 2903 N94-25673
Root gravitropism in maize and Arabidopsis
[NASA-CR-195710] p 2903 N94-27940
Antarctic Record, Vol. 36, No. 2
[REPT-107] p 2883 N94-27963
Note on the structure of moss colonies composed of two species on King George Island, the South Shetland Islands p 2885 N94-27971

VEGETATIVE INDEX
Mapping closed tropical forest cover in West Africa using NOAA/AVHRR-LAC data p 2850 N94-27184
Woody biomass density in the Tendelti area of the central Sudan p 2850 N94-27185
Study on environment monitoring over whole China using NDVI from AVHRR data and future project
p 2875 N94-28289

VELOCITY DISTRIBUTION
Conversion of the CLUSE model for applications over open ocean
[AD-A273750] p 2893 N94-26013
Predictive modeling of particle-laden, turbulent flows
[DE94-003298] p 2792 N94-26319
Laser Doppler velocimetry in a low speed multistage compressor
[AD-A274836] p 2818 N94-26498
Pump CFD code validation tests
[NASA-CR-193939] p 2822 N94-26597
Turbulent boundary layer inner-outer interactions
[AD-A274357] p 2794 N94-27059
Predictions of momentum and scalar fields in a jet in cross-flow using first and second order turbulence closures p 2803 N94-28025
Unified approach for direct and inverse boundary layer prediction using cubic spline collocation
p 2653 N94-28326

VELOCITY MEASUREMENT
Flow past a circular cylinder with a permeable wake splitter plate
[AD-A273765] p 2790 N94-25872
Breakwire technique for hypervelocity measurement
[AD-A274779] p 2809 N94-26358
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 4: Laser velocimeter wake data, advance ratio of 0.037
[NASA-TM-109040-VOL-4] p 2645 N94-26483
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 1: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0081 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-1] p 2645 N94-26489
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 2: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 710 feet/second
[NASA-TM-109040-VOL-2] p 2645 N94-26492
Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 3: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 603 feet/second
[NASA-TM-109040-VOL-3] p 2645 N94-26497
Investigation of spectral analysis techniques for randomly sampled velocimetry data
p 3009 N94-27924

VENTILATION
A method for testing of HVAC automation equipment using the emulator and the application of the method
[VTT-TIED-1435] p 2822 N94-26306

VENTING
Experimental and numerical investigation of shock wave propagation through complex geometry, gas continuous, two-phase media
[DE94-001408] p 2791 N94-26121

VENUS (PLANET)
Sulfur dioxide in the atmosphere of Venus 1 sounding rocket observations
[NASA-CR-195224] p 3106 N94-26237
Some implications of large impact craters and basins on Venus for terrestrial ringed craters and planetary evolution p 2890 N94-28306

VENUS ATMOSPHERE
Sulfur dioxide in the atmosphere of Venus 1 sounding rocket observations
[NASA-CR-195224] p 3106 N94-26237

VENUS SURFACE
Some implications of large impact craters and basins on Venus for terrestrial ringed craters and planetary evolution p 2890 N94-28306

VERBAL COMMUNICATION
The central executive component of working memory
[AD-A274295] p 2938 N94-26683

VERTEBRATES
Proposed law of nature linking impacts, plume volcanism, and Milankovitch cycles to terrestrial vertebrate mass extinctions via greenhouse-embryo death coupling
p 2876 N94-28307

VERTICAL AIR CURRENTS
A modeling study of the mesocyclone
[AD-A274889] p 2893 N94-26168

VERTICAL DISTRIBUTION
Wind measurements with an incoherent lidar
[AD-A273756] p 2891 N94-25722
An overview of the TNO contribution to VAST 92
[AD-A273751] p 2893 N94-26016

VERTICAL LANDING
Experiments into the scaling parameters required for exhaust gas ingestion testing of vertical landing aircraft
p 2671 N94-28017
Influence of headwind on hot gas reingestion and consideration of pressure ratio scaling
p 2675 N94-28018

VERY HIGH FREQUENCIES
Experimental and theoretical investigation of RF absorption and reflection from preformed plasmas
[AD-A274189] p 3046 N94-27098
Packet radio data link applications in the NASA Langley Research Center Transport Systems Research Vehicle
[NASA-TM-109071] p 2665 N94-27423
Characteristics of 30-MHz interference noises observed by riometers p 2884 N94-27965
VHF-UHF noise surveys at Gulkana, Elmensdorf AFB, Galena AFB, Kotzebue and Cape Lisburne, Alaska and NRL, Pomonkey, Maryland
[PL-TR-93-2136] p 2777 N94-28211

VERY HIGH FREQUENCY RADIO EQUIPMENT
A compact 150 GHz SIS receiver cooled by 4 K GM refrigerator
[REPT-36] p 2776 N94-27340

VERY LARGE SCALE INTEGRATION
Real-time 3-D pose estimation using a high-speed range sensor
[AD-A273873] p 2809 N94-25967
A complete version of the Ada tasking coprocessor
p 2950 N94-26721
Physical modelling and adaptive predictive control of diffusion/LPCVD reactors
[PB94-126398] p 2763 N94-26819

Partitioning structural VHDL circuits for parallel execution on hypercubes [AD-A274390] p 2785 N94-26830
Design of a parallel discrete event simulation coprocessor [AD-A274135] p 2982 N94-27123
A fast Fourier transform radix-2 complex butterfly with built-in self-test [ISBN-0-315-84139-7] p 2982 N94-27649
Dry etching process development for submicron and nanometer semiconductor devices [PB94-133196] p 2788 N94-28357

VERY LONG BASE INTERFEROMETRY
Project PARAS: Phased array radio astronomy from space p 3081 N94-25703
Wobble-nutation modes of the Earth [ISBN-0-315-84246-6] p 3102 N94-26669

VERY LOW FREQUENCIES
JARE data reports. No. 186: Upper atmosphere physics data. Syowa and Asuka Stations, 1990 [JTN-94-80594] p 2881 N94-27299
Memories of National Institute of Polar Research. Series A-19. Upper atmosphere physics: ELF emission in high latitudes: Ray path calculation and ground-satellite observations [JTN-94-80592] p 2882 N94-27342

VESTIBULES
Effects of imaginary target on induced eye movements by linear acceleration p 2914 N94-27456

VHSIC (CIRCUITS)
Proposed Object Oriented Programming (OOP) enhancements to the Very High Speed Integrated Circuits (VHSIC) Hardware Description Language (VHDL) [AD-A274004] p 2957 N94-25661
Development of a MIL-STD-1750 microprocessor system for space applications p 2949 N94-26715
Qualified manufacturing and interoperability for space applications p 2949 N94-26719
Partitioning structural VHDL circuits for parallel execution on hypercubes [AD-A274390] p 2785 N94-26830

VIBRATION
High resolution fourier transform absorption spectrum of 79Br2 B3 Pi(Ou+) X1 sigma g+ [AD-A273864] p 2956 N94-25610
FR/GE/UK/US International Test Operations Procedure (ITOP) 1-1-050 development of laboratory vibration test schedules [AD-A273887] p 2836 N94-25732
Spectroscopic and vibrational energy transfer studies in molecular bromine [AD-A273795] p 3014 N94-25875
An algorithm for determination of bearing health through automated vibration monitoring [AD-A274591] p 2823 N94-26986
SAG compensated vibration isolation mount [AD-D016040] p 2841 N94-27110
Silence amenity engineering: Past and present p 3011 N94-27283

VIBRATION DAMPING
A study on piezoelectric actuators and sensors for vibration control of flexible space structures [AD-A274925] p 2695 N94-26532
Identification and H(infinity)/(mu)-synthesis control of the Sandia truss [DE94-002735] p 2839 N94-26810
Processing and mechanical properties of laminated metal composites of Al 6090-25 volume percent SiC(sub p) and Al 5182 [DE94-001070] p 2708 N94-26930
Proceedings of Damping 1993, volume 2 [AD-A274227] p 2840 N94-26953
Proceedings of Damping 1993, volume 3 [AD-A274228] p 2840 N94-27008
Finite element analysis of damped vibrations of laminated composite plates [ISBN-0-315-84928-2] p 2843 N94-27585
Methods of testing for endurance of structural elements using simulated acoustic loading [ESDU-93027] p 3011 N94-28141
On the use of feedback to control sound radiation from a plate excited by a turbulent boundary layer [ISVR-TR-227] p 2807 N94-28175

VIBRATION EFFECTS
Nonequilibrium radiation and chemistry models for aerocapture vehicle flowfields [NASA-CR-195706] p 2648 N94-28071

VIBRATION ISOLATORS
The 1991-1992 project summaries p 2943 N94-25698
Proceedings of Damping 1993, volume 1 [AD-A274226] p 2840 N94-26922
Proceedings of Damping 1993, volume 2 [AD-A274227] p 2840 N94-26953
Proceedings of Damping 1993, volume 3 [AD-A274228] p 2840 N94-27008
SAG compensated vibration isolation mount [AD-D016040] p 2841 N94-27110

VIBRATION MEASUREMENT
Experimental and numerical vibration analyses of a stiffened panel [VTT-PUBS-129] p 2836 N94-25650

VIBRATION MODE
Parameter estimation by genetic algorithms [DE94-002924] p 2961 N94-26146
The free vibration of plates, shallow shells and solids [ISBN-0-315-83931-7] p 2838 N94-26622
Extraction of modal parameters from an operating HAWT using the Natural Excitation Technique (NExT) [DE94-001831] p 2859 N94-27004
Response of structures to impact loads using elastic and plastic analysis [ISBN-0-315-84647-X] p 2842 N94-27309
Understanding and development of a prediction method of transonic limit cycle oscillation characteristics of fighter aircraft [NLR-TP-92210-U] p 2679 N94-27798

VIBRATION TESTS
FR/GE/UK/US International Test Operations Procedure (ITOP) 1-1-050 development of laboratory vibration test schedules [AD-A273887] p 2836 N94-25732
Baseline for a Nordtest method. Reliability stress screening of components. A guide for component users [PB94-123775] p 2835 N94-27042
Report of three microgravity experiments by the drop shaft [JTN-94-80579] p 2761 N94-27341
Space Station Freedom NiH2 cell testing program p 2861 N94-28108

VIBRATIONAL STATES
Vibrational energy transfer within the B 3Pi (O(+) sub u) state of 79BR2 upon collision with N2, O2, NO, and SF6 [AD-A273905] p 3011 N94-25589
A study of vibrational relaxation of electronically-excited molecules [DE93-613553] p 3013 N94-25827
The importance of vibrationally excited nitrogen in silicon nitride deposition systems [AD-A274874] p 2750 N94-26167

VIDEO COMMUNICATION
The question of standards for digital interactive television [AD-A273872] p 2765 N94-25725
The telemedicine spacebridge project: A joint US/Russian venture in long distance medicine via satellite [NASA-TM-106523] p 2693 N94-27427

VIDEO DATA
SHIVA: A unix-based, menu-driven, color image processing software package [AD-A274071] p 2957 N94-25646
Methods for experimentally determining commercial jet aircraft landing parameters from video image data [AD-A274207] p 2669 N94-27105

VIDEO SIGNALS
Color head down display program [AD-A274807] p 2672 N94-26340
Automated fabric inspection system [AD-A274522] p 2835 N94-26833
Focal plane antenna array for millimeter waves [AD-D016034] p 2774 N94-27202

VIDEO TAPE RECORDERS
Automated fabric inspection system [AD-A274522] p 2835 N94-26833

VIDICONS
Focal plane antenna array for millimeter waves [AD-D016034] p 2774 N94-27202

VIEWING
Computer visualizations in engineering applications [DE94-003589] p 2822 N94-26465

VINYL POLYMERS
Object imaging accomplished with an integrated circuit robotic tactile sensor incorporating a piezoelectric polyvinylidene fluoride thin film [AD-A274038] p 2780 N94-25845

VINYLIDENE
Object imaging accomplished with an integrated circuit robotic tactile sensor incorporating a piezoelectric polyvinylidene fluoride thin film [AD-A274038] p 2780 N94-25845

VIRIAL THEOREM
Quark-antiquark bound states [DE93-613054] p 3013 N94-25826

VIRTUAL MEMORY SYSTEMS
Virtual data [DE94-002718] p 2986 N94-26807
Virtual memory management and virtual bus overloading on multiple channel architectures [AD-A274127] p 2954 N94-27152
Shared virtual memory and generalized speedup [NASA-CR-191592] p 2969 N94-27416

VIRTUAL REALITY
ObjectSim: A reusable object oriented DIS visual simulation [AD-A274030] p 2958 N94-25767
Weapon system sensor integration for a DIS-compatible virtual cockpit [AD-A274088] p 2672 N94-26021
NPSNET-4: A real-time, 3D distributed interactive virtual world [AD-A274942] p 2961 N94-26298
Utility fog: A universal physical substance p 2687 N94-27367
An artificial reality environment for remote factory control and monitoring p 2687 N94-27369

VISCOELASTIC DAMPING
Substructure synthesis methods for viscoelastic structures [UTIAS-349] p 2695 N94-26712
Finite element analysis of damped vibrations of laminated composite plates [ISBN-0-315-84928-2] p 2843 N94-27585

VISCOELASTICITY
Stress relaxation in dough moulding compounds [PB94-124872] p 2748 N94-25894
Proceedings of Damping 1993, volume 2 [AD-A274227] p 2840 N94-26953

VISCOPLASTICITY
A hydrostatic stress-dependent anisotropic model of viscoplasticity [NASA-TM-106525] p 2711 N94-27640

VISCOSITY
Measurement of viscosity, density, and gas solubility of refrigerant blends in selected synthetic lubricants [DE94-003609] p 2713 N94-25934
New constitutive equation for the volume viscosity in fluids [NASA-TM-109104] p 2798 N94-27867
Viscosity of liquids: Halogenated ethanes [ESDU-93012] p 2720 N94-28062
Solubility, viscosity, and density of refrigerant/lubricant mixtures [DE94-004237] p 2721 N94-28069
Calculation methods for steadily loaded axial groove hydrodynamic journal bearings. Low viscosity process fluid lubrication (guide to use of computer program A9306) [ESDU-93006] p 2830 N94-28075

VISCOUS DRAG
Calculation of viscous drag of two low angle of attack supercritical profiles [FFA-TN-1984-22] p 2644 N94-26104

VISCOUS FLOW
The high Reynolds number flow through an axial-flow pump [AD-A273844] p 2789 N94-25604
A numerical determination of bifurcation points for low Reynolds number conical flows [AD-A273984] p 2791 N94-25991
Chemical and vibrational nonequilibrium viscous flows: Modelling, internal and external flow applications [ESA-TT-1274] p 2791 N94-26316
Computation of transonic viscous flow past the NTF 65-degree Delta Wing p 2659 N94-27930
Viscous airfoil computations using adaptive structured grids p 2655 N94-28337
A study of blunt trailing edge airfoils using the Navier Stokes code: ARC2D p 2656 N94-28340
A new flux vector splitting scheme p 2657 N94-28343

VISIBLE SPECTRUM
Planetary Instrument Definition and Development Program (PIDDP). Instrument for future planetary flight missions: A visible-infrared imaging spectrometer for planetary missions [NASA-CR-195254] p 3106 N94-27409

VISION
Interacting cortical filters for object recognition [PB94-125374] p 2938 N94-26873

VISUAL AIDS
RIAD visual imaging branch assessment p 2815 N94-27895

VISUAL DISCRIMINATION
Function of selective attention intrinsic to the saccade system: Does the voluntary control override the stimulus driven control? p 2928 N94-27523

VISUAL FIELDS
Endogeneous and exogenous control of visual selection: A review of the literature [AD-A273761] p 2908 N94-25871

VISUAL FLIGHT
Special investigation report: Safety issues related to wake vortex encounters during visual approach to landing [PB94-917002] p 2660 N94-27881

VISUAL PERCEPTION

Human visual system enhancement of reconstructed satellite images
[AD-A273867] p 2693 N94-25595

Image quality and the display modulation transfer function: Experimental findings
[AD-A274061] p 2679 N94-25773

Endogeneous and exogenous control of visual selection: A review of the literature
[AD-A273761] p 2908 N94-25871

The AFIT multielectrode array for neural recording and simulation: Design, testing, and encapsulation
[AD-A274086] p 2909 N94-25943

Pacing visual attention: Temporal structure effects
[AD-A273859] p 2937 N94-25965

Color head down display program
[AD-A274807] p 2672 N94-26340

Interacting cortical filters for object recognition
[PB94-125374] p 2938 N94-26873

Orientation competition in cortical filters
[PB94-125366] p 2939 N94-27001

Frequency analysis of body sway induced by optokinetic stimulation p 2914 N94-27455

Effects of imaginary target on induced eye movements by linear acceleration p 2914 N94-27456

Eye-head coordination and swinging of the visual scene when wearing visually up-down reversing mirror for 14 days p 2915 N94-27462

Comparative measurement of visual stability in cosmic space: Onboard experiment and pre-flight activities
p 2916 N94-27463

Analysis of the Electrically Evoked Response (EER) of the cat p 2908 N94-27519

Visual surface perception: Surface reconstruction from shading and stereo
[ISBN-0-315-60974-5] p 2975 N94-27872

Visit to CERMA: Centre d'Etudes et de Recherches de Medecine Aerospatiale, Centre for Studies and Research in Aviation and Space Medicine, Bretigny sur Orge, France, November 16-18, 1992
[PB94-132990] p 2937 N94-28392

VISUAL STIMULI

Function of selective attention intrinsic to the saccade system: Does the voluntary control override the stimulus driven control? p 2928 N94-27523

VITERBI DECODERS

On the performance of trellis coded 8PSK with Reed Solomon codes
[ISBN-0-315-84289-X] p 2770 N94-26626

VOICE

Researches of the Electrotechnical Laboratory. No. 955: Speech recognition by description of acoustic characteristic variations
[JTN-94-80604] p 2775 N94-27249

VOICE COMMUNICATION

Development of satellite telecommunications during the period 1990 - 2005
[CRANFIELD-AERO-9301] p 2765 N94-25639

Airborne data link operational evaluation test plan
[AD-A274096] p 2664 N94-25788

Parametric time-scale methods in signal analysis
[AD-A274212] p 2773 N94-27068

NCVS, volume 5
[AD-A274975] p 2902 N94-27165

VOICE DATA PROCESSING

Speech coding at low to medium bit rates
[ISBN-0-315-84012-9] p 2770 N94-26630

Researches of the Electrotechnical Laboratory. No. 955: Speech recognition by description of acoustic characteristic variations
[JTN-94-80604] p 2775 N94-27249

VOIDS

Microstructural development in low activation ferritic alloys irradiated to 200 dpa at 420 C
[DE94-004269] p 2731 N94-25803

Interfacial area and interfacial transfer in two-phase flow
[DE93-041226] p 2792 N94-26468

VOLATILITY

Temperature dependence of static RAM volatility
[DE93-040345] p 2948 N94-26111

VOLCANOES

Volcanology and volcanic activity with a primary focus on potential hazard impacts for the Hawaii geothermal project
[DE94-001614] p 2879 N94-26515

VOLCANOLOGY

Impacts, extinctions, volcanism, glaciations, and tectonics: Matches and mismatches
p 2888 N94-28298

Proposed law of nature linking impacts, plume volcanism, and Milankovitch cycles to terrestrial vertebrate mass extinctions via greenhouse-embryo death coupling
p 2876 N94-28307

VOLTAGE CONVERTERS (AC TO AC)

Pulse transformer characterization
[PML-1992-73] p 2784 N94-26646

VOLTAGE CONVERTERS (DC TO DC)

AC to DC power converter with regulated bi-polar outputs
[AD-D016032] p 2786 N94-27145

A study of DC-DC converters with MCT's for arcjet power supplies
[NASA-CR-191204] p 2703 N94-27662

VOLUMETRIC ANALYSIS

Orthobaric densities and molar volumes of liquids: Aliphatic and cyclic ketones
[ESDU-93010] p 2720 N94-28060

VON KARMAN EQUATION

Super finite elements for nonlinear static and dynamic analysis of stiffened plate structures
[ISBN-0-315-63903-2] p 2844 N94-27808

VORTEX ALLEVIATION

Controlled oscillation of forebody vortices by nozzle jet blowing
[ISBN-0-315-84134-6] p 2678 N94-27648

VORTEX GENERATORS

Inclined air-jets used as vortex generators to suppress shock-induced separation p 2659 N94-28040

Vortex generators for control of shock-induced separation. Part 1: Introduction and aerodynamics
[ESDU-93024-PT-1] p 2806 N94-28095

Vortex generators for control of shock-induced separation. Part 3: Examples of applications of vortex generators to aircraft
[ESDU-93026-PT-3] p 2807 N94-28096

VORTEX SHEDDING

The effects of three-dimensional imposed 3-d disturbances on bluff-body near wake flows
[AD-A274845] p 2791 N94-26187

Nominally 2-dimensional flow about a normal flat plate
[AD-A274472] p 2794 N94-27026

Research on bluff body vortex wakes
[AD-A273780] p 2796 N94-27319

Vibrations in engineering structures: A review of model and full-scale test of a cable-stayed bridge and a traffic sign gantry
[NLR-TP-92321-U] p 2843 N94-27553

Separated flow generated by a vectored jet in a crossflow p 2800 N94-28007

VORTICES

Vortex methods
[DE94-003245] p 2789 N94-25597

Flux flow, pinning, and resistive behavior in superconducting networks
[DE94-003400] p 3050 N94-25848

The effects of three-dimensional imposed 3-d disturbances on bluff-body near wake flows
[AD-A274845] p 2791 N94-26187

Feature isolation and quantification of evolving datasets
[NASA-CR-195230] p 2961 N94-26207

Vortices in curved spacetime
[DE94-601559] p 3072 N94-26417

A numerical study of quantized vortices in HeII
[ISBN-9-03-860232-4] p 2792 N94-26479

Numerical studies on the dynamics of bubble, turbulent, free shear flows: Effect of the inter-phase coupling on the global flow evolution
[AD-A274521] p 2794 N94-26832

Leading-edge vortex-system details obtained on F-106B aircraft using a rotating vapor screen and surface techniques
[NASA-TP-3374-VIDEO-SUPPL] p 2647 N94-27161

Special investigation report: Safety issues related to wake vortex encounters during visual approach to landing
[PB94-917002] p 2660 N94-27881

Unsteady wake structures in transverse jets
p 2800 N94-28006

The interaction region associated with twin jets and a normal crossflow p 2800 N94-28009

Experimental investigation of the interaction of a thrust reverser jet with an external subsonic flow
p 2801 N94-28011

Topological structure of a jet in a cross flow
p 2801 N94-28014

Experiments on the ground vortex formed by an impinging jet in cross flow p 2802 N94-28016

Comparison of the interactions of two and three dimensional transverse jets with a hypersonic free stream p 2659 N94-28021

Effects, limits, and limitations of spanwise blowing
p 2659 N94-28027

Recent developments in the simulation of steady and transient transverse jet interactions for missile, rotorcraft, and propulsive applications p 2804 N94-28030

Effects of free-stream turbulence on a jet in a cross flow p 2805 N94-28036

Inclined air-jets used as vortex generators to suppress shock-induced separation p 2659 N94-28040

Measurements of steady and dynamic pressure on an F/A-18 wind tunnel model at high angles of attack
p 2653 N94-28323

VORTICITY

Vortex methods
[DE94-003245] p 2789 N94-25597

A finite wake theory for two-dimensional rotary wing unsteady aerodynamics
[AD-A274921] p 2645 N94-26535

Transverse vorticity measurements in the University of Houston two stream shear layer facility
[AD-A273910] p 2797 N94-27562

Streamwise vorticity in a turbine rotor with conical endwalls
[DLR-FB-93-13] p 2826 N94-27591

VULNERABILITY

Vulnerability assessment using a fuzzy logic based method
[AD-A274075] p 2957 N94-25649

VYCOR

Bulletin of the Institute for Chemical Reaction Science, Tohoku University, volume 2
[JTN-94-80602] p 2717 N94-27385

Porous vycor glass tube joined to borosilicate glass
p 2718 N94-27392

W

WAFERS

Study of the homogeneity of InP wafers
[AD-A273658] p 3055 N94-26194

A partitioning and redundancy model for wafer-scale integrated circuits p 2955 N94-27195

WAKEFULNESS

Effects of methamphetamine on vigilance and tracking during extended wakefulness
[AD-A274896] p 2909 N94-26179

WAKES

Wake passage effects on the losses in a linear turbine cascade
[AD-A273794] p 2790 N94-25874

A finite wake theory for two-dimensional rotary wing unsteady aerodynamics
[AD-A274921] p 2645 N94-26535

Direct simulation Monte-Carlo of near continuum hypersonic flow with chemical reactions
[DLR-FB-93-01] p 2797 N94-27588

Unsteady wake structures in transverse jets
p 2800 N94-28006

Localized and distributed boundary-layer receptivity to convected unsteady wake in free stream
[NASA-CR-4578] p 2808 N94-28180

WALKING

The 1991-1992 walking robot design
p 2833 N94-25686

The effect of platform motion on human energy expenditure during walking. An exploratory experiment
[AD-A273760] p 2940 N94-25724

A biologically-inspired autonomous robot
[AD-A273909] p 2821 N94-25782

WALKING MACHINES

The 1991-1992 walking robot design
p 2833 N94-25686

WALL FLOW

A numerical study of mixing and combustion in hypervelocity flows through a scramjet combustor model
p 2808 N94-27911

Experiments on the ground vortex formed by an impinging jet in cross flow p 2802 N94-28016

Experimental investigations into the wall interference and sidewall boundary layer effects in the National Research Council/Inst. for Aerospace Research High Reynolds Number 2-D Test Facility
p 2658 N94-28350

Computation of wind-tunnel side-wall interference using 3D Navier-Stokes code p 2658 N94-28351

WALL JETS

Theoretical and experimental investigation of a delta wing with turbulent leading-edge jets
p 2659 N94-28029

WALL PRESSURE

Flowfield dynamics in blunt fin-induced shock wave/turbulent boundary layer interactions
[NASA-CR-195170] p 2798 N94-27802

WALLS

Methodology for first wall design
[DE94-002795] p 3045 N94-26861

Passive stabilization of MHD instabilities at high (beta)n in the HBT-EP tokamak
[DE94-003317] p 3047 N94-27735

WAR GAMES

Computer model for generation of infrared images
[PB94-123551] p 3005 N94-27172

WARHEADS
Design study of fiber-composite penetrator cases
[DE94-003203] p 2707 N94-26099
WARNING
Mesoscale meteorological measurements characterizing complex flows
[DE94-002359] p 2895 N94-26761
WARNING SYSTEMS
The chemical detector paper as a potential alarm
[FFI-93/6007] p 2712 N94-25745
A feasibility study on bird classification with neural network
[AD-A273753] p 2659 N94-25780
System for generating, aboard an aircraft, during takeoff, of a signal capable of producing an alert or an alarm, in case of malfunction
[CA-PATENT-APPL-SN-2,018,94] p 2659 N94-26293
Processing of wide-angle synthetic aperture radar signals for target detection
[AD-A274225] p 2773 N94-27073
Ir-fibers in a laser threat warning system and robot shot warning system
[PB94-124476] p 3038 N94-27209
Automatic, real-time fault monitor verifying network in a microwave landing system
[CA-PATENT-1325261] p 2665 N94-27275
WASHING
Stability of reference masses 2: The effect of environment and cleaning methods on the surfaces of stainless steel and allied materials
[NPL-DMM(A)-95] p 2738 N94-26653
WASTE DISPOSAL
Collaboration of chemical oxidation and biological treatment for removal of refractory organic substances
p 2870 N94-28149
Treatment of refractory organic substances with combined use of chemical oxidation and biological treatment. Part 2: Biodegradability of ozonation products of chlorophenol p 2870 N94-28151
WASTE ENERGY UTILIZATION
Feasibility study on introduction of the bio-fuel power generation in tropical regions
[DE94-725203] p 2858 N94-26838
WASTE HEAT
Absorption technology for solar and waste heat utilization p 2854 N94-26053
WASTE TREATMENT
Journal of NIRE, volume 2, number 4
[JTN-94-80554] p 2869 N94-28147
Collaboration of chemical oxidation and biological treatment for removal of refractory organic substances
p 2870 N94-28149
Treatment of refractory organic substances with combined use of chemical oxidation and biological treatment. Part 2: Biodegradability of ozonation products of chlorophenol p 2870 N94-28151
WASTE UTILIZATION
Journal of NIRE, volume 2, number 4
[JTN-94-80554] p 2869 N94-28147
Oil production from buckwheat stillage by thermochemical liquefaction p 2871 N94-28154
WASTES
Vapor deposition of copper on stainless steel 304L
[DE94-001945] p 2740 N94-27006
WATER
Catalog of absolutely calibrated, range normalized, wideband, electric field waveforms from triggered lightning flashes in Florida
[AD-A273793] p 2892 N94-25873
Macrobenthic fauna in the dutch sector of the north sea in 1991
[PB94-126414] p 2868 N94-27200
Why is the north polar cap on Mars different than the south polar cap? p 3107 N94-27889
WATER BALANCE
Role of remote sensing in energy, water, and carbon cycle studies over the Amazon
[INPE-5486-PRE/1786] p 2852 N94-27957
WATER COLOR
Development of a multi-sensor in situ fiber optic fluorometer
[DE94-003399] p 3035 N94-26100
WATER CONSUMPTION
Effect of carbon dioxide enrichment on radish production using Nutrient Film Technique (NFT)
[NASA-TM-107198] p 2902 N94-27411
WATER DEPTH
Scanview: A grafical program for analysis of laserbathymetry data
[PB94-124443] p 2900 N94-27208
WATER FLOW
A study on structure of benthic boundary layer in coastal waters
[REPT-4] p 2898 N94-25635
Calibrating/testing meters in hot water test bench VM7
[PB94-124294] p 2812 N94-27160
An experimental study of siphonal jets in a turbulent boundary layer crossflow p 2802 N94-28015
WATER IMMERSION
Plasma volume shifts and exercise thermoregulation with water immersion and six-degree head-down tilt
[NASA-TM-108781] p 2901 N94-26093
Changes in fluid and electrolyte metabolism during water immersion at high or thermoneutral temperature
p 2912 N94-27445
Cardiovascular function during thermoneutral head-out water immersion in the elderly p 2915 N94-27458
Effects of 40 C hot water immersion for an hour on thermoregulatory functions in humans: Comparison with 34 C thermoneutral immersion p 2915 N94-27459
Effects of bathing at 40 C on cardiovascular system in humans: Comparison with 34 C thermoneutral bathing
p 2918 N94-27473
Effects of 41 C bathing for 20 minutes on cardiovascular and thermoregulatory functions in humans
p 2918 N94-27474
WATER MANAGEMENT
Remote sensing and GIS for the management and investigation of the Wadden Sea
[BCRS-92-20] p 2847 N94-26228
WATER POLLUTION
Selfsimilar solutions of a nonlinear transport equation
[REPT-93-42] p 2865 N94-25760
Recent legal movement on water quality regulation in Japan p 2869 N94-28148
Determination of lead isotope ratios in seawater by purge and trap GC/MS after ethylation p 2870 N94-28152
Indian activities on the core programme IGAP and proposals for network activities p 2874 N94-28284
Changes in phytoplankton population in the Chao Phraya estuary, Thailand, during the eutrophication mechanisms studies p 2875 N94-28287
WATER QUALITY
Journal of NIRE, volume 2, number 4
[JTN-94-80554] p 2869 N94-28147
Recent legal movement on water quality regulation in Japan p 2869 N94-28148
Changes in phytoplankton population in the Chao Phraya estuary, Thailand, during the eutrophication mechanisms studies p 2875 N94-28287
WATER TUNNEL TESTS
Experimental data for CFD validation of impinging jets in crossflow with application to ASTOVL flow problems
p 2801 N94-28010
Topological structure of a jet in a cross flow
p 2801 N94-28014
WATER VAPOR
Control of a hydrogen/oxygen steam generator
[DLR-FB-93-02] p 2826 N94-27589
WATER WAVES
Nonlinear ocean waves
[AD-A274651] p 2899 N94-26354
Topics in longshore currents
[AD-A274788] p 2899 N94-26361
WAVE ATTENUATION
Binaural room simulation
[AD-A273823] p 3009 N94-25737
WAVE DIFFRACTION
Numerical simulation of the reignition of detonation by reflected shocks
[AD-A274755] p 2795 N94-27252
Developments in the application of the geometrical theory of diffraction and computer graphics to aircraft inter-antenna coupling analysis
[ISBN-0-315-84643-7] p 2776 N94-27308
WAVE DISPERSION
Toroidal plasma beta-FLR limit in a toroidally linked mirror system
[DE94-003119] p 3041 N94-25792
Kinetic resonance damping rate of the toroidal ion temperature gradient mode
[DE94-003511] p 3041 N94-25923
C-periodicity and the physical mass in the 3-state Potts model
[DE94-601551] p 3019 N94-26423
Polar optical oscillation modes in GaAs-based double heterostructures: Long wavelength limit
[DE94-601874] p 3062 N94-26897
WAVE EQUATIONS
The extensions of space-time. Physics in the 8-dimensional homogeneous space D is equal to SU(2,2)/K
[DE93-634336] p 3072 N94-26551
Numerical procedure for planetary wave solution
[DE94-004280] p 2879 N94-26576
Elastic wave up/down decomposition in inhomogeneous and anisotropic media: An operator approach and its approximations
[PB94-126497] p 2881 N94-26880
Optical characterization and guided wave loss measurements for end-capped 6F-polybenzoxazole
[AD-A274586] p 3036 N94-26982
Hydroacoustic wave-fields generated by different source types, a computational study
[PB94-123536] p 3010 N94-27037
Wave propagation in the shallow regions of the earth's crust and the borehole vicinity
[ITN-94-85237] p 2882 N94-27330
WAVE FRONT RECONSTRUCTION
Numerical simulation of tomographic reconstruction for the study of turbulence using optical wavefront sensor measurements
[AD-A273851] p 2789 N94-25587
WAVE FRONTS
Numerical simulation of tomographic reconstruction for the study of turbulence using optical wavefront sensor measurements
[AD-A273851] p 2789 N94-25587
Experimental verification of tomographic reconstruction of turbulent air flow structure using optical wavefront measurements
[AD-A274392] p 2795 N94-27129
Dynamic and kinematic P wave tracing for a three-dimensional elastic inhomogeneous media by the asymptotic ray theory and application
[ITN-94-85239] p 2775 N94-27244
WAVE FUNCTIONS
Weak interactions in a bilocal chiral theory
[DE93-613097] p 3013 N94-25836
The Dirac equation in Kerr spacetime, spheroidal coordinates and the M.I.T. bag model of hadrons
[DE94-601566] p 3006 N94-25886
Crystal potential retrieval in HRTEM
[DE94-601883] p 3055 N94-26171
How to build analogues of the Bessel-Clifford expansions for the sum of the repulsive Coulomb potential and central potential decreasing more rapidly than the centrifugal one?
[DE93-634308] p 3007 N94-26472
On the wave and corpuscular properties of microparticles
[DE93-634450] p 3020 N94-26509
Double excitation of He and H(-) by fast proton and anti-proton impact
[DE94-004581] p 3026 N94-27620
Stochastic space-time, confinement potential and particle propagator
[DE94-606415] p 3074 N94-27680
WAVE GENERATION
Investigation of plasma instabilities in the polar cusp
[NASA-CR-195212] p 2879 N94-26599
WAVE INTERACTION
Extension of On-Surface Radiation Condition (OSRC) theory to full-vector electromagnetic wave scattering by three-dimensional conducting, dielectric, and coated targets
[AD-A274023] p 2766 N94-25757
Review of tokamak experiments on direct electron heating and current drive with fast waves
[DE94-004185] p 3041 N94-25801
Space Experiments with Particle Accelerators (SEPAC)
[NASA-CR-193935] p 2761 N94-27664
WAVE PACKETS
About stochastization of motion of charged particles in geomagnetic field and in the field of a wave packet
[DE93-634309] p 2879 N94-26502
About possible types of neutrino oscillations
[DE93-634449] p 3020 N94-26508
Acceleration of electrons and ions by strong lower-hybrid turbulence in solar flares
[NASA-TM-109723] p 3111 N94-27953
WAVE PROPAGATION
Arbitrary-order high resolution schemes for model hyperbolic conservation laws
[CRANFIELD-AERO-9209] p 3005 N94-25823
Efficient modeling in transversely isotropic inhomogeneous media
[DE94-003394] p 2877 N94-25847
Technical description of the Vulcano software library
[FFI-93/7024] p 2767 N94-26105
Ionospheric modification by high power, obliquely propagated HF radio wave transmissions. Part 1: Experimental
[AD-A273746] p 2878 N94-26224
Cad of GeO2-SiO2 double-layer core dispersion-shifted single-mode fibre
[DE93-634325] p 3035 N94-26383
The effect of high frequency electric field on hypersound amplification in superlattice
[DE93-634326] p 3057 N94-26384
A geological and geophysical information system for Eurasia
[AD-A274818] p 3098 N94-26490

A preliminary shear velocity model for Central Asia [AD-A274972] p 2880 N94-26752

Nonlinear hysteresis in an endochronic solid [AD-A274594] p 2880 N94-26855

Hydroacoustic wave-fields generated by different source types, a computational study [PB94-123536] p 3010 N94-27037

Performance statistics bulletin: High altitude meteor scatter propagation, August, September, October 1989 [AD-A274455] p 2773 N94-27085

Dynamic and kinematic P wave tracing for a three-dimensional elastic inhomogeneous media by the asymptotic ray theory and application [ITN-94-85239] p 2775 N94-27244

Wave propagation in the shallow regions of the earth's crust and the borehole vicinity [ITN-94-85237] p 2882 N94-27330

An improvement in the modified finite element procedure for underwater shock analysis [DE94-004451] p 2797 N94-27617

Nonlinear transverse propagation of photons in a ultrarelativistically hot and magnetized electron-positron plasma: Coupling of Langmuir and electromagnetic solitons [DE94-603667] p 3046 N94-27630

Mach reflection of spherical detonation waves [DE93-016604] p 2797 N94-27705

Preliminary considerations on the diffraction (quasi-optical) grill in CASTOR tokamak [IPPCZ-335] p 3048 N94-27842

Underground structure in the eastern part of Kanagawa Prefecture inferred from explosion seismic observations p 2886 N94-27987

Analysis of S-wave seismogram envelope of deep earthquakes and estimation of random inhomogeneities in the Kanto-Tokai area p 2886 N94-27988

Sonic boom propagation through turbulence: A ray theory approach p 2650 N94-28192

The propagation of spark-produced N waves through turbulence p 2650 N94-28193

On the aging of sonic booms p 2650 N94-28194

Plane wave propagation and polarization properties in transversely bianisotropic uniaxial medium [PB94-132883] p 2778 N94-28380

Eigenwaves in the general uniaxial bianisotropic medium with symmetric parameter dyadics [PB94-132891] p 2778 N94-28381

Plane wave propagation in an anisotropic chiral medium with isotropic permittivity and permeability [PB94-133097] p 2778 N94-28384

WAVE REFLECTION

Hydroacoustic wave-fields generated by different source types, a computational study [PB94-123536] p 3010 N94-27037

Numerical simulation of the reignition of detonation by reflected shocks [AD-A274755] p 2795 N94-27252

Mach reflection of spherical detonation waves [DE93-016604] p 2797 N94-27705

WAVE SCATTERING

Polarimetric investigation of edge scattering by mono- and bistatic microwave imaging [ESA-TT-1284] p 2768 N94-26317

Compilation of corrections for postprocessing of laser bathymetry data [PB94-123668] p 2900 N94-27156

WAVE-PARTICLE INTERACTIONS

On a theory of two-beam mechanisms of charged particle acceleration in electrodynamic structures [DE94-003482] p 3032 N94-26330

WAVEFORMS

Catalog of absolutely calibrated, range normalized, wideband, electric field waveforms from triggered lightning flashes in Florida [AD-A273793] p 2892 N94-25873

Fast generator of program waveforms signals [DE93-634230] p 2948 N94-26381

A preliminary shear velocity model for Central Asia [AD-A274972] p 2880 N94-26752

Monaural and binaural processing of complex waveforms [AD-A274209] p 3010 N94-27067

Scanview: A grafical program for analysis of laserbathymetry data [PB94-124443] p 2900 N94-27208

Coherence and satisfiability of waveform timing specifications [ISBN-0-315-57769-X] p 3009 N94-27268

Correlation between electrical activity and the size of single sinoatrial node cells p 2907 N94-27513

Implications for high speed research: The relationship between sonic boom signature distortion and atmospheric turbulence p 2650 N94-28190

WAVEGUIDE ANTENNAS

Design of folded waveguide antenna for Alcator C-Mod [DE94-003584] p 2767 N94-25924

RF modeling and design of a folded waveguide launcher for the Alcator C-Mod tokamak [DE94-003588] p 3041 N94-25933

WAVEGUIDES

Problems in nonlinear acoustics: Rayleigh waves, pulsed sound beams, and waveguides [AD-A274587] p 3010 N94-26983

Microwave coupling into a slotted cavity [PB94-123742] p 2772 N94-27041

WAVELET ANALYSIS

Filtering, coding, and compression with Malvar wavelets [AD-A274055] p 2780 N94-25770

A comparison of spectral decorrelation techniques and performance evaluation metrics for a wavelet-based, multispectral data compression algorithm p 2946 N94-28258

Compression of multispectral Landsat imagery using the Embedded Zerotree Wavelet (EZW) algorithm p 2947 N94-28261

Wavelet compression techniques for hyperspectral data p 2947 N94-28263

WEAK ENERGY INTERACTIONS

Weak hadronic decays of heavy flavor mesons [ISBN-0-315-55542-4] p 3026 N94-27402

Pi plus pi minus gamma and K+ K- production in two photon collisions at ARGUS [ISBN-0-315-63598-3] p 3027 N94-27684

WEAK INTERACTIONS (FIELD THEORY)

Weak interactions in a bilocal chiral theory [DE93-613097] p 3013 N94-25836

Heavy charged leptons in an SU(3)(sub L) x U(1)(sub N) model [DE93-634367] p 3016 N94-26041

Construction of a new electroweak sphaleron [NIKHEF-H/93-09] p 3020 N94-26540

Constraints on singlet right-handed neutrinos coming from the Z(0)-width [DE93-634393] p 3022 N94-26766

Cosmological phase transitions [DE94-003001] p 3104 N94-26786

Progress in SSC Higgs physics: Report of the Higgs working group [DE94-003224] p 3022 N94-26793

Electroweak and other interactions in medium-energy nuclear physics [DE94-004161] p 3027 N94-27689

Topics in electroweak baryogenesis: The sphaleron and T-violation [DE94-004886] p 3029 N94-27811

WEAPON SYSTEMS

Weapon system integration for the AFIT virtual cockpit [AD-A274058] p 2667 N94-25772

Weapon system sensor integration for a DIS-compatible virtual cockpit [AD-A274088] p 2672 N94-26021

Smart structures, an overview [AD-A274147] p 2987 N94-27093

WEAPONS DELIVERY

Weapon system integration for the AFIT virtual cockpit [AD-A274058] p 2667 N94-25772

WEAPONS DEVELOPMENT

The proliferation of aerospace weapons technology: Ballistic missiles and the case of Brazil [ISBN-0-315-84082-X] p 2763 N94-26634

WEAPONS INDUSTRY

The proliferation of aerospace weapons technology: Ballistic missiles and the case of Brazil [ISBN-0-315-84082-X] p 2763 N94-26634

WEAR

Tests of highly loaded skids on a concrete runway [NASA-TP-3435] p 2669 N94-26608

A non-linear mathematical model or finite, periodic rail corrugations [REPT-93-49] p 2996 N94-26967

Guidelines for unlubricated sliding wear tests. Part 1: General approach [PB94-119666] p 2825 N94-27322

Guidelines for unlubricated sliding wear tests. Part 2: Procedures for pin-on-disc testing [PB94-123270] p 2825 N94-27324

WEAR INHIBITORS

Photoelectron spectroscopic studies of the electronic structure and bonding in TiC and TiN [ATR-93(8361)-2] p 2746 N94-28185

WEAR TESTS

Unscreened low tension cables scrape abrasion testing [PB94-123767] p 2823 N94-26849

Guidelines for unlubricated sliding wear tests. Part 1: General approach [PB94-119666] p 2825 N94-27322

Guidelines for unlubricated sliding wear tests. Part 2: Procedures for pin-on-disc testing [PB94-123270] p 2825 N94-27324

WEATHER

Overall analysis of meteorological information in the Daeduk nuclear complex [DE93-632594] p 2894 N94-26469

Encoding approaches for data link transmission of weather graphics [AD-A274497] p 2772 N94-26963

Meteorological data at the Nagaoka Institute of Snow and Ice Studies [REPT-158] p 2896 N94-27169

Aircraft accident report: Runway departure following landing American Airlines flight 102, McDonnell Douglas DC-10-30, N139AA, Dallas/Fort Worth International Airport, Texas, April 14, 1993 [PB94-910402] p 2660 N94-27766

WEATHER FORECASTING

Short-range cloud amount forecasting with model output statistics [AD-A274769] p 2895 N94-26798

The NOGAPS ten year AMIP integration [AD-A274332] p 2900 N94-26887

Encoding approaches for data link transmission of weather graphics [AD-A274497] p 2772 N94-26963

WEATHERING

Failure behaviour of high density polyethylene with an embrittled surface layer due to weathering [PB94-126406] p 2840 N94-26960

WEIBULL DENSITY FUNCTIONS

Estimation and tests-of-fit for the three parameter Weibull distribution [AD-A274827] p 3004 N94-26496

Simulating high-frequency wind for long durations [DE94-002739] p 2682 N94-27997

WEIERSTRASS FUNCTIONS

The super Weierstrass (zeta)-function and operator product expansions in 2D-induced supergravity on the supertorus [DE94-603664] p 3074 N94-27627

WEIGHT (MASS)

Selection of site injecting adjuvant in chronic inflammation model p 2906 N94-27496

An analysis of the loads applied to a heavy Space Station rack during translation and rotation tasks [NASA-TM-104790] p 2697 N94-28183

WEIGHT ANALYSIS

Design optimization of high-speed proprotor aircraft [NASA-TM-103988] p 2667 N94-26151

WEIGHT REDUCTION

Bipolar Ag-Zn battery p 2864 N94-28135

WEIGHTING FUNCTIONS

Numeric solution of the electric field integral equation using Galerkin's method for axially symmetric cases [ESA-TT-1264] p 2768 N94-26315

Method for calculating stress intensity factors for surface cracks (appendix 2/1) p 2841 N94-27188

Applications of the weight function method (appendix 4/1) p 2842 N94-27190

WEIGHTLESSNESS

Study on posture control and adaptation mechanism under weightlessness: Summary report of ground operations performed for carp experiment (FMPT/L-2) in Space Shuttle mission p 2912 N94-27447

Study on posture control and adaption mechanism under weightlessness: Differences in weight and shape of utricular otolith of carp p 2912 N94-27448

Workshop on Countering Space Adaptation with Exercise: Current Issues [NASA-CP-3252] p 2934 N94-28361

WELD STRENGTH

The study of single-pass GMA welds with different cover gas compositions on HSLA-100 steel [AD-A274857] p 2822 N94-26174

The influence of weld metal alloying additions to extend the heat input range for the submerged arc welding of high strength steels [AD-A274284] p 2738 N94-26679

Use of photostress and strain gages to analyze behavior of weldments [NASA-CR-195269] p 2843 N94-27765

Weldability aspects in the design and fabrication of aluminium structures subjected to fatigue loads. Part 2: Weldability of aluminium alloys using advanced MIG and TIG techniques. Effect of the weld bead geometrical factors on the fatigue behavior of the welded joint [PB94-132446] p 2833 N94-28375

WELD TESTS

Evaluating non-chlorinated solvents for welding applications [DE94-003332] p 2824 N94-27181

Use of photostress and strain gages to analyze behavior of weldments [NASA-CR-195269] p 2843 N94-27765

WELDABILITY

Weldability of Direct-Quenched and Tempered (DQT) high strength steel HT80 [VTT-TIED-1406] p 2731 N94-25623

Weldability of Accelerated-Cooled (AcC) high strength TMCP steel HT50 [VTT-TIED-1410] p 2731 N94-25784

Weldability aspects in the design and fabrication of aluminium structures subjected to fatigue loads. Part 2: Weldability of aluminium alloys using advanced MIG and TIG techniques. Effect of the weld bead geometrical factors on the fatigue behavior of the welded joint [PB94-132446] p 2833 N94-28375

Weldability aspects in the design and fabrication of aluminium structures subjected to fatigue loads. Part 1: Effect of welding on the structural integrity of joint types designed for repairing aluminium ship sections [PB94-132487] p 2833 N94-28378

WELDED JOINTS

Corrosion resistance at welded zones of nuclear fuel reprocessing system p 2722 N94-25546

Study on fatigue crack propagation characteristics around welded joint interface in complexed conditions p 2730 N94-25584

Weldability of Direct-Quenched and Tempered (DQT) high strength steel HT80 [VTT-TIED-1406] p 2731 N94-25623

The study of single-pass GMA welds with different cover gas compositions on HSLA-100 steel [AD-A274857] p 2822 N94-26174

Stress analysis of a secondary-bending specimen [AD-A274842] p 2838 N94-26501

The influence of weld metal alloying additions to extend the heat input range for the submerged arc welding of high strength steels [AD-A274284] p 2738 N94-26679

Evaluation of crack arrest fracture toughness of parent plate, weld metal and heat affected zone of BIS 812 EMA ship plate steel [AD-A274871] p 2839 N94-26859

The influence of TIG welding thermal cycles on HSLA-100 steel plate [AD-A274248] p 2740 N94-27009

Evaluating non-chlorinated solvents for welding applications [DE94-003332] p 2824 N94-27181

Use of photostress and strain gages to analyze behavior of weldments [NASA-CR-195269] p 2843 N94-27765

Weldability aspects in the design and fabrication of aluminium structures subjected to fatigue loads. Part 2: Weldability of aluminium alloys using advanced MIG and TIG techniques. Effect of the weld bead geometrical factors on the fatigue behavior of the welded joint [PB94-132446] p 2833 N94-28375

Weldability aspects in the design and fabrication of aluminium structures subjected to fatigue loads. Part 1: Effect of welding on the structural integrity of joint types designed for repairing aluminium ship sections [PB94-132487] p 2833 N94-28378

WELDING

Digital control and data acquisition for high-value GTA welding [DE94-000885] p 2821 N94-25980

Use of photostress and strain gages to analyze behavior of weldments [NASA-CR-195269] p 2843 N94-27765

Upset welding process for 21-6-9 spherical vessels [DE93-018194] p 2832 N94-28229

Weldability aspects in the design and fabrication of aluminium structures subjected to fatigue loads. Part 1: Effect of welding on the structural integrity of joint types designed for repairing aluminium ship sections [PB94-132487] p 2833 N94-28378

WELDING MACHINES

Digital control and data acquisition for high-value GTA welding [DE94-000885] p 2821 N94-25980

WETLANDS

Methane emissions from natural wetlands [DE93-040796] p 2865 N94-25790

WETTING

Study on interfacial reaction analysis at interfacial joining p 2728 N94-25574

WHEELS

Aircraft wheel life assessment [AD-A274378] p 2823 N94-26976

WHISPERING GALLERY MODES

Mode analysis of gyrotron oscillation using a k-spectrometer [DE94-701195] p 2813 N94-27703

WHISTLERS

Investigation of plasma instabilities in the polar cusp [NASA-CR-195212] p 2879 N94-26599

WHITE NOISE

Longitudinal diffusion of a proton bunch under external noise [DE93-634022] p 3032 N94-26165

Three dimensional object recognition using a complex autoregressive model [AD-A274388] p 2995 N94-26829

Enhanced adaptive statistical filter providing improved performance for target motion analysis noise discrimination statement of government interest [AD-D016039] p 2786 N94-27109

White noise theory of robust nonlinear filtering with correlated state and observation noises [PB94-126661] p 3004 N94-27211

WIGNER COEFFICIENT

Wigner quantum oscillators [DE94-601508] p 3073 N94-26758

WIND (METEOROLOGY)

Machine intelligent gust front algorithm [AD-A273695] p 2680 N94-26196

A preliminary analysis of the US west climatology [DE94-003028] p 2894 N94-26313

A preliminary method for atmospheric soundings in real time using satellite and ground-based remotely sensed data [AD-A274381] p 2880 N94-26828

WIND DIRECTION

Lift-curve slope for structural response calculations [ESDU-93013] p 2648 N94-28063

WIND EFFECTS

The effects of tailwinds and control cross coupling on rotorcraft handling qualities for steep, decelerating instrument approaches and missed approaches [IAR-AN-77] p 2677 N94-26710

Surface roughness lengths [AD-A274550] p 2895 N94-26846

Lift-curve slope for structural response calculations [ESDU-93013] p 2648 N94-28063

WIND MEASUREMENT

Wind measurements with an incoherent lidar [AD-A273756] p 2891 N94-25722

Simulating high-frequency wind for long durations [DE94-002739] p 2682 N94-27997

WIND SHEAR

Machine intelligent gust front algorithm [AD-A273695] p 2680 N94-26196

The relationship of an integral wind shear hazard to aircraft performance limitations [NASA-TM-109080] p 2677 N94-26593

Surface roughness lengths [AD-A274550] p 2895 N94-26846

WIND TUNNEL APPARATUS

Shake test results of the MDHC test stand in the 40- by 80-foot wind tunnel [NASA-TM-108801] p 2641 N94-26596

Installation of models in the 2 m x 3 m low speed wind tunnel [LTR-LA-286] p 2681 N94-27594

WIND TUNNEL MODELS

Installation of models in the 2 m x 3 m low speed wind tunnel [LTR-LA-286] p 2681 N94-27594

Experimental apparatus for optimization of flap position for a three-element airfoil model p 2682 N94-27912

Evaluation of the buoyancy drag on automobile models in low speed wind tunnels p 2658 N94-28352

WIND TUNNEL TESTS

Low-speed pressure distribution measurements over the aft-fuselage, fins, and stabilators of a 1/9th scale F/A-18 wind-tunnel model [AD-A274870] p 2644 N94-26342

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 4: Laser velocimeter wake data, advance ratio of 0.037 [NASA-TM-109040-VOL-4] p 2645 N94-26483

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 1: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0081 and hover tip speed of 603 feet/second [NASA-TM-109040-VOL-1] p 2645 N94-26489

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 2: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 710 feet/second [NASA-TM-109040-VOL-2] p 2645 N94-26492

Investigation of the aerodynamic environment for an advanced lightweight rotor in forward flight. Volume 3: Laser velocimeter inflow data, advance ratio of 0.37, thrust coefficient of 0.0064 and hover tip speed of 603 feet/second [NASA-TM-109040-VOL-3] p 2645 N94-26497

The measurement of disturbance levels in the Langley Research Center 20-inch Mach 6 tunnel [NASA-CR-4571] p 2646 N94-26548

Pressure distributions on a 0.02-scale Space Shuttle orbiter nose at Mach 21.5 in helium [NASA-TM-4495] p 2646 N94-26592

Shake test results of the MDHC test stand in the 40- by 80-foot wind tunnel [NASA-TM-108801] p 2641 N94-26596

Experimental investigation of advanced hub and pylon fairing configurations to reduce helicopter drag [NASA-TM-4540] p 2668 N94-26604

Experimental investigation of the flow quality in the GLT20 subsonic-transonic boundary layer wind tunnel [PB94-126539] p 2681 N94-26815

Wind tunnel investigation of an STOL aircraft model: An effect of engine nacelle shape [NAL-TM-653] p 2647 N94-27235

Transverse vorticity measurements in the University of Houston two stream shear layer facility [AD-A273910] p 2797 N94-27562

Flowfield dynamics in blunt fin-induced shock wave/turbulent boundary layer interactions [NASA-CR-195170] p 2798 N94-27802

Microspheres for laser velocimetry in high temperature wind tunnel p 2682 N94-27903

Experimental apparatus for optimization of flap position for a three-element airfoil model p 2682 N94-27912

Transient flow features of a supersonic jet in a low speed cross flow p 2800 N94-28005

Experimental investigation of the interaction of a thrust reverser jet with an external subsonic flow p 2801 N94-28011

Experiments on the ground vortex formed by an impinging jet in cross flow p 2802 N94-28016

Experiments on interaction force of jets in hypervelocity cross-flow in a shock tunnel p 2659 N94-28022

Vortex generators for control of shock-induced separation. Part 1: Introduction and aerodynamics [ESDU-93024-PT-1] p 2806 N94-28095

Measurements of steady and dynamic pressure on an F/A-18 wind tunnel model at high angles of attack p 2653 N94-28323

Infrared imaging for transition detection in a transonic blowdown wind tunnel p 2653 N94-28325

Experimental study on the shock wave interaction with a hypersonic boundary layer near a convex corner p 2654 N94-28328

Application of the influence function method using the interference distributed loads code to prediction of store aerodynamic load during separation from the CF-18 fighter aircraft p 2654 N94-28330

Aerodynamic performance of novel ducted-tip wings p 2654 N94-28331

Experimental investigations into the wall interference and sidewall boundary layer effects in the National Research Council/Inst. for Aerospace Research High Reynolds Number 2-D Test Facility p 2658 N94-28350

Computation of wind-tunnel side-wall interference using 3D Navier-Stokes code p 2658 N94-28351

Evaluation of the buoyancy drag on automobile models in low speed wind tunnels p 2658 N94-28352

WIND TUNNEL WALLS

Evaluation of the prototype dual-axis wall attitude measurement sensor [NASA-TM-109056] p 2811 N94-26707

Evaluation of the buoyancy drag on automobile models in low speed wind tunnels p 2658 N94-28352

WIND TUNNELS

Research and test facilities [NASA-TM-109685] p 2681 N94-26684

Comparative analysis of different configurations of PLC-based safety systems from reliability point of view p 2836 N94-27925

WIND TURBINES

The identification of inflow fluid dynamics parameters that can be used to scale fatigue loading spectra of wind turbine structural components [DE94-000231] p 2791 N94-26117

An overview of DOE's wind turbine development programs [DE93-018224] p 2856 N94-26513

User's guide for the frequency domain algorithms in the LIFE2 fatigue analysis code [DE94-004678] p 2838 N94-26563

Analysis/test correlation using VAWT-SDS on a step-relaxation test for the rotating Sandia 34 m test bed [DE94-002290] p 2857 N94-26700

Extraction of modal parameters from an operating HAWT using the Natural Excitation Technique (NExT) [DE94-001831] p 2859 N94-27004

Simulating high-frequency wind for long durations [DE94-002739] p 2682 N94-27997

WIND VELOCITY

Wind measurements with an incoherent lidar [AD-A273756] p 2891 N94-25722

Conversion of the CLUSE model for applications over open ocean
[AD-A273750] p 2893 N94-26013
Modelling atmospheric turbulence effects on ground-based telescope systems
[DE94-004211] p 3102 N94-26528
Simulating high-frequency wind for long durations
[DE94-002739] p 2682 N94-27997

WINDING
Winding numbers in homotopy theory from integers to reals
[DE94-601510] p 2992 N94-26367

WINDOWS (COMPUTER PROGRAMS)
Implementing a multiple criteria model base in co-op with a graphical user interface generator
[AD-A274901] p 3093 N94-26181
An artificial reality environment for remote factory control and monitoring p 2687 N94-27369
Development of Calcomp compatible interface library 'piflib' on X Window System
[DE94-701190] p 2973 N94-27702

WINDPOWER UTILIZATION
Renewable energy systems in Mexico: Installation of a hybrid system
[DE93-013716] p 2853 N94-25946
NEMO 2: New energy systems and technologies
[DE94-702060] p 2855 N94-26240
Programme for the promotion of wind power production
[DE94-702065] p 2855 N94-26242
Hybrid power system for remote communications stations
[AD-A274963] p 2782 N94-26301
An overview of DOE's wind turbine development programs
[DE93-018224] p 2856 N94-26513

WINDPOWERED GENERATORS
Programme for the promotion of wind power production
[DE94-702065] p 2855 N94-26242

WINDS ALOFT
Modeling of the coupled magnetospheric and neutral wind dynamos
[NASA-CR-195273] p 2883 N94-27852

WING FLOW METHOD TESTS
Numerical simulation of a powered-lift landing
p 2671 N94-28033

WING OSCILLATIONS
Understanding and development of a prediction method of transonic limit cycle oscillation characteristics of fighter aircraft
[NLR-TP-92210-U] p 2679 N94-27798

WING PANELS
Investigation of the bond strength of a discrete skin-stiffener interface
[NLR-TP-92183-U] p 2670 N94-27796

WING TIPS
Aerodynamic performance of novel ducted-tip wings
p 2654 N94-28331

WING-FUSELAGE STORES
Application of the influence function method using the interference distributed loads code to prediction of store aerodynamic load during separation from the CF-18 fighter aircraft p 2654 N94-28330

WINGS
An investigation into the aerodynamic effects of wing patches
[ISBN-0-315-84121-4] p 2646 N94-26672
Automation of formation flight control
[AD-A274137] p 2678 N94-27132
Investigation of aerodynamic design issues with regions of separated flow p 2658 N94-27902
Wing design for a civil tiltrotor transport aircraft: A preliminary study p 2671 N94-27917
Effects, limits, and limitations of spanwise blowing
p 2659 N94-28027
Program for calculation of maximum lift coefficient of plain aerofoils and wings at subsonic speeds
[ESDU-93015] p 2649 N94-28076
Wing lift increment at zero angle of attack due to deployment of single-slotted flaps at low speeds
[ESDU-93019] p 2649 N94-28140
Calculation of unsteady incompressible inviscid flow about wings and bodies using CANAERO-T panel model
p 2655 N94-28334
Ice accretion on aircraft wings p 2657 N94-28345

WINTER
Propagation of cold air masses in East Asia and its associated planetary-scale function
[AD-A274304] p 2895 N94-26850
Meteorological data at the Nagaoka Institute of Snow and Ice Studies
[REPT-158] p 2896 N94-27169

WIRE
Liquid and solid solubility of Ag in Bi2Sr2CaCu2O8
[DE94-002829] p 2735 N94-26273
Superconducting fibers made with yttrium and yttrium oxide interlayers and barium cuprate cover layers
[AD-D016073] p 3070 N94-28225

WIRE CLOTH
A constitutive model for layered wire mesh and aramid cloth fabric
[DE94-003275] p 2708 N94-26796

WIRELESS COMMUNICATION
Efficient massively parallel simulation of dynamic channel assignment schemes for wireless cellular communications
[NASA-CR-191593] p 2971 N94-27558

WOOD
Report of National Institute for Resources and Environment. No. 5: Study on direct liquefaction of woody biomass
[JTN-94-80551] p 2859 N94-27204

WORDS (LANGUAGE)
Parallel string matching algorithms
[AD-A274502] p 3100 N94-27164
Researches of the Electrotechnical Laboratory. No. 955: Speech recognition by description of acoustic characteristic variations
[JTN-94-80604] p 2775 N94-27249

WORKING FLUIDS
The Lightcraft project: Flight technology for a hypersonic mass transit system p 2670 N94-25695
Liquid metal MHD research and development in Israel
p 2854 N94-26055
Modelling the mass migration phenomena in partially frozen heat pipes
[DE94-002716] p 2797 N94-27709

WORKLOADS (PSYCHOPHYSIOLOGY)
Developing realistic cooperative behaviors for autonomous agents in air combat simulation
[AD-A274077] p 2937 N94-25774
Developing a sophisticated user interface to support domain-oriented application composition and generation systems
[AD-A274080] p 2960 N94-25994
A critical analysis of workload predictions generated by multiple resource theory during early crewstation design
[AD-A274804] p 2941 N94-26339
The use of EEG as a workload assessment tool in flight test
[AD-A274568] p 2910 N94-26847
Workload transition: Implications for individual and team performance
[AD-A274538] p 2941 N94-26964
Task demand, workload, and performance
[PB94-123627] p 2942 N94-27155

WORKSTATIONS
Weapon system integration for the AFIT virtual cockpit
[AD-A274058] p 2667 N94-25772
Object-oriented design and implementation of a parallel Ada simulation system
[AD-A274119] p 2979 N94-25906
Vcalc: A 3-space vector calculator
[AD-A274520] p 2965 N94-26831
Interactive control of a parallel simulation from a remote graphics workstation
[AD-A274217] p 2981 N94-27070
A graphical workstation based part-task flight simulator for preliminary rapid evaluation of advanced displays
p 2641 N94-27286
VENI, video, VICI: The merging of computer and video technologies p 2686 N94-27362

WOVEN COMPOSITES
Investigation of forced and isothermal chemical vapor infiltrated SiC/SiC ceramic matrix composites
[DE94-004544] p 2708 N94-26557

WURTZITE
Se EXAFS study of the elevated wurtzite to rock salt structural phase transition in CdSe nanocrystals
[DE94-003247] p 3054 N94-26125

X

X RAY ABSORPTION
Morphological analysis of ionomers
[DE94-003660] p 2749 N94-26005
X ray absorption studies of Ti/polymer and Cr/polymer interfaces
[DE94-003008] p 2753 N94-26770
An x ray absorption fine structure study of ordering in polythiophene thin films
[AD-A274235] p 2753 N94-26822

X RAY ANALYSIS
Inner fiber observation for metal matrix composites under the stress load condition utilizing Synchrotron Orbital Radiation (SR) by X-ray CT p 2724 N94-25553
In situ x ray reflectivity measurements of thin film structural evolution
[DE94-002289] p 3051 N94-25944

X RAY ASTRONOMY
Cosmic x ray physics
[NASA-CR-195225] p 3115 N94-27236

X RAY ASTROPHYSICS FACILITY
Space projects: Astrophysics facility program contains cost and technical risks. Report to Congressional Requesters
[GAO/NSIAD-94-80] p 2696 N94-27382

X RAY DETECTORS
Hardware design of a spherical mini-rover
p 2833 N94-25669
A space fiber-optic x ray burst detector
[DE94-002722] p 2696 N94-26808
Cosmic x ray physics
[NASA-CR-195225] p 3115 N94-27236
The x ray holographic microscopy using the atomic-force microscope
[DE94-004003] p 2814 N94-27779

X RAY DIFFRACTION
Study on improvement in physical analysis method of metallic materials p 2728 N94-25577
Transition metals in highly correlated discotic phases: Designing metallomesogens with selected intermolecular organizations
[AD-A274695] p 2736 N94-26452
Qualitative analysis of rare earth elements contained in the phosphogypsum
[DE93-614153] p 2716 N94-26518
Experimental measurement of local displacement and chemical pair correlations in crystalline solid solutions
[DE94-001124] p 3065 N94-27251
High intensity x ray instrumentation for residual strain measurements in composites and textured materials
[ISBN-0-315-85169-4] p 2842 N94-27278
Multiple exposure CCD detector for high-speed laser pump, x ray probe Laue scattering
[DE94-004618] p 2820 N94-27781
Crystallographic analyses of clathrate hydrates included in Vostok ice cores p 2885 N94-27969
Energy Dispersive X ray Diffraction (EDXD) apparatus for liquids at high temperature p 2721 N94-28159

X RAY FLUORESCENCE
Qualitative analysis of rare earth elements contained in the phosphogypsum
[DE93-614153] p 2716 N94-26518

X RAY IMAGERY
Imaging with x ray lasers
[DE94-002844] p 2816 N94-26020

X RAY INSPECTION
The development of an in-motion radiography system for large area aircraft scanning
[DREP-TM-93-53] p 2670 N94-27666

X RAY LASERS
Imaging with x ray lasers
[DE94-002844] p 2816 N94-26020
Phase conjugated lasers applied to commercial x ray lithography
[DE94-001529] p 2819 N94-27018

X RAY SCATTERING
Structural study of Cu/Co multilayer by anomalous small-angle x ray scattering p 2744 N94-28160

X RAY SOURCES
Meson spectroscopy and particle astrophysics
[DE94-001799] p 3115 N94-27003
Cosmic x ray physics
[NASA-CR-195225] p 3115 N94-27236

X RAY SPECTRA
Balloon-borne measurements of the SN1987A hard x ray continuum p 3115 N94-26689

X RAY SPECTROSCOPY
Study on analyzing method establishment for metallic material development p 2729 N94-25578
Se EXAFS study of the elevated wurtzite to rock salt structural phase transition in CdSe nanocrystals
[DE94-003247] p 3054 N94-26125
X ray absorption studies of Ti/polymer and Cr/polymer interfaces
[DE94-003008] p 2753 N94-26770

X RAY STARS
An April 1991 outburst from 4U0115+63 observed by BATSE
[NASA-CR-195252] p 3116 N94-27440

X RAY TUBES
Fast photoconductor CdTe detectors for synchrotron x ray studies
[DE94-001334] p 3054 N94-26139

X RAYS
Advanced qualification techniques
[DE94-003709] p 2780 N94-25812
Electron energy loss spectroscopy in a crystalline environment using inner shell ionization
[DE94-601820] p 3018 N94-26334
Experimental measurement of local displacement and chemical pair correlations in crystalline solid solutions
[DE94-001124] p 3065 N94-27251

Acceleration of electrons and ions by strong lower-hybrid turbulence in solar flares
[NASA-TM-109723] p 3111 N94-27953

XENON

Stationary plasma thruster plume emissions
[NASA-CR-194471] p 2701 N94-26209

Calculations of population transfer during intense laser pulses
[DE94-001060] p 2818 N94-26698

Disintegration of (C60) by Xe ion irradiation
[DE94-601913] p 3023 N94-26929

Damage growth in MgAl2O4 crystals by Xe ion irradiations
[DE94-005009] p 3069 N94-27828

Y

YAG LASERS

The development of Cr, Tm, Ho:YAG lasers for airborne lidar
[AD-A274895] p 2816 N94-26178

Development of surgical CW Nd:YAG laser with optical fiber delivery system
[DE93-632902] p 2817 N94-26185

Development of real-time pulse shaping technology in solid-state lasers
[DE93-633438] p 2817 N94-26403

Development of high average power industrial Nd:YAG laser with peak power of 10 kW class
[DE93-633201] p 2818 N94-26520

Distributed Nd:YAG laser welding and process control in inert glove boxes
[DE94-002629] p 2818 N94-26605

Kinoform/lens system for injecting a high power laser beam into an optical fiber
[DE94-003226] p 2819 N94-27262

YANG-MILLS THEORY

Classical solutions of Yang-Mills-Chern-Simons theory in 2+1 dimensions: A quasi-linear superposition
[DE93-634335] p 3006 N94-26270

C-periodicity and the physical mass in the 3-state Potts model
[DE94-601551] p 3019 N94-26423

Component structure of the N = 2 super-Yang-Mills theory in the harmonic superspace
[DE93-634340] p 3072 N94-26453

Anomaly candidates and invariants of D 4, N 1 supergravity theories
[NIKHEF-H/93-12] p 3072 N94-26541

Operator regularization and renormalization theory
[ISBN-0-315-49334-8] p 3007 N94-27264

A method for obtaining quantum doubles from the Yang-Baxter R-matrices
[DE94-606300] p 3001 N94-27846

YARNS

Superconducting fibers made with yttrium and yttrium oxide interlayers and barium cuprate cover layers
[AD-D016073] p 3070 N94-28225

YAWING MOMENTS

Contribution of body-mounted fins and tailplanes to lateral derivatives due to sideslip at subsonic speeds for general body width to height ratio
[ESDU-93007] p 2648 N94-28057

YBCO SUPERCONDUCTORS

Grain boundary degradation of YBCO superconductors sintered in CO2-containing atmospheres
[DE94-003206] p 3053 N94-26029

Window least squares method applied to statistical noise smoothing of positron annihilation data
[DE93-634665] p 3003 N94-26385

A study on the development of high T(sub c) superconducting materials
[DE93-633529] p 3057 N94-26404

Submillimeter residual losses in high-(Tc) superconductors
[DE94-003241] p 3058 N94-26516

A study on the development of high-T(c) superconducting wire
[DE93-632438] p 2783 N94-26546

Demonstration of monolithic co-fabrication of Y1Ba2Cu3O7-Sigma and CMOS devices on the same sapphire substrate
[AD-A274757] p 3059 N94-26566

Preparation and characterization of high temperature superconductor film surfaces
[AD-A274293] p 3059 N94-26681

Controlled heterogeneous nucleation of melt-textured YBa2Cu3O(6+x) by addition of Al2O3 particles
[AD-A274605] p 3062 N94-26892

Technical report of ISSP. Ser. A, no. 2681: Orbital and spin susceptibilities of the plane copper sites in YBa2Cu3O(x) system
[JTN-94-80567] p 3064 N94-27177

Synthesis, rheology, and forming of Y-Ba-Cu-O ceramics
[DE94-005558] p 2757 N94-27695

Fermi surface ridge at second and third Umklapp positron annihilations in Y Ba2Cu3O(7-delta)
[DE93-634760] p 3070 N94-27995

Superconducting fibers made with yttrium and yttrium oxide interlayers and barium cuprate cover layers
[AD-D016073] p 3070 N94-28225

YIELD STRENGTH

Determination of fracture stress and effective crack tip radius from toughness (KIc) and yield strength (Y)
[AD-A274014] p 2836 N94-25754

Radiation hardening effects on localized deformation and stress corrosion cracking of stainless steels
[DE94-004308] p 2731 N94-25804

On experimental studies of yield surfaces of metals: A more general approach
[IFTR-42/1993] p 2739 N94-26824

Processing and mechanical properties of laminated metal composites of Al 6090-25 volume percent SiC(sub p) and Al 5182
[DE94-001070] p 2708 N94-26930

Fatigue propagation behaviour of short cracks (1-2 mm) in steels
[ESDU-93033] p 2845 N94-28145

YOKES

Reconfigurable aircraft stick control
[AD-D016043] p 2681 N94-27113

YTTERBIUM COMPOUNDS

Fibrous emissive burners selective and broad band
[PB94-128329] p 2859 N94-27225

YTTRIA-STABILIZED ZIRCONIA

Oxygen reduction at a YSZ interface with cathode materials La(1-x)(Ca or Sr)(x)MnO3(1-x)CaMnO3
[DE94-002954] p 3054 N94-26147

YTTRIUM COMPOUNDS

Space-R thermionic space nuclear power system: Design and technology demonstration
[DE94-001890] p 2699 N94-25929

Preparation, characterization, and thermal behaviour study of lanthanides (3) and yttrium (3) 4-methoxy benzylidene pyruvate in solid state
[DE94-604079] p 3068 N94-27697

YTTRIUM OXIDES

Synthesis, rheology, and forming of Y-Ba-Cu-O ceramics
[DE94-005558] p 2757 N94-27695

Superconducting fibers made with yttrium and yttrium oxide interlayers and barium cuprate cover layers
[AD-D016073] p 3070 N94-28225

YTTRIUM-ALUMINUM GARNET

Technical report of ISSP. Ser. A, no. 2682: Pressure dependence of Sm:YAG fluorescence to 50 GPa: A new calibration as a high pressure scale
[JTN-94-80568] p 3066 N94-27354

YUKAWA POTENTIAL

Stochastic space-time, confinement potential and particle propagator
[DE94-606415] p 3074 N94-27680

Z

ZEEMAN EFFECT

Zeeman laser interferometry for detection and chemical analysis
[DE94-003963] p 2719 N94-27728

ZEOLITES

Use of oxygen-17 isotope in the characterization of zeolites and related structures by nuclear magnetic resonance spectroscopy
[VTT-TIED-1448] p 2714 N94-26251

ZERO ANGLE OF ATTACK

Normal force of low aspect ratio cropped-delta wings at pre-stall angles of attack and subsonic speeds
[ESDU-93034] p 2648 N94-27955

Wing lift increment at zero angle of attack due to deployment of single-slotted flaps at low speeds
[ESDU-93019] p 2649 N94-28140

ZINC COATINGS

Cracking of textured zinc coating during forming process
[DE94-003414] p 2750 N94-26085

ZINC COMPOUNDS

Heavy-electron behavior in large coordination compounds CeZn11 and UZn12
[REPT-A-2663] p 3049 N94-25614

ZINC OXIDES

Zinc(2) oxide stability in alkaline sodium phosphate solutions at elevated temperatures
[DE94-003316] p 2715 N94-26320

Technical report of ISSP. Ser. A, no. 2677: Octa-twin model of tetrapod ZnO crystals
[JTN-94-80563] p 3069 N94-27756

The ZnO thin films with C-axis orientation prepared on the room temperature substrate by the ECR multipolar plasma sputtering method
[DE94-605039] p 2758 N94-27857

ZINC SELENIDES

Heavy-electron behavior in large coordination compounds CeZn11 and UZn12
[REPT-A-2663] p 3049 N94-25614

Indium donor complexes with cation vacancies in CdTe and ZnSe
[DE94-002731] p 3063 N94-26958

ZINC SULFIDES

Characterization of ZnS-GaP naon-composites
[DE94-004888] p 2712 N94-27813

ZIRCONIUM ALLOYS

Zr-rich corner of the Zr-Sn-O diagram
[DE93-633764] p 2734 N94-26161

Grain by grain study of the mechanisms of crack propagation during iodine SCC of Zry-4
[DE93-633765] p 2734 N94-26162

Zr-Sn-Nb alloys: Preliminary studies
[DE93-633767] p 2734 N94-26263

Fracture Toughness Round Robin Test International in pressure tube materials
[DE93-634140] p 2837 N94-26265

Eutectic transformation L in equilibrium to Zr6Fe23 + Fe(tau) in the Fe-Zr system
[DE93-633766] p 2735 N94-26295

Hydrothermal growth and characterization of oxides in zirconium alloys
[DE94-602981] p 2743 N94-27829

Differential scanning calorimetric study of solid state amorphization and crystallization in Zr/Co and Zr/Ni multilayers p 2745 N94-28161

The corrosion behavior of sputter-deposited magnesium-valve metal alloys p 2745 N94-28164

CO2 methanation catalysts prepared from amorphous Ni-valve metal alloys containing platinum group elements
p 2745 N94-28166

ZIRCONIUM HYDRIDES

Space-R thermionic space nuclear power system: Design and technology demonstration
[DE94-001890] p 2699 N94-25929

ZIRCONIUM OXIDES

Study on film generation phenomena by particle deposition p 2728 N94-25575

Oxygen reduction at a YSZ interface with cathode materials La(1-x)(Ca or Sr)(x)MnO3(1-x)CaMnO3
[DE94-002954] p 3054 N94-26147

Stress-induced phase transformation in ZrO2 materials
[ISBN-0-315-83373-4] p 2752 N94-26661

Bench-scale synthesis of nanoscale materials
[DE94-004787] p 2742 N94-27786

Hydrothermal growth and characterization of oxides in zirconium alloys
[DE94-602981] p 2743 N94-27829

ZODIACAL DUST

Zodiacal light data investigation. Interim results for the Earthlimb Clutter Experiment
[AD-A274461] p 3104 N94-27265

ZODIACAL LIGHT

Zodiacal light data investigation. Interim results for the Earthlimb Clutter Experiment
[AD-A274461] p 3104 N94-27265

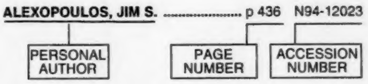
ZONAL FLOW (METEOROLOGY)

Global barotropic response to a tropical forcing
[NASA-CR-195256] p 2896 N94-27408

PERSONAL AUTHOR INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 32 NUMBER 7

Typical Personal Author Index Listing



Listings in this index are arranged alphabetically by personal author. The page number helps you locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

A

AARTS, RONALD GODFRIED KARIEN MARIE
p 2792 N94-26479

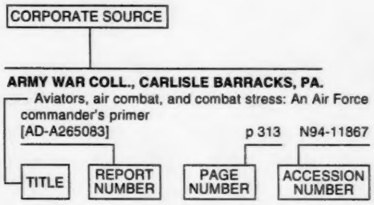
CORPORATE SOURCE INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 32 NUMBER 7

Typical Corporate Source Index Listing



CORPORATE SOURCE
ARMY WAR COLL., CARLISLE BARRACKS, PA.
Aviators, air combat, and combat stress: An Air Force commander's primer
[AD-A265083] p 313 N94-11867
TITLE
REPORT NUMBER
PAGE NUMBER
ACCESSION NUMBER

Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The accession number denotes the number by which the citation is identified. The page number helps you locate the citation in the abstract section. The titles are arranged under each corporate source in ascending accession number order.

A

ABB POWER GENERATION, INC., BADEN (SWITZERLAND).
Controls, monitoring and performance measurements p 2831 N94-28086

AC, INC., HUNTSVILLE, AL.
Development and application of contamination technology for MSFC managed space systems
[NASA-CR-193934] p 2697 N94-27421

ACADEMY OF SCIENCES (USSR), LENINGRAD.
Automated system for gas detectors providing with binary mixtures
[DE93-634192] p 2715 N94-26406

ACADEMY OF SCIENCES (USSR), MOSCOW.
A study of very high energy hadron interactions through observation of cosmic-ray families of visible energy greater than 500 TeV, 1 p 3112 N94-25625
A study of very high energy hadron interactions through observation of cosmic-ray families of visible energy greater than 500 TeV, 2 p 3112 N94-25626
A study of very high energy hadron interactions through observation of cosmic-ray families with visible energy not less than 500 TeV, 3 p 3112 N94-25627
Solar energy utilization in the USSR p 2853 N94-26052
Radiation applications of physical chemistry p 2854 N94-26054
Ways to improve MHD power plants and prospects of their application p 2854 N94-26056

ACADEMY OF SCIENCES (USSR), NOVOSIBIRSK.
Electron microscopic analysis of meiotic chromosome pairing in male house musk shrew, Suncus murinus p 2906 N94-27493

ADROIT SYSTEMS, INC., FAIRBORN, OH.
Image quality analysis of compressed synthetic aperture radar imagery
[AD-A273399] p 2774 N94-27170

ADVISORY GROUP FOR AEROSPACE RESEARCH AND DEVELOPMENT, NEUILLY-SUR-SEINE (FRANCE).
Computational and Experimental Assessment of Jets in Cross Flow
[AGARD-CP-534] p 2799 N94-28003

AERONAUTICAL RESEARCH INST. OF SWEDEN, STOCKHOLM.
Calculation of viscous drag of two low angle of attack supercritical profiles
[FFA-TN-1984-22] p 2644 N94-26104

AERONAUTICAL RESEARCH LABS., MELBOURNE (AUSTRALIA).
Low-speed pressure distribution measurements over the aft-fuselage, fins, and stabilators of a 1/9th scale F/A-18 wind-tunnel model
[AD-A274870] p 2644 N94-26342
Stress analysis of a secondary-bending specimen
[AD-A274842] p 2838 N94-26501
Computation of non-isentropic internal flows with variable density
[AD-A274848] p 2794 N94-26801

AEROSPACE CORP., EL SEGUNDO, CA.
Quiet-time intensifications along the poleward auroral boundary near midnight
[ATR-93(7248)-2] p 2877 N94-26201
Diode-laser-pumped, gas-cell atomic clocks
[AD-A274812] p 3008 N94-26484
An ultrasonic testing technique for monitoring the cure and mechanical properties of polymeric materials
[AD-A274536] p 2753 N94-26842
Investigation of ACC/CCI tunnel diodes
[AD-A274549] p 2785 N94-26845
Screen test for cadmium and nickel plates p 2860 N94-28106
Calculation of the thermoneutral potential of NiCd and NiH2 cells p 2861 N94-28111
Performance model of a recirculating stack nickel hydrogen cell p 2861 N94-28112
Air Force standards for nickel hydrogen battery p 2862 N94-28116
Photoelectron spectroscopic studies of the electronic structure and bonding in TiC and TiN
[ATR-93(8361)-2] p 2746 N94-28185
Proton aurora and substorm intensifications
[ATR-93(7248)-1] p 2887 N94-28218

AEROSPACE CORP., LOS ANGELES, CA.
Cycle life versus depth of discharge update on modeling studies p 2862 N94-28115

AEROSPACE MEDICAL RESEARCH LABS., BROOKS AFB, TX.
Performance recovery in the baboon following (+)G sub z-induced loss of consciousness
[AD-A274411] p 2902 N94-26991

AEROSPATIALE, LES MUREAUX (FRANCE).
The Ariane 5 data management system p 2950 N94-26724

AEROSPATIALE, TOULOUSE (FRANCE).
System for generating, aboard an aircraft, during takeoff, of a signal capable of producing an alert or an alarm, in case of malfunction
[CA-PATENT-APPL-SN-2,018,94] p 2659 N94-26293

AEROSPATIALE, VERRIERES-L-BUISSON (FRANCE).
Numerical assessment of aerodynamic interactions on missiles with transverse jets control p 2659 N94-28031

AEROSPATIALE AQUITAINE, SAINT-MEDARD EN JALLES (FRANCE).
Testing procedure for toughness characterisation of ceramic matrix composites
[REPT-932-430-101] p 2711 N94-27586

AGENCY FOR ASSESSMENT AND APPLICATION OF TECHNOLOGY, JAKARTA (INDONESIA).
Research and observation programmes on global changes in Indonesia p 2873 N94-28277

AICHI AGRICULTURAL RESEARCH CENTER, NAGA (JAPAN).
Skeletal development and ossification of the swine fetuses p 2905 N94-27491

AICHI MEDICAL UNIV., NAGAKUTE (JAPAN).
An attempt of intraneural stimulation by microelectrode inserted in skin sympathetic nerve fascicle p 2930 N94-27529
Enhancement of skin sympathetic nerve activity in amyotrophic lateral sclerosis p 2930 N94-27532

AICHI UNIV. OF EDUCATION (JAPAN).
Telescience testbedding under hypobaric hypoxic conditions: Evaluation by operation ability and recognition ability p 2913 N94-27450
Heart rate change in normal and labyrinthectomized hamsters during parabolic flight p 2914 N94-27454

AIR-CONDITIONING AND REFRIGERATION TECHNOLOGY INST., INC., ARLINGTON, VA.
Measurement of viscosity, density, and gas solubility of refrigerant blends in selected synthetic lubricants
[DE94-003609] p 2713 N94-25934

AIR FORCE CIVIL ENGINEERING CENTER, TYNDALL AFB, FL.
Engineering Technical Letter (ETL) 93-5: Fire protection engineering criteria, electronic equipment installations
[AD-A274835] p 2762 N94-26084

AIR FORCE FLIGHT TEST CENTER, EDWARDS AFB, CA.
The use of EEG as a workload assessment tool in flight test
[AD-A274568] p 2910 N94-26847

AIR FORCE INST. OF TECH., WRIGHT-PATTERSON AFB, OH.
Numerical simulation of tomographic reconstruction for the study of turbulence using optical wavefront sensor measurements
[AD-A273851] p 2789 N94-25587
Vibrational energy transfer within the B 3Pi (O(+) sub u) state of 79BR2 upon collision with N2, O2, NO, and SF6
[AD-A273905] p 3011 N94-25589
Evaluation of a concentration probe for application in a supersonic flow field
[AD-A273915] p 2643 N94-25592
Human visual system enhancement of reconstructed satellite images
[AD-A273867] p 2693 N94-25595
The application of simulated annealing to stochastic systems
[AD-A273850] p 3001 N94-25607
Air pollution transport modeling
[AD-A273863] p 2865 N94-25609
High resolution fourier transform absorption spectrum of 79Br2 B3 Pi(Ou+) X1 sigma g+
[AD-A273864] p 2956 N94-25610
Creation of prototype aircrew protection equipment based on face anthropometry
[AD-A273865] p 2940 N94-25611
A comparison of three approximate mathematical models for the gravity gradient stabilized satellite
[AD-A273832] p 2694 N94-25615
Failure mechanisms of high temperature semiconductor lasers
[AD-A273833] p 2815 N94-25616
Development and implementation of a scramjet cycle analysis code with a finite-rate-chemistry combustion model for use on a personal computer
[AD-A273834] p 2673 N94-25617
Evaluation of an Acoustic Charge Transport (ACT) device for adaptive interference suppression in spread spectrum communications systems
[AD-A274073] p 2765 N94-25647
Development of a 4-bit parallel analog-to-digital converter and a four-quadrant double-balanced mixer using heterojunction bipolar transistor technology
[AD-A274074] p 2947 N94-25648
Vulnerability assessment using a fuzzy logic based method
[AD-A274075] p 2957 N94-25649
Experimental analysis of heat transfer characteristics and pressure drop through screen regenerative heat exchangers
[AD-A273902] p 2790 N94-25657
Feasibility study of a multiaperture telescope for deep-space Earth surveillance
[AD-A273903] p 3102 N94-25658
Prototype space fabrication platform
[AD-A273904] p 2694 N94-25659

Hyperspectral analysis of space objects: Signal to noise evaluation
[AD-A273882] p 2765 N94-25728

Characterization of an LCD for use as a programmable phase shifter to produce a single-lobed far-field pattern in a phased array
[AD-A273883] p 3034 N94-25729

Improved quality of reconstructed images through sifting of data in statistical image reconstruction
[AD-A273884] p 3034 N94-25730

Binaural room simulation
[AD-A273823] p 3009 N94-25737

Automating satellite range scheduling
[AD-A273829] p 2694 N94-25738

Investigation of compressive behavior for metal matrix composites with a circular hole
[AD-A273835] p 2705 N94-25739

Dynamic response of a compressor research facility
[AD-A273836] p 2679 N94-25740

Objective image quality metrics: Applications for partially compensated images of space objects
[AD-A273837] p 2847 N94-25741

Performance impacts for actuator misalignments and failures in large-aperture adaptive-optic telescopes
[AD-A273838] p 3034 N94-25742

Optimal control design advantages utilizing two-degree-of-freedom controllers
[AD-A273839] p 2984 N94-25743

Characterization of nonlinear effects in optically pumped vertical cavity surface emitting lasers
[AD-A273840] p 2815 N94-25744

Analysis and development of an F-5 pollution prevention management program with recommendations for creation of similar programs for other aircraft
[AD-A274016] p 2865 N94-25755

Design of a shared coherent cache for a multiple channel architecture
[AD-A274026] p 3034 N94-25758

Color image segmentation
[AD-A274027] p 2984 N94-25759

Performance measurement of three commercial object-oriented database management systems
[AD-A274028] p 3096 N94-25765

Analyzing adaptive beamformer performance in a stable multipath environment
[AD-A274029] p 2766 N94-25766

ObjectSim: A reusable object oriented DIS visual simulation
[AD-A274030] p 2958 N94-25767

Performance comparison of shearing interferometer and Hartmann wave front sensors
[AD-A274031] p 3034 N94-25768

System design analysis of a lightweight laser satellite terminal
[AD-A274033] p 2690 N94-25769

Filtering, coding, and compression with Malvar wavelets
[AD-A274055] p 2780 N94-25770

Design of a subsonic envelope flight control system for the Vista F-16 using quantitative feedback theory
[AD-A274057] p 2676 N94-25771

Weapon system integration for the AFIT virtual cockpit
[AD-A274058] p 2667 N94-25772

Developing realistic cooperative behaviors for autonomous agents in air combat simulation
[AD-A274077] p 2937 N94-25774

Modal control of a satellite in an unstable periodic orbit about the Earth-Sun interior Lagrange point
[AD-A273707] p 2694 N94-25776

Domain analysis and modeling of a model-based software executive
[AD-A274087] p 2958 N94-25783

Neural networks for dynamic flight control
[AD-A274089] p 2676 N94-25785

A cost model for USAF acquisition of commercial aircraft for service in the special air mission fleet
[AD-A274012] p 3093 N94-25796

A method for populating the knowledge base of APTAS, a domain-oriented application composition system
[AD-A274034] p 2766 N94-25797

Source code for the OO1 benchmark and the AFIT simulation benchmark
[AD-A274035] p 2958 N94-25799

Analysis and simulation of a GPS receiver design using combined delay-lock and modified tanlock loops
[AD-A274037] p 2664 N94-25810

A study of two dimensional tapered periodic edge treatments to reduce wideband edge diffraction
[AD-A274054] p 2766 N94-25824

Design analysis of a combined optical/LADAR deep-space surveillance satellite
[AD-A274040] p 2694 N94-25832

Design of a flight controller for an unmanned research vehicle with control surface failures using quantitative feedback theory
[AD-A274049] p 2677 N94-25833

Predicting nonlinear time series
[AD-A274051] p 2990 N94-25834

Object imaging accomplished with an integrated circuit robotic tactile sensor incorporating a piezoelectric polyvinylidene fluoride thin film
[AD-A274038] p 2780 N94-25845

Electrical properties of p-type GaInP2
[AD-A273771] p 3051 N94-25856

A nonlinear three-dimensional micromechanics model for fiber-reinforced laminated composites
[AD-A273772] p 2705 N94-25857

Shock wave interaction with L-shaped structures
[AD-A273774] p 2790 N94-25858

Influence of embedded optical fibers on compressive strength of advanced composites
[AD-A273775] p 2705 N94-25859

A numerical study of high-speed missile configurations using a block-structured parallel algorithm
[AD-A273776] p 2979 N94-25860

Developing prediction regions for a time series model for hurricane forecasting
[AD-A273777] p 2892 N94-25861

Effects of crenulations on three dimensional losses in a linear compressor cascade
[AD-A273778] p 2790 N94-25862

A study of graphite peek composite with central elliptical holes under tension
[AD-A273779] p 2705 N94-25863

Wake passage effects on the losses in a linear turbine cascade
[AD-A273794] p 2790 N94-25874

Spectroscopic and vibrational energy transfer studies in molecular bromine
[AD-A273795] p 3014 N94-25875

Characterization of fatigue damage in a metal matrix composite (SCS-6/Ti-15-3) at elevated temperature
[AD-A273797] p 2706 N94-25876

Development of the Air Force contingency contracting course framework
[AD-A273921] p 3093 N94-25895

An exploratory survey of methods used to develop measures of performance
[AD-A273945] p 2834 N94-25896

A test of the theory of reasoned action at the group level of analysis
[AD-A273965] p 2937 N94-25897

A virtual environment for satellite modeling and orbital analysis in a distributed interactive simulation
[AD-A274114] p 2694 N94-25904

Evaluation of moderate angle of attack roll of a dual engine, thrust vectoring aircraft using quantitative feedback theory
[AD-A274118] p 2667 N94-25905

Object-oriented design and implementation of a parallel Ada simulation system
[AD-A274119] p 2979 N94-25906

Object interaction in a parallel object-oriented discrete-event simulation
[AD-A274084] p 2959 N94-25942

The AFIT multielectrode array for neural recording and simulation: Design, testing, and encapsulation
[AD-A274086] p 2909 N94-25943

A numerical determination of bifurcation points for low Reynolds number conical flows
[AD-A273984] p 2791 N94-25991

Multiple model adaptive estimation applied to the LAMBDA URV for failure detection and identification
[AD-A274078] p 3002 N94-25992

Developing a sophisticated user interface to support domain-oriented application composition and generation systems
[AD-A274080] p 2960 N94-25994

A physics-based heterojunction bipolar transistor model for integrated circuit simulation
[AD-A274081] p 2781 N94-25995

Satellite attitude determination using linear combination of models
[AD-A274082] p 2694 N94-25996

Rendering of three-dimensional data sets derived from finite-difference and spectral methods
[AD-A273724] p 3096 N94-25997

Discovery learning in autonomous agents using genetic algorithms
[AD-A274083] p 2677 N94-25998

Investigation of tension-compression fatigue behavior of a cross-ply metal matrix composite at room and elevated temperatures
[AD-A273731] p 2706 N94-25999

The modal solution to the Moon's orbit using canonical Floquet perturbation theory
[AD-A273732] p 2690 N94-26001

A comparison of users' and providers' perceptions of critical spacelift vehicle characteristics and capabilities
[AD-A273907] p 2691 N94-26017

Developing a graphical user interface to support a real-time digital signal processing system
[AD-A274032] p 2960 N94-26018

Weapon system sensor integration for a DIS-compatible virtual cockpit
[AD-A274088] p 2672 N94-26021

Using database technology to support domain-oriented application composition systems
[AD-A274091] p 3096 N94-26024

An approximate solution for the spinup dynamics of near axisymmetric axial gyrostats using the method of multiple scales
[AD-A273723] p 2698 N94-26223

Investigation into model-based fuzzy logic control
[AD-A274660] p 2985 N94-26336

Analysis of cost and schedule growth on sole source and competitive Air Force contracts
[AD-A273920] p 3094 N94-26814

Three dimensional object recognition using a complex autoregressive model
[AD-A274388] p 2995 N94-26829

Partitioning structural VHDL circuits for parallel execution on hypercubes
[AD-A274390] p 2785 N94-26830

An analysis of FM jamming and noise quality measures
[AD-A274349] p 2772 N94-26924

Detection of low-intensity magnetic fields with a magnetostrictive fiber optic sensor
[AD-A274120] p 3037 N94-27062

Interactive control of a parallel simulation from a remote graphics workstation
[AD-A274217] p 2981 N94-27070

Development of a performance evaluation tool (MMSOFE) for detection of failures with Multiple Model Adaptive Estimation (MMAE)
[AD-A274218] p 2665 N94-27071

Processing of wide-angle synthetic aperture radar signals for target detection
[AD-A274225] p 2773 N94-27073

An object-oriented database interface for Ada
[AD-A274391] p 2968 N94-27075

Enhanced tracking of airborne targets using forward looking infrared and laser return measurements
[AD-A274181] p 3037 N94-27102

A method for populating the knowledge base of AFIT's domain-oriented application composition system
[AD-A274128] p 3099 N94-27118

A parallel computational fluid dynamics unstructured grid generator
[AD-A274129] p 2795 N94-27119

Genetic algorithms applied to a mission routing problem
[AD-A274130] p 2968 N94-27120

Using discovery-based learning to prove the behavior of an autonomous agent
[AD-A274131] p 2987 N94-27121

Multiple model adaptive control of a large flexible space structure with purposeful dither for enhanced identifiability
[AD-A274132] p 2987 N94-27122

Design of a parallel discrete event simulation coprocessor
[AD-A274135] p 2982 N94-27123

Radar cross section visualization using sample buffer progressive refinement volume rendering
[AD-A274179] p 2773 N94-27127

Alternative architectures for domain-oriented application composition and generation systems
[AD-A274180] p 2968 N94-27128

Experimental verification of tomographic reconstruction of turbulent air flow structure using optical wavefront measurements
[AD-A274392] p 2795 N94-27129

Automation of formation flight control
[AD-A274137] p 2678 N94-27132

Virtual memory management and virtual bus overloading on multiple channel architectures
[AD-A274127] p 2954 N94-27152

An investigation of integrated product development implementation issues: A case study of Bosma Machine and Tool Corp.
[AD-A273917] p 2942 N94-27320

AIR FORCE LOGISTICS COMMAND, EDWARDS AFB, CA.

Freon recovery from nitrogen tetroxide and freon solutions
[PL-TR-92-3051] p 2721 N94-28215

AIR FORCE SYSTEMS COMMAND, BROOKS AFB, TX.

Aeromedical issues related to positive pressure breathing for +Gz protection
[AD-A274717] p 2910 N94-26435

AIR FORCE SYSTEMS COMMAND, WRIGHT-PATTERSON AFB, OH.

Investigation of mesoscale convective cloud clusters in South China
[AD-A274303] p 2895 N94-26678

Propagation of cold air masses in East Asia and its associated planetary-scale function
[AD-A274304] p 2895 N94-26850

Optimum for the gasdynamic system in a fast-axial-flow CO2 laser
[AD-A274305] p 2819 N94-26940

Practical design of resonant cavity for a RF free electron laser
[AD-A274306] p 2819 N94-26941

AKRON UNIV., OH.

Computer code for controller partitioning with IFPC application: A user's manual
[NASA-CR-195291] p 2678 N94-27414

On line quantification of crystal surfaces by stereo imaging
[NASA-CR-195277] p 3066 N94-27561

ALABAMA AGRICULTURAL AND MECHANICAL COLL., NORMAL.

Predoctoral training grant in the area of physical sciences
[DE94-004406] p 3039 N94-27603

ALABAMA UNIV., HUNTSVILLE.

Systematic Propulsion Optimization Tools (SPOT)
p 2976 N94-25666

FNAS lightning detection
[NASA-CR-193927] p 2893 N94-26134

BATSE Data Analysis
[NASA-CR-195545] p 3114 N94-26685

Verification of thermal analysis codes for modeling solid rocket nozzles
[NASA-CR-195248] p 2702 N94-27150

A measurement of the energy spectra of cosmic rays from 20 to 1000 GeV per AMU
[NASA-CR-195246] p 3115 N94-27167

Modelling of the MEA float zone using accelerometer data
[NASA-CR-193933] p 2761 N94-27220

UAH mathematical model of the variable polarity plasma ARC welding system calculation
[NASA-CR-193926] p 2824 N94-27221

Advanced technology development multi-color holography
[NASA-CR-193931] p 2812 N94-27229

Materials characterization on efforts for ablative materials
[NASA-CR-193929] p 2756 N94-27230

Enhanced simulation software for rocket turbopump, turbulent, annular liquid seals
[NASA-CR-195239] p 2825 N94-27383

Global change research related to the Earth's energy and hydrologic cycle
[NASA-CR-195270] p 2869 N94-27430

Use of photostress and strain gages to analyze behavior of weldments
[NASA-CR-195269] p 2843 N94-27765

Superfluid helium sloshing dynamics induced oscillations and fluctuations of angular momentum, force and moment actuated on spacecraft driven by gravity gradient or jitter acceleration associated with slew motion
[NASA-CR-193928] p 2799 N94-27931

ALABAMA UNIV., TUSCALOOSA.

Use of photostress and strain gages to analyze behavior of weldments
[NASA-CR-195269] p 2843 N94-27765

ALASKA UNIV., FAIRBANKS.

Seasonal snow of arctic Alaska R4D investigations
[DE93-040082] p 2892 N94-25939

Active layer dynamics and arctic hydrology and meteorology
[DE94-001724] p 2892 N94-25951

Remote sensing of global snowpack energy and mass balance: In-situ measurements on the snow of interior and Arctic Alaska
[NASA-CR-195704] p 2851 N94-27787

ALBERTA UNIV., EDMONTON.

Weak hadronic decays of heavy flavor mesons
[ISBN-0-315-55542-4] p 3026 N94-27402

MIMD parallel approaches to object labeling

Annals of the Research Inst. of Environmental Medicine, Nagoya Univ., volume 44 [REPT-44-VOL-44] p 2911 N94-27442

Changes in fluid and electrolyte metabolism during water immersion at high or thermoneutral temperature p 2912 N94-27445

Study on posture control and adaption mechanism under weightlessness: Results of second rehearsal for space experiment using carp p 2912 N94-27446

Study on posture control and adaptation mechanism under weightlessness: Summary report of ground operations performed for carp experiment (FMPT/L-2) in Space Shuttle mission p 2912 N94-27447

Telescience testbedding for physiological experiments under hypobaric hypoxic conditions: Development and evaluation in CNV measuring p 2913 N94-27451

The electrogastrogram during parabolic flight p 2913 N94-27452

Vertical gaze direction during parabolic flight p 2913 N94-27453

Frequency analysis of body sway induced by optokinetic stimulation p 2914 N94-27455

The mechanism of caloric nystagmus under microgravity. 1: Changes of endolymphatic pressure in the semicircular canal of pigeon by caloric stimulation p 2914 N94-27457

Cardiovascular function during thermoneutral head-out water immersion in the elderly p 2915 N94-27458

Effects of 40 C hot water immersion for an hour on thermoregulatory functions in humans: Comparison with 34 C thermoneutral immersion p 2915 N94-27459

Development of stimulus-seeking scale for expecting individual differences against confinement stress p 2915 N94-27460

Comparative measurement of visual stability in cosmic space: Onboard experiment and pre-flight activities p 2916 N94-27463

Modulation by galactosamine-induced hepatitis of biological responses of the rat exposed to high altitude hypoxia p 2904 N94-27464

Protective action of platelet-activating factor antagonist, TCV-309, against ischemia reperfusion injury in isolated rabbit hearts p 2904 N94-27465

Protective action of an amiloride derivative (amiloride, 5-(N, N-dimethyl) hydrochloride) against in isolated ischemia/reperfusion newborn rabbit hearts p 2904 N94-27466

Effects of high-intensity electric field stimulation on the electromechanical performance of cardiac muscle: Influence of fiber orientation p 2904 N94-27467

On the mechanism of reentrant arrhythmias following DC defibrillation: Influence of fiber orientation to the effects of low-energy electric field stimulation on the effective refractory period of cardiac muscle p 2904 N94-27468

Positive chronotropic effect of mechanical stretch on the sinoatrial node: Roles of neurotransmitters and stretch activated channels p 2904 N94-27469

Disturbed neuronal migration in the cerebral cortex of mice by low-dose gamma radiation p 2904 N94-27470

Distribution of GABA immunoreactive neurons in the brain of rolling mouse Nagoya and gamma-irradiated mouse p 2904 N94-27471

Effects of bathing at 40 C on cardiovascular system in humans: Comparison with 34 C thermoneutral bathing p 2918 N94-27473

Effects of 41 C bathing for 20 minutes on cardiovascular and thermoregulatory functions in humans p 2918 N94-27474

Monthly variation of physiological and psychological responses under unsteady thermal conditions p 2918 N94-27475

The intracellular second messenger system in c-fos gene induction by ACTH p 2904 N94-27477

Thyroid hormone action in cultured human skin fibroblasts: Evaluation using spheroid culture p 2919 N94-27478

Cloning of rat RXR alpha cDNA and the expression of its mRNA in regenerating liver and primary cultured hepatocytes p 2905 N94-27479

Cloning of a novel POU family gene by RT-PCR method p 2905 N94-27480

Effect of sera from patients treated with long-term hemodialysis on mRNA's for collagenase, stromelysin, and tissue inhibitor of metalloprotease in cultured human synovial cells p 2920 N94-27481

Expression analysis of Thyroxine-Binding Globulin Complete Deficiency in Japanese (TBG-CDJ) p 2905 N94-27482

Development of Purkinje cells in vitro p 2905 N94-27483

Developmental expression of protein kinase C type 1 isozyme in suncus and rat cerebella p 2905 N94-27484

Abnormal development of serotonin nerve fibers in the cerebral cortex of young rats with methylazoxymethanol induced microcephaly p 2905 N94-27485

Effects of ML-9, a myosin light-chain kinase inhibitor, on preimplantation development of the mouse p 2905 N94-27486

Compaction-like blastomere aggregation caused by 1-oleoyl-2-acetylglycerol in mouse embryos: An electron microscopic observation p 2905 N94-27487

Anorectal malformations induced by intraperitoneal injection of all-trans retinoic acid in suncus p 2905 N94-27489

Effect of PGE2 receptor agonists butaprost, M and B 28767 and an antagonist AH 6809 on the BK response of visceral polymodal receptors p 2906 N94-27494

Excitation of cutaneous polymodal receptor induced by sympathetic stimulation in adjuvant-induced arthritis rats p 2906 N94-27495

Selection of site injecting adjuvant in chronic inflammation model p 2906 N94-27496

Influence of mechanical stimulation on inflammatory edema p 2906 N94-27497

The effect of naloxone on sleeping time in adjuvant arthritic rats p 2906 N94-27498

Effects of capsaicin on freshly dissociated rat dorsal root ganglion cells p 2906 N94-27499

Size distribution of retrogradely labeled dorsal root ganglion cells: Test of normality p 2906 N94-27500

Effects of perfusion of amiodarone on electrophysiological properties in single rabbit ventricular myocytes p 2906 N94-27503

Fast and slow onsets of Na channel blocking actions due to lidocaine and disopyramide using concentration-clamp method p 2907 N94-27504

Electrophysiological effects of MS-551, a new Class 3 antiarrhythmic agent, on isolated rabbit ventricular muscles p 2907 N94-27505

Comparative investigation of new Class 3 antiarrhythmic drugs, E-4031 and MS-551, on electrophysiological properties in isolated rabbit ventricular myocytes p 2907 N94-27506

Effects of Class 1 antiarrhythmic drugs on the intraventricular conduction: Influence of fiber orientation p 2907 N94-27507

Effects of Class 3 antiarrhythmic agents, E-4031 and MS-551 on ventricular repolarization in isolated rabbit hearts p 2907 N94-27508

Electrical coupling between the sino-atrial node and atrial muscle: Cell to cell interaction through an external circuit and its simulation by computer modeling p 2907 N94-27509

A study on tissue excitation of cardiac muscle under electrical field stimulation p 2907 N94-27510

Block of cardiac sodium channels by Ro 22-9194 (R), a new antiarrhythmic agent: Effects on the maximum upstroke velocity (Vmax) of single guinea pig ventricular myocytes p 2907 N94-27511

Electrophysiological effects of an antiarrhythmic drug, moricizine on isolated guinea pig ventricular muscles p 2907 N94-27512

Correlation between electrical activity and the size of single sinoatrial node cells p 2907 N94-27513

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experimental study in rabbit single sinoatrial node cells p 2908 N94-27514

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Experiments using small sinoatrial node tissue preparations isolated from rabbit hearts p 2908 N94-27515

The ionic mechanism underlying the negative chronotropic effect of acetylcholine: Postganglionic vagal stimulation in isolated rabbit hearts p 2908 N94-27516

A study of psychological factors affecting an extremely isolated environment p 2927 N94-27517

Interhemispheric phase relationship of alpha waves and cerebral dominance p 2927 N94-27518

Analysis of the Electrically Evoked Response (EER) of the cat p 2908 N94-27519

Impaired associated movement in Parkinson's disease: An evaluation of Bell's phenomenon p 2928 N94-27520

Hyperalgesia to cold in patients with Subacute Myelo-Optico-Neuropathy (SMON) p 2928 N94-27521

Contribution of muscle spindle afferent activity to transient pause in EMG during voluntary tonic contraction p 2928 N94-27522

Effect of prostaglandin E1 on the relationship between skin sympathetic nerve activity and reduction in skin blood flow p 2929 N94-27524

Difference in skin blood flow reduction depending on activating maneuver of skin sympathetic nerve activity p 2929 N94-27525

Effect of L-dopa on hemodynamic functions in humans p 2929 N94-27526

Analysis on one minute wave in body fluid volume and muscle pumping referred to body parts generating the one minute wave during human active standing p 2929 N94-27528

The measurements of muscle blood flow by laser Doppler flowmetry with needle type probe p 2908 N94-27530

Muscle sympathetic nerve activity in patients with hyper-and hypothyroidism: A microneurographic study p 2930 N94-27531

Desensitization to acethylcholine in pacemaker cells of the sinoatrial node p 2908 N94-27537

Muscle sympathetic nerve activity in humans p 2932 N94-27538

The polymodal receptor p 2908 N94-27539

p 2697 N94-25699

NAVAL AEROSPACE MEDICAL RESEARCH LAB., PENSACOLA, FL.
Effects of methamphetamine on vigilance and tracking during extended wakefulness
[AD-A274896] p 2909 N94-26179
A comparison of two hardware implementations of a crew selection system
[AD-A274913] p 2937 N94-26346

NAVAL AIR WARFARE CENTER, WARMINSTER, PA.
A critical analysis of workload predictions generated by multiple resource theory during early crewstation design
[AD-A274804] p 2941 N94-26339
Methods for experimentally determining commercial jet aircraft landing parameters from video image data
[AD-A274207] p 2669 N94-27105

NAVAL COMMAND, CONTROL AND OCEAN SURVEILLANCE CENTER, SAN DIEGO, CA.
Radar detection of low-altitude targets in a maritime environment. Volume 2: Meteorological and radar data
[AD-A274658] p 2768 N94-26335
Demonstration of monolithic co-fabrication of Y1Ba2Cu3O7-Sigma and CMOS devices on the same sapphire substrate
[AD-A274757] p 3059 N94-26566
Generalized emulation microcircuit program
[AD-A274749] p 2785 N94-26797

NAVAL HEALTH RESEARCH CENTER, SAN DIEGO, CA.
Rewarming methodologies in the field
[AD-A274744] p 2909 N94-26173
Monitoring activity with a wrist-worn actigraph: Effects of amplifier passband and threshold variations
[AD-A274705] p 2909 N94-26377
Performance assessment in sustained operations using a computer-based synthetic work task
[AD-A274707] p 2937 N94-26430

NAVAL OCEANOGRAPHY COMMAND CENTER/JOINT TYPHOON WARNING CENTER, FPO SAN FRANCISCO, CA.
Tropical cyclone report, 1992
[AD-A274464] p 2896 N94-27025

NAVAL POSTGRADUATE SCHOOL, MONTEREY, CA.
Repeated knots in least squares multiquadric functions
[AD-A273866] p 2990 N94-25594
Predicting antenna parameters from antenna physical dimensions
[AD-A273893] p 3012 N94-25655
High temperature superconducting infrared imaging satellite p 2698 N94-25700
Low Earth orbit communications satellite
p 2698 N94-25701
Hydrographic and Acoustic Doppler Current Profiler (ADCP) data from the ONR eastern boundary current accelerated research initiative, 9-16 June 1992
[AD-A274115] p 2898 N94-26076
The study of single-pass GMA welds with different cover gas compositions on HSLA-100 steel
[AD-A274857] p 2822 N94-26174
Test methods and custom hardware for functional testing of a high speed GaAs DRAM
[AD-A274859] p 2781 N94-26175
Code division multiple access local area network communications employing fiber optic signal processing techniques
[AD-A274897] p 3096 N94-26180
Implementing a multiple criteria model base in co-op with a graphical user interface generator
[AD-A274901] p 3093 N94-26181
An analysis of multiple sensor system payloads for unmanned aerial vehicles
[AD-A274905] p 2667 N94-26182
Mesoscale frontal evolution of the ERICA IOP-5A Cyclone
[AD-A274906] p 2893 N94-26183
Effects of post-fabrication processing on the tensile properties of centrifugally cast SiC particulate reinforced aluminum composites
[AD-A274865] p 2707 N94-26190
Computational investigation of the compressible dynamic stall characteristics of the Sikorsky SSC-A09 airfoil
[AD-A274867] p 2644 N94-26191
Linear modeling of rotorcraft for stability analysis and preliminary design
[AD-A274869] p 2677 N94-26192
Design and specification of the Xpress transfer high-speed protocol
[AD-A274941] p 3097 N94-26297
NPSNET-4: A real-time, 3D distributed interactive virtual world
[AD-A274942] p 2961 N94-26298
Business process redesign: Design the improved process
[AD-A274947] p 3093 N94-26299
Design and implementation of a query editor for the Amadeus system
[AD-A274955] p 3097 N94-26300
Hybrid power system for remote communications stations
[AD-A274963] p 2782 N94-26301
Methods for improving low-angle, low-altitude radar tracking accuracy
[AD-A274914] p 2768 N94-26347
New binary integration strategies and corresponding R90 calculations
[AD-A274786] p 2769 N94-26359
Topics in longshore currents
[AD-A274788] p 2899 N94-26361
An apparatus for measurement of ignition and burning characteristics of metallic particles
[AD-A274815] p 2716 N94-26487
MIMO recursive least squares control algorithm for the AN/FPN-44A Loran-C transmitter
[AD-A274820] p 2664 N94-26493
Laser Doppler velocimetry in a low speed multistage compressor
[AD-A274836] p 2818 N94-26498
Modeling and simulation of a fiber distributed data interface local area network
[AD-A274838] p 3098 N94-26500
Application of Space Shuttle Project Hercules imagery in the investigation of ship cloud tracks
[AD-A274923] p 2692 N94-26529
Usefulness of compile-time restructuring of LGDF programs in throughput-critical applications
[AD-A274915] p 2963 N94-26530
Computer code for interactive rotorcraft preliminary design using a harmonic balance method for rotor trim
[AD-A274924] p 2668 N94-26531
A study on piezoelectric actuators and sensors for vibration control of flexible space structures
[AD-A274925] p 2695 N94-26532
Study of precipitation and recrystallization in Al alloy 2519 by backscattered electron imaging methods
[AD-A274919] p 2736 N94-26533
A finite wake theory for two-dimensional rotary wing unsteady aerodynamics
[AD-A274921] p 2645 N94-26535
A survey of uncontrolled satellite reentry and impact prediction
[AD-A274903] p 2695 N94-26750
Combatting inherent vulnerabilities of CFAR algorithms and a new robust CFAR design
[AD-A274918] p 2770 N94-26751
The influence of TIG welding thermal cycles on HSLA-100 steel plate
[AD-A274248] p 2740 N94-27009
Concepts and methods of measuring productivity at the organization level
[AD-A273126] p 3094 N94-27180
Performance considerations for the application of the lossless browse and residual model
p 2946 N94-28256

[ISBN-0-315-84553-8] p 2999 N94-27404

Solving the linear quadratic optimal control problem for infinite-dimensional systems
[ISBN-0-315-84562-7] p 2999 N94-27405

The analysis of thermal and 1/F noise in MOS devices, circuits and systems
[ISBN-0-315-57811-4] p 2787 N94-27642

An electronic switch based on quantum interference
[ISBN-0-315-84609-7] p 2787 N94-27650

Flexible range finding applied to 3D surface synthesis: A pseudo-trinocular approach
[ISBN-0-315-84616-X] p 2813 N94-27651

Advanced control of a flexible spherical wrist
[ISBN-0-315-84424-8] p 2826 N94-27652

An efficient and accurate Green's function analysis of packaged microwave integrated circuits
[ISBN-0-315-84425-6] p 2787 N94-27653

On the Lagrangian and updated Lagrangian nonlinear finite element formulations
[ISBN-0-315-61111-1] p 3001 N94-27948

A new approach to turboprop forward nacelle design
p 2655 N94-28336

WEIZMANN INST. OF SCIENCE, REHOVOTH (ISRAEL).

Surfaces allowing for fractional statistics
[DE93-614526] p 3002 N94-25910

Aspects of nonrenormalizable terms in a superstring standard-like models
[DE93-614530] p 3071 N94-25911

The 27th Annual Meeting of the Israel Society for Microscopy and the 12th Annual Meeting of the Israel Society for Histochemistry and Cytochemistry
[DE93-632416] p 2716 N94-26519

WESTINGHOUSE ELECTRIC CORP., BALTIMORE, MD.

Meteor Burst Communications (MBC) throughput improvement tests
[AD-A273941] p 2767 N94-25990

Ferroelectric fluoride memory FET development
[AD-A274341] p 2785 N94-27057

WESTINGHOUSE ELECTRIC CORP., PITTSBURGH, PA.

High temperature solid oxide fuel cell: Customer test units
[DE94-002961] p 2858 N94-26869

High temperature solid oxide fuel development activities
[DE94-002973] p 2858 N94-26871

WESTINGHOUSE HANFORD CO., RICHLAND, WA.

Nonswelling behavior of HT9 alloy irradiated to high exposure
[DE94-003502] p 2736 N94-26522

Hanford Environmental Information System (HEIS) sample/data entry flow summary
[DE94-002494] p 3098 N94-26559

WESTINGHOUSE SAVANNAH RIVER CO., AIKEN, SC.

Effect of nitrocarburizing on shape of titanium alloy parts
[DE94-004040] p 2732 N94-25822

Upset welding process for 21-6-9 spherical vessels
[DE93-018194] p 2832 N94-28229

WESTINGHOUSE SCIENCE AND TECHNOLOGY CENTER, PITTSBURGH, PA.

Processing, fabrication, and demonstration of HTS integrated microwave circuits, appendix A
[AD-A274600] p 2785 N94-26890

WICHITA STATE UNIV., KS.

The development of a horizontal impact sled facility and subsequent crashworthiness experiments
[NIAR-93-15] p 2680 N94-26200

WILKES COLL., WILKES-BARRE, PA.

Microspheres for laser velocimetry in high temperature wind tunnel p 2682 N94-27903

WINDSOR UNIV. (ONTARIO).

Visual surface perception: Surface reconstruction from shading and stereo
[ISBN-0-315-60974-5] p 2975 N94-27872

WISCONSIN UNIV., LA CROSSE.

Stopping powers and cross sections due to two-photon processes in relativistic nucleus-nucleus collisions
[NASA-CR-4574] p 3033 N94-27646

WISCONSIN UNIV., MADISON.

An evaluation of the utility of ground-based high resolution interferometer (GB-HIS) soundings of the planetary boundary layer
[DE94-000960] p 3106 N94-25981

Morphological analysis of ionomers
[DE94-003660] p 2749 N94-26005

Measurement of magnetic fluctuation induced energy transport
[DE94-003846] p 3042 N94-26132

Radial base functions: L(sup p)-approximation orders with scattered centers
[AD-A274682] p 3003 N94-26445

The dynamics of interacting nonlinearities governing long wavelength driftwave turbulence
[DE94-001785] p 2793 N94-26558

ARM Fourier transform spectrometer data analysis tools
[DE94-000865] p 2895 N94-26697

Radial basis function approximation: From gridded centers to scattered centers
[AD-A274184] p 2998 N94-27103

NCVS, volume 5
[AD-A274975] p 2902 N94-27165

Cosmic x ray physics
[NASA-CR-195225] p 3115 N94-27236

Cosmic x ray physics
[NASA-CR-195218] p 3115 N94-27419

Cosmic x ray physics
[NASA-CR-195219] p 3115 N94-27420

An analysis of monojet data in p(bar-p) collisions at square root of s equal to 1.8 TEV
[DE94-001822] p 3026 N94-27565

Fusion reactor systems studies
[DE94-003162] p 3046 N94-27686

TFTR experimental data analysis collaboration
[DE94-004166] p 3047 N94-27690

WISCONSIN UNIV., MILWAUKEE.

Pax: A permanent base for human habitation of Mars
p 2943 N94-25706

Were all extinction events caused by impacts?
p 2891 N94-28311

WOODS HOLE RESEARCH CENTER, MA.

Bibliography of technical reports, 1992
[AD-A274849] p 3098 N94-26561

WORCESTER POLYTECHNIC INST., MA.

Microgravity ignition experiment p 2761 N94-25707

Solar powered multipurpose remotely powered aircraft
p 2671 N94-25719

WRIGHT LAB., WRIGHT-PATTERSON AFB, OH.

Proposed Object Oriented Programming (OOP) enhancements to the Very High Speed Integrated Circuits (VHSIC) Hardware Description Language (VHDL)
[AD-A274004] p 2957 N94-25661

Three-wave nonlinear interactions in KTiOPO4 (KTP) and KTP isomorphs
[AD-A274079] p 3052 N94-25993

A VHDL register transfer level model of the linear token passing multiplex data bus protocol for the high speed data bus
[AD-A273734] p 2980 N94-26009

An investigation of the surge behavior of a high-speed ten-stage axial flow compressor
[AD-A274910] p 2674 N94-26345

Optical characterization and guided wave loss measurements for end-capped 6F-polybenzoxazole
[AD-A274586] p 3036 N94-26982

Experiments on the ground vortex formed by an impinging jet in cross flow p 2802 N94-28016

A study of jet effect and ground effect interference on a STOL fighter p 2671 N94-28034

WRIGHT STATE UNIV., DAYTON, OH.

Pulse waveform and transcranial Doppler analysis during lower body negative pressure
[AD-A274516] p 2911 N94-27088

WYLE LABS., INC., ARLINGTON, VA.

On the aging of sonic booms p 2650 N94-28194

Y

YAGI MEMORIAL PARK, MITAKE (JAPAN).

Development of inbred strains from Japanese wild rats (Rattus norvegicus) p 2906 N94-27492

YALE UNIV., NEW HAVEN, CT.

Preparation and characterization of high temperature superconductor film surfaces
[AD-A274293] p 3059 N94-26681

YAMAGATA UNIV. (JAPAN).

Mechanism for regulation of myocardial contractility by autonomic drugs: Pathophysiological relevance in congestive heart failure p 2931 N94-27536

YAMANASHI UNIV., KOFU (JAPAN).

Simultaneous observation of families and air showers at Mt. Chacaltaya p 3114 N94-25634

YARDNEY TECHNICAL PRODUCTS, INC., PAWCATUCK, CT.

High rate lithium/thionyl chloride bipolar battery development p 2864 N94-28133

YASUI ACUPUNCTURE CLINIC, NAGOYA (JAPAN).

Changes in pain sensation induced by repetitive application of noxious heat pulses to the human skin
p 2924 N94-27501

YORK UNIV. (ONTARIO).

A numerical solution to the one and two dimensional line radiative transfer equation
[ISBN-0-315-84258-X] p 2994 N94-26640

Wobble-nutation modes of the Earth
[ISBN-0-315-84246-6] p 3102 N94-26669

A three-dimensional chemical transport model study of the 1991 Antarctic ozone hole using objectively analysed data
[ISBN-0-315-84250-4] p 2867 N94-26670

A variational approach to the quantum field theoretic bound-state problem
[ISBN-0-315-60960-5] p 3074 N94-27401

YORK UNIV., TORONTO (ONTARIO).

Response of an airborne synthetic aperture radar to sea ice in the marginal ice zone
[ISBN-0-315-84243-1] p 2849 N94-26668

A relativistic quark model
[ISBN-0-315-60926-5] p 3025 N94-27333

CONTRACT NUMBER INDEX

Typical Contract Number Index Listing

AF PROJ. 2306 .... p 92 N94-11866

CONTRACT NUMBER | PAGE NUMBER | ACCESSION NUMBER

Listings in this index are arranged alphanumerically by contract number. Under each contract number the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order. The page number helps to locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

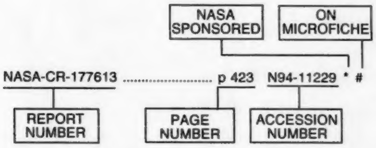
REPORT NUMBER INDEX

Typical Report Number Index Listing



Listings in this index are arranged alphanumerically by report number. The accession number denotes the number by which the citation is identified. The page number helps to locate the citation in the abstract section. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

APPENDIX

NASA SCIENTIFIC AND TECHNICAL INFORMATION PROGRAM PRODUCTS AND SERVICES

The NASA Scientific and Technical Information (STI) Program provides for the collection and announcement of aerospace-related reports and literature obtained worldwide through agreements and exchanges. The result of the collection is the comprehensive NASA STI Database that covers aeronautics, space, and supporting disciplines.

The STI Database, documents generated or obtained by NASA, and products and services derived from or supporting the database are made available to the NASA research community and to the public. Descriptions and sources of these items are presented in the following pages.

Scientific and Technical Aerospace Reports (STAR) is an abstract journal, listing citations with abstracts for aerospace-related reports obtained from worldwide sources. *STAR* is issued on the first of each month, and announces current documents that have been entered into the NASA STI Database during the previous month. The reports are of the following types:

- NASA, NASA contractor, and NASA grantee reports;
- Reports issued by other U.S. Government agencies, domestic and foreign institutions, universities, and private firms;
- Translations in report form;
- NASA-owned patents and patent applications
- Other U.S. Government agency and foreign patents and patent applications
- Domestic and foreign dissertations and theses.

Journal, book, and conference literature, journal translations, and certain foreign dissertations having the same subject scope as *STAR* are announced in a companion journal, *NASA Open Volumes on Aerospace (NOVA). NOVA* is issued on the 15th of each month and is available from the NASA Center for AeroSpace Information, at the address below.

ELIGIBILITY AND REGISTRATION FOR NASA STI PRODUCTS AND SERVICES

Organizations of the type listed below that have registered with NASA can receive products and services.

- NASA offices and installations, contractors, subcontractors, grantees, and consultants;
- Other U.S. Government agencies and their contractors;
- Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public reference;
- Other organizations in the United States having a need for NASA documents in work related to aeronautics and space research;
- Organizations abroad that have established reciprocal documents exchange arrangements with NASA.

The central service points—central points of document acquisition and control within qualified organizations—or individuals are eligible to register for NASA STI products and services. Domestic organizations or individuals may be eligible to receive various classes of NASA publications and services and should address their requests for registration or further information to:

ATTN: Registration Services
NASA Center for AeroSpace Information
800 Elkridge Landing Road
Linthicum Heights, MD 21090-2934
301-621-0390

Organizations abroad should direct requests to:

National Aeronautics and Space Administration
Scientific and Technical Information Program (JTT)
International STI Program
Washington, DC 20546-0001
USA
703-271-5640

SUBJECT SCOPE

The subject scope of *STAR* and *NOVA* includes all aspects of aeronautics and space research and development, supporting basic and applied research, and applications. Aerospace aspects of Earth resources, energy development, conservation, oceanography, environmental protection, urban transportation, and other topics of high national priority are also covered.

HOW TO USE *STAR* SUBJECT CATEGORIES

Abstracts in *STAR* are categorized by 10 major subject divisions that are divided further into 76 specific subject categories. The subject divisions and categories are listed in the Table of Contents together with a note for each that defines its scope and provides any cross-references. For example:

> **16 SPACE TRANSPORTATION**
>
> Includes passenger and cargo space transportation, e.g., shuttle operations; and space rescue techniques. For related information see also *03 Air Transportation and Safety* and *18 Spacecraft Design, Testing and Performance*. For space suits see *54 Man/System Technology and Life Support*.

CROSS-REFERENCES

Individual *STAR* abstracts are not ordinarily cross-referenced, except for certain conference reports or book translations that have had separate abstracts written for their component papers or chapters. Citations and abstracts of the components follow immediately after those of the parent document. When the subject content of a component differs sufficiently from the general content of the parent, a cross-reference citation also is printed at the end of the category to which it normally would have been assigned if it were independent.

DOCUMENTS ON MICROFICHE

Documents available on microfiche are designated by a pound sign (#) following the accession number.

LIMITED REPRODUCIBILITY

A note of limited reproducibility appears in the citation, if there are factors affecting the reproducibility of more than 20% of the document. These factors include faint or broken type, color photographs, black and white photographs, foldouts, dot matrix print, or some other factor that limits the reproducibility of the document. This notation also appears on the microfiche header.

COLOR COPIES

An increasing number of NASA scientific and technical reports are being produced with color graphs, charts, illustrations, and photographs. An indication that a document has color pages follows the source and pricing (SAP) information in the *STAR* citation.

Registered users of the NASA Scientific and Technical Information Program will receive ordered documents with color at no additional cost, as long as stock copies of the document are available. Otherwise, an additional fee of $2.00 per color page will be charged. The NASA Center for AeroSpace Information staff will contact registered users to determine individual user's needs.

NASA PATENTS AND PATENT APPLICATIONS

Patents and patent applications owned by NASA are announced in *STAR* under appropriate subject categories and are referenced in the *STAR* indexes. In the Report Number Index, patents are indexed by the NASA Case Number, and the U.S. Patent Class. Patent applications are indexed by the NASA Case Number and the U.S. Patent Application Serial Number.

Printed copies of patents (which are not microfiched) are available for purchase from the U.S. Patent and Trademark Office.

When ordering patents, the U.S. Patent Number should be used, and payment must be remitted in advance, by money order or check payable to the Commissioner of Patents and Trademarks. Prepaid purchase coupons for ordering are also available from the U.S. Patent and Trademark Office.

NASA patent application specifications are sold in both paper copy and microfiche by the NASA Center for AeroSpace Information (CASI). The N accession number should be used in ordering either paper copy or microfiche from CASI.

The patents and patent applications announced in *STAR* are owned by NASA and are available for royalty-free licensing. Requests for licensing terms and further information should be addressed to:

National Aeronautics and Space Administration
Associate General Counsel for Intellectual Property
Code GP
Washington, DC 20546-0001

SOURCES FOR DOCUMENTS

One or more sources from which a document announced in *STAR* is available to the public is ordinarily given on the last line of the citation. The most commonly indicated sources and their acronyms or abbreviations are listed below, and their addresses are listed on page A-6. If the publication is available from a source other than those listed, the publisher and his address will be displayed on the availability line or in combination with the corporate source line.

Avail: CASI. Sold by the NASA Center for AeroSpace Information. Prices for hard copy (HC) and microfiche (MF) are indicated by a price code following the letters HC or MF in the *STAR* citation. Current values for the price codes are given in the tables on page A-7.

NOTE ON ORDERING DOCUMENTS: When ordering publications from CASI, use the N accession number or other report number. It is also advisable to cite the title and other bibliographic identification.

Avail: SOD (or GPO). Sold by the Superintendent of Documents, U.S. Government Printing Office, in hard copy.

Avail: BLL (formerly NLL): British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. Photocopies available from this organization at the price shown. (If none is given, inquiry should be addressed to the BLL.)

Avail: DOE Depository Libraries. Organizations in U.S. cities and abroad that maintain collections of Department of Energy reports, usually in microfiche form, are listed in *Energy Research Abstracts.* Services available from the DOE and its depositories are described in a booklet, *DOE Technical Information Center - Its Functions and Services* (TID-4660), which may be obtained without charge from the DOE Technical Information Center.

Avail: ESDU. Pricing information on specific data, computer programs, and details on Engineering Sciences Data Unit (ESDU) topic categories can be obtained from ESDU International Ltd. Requesters in North America should use the Virginia address while all other requesters should use the London address, both of which are on page A-6.

Avail: Fachinformationszentrum Karlsruhe. Gesellschaft für wissenschaftlich-technische Information mbH 76344 Eggenstein-Leopoldshafen, Germany.

Avail: HMSO. Publications of Her Majesty's Stationery Office are sold in the U.S. by Pendragon House, Inc. (PHI), Redwood City, CA. The U.S. price (including a service and mailing charge) is given, or a conversion table may be obtained from PHI.

Avail: Issuing Activity, or Corporate Author, or no indication of availability. Inquiries as to the availability of these documents should be addressed to the organization shown in the citation as the corporate author of the document.

Avail: NASA Public Document Rooms. Documents so indicated may be examined at or purchased from the National Aeronautics and Space Administration (JBD-4), Public Documents Room (Room 1H23), Washington, DC 20546-0001, or public document rooms located at NASA installations, and the NASA Pasadena Office at the Jet Propulsion Laboratory.

Avail: NTIS. Sold by the National Technical Information Service. Initially distributed microfiche under the NTIS SRIM (Selected Research in Microfiche) are available. For information concerning this service, consult the NTIS Subscription Section, Springfield, VA 22161.

Avail: Univ. Microfilms. Documents so indicated are dissertations selected from *Dissertation Abstracts* and are sold by University Microfilms as xerographic copy (HC) and microfilm. All requests should cite the author and the Order Number as they appear in the citation.

Avail: US Patent and Trademark Office. Sold by Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, at the standard price of $1.50 each, postage free. (See discussion of NASA patents and patent applications on page A-3.)

Avail: (US Sales Only). These foreign documents are available to users within the United States from the National Technical Information Service (NTIS). They are available to users outside the United States through the International Nuclear Information Service (INIS) representative in their country, or by applying directly to the issuing organization.

Avail: USGS. Originals of many reports from the U.S. Geological Survey, which may contain color illustrations, or otherwise may not have the quality of illustrations preserved in the microfiche or facsimile reproduction, may be examined by the public at the libraries of the USGS field offices whose addresses are listed on page A-6. The libraries may be queried concerning the availability of specific documents and the possible utilization of local copying services, such as color reproduction.

FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 53 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 53 regional depositories. A list of the regional GPO libraries, arranged alphabetically by state, appears on page A-8. These libraries are *not* sales outlets. A local library can contact a regional depository to help locate specific reports, or direct contact may be made by an individual.

PUBLIC COLLECTION OF NASA DOCUMENTS

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA — Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

SUBMITTING DOCUMENTS

All users of this abstract service are urged to forward reports to be considered for announcement in *STAR*. This will aid NASA in its efforts to provide the fullest possible coverage of all scientific and technical publications that might support aeronautics and space research and development. If you have prepared relevant reports (other than those you will transmit to NASA, DOD, or DOE through the usual contract- or grant-reporting channels), please send them for consideration to the NASA Center for AeroSpace Information, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

Reprints of journal articles, book chapters, and conference papers are also welcome. These will be considered for announcement in *STAR's* companion journal, *NOVA*.

You may specify a particular source to be included in a report announcement if you wish; otherwise the report will be placed on a public sale at the NASA Center for AeroSpace Information. Copyrighted publications will be announced but not distributed or sold.

PURCHASE OF *STAR*

STAR is publicly available on annual subscription from the NASA Center for AeroSpace Information (CASI) at $94.00/domestic, $117.00/foreign. Single copy prices: $33.00/domestic, $41.00/foreign.

An annual, cumulative *STAR Index* is also available at $54.00/domestic, $65.00/foreign.

STAR is available to registered users on annual subscription from the NASA Center for AeroSpace Information, ATTN: Registration Services, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.
